Inadvertently, the current provision does not include instructions concerning the timing and frequency of the computation of the amount of the deposit and the timing of the deposit. In addition, the current provision does not include a requirement that a record be made of each computation and that such records be preserved. Therefore, the Department proposes to amend § 403.5(e) by adding new paragraphs (e)(5) and (e)(6). Proposed paragraph (e)(5) requires that the computation be made weekly as of the close of the last business day of the week and that the deposit so computed be made no later than one hour after the opening of banking business on the second following business day. Proposed paragraph (e)(6) requires that the foreign branch and agency make and maintain a record of each computation and that these records be preserved for three years, the first two years of which the records must be maintained in an easily accessible place. Both proposed paragraphs are based on comparable provisions relating to the computation of the reserve formula in Rule 15c3–3(e)(3).

Effective Dates—Technical Amendments

Section 403.7 contains effective dates for various provisions of Part 403. In § 403.7 (b), (c), (d) and (e), references to § 403.4(e) have been changed to refer more generally to § 403.4 to conform to the modifications to § 403.4(e) discussed above. Additionally, the introductory language in paragraphs (d)(1) and (d)(2) has been modified to make clear that the interim disclosures addressed in § 403.7(d) were to be used only until such time as the requirement for obtaining a written agreement, with the disclosures required under § 403.4 or § 403.5(d), became effective. With the requirement for a written agreement in effect, hold-in-custody repurchase transactions may not be entered into with a counterparty until such written agreement is obtained from the counterparty.

D. Part 404—Recordkeeping and Record Preservation

In Part 404, changes are being proposed to § 404.4, which contains recordkeeping requirements for government securities brokers and dealers that are financial institutions.

Reference to Part 450; Securities Count

The Department proposes to make two corrections to § 404.4(a). Section 404.4(a)(2) would be corrected to provide that a financial institution government securities broker or dealer must make and keep the records required by § 450.4 (c), (d) and (f) of the regulations. The current provision provides that records required by § 450.4 (c), (d)(3) and (f) be made and kept.

Section 404.4(a)(3) would also be corrected to eliminate the reference to the "physical" count of securities. A government securities broker or dealer that is a financial institution is required by § 403.5(a)(2) of the regulations to comply with Part 450 of the regulations. Section 450.4(d) requires an annual count of government securities held for customers both in definitive and book-entry form. The term physical count is not an accurate description of the securities count required by § 450.4(d) because securities in book-entry form must be included in the count.

E. Part 450—Custodial Holdings of Government Securities by Depository Institutions

In Part 450, a change is being proposed to § 450.1, which addresses the scope of and office responsible for the regulations.

Interpretations of Part 450

A change is being made to § 450.1(b) to clarify that the procedure described for requesting and giving interpretations of the regulations described in § 400.2 is also applicable to interpretations of Part 450.

III. Special Analyses

Based on discussions with government securities brokers and dealers and depository institutions, it is the Department's view that the proposed regulations will not impose any major increase in costs on those affected or significantly affect the economy. In addition, the Department has concluded that the proposed regulations will not have an unnecessary or inappropriate differential impact on classes of entities affected by the regulations such as to create a burden on competition.

The changes described in the section-by-section analysis are clarifications or revisions with limited impact. The proposed revisions to Part 400 modify slightly the procedures for obtaining confidential treatment of sensitive information submitted in connection with requests for interpretation or exemption and do not impose any substantive regulatory requirements. The proposed revisions to Part 402 clarify treatment of certain items included in the required calculation of liquid capital and also do not involve new regulatory requirements. The proposed revision to § 403.4 does not represent a substantive change but merely changes the provision relating to hold-in-custody repurchase transactions to take into account the adoption of an essentially identical provision by the SEC.

With respect to the proposed elimination of the "safekeeping exception" in § 403.5, it was the expectation of the Department that the exception would have limited applicability. As described above, the exception is being withdrawn because the Department has concluded that it is not feasible to provide such an exception without creating the potential for much broader applicability than was anticipated. Potential modifications to the exception have proven to be ineffective in clarifying the intended scope. The proposed revision to § 403.5(e) clarifies that the imposition on branches or agencies of foreign banks of a reserve requirement based on SEC Rule 15c3–3 was intended to incorporate the requirement that the calculation be done weekly. The revision also includes a specific recordkeeping requirement, similar to the requirements of Part 404, that was omitted in the final rule. The proposed revision to Part 450 clarifies that the procedures set out in Part 400 for requests for interpretation also are applicable to interpretations of Part 450.

Based on the foregoing, the Department has concluded that the proposed regulations do not constitute a major rule for the purposes of Executive Order 12291 and that a regulatory impact analysis is not required.

In addition, it is hereby certified that the proposed regulations, if adopted, will not have a significant economic impact on a substantial number of small entities. Although the safekeeping exception was intended, in part, to accommodate financial institutions whose repurchase transaction activity normally would be relatively limited, the Department does not expect that its deletion will have a significant impact on that activity or on the institutions as a whole. As a result, a regulatory flexibility analysis is not required.

The collection of information requirements contained in this proposed rule have been submitted to the Office of Management and Budget pursuant to section 3504(h) of the Paperwork Reduction Act (44 U.S.C. 3504(h)). Comments on those requirements should be sent to the Office of Information and Regulatory Affairs, Office of Management and Budget, Attention: Desk Officer for the Department of the Treasury, Washington, DC 20503, and to the Government Securities Regulations Staff, Bureau of the Public Debt, at the address specified at the beginning of this document.

List of Subjects

17 CFR Part 400

Administrative practice and procedure, Banks, banking, Brokers, Government securities, Reporting and recordkeeping requirements.

17 CFR Part 402

Brokers, Government securities.

17 CFR Part 403

Banks, banking, Brokers, Government securities.

17 CFR Part 404

Banks, banking, Brokers, Government Securities, Reporting and recordkeeping requirements.

17 CFR Part 450

Banks, banking, Government securities, Reporting and recordkeeping requirements.

For the reasons set out in the Preamble, it is proposed to amend 17 CFR Parts 400, 402, 403, 404, and 450 as follows:

PART 400—RULES OF GENERAL APPLICATION

1. The authority citation for Part 400 continues to read as follows:

Authority: Sec. 101, Pub. L. 99–571, 100 Stat. 3209 (15 U.S.C. 78o–5).

2. Section 400.2 is amended by revising paragraphs (c)(1) and (c)(3)(iv); by redesignating (c)(3)(v) as (c)(3)(vi) and revising it; by adding a new (o)(3)(v); and by revising paragraph (c)(7) to read as follows:

§ 400.2 Office responsible for regulations; filing of requests for exemptions, for interpretations and of other materials.

* * * * *

(c) * * *

(1) Interpretations under this chapter may be provided, at the discretion of the Department, to firms or individuals actually or potentially affected by the Act or regulations, or to their representatives.

* * * * *

(3) * * *

(iv) In addition to requests for confidential treatment under paragraph (c)(7)(ii) of this section, a person may request confidential treatment of information that is submitted as part of, or in support of, a request for interpretation, exemption, or classification. A separate request for confidential treatment and the basis for such request shall be submitted at the time the information for which confidential treatment is requested is submitted. The request for confidential treatment must specifically identify the information for which such confidential treatment is requested. To the extent practicable, the information should be segregated from information for which confidential treatment is not requested and should be clearly marked as confidential.

(v) Information designated as confidential in accordance with paragraph (c)(3)(iv) of this section shall not be disclosed to a person requesting such information other than in accordance with the procedures outlined in the Department's regulations published at 31 CFR 1.6.

(vi) An original and two copies of each request letter shall be submitted to the Office of the Commissioner, Bureau of the Public Debt, Room 553, 999 E Street NW., Washington, DC 20239–0001. The envelope shall be marked "Government Securities Act Request." The letter shall indicate in the upper right hand corner of the first page the particular sections of the Act and of the regulations at issue.

* * * * *

(7)(i) Except as provided in paragraphs (c)(3)(iv) and (c)(7)(ii) of this section, every letter or other written communication requesting the Department to provide interpretive legal advice under the Act or to grant, deny or modify an exemption, classification or modification of the regulations, together with any written response thereto, shall be made available for inspection and copying as soon as practicable after the response has been sent or given to the person requesting it. These documents will be made available at the following location: Treasury Department Library, Room 5030, Main Treasury Building, 1500 Pennsylvania Avenue, NW., Washington, DC 20220.

(ii) Any person submitting a letter or communication may also simultaneously submit a request that the letter or communication and the Department's response be accorded confidential treatment for a specified period of time not to exceed 120 days from the date the response has been made or given to such person. The request shall state the basis upon which the request for confidential treatment has been made. If the Department determines that the request for confidential treatment should be denied, the requester will be given 30 days to withdraw either the request for confidential treatment or the letter or communication requesting an interpretation, classification, or exemption.

* * * * *

PART 402—FINANCIAL RESPONSIBILITY

3. The authority citation for Part 402 continues to read as follows:

Authority: Section 101, Pub. L. 99–571, 100 Stat. 3209 (15 U.S.C. 78o–5(b)(1)(A), (b)(2)).

4. Section 402.2 is amended by redesignating and revising paragraphs (e)(1) (vi), (vii), and (viii) as (e)(1) (vii), (viii), and (ix); by adding a new paragraph (e)(1)(vi); and by revising paragraph (g)(1)(iv) to read as follows:

§ 402.2 Capital requirements for registered government securities brokers and dealers.

* * * * *

(e) * * *

(1) * * *

(vi) Securities, other than equity securities, issued by international organizations that have a statutory exemption from the registration requirements of the Securities Act of 1933 and the Securities Exchange Act of 1934 provided their changes in yield are closely correlated to the changes in yield of similar Treasury securities, including STRIPS;

(vii) Futures, forwards, and listed options on Treasury market risk instruments described in paragraphs (e)(1) (i)–(vi) of this section or on time deposits whose changes in yield are closely correlated with the Treasury market risk instruments described in paragraph (e)(1)(iii) of this section, settled on a cash or delivery basis;

(viii) Options on those futures contracts described in paragraph (e)(1)(vii) of this section, settled on a cash or delivery basis; and

(ix) Unlisted options on marketable Treasury bills, notes or bonds.

* * * * *

(g) * * *

(1) * * *

(iv) *Credit volatility haircut.* The "credit volatility haircut" equals the product of a credit volatility haircut factor of 0.15 percent and the dollar amount of the larger of the gross long position or gross short position in those Treasury market risk instruments described in paragraphs (e)(1) (iii), (iv) and (v) of this section that have a term to maturity greater than 44 days, including futures and forwards thereon, settled on a cash or delivery basis, and futures and forwards on time deposits described in paragraph (e)(1)(vii) of this section, that have a term to maturity greater than 44 days, settled on a cash or delivery basis.

5. Section 402.2a is amended by revising paragraphs (a)(1)(iii)(B), (a)(1)(iii)(C), (a)(1)(iv)(B) and

(a)(1)(iv)(C); by adding paragraphs (a)(1)(iii)(D) and (a)(1)(iv)(D); by revising paragraphs (a)(3)(i)(A) introductory text, (a)(3)(i)(A)(*1*), (a)(3)(ii)(A) introductory text, and (a)(3)(ii)(A)(*1*); by revising in paragraph (c) *Instructions to Schedules A through E, Schedule A—Liquid Capital Requirement Summary Computation,* Line 3 c.; *Schedule B—Calculation of Net Immediate Position in Securities and Financings,* in Columns 3 and 4 revising paragraphs (4), (5) and the first paragraph of concluding text, and adding paragraph (6); and *Schedule D—Consolidation of Net Immediate Position Interim Haircuts with Gross Futures and Options Interim Haircuts,* revising the second and third paragraphs, to read as follows:

§ 402.2a Appendix A—Calculation of market risk haircut for purposes of § 402.2(g)(2).

* * * * *

(a) * * *

(1) * * *

(iii) * * *

(B) The net long when-issued position in a marketable U.S. Treasury security between announcement and issue date;

(C) The net long when-issued position in a government agency or a government-sponsored agency debt security between release date and issue date; and

(D) The net long when-issued position in a security described in § 402.2(e)(1)(vi) between announcement date and issue date.

(iv) * * *

(B) The net short when-issued position in a marketable U.S. Treasury security between announcement and issue date;

(C) The net short when-issued position in a government agency or a government-sponsored agency debt security between release date and issue date; and

(D) The net short when-issued position in a security described in § 402.2(e)(1)(vi) between announcement date and issue date.

* * * * *

(3) * * *

(i) * * *

(A) Gross long futures and forward interim haircut. The "gross long futures and forward interim haircut" equals, for each category in § 402.2(f)(1), the sum of the interim haircuts on each long futures position and long forward position placed, in the case of a futures or forward contract which is a Treasury market risk instrument except those on mortgage-backed securities, in the category corresponding to the sum of the term to maturity of the contract and the term to maturity of the underlying instrument at the time of the maturity of the contract or, in the case of a futures or forward contract on Treasury market risk mortgage-backed securities, in the category corresponding to the type of Treasury market risk mortgage-backed security.

(*1*) For purposes of this part, the "interim haircut on each long futures position and each long forward position" is the product of the net position haircut factor for the category corresponding to, in the case of a futures or forward contract which is a Treasury market risk instrument except those on mortgage-backed securities, the maturity of the underlying instrument at the time of the maturity of the contract or, in the case of a futures or forward contract on Treasury market risk mortgage-backed securities, the type of Treasury market risk mortgage-backed security and the value of the long futures position or long forward position evaluated at the current market price for such contract.

* * * * *

(ii) * * *

(A) *Gross short futures and forward interim haircut.* The "gross short futures and forward interim haircut" equals, for each category in § 402.2(f)(1), the sum of the interim haircuts on each short futures position and short forward position placed, in the case of a futures or forward contract which is a Treasury market risk instrument except those on mortgage-backed securities, in the category corresponding to the sum of the term to maturity of the contract and the term to maturity of the underlying instrument at the time of the maturity of the contract or, in the case of a futures or forward contract on Treasury market risk mortgage-backed securities, in the category corresponding to the type of Treasury market risk mortgage-backed security.

(*1*) For purposes of this part, the "interim haircut on each short futures position and each short forward position" is the product of the net position haircut factor for the category corresponding to, in the case of a futures or forward contract which is a Treasury market risk instrument except those on mortgage-backed securities, the maturity of the underlying instrument at the time of the maturity of the contract or, in the case of a futures or forward contract on Treasury market risk mortgage-backed securities, the type of Treasury market risk mortgage-backed security and the value of the short futures position or short forward position evaluated at the current market price for such contract.

* * * * *

(c) * * *

Instructions to Schedules A through E * * *

Schedule A * * *

Line 3 * * *

c. Enter the credit volatility haircut which equals a factor of 0.15 percent applied to the larger of the gross long or gross short position in money market instruments qualifying as Treasury market risk instruments which mature in 45 days or more, in futures and forwards on these instruments that are settled on a cash or delivery basis, and in futures and forwards on time deposits described in § 402.2(e)(1)(vii), that mature in 45 days or more, settled on a cash or delivery basis. Money market instruments qualifying as Treasury market risk instruments are (1) marketable certificates of deposit with no more than one year to maturity, (2) bankers acceptances, and (3) commercial paper which has no more than one year to maturity and is rated in one of the three highest categories by at least two nationally recognized statistical rating organizations.

* * * * *

Schedule B * * *

Columns 3 and 4 * * *

(4) Bankers acceptances;

(5) Commercial paper of no more than one year to maturity rated in one of the three highest categories by at least two nationally recognized statistical rating organizations; and

(6) Securities described in § 402.2(e)(1)(vi).

Report all positions as of the trade date. If the settlement date is scheduled for more than five business days in the future (or, in the case of a mortgage-backed security, more than thirty calendar days in the future), then report the position as a forward contract on Schedule D. Also, under "Securities Positions" in the appropriate column and category, report any when-issued position in a marketable Treasury security between announcement and issue date, any when-issued position in a government agency or a government-sponsored agency debt security between release date and issue date, and any when-issued position in a security described in § 402.2(e)(1)(vi) between announcement date and issue date.

* * * * *

Schedule D * * *

Report on Schedule D futures, forwards, and options which are Treasury market risk instruments as defined in § 402.2(e). These futures, forwards, and listed option contracts may be based on any of the Treasury market risk instruments described in the instructions to columns 3 and 4 on Schedule B or on time deposits whose changes in yield are closely correlated with marketable certificates of deposit which are Treasury market risk instruments, as described in § 402.2(e)(1)(vii). Options on Treasury market risk futures contracts and unlisted options on marketable Treasury bills, notes, and bonds are also to be included. Futures contracts may settle on a cash or delivery basis. Any of these contracts which are being included as part of a hedge in the calculation of the other securities haircut must be excluded from Schedule D.

Report as a forward contract any position for which the time between trade date and settlement date is more than five business days (30 calendar days for a mortgage-

PART 403—PROTECTION OF CUSTOMER SECURITIES AND BALANCES

6. The authority citation for Part 403 continues to read as follows:

Authority: Sec. 101, Pub. L. 99-571, 100 Stat. 3209 (15 U.S.C. 78o-5(b)(1)(A), (b)(2)).

7. Section 403.1 is revised to read as follows:

§ 403.1 Application of part to registered brokers and dealers.

With respect to their activities in government securities, compliance by registered brokers or dealers with § 240.8c-1 of this title (SEC Rule 8c-1), as modified by § 403.2 (a), (b) and (c), with § 240.15c2-1 of this title (SEC Rule 15c2-1), with § 240.15c3-2 of this title (SEC Rule 15c3-2), as modified by § 403.3, and with § 240.15c3-3 of this title (SEC Rule 15c3-3), as modified by § 403.4 (a)-(d), (e)(2)-(3), and (f)-(i), constitutes compliance with this part.

8. Section 403.4 is amended by revising paragraph (e) to read as follows:

§ 403.4 Customer protection—reserves and custody of securities.

* * * * *

(e)(1) For purposes of this section, § 240.15c3-3(b)(4)(i)(C) is modified to read as follows: "(C) Advise the counterparty in the repurchase agreement that the Securities Investor Protection Act of 1970 will not provide protection to the counterparty with respect to the repurchase agreement."

(2) For purposes of this section, § 240.15c3-3(b)(4)(ii) is modified to read as follows: "(ii) For purposes of this paragraph (4), securities are in the broker's or dealer's control only if they are in the control of the broker or dealer within the meaning of § 240.15c3-3 (c)(1), (c)(3), (c)(5), (c)(6), or § 403.4(f) of this title."

(3) For purposes of this section, § 240.15c3-3(b)(4)(iv) is redesignated § 240.15c3-3(b)(4)(iv)(A) and paragraph (b)(4)(iv)(B) is added to read as follows: "(B) A person that is a non-U.S. citizen residing outside of the United States or a foreign corporation, partnership, or trust may waive, but only in writing, the right to receive the confirmation required by paragraph (b)(4)(i)(B) of this section."

* * * * *

9. Section 403.5 is amended by revising the introductory text of paragraph (d)(1); by adding paragraphs (e)(5) and (e)(6) and by removing paragraph (f)(3) to read as follows:

§ 403.5 Custody of securities held by financial institutions that are government securities brokers or dealers.

* * * * *

(d)(1) A financial institution that retains custody of securities that are the subject of a repurchase agreement between the financial institution and a counterparty shall:

* * * * *

(e) * * *

(5) Computations necessary to determine the amount required to be deposited as specified in paragraph (e)(1) of this section shall be made weekly, as of the close of the last business day of the week, and the deposit so computed shall be made no later than one hour after the opening of banking business on the second following business day.

(6) A government securities broker or dealer that is a branch or agency of a foreign bank shall make and maintain a record of each computation made pursuant to paragraph (e)(5) of this section and preserve each such record for a period of not less than three years, the first two years in an easily accessible place.

* * * * *

10. Section 403.7 is amended by revising paragraph (b), the first sentence of paragraph (c), the introductory text of paragraphs (d) (1) and (2), (d) (1)(i) and (2)(i), and the introductory text of (d) (1)(ii) and (2)(ii), and paragraph (e) to read as follows:

§ 403.7 Effective dates.

* * * * *

(b) *Confirmations.* The requirement of §§ 403.4 and 403.5(d) to describe the specific securities that are the subject of a repurchase transaction, including the market value of such securities, on a confirmation at the initiation of a repurchase transaction or on substitution of other securities shall be effective January 31, 1988.

(c) *Written repurchase agreements.* The requirement to obtain a repurchase agreement in writing with the provisions described in §§ 403.4 and 403.5(d) shall be effective October 31, 1987, in the case of new customers of a government securities broker or dealer and shall be effective January 31, 1988, in the case of existing customers of a government securities broker or dealer. * * *

(d) *Disclosures.* (1) For hold-in-custody repurchase transactions entered into before the effective date for obtaining a written repurchase agreement in accordance with paragraph (c) of this section, a government securities broker or dealer that is subject to § 403.4 shall furnish the counterparty with a separate interim disclosure document containing:

(i) The disclosure referred to in § 403.4 concerning the Securities Investor Protection Act of 1970, and

(ii) If applicable, the following disclosure: * * *

(2) For hold-in-custody repurchase transactions entered into before the effective date for obtaining a written repurchase agreement in accordance with paragraph (c) of this section, a financial institution that is subject to § 403.5(d) shall furnish the counterparty with a separate interim disclosure document containing:

(i) The disclosure referred to in § 403.5(d) concerning the inapplicability of deposit insurance, and

(ii) If applicable, the following disclosure: * * *

* * * * *

(e) *Existing term repurchase transactions.* Notwithstanding paragraphs (b), (c) and (d) of this section, the requirements of §§ 403.4 and 403.5(d) (with respect to hold-in-custody repurchase transactions), with the exception of the requirements to confirm the substitution of securities subject to a repurchase transaction, shall not be applicable to any repurchase transaction initiated on or before August 31, 1987, that, by its terms, matures on a specific date after August 31, 1987.

PART 404—RECORDKEEPING AND PRESERVATION OF RECORDS

11. The authority citation for Part 404 continues to read as follows:

Authority: Sec. 101, Pub. L. 99-571, 100 Stat. 3209 (15 U.S.C. 78o-5(b)(1)(B), (b)(1)(C), (b)(2)).

12. Section 404.4 is amended by revising paragraphs (a)(2) and (a)(3)(i)(A) to read as follows:

§ 404.4 Records to be made and preserved by government securities brokers and dealers that are financial institutions.

(a) * * *

(2) Complies with the recordkeeping requirements of §§ 450.4 (c), (d) and (f) of this chapter; and

(3) * * *

(i)(A) A securities record or ledger reflecting separately for each government security as of the settlement dates all "long" or "short" positions (including government securities that are the subjects of repurchase or reverse repurchase agreements) carried by such financial institution for its own account or for the account of its customers or others (except securities held in a fiduciary capacity) and showing the location of all government securities long and the offsetting position to all government securities short, including long security count differences and short security count differences classified by the date of the count and verification in which they were discovered, and in all cases the name or designation of the account in which each position is carried;

* * * * *

PART 450—CUSTODIAL HOLDINGS OF GOVERNMENT SECURITIES BY DEPOSITORY INSTITUTIONS

13. The authority citation for Part 450 continues to read as follows:

Authority: Sec. 101, Pub. L. 99-571, 100 Stat. 3208 (15 U.S.C. 78o-5 (b)(1)(A), (b)(2), (b)(3)(B)); sec. 201, Pub. L. 99-571, 100 Stat. 3222-23 (31 U.S.C. 3121, 9110).

14. Section 450.1 is amended by adding a new sentence at the end of paragraph (b) to read as follows:

§ 450.1 Scope of regulations; office responsible.

* * * * *

(b) * * * Procedures for obtaining interpretations of the regulations are set forth at § 400.2.

Charles O. Sethness,

Assistant Secretary for Domestic Finance.

988
UMI

DEPARTMENT OF EDUCATION

34 CFR Parts 330 and 331

Captioned Films Loan Service for the Deaf Program and Educational Media Loan Service for the Handicapped Program

AGENCY: Department of Education.

ACTION: Notice of Proposed Rulemaking.

SUMMARY: The Secretary proposes to amend the regulations for the Captioned Films Loan Service for the Deaf Program and Educational Media Loan Service for the Handicapped Program. These proposed regulations will clarify that the purpose of these programs includes addressing the problems of illiteracy among persons with handicaps. It further provides that public libraries may be used for the distribution of captioned films and educational media.

DATE: Comments must be received on or before May 16, 1988.

ADDRESSES: All comments concerning these proposed regulations should be addressed to Dr. Joseph Clair, Office of Special Education Programs, 400 Maryland Avenue, SW. (Room 4092—Switzer), Washington, DC 20202.

FOR FURTHER INFORMATION CONTACT: R. Paul Thompson, Office of Special Education Programs, Department of Education, 400 Maryland Avenue, SW., (Switzer Building, Room 4905–M/S 2312), Washington, DC 20202. Telephone: (202) 732–1177.

SUPPLEMENTARY INFORMATION: The Captioned Films Loan Service for the Deaf Program and Educational Media Loan Service for the Handicapped Program are authorized by Part F of the Education of the Handicapped Act (20 U.S.C. 1451, 1452 and 1454). Section 652 was amended by section 315 of the Education of the Handicapped Act Amendments of 1986 (Pub. L. 99–457). The amendments to section 652(a) of the Act provide that the purpose of the two programs includes addressing problems of illiteracy among deaf individuals and individual with other handicaps. The amendments also provide that public libraries may be used for the distribution of captioned films and educational media.

In addition, the regulations for these two programs have been reviewed for the purpose of deregulation. This review has resulted in the proposed removal of the provisions on how to obtain applications for borrowing captioned films and educational media because these provisions are informational, not regulatory. The cross references to EDGAR in the definitions and applicable regulations would be removed because they are not applicable to either of these programs. The regulations also would be simplified to provide that the sum of any fees collected by borrowers of captioned film and media shall not exceed reasonable overhead expenses.

Executive Order 12291

These amendments to the regulations have been reviewed in accordance with Executive Order 12291. They are not classified as major because they do not meet the criteria for major regulations established in the order.

Regulatory Flexibility Act Certification

The Secretary certifies that these regulations would not have a significant economic impact on a substantial number of small entities. Because these proposed regulations would affect only individuals, the regulations would not have an impact on small entities. Individuals are not defined as "small entities" in the Regulatory Flexibility Act.

Paperwork Reduction Act of 1980

These proposed regulations have been examined under the Paperwork Reduction Act of 1980 and have been found to contain no information collection requirements.

Intergovernmental Review

This program is subject to the requirements of Executive Order 12372 and the regulations in 34 CFR Part 79. The objective of the Executive Order is to foster an intergovernmental partnership and a strengthened federalism by relying on processes developed by State and local governments for coordination and review of proposed Federal financial assistance.

In accordance with the Order, this document is intended to provide early notification of the Department's specific plans and actions for this program.

Invitation To Comment

Interested persons are invited to submit comments and recommendations regarding these proposed regulations.

All comments submitted in response to these proposed regulations will be available for public inspection, during and after the comment period, in Room 4605, 330 C Street, SW., Washington, DC, between the hours of 8:30 a.m. and 4:00 p.m., Monday through Friday of each week except Federal holidays.

To assist the Department in complying with the specific requirements of Executive Order 12291 and the Paperwork Reduction Act of 1980 and their overall requirement of reducing regulatory burden, the Secretary invites comment on whether there may be further opportunities to reduce any regulatory burdens found in these proposed regulations.

Assessment of Educational Impact

The Secretary particularly requests comments on whether the proposed regulations in this document would require transmission of information that is being gathered by or is available from any other agency or authority of the United States.

List of Subjects in 34 CFR Parts 330 and 331

Education, Education of handicapped, Motion pictures.

(Catalog of Federal Domestic Assistance No. 84.026; Handicapped Media Services and Captioned Films)

Dated: February 29, 1988.

William J. Bennett,

Secretary of Education.

The Secretary proposes to amend Parts 330 and 331 of Title 34 of the Code of Federal Regulations as follows:

PART 330—CAPTIONED FILMS LOAN SERVICE FOR THE DEAF PROGRAM

1. The authority citation for Part 330 is revised to read as follows:

Authority: 20 U.S.C. 1451, 1452, unless otherwise noted.

2. In § 330.1, paragraph (b) is amended by removing the word "and" following the semicolon at the end of the paragraph, paragraph (c) is amended by removing the period at the end of the paragraph and adding, in its place, the word "; and", and a new paragraph (d) and authority citation are added to read as follows:

§ 330.1 Captioned Films Loan Service for the Deaf Program.

* * * * *

(d) Addressing the problems of illiteracy among the handicapped.

(Authority: 20 U.S.C. 1451, 1452)

3. Section 330.3 is revised to read as follows:

§ 330.3 What regulations apply to the Captioned Films Loan Service for the Deaf Program?

The regulations in this Part 330 apply to the Captioned Films Loan Service for the Deaf Program.

(Authority: 20 U.S.C. 1451, 1452)

§ 330.4 [Amended]

4. Section 330.4 is amended by removing paragraph (a) and by removing the words "(b) *Specific program definitions:*" and adding, in their place, the words "The following definitions apply to terms used in this part:".

§ 330.30 [Removed and Reserved]

5. Section 330.30 is removed and reserved.

6. Section 330.50 is amended by revising paragraph (a), removing paragraph (b), and redesignating paragraph (c) as paragraph (b) to read as follows:

§ 330.50 What are the limitations on the use of the loan service?

(a) A borrower shall use the captioned films for nonprofit purposes only. Moreover, the sum of any fees collected by the borrower for use of the films shall not exceed the reasonable expense incurred by the borrower in showing the films to eligible viewers.

* * * * *

PART 331—EDUCATIONAL MEDIA LOAN SERVICE FOR THE HANDICAPPED PROGRAM

7. The authority citation for Part 331 is revised to read as follows:

Authority: 20 U.S.C. 1452, unless otherwise noted.

§ 331.1 [Amended]

8. Section 331.1 is amended by removing the period at the end of the sentence and adding, in its place, the words ", including for the purpose of addressing illiteracy among the handicapped."

9. Section 331.3 is revised to read as follows:

§ 331.3 What regulations apply to the Educational Media Loan Service for the Handicapped Program?

The regulations in this Part 331 apply to the Educational Media Loan Service for the Handicapped Program.

§ 331.4 [Amended]

10. Section 331.4 is amended by removing paragraph (a) and by removing the words "(b) *Specific program definitions:*" and adding, in their place, the words "The following definitions apply to the terms used in this part:".

§ 331.30 [Removed and reserved]

11. Section 331.30 is removed and reserved.

12. Section 331.50 is revised to read as follows:

§ 331.50 What are the limitations on the use of the loan service?

A borrower shall use the educational media for nonprofit purposes only. Moreover, the sum of any fees collected by the borrower for the use of the educational media shall not exceed the reasonable expenses incurred by the borrower in exhibiting the media to eligible parties.

(Authority: 20 U.S.C. 1452(a))

BEST COPY AVAILABLE

VOL. 53 ISS 51 MR 16 1988 UMI

FEDERAL REGISTER Published daily, Monday through Friday, (not published on Saturdays, Sundays, or on official holidays), by the Office of the Federal Register, National Archives and Records Administration, Washington, DC 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.

The **Federal Register** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive orders and Federal agency documents having general applicability and legal effect, documents required to be published by act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The **Federal Register** will be furnished by mail to subscribers for $340.00 per year, or $170.00 for 6 months in paper form, or $186.00 per year, or $94.00 for six months in microfiche form, payable in advance. The charge for individual copies is $1.50 for each issue, or $1.50 for each group of pages as actually bound. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402, or charge to your GPO Deposit Account or VISA or Mastercard.

There are no restrictions on the republication of material appearing in the **Federal Register.**

How To Cite This Publication: Use the volume number and the page number. Example: 52 FR 12345.

THE FEDERAL REGISTER
WHAT IT IS AND HOW TO USE IT

FOR: Any person who uses the Federal Register and Code of Federal Regulations.

WHO: The Office of the Federal Register.

WHAT: Free public briefings (approximately 3 hours) to present:

1. The regulatory process, with a focus on the Federal Register system and the public's role in the development of regulations.
2. The relationship between the Federal Register and Code of Federal Regulations.
3. The important elements of typical Federal Register documents.
4. An introduction to the finding aids of the FR/CFR system.

WHY: To provide the public with access to information necessary to research Federal agency regulations which directly affect them. There will be no discussion of specific agency regulations.

Rules and Regulations

Federal Register
Vol. 53, No. 51
Wednesday, March 16, 1988

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.
The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each week.

DEPARTMENT OF JUSTICE

Immigration and Naturalization Service

8 CFR Part 274a

[INS Number 1047-88]

Control of Employment of Aliens

AGENCY: Immigration and Naturalization Service, Justice.

ACTION: Final rule.

SUMMARY: This rule provides technical amendments to Part 274a of Title 8 of the Code of Federal Regulations. That regulation, which was published as a final rule in the **Federal Register** on May 1, 1987 at 52 FR 16216, with an effective date of June 1, 1987, was necessitated by the Immigration Reform and Control Act of 1986, Pub. L. 99-603, which amended the Immigration and Nationality Act (Act) by adding provisions relating to the control of employment of aliens in the United States. These provisions make it unlawful for a person or entity to knowingly hire, recruit or refer for a fee, for employment in the United States, aliens that are not authorized to work in the United States.

These provisions also provide for an employment eligibility verification system designed to prevent the employment of unauthorized aliens.

EFFECTIVE DATE: March 16, 1988.

FOR FURTHER INFORMATION CONTACT: Michael J. Creppy, Associate General Counsel, Office of the General Counsel, Immigration and Naturalization Service, 425 I Street, NW., Washington DC 20536, Telephone: (202) 633-2895.

SUPPLEMENTARY INFORMATION: The Immigration Reform and Control Act of 1986 (IRCA), Pub. L. 99-603 was enacted on November 6, 1986. IRCA provides that it is unlawful for a person or entity after November 6, 1986, to knowingly hire, recruit or refer for a fee, for employment in the United States, an alien, knowing that the alien is not authorized to work in the United States. IRCA also makes it unlawful for a person or entity to continue to employ an alien, hired after November 6, 1986, knowing that the alien is or has become unauthorized for employment in the United States. The Act and its augmenting regulations require employers, recruiters and referrers for a fee to verify the identity and employment eligibility of persons hired, recruited or referred. Employers must complete the verification process for all individuals hired after November 6, 1986. Recruiters and referrers for a fee must verify each individual recruited or referred after May 1, 1987, if the person is hired by the employer to which referred.

Since publication on May 1, 1987, INS has received public comments on the regulations recommending certain technical amendments and revisions to clarify language in the final rule. The Service has reviewed the regulations for typographical errors and omissions in light of the comments received. This rule is the result of that review process. This rule amends the final rule published on May 1, 1987 by: (1) Addressing certain public concerns related to the regulations; (2) providing clarification and amplification where needed; (3) correcting typographical errors; (4) removing language inadvertently placed in the regulations; and (5) adding language that was inadvertently omitted.

Many comments were received from employers stating that persons under 18 years of age were experiencing difficulty in obtaining documents evidencing identity. In consideration of these comments, this rule amends the regulation at 8 CFR 274a.2(b)(1)(v)(B)(2), related to the production of identity documents, by providing 16 and 17 year old youths with the documentary options currently available only to those under 16 years of age. These youths will be able to establish their identity by providing documentation from an expanded list of documents, or as an alternative to documentary evidence, have a parent or legal guardian attest to their identity. INS also received comments from organizations and associations which place individuals with handicaps into positions of employment or provide them with vocational rehabilitation opportunities. The Service recognizes the difficulty that the handicapped may have in securing identity documentation. This rule amends the regulation by providing individuals with handicaps who are being placed into employment by a nonprofit organization or association or as part of a rehabilitation program, with the opportunity to provide identity documentation from an expanded list of documents. If the individual cannot present an identity document from either 8 CFR 274a.2(b)(1)(v)(B)(*1*) or 8 CFR 274a.2(b)(1)(v)(B)(*2*), this rule authorizes the parent or legal guardian of the individual or a representative from the nonprofit organization, association or rehabilitation program, placing the individual into a position of employment, to attest to his or her identity.

This rule clarifies the type of documentation that may be used to establish employment authorization. The rule provides that a properly endorsed Form I-20 ID submitted by a nonimmigrant student (F-1) for the specific purpose of student employment, may be used to establish employment authorization pursuant to 8 CFR 274a.2(b)(1)(v)(C)(*7*), provided that the I-20 ID contains all relevant restrictions, limitations, and conditions of employment. There are a number of situations under which a nonimmigrant student may be authorized to accept employment in the United States (as set forth in subpart B of the regulation), some of which require an endorsement, while others do not. For those situations which require an endorsement (part-time off-campus employment due to economic necessity, employment for practical training and employment for a qualifying international organization), the document on which the endorsement is placed by the Service officer or school official who authorizes the employment is normally the Form I-20 ID. (As stated in 8 CFR 274a.12(b), part-time on-campus employment is authorized by the school and no specific endorsement by a school official or Service officer is necessary). A properly endorsed I-20 ID is one which has been endorsed by a designated school official or Service officer for practical training or by a Service official for other authorized employment, and which contains the following information:

OL
53
ISS
51
MR
16
988
UMI

(1) Practical Training

The date until which employment is authorized; the occupation and professional field of employment in which practical training is authorized; the name, title and signature of the designated school official or the identifying number of the Service officer; and the date and location of the endorsement.

(2) Part-Time, Off-Campus Employment

The date until which employment is authorized; a statement that the hours authorized for employment while school is in session may not exceed 20 hours per week; the identifying number of the Service officer and the date and location of the endorsement. An I-20 ID which is not properly endorsed does not constitute an employment authorization document. The regulations have also been amended to delete nonimmigrant students engaged in curricular practical training programs (formerly known as work study programs) from 8 CFR 274a.12(b), which contains a listing of those who are authorized to work for a specific employer and who do not receive an employment authorization endorsement ("list B") and to add those students to 8 CFR 274a.12(c), which contains a listing of those who must receive an endorsement ("list C"). In accordance with the provisions of 8 CFR 214.2(f)(10), such employment is authorized by the designated school official at the school the student has been authorized to attend.

The final rule published on May 1, 1987 provided that pursuant to 8 CFR 274a.2(b)(i)(B)(*1*)(*i*), a person could establish identity by presenting a state-issued driver's license or state-issued identification card containing a photograph or other identifying information. The final rule did not provide a definition for the term "state". Included in these technical amendments is that reference. The definition is taken from section 101(a)(36) of the Act. The definition of "state" includes "the District of Columbia, Puerto Rico, Guam, and the Virgin Islands of the United States". Pursuant to these technical amendments, a person may also present a driver's license or an identification card that is issued by an outlying possession of the United States, as that term is defined in section 101(a)(29) of the Act. The term "outlying possession of the United States" includes American Samoa and Swains Island.

Many employers, recruiters and referrers for a fee inquired as to whether the Form I-9 could be placed on microfilm or microfiche. These technical amendments permit the Forms I-9 to be placed on microfilm or microfiche. Standards for the use of microfilm or microfiche are articulated in these amendments. These standards are consistent with current Internal Revenue Service guidelines on microfilm and microfiche.

Employers involved in seasonal agricultural services inquired whether or not they had to complete the verification process for persons hired after November 6, 1986. Section 274A(i)(3) of the Act provides for a deferral of penalties until December 1, 1988, for violations relating to the employment of an individual in seasonal agricultural services, as that term is defined in 52 FR 20372 (1987) (to be codified at 7 CFR Part 1d). Because IRCA requires employers to verify the work authorization of employees and to prepare the Form I-9, INS encourages all employers of seasonal agricultural labor to complete the Form I-9 for all employees engaged in seasonal agricultural services who are hired after November 6, 1986. Recruiters and referrers for a fee involved in recruiting or referring persons for seasonal agricultural services are also encouraged to complete the verification process for each person referred after May 31, 1987, if the person is hired by the employer to which referred. Employers in the agricultural industry whose employees are not engaged in seasonal agricultural services or recruiters or referrers for a fee referring persons to perform other than seasonal agricultural services, are not covered by the deferral of penalty provision.

This rule revises procedures to be followed by a respondent upon whom a Notice of Intent to Fine has been issued. Pursuant to this Rule, a respondent who wishes to contest the Notice of Intent to Fine must file with the INS, within thirty days of the service of the Notice of Intent to Fine, a written request for a hearing before an Administrative Law Judge. A request for a hearing is not deemed to be filed until received by the Service office designated in the Notice of Intent to Fine. Because the regulations issued by the Executive Office for Immigration Review require a respondent to file an answer with the Administrative Law Judge, this rule eliminates the requirement for filing the same answer with INS.

Justification for Final Rule

The Immigration and Naturalization Service is invoking the "good cause" exception to the notice and comment rulemaking procedures established by the Administrative Procedures Act (see 5 U.S.C. 553 (b) and (d)). Notice of this rule and related public comment procedures would be contrary to the public interest as the time that would be required for comment would delay implementation of the rule. Expeditious implementation of the rule is needed to address public concerns related to the regulations, and is therefore in the interest of the public. Furthermore, the changes being made are technical in nature.

In accordance with 5 U.S.C. 605(b), the Commissioner certifies that this rule will not have a significant impact on a substantial number of small entities.

This is not a major rule within the meaning of section 1(b) of EO 12291.

The information collection requirements contained in this rule have been submitted to the Office of Management and Budget, under the provisions of the Paperwork Reduction Act.

List of Subjects in 8 CFR Part 274a

Administrative practice and procedure, Aliens, Employment.

Accordingly, Chapter I of Title 8 of the Code of Federal Regulations is amended as follows:

PART 274a—CONTROL OF EMPLOYMENT OF ALIENS

1. The authority citation for Part 274a is revised to read as follows:

Authority: 8 U.S.C. 1101, 1103, 1324a.

§ 274a.1 [Amended]

2. Section 274a.1 is amended by removing from the introductory text after the phrase "purpose of this" the word "chapter" and adding in its place the word "part".

§ 274a.2 [Amended]

3. Section 274a.2 is amended by removing from the first line the "A." before the word "General" and adding in its place the letter "(a)".

4. Section 274a.2(b)(1)(ii)(A) is amended by adding after the phrase "paragraph (b)(1)(v) of this section" the phrase "and ensure that the documents presented appear to be genuine and to relate to the individual".

5. Section 274a.2(b)(1)(v)(B)(*1*) is revised to read as follows:

(*1*) In General:

6. Section 274a.2(b)(1)(v)(B)(*1*)(*i*) is amended by removing the first sentence in the paragraph and adding in its place the following: "A driver's license or identification card containing a photograph, issued by a state (as defined in section 101(a)(36) of the Act) or an outlying possession of the United States (as defined by section 101(a)(29) of the Act)."

7. Section 274a.2(b)(1)(v)(B)(*2*) is amended by removing after the phrase "For individuals under age" the number "16" and adding in its place the number "18".

8. Section 274a.2(b)(1)(v)(B)(*3*) is amended by removing after the phrase "Minors under the age of" the number "16" and adding in its place the number "18"; by adding after the phrase "exempt from producing one of the", the phrase "enumerated identity documents if the".

9. Section 274a.2(b)(1)(v)(B)(*3*)(*i*) is amended by removing after the phrase "minor under age" the number "16" and adding in its place the number "18".

10. Section 274a.2(b)(1)(v)(B)(*3*)(*iii*) is amended by removing after the phrase "minor under age" the number "16" and adding in its place the number "18".

11. A new § 274a.2(b)(1)(v)(B)(*4*) is added to read as follows:

(*4*) Individuals with handicaps, who are unable to produce one of the identity documents listed in paragraph (b)(1)(v)(B) (*1*) or (*2*) of this section, who are being placed into employment by a nonprofit organization, association or as part of a rehabilitation program, may follow the procedures for establishing identity provided in this section for minors under the age of 18, substituting where appropriate, the term "special placement" for "minor under age 18", and permitting, in addition to a parent or legal guardian, a representative from the nonprofit organization, association or rehabilitation program placing the individual into a position of employment, to fill out and sign in the appropriate section, the Form I-9. For purposes of this section the term "individual with handicaps" means any person who

(*i*) Has a physical or mental impairment which substantially limits one or more of such person's major life activities,

(*ii*) Has a record of such impairment, or

(*iii*) Is regarded as having such impairment.

12. Section 274a.2(b)(1)(vi) is amended by inserting after the phrase "the document or documents within three" the word "business"; by inserting after the words "document or documents within 21" the word "business".

13. Section 274a.2(b)(1)(vii) is amended by removing in the first sentence after the phrase "If an individual's employment" the phrase "eligibility document" and adding in its place the word "authorization"; by removing from the last sentence after the phrase "recruiter or referrer for a fee" the word "should" and adding in its place the word "must"; by removing from the last sentence after the phrase "identification number and expiration date" the word "of" and adding in its place the word "on".

14. Section 274a.2(b)(1)(viii)(C) is amended by adding after the phrase "The employee is", the word "temporarily".

15. Section 274a.2(b)(1)(viii)(G) is amended by inserting after the phrase "maintains from the previous" the word "employer".

16. Section 274a.2(b)(2)(i)(B) is amended by removing the word "referral" after the phrase "three years after the date of" and adding in its place the word "hire".

17. Section 274a.2(b)(2)(ii) is amended by adding in the first sentence, after the phrase "of the Forms by an authorized" the words "Department of Labor or"; by inserting in the second sentence, after the phrase "Forms I-9 must be made available" the phrase "in their original form or on microfilm or microfiche"; by inserting in the second sentence after the phrase "production was made" a "." and removing the rest of the sentence; by adding after the phrase "production was made." the following: "If the Forms I-9 are kept at another location, the person or entity must inform the Department of Labor or Service officer of the location where the forms are kept and make arrangements for the inspection. Inspections may be performed at an INS office."

18. A new § 274a.2(b)(2)(iii) is added to read as follows:

(b) * * *

(2) * * *

(iii) The following standards shall apply to Forms I-9 presented on microfilm (or microfiche) submitted to the Service or Department of Labor: Microfilm, when displayed on a microfilm reader (viewer) or reproduced on paper must exhibit a high degree of legibility and readability. For this purpose, legibility is defined as the quality of a letter or numeral which enables the observer to positively and quickly identify it to the exclusion of all other letters or numerals. Readability is defined as the quality of a group of letters or numerals being recognizable as words or whole numbers. A detailed index of all microfilmed data shall be maintained and arranged in such a manner as to permit the immediate location of any particular record. It is the responsibility of the employer, recruiter or referrer for a fee.

(A) To provide for the processing, storage and maintenance of all microfilm and

(B) To be able to make the contents thereof available as required by law. The person or entity presenting the microfilm will make available a reader-printer at the examination site for the ready reading, location and reproduction of any record or records being retained on microfilm. Readers-printers made available to DOL or Service officers shall provide safety features and be in clean condition, properly maintained and in good working order. The reader-printers must have the capacity to display and print a complete page of information. A person or entity who is determined to have failed to comply with the criteria established by this regulation for the presentation of microfilm or microfiche to the Service and at the time of the inspection does not present a properly completed Form I-9 for the employee, is in violation of section 274A(a)(1)(B) of the Act and 8 CFR 274a.2(b)(2).

§ 274a.3 [Amended]

19. Section 274a.3 is amended by inserting an "A" after the phrase "section 274".

§ 274a.7 [Amended]

20. Section 274a.7(a) is amended by removing, after the phrase "defined in § 274a.2(b)" the roman numeral "(vi)" and adding in its place "(1)(viii)".

21. Section 274a.7(b)(3) is amended by removing, after the phrase "the United States under" the phrase "an order" and adding in its place the phrase "a grant".

§ 274a.9 [Amended]

22. Section 274a.9(c) is amended by removing from the second sentence, after the phrase "a Notice of Intent to Fine on Form" the form number "I-762" and adding in its place the form number "I-763"; by inserting in the last sentence after the phrase "with concurrence of the District Counsel or his or her designee" the phrase "or Sector Counsel".

23. Section 274a.9(d) is revised to read as follows:

(d) *Request for Hearing Before an Administrative Law Judge.* (1) If a respondent contests the issuance of a Notice of Intent to Fine, he or she must file with the INS, within thirty days of the service of the Notice of Intent to Fine, a written request for a hearing before an Administrative Law Judge. A request for a hearing is not deemed to be filed until received by the Service office designated in the Notice of Intent to Fine. In computing the thirty day period prescribed by this section, the day of service of the Notice of Intent to Fine shall not be included. If the Notice of Intent to Fine was served by mail, five days shall be added to the prescribed thirty day period. The respondent may, but is not required to, file with the INS an answer responding to each allegation listed in the Notice of Intent to Fine.

(2) If the respondent does not file a request for a hearing in writing within thirty days, the INS shall issue a final order from which there is no appeal.

§ 274a.12 [Amended]

24. Section 274a.12(a)(11) is amended by removing from the second sentence the phrase "Form I____" and adding in its place the phrase "an employment authorization document".

25. Section 274a.12(b)(6) is revised to read as follows:

(6) A nonimmigrant student (F–1) who is in valid non-immigrant student status and pursuant to 8 CFR 214.2(f) is seeking on-campus employment for not more than twenty hours per week while school is in session or full time when school is not in session if the student intends and is eligible to register for the next term or session. Part-time on campus employment is authorized by the school and no specific endorsement by a school official or Service officer is necessary.

26. Section 274a.12(b)(10) is amended by removing from the third sentence after the phrase "Employment authorization does not" the word "extent" and adding in its place the word "extend".

27. Section 274a.12(b)(11) is amended by inserting in the first sentence, after the words "of this chapter" the phrase "and 22 CFR 514.24"; by inserting after the phrase "United States Information Agency" the phrase "as set forth in the Certificate of Eligibility (Form IAP–66) issued by the program sponsor".

28. Section 274a.12(b)(15) is amended by changing the referenced paragraphs "(b)(9), (11), and (12)" to read "(b)(2), (5), (8), (9), (10), (11), and (12)".

29. Section 274a.12(c)(1) is amended by removing the "," after the phrase "§ 214.2(a)(2) of this chapter" and inserting a ";" and removing the phrase "or the dependent of an employee of a foreign government official (A–3) pursuant to § 214.2(a)(3) of this chapter;".

30. Section 274a.12(c)(3)(i) is amended by removing the word "Chapter" after the phrase "214.2(f) of this" and inserting in its place the word "chapter"; by removing ";" and adding a "." after the phrase "of this chapter" and 2 new sentences to read: "A student authorized employment under this section may use a properly endorsed I–20 ID issued to the student to establish employment authorization pursuant to 8 CFR 274a.2(b)(1)(v)(C)(*7*). To constitute a proper endorsement for this section, the Form I–20 ID must contain the date until which employment is authorized; a statement that the hours authorized per week while school is in session may not exceed 20 hours weekly; the identifying number of the Service officer; and the date and location of the endorsement".

31. Section 274a.12(c)(3)(ii) is amended by adding after the phrase "for purposes of practical training" the phrase "(including curricular practical training)"; by removing the "." after the phrase "pursuant to § 214.2(f) of this chapter" and adding the following text to read:", provided the alien will be employed only in an occupation which is directly related to his or her course of studies. A student authorized employment under this section may use a properly endorsed I–20 ID issued to the student, to establish employment authorization pursuant to 8 CFR 274a.2(b)(1)(v)(C)(*7*). A properly endorsed Form I–20 ID must contain the date until which employment is authorized; the occupation or field in which employment is authorized; the name, title and signature of the designated school official or the identifying number of the Service officer; and the date and location of the endorsement;"; and by removing the last sentence in the section beginning with the words "The alien" and ending with the word "studies".

32. Section 274a.12(c)(15) is amended by changing the referenced paragraphs "(b)(9), (11) and (12)" to read as "(b)(2), (5), (8), (9), (10), (11), and (12)".

§ 274a.13 [Amended]

33. Section 274a.13(a) is amended by removing from the first sentence after the phrase "for employment authorization by an alien under", the term "§ 274.12(c)" and adding in its place the phrase "§ 274a.12(c) and Part 214".

274a.14 [Amended]

34. Section 274a.14(b)(1)(i) is amended by removing after the phrase "or for good cause shown" the "," and adding in its place a ";".

Dated: January 25, 1988.

Alan C. Nelson,

Commissioner, Immigration and Naturalization Service.

[FR Doc. 88–5553 Filed 3–15–88; 8:45 am]

BILLING CODE 4410-10-M

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. 87–NM–157–AD; Amdt. 39–5877]

Airworthiness Directives; British Aerospace Model BAe–125 Series Airplane

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment adopts a new airworthiness directive (AD) applicable certain British Aerospace Model BAe–125 series airplanes, which requires inspection for cracks and repair, if necessary, of the aileron mass blance assembly. This amendment is prompted by reports of cracking of the attachment lugs of the aileron mass balance side plate. This condition, if not corrected, could result in displacement of the side plate, and possible control surface interference.

DATE: Effective April 25, 1988.

ADDRESSES: The applicable service information may be obtained from British Aerospace, Inc., Service Bulletin Librarian, P.O. Box 17414, Dulles International Airport, Washington, DC 20041. This information may be examined at the FAA, Northwest Mountain Region, 17900 Pacific Highway South, Seattle, Washington, or the Seattle Aircraft Certification Office, 9010 East Marginal Way South, Seattle, Washington.

FOR FURTHER INFORMATION CONTACT: Ms. Armella Donnelly, Standardization Branch, ANM–113; telephone (206) 431–1967. Mailing address: FAA, Northwest Mountain Region, 17900 Pacific Highway South, C–68966, Seattle, Washington, 98168.

SUPPLEMENTARY INFORMATION: A proposal to amend Part 39 of the Federal Aviation Regulations to include an airworthiness directive, which requires inspection for cracks and repair, if necessary, of the aileron mass balance assembly, was published in the Federal Register on December 14, 1987 (52 FR 47401).

Interested parties have been afforded an opportunity to participate in the making of this amendment. Due consideration has been given to the single comment received.

The commenter had no objection to the proposal.

After careful review of the available data, the FAA has determined that air safety and the public interest require the adoption of the rule as proposed.

It is estimated that 420 airplanes of U.S. registry would be affected by this AD, that it would take approximately 1 manhour per airplane to accomplish the required actions, and that the average labor cost would be $40 per manhour. Based on these figures, the total cost impact of this AD to U.S. operators is estimated to be $16,800.

For the reasons discussed above, the FAA has determined that this regulation is not considered to be major under Executive Order 12291 or significant under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979) and it is further certified under the criteria of the Regulatory Flexibility Act that this rule will not have a significant economic impact, positive or negative, on a substantial number of small entities because of the minimal cost of compliance per airplane ($40). A final evaluation has been prepared for this regulation and has been placed in the docket.

List of Subjects in 14 CFR Part 39

Aviation safety, Aircraft.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration amends § 39.13 of Part 39 of the Federal Aviation Regulations as follows:

PART 39—[AMENDED]

1. The authority citation for Part 39 continues to read as follows:

Authority: 49 U.S.C. 1354(a), 1421 and 1423; 49 U.S.C. 106(g) (Revised Pub. L. 97–449, January 12, 1983); and 14 CFR 11.89.

§ 39.13 [Amended]

2. By adding the following new airworthiness directive:

British Aerospace: Applies to Model BAe–125 series airplanes listed in BAe–125 Service Bulletin 57–86, Revision 2, dated October 25, 1986, certificated in any category. Compliance required as indicated, unless previously accomplished.

To prevent displacement of the aileron mass balance side plate, and possible control surface interference, accomplish the following:

A. Within 6 months after the effective date of this AD, perform a dye penetrant inspection of the side plate of the aileron mass balance assembly for cracking of the attachment lugs, in accordance with BAe Service Bulletin 57–86, Revision 2, dated October 25, 1986. Repeat the inspection at intervals not to exceed 2 years.

B. If cracks are detected, repair before further flight, in accordance with Repair Scheme 25WG/R143, issued with Service Bulletin 57–86, Revision 2, dated October 25, 1986.

C. Accomplishment of Repair Scheme 25WG/R143 constitutes terminating action for the repetitive inspections required by paragraph A., above.

D. An alternate means of compliance or adjustment of the compliance time, which provides an acceptable level of safety and has the concurrence of a FAA Principal Maintenance Inspector, may be used when approved by the Manager, Standardization Branch, ANM–113, FAA, Northwest Mountain Region.

E. Special flight permits may be issued in accordance with FAR 21.197 and 21.199 to operate airplanes to a base for the accomplishment of inspections and/or modifications required by this AD.

All persons affected by this directive who have not already received the appropriate service documents from the manufacturer may obtain copies upon request to British Aerospace, Inc., Service Bulletin Librarian, P.O. Box 17414, Dulles International Airport, Washington, DC 20041. These documents may be examined at the FAA, Northwest Mountain Region, 17900 Pacific Highway South, Seattle, Washington, or at the Seattle Aircraft Certification Office, 9010 East Marginal Way South, Seattle, Washington.

This amendment becomes effective April 25, 1988.

Issued in Seattle, Washington, on March 7, 1988.

Frederick M. Isaac,

Acting Director, Northwest Mountain Region.

[FR Doc. 88–5080 Filed 3–15–88; 8:45 am]

BILLING CODE 4910-13-M

---

14 CFR Part 39

[Docket No. 88–NM–14–AD; Amdt. 39–5879]

Airworthiness Directives; McDonnell Douglas Model DC–10–10, –10F, –15, 30, –30F, and KC–10A (Military) Series Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment adopts a new airworthiness directive (AD), applicable to certain McDonnell Douglas Model DC–10 and KC–10A series airplanes without a secondary latching system installed, which requires a security check of the engine core cowl doors after each door is opened and subsequently closed, and a daily security check of engine Numbers 1 and 3 (wing engines). This amendment is prompted by additional incidents in which engine core cowl doors have separated from the airplane. This condition, if not corrected, could result in separation of the door, which in turn may cause structural damage to the airplane.

DATES: Effective April 4, 1988.

ADDRESSES: The applicable service information may be obtained from McDonnell Douglas Corporation, 3855 Lakewood Boulevard, Long Beach, California 90846, Attention: Director of Publications, C1–L00 (54–60). This information may be examined at the FAA, Northwest Mountain Region, 17900 Pacific Highway South, Seattle Washington, or at 4344 Donald Douglas Drive, Long Beach, California.

FOR FURTHER INFORMATION CONTACT: Mr. Kyle L. Olsen, Aerospace Engineer, Airframe Branch, ANM–121L, FAA, Northwest Mountain Region, Los Angeles Aircraft Certification Office, 4344 Donald Douglas Drive, Long Beach, California 90808; telephone (213) 514–6319.

SUPPLEMENTARY INFORMATION: On March 12, 1987, the FAA issued AD 87–07–04, Amendment 39–5586 (52 FR 8581; March 19, 1987), applicable to McDonnell Douglas Model DC–10 and KC–10A series airplanes, which requires the installation of a secondary retention system for the engine core cowl doors, within eighteen months after the effective date of the AD. Since that AD was issued, two additional incidents involving Model DC–10 series airplanes, have been reported where the engine core cowl door has separated from the airplane.

In one case, the door separated from the airplane during takeoff, landed on the runway, and was struck by another airplane. In the other case, an engine core cowl door separated from the airplane during takeoff and struck the fuselage, creating a hole approximately 25 inches by 3 inches in the pressure shell. The door also hit the center engine inlet creating two holes and additional damage in that structure.

Consequently, the FAA has determined that, until the installation of the secondary retention system is accomplished, the security of the core cowl door latches must be verified daily for engine Numbers 1 and 3 (wing engines), and for all three engines after each door is opened and subsequently closed.

The FAA has reviewed and approved McDonnell Douglas Alert Service Bulletin A71–150, Revision, 1, dated January 27, 1988, which describes the procedures for the security check.

Since this condition is likely to exist or develop on other airplanes of the same type design this AD requires accomplishment of the security check in

VOL 53 ISS 51 MR 16 1988 UMI

accordance with the service bulletin previously mentioned.

Since a situation exists that requires immediate adoption of this regulation, it is found that notice and public procedure hereon are impracticable, and good cause exists for making this amendment effective in less than 30 days.

The FAA has determined that this regulation is an emergency regulation that is not considered to be major under Executive Order 12291. It is impracticable for the agency to follow the procedures of Order 12291 with respect to this rule since the rule must be issued immediately to correct an unsafe condition in aircraft. It has been further determined that this document involves an emergency regulation under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979). If this action is subsequently determined to involve a significant/major regulation, a final regulatory evaluation or analysis, as appropriate, will be prepared and placed in the regulatory docket, (otherwise, an evaluation or analysis is not required).

List of Subjects in 14 CFR Part 39

Aviation safety, Aircraft.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration amends § 39.13 of Part 39 of the Federal Aviation Regulations (14 CFR 39.13) as follows:

PART 39—[AMENDED]

1. The authority citation for Part 39 continues to read as follows:

Authority: 49 U.S.C. 1354(a), 1421 and 1423; 49 U.S.C. 106(g) (Revised, Pub. L. 97–449, January 12, 1983); and 14 CFR 11.89.

§ 39.13 [Amended]

2. By adding the following new airworthiness directive:

McDonnell Douglas: Applies to McDonnell Douglas Model DC–10–10, –10F, –15, –30, –30F, and KC–10A (Military) series airplanes that do not have a secondary retention system installed in accordance with AD 87–07–04, certificated in any category. Compliance required as indicated, unless previously accomplished.

To prevent structural damage to the airplane due to engine core cowl door separation, accomplish the following:

A. Within ten days after the effective date of this AD, check the core cowl door latches in accordance with McDonnell Douglas Model DC–10 Alert Service Bulletin A71–150, Revision 1, dated January 27, 1988, or later FAA-approved revision, once each day for engine Numbers 1 and 3 (wing mounted engines) and after each core cowl door is opened and subsequently closed.

B. If the latch is open before further flight, properly close the latch; if the latch will not engage, adjust the latch in accordance with Maintenance Manual Chapter 71–13–01, paragraph entitled "Adjustment/test core cowl doors"; if the latch cannot be properly adjusted, replace the latch prior to further flight.

C. The checks required by paragraph A., above may be discontinued after the secondary retention system is installed in accordance with AD 87–07–04.

D. An alternate means of compliance or adjustment of the compliance time, which provides an acceptable level of safety and which has the concurrence of an FAA Principal Maintenance Inspector, may be used when approved by the Manager, Los Angeles Aircraft Certification Office, FAA, Northwest Mountain Region.

E. Special flight permits may be issued in accordance with FAR 21.197 and 21.199 to operate airplanes to a base in order to comply with the requirements of this AD.

All persons affected by this directive who have not already received the appropriate service information from the manufacturer may obtain copies upon request to McDonnell Douglas Corporation, 3855 Lakewood Boulevard, Long Beach, California 90846, Attention: Director of Publications, C1–L00 (54–60). This information may be examined at the FAA, Northwest Mountain Region, 17900 Pacific Highway South, Seattle, Washington, or at the Los Angeles Aircraft Certification Office, 4344 Donald Douglas Drive, Long Beach, California.

This amendment becomes effective April 4, 1988.

Issued in Seattle, Washington, on March 7, 1988.

Frederick M. Isaac,

Acting Director, Northwest Mountain Region.

14 CFR Part 71

[Airspace Docket No. 87–ASW–35]

Revision of Transition Area; Terrell, TX

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This action will revise the transition area located at Terrell, TX. The development of a standard instrument approach procedure (SIAP) to the Terrell Municipal Airport utilizing the new Travis Nondirectional Radio Beacon (NDB) and a change in the categories of aircraft operating into and out of the airport have made this revision necessary. The intended effect of this revision is to provide adequate controlled airspace for all SIAP's now serving the airport.

EFFECTIVE DATE: 0901 UTC, May 5, 1988.

FOR FURTHER INFORMATION CONTACT: Bruce C. Beard, Airspace and Procedures Branch, Air Traffic Division, Southwest Region, Department of Transportation, Federal Aviation Administration, Fort Worth, TX 76193–0530, telephone (817) 624–5561.

SUPPLEMENTARY INFORMATION:

History

On December 9, 1987, the FAA proposed to amend Part 71 of the Federal Aviation Regulations (14 CFR Part 71) by revising the transition area located at Terrell, TX (52 FR 48448).

Interested persons were invited to participate in this rulemaking proceeding by submitting written comments on the proposal to the FAA. No comments objecting to the proposal were received. Except for editorial changes, this amendment is that proposed in the notice. Section 71.181 of Part 71 of the Federal Aviation Regulations was republished in Handbook 7400.6C, dated January 2, 1987.

The Rule

This amendment to Part 71 of the Federal Aviation Regulations will revise the transition area located at Terrell, TX. The development of a new SIAP utilizing the Travis NDB, as well as a change in the categories of aircraft operating into and out of the airport, has necessitated this revision. The revision will increase the existing transition area from a 5-mile radius of the airport to a 6.5-mile radius of the airport, with a new arrival extension to the northeast. The intended effect of this revision is to provided adequate controlled airspace for all SIAP's now serving the airport.

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore—(1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 71

Aviation safety, Transition areas.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me, Part 71 of the Federal Aviation Regulations (14 CFR Part 71) is amended as follows:

PART 71—[AMENDED]

1. The authority citation for Part 71 continues to read as follows:

Authority: 49 U.S.C. 1348(a), 1354(a), 1510; E.O. 10854; 49 U.S.C. 106(g) (Revised Pub. L. 97–449, January 12, 1983); 14 CFR 11.69.

§ 71.181 [Amended]

2. Section 71.181 is amended as follows:

Terrell, TX [Revised]

That airspace extending upward from 700 feet above the surface within a 6.5-mile radius of the Terrell Municipal Airport (latitude 32°42'36"N., longitude 96°16'02"W.), and within 5.5 miles each side of the 019° bearing from the Travis NDB (latitude 32°45'36"N., longitude 96°14'56"W.), extending from the 6.5-mile radius to 11 miles northeast of the airport.

Issued in Fort Worth, TX, on February 29, 1988.

Larry L. Craig,

Manager, Air Traffic Division, Southwest Region.

[FR Doc. 88–5675 Filed 3–15–88; 8:45 am]

BILLING CODE 4910-13-M

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

21 CFR Part 5

Delegations of Authority and Organization

AGENCY: Food and Drug Administration.

ACTION: Final rule.

SUMMARY: The Food and Drug Administration (FDA) is revising the regulations to set forth the current organizational structure of the agency and to update addresses for offices in several regions.

EFFECTIVE DATE: March 16, 1988.

FOR FURTHER INFORMATION CONTACT: Marilyn Wilson, Office of Management and Operations (HFA–340), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301–443–4976.

SUPPLEMENTARY INFORMATION: In 1987, there was a major change in FDA's regional organizational structure. FDA reduced its number of regions from 10 to 6 to more evenly distribute workload and staff among the regions. The locations of laboratories, agricultural production patterns, routes of commerce, and natural geographical barriers were additional considerations in the regional restructuring. The regulations are revised in this final rule to reflect this current organizational structure of the agency and to update addresses for offices in several regions.

List of Subjects in 21 CFR Part 5

Authority delegations (Government agencies); Organization and functions (Government agencies).

Therefore, under the Federal Food, Drug, and Cosmetic Act and under the authority delegated to the Commissioner of Food and Drugs, Part 5 is amended as follows:

PART 5—DELEGATIONS OF AUTHORITY AND ORGANIZATION

1. The authority citation for 21 CFR Part 5 continues to read as follows:

Authority: 5 U.S.C. 504, 552; 7 U.S.C. 2217; 15 U.S.C. 638, 1451 *et seq.*; 21 U.S.C. 41 *et seq.*, 61–63, 141 *et seq.*, 301–392, 467f(b), 679(b), 801 *et seq.*, 823(f), 1031 *et seq.*; 35 U.S.C. 156; 42 U.S.C. 219, 241, 242(a), 242a, 242l, 242o, 243, 262, 263, 263b through 263m, 264, 265, 300u *et seq.*, 1395y and 1395y note, 3246(b)(3), 4831(a), 10007, and 10008; Federal Caustic Poison Act (44 Stat. 1406); Federal Advisory Committee Act (Pub. L. 92–463); E.O. 11490, 11921.

2. Section 5.100 is revised to read as follows:

§ 5.100 Headquarters.

The central organization of the Food and Drug Administration consists of the following:

Office of the Commissioner [1]

Office of Regulatory Affairs.
Office of Management and Operations.
Office of Health Affairs.
Office of Science.
Office of Planning and Evaluation.
Office of Legislative Affairs.
Office of Public Affairs.
Office of Consumer Affairs.

Center for Drug Evaluation and Research [1]

Office of Management

Division of Management and Budget.
Division of Information Systems Design.
Division of Drug Information Resources.
Medical Library.

Office of Epidemiology and Biostatistics

Division of Epidemiology and Surveillance.
Division of Biometrics.

Office of Compliance

Division of Drug Labeling Compliance.
Division of Drug Quality Evaluation.
Division of Manufacturing and Product Quality.
Division of Scientific Investigations.
Division of Regulatory Affairs.

Office of Drug Evaluation I

Division of Cardio-Renal Drug Products.
Division of Neuropharmacological Drug Products.
Division of Oncology and Radiopharmaceutical Drug Products.
Division of Surgical-Dental Drug Products.
Division of Gastrointestinal and Coagulation Drug Products.

Office of Drug Evaluation II

Division of Metabolism and Endocrine Drug Products.
Division of Anti-Infective Drug Products.
Division of Anti-Viral Drug Products.

Office of Drug Standards

Division of OTC Drug Evaluation.
Division of Generic Drugs.
Division of Bioequivalence.
Division of Biopharmaceutics.
Division of Drug Advertising and Labeling.

Office of Research Resources

Division of Research and Testing.
Division of Drug Analysis.

Center for Biologics Evaluation and Research [2]

Office of Management

Office of Compliance

Office of Biological Product Review

Division of Product Quality Control.
Division of Biological Investigational New Drugs.
Division of Product Certification.

Office of Biologics Research

Division of Bacterial Products.
Division of Blood and Blood Products.
Division of Virology.
Division of Biochemistry and Biophysics.
Division of Cytokine Biology.

Center for Food Safety and Applied Nutrition [3]

Office of Management

Division of Program Operations.
Division of Administrative Operations.
Division of Information Resources Management.

Office of Compliance

Division of Regulatory Guidance.
Division of Food and Color Additives.
Division of Cooperative Programs.

Office of Toxicological Sciences

Division of Toxicology.
Division of Pathology.
Division of Mathematics.

Office of Physical Sciences

Division of Contaminants Chemistry.
Division of Colors and Cosmetics.
Division of Food Chemistry and Technology.

---

Office of Nutrition and Food Sciences

Division of Consumer Studies.
Division of Nutrition.
Division of Microbiology.

Center for Devices and Radiological Health [1]

Office of Management Services

Division of Planning, Evaluation, and Information Services.
Division of Resource Management.

Office of Information Systems

Division of Computer Services.
Division of Information Resources.

Office of Health Physics

Office of Health Affairs [4]

Office of Standards and Regulations

Office of Compliance [4]

Division of Radiological Products.
Division of Compliance Programs.
Division of Compliance Operations.
Division of Product Surveillance.

Office of Device Evaluation [4]

Division of Cardiovascular Devices.
Division of Gastroenterology/Urology and General Use Devices.
Division of Anesthesiology, Neurology, and Radiology Devices.
Division of Obstetrics/Gynecology, Ear, Nose, Throat, and Dental Devices.
Division of Surgical and Rehabilitation Devices.
Division of Clinical Laboratory Devices.
Division of Ophthalmic Devices.

Office of Science and Technology

Division of Mechanics and Materials Science.
Division of Life Sciences.
Division of Physical Sciences.
Division of Biometric Sciences.
Division of Electronics and Computer Sciences.

Office of Training and Assistance

Division of Consumer Affairs.
Division of Small Manufacturers Assistance.
Division of Intergovernmental Programs.
Division of Technical Development.
Division of Professional Practices.
Division of Training Support.

Center for Veterinary Medicine [1]

Office of Management

Division of Administrative Management.

Office of New Animal Drug Evaluation

Division of Biometrics and Production Drugs.
Division of Drug Manufacturing and Residue Chemistry.
Division of Therapeutic Drugs for Food Animals.
Division of Therapeutic Drugs for Non-Food Animals.
Division of Human Food and Environmental Safety.

Office of Surveillance and Compliance

Division of Compliance.
Division of Surveillance.
Division of Animal Feeds.
Division of Voluntary Compliance and Hearings Development.

Office of Science

Division of Veterinary Medical Research.

National Center for Toxicological Research [5]

Office of Management

Division of Management Services.
Division of Resource Information Management Systems.
Division of Facilities Engineering and Maintenance.

Office of Research

Division of Reproductive and Developmental Toxicology.
Division of Genetic Toxicology.
Division of Biomedical Toxicology.
Division of Comparative Toxicology.

Office of Research Services

Division of Microbiology.
Division of Animal Husbandry.
Division of Chemistry.

3. Section 5.115 is revised to read as follows:

§ 5.115 Field Structure.

Northeast Region

Regional Field Office: 830 Third Ave., Brooklyn, NY 11232.
New York District Office: 850 Third Ave., Brooklyn, NY 11232.
Boston District Office: One Montvale Ave., Stoneham, MA 02180.
Buffalo District Office: 599 Delaware Ave., Buffalo, NY 14202.

Mid-Atlantic Region

Regional Field Office: 900 U.S. Customhouse, 2nd and Chestnut Sts., Philadelphia, PA 19106.
Philadelphia District Office: 900 U.S. Customhouse, 2nd and Chestnut Sts., Philadelphia, PA 19106.
Baltimore District Office: 900 Madison Ave., Baltimore, MD 21201.
Cincinnati District Office: 1141 Central Parkway, Cincinnati, OH 45202–1097.
Newark District Office: 61 Main St., West Orange, NJ 07052.

Southeast Region

Regional Field Office: 60 Eighth St., NE., Atlanta, GA 30309.
Atlanta District Office: 60 Eighth St., NE., Atlanta, GA 30309.
Nashville District Office: 297 Plus Park Blvd., Nashville, TN 37217.
New Orleans District Office: 4298 Elysian Fields, New Orleans, LA 70122.

21 CFR Part 176

[Docket No. 83F–0084]

Indirect Food Additives; Paper and Paperboard Components; Correction

AGENCY: Food and Drug Administration.

ACTION: Final rule; correction.

SUMMARY: The Food and Drug Administration (FDA) is correcting an inadvertent error in its final rule of December 10, 1987 (52 FR 46744), that consolidated three separate listings for polyamine-epichlorohydrin wet-strength resins into a single listing and added a new method of producing this resin. The agency is correcting the error in the December 10, 1987, final rule in response to three objections to this amendment of 21 CFR 176.170(a)(5). These objections pointed out that the consolidated listing inadvertently adopted limitations that were not included in the three previous listings for polyamine-epichlorohydrin wet-strength resins. The agency is also offering a new opportunity for objection to this revised regulation.

DATES: Effective March 16, 1988; objections by April 15, 1988.

ADDRESS: Written objections to the Dockets Management Branch (HFA–305), Food and Drug Administration, Rm. 4–62, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Mary W. Lipien, Center For Food Safety and Applied Nutrition (HFF–335), Food and Drug Administration, 200 C Street, SW., Washington, DC 20204, 202–472–5690.

SUPPLEMENTARY INFORMATION: In the **Federal Register** of December 10, 1987 (52 FR 46744), FDA issued a final rule amending paragraph (a)(5) of § 176.170 *Components of paper and paperboard in contact with aqueous and fatty foods* (21 CFR 176.170(a)(5)). The regulation responded to a food additive petition by Monsanto Co., 800 North Lindbergh Blvd., St. Louis, MO 63166 (FAP 2B3606), which requested the consolidation into a single listing of three separate listings for polyamine epichlorohydrin resins for use as wet-strength agents and retention aids and the additional use of a new method of producing these resins for such uses. A notice of filing for the petition was published in the **Federal Register** of March 29, 1983 (48 FR 13099); and an amended filing notice was published in the **Federal Register** of May 8, 1986 (51 FR 17096), which specifically described the three listings for polyamine-epichlorohydrin wet-strength resins that would be consolidated. The May 8, 1986, notice also made clear that the petition requested that the use of self-condensation products of 95 percent by weight of C_4 to C_6 aliphatic diamines, and the direct reaction of these diamines and their self-condensation products with epichlorohydrin, be included in the new listing. The new single revised listing was specifically included in the amended filing notice.

FDA's final rule of December 10, 1987, adopted the new single revised listing that was described in the filing notice of May 8, 1986. The final rule also described the agency's review of the safety of the additive, including the safety of the epichlorohydrin and 1,2-dichloroethane which are cancer-causing chemicals that may be found as contaminants in polyamine-epichlorohydrin resins produced by the methods of manufacture included in the regulation. Based upon its review of the petition for the additive and other available information, FDA concluded that the additive could be safely used under the conditions of use listed in the regulation.

The agency's review of the petition also included consideration of the identity of the starting materials for the polyamine-epichlorohydrin resins listed in the consolidated regulation and the methods of manufacture for those resins. The consolidated listing, however, inadvertently imposed a 95 percent limitation on the purity of the starting materials (1) bis(hexamethylene)triamine and higher homologues and (2) hexamethylenediamine that did not exist in the previous listings for these chemicals. This inadvertent error was the primary cause of the three objections and two requests for a hearing on the December 10, 1987, final rule. The objections also stated that deletion of the specific starting materials from the consolidated listing may cause damage to their businesses.

In response to these objections, FDA is correcting the error in the December 10, 1987; final rule by adopting a new consolidated regulation that specifically lists bis(hexamethylene)triamine and higher homologues and hexamethylenediamine as starting materials without purity specifications. The new consolidated regulation also provides the flexibility requested by the Monsanto Co. regarding the manufacture of the polyamine-epichlorohydrin resins for use as wet-strength agents and retention aids.

The corrected regulation, which revises 21 CFR 176.170(a)(5), does not expand the uses of the additive or the methods of manufacture beyond those included in the December 10, 1987, final rule. Therefore, the agency concludes that this correction does not require an additional review of the safety of the additive.

FDA believes that this correction of the error in the final rule adequately addresses the concerns that were expressed by the objections to the December 10, 1987, final rule. The agency also believes that this correction makes it unnecessary to hold the hearings that were requested by the parties. However, to assure that these and other affected parties do not have any further objections to this revised regulation, the agency is offering an additional 30-day objection period.

Any person who will be adversely affected by this regulation may at any time on or before April 15, 1988, file with the Dockets Management Branch (address above) written objections thereto. Each objection shall be separately numbered, and each numbered objection shall specify with particularity the provisions of the regulation to which objection is made and the grounds for the objection. Each numbered objection on which a hearing is requested shall specifically so state. Failure to request a hearing for any particular objection shall constitute a waiver of the right to a hearing on that objection. Each numbered objection for which a hearing is requested shall include a detailed description and analysis of the specific factual information intended to be presented in support of the objection in the event that a hearing is held. Failure to include such a description and analysis for any particular objection shall constitute a waiver of the right to a hearing on the objection. Three copies of all documents shall be submitted and shall be identified with the docket number found in brackets in the heading of this document. Any objections received in response to the regulation may be seen in the Dockets Management Branch between 9 a.m. and 4 p.m., Monday through Friday.

List of Subjects in 21 CFR Part 176

Food additives, Food packaging.

Therefore, under the Federal Food, Drug, and Cosmetic Act and under authority delegated to the Commissioner of Food and Drugs, Part 176 is amended as follows:

PART 176—INDIRECT FOOD ADDITIVES: PAPER AND PAPERBOARD COMPONENTS

1. The authority citation for 21 CFR Part 176 continues to read as follows:

Authority: Secs. 201(s), 409, 72 Stat. 1784–1788 as amended (21 U.S.C. 321(s), 348); 21 CFR 5.10 and 5.61.

2. Section 176.170 is amended by revising paragraph (a)(5) to read as follows:

§ 176.170 Components of paper and paperboard in contact with aqueous and fatty foods.

* * * * *

(a) * * *

BILLING CODE 4160-01-M

DEPARTMENT OF TRANSPORTATION

Federal Highway Administration

23 CFR Part 655

[FHWA Docket Nos. 85-27 and 87-9]

National Standards for Traffic Control Devices; Manual on Uniform Traffic Control Devices

AGENCY: Federal Highway Administration (FHWA), DOT.

ACTION: Final amendments to the Manual on Uniform Traffic Control Devices (MUTCD); comments requested on editorial amendments.

SUMMARY: This document contains notice of amendments to the MUTCD which are being adopted by the FHWA for inclusion therein. The MUTCD is incorporated by reference in 23 CFR Part 655, Subpart F and recongnized as the national standard for traffic control devices on all public roads. The amendments affect various parts of the MUTCD and are intended to expedite traffic, improve safety, and provide a more uniform application of highway signs, signals, and markings.

DATES: Effective March 21, 1988. Comments on the editorial amendments must be received on or before April 25, 1988. Incorporation by reference of the publications listed in the regulations is approved by the Director of the Federal Register as of March 21, 1988.

ADDRESS: Submit signed, written comments, preferably in triplicate, on editorial changes to Docket No. 87-9, to the Federal Highway Administration, Room 4205, HCC-10, 400 Seventh Street SW., Washington, DC 20590. All comments received will be available for examination at the above address between 8:30 a.m. and 3:30 p.m. ET, Monday through Friday. Those desiring notification of receipt of comments must include a self-addressed, stamped postcard.

FOR FURTHER INFORMATION CONTACT: Mr. Philip O. Russell, Office of Traffic Operations, (202) 366-2184, or Mr. Michael J. Laska, Office of Chief Counsel, (202) 366-1383, 400 Seventh Street SW., Washington, DC 20590. Office hours are from 7:45 a.m. to 4:15 p.m. ET, Monday through Friday, except legal holidays. For 30 days following the publication of this rule, the referenced materials will be available for inspection and copying at the above address.

SUPPLEMENTARY INFORMATION: The MUTCD is available for inspection and copying as prescribed in 49 CFR Part 7, Appendix D. It may be purchased for $44.00 from the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402, Stock No. 950-036-00000-1. The purchase of a MUTCD includes a subscription service for adopted revisions.

This document contains the dispositions of proposals for changes in the MUTCD which were received or originated by the FHWA. Previous Federal Register actions regarding these requests are listed in the following table:

Item, Request No., and Title	Published in Federal Register FHWA Docket No.
Final Rulings	
1. I-5 (Chng.): Compliance Dates.	Docket No. 87-9 (52 FR 7172, Mar. 9, 1987).

16. VI-58 (Chng.): Worker Safety.	Do.
17. VI-62 (Chng.): Warning Light Specification.	Do.
Deferred Ruling	
18. II-118 (Chng.): Standard Motorcycle Warning Sign.	Docket No. 87-9 (52 FR 7172, Mar. 9, 1987.)

Advance copies of the text changes to the MUTCD for all of the adopted requests will be distributed to everyone currently appearing on the FHWA Federal Register mailing list for MUTCD matters. Those wishing to receive an advancy copy of the text changes or to be added to this mailing list should write to the Federal Highway Administration, Office of Traffic Operations, HTO-21, 400 Seventh Street, SW., Washington, DC 20590.

Discussion of Requests

These amendments are being processed in accordance with the rulemaking procedure of the Administrative Procedure Act (5 U.S.C. 553) and the Department of Transportation's regulatory policies and procedures.

Each request is assigned an identification number which indicates, by Roman numeral, the primary organizational part of the MUTCD affected and, by Arabic numeral, the order in which the request was received.

The FHWA has reviewed the comments received in response to the notices and the other information relating to the MUTCD and these proposals. The FHWA is acting on the following requests for change to the MUTCD. Each action and its basis is summarized below:

(1) Request I-5 (Chng.)—Compliance Dates

These amendments establish specific compliance dates for 10 items. Each of these items has been incorporated into the MUTCD by official rulings, however, compliance dates were not established by these prior rulings. The compliance dates are listed in the following table.

Ruling Number	Title	MUTCD Revision No.	Published in Federal Register as:—		Compliance Date
			Final Rule	Notice of Proposed Rulemaking	
II-7 (Chng.)	Signing Public Median Crossovers	3	48 FR 54336	48 FR 1075	12/31/90
II-20 (Chng.)	Symbol for Police Assistance	3	48 FR 54336	48 FR 1075	12/31/90
II-38 (Chng.)	Identifying Left-Hand Exit on Interchange Sequence	3	48 FR 54336	48 FR 1075	12/31/90
II-65 (Chng.)	Service Signing for Liquified Petroleum Gas	4	50 FR 10001	49 FR 1213	12/31/90
II-75 (Chng.)	Sign Requirements for Two-Way Left Turn Only Lanes	4	49 FR 38940	49 FR 1213	12/31/88
III-9 (Chng.)	Uses and Spacing of Raised Payment Markets	4	50 FR 10001	49 FR 1213	[1] 12/31/92
VI-25 (Chng.)	Use of 28-Inch Cones	4	49 FR 38940	49 FR 1213	12/31/88
VI-27 (Chng.)	Minimum Area of Reflective Barricade Rails	[2] 5	50 FR 50784	50 FR 10072	12/31/88
VIII-5 (Chng.)	Use of STOP Signs at Railroad-Highway Grade Crossings.	2	48 FR 1047	47 FR 5298	12/31/89
VIII-11 (Chng.)	Location of DO NOT STOP ON TRACKS Signs (R8-8)	[2] 5	50 FR 50784	50 FR 10072	12/31/90

[1] Existing installations only.

[2] Revision 5 will be printed in the spring of 1988.

Note: Federal Register FHWA Docket Number and Date Published in Federal Register: 47 FR 5298—Docket No. 79-37, Notice 2 (Feb. 4, 1982). 48 FR 1047—Docket Nos. 79-35, 79-37, and 80-10 (Jan. 10, 1983). 48 FR 1075—Docket No. 82-15 (Jan. 10, 1983). 48 FR 54336—Docket No. 82-15, Notice 2 (Dec. 2, 1983). 49 FR 1213—Docket No. 83-26 (Jan. 10, 1984). 49 FR 38940—Docket Nos. 79-31, 79-37, and 83-26 (Oct. 2, 1984). 50 FR 10001—Docket Nos. 79-31, 79-37, 80-10, 82-15, and 83-26 (Mar. 13, 1985). 50 FR 10072—Docket No. 85-3 (Mar. 13, 1985). 50 FR 50784—Docket Nos. 79-37, 83-26, 85-1, 85-3, 85-18, and 85-26 (Dec. 12, 1985).

Fifteen State highway agencies and the National Committee on Uniform Traffic Control Devices (NCUTCD) offered favorable or general comments on these proposals. There was one Docket commenter in opposition to the proposal.

Each of the compliance dates remains the same as was proposed in the March 9, 1987, Notice of Proposed Amendments (NPA), (52 FR 7172), except for Ruling Number VI-25(Chng.)—Use of 28-inch Cones, and Ruling Number III-9(Chng.)—Use and Spacing of Raised Pavement Markers. The Ohio Section of the Institute of Transportation Engineers (ITE) and the NCUTCD, having reviewed each of the proposed compliance dates, have determined that the proposed compliance date of December 31, 1990, for Ruling Number VI-25, is too distant, and have recommended that the compliance date be established as December 31, 1988. The NCUTCD has requested that the compliance date for Ruling Number III-9 be extended to December 31, 1992, because there are many raised pavement markers presently in use and that these have a long service life. The FHWA concurs with these recommendations.

Two commenters objected to the establishment of compliance dates for traffic control devices that are allowed or recommended but not required by the MUTCD. Another commenter asked, what does the "compliance date" mean? Does it require a specific date for the subject change to be included in the State Manual? Or does it require a specific date for the subject change to be completed on the roadway?

For the sake of uniformity, it is the intent of the MUTCD to require that, only a standard traffic control device is to be used when such a standard has been established. Therefore, it is the intent of these compliance dates to foster uniformity by requiring that, all new devices installed shall be standard and all existing devices that are not of the standard design, be replaced by the standard device by the compliance date specified. As an example, to standardize the sign used for police assistance, the word message POLICE sign was adopted in the December 2, 1983, Final Rule (48 FR 54336). Seven years will have elapsed between the adoption date and the compliance date established by Request I-5. By December 31, 1990, all police assistance signs are to be of the design specified in the December 2, 1983, Final Rule and Standard Highway Signs.

The Florida Department of Transportation recommended that for Request II-38(Chng.)—Identifying Left-Hand Exit on Interchange Sequence Signs, the black on yellow panels bearing the legend LEFT or LEFT EXIT, be made mandatory where the exit direction is to the left. This would involve changing the "may" in Section 2E-34 to a "shall" rather than to a "should" as was proposed in the March 9, 1987, NPA. After a review of history of safety and operational problems associated with left exits, the FHWA has determined that interchange name or route number on all Interchange Sequence Signs shall be followed by a yellow panel with the legend LEFT or LEFT EXIT in black where the exit direction is to the left. The compliance date will be December 31, 1990, as proposed.

(2) Request II-89 (Chng.)—Use of Strong Yellow-Green for Emergency Situations

This amendment to Part VI, revises various sections and adds a new subpart VI-H, Traffic Control for Incident Management. The amendment sets forth standard devices to be used for controlling traffic at the site of incidents on the roadway or adjacent to the roadway. The amendment retains the present color, shape, size, and application standards for the regulatory and warning devices.

The Michigan Department of State Police had requested that the MUTCD be amended to allow the use of strong yellow-green (SYG) signs to control traffic under temporary emergency conditions.

There were 34 commenters that had reviewed the FHWA's proposal. Nineteen State DOT's, one State police unit, one city police unit, and the Center for Auto Safety (CAS) basically concurred with the FHWA proposal to cover incident and emergency

VOL 53
ISS 51
MR 16
1988
UMI

management in Part VI and to use only devices that meet present MUTCD standards for color, shape, etc. One of these 19 State DOT's strongly urged in effect, that all warning signs should be yellow regardless of where and when they are used. That State felt that drivers had not picked up on the intended meaning of orange warning signs in work zones, and that drivers would not understand SYG signs, if they were adopted. Several of the States stated that the FHWA's proposal was more detailed than necessary, and that only basic standards and guidelines are needed as additions to Part VI, in order to bring about desirable traffic controls for incident and emergency operations.

Seven State police units, two city police units, and the International Association of Chiefs of Police offered comments in favor of SYG. Several of these commenters thought that SYG should be reserved for warning signs to be used only by law enforcement personnel for emergency traffic control; however, most of these commenters would be satisfied with allowing SYG as an alternative to yellow and orange.

The NCUTCD requested that the comment period for these issues be extended. The FHWA denied the NCUTCD's request on the basis that the continuance of the comment period and the continuance of the period of experimentation with SYG, will engender further use of the nonstandard device. The closing of this docket item will not preclude consideration of special task force and/or research findings for further revisions to the MUTCD.

This amendment may have some financial impact of State and local jurisdictions. To offset these costs, a compliance date of December 31, 1989, is established.

(3) Request II–110 (Chng.)—Tourist Oriented Directional Signs (TODS)

The comments received from the 140 commenters were divided in the following manner. The majority of State highway agencies agreed with the concept of TODS. The State highway agencies that had experimented with TODS and the businesses that are served or have the potential of being served by TODS, all favored the adoption of the amendment. On the other hand, the States that had no experience with TODS and the outdoor advertisers were generally opposed to the amendment.

A task force of the Signs Technical Committee (STC) of the NCUTCD prepared recommended TODS text and figures for inclusion in the MUTCD. The text and figures were conceptually the same as that proposed by the FHWA. These recommendations were adopted later by the STC but not by the NCUTCD. The American Association of State Highway and Transportation Officials (AASHTO) polled its membership regarding the recommended text and figures. The AASHTO results were: 17 States concurred with the recommendations, 9 States concurred in part, and 16 States did not concur.

The FHWA interprets the AASHTO ballot results to mean that, of the States that responded to the ballot, 26 of 42 or nearly ⅔ concurred totally or in part with the concept of adding TODS standards to the MUTCD. Because the use of TODS is discretionary with each State, the FHWA finds that it is appropriate to add TODS standards to the MUTCD.

The FHWA asked commenters to specifically address four questions. This amendment adopts the text as proposed with minor modifications. The modifications are based, in part, on the comments and suggestions that were received by the docket.

This amendment will impose some additional costs on some of those States that have been experimenting with the TODS program that do not fully meet the standards set forth in this amendment. To offset these costs a compliance date of December 31, 1992, is established.

(4) Request II–115 (Chng.)—Use of ONE WAY and Divided Highway Crossing Signs

Sixteen State DOT's, one city traffic unit, the Ohio Section of the ITE and the NCUTCD reviewed this amendment. None of the commenters were opposed to the clarifications and corrections covered by this amendment. Several commenters suggested simplified text and figures. Others offered further refinements to the amendment. The final text and figures will reflect many of these suggestions.

This amendment will impose no additional costs on highway agencies; therefore, no compliance date is required.

(5) Request II–122 (Chng.)—Improved Legibility of the Directional Legend NORTH, SOUTH, EAST and WEST

Of the 21 commenters that reviewed this amendment, 3 State highway agencies and the NCUTCD opposed its adoption. Two of the opposing commenters stated that they were not aware of a problem.

Several individuals wrote to the FHWA, during the comment period, expressing difficulty in reading the cardinal direction words on highway guide signs. These letters were included in the docket. Several of those who commented in favor of the amendment, felt that the implementation period should be longer. Others objected to the upper/lower case alternative.

As a result of these comments, the FHWA has dropped the upper/lower case alternative, but will not change the implementation period.

This amendment will have some financial impact on State and local jurisdictions. To offset these costs, a compliance date of December 31, 1994, is established.

(6) Request II–123 (Chng.)—Tourist Information Signing Use of State, County, City or Town Name on Highway Signs

Of the 18 commenters that reviewed this amendment, 13 State DOT's, the Ohio Section of ITE and the CAS favored adoption. The CAS stated that design parameter guidance should be established in the MUTCD. Four State highway agencies and the NCUTCD recommended that the amendment not be adopted.

To improve this amendment, several of these comments and suggestions received through the docket will be incorporated into the final text. These changes will not alter the principles and concepts of the amendment.

Because this amendment is to be implemented at the discretion of the States, no compliance date is specified.

(7) Request II–132 (Chng.)—Criteria for Emergency Medical Services (EMS) Symbol Sign

Of the 16 commenters that reviewed the amendment, one State highway agency and the CAS opposed the adoption of the amendments. Both stated that national standards for the use of the sign are essential. Several of those who favored the amendments stated that some guidance would be desirable as a basis for developing State policy.

The National Highway Traffic Safety Administration has made documents available to the FHWA that suggest a reasonable basis for the development of State policies on the use of the Emergency Medical Services (EMS) Symbol Sign. The final text of Section 2D–46 will include guidelines for use by the States in developing policy.

This amendment will impose no additional costs on highway agencies; therefore, no compliance date is needed.

(8) Request IV–60 (Chng.)—Revision to Warrant 3, Minimum Pedestrian Volume

Section 4C–5, WARRANT 3, Minimum Pedestrian Volume, is amended to make it more responsive to the needs of pedestrians, the elderly and the handicapped. Also Warrant 8, Combination of Warrants, will be amended. The existing Warrant 3, in the opinion of numerous traffic engineers, is unrealistic due to high pedestrian volume requirements. Consequently, it is largely ignored by the traffic engineering community. A more realistic warrant was developed in the study, "Candidate Signal Warrants from Gap Data," [1] and was further evaluated in the study "Pedestrian Signalization Alternatives".[2]

The NCUTCD and numerous traffic engineers reviewed the warrant as recommended by the researchers. They found it to be too liberal in that it did not adequately reflect the negative tradeoffs of installing pedestrian signals. Also, it was suggested that provisions for the elderly and handicapped pedestrians be included in the revised warrant. As a result, this amended warrant reflects the concerns of the NCUTCD and other practicing traffic engineers. The amended warrant includes two basic requirements:

1. Minimum pedestrian volume of 100 pedestrians or more for each of any 4 hours; or 190 or more pedestrians for any 1 hour of an average day crossing the major street, and
2. Less than 60 adequate gaps per hour on the major street for those periods when the minimum volume requirements are met.

The elderly and handicapped are accomadated by reducing the pedestrian crossing volume by 50 percent when the predominant pedestrian crossing speed is below 3.5 feet per second.

This existing warrant is also reflected in Warrant 8, "Combination of Warrants." This revised wording has changed the requirements of Warrant 3 so that it is no longer appropriate to include it in the combination of warrants listed in Warrant 8. Therefore, reference to Warrant 3 is being deleted from Warrant 8.

A more detailed discussion of the amended warrant, a summary of comments, and FHWA's response to the comments follows.

Only a few candidate traffic signals are evaluated solely on the basis of pedestrian needs since the bulk of intersections with heavy pedestrian activity, such as in downtown areas, meet a vehicular signal warrant. Also school crossing needs are addressed by a separate school crossing warrant (Warrant 4). One survey found only 1.3 percent of 12,780 traffic signal installations surveyed were justified by the Pedestrian Volume Warrant.[3]

However, it is important that pedestrian needs be addressed at those locations where there is considerable pedestrian activity and a vehicular signal warrant is not met. And the need for traffic signals at mid-block crossings must, of course, be evaluated solely on the basis of the Minimum Pedestrian Warrant. The need for a realistic warrant is especially critical where the elderly and handicapped are crossing.

The problem with the former Minimum Pedestrian Volume warrant related primarily to the requirement that there be 150 or more pedestrians on the highest volume crosswalk crossing the major street for an 8-hour period. The Pedestrian Signalization Alternatives [4] study derives and uses hourly factors and factors of pedestrian volumes crossing each leg of an intersection to project this, for a typical 4-legged intersection, to 7,600 pedestrians in a 24-hour period crossing all four legs or 2,700 crossing at a mid-block location. Such high volumes are unlikely, except in a very small number of locations such as in large urban areas. Instead of relying on the warrant, practitioners had been evaluating the need for traffic signals to meet pedestrian needs and the needs of the elderly and handicapped on the basis of engineering judgement.[5]

There was, therefore, a recognition of the need for a more realistic Minimum Pedestrian Volume Warrant. The recent availability of gap counters and of a gap counting methodology has made it practical to utilize the more realistic criterion of gaps rather than traffic volumes. "A pedestrian desiring to cross the major street is faced with a situation which is analogous to that of a side street vehicle waiting at a STOP sign. Like the driver of the vehicle, a pedestrian must wait for a gap of adequate size to appear in the major street flow before crossing. As the number of adequate gaps decreases, the pedestrians will experience greater delay. If this waiting time becomes excessive, it is very likely that pedestrians will become impatient and may even step off the curb onto the roadway thereby exposing themselves to possible injury or death. Thus, when this threshold value of acceptable pedestrian delay is exceeded, it then becomes necessary to introduce a traffic signal that will artificially create a sufficient number of adequate gaps." [6]

Various research studies have been consistent in selecting 60 seconds as a threshold level of acceptable pedestrian delay.[7] The criterion for gaps recommended by the NCUTCD and adopted by FHWA reflect this threshold level of acceptable pedestrian delay.

Pedestrians suffering more than this threshold level of delay to cross the major street would presumably desire a traffic signal. However, the installation of any traffic signal involves certain tradeoffs which must also be considered. These include, for traffic signals being considered on the basis of pedestrian needs: The cost to install and operate the traffic signal; the delay to vehicular traffic on the main street; an increase or decrease in delay to minor street vehicular traffic, and; increased or decreased delay to pedestrians crossing the minor street. A threshold pedestrian volume is therefore essential to reflect these tradeoffs and to avoid the installation of signals at all locations where there are pedestrians crossing and there are not an acceptable number of gaps. The major problem with the former warrant was that the pedestrian volume threshold was unduly high.

Several research studies have recommended thresholds considerably less than those in the previous warrant. These have ranged between 60 per hour for 1 hour and 100 per hour total across both approaches for a 4-hour period. The study, "Pedestrian Signal Alternatives," [8] recommends the minimum hourly pedestrian volume crossing the major street for an average day meet at least one of the following criteria: 60 or more for each of any 4 hours, 90 or more for each of any 2 hours, or 110 or more during the peak hour. These criteria project, for a typical four-legged intersection, about 1,200 pedestrians in a 24-hour period crossing all four legs or 760 crossing in 24 hours at a mid-block location.

The NCUTCD, in reviewing the above recommendations, were concerned that the criteria did not adequately address the negative tradeoffs of traffic signals installed to meet pedestrian needs and would therefore result in an excessive number of traffic signals. They recommended, and FHWA has adopted, the more reasonable criteria of 100 pedestrians or more for each of any 4 hours of an average day; or 190 or more pedestrians for any 1 hour crossing the major street. These criteria project, for a typical four-legged intersection, to about 2,000 pedestrians in a 24-hour period or 1,250 crossing at a mid-block location.

[8] *Pedestrian Signalization Alternatives,* July 1985, Report No. FHWA/RD–83/102.

Problems of added delay to the major street, minor street, and pedestrians crossing the minor street are also mitigated by requirements recommended by the NCUTCD, and adopted by FHWA, that provide for actuation, pedestrian push buttons and, in coordinated systems, coordination of traffic signals installed under this warrant.

A signal warrant for the elderly and handicapped was also recommended in the report on "Pedestrian Signalization Alternatives." [9] This warrant would address the special needs for the elderly and handicapped at a limited number of locations in the proximity of elderly and handicapped high activity areas and population concentrations. The need for a separate warrant to meet these special needs was identified primarily by the traffic engineering community, FHWA, and the researcher, as part of the increasing sensitivity to the needs of the elderly and handicapped. An Institute of Transportation Engineers Committee on Traffic Control Devices for Elderly and Handicapped [10] also recommended a special warrant in 1983 as did a Minnesota Multi-Agency Study Committee on Traffic Engineering for Senior Citizens and Handicapped Pedestrians.[11] These suggested warrants are similar to the one adopted by FHWA.

The warrant recommended in the research report reduce the threshold values for the number of pedestrians by 50 percent. The needs of the elderly and handicapped are also reflected in the gap criterion since the slower walking speeds of this part of the population result in a need for longer gaps. The Minimum Pedestrian Volume Warrant adopted by FHWA incorporates these principles into the pedestrian warrant rather than adopting separate pedestrain and elderly/handicapped warrants.

There were 20 commenters for the FHWA's proposal regarding Warrant 3. Fifteen concurred with the FHWA proposal, three were opposed, and two had no comment. The Colorado Department of Highways was concerned that the 190 or more pedestrians in any 1 hour may be too easily met and the requirement of less than 60 gaps per hour is unrealistic. The 190 per hour and the 100 per hour for 4 hours are screening criteria. The less than 60 gaps per hour requirement must also be met. The threshold values recommended by the researchers have been adjusted to make them, in the opinion of most responding practitioners, more responsive to pedestrian needs and the tradeoffs of added traffic signals.

Two of those opposed, one a private citizen the other the Nebraska Department of Roads, raised issues concerning pedestrian crossings at locations not meeting the warrant. These situations are of concern and problem locations will need to be individually addressed using engineering judgment.

The private citizen also raised other issues concerning the proposed revision. Two of these were similar to issues he had raised as part of a formal discussion included with a 1983 research paper on pedestrian warrants.[12] The citizen's concerns were utilized, to the extent they were considered to have merit, by the NCUTCD in developing the recommended revisions, by those reviewing the proposed amendments and by FHWA in advancing them.

The private citizen points out that a traffic signal installed to benefit pedestrians crossing a major street may disbenefit pedestrians crossing the minor street (assuming the traffic signal is not installed at a mid-block location). Pedestrians crossing the minor street will be required to wait for a GREEN or WALK indication where they formerly had the right-of-way against vehicular traffic that, presumably, was under YIELD or STOP control. He asks if there is evidence to indicate that the safety of pedestrians crossing the minor street is enhanced by a traffic signal warranted solely to protect those pedestrians who wish to cross the major street. Conclusive data is not available on the impacts of traffic signals on pedestrian safety although two studies [13] [14], do indicate that pedestrians are at less risk at signalized intersections than at unsignalized locations. Traffic signals may reduce risks for pedestrians crossing the minor street since there are clear-cut right-of-way indications for pedestrians and motorists whereas drivers, under YIELD or STOP control, must give attention to yielding or stopping at a point where there is adequate sight distance and then seeking an adequate gap in traffic. Some drivers, in such instances, may give inadequate attention to watching for and yielding to pedestrians. In any case, it is, as indicated above, recognized that there are tradeoffs to installing traffic signals and the threshold values in the warrants have been adjusted from those recommended by the researchers to more realistically reflect those tradeoffs.

The private citizen also commented that when pedestrian volumes crossing the major street fall below the threshold volumes of the 4-hour warrant, they are presumed to be adequately protected without the help of a traffic signal, even if there are insufficient gaps. It does not seem justified to apply a stricter standard of control to pedestrians crossing the minor street. The pedestrians would, in the major street case, benefit by installation of a traffic signal but not to the extent of the disbenefits to vehicular traffic and to other pedestrian movements. If, in the minor street example a traffic signal was warranted for pedestrians crossing the major street approaches, pedestrians crossing the minor street approaches against inadequate gaps would also benefit.

The private citizen also points out that the pedestrian has the legal right-of-way on crosswalks. It is his perception, however, that the law is not being properly enforced since it is usually the pedestrian who has to yield to vehicles and find an adequate gap in vehicle flow. He comments that a warrant that took account of the vehicle codes would specify the pedestrian flow. The FHWA believes the revised warrant reflects, for most places, actual pedestrian, driver, and enforcement practices and is therefore responsive to the needs of pedestrians, including the elderly and handicapped.

The private citizen asks why pedestrians have to wait at a red light at

---

[9] *Pedestrian Signalization Alternatives*, July 1985, Report No. FHWA/RD-83/102.

[10] *Pedestrian Signalization Alternatives*, July 1985, Report No. FHWA/RD-83/102.

[12] Zegeer, Charles V., Khasnabis, Snehamay, and Fegan, John C., Development of Improved Pedestrian Warrants for Traffic Signals, TRB Record 904, 1983.

[13] *Traffic Control and Roadway Elements, Their Relationship to Highway Safety*, prepared by The Automotive Safety Foundation, 1963.

[14] *Pedestrian Trip Making Characteristics and Exposure Measures*, October 1983, Report No. FHWA/RD-83/074.

locations where the streets are "empty." The traffic signal can be operated on flash to minimize pedestrian and vehicular delay when vehicular and/or pedestrian volumes are low. Pedestrian behavior at traffic control devices is, in any case, governed by laws and ordinances as adopted by States and local entities. These laws and ordinances, in turn, are usually based on the Uniform Vehicle Code and Model Traffic Ordinance (UVC&MTO).[15] Its custodian is the National Committee on Uniform Laws and Ordinances that is composed of government and other officials, as well as individuals, interested in achieving sound, uniform motor vehicle laws and regulations.

This amendment will increase the usefulness of Warrant 3. Few traffic signals are required solely on the basis of pedestrian needs and the bulk of such signals have been installed based on engineering judgment. The amendment therefore does not impose additional costs on State or local highway agencies but rather reduces the amount of engineering effort to determine if traffic signals are needed at pedestrian crossings. No compliance date is needed.

(9) Request IV–73(Chng.)—Elimination of "Blind" Change Interval

Sections 4B–6.5 (a), (c) and 4B–15 are amended to eliminate the optional so-called "blind change interval" following a leading GREEN ARROW.

This amendment will make it mandatory to display a Yellow ARROW between the termination of a GREEN ARROW indication and the showing of a green indication to any conflicting traffic movement.

There were 19 commenters, 16 of which agreed, one disagreed and Oregon and Wisconsin had no comment.

This amendment may have some financial impact on State and local jurisdictions. To offset these costs, a compliance date of December 31, 1993, is established.

Discussion of Editorial Changes

In accordance with the FHWA procedures published in FHWA Docket 83–18 (48 FR 30145, June 30, 1983), the FHWA invites comments to FHWA Docket 87–9 on the following editorial changes (Requests I–7 and IV–71):

The FHWA is making the following editorial changes to the MUTCD. The changes and their basis are summarized below.

These editorial revisions to the MUTCD impose no additional costs on State and local highway agencies. Therefore, no compliance dates are needed for their implementation except in the case of Request IV–81. Request IV–81(Chng.)—Maximum Location of Signal Face is necessary because of the previous amendment IV–42(Chng.)—Traffic Signal Design Configuration, and, therefore, has the same compliance date of October 2, 1994.

(10) Request IV–75(Chng.)—Height of Vehicle Signal Faces

Section 4B–13 is editorially amended to clarify the fact that only "vehicle" signal faces are being referred to in this section and not pedestrian signals.

(11) Request IV–76(Chng.)—Color of the Signal Heads

Section 4B–24 is editorially amended to be technically correct by reflecting the fact that signal heads may be painted or (for plastic) the color embedded in the material.

The title of this section is revised from "Painting" to "Signal Head Housing Color" and reference to painting is deleted from the second paragraph which is revised to read as follows: "To obtain the best possible contrast with visual background, it is desirable that signal head housings be highway yellow."

(12) Request IV–77(Chng.)—Figure 4–4 Major Street—Minor Street

Section 4E–3 is amended to delete Figure 4–4 and reference to the figure in the second paragraph. There were certain inconsistencies in the figure and it was decided that the figure does not serve an important purpose. It is, therefore, being deleted.

(13) Request IV–78(Chng.)—Height Requirement for Signal Heads

Sections 4B–13, 4E–6, 4E–7, and 4E–11 are editorially amended to assure that the height requirement for signal heads is stated in a consistent manner in each section. Therefore, each of the sections will have the terminology "* * * *shall be at least* * * * *but not more than* * * *".

(14) Request IV–79(Chng.)—Two and Three Lens Signals

Section 4E–22 is editorially amended to change the term "Signal Indication" to "Signal Lens."

This section is being revised to make it consistent with the definition of "Signal Lens" as it is currently defined in the MUTCD (Section 4A–3).

(15) Request IV–81(Chng.)—Maximum Location of Signal Face

This editorial revision modifies Section 4B–12(4) to reflect previous ruling IV–42. Ruling IV–42 increased the maximum signal distance requirement to 150 feet. Sections 4B–8.1(c), 4B–12(4) and Figure 4–2 are being revised to reflect that change. Also subparagraph 10 in Section 4B–12 is being deleted because it is being consolidated into the editorial revision of subparagraph 5.

(16) Request VI 58(C)—Worker Safety

The NCUTCD has requested that Part VI of the MUTCD be amended throughout in ways that will call attention to worker and pedestrian protection needs in work zones. The following is offered as an example of the changes.

Revise Section 6C–10 by adding the words "and to reduce the risk of injuries to pedestrians and workers." to the end of the first sentence of the first paragraph. The paragraph will read: "Barriers are highway appurtenances designed to prevent vehicular penetration from the travelway into areas behind the barrier such as to minimize damage to impacting vehicles and their occupants and to reduce the risk of injuries to *pedestrians and workers.*"

(17) Request VI–62(C)—Warning Light Specification

Section 6E–5 is amended to limit the parts of the ITE Purchase Specifications for Flashing and Steady-Burn Lights that are incorporated by reference into the MUTCD. Only those parts of the specification that address the color, size of lens, flash rate, and minimum on time of warning lights are to be incorporated into the MUTCD.

Discussion of Actions To Be Deferred

(18) Request II–118 (Chng.)—Standard Motorcycle Warning Sign

The FHWA has proposed that a new series of signs, Warning Signs for Motorcyclists, be added to the MUTCD following Section 2C–40.

Of the 22 commenters, 9 concurred with the proposal to add a new series of signs, but were divided on the layout and legend for the sign and supplemental plaque. Many of the 13 commenters that opposed the FHWA proposal said that standard warning signs were adequate for this function.

The FHWA will undertake research to determine which of the suggested formats for this series of signs is more clearly understood. Therefore, action on

this request is being deferred pending the completion of the research study.

In consideration of the foregoing and under the authority of 23 U.S.C. 109(d), 315, and 402(a), and the delegation of authority in 49 CFR 1.48(b), the Federal Highway Administration hereby adopts the Manual on Uniform Traffic Control Devices as amended herein and amends Part 655 of Title 23 CFR by revising § 655.601(a) to read as set forth below.

Regulatory Impact

The Federal Highway Administration (FHWA) has determined that this document contains neither a major rule under Executive Order 12291 nor a significant regulation under the regulatory policies and procedures of the Department of Transportation. As stated herein, the economic impact of these amendments is so minimal as not to require preparation of a full regulatory evaluation. For the same reasons and under the criteria of the Regulatory Flexibility Act, the FHWA hereby certifies that this action will not have a significant economic impact on a substantial number of small entities.

Since the editorial amendments contained in this document are technical in nature, the FHWA finds good cause to make the editorial amendments final without the opportunity for comment under the Administrative Procedure Act. However, interested parties may comment on the editorial amendments by March 28, 1988, and such comments will be placed in FHWA Docket 87–9 and considered. For the same reasons, opportunity for prior comment is not required under the regulatory policies and procedures of the Department of Transportation.

Incorporation by Reference

The MUTCD has been incorporated by reference in 23 CFR Part 655 under the provisions of 5 U.S.C. 552(a) and 1 CFR Part 51 and approved by the Director of the Federal Register as of April 1, 1987. The MUTCD was last revised on March 9, 1987 (52 FR 7128). The MUTCD citation included in 23 CFR Part 655 will be revised to reflect the amendments contained in this document.

List of Subjects in 23 CFR Part 655

Design standards, Grant programs-transportation, Highways and roads, Signs, Traffic regulations, Incorporation by reference.

(Catalog of Federal Domestic Assistance Program Number 20.205, Highway Planning and Construction. The regulations implementing Executive Order 12372 regarding intergovernmental consultation on Federal programs and activities apply to this program.)

Issued on: March 9, 1988.

Robert E. Farris,

Deputy Federal Highway Administrator, Federal Highway Administration.

The FHWA hereby amends Chapter 1 of Title 23, Code of Federal Regulations, by revising Part 655 as set forth below.

PART 655—TRAFFIC OPERATIONS

1. The authority citation for 23 CFR Part 655, Subpart F continues to read as follows:

Authority: 23 U.S.C. secs. 109(d), 114(a), 217, 315, 402(a), 23 CFR 1204.4; and 49 CFR 1.48(b).

2. In § 655.601, the first sentence of paragraph (a) is revised to read as follows:

§ 655.601 Purpose.

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Office of the Assistant Secretary for Housing—Federal Housing Commissioner

24 CFR Part 203

[Docket No. R–88–1223; FR–2064]

Mutual Mortgage Insurance and Rehabilitation Loans; Conveyance of One- to Four-Family Properties Occupied by Tenants or Former Mortgagors; Announcement of Effective Date

AGENCY: Office of the Assistant Secretary for Housing—Federal Housing Commissioner, HUD.

ACTION: Notice of announcement of effective date for final rule.

SUMMARY: This notice announces the effective date for the final rule published in the Federal Register on January 14, 1988 (53 FR 868) that revised the current regulations at 24 CFR 203.70 through 203.683 under the general heading of Occupied Conveyance. The effective date section of the rule stated that the rule would become effective upon expiration of the first period of 30 calendar days of continuous session of Congress after publication, and announced that future notice of the effectiveness of the rule would be published in the Federal Register.

Thirty calendar days of continuous session of Congress have expired in the present Congress since the rule was published.

EFFECTIVE DATE: The effective date for the final rule published January 14, 1988 (53 FR 868) is April 1, 1988.

FOR FURTHER INFORMATION CONTACT: Jacqueline B. Campbell, Director, Single Family Property Disposition Division, Department of Housing and Urban Development, Room 9172, 451 Seventh Street, SW., Washington, DC 20410. Telephone number (202) 755–5740. (This is not a toll-free number.)

Dated: March 11, 1988.

Grady J. Norris,

Assistant General Counsel for Regulations.

BILLING CODE 4210-27-M

DEPARTMENT OF THE TREASURY

Bureau of Alcohol, Tobacco and Firearms

27 CFR Part 25

[T.D. ATF–268; Re: Notice No. 637]

Operation of a Tavern at a Brewery

AGENCY: Bureau of Alcohol, Tobacco and Firearms (ATF), Treasury.

ACTION: Final rule, Treasury decision.

SUMMARY: ATF is establishing criteria and procedures for operating a tavern on brewery premises. This final rule is based on Notice No. 637, published in the Federal Register of August 31, 1987, at 52 FR 32814, and the public comments received in response to it. The rulemaking originated as a petition submitted by Mr. Bill Owens, proprietor of Buffalo Bill's Brewery, located in Hayward, California.

EFFECTIVE DATE: April 15, 1988.

FOR FURTHER INFORMATION CONTACT: John A. Linthicum, Tax Compliance Branch, (202) 566–7602.

SUPPLEMENTARY INFORMATION:

Background

On August 31, 1987, ATF published Notice No. 637 in the Federal Register, at 52 FR 32814, proposing criteria and procedures for operation of a tavern on brewery premises. Several newly established breweries operate contiguous taverns as their only sales outlet. ATF believes that more breweries will establish such taverns in the future. This trend presented two problems under the previous regulations.

First, the tavern was required to be segregated from brewery premises, since the previous regulations prohibited the retention of tax-determined beer on brewery premises. Second, the beer was required to be physically removed in portable containers from the brewery to the tavern. ATF had some latitude in determining the size and portability of the container, but physical removal is required by law. Removal of beer by pipeline is only permitted to a contiguous distilled spirits plant, under 26 U.S.C. 5412.

In general, the law permits beer to be consumed at a brewery by employees and visitors without payment of tax. However, the sale and transfer of possession of beer for consumption at a brewery is a taxable event (26 U.S.C. 5052(c)(1)).

Proposal

ATF reconsidered its position of precluding retention of tax-determined beer on brewery premises. In Notice No. 637, ATF proposed to allow a brewer to establish a tavern on brewery premises, and utilize portable packages or dispense beer through pipelines. Notice No. 637 also proposed to establish certain criteria and procedures which are considered to be the minimum controls necessary to protect the revenue.

Notice No. 637 proposed to amend § 25.23 to specifically provide for the operation of a tavern on brewery premises which has been approved pursuant to the procedures set forth in a newly proposed regulation, § 25.25. The proposed regulation provided that a brewer desiring to operate a tavern on brewery premises shall submit, to the regional director (compliance), a Brewer's Notice, ATF F 5130.10, containing information on (1) the boundaries of the tavern and the security measures used to segregate public areas from non-public areas, (2) the method to be used for measuring beer for the purposes of tax determination, and (3) the identification of all tanks which will periodically contain tax-determined beer.

In addition, Notice No. 637 proposed to require the brewer to (1) determine the tax on the beer, whether in bulk or packaged, prior to the time it is dispensed for consumption and record such tax determination in the brewer's records, (2) identify each tank used for tax determination, and (3) determine the taxes each time beer is added to a tax determination tank.

Finally, Notice No. 637 proposed to amend § 25.24 to allow the retention of tax-determined beer on brewery premises when it is intended for sale at a tavern operated on such premises.

Public Comments

In response to Notice No. 637, ATF received 14 comments, all in favor of the proposed rule. The public comments raised three issues which are discussed below.

Sales of Other Commodities

One commenter, Mr. Brian J. McCollam, suggested that the final rule should specifically allow for the sale of food, and/or taxpaid distilled spirits, and/or taxpaid wine, at a tavern operated on brewery premises. Mr. McCollam points out that such sales typically are an integral part of operating a tavern. Since § 25.23 does not specifically name these commodities as authorized for sale on brewery premises, an applicant would still be required to apply for a variance to sell taxpaid distilled spirits, and/or taxpaid wine, and/or food. Since the purpose of this rulemaking is to eliminate the requirement to apply for a variance, ATF believes that this comment should be adopted.

The definition of "tavern" in § 25.25, is modified to specifically allow for optional sales of food, and/or taxpaid distilled spirits, and/or taxpaid wine, on brewery premises. Taxpaid beer produced by other brewers may already be received, stored, and sold on Brewery premises in accordance with § 25.24.

Voluntary Destruction

Another commenter, Ms. Carol Eubank, suggested that the final rule should specifically allow for a refund of tax on taxpaid beer which subsequently spoils. In Notice No. 637, the proposal to allow storage of taxpaid beer of the brewer's own production on brewery premises, under § 25.24, did not provide for this situation. Since the existing regulations do not allow for the storage of taxpaid beer of the brewer's own production on brewery premises, there is no corresponding regulation to allow for voluntary destruction, with benefit of refund, on taxpaid beer which was never removed.

Under the authority of 26 U.S.C. 5056(a), "Any tax paid by any brewer on beer produced in the United States may be refunded or credited to the brewer, without interest * * * under such regulations as the Secretary may prescribe, if such beer is

* * * destroyed under the supervision required by such regulations."

This final rule will require the tavern/brewer to prepare a record of the quantity of beer destroyed, the reason for, date of, and method of destruction. The regional director (compliance) may require the brewer to notify the ATF area supervisor in advance of destruction, to allow ATF the option of supervising the destruction. After the destruction is completed, the brewer may file a claim for refund or credit of tax. Since a claim for refund or credit is required by law, the brewer may prepare the record of destruction directly on the claim form, Form 2635 (5620.8).

Hospitality Rooms

The Beer Institute requested that the final rule clarify the tax status of "hospitality rooms" operated by many brewers, in conjunction with guided tours of the premises. ATF's policy on "hospitality rooms" is unchanged. Beer may be dispensed free of tax for consumption by visitors if no fee of any kind is imposed. The imposition of any kind of a mandatory fee, for parking, touring the brewery, etc., renders the dispensing of beer a taxable sale, and only taxpaid beer may be dispensed when a fee is imposed.

Modified Final Rule Adopted

The proposed rule is adopted as modified by the above discussion of the public comments. In addition, § 25.5 is amended to display the OMB Control Number of the new regulations added by this final rule.

Regulatory Flexibility Act

The provisions of the Regulatory Flexibility Act relating to a final regulatory flexibility analysis (5 U.S.C. 604) are not applicable to this final rule because it will not have a significant economic impact on a substantial number of small entities. The final rule will not impose, or otherwise cause, a significant increase in reporting, recordkeeping, or other compliance burdens on a substantial number of small entities. The final rule is not expected to have significant secondary or incidental effects on a substantial number of small entities.

Accordingly, it is hereby certified under the provisions of Section 3 of the Regulatory Flexibility Act (5 U.S.C. 605(b)) that this final rule, will not have a significant economic impact on a substantial number of small entities.

Executive Order 12291

In compliance with Executive Order 12291, ATF has determined that this final rule is not a "major rule" since it will not result in:

(a) An annual effect on the economy of $100 million or more;

VOL 53
ISS 51
MR 16 1988
UMI

(b) A major increase in costs or prices for consumers, individual industries, Federal, state, or local government agencies, or geographic regions; or

(c) Significant adverse effect on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

Paperwork Reduction Act

The Office of Management and Budget (OMB) approved ATF's amendment of OMB Control Number 1512–0045, covering the requirement to submit additional information in the Brewer's Notice, as proposed in Notice No. 637. No public comments discussed the paperwork burdens contained in the proposed rule.

Issuance

Title 27 CFR is amended as follows:

PART 25—[AMENDED]

1. The authority citation for Part 25 continues to read as follows:

Authority: 5 U.S.C. 552(a); 19 U.S.C. 81c, 1309; 26 U.S.C. 5002, 5051–5054, 5056, 5061, 5091, 5111, 5113, 5142, 5143, 5146, 5222, 5401–5417, 5551, 5552, 5555, 5556, 5671, 5673, 5684, 6011, 6061, 6065, 6091, 6109, 6151, 6301, 6302, 6311, 6313, 6402, 6651, 6656, 6676, 6806, 7011, 7342, 7606, 7805; 31 U.S.C. 9301, 9303–9308.

2. The table of sections in Part 25 is amended to add the headings of §§ 25.25 and 25.225, as follows:

Sec.

* * * * *

25.25 Operation of a tavern on brewery premises.

* * * * *

25.225 Destruction of taxpaid beer which was never removed from brewery premises.

* * * * *

§ 25.5 [Amended]

3. Paragraph (b) of § 25.5, the list of sections covered by OMB Control Number 1512–0045, is amended by adding, in numerical order, "25.25" and "25.225".

4. Section 25.23 is amended by revising paragraphs (b)(4) and (b)(5), by adding a new paragraph (b)(6), and by revising paragraph (c), to read as follows:

§ 25.23 Restrictions on use.

* * * * *

(b) *Other authorized uses.* * * *

* * * * *

(4) Are in the public interest because of emergency conditions;

(5) Involve experiments or research projects related to equipment, materials, processes, products, by-products, or waste of the brewery; or

(6) Involve operation of a tavern on brewery premises in accordance with § 25.25.

(c) *Application.* Except as provided in § 25.25 for operation of a tavern on brewery premises, a brewer desiring to use a brewery for other purposes shall submit to the Director through the appropriate regional director (compliance), an application listing the purposes. The Director will approve the application if the use for other purposes will not jeopardize the revenue or impede the effective administration of this part and is not contrary to specific provisions of law.

(Sec. 201, Pub. L. 85–859, 72 Stat. 1380, as amended (26 U.S.C. 5411))

§ 25.24 [Amended]

5. Paragraph (a) § 25.24 is amended by replacing "§ 25.213" with "§ 25.25 or § 25.213".

6. In Subpart C, immediately after § 25.24, the following new § 25.25 is added to read as follows:

§ 25.25 Operation of a tavern on brewery premises.

(a) *General.* A brewer desiring to operate a tavern as an alternate use of brewery premises, shall submit a Brewer's Notice, ATF F 5130.10 containing the information required by paragraph (b) of this section. If the regional director (compliance) finds that the operation of the tavern on brewery premises will not jeopardize the revenue or impede the effective administration of this part and is not contrary to specific provisions of law, the approval of the Brewer's Notice, ATF F 5130.10 shall constitute approval of the alternate use of brewery premises, in lieu of the application required by § 25.23. As used in this section, "tavern" means a portion of brewery premises where beer is sold to consumers. Food, and/or taxpaid wine, and/or taxpaid distilled spirits may also be sold at a tavern operated on brewery premises. Taxpaid beer produced by other brewers may be received, stored and sold on brewery premises in accordance with § 25.24.

(b) *Brewer's Notice.* In preparing the Brewer's Notice, AFT F 5130.10, the applicant shall show the following information, in addition to the information required by the form:

(1) The applicant shall identify the portion of the brewery which will be operated as a tavern by providing a diagram or narrative description of the boundaries of the tavern. The diagram or description shall identify areas of the brewery which are accessible to the public and areas which are not. The applicant shall describe security measures to be used to segregate public areas from non-public areas.

(2) The applicant shall describe in detail the method to be used for measuring beer for the purposes of tax determination.

(3) The applicant shall identify the tanks which will periodically contain tax-determined beer, and any other areas where tax-determined beer will be stored.

(c) *Procedures.* The following procedures shall apply to operation of a tavern on brewery premises:

(1) The brewery shall have a suitable method for measurement of the beer, such as a meter or gauge glass. Tax determination shall consist of the measurement of the beer and the preparation of the brewer's record of tax determination, required by § 25.292(a)(8). The taxes shall be determined prior to the time that the beer is dispensed into a container for consumption.

(2) If the brewer uses one or more tanks for tax determination, the following procedures shall apply:

(i) Each such tank shall be durably marked with the words "tax-determination tank";

(ii) The taxes shall be determined each time beer is added to a tax-determination tank; and

(iii) The brewer may never simultaneously pump into and out of a tax-determination tank.

(3) A brewer qualified under this section may store, on brewery premises, tax-determined beer which is intended for sale at a tavern operated on brewery premises, in accordance with this section. The prohibition of § 25.24 shall not apply to such tax-determined beer.

(4) Beer consumed by employees and visitors in the brewery's tavern shall be beer on which the tax has been paid or determined.

7. Paragraph (a) of § 25.221 is revised to read as follows:

§ 25.221 Voluntary destruction.

(a) *On brewery premises.* (1) A brewer may destroy, at the brewery, beer on which the tax has not beer determined or paid.

(2) A brewer operating a tavern on brewery premises under § 25.25 may destroy taxpaid or tax-determined been stored on brewery premises, in accordance with the requirements of § 25.225.

* * * * *

8. Immediately after § 25.224 in Subpart N, the following new § 25.225 is added to read as follows:

§ 25.225 Destruction of taxpaid beer which was never removed from brewery premises.

(a) *General.* A brewer operating a taven on brewery premises under § 25.25 may destroy taxpaid or tax-determined beer which was never removed from brewery premises, in accordance with the recordkeeping requirements of paragraph (b) of this section, and with the benefit of the tax refund provisions of paragraph (c) of this section.

(b) *Recordkeeping.* (1) When taxpaid or tax-determined beer which was never removed from brewery premises is destroyed, the brewer shall prepare a record of the quantity of beer destroyed, and the reason for, date of, and method of, destruction. The brewer may prepare this record on Form 2635 (5620.8) for submission as a claim under § 25.283.

(2) When required by the regional director (compliance), the brewer shall notify the area supervisor prior to the intended destruction, in accordance with procedures established by the regional director (compliance).

(c) *Refund of tax.* After destruction is completed, the brewer may file a claim for refund or credit of tax, in accordance with § 25.283(c).

9. Section 25.283 is amended by revising the heading of introductory paragraph (a) by redesignating paragraphs (c) and (d), as paragraphs (d) and (e) and adding a new paragraph (c) to read as follows:

§ 25.283 Claims for refund of tax.

(a) *Beer returned to brewery or voluntarily destroyed at a location other than a brewery.* * * *

* * * * *

(c) *Voluntary destruction of taxpaid beer which was never removed from brewery premises.* Claims for refund or credit of tax on beer voluntarily destroyed under the provisions of § 25.225, shall include:

(1) Information required by paragraphs (a)(1), (a)(2), (a)(3), (a)(5), and (a)(9) of this section; and

(2) The information contained in the record required by § 25.225(b).

(d) *Additional evidence.* * * *

(e) *Filing of claim.* * * *

Signed: February 11, 1988.

Stephen E. Higgins,

Director.

Approved: March 1, 1988.

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Part 64

[CC Docket No. 85–229, Phase II; FCC 88–10]

Furnishing of Enhanced Services and Customer-Premises Equipment by Communications Common Carriers

AGENCY: Federal Communications Commission.

ACTION: Memorandum Opinion and Order affirming the principal holdings of the *Phase II Order* in *Computer III.*

SUMMARY: The Commission affirmed the principal holdings of its *Phase II Order* (2 FCC Rcd 3072 (1987), 52 FR 20714 (1987)) in the *Computer III* proceeding and, with certain limited exceptions, denied a number of petitions seeking reconsideration of that order. The Commission upheld its decision that protocol processing should be treated as an enhanced, not basic, service.

ADDRESS: Federal Communications Commission, 1919 M Street NW., Washington, DC 20554.

FOR FURTHER INFORMATION CONTACT: Charles Oliver, Policy and Program Planning Division, Common Carrier Bureau (202) 632–4047.

SUPPLEMENTARY INFORMATION: This is a summary of the Commission's Memorandum Opinion and Order (FCC 88–10), adopted January 14, 1988, and released February 18, 1988. The full text of this Commission decision is available for inspection and copying during normal business hours in the FCC Dockets Branch (Room 230), 1919 M Street NW., Washington, DC. The complete text of this decision may also be purchased from the Commission's copy contractors, International Transcription Service, (202) 857–3800, 2100 M Street NW., Suite 140, Washington, DC, 20037.

Summary of Memorandum Opinion and Order

1. The Memorandum Opinion and Order, adopted January 14, 1988, affirmed the principal holdings of the *Phase II Order* (2 FCC Rcd 3072 (1987), 52 FR 20714 (1987)) in the *Computer III* proceeding and, with some exceptions, denied nine petitions for reconsideration of that order.

2. The Commission reaffirmed its classification of protocol conversion as a basic service. The Commission also reiterated that the BOCs must minimize the transport costs incurred by other providers of protocol processing that connect with the BOCs' basic service

VOL
53
ISS
51
MR
16
988
UMI

facilities, but clarified that multiplexing those connections to aggregate traffic is not the only acceptable cost-reduction technique. A BOC may satisfy this requirement by foregoing the potential cost advantages available from collocating its enhanced service facilities in its central offices and instead charging non-distance-sensitive transmission rates to all enhanced service providers, including its own enhanced service operations and those of noncollocated competitors. The Commission relieved the BOCs of the network utilization rate element (NURE) requirement. The Commission declined to eliminate Open Network Architecture (ONA) and CEI price averaging requirements for protocol conversion. This Order does not alter the Commission's previous findings that internetworking protocol conversions can be treated as basic service.

3. The Commission also described the conditions under which it would eliminate the requirement that AT&T submit reports on the quality of the basic services that it provides as part of its CEI/ONA tariffs. Prior to elimination of such reports, AT&T must amend its ONA plan to include a detailed description of its installation procedures that demonstrates its inability to engage in quality-based discrimination. After Commission approval of such an amendment, AT&T must submit an annual affidavit attesting that it has followed the installation procedures described in its ONA plan amendments and that it has not, in fact, discriminated in the quality of network services used by competing enhanced service providers. The Commission concluded that the BOCs should be afforded the same opportunity to demonstrate that their procedures preclude such discrimination. If they can do so, the BOCs will also be relieved of the quality reporting requirement, subject to the same conditions applicable to AT&T. The commission denied AT&T's request for permission to file installation and maintenance data only for its own enhanced service operations, but modified their requirements to permit AT&T to file reports comparing installation and maintenance intervals provided to its own enhanced service operations with those provided to a sampling of all customers. This Order does not modify the format for the BOCs' installation and maintenance reports, but the Commission will permit each BOC to amend its ONA plan to include a detailed description of its installation and maintenance procedures that demonstrates that it lacks the ability to discriminate, and modified this requirement, in the same way as for AT&T, for each BOC that makes such a demonstration.

4. The Commission declined to require that the BOCs enhanced service personnel be denied access to CPNI absent prior authorization from customers. The Commission expects carriers to take special care to protect the CPNI of customers, especially enhanced service providers, that request restricted treatment of their CPNI. Among other things, the Commission required AT&T and the BOCs to amend their ONA plans to describe the types of information they will treat as CPNI. The Commission also adopted five requirements that should facilitate users' ability to limit access to their CPNI. First, each CPNI notice to multiline business customers must include a response form that customers may use to inform the carrier of their preferred CPNI treatment. Second, the Commission required that a customer's choice to restrict release of its CPNI shall remain in effect until the customer expressly chooses otherwise. Third, the Commission clarified that customers may authorize release of some or all of their CPNI for spcific time periods or for specific purposes. Fourth, the Commission required AT&T and the BOCs to honor customers requests for restricted treatment of CPNI that are sent before the carriers send notices of CPNI rights. Fifth, the Commission required AT&T and the BOCs to include copies of their proposed notification of CPNI rights and response forms with their ONA plans. The Commission also declined to relieve the BOCs of the requirement that they make nonproprietary, aggregate CPNI available to unaffiliated enhanced service providers, and the Commission denied requests that it subject AT&T to the same requirement.

5. This Order clarified the Commission's treatment of multiplexing provided through equipment located on customer premises. The Commission retained the multiplexer exception for network equipment that has already been installed on customer premises, and for updated or improved versions of such equipment. If a carrier wishes to offer, on a regulated basis, any other non-loopback NCTE functions such as multiplexing through equipment located on customer premises, the carrier must request permission to do so on a case-by-case basis. A carrier must satisfy the NCTE waiver standard of the *Phase II Order* (2 FCC Rcd 3072 (1987), 52 FR 20714 (1987)) in order to obtain such permission. This treatment will promote the efficiencies of the competitive CPE marketplace while giving flexibility to carriers to provide basic service efficiently. In adopting this approach, the Commission conformed their regulatory treatment of customer-premises multiplexing with their treatment of other NCTE functions, particularly in light of the *BOC CPE Relief Order* (2 FCC Rcd 143 (1987), 52 FR 2226 (1987)), which permits the BOCs to supply unregulated CPE on an integrated basis with regulated communication services.

Ordering Clauses

6. *It is hereby ordered,* that the Motion for Leave to Exceed Page Limitation filed by BellSouth, and the Motions to Strike of Telenet, Tymnet, and Compuserve, *are dismissed.*

7. *It is further ordered,* that pursuant to sections 1, 4(i) and (j), 201, 202, 203, 205, 218, and 405 of the Communications Act of 1934, as amended, 47 U.S.C. 151, 154 (i) and (j), 201, 202, 203, 205, 218, and 405, and 5 U.S.C. 553, the Petitions for Reconsideration and Clarification filed in this proceeding *are denied,* except as provided herein.

Federal Communications Commission.

H. Walker Feaster III,

Acting Secretary.

[CC Docket No. 85-229, Phase I; FCC 88-9]

Furnishing of Enhanced Services and Customer-Premises Equipment by Communications Common Carriers

AGENCY: Federal Communications Commission.

ACTION: Memorandum opinion and order upholding the *Phase I Reconsideration Order* in *Computer III.*

SUMMARY: The Commission generally upheld, on further reconsideration, the regulatory framework established in the *Phase I Order* (104 FCC 2d 958 (1986), 51 FR 24350 (1986)) in *Computer III,* because that framework is adequate to prevent improper cost shifting and discrimination to AT&T and the BOCs in their provision ofl enhanced services.

ADDRESS: Federal Communications Commission, 1919 M Street NW., Washington, DC 20554.

FOR FURTHER INFORMATION CONTACT: Marion Gordon, Policy and Program Planning Division, Common Carrier Bureau, (202) 632-6363.

SUPPLEMENTARY INFORMATION: This is a summary of the Commission's Memorandum Opinion and Order (FCC 88-9), adopted January 14, 1988, and released February 18, 1988. The full text of this Commission decision is available for inspection and copying during normal business hours in the FCC Dockets Branch (Room 230), 1919 M Street NW., Washington, DC. The complete text of this decision may also be purchased from the Commission's copy contractors, International Transcription Service, (202) 857-3800, 2100 M Street NW., Suite 140, Washington, DC, 20037.

Summary of Memorandum Opinion and Order

1. The Memorandum Opinion and Order, adopted January 14, 1988, upheld on further reconsideration the regulatory framework established the *Phase I Order* (104 FCC 2d 958 (1986), 51 FR 24350 (1986)) in *Computer III* proceeding. Three parties had asked for further reconsideration of various portions of the *Phase I Reconsideration Order* (2 FCC Rcd 3035 (1987), 52 FR 29154 (1987)). The Commission generally denied their requests, but issued certain clarifications. It reaffirmed its decision to impose CEI/ONA requirements on AT&T that differ from those for the BOCs. Under those requirements, AT&T must file a modified ONA plan on February 1, 1988, and also must file service-specific CEI plans for its enhanced service offerings. The Commission clarified that, while both AT&T and the BOCs must file ONA plans, it is not requiring either AT&T or the BOCs to adopt a particular business organization for enhanced service operations. It simply required, as it did in the *BOC Structural Relief Order* (2 FCC Rcd 143 (1987), 52 FR 2226 (1987)), that any carrier that does not intend to implement full structural relief must demonstrate that the form of structural separation it proposes to retain either satisfies the Commission's nonstructural safeguards or provides a fully adequate replacement for them.

2. The Commission declined to modify its CEI/ONA pricing requirements to mandate that distance-sensitive transport functions be priced differently for CEI/ONA purposes from the way the same or substantially identical functions are priced in generally applicable interstate tariffs. It declined to eliminate its requirement that carriers must request waivers if a state imposes terms or conditions on the carrier's intrastate BSEs or CEI offerings that are inconsistent with federal CEI/ONA pricing requirements. It also declined to eliminate its requirement that carriers justify to the Commission any use restrictions contained in state tariffs for CEI or ONA basic services.

3. The Commission also stated that it expects the BOCs to make reasonably firm CEI/ONA scheduling projections, but recognizes that the planning horizons for such projections may vary among BSEs. For BOCs whose first ONA plans do not provide for deployment of their initial sets of BSEs throughout their territory, the Commission clarified that those BOCs may submit, in addition to their initial schedules, updated plans in every subsequent year until complete deployment can appropriately be scheduled.

Ordering Clause

4. *It is further ordered,* that pursuant to sections 1, 4 (i) and (j), 201, 202, 203, 205, 218, and 405 of the Communications Act of 1934, as amended, 47 U.S.C. 151, 154 (i) and (j), 201, 202, 203, 205, 218, and 405, and 5 U.S.C. 553, the Petitions for Reconsideration and Clarification filed in Phase I of this proceeding *are denied,* except as provided herein.

Federal Communications Commission.

H. Walker Feaster III,

Acting Secretary.

BILLING CODE 6712-01-M

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

50 CFR Part 285

[Docket No. 70355-7127]

Atlantic Tuna Fisheries

AGENCY: National Marine Fisheries Service (NMFS), NOAA, Commerce.

ACTION: Notice of closure.

SUMMARY: NOAA issues this notice to close the fishery for Atlantic bluefin tuna conducted by vessels permitted in the Incidental longline category and operating in the area south of 36°00′ N. latitude. Closure of this fishery is necessary because the annual quota of 115 short tons (st) for this area will be attained by the effective date. The intent of this action is to prevent exceeding the annual quota established for this segment of the fishery and thereby maintain the United States' obligations under the International Commission for the Conservation of Atlantic Tunas.

EFFECTIVE DATES: 0001 hours local time, March 16, 1988, through December 31, 1988.

FOR FURTHER INFORMATION CONTACT: Kathi L. Rodrigues, 617-281-3600, extension 324.

SUPPLEMENTARY INFORMATION: Regulations promulgated under the authority of the Atlantic Tunas Convention Act (16 U.S.C. 971-971h) regulating fishing for Atlantic bluefin tuna by persons and vessels subject to U.S. jurisdiction appear at 50 CFR Part 285.

Section 285.22(f)(1) of the regulations provides for an annual quota of 145 short tons (st) of Atlantic bluefin tuna to be taken by vessels permitted in the incidental longline category in the regulatory area. Of this amount, no more than 115 st may be taken in the area south of 36°00 ′N. latitude. The Assistant Administrator for Fisheries, NOAA (Assistant Administrator), is required under § 285.20(b)(1) to monitor the catch and landing statistics and, on the basis of these statistics, to project a date when the total catch of Atlantic bluefin tuna will equal any quota under § 285.22. The Assistant Administrator is further required under § 285.20(b)(1) to prohibit the fishing for, or retention of, Atlantic bluefin tuna by the category of vessels subject to the quotas. The Assistant Administrator has determined, based on the reported landings of Atlantic bluefin tuna and the catch rate, that the annual quota of Atlantic bluefin tuna allocated to vessels permitted in the Incidental longline category fishing south of 36°00′ N. latitude will be attained by the effective date. Fishing for or retention of any Atlantic bluefin

VOL 53
ISS 51
MR 16
1988
UMI

tuna by these vessels in this area must cease at 0001 hours, local time, on March 16, 1988.

Vessels permitted in the Incidental longline category fishing north of 36°00′ N. latitude may continue to fish for and retain Atlantic bluefin tuna until the total annual quota of 145 st is achieved.

Notice of this action has been mailed to all Atlantic Bluefin tuna dealers and vessel owners holding a valid vessel permit for this fishery.

Other Matters

This action is taken under the authority of 50 CFR 285.20, and is taken in compliance with Executive Order 12291.

50 CFR Part 652

[Docket No. 71260-8037]

Atlantic Surf Clam and Ocean Quahog Fisheries; Final 1988 Fishing Quotas

AGENCY: National Marine Fisheries Service (NMFS), NOAA, Commerce.

ACTION: Notice of final 1988 fishing quotas.

SUMMARY: NOAA issues a notice of final quotas for the surf clam and ocean quahog fisheries for 1988. These quotas were selected from a range defined as optimum yield for each fishery, as adjusted to reflect fishing activity at the end of 1987. The intended effect of this action is to establish allowable harvests of surf clams and ocean quahogs from the exclusive economic zone in 1988.

EFFECTIVE DATE: March 15, 1988.

FOR FURTHER INFORMATION CONTACT: John G. Terrill (Resource Policy Analyst), 617–281–3600, ext. 252.

SUPPLEMENTARY INFORMATION: The Fishery Management Plan for the Atlantic Surf Clam and Ocean Quahog Fisheries (FMP) directs the Secretary of Commerce (Secretary), in consultation with the Mid-Atlantic Fishery Management Council, to specify quotas for surf clams and ocean quahogs on an annual basis from within ranges which have been identified as optimum yield for each fishery.

In specifying the quota values in this notice, the Regional Director, Northeast Region, NMFS, considered stock assessments, catch records, and other relevant information concerning exploitable biomass and spawning biomass, fishing mortality rates, stock recruitment, projected effort and catches, and areas likely to be reopened to fishing.

The proposed 1988 quotas were published on January 6, 1988 (53 FR 265). No public comments were received on the proposed quotas during the comment period. The proposed quotas are adjusted under § 652.21 (a), (b), and (c) to reflect the amount of underharvest or overharvest in each designated surf clam fishery during 1987. At the conclusion of the 1987 fishing season, none of the quotas for the three surf clam fishery areas had been achieved. Using the best available information, the amount of underharvest for the Mid-Atlantic fishery was determined to be 45,000 bushels; for the Nantucket Shoals fishery, 5,000 bushels; and for the Georges Bank fishery, 185,000 bushels. These amounts were added to the proposed quotas, giving the final annual quotas for 1988, as shown in the following table:

1988 FINAL SURF CLAM/OCEAN QUAHOG QUOTAS

Fishery area	1988 quota (in bushels)
Mid-Atlantic surf clam	2,695,000
Georges Bank surf clam	485,000
Nantucket Shoals surf clam	205,000
Ocean quahog	5,000,000

For the surf clam fisheries, the annual quotas are then divided into quarterly quotas, under § 652.21 (a), (b), and (c), which is reflected in the following table:

1988 SURF CLAM QUARTERLY QUOTAS

[In bushels]

Fishery areas	Qtr 1	Qtr 2	Qtr 3	Qtr 4
Mid-Atlantic surf clam	707,500	662,500	662,500	662,500
Georges Bank surf clam	121,250	121,250	121,250	121,250
Nantucket Shoals surf clam	41,000	61,500	61,500	41,000

Other Matters

This action is taken under § 652.21 and is in compliance with Executive Order 12291. The action is covered by the certification for Amendment 3 to the FMP; under the Regulatory Flexibility Act, the authorizing regulations do not have a significant economic impact on a substantial number of small entities.

Proposed Rules

Federal Register

Vol. 53, No. 51

Wednesday, March 16, 1988

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. 88–NM–12–AD]

Airworthiness Directives; Aerospatiale Model ATR–42 Series Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of Proposed Rulemaking (NPRM).

SUMMARY: This notice proposes an airworthiness directive (AD), applicable to Aerospatiale Model ATR–42 series airplanes, which would require modification of the propeller brake electronic control wiring. This proposal is prompted by reports of electrical interference causing the brake to engage prior to command. This condition, if not corrected, could result in an unsymmetrical drag/thrust on landing, and could cause loss of control of the airplane.

DATES: Comments must be received no later than May 11, 1988.

ADDRESSES: Send comments on the proposal in duplicate to the Federal Aviation Administration, Northwest Mountain Region, Office of the Regional Counsel (Attention: ANM:103), Attention: Airworthiness Rules Docket No. 88–NM–12–AD, 17900 Pacific Highway South, C–68966, Seattle, Washington 98168. The applicable service information may be obtained from Aerospatiale, 316 Route de Bayonne, 31060 Toulouse Cedex 03, France. This information may be examined at the FAA, Northwest Mountain Region, 17900 Pacific Highway South, Seattle, Washington, or the Seattle Aircraft Certification Office, 9010 East Marginal Way South, Seattle, Washington.

FOR FURTHER INFORMATION CONTACT: Ms. Armella Donnelly, Standardization Branch, ANM–113; telephone (206) 431–1967. Mailing address: FAA, Northwest Mountain Region, 17900 Pacific Highway South, C–68966, Seattle, Washington 98168.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested persons are invited to participate in the making of the proposed rule by submitting such written data, views, or arguments as they may desire. Communications should identify the regulatory docket number and be submitted in duplicate to the address specified above. All communications received on or before the closing date for comments specified above will be considered by the Administrator before taking action on the proposed rule. The proposals contained in this Notice may be changed in light of the comments received. All comments submitted will be available, both before and after the closing date for comments, in the Rule Docket for examination by interested persons. A report summarizing each FAA-public contact concerned with the substance of this proposal will be filed in the Rules Docket.

Availability of NPRM

Any person may obtain a copy of this Notice or Proposed Rulemaking (NPRM) by submitting a request to the FAA, Northwest Mountain Region, Office of the Regional Counsel (Attention: ANM–103), Attention: Airworthiness Rules Docket No. 88–NM–12–AD, 17900 Pacific Highway South, C–68966, Seattle, Washington 98168.

Discussion

The French Direction Générale de L'Aviation Civile (DGAC) has, in accordance with existing provisions of a bilateral airworthiness agreement, notified the FAA of an unsafe condition which may exist on certain Aerospatiale Model ATR–42 airplanes. It has been determined that electrical interference can cause the propeller brake to engage prior to commend. This could result in an unsymmetrical drag/thrust, and lead to loss of control of the airplane on landing.

Aerospatiale has issued Service Bulletin ATR 42–61–0013, Revision 1, dated December 8, 1987, which contains procedures for modification of the propeller brake electrical control wiring system. The DGAC has classified this service bulletin as mandatory to preclude electrical interference with the brake electrical system.

This airplane model is manufactured in France and type certificated in the United States under the provisions of § 21.29 of the Federal Aviation Regulations and the applicable bilateral airworthiness agreement.

Since these conditions are likely to exist or develop on airplanes of this model registered in the United States, an AD is proposed that would require modification of the propeller brake electronic control wiring, in accordance with the Aerospatiale service bulletin previously described.

It is estimated that 23 airplanes of U.S. registry would be affected by this AD, that it would take approximately 6 manhours per airplane to accomplish the required actions, and that the average labor cost would be $40 per manhour. Based on these figures, the total cost impact of this AD to U.S. operators is estsimated to be $5,520.

For the reasons discussed above, the FAA has determined that this document (1) involves a proposed regulation which is not major under Executive Order 12291 and (2) is not a significant rule pursuant to the Department of Transportation Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and it is further certified under the criteria of the Regulatory Flexibility Act that this proposed rule, if promulgated, will not have a significant economic impact, positive or negative, on a substantial number of small entities because of the minimal cost of compliance per airplane ($240). A copy of a draft regulatory evaluation prepared for this action is contained in the regulatory docket.

Aviation safety, Aircraft.

The Proposed Amendment

Accordingly, purusant to the authority delegated to me by the Administrator, the Federal Aviation Administration proposes to amend § 39.13 of Part 39 of the Federal Aviation Regulations as follows:

PART 39—[AMENDED]

1. The authority citation for Part 39 continues to read as follows:

Authority: 49 U.S.C. 1354(a), 1421 and 1423; 49 U.S.C. 106(g) (Revised Pub. L. 97–449, January 12, 1983); and 14 CFR 11.89.

§ 39.13 [Amended]

2. By adding the following new airworthiness directive:

Aerospatiale: Applies to Model ATR–42 series airplanes, as listed in Aerospatiale Service Bulletin ATR42–61–0013, Revision 1, dated December 8, 1987, certificated in any category. Compliance is required within 100 hours time-in-service after the effective date of this AD, unless already accomplished.

To prevent electrical interference with propeller brake system, accomplish the following:

A. Modify the propeller brake electonic control wiring in accordance with Aerospatiale Service Bulletin ATR42–61–0013, Revison 1, dated September 8, 1987.

B. An alternate means of compliance or adjustment of the compliance time, which provides as acceptable level of safety and which has the concurrence of an FAA Principal Maintenance Inspector, may be used when approved by the Manager, Standardization Branch, ANM–113, FAA, Northwest Mountain Region.

C. Special flight permits be issued in accordance with FAR 21.197 and 21.199 to operate airplanes to a base for the accomplishment of the modification required by this AD.

All persons affected by this directive who have not already received the appropriate service documents from the manufacturer may obtain copies upon request to Aerospatiale, 316 Route de Bayonne, 31060 Toulouse Cedex 03, France. These documents may be examined at the FAA, Northwest Mountain Region, 17900 Pacific Highway South, Seattle, Washington, or at the Seattle Aircraft Certification Office, 9010 East Marginal Way South, Seattle, Washington.

Issued in Seattle, Washington, on March 7, 1988.

Frederick M. Isaac,

Acting Director, Northwest Mountain Region.

[FR Doc. 88–5670 Filed 3–15–88; 8:45 am]

BILLING CODE 4910-13-M

14 CFR Part 39

[Docket No. 87–NM–176–AD]

Airworthiness Directives; Boeing Model 727 Series Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of Proposed Rulemaking (NPRM).

SUMMARY: This notice proposes to supersede an existing airworthiness directive (AD), applicable to certain Boeing Model 727 series airplanes, which currently requires inspection and repair, if necessary, of the wing upper surface stringers for fatigue cracks. This action would require inspection of additional stringer-to-rib attachments on airplanes that have experienced stringer-to-rib attachment cracking and rework of certain repairs. This action is necessary because cracking has been reported at locations inboard of the inspection area defined in the existing AD. Failure to detect and repair cracks could result in loss of a wing panel. Furthermore, certain repairs called out in the existing AD have been found to be inadequate and, if installed, must be reworked.

DATES: Comments must be received no later than May 12, 1988.

ADDRESSES: Send comments on the proposal in duplicate to Federal Aviation Administration, Northwest Mountain Region, Office of the Regional Counsel (Attn: ANM–103), Attention: Airworthiness Rules Docket No. 87–NM–176–AD, 17900 Pacific Highway South, C–68966, Seattle, Washington 98168. The applicable service information may be obtained from the Boeing Commercial Airplane Company, P.O. Box 3707, Seattle, Washington 98124. This information may be examined at the FAA, Northwest Mountain Region, 17900 Pacific Highway South, Seattle, Washington, or Seattle Aircraft Certification Office, FAA, Northwest Mountain Region, 9010 East Marginal Way South, Seattle, Washington.

FOR FURTHER INFORMATION CONTACT: Mr. Stanton R. Wood, Airframe Branch, ANM–120S; telephone (206) 431–1924. Mailing address: FAA, Northwest Mountain Region, 17900 Pacific Highway South, C–68966, Seattle, Washington 98168.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested persons are invited to participate in the making of the proposed rule by submitting such written data, views, or arguments as they may desire. Communications should identify the regulatory docket number and be submitted in duplicate to the address specified above. All communications received on or before the closing date for comments specified above will be considered by the Administrator before taking action on the proposed rule. The proposals contained in this Notice may be changed in light of the comments received. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons. A report summarizing each FAA/public contact concerned with the substance of this proposal will be filed in the Rules Docket.

Availability of NPRM

Any person may obtain a copy of this Notice of Proposed Rulemaking (NPRM) by submitting a request to the FAA, Northwest Mountain Region, Office of the Regional Counsel (Attn: ANM–103), Attention: Airworthiness Rules Docket No. 87–NM–176–AD, 17900 Pacific Highway South, C–68966, Seattle, Washington 98168.

Discussion

On June 17, 1983, the FAA issued AD 83–13–03, Amendment 39–4673 (48 FR 29468; June 27, 1983), to require inspection for fatigue cracks and repair, if necessary, of the wing upper surface stringers from wing stations (WS) 601.5 to 738.5. This action was necessary to ensure the structural integrity of the wing.

Since issuance of that AD, inspections of wing upper stringer-to-rib attachments inboard at WS 519.0 and 546.5 have revealed cracking in additional stringers. Accordingly, the FAA has determined that it is necessary to inspect the areas at WS 519.0 and 546.5 if cracking has been found at any of the outboard wing stations. The FAA has also determined that certain repairs accomplished in accordance with the existing AD are unsatisfactory, since additional cracking can occur in the repaired area; therefore, these repairs must be inspected and modified.

The FAA has reviewed and approved Boeing Alert Service Bulletin 727–57A159, Revision 4, dated October 15, 1987, which describes procedures for inspection, modification, and repair of the wing upper stringer-to-rib attachment.

Since this condition is likely to exist or develop on other airplanes of this same type design, an AD is proposed which would supersede AD 83–13–03 with a new AD to require inspection of the wing upper stringer-to-rib attachments at WS 519 and 546.5 on airplanes that have experienced cracking of stringers outboard of WS 601.5, in addition to the inspections required by AD 83–13–03, in accordance with the service bulletin previously mentioned. Additionally, certain repairs accomplished in accordance with AD 83–13–03 must be inspected and modified. The period for compliance with the initial inspection requirement, however, would remain the same as that required by the existing AD.

It is estimated that 200 airplanes of U.S. registry would be affected by this AD. If the inspection of the wing stringers at WS 519 and 546.5 is conducted at the same time as the inspection of the outboard stringers, it would require 1 to 8 additional manhours, at an average labor cost of $40 per manhour; this would equal a total cost of $40 to $320 per airplane. If the inspection of the stringers at WS 519 and 546.5 is not conducted at the same time as that of the outboard stringers, it would require 29 to 36 manhours, at an average labor cost of $40 per manhour; this would equal a total cost of $1,160 to $1,440 per airplane. Based on these figures, the total cost impact of the AD on U.S. operators is estimated to be between $8,000 and $288,000.

For these reasons, the FAA has determined that this document (1) involves a proposed regulation which is not major under Executive Order 12291 and (2) is not a significant rule pursuant to the Department of Transportation Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and it is further certified under the criteria of the Regulatory Flexibility Act that this proposed rule, if promulgated, will not have a significant economic impact, positive or negative, on a substantial number of small entities because few, if any, Model 727 airplanes are operated by small entities. A copy of a draft regulatory evaluation prepared for this action is contained in the regulatory docket.

List of Subjects in 14 CFR Part 39

Aviation safety, Aircraft.

The Proposed Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration proposes to amend § 39.13 of Part 39 of the Federal Aviation Regulations (14 CFR 39.13) as follows:

PART 39—[AMENDED]

1. The authority citation for Part 39 continues to read as follows:

Authority: 49 U.S.C. 1354(a), 1421 and 1423; 49 U.S.C. 106(g) (Revised Pub. L. 97–449, January 12, 1983); and 14 CFR 11.89.

§ 39.13 [Amended]

2. By superseding AD 83–13–03, Amendment 39–4673 (48 FR 29468; June 27, 1983), with the following new airworthiness directive:

Boeing: Applies to Model 727 series airplanes, except Model 727–200F, certificated in any category. Compliance required as indicated, unless previously accomplished.

To ensure the structural integrity of the wing upper surface stringers, accomplish the following:

A. Using eddy current, x-ray, or visual inspection techniques, inspect wing upper surface stringers for cracks, in accordance with Boeing Alert Service Bulletin 727–57A159, Revision 1, dated October 29, 1982, or later FAA-approved revisions, as follows:

1. For airplanes with 45,000 or more landings on August 16, 1983, inspect prior to the accumulation of 1,000 additional landings after August 16, 1983.

2. For airplanes with at least 40,000 and less than 45,000 landings on August 16, 1983, inspect prior to the accumulation of 2,000 additional landings after August 16, 1983.

3. For all other airplanes, inspect prior to the accumulation of 3,000 additional landings after August 16, 1983, or prior to accumulating 33,000 total landings, whichever occurs later.

B. Repeat the inspections required by paragraph A., above, and, if applicable, paragraph C., below, at the following intervals:

1. If the immediately preceding inspection was performed using eddy current methods, reinspect within the next 22,000 landings.

2. If the immediately preceding inspection was performed using x-ray or visual methods, reinspect within the next 11,000 landings.

C. If cracks are detected during the inspections required by paragraph A. or B., above, unless previously accomplished, inspect the stringer-to-rib attachment at wing stations (WS) 519.0 and 546.5 for cracks, using eddy current, x-ray, or visual techniques, in accordance with Boeing Alert Service Bulletin 727–57A159, Revision 3, dated September 18, 1986, or later FAA-approved revisions, in accordance with the following schedule:

1. Prior to the accumulation of 4,500 flight hours after the effective date of this AD, for airplanes on which cracks have been detected prior to the effective date of this AD.

2. Prior to further flight, for airplanes on which cracks have been detected after the effective date of this AD.

D. Any cracked structure detected as a result of the inspections required by paragraphs A., B., C., E., or F. of this AD, must be repaired prior to further flight, in accordance with a procedure listed in Boeing Alert Service Bulletin 727–57A159, Revision 3, dated September 18, 1986, or later FAA-approved revisions. Repair or modification in accordance with Boeing Alert Service Bulletin 727–57A159, Revision 3, dated September 18, 1986, or later FAA-approved revisions, eliminates the repetitive inspection requirements of paragraph B., above, and constitutes terminating action for only those attachments so repaired or modified.

E. Within the next 4,500 flight hours after the effective date of this AD, unless previously accomplished in accordance with Boeing Service Bulletin 727–57A159, Revision 3, dated September 18, 1986, or later FAA-approved revision, inspect and modify stringers (excluding stringer tabs) previously repaired in accordance with Figure 12 of Boeing Service Bulletin 727–57A159, Revision 1, dated October 29, 1982, or Revision 2, dated March 30, 1984.

F. For affected wing stringer rib attach locations previously repaired in accordance with Structural Repair Manual Subject 57–10–4 or any other FAA-approved method (except Boeing Alert Service Bulletin 727–57A159, Revision 1, dated October 29, 1982, or later FAA-approved revisions) that have accumulated 22,000 landings prior to August 16, 1983, inspect within the next 11,000 landings after August 16, 1983, or prior to the accumulation of 33,000 landings since repair, whichever occurs later, and thereafter at intervals in accordance with paragraph B. of this AD.

G. Special flight permits may be issued in accordance with FAR 21.197 and 21.199 to operate airplanes to a base in order to comply with the requirements of this AD.

H. An alternate means of compliance or adjustment of the compliance time, which provides an acceptable level of safety and which has the concurrence of an FAA Principal Maintenance Inspector, may be used when approved by the Manager, Seattle Aircraft Certification Office, FAA, Northwest Mountain Region.

All persons affected by this directive who have not already received the appropriate service documents from the manufacturer may obtain copies upon request to the Boeing Commercial Airplane Company, P.O. Box 3707, Seattle, Washington 98124. These documents may be examined at the FAA, Northwest Mountain Region, 17900 Pacific Highway South, Seattle, Washington, or Seattle Aircraft Certification Office, FAA, Northwest Mountain Region, 9010 East Marginal Way South, Seattle, Washington.

Issued in Seattle, Washington, on March 8, 1988.

Temple H. Johnson, Jr.,

Acting Director, Northwest Mountain Region.

BILLING CODE 4910-13-M

---

14 CFR Part 71

[Airspace Docket No. 88–ASO–2]

Proposed Designation of Transition Area, Keystone Heights, FL

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking.

SUMMARY: This notice proposes to designate the Keystone Heights, Florida, transition area to accommodate instrument flight rule (IFR) operations at the Keystone Airpark Airport. This action will lower the base of controlled airspace from 1200 to 700′ above the surface in the vicinity of the airport. An instrument approach procedure is being developed to serve the airport and the controlled airspace is required for protection of IFR aeronautical operations.

DATES: Comments must be received on or before: April 20, 1988.

ADDRESSES: Send comments on the proposal in triplicate to: Federal Aviation Administration, ASO-530, Manager, Airspace and Procedures Branch, Docket No. 88-ASO-2, P.O. Box 20636, Atlanta, Georgia 30320.

The official docket may be examined in the Office of the Regional Counsel, Room 652, 3400 Norman Berry Drive, East Point, Georgia 30344, telephone: (404) 763-7646.

FOR FURTHER INFORMATION CONTACT: James G. Walters, Airspace Section, Airspace and Procedures Branch, Air Traffic Division, Federal Aviation Administration, P.O. Box 20636, Atlanta, Georgia 30320; telephone: (404) 763-7646.

SUPPLEMENTARY INFORMATION:

Interested parties are invited to participate in this proposed rulemaking by submitting such written data, views or arguments as they may desire. Comments that provide the factual basis supporting the views and suggestions presented are particularly helpful in developing reasoned regulatory decisions on the proposal. Comments are specifically invited on the overall regulatory, economic, environmental, and energy aspects of the proposal. Communications should identify the airspace docket and be submitted in triplicate to the address listed above. Commenters wishing the FAA to acknowledge receipt of their comments on this notice must submit with those comments a self-addressed, stamped postcard on which the following Statement is made:

Comments Invited

"Comments to Airspace Docket No. 88-ASO-2." The postcard will be date/time stamped and returned to the commenter. All communications received before the specified closing date for comments will be considered before taking action on the proposed rule. The proposal contained in this notice may be changed in the light of comments received. All comments submitted will be available for examination in the Office of the Regional Counsel, Room 652, 3400 Norman Berry Drive, East Point, Georgia 30344, both before and after the closing date for comments. A report summarizing each substantive public contact with FAA personnel concerned with this rulemaking will be filed in the docket.

Availability of NPRM's

Any person may obtain a copy of this Notice of Proposed Rulemaking (NPRM) by submitting a request to the Federal Aviation Administration, Manager, Airspace and Procedures Branch (ASO-530), Air Traffic Division, P. O. Box 20636, Atlanta, Georgia 30320. Communications must identify the notice number of this NPRM. Persons interested in being placed on a mailing list for future NPRM's should also request a copy of Advisory Circular No. 11-2 which describes the application procedure.

The Proposal

The FAA is considering an amendment to § 71.181 of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) to designate the Keystone Heights, Florida, transition area. This action will provide controlled airspace for aircraft executing a new instrument approach procedure to the Keystone Airpark Airport. If the proposed designation of the transition area is found acceptable, the operating status of the airport will be changed to IFR. Section 71.181 of Part 71 of the Federal Aviation Regulations was republished in FAA Handbook 7400.6C dated January 2, 1987.

The FAA has determined that this proposed regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore, (1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule, when promulgated, will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 71

Aviation safety, Transition area.

The Proposed Amendment

Accordingly, pursuant to the authority delegated to me, the Federal Aviation Administration (FAA) proposes to amend Part 71 of the Federal Aviation Regulations (14 CFR Part 71) as follows:

PART 71—[AMENDED]

1. The authority citation for Part 71 continues to read as follows:

Authority: 49 U.S.C. 1348(a), 1354(a), 1510; E.O. 10854; 49 U.S.C. 106(g) (Revised Pub. L. 97-449, January 12, 1983); 14 CFR 11.69.

§ 71.181 [Amended]

2. Section 71.181 is amended as follows:

Keystone Heights, Florida (New)

That airspace extending upward from 700' above the surface within a 6.5-mile radius of the Keystone Airpark Airport (Lat. 29°50'39"N., Long. 82°03'01"W.), excluding that airspace that coincides with Restricted Area R-2903B.

Issued in East Point, Georgia, on March 2, 1988.

William D. Wood,

Acting Manager, Air Traffic Division, Southern Region.

[FR Doc. 88-5873 Filed 3-15-88; 8:45 am]

BILLING CODE 4910-13-M

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 763

[OPTS-62036C; FRL-33503]

Asbestos; Release of Information

AGENCY: Environmental Protection Agency (EPA).

ACTION: Release of additional information.

SUMMARY: Under the authority of section 14(a)(4) of the Toxic Substances Control Act (TSCA), 15 U.S.C. 2613(a)(4), EPA is announcing its decision to release all the information currently treated as Confidential Business Information (CBI) contained in three draft documents supporting the TSCA asbestos ban and phase out rulemaking proceeding. The three draft documents are: the Asbestos Exposure Assessment, the Asbestos Modeling Study, and the Regulatory Impact Analysis. These three draft documents contain analyses necessary to support the rulemaking proceeding for the final rule to ban and phase out the use of asbestos.

FOR FURTHER INFORMATION CONTACT: Michael M. Stahl, Acting Director, TSCA Assistance Office (TS-799), Office of Toxic Substances, Environmental Protection Agency, Rm. E-543, 401 M St. SW., Washington, DC 20460, (202 554-1404).

SUPPLEMENTARY INFORMATION:

I. Background

In 1986, EPA proposed a rule under section 6 of TSCA which would ban immediately the manufacture, import, and processing of certain asbestos products, and would phase out the remaining products over a 10-year period (50 FR 3738, January 29, 1986). This proposal outlined several options for implementing the ban and phase out and allowed 5 months for public comment.

EPA has since updated its information base with data collected in a 1986 telephone survey and a 1986-1987 Asbestos Exposure Assessment Questionnaire. This updated information base has been used in the analyses supporting the final rule. The three draft documents containing these analyses and supporting the final rule soon will be released to the public. These three documents are the Asbestos Exposure Assessment, the Asbestos Modeling Study, and the Regulatory Impact Analysis.

In December 1987, EPA announced its intention to release the information currently treated as CBI which is contained in these three documents (52 FR 48286, December 21, 1987). The release of information was proposed under the authority of section 14(a)(4) of TSCA, which authorizes disclosure of CBI when relevant in a TSCA proceeding. EPA received 11 comments in response to this proposal within the deadline for comment. Two other comments were received after the January deadline. EPA is responding to all 13 comments. Eleven of the 13 comments supported the proposed release of this CBI. Only two commentors objected to the proposed release of information.

II. Rationale for the Release of Information

The authority and rationale for the release of the information currently treated as CBI which is contained in the three documents were explained in the **Federal Register** notice proposing this release (52 FR 48286, December 21, 1987). As noted in the proposal, under 40 CFR 2.306(i), EPA may not release CBI under section 14(a)(4) until affected businesses have been informed that the Agency is considering making the information available to the public and have been afforded a reasonable opportunity to comment. EPA made known its intention to release this information to the public through the publication of a notice in the **Federal Register** on December 21, 1987. Further, EPA mailed a copy of that **Federal Register** notice to each of the businesses that provided EPA information which was treated as CBI. A 30-day comment period ending January 20, 1988 was established to afford these businesses and the general public a reasonable opportunity to comment.

During the comment period for the proposed release of the information currently treated as CBI and contained in the Asbestos Exposure Assessment, the Asbestos Modeling Study, or the Regulatory Impact Analysis, EPA received 13 comments. A few of these comments had more than one signatory. All but two comments supported the Agency's proposed action.

The Agency received support for the proposed release of information from several trade associations, the Natural Resources Defense Council, Inc. (NRDC), several companies, and the offices of the Attorneys General of nine states. Only two individual companies objected to the proposed release.

The offices of the Attorneys General of nine states supported the release of information because they believe that the CBI should be released to allow full and effective public comment on this rulemaking proceeding. One manufacturer of roof coatings and the Asbestos Free Gasket Group, a group of gasket manufacturers who are replacing asbestos in their products, urged EPA to proceed with the release in order to expedite the rulemaking proceeding for the ban and phase out of asbestos.

The NRDC also supported the proposed release of the information currently treated as CBI which is contained in any of the three support documents. NRDC believes that release of this information is vital to meaningful public comment.

The Asbestos Information Association/North America (AIA/NA) and the Asbestos Institute (AI) also supported EPA's proposal to release this information but believe that two additional steps should be taken. AIA/NA and AI believe that the proposed release of information will be inadequate to allow full disclosure of disputed material facts, as required by section 19(c)(1)(B) of TSCA. Consequently, AIA/NA and AI want EPA to release even more data, including "the facts lying behind these three reports."

AIA/NA and AI suggested two specific steps to release additional data. First, AIA/NA and AI suggested that EPA individually examine the validity of claims of confidentiality made with respect to information it obtained. Second, AIA/NA and AI suggested that EPA request permission to release the information from each submitter whose claimed confidential information it is using.

AIA/NA and AI suggested that the two steps mentioned above be taken because AIA/NA and AI believe that more information needs to be released. At present, EPA believes that the information to be released in the three documents is sufficient to provide adequate opportunity for public comment because the documents summarize all necessary data concerning the Agency's risk assessment and cost benefit analyses for the final rule. EPA, therefore, does not believe that it is necessary at this point to take the two additional steps AIA/NA and AI suggested.

EPA may consider the release of additional CBI should the Agency determine that disclosure is advisable because of the relevance of any such information to the asbestos ban and phase out rulemaking proceeding and the need for additional comment on the rulemaking proceeding. In such case, appropriate notice and opportunity to comment would be provided affected businesses.

Suggestions concerning the proposal's rationale for the release of the information currently treated as CBI were also received. The NRDC along with the offices of the Attorneys General of the nine states believe that EPA could have proposed the release of CBI under section 14(a)(3) of TSCA, instead of section 14(a)(4). Section 14(a)(3) calls for the release of CBI if the "Administrator determines it necessary to protect health or the environment against an unreasonable risk of injury to health or the environment." Because the Agency believes section 14(a)(4) provides appropriate and sufficient authority for release of the relevant and necessary information at this time, the Agency does not have to determine whether disclosure would also be authorized under section 14(a)(3).

Objections to the proposed release of information came from two companies. Both companies use asbestos in the manufacture of their products. These two companies were primarily concerned that the release of the information they claimed as CBI might cause them competitive harm.

Section 14(a)(4) of TSCA and 40 CFR 2.306(i) authorize the Agency to release CBI, after giving appropriate notice and opportunity for comment, irrespective of potential competitive harm if the information is relevant to a proceeding under TSCA, if EPA determines it in the public interest to release such information, and if the Agency preserves the confidentiality of the information to the extent practicable without impairing the proceeding. EPA believes that in deciding to release the information treated as CBI and contained in any of the three support documents it has met each of these requirements.

The Agency believes it is releasing only that information which is necessary to support the final rule to ban and phase out the use of asbestos, while preserving confidentiality to the extent practicable. Much of the information EPA will be releasing is aggregated

VOL
53
ISS
51
MR
16
988
UMI

because information generally will be released on a product category basis.

The General Counsel has concluded that the information is relevant to the subject of the TSCA section 6 rulemaking proceeding for the ban and phase out of the use of asbestos. Based upon the matters discussed in the notice published in the **Federal Register** on December 21, 1987 and after considering all comments, the Office of Toxic Substances remains convinced that the public interest would be served by making the described information publicly available.

Today's **Federal Register** notice informs all affected businesses that all of the information currently treated as CBI and contained in the Asbestos Exposure Assessment, the Asbestos Modeling Study, or the Regulatory Impact Analysis will be released to the public in the near future. In addition to the publication of this **Federal Register** notice, each company that provided the Agency with information claimed as CBI will receive individual notice of this release. The information treated as CBI which is contained in the Asbestos Exposure Assessment, the Asbestos Modeling Study, or the Regulatory Impact Analysis will be disclosed no sooner than 5 calendar days after the businesses have received notice of this decision.

Isopropanol; Proposed Test Rule

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: In response to the Interagency Testing Committee's (ITC) designation of isopropanol (CAS No. 67-63-0) for health effects testing consideration, EPA is proposing under section 4(a)(1)(B) of the Toxic Substances Control Act (TSCA) that manufacturers and processors of isopropanol be required to perform testing of this substance for subchronic toxicity, oncogenicity, mutagenicity, reproductive toxicity, developmental toxicity, neurotoxicity, and pharmacokinetics.

DATES: Submit written comments on or before May 16, 1988. If persons request an opportunity to submit oral comments by May 2, 1988, EPA will hold a public meeting on this rule in Washington, DC. For further information on arranging to speak at the meeting see Unit VIII. of this preamble.

ADDRESS: Submit written comments identified by the document control number (OPTS-42097) in triplicate to: TSCA Public Information Office (TS-793), Office of Pesticides and Toxic Substances, Environmental Protection Agency, Rm. NE-G004, 401 M St. SW., Washington, DC 20460.

A public version of the administrative record supporting this action is available for inspection at the above address from 8 a.m. to 4 p.m., Monday through Friday, except legal holidays.

FOR FURTHER INFORMATION CONTACT: Edward A. Klein, Director, TSCA Assistance Office (TS-799), Office of Toxic Substances, Rm. E-543, 401 M St. SW., Washington, DC 20460, (202) 554-1404.

SUPPLEMENTARY INFORMATION: EPA is issuing a proposed test rule for isopropanol under section 4(a) of TSCA in response to the ITC's designation of isopropanol for health effects testing consideration. Testing is being proposed under section 4(a)(1)(B) of TSCA because the production volume of isopropanol is substantial and there is or may be substantial human exposure to it. The Agency has concluded that existing data are inadequate to assess the health risks posed by the manufacture, processing, use, or disposal of and the resulting human exposure to isopropanol and that testing is necessary to develop such data.

I. Introduction

A. ITC Recommendation

TSCA (Pub. L. 94-469, 90 Stat. 2003 *et seq.*, 15 U.S.C. 2601 *et seq.*) established the ITC under section 4(e) to recommend to EPA a list of chemical substances and mixtures (chemicals) to be considered for testing under TSCA section 4(a) of the Act. The ITC recommended isopropanol with intent to designate for health effects testing in its 19th Report, published in the **Federal Register** of November 14, 1986 (51 FR 41417). The ITC designated isopropanol for priority consideration in its 20th Report, published in the **Federal Register** of May 20, 1987 (52 FR 19020). The ITC recommended that isopropanol be tested for chronic toxicity including oncogenicity, and for genotoxicity including mutagenicity in mammalian systems and clastogenicity. Testing for developmental and reproductive effects was deferred from consideration pending the outcome of relevant studies currently being conducted in the United Kingdom by the British Industrial and Biological Research Association (BIBRA) for the Food and Drink Federation. The ITC's rationale for recommending these tests was as follows: (1) The large production volume and many uses indicating a potential for widespread human exposure; (2) the large number of workers occupationally exposed and the possibility for general population exposure from use in commercial and household products; (3) the identification of isopropanol in leachates from a landfill site; and (4) the insufficient available data with which to assess the long-term effects of exposure. No chemical fate testing was recommended because any isopropanol released to the environment is widely dispersed and rapidly biodegraded and oxidized. Environmental effects testing was not recommended because there is sufficient information to show that isopropanol is unlikely to persist in the environment at concentrations that would be likely to cause adverse ecological effects.

B. Opportunity for Negotiating a Consent Order

EPA has issued an Interim Final Rule that amends EPA's procedural regulations in 40 CFR Part 790 for the development and implementation of testing requirements under section 4 of TSCA. The amendments establish procedures for using enforceable consent agreements to require testing under section 4 of the Act. EPA intends to use such consent agreements when a consensus exists among the Agency, affected manufacturers and/or processors, and interested members of the public about the need for and scope of testing requirements. The consent agreement provides an alternative to the test rule development process, facilitating the rapid development of test data by removing the necessity for a lengthy rulemaking process.

When EPA concludes that the Agency, the affected firms, and interested parties cannot reach a consensus on the testing requirements or other provisions to be included in the consent agreement, the Agency will proceed with rulemaking under section 4(a) of TSCA. A description of the procedures governing consent agreements and test rules appears in detail in the **Federal Register** of June 30, 1986 (51 FR 23706).

The first step in determining the feasibility of developing a consent agreement for a specific chemical is the identification of interested parties who may wish to participate in negotiations with EPA. In the **Federal Register** of February 3, 1987 (52 FR 19020), EPA announced that the Agency was considering developing a testing consent agreement for isopropanol. The notice requested interested parties to identify themselves. The Chemical Manufacturers Association (CMA), the Environmental Conservation Board (ECB) of the Graphics Communication Industry, and the Natural Resources Defense Council (NRDC) requested participation as "interested parties" in the consent order negotiation process for isopropanol. However, consensus could not be reached on issues raised in the proposals submitted by CMA concerning the EPA science policy requirement of a two-species oncogenicity bioassay. CMA's plan was to use the results of various short-term tests (subchronic and mutagenicity) and pharmacokinetics to establish equivalency between species to negate the need for a second rodent species bioassay. CMA later proposed that there be an "independent scientific body" established to review the feasibility of CMA's approach and that this decision be binding on EPA. Both EPA and NRDC found this approach unacceptable. Since consensus was not reached as required for a consent order, the Agency decided to proceed with rulemaking under section 4(a) of TSCA.

C. Test Rule Development Under TSCA

Section 4 of TSCA provides authority for EPA to require development of data relevant to assessing the risks to health and the environment posed by exposure to a particular chemical.

Under section 4 of TSCA, EPA must require testing of a chemical to develop appropriate test data if EPA makes certain findings as described in TSCA under section 4(a)(1) (A) or (B). Detailed discussions of the statutory section 4 findings are provided in the Agency's first and second proposed test rules which were published in the **Federal Registers** of July 18, 1980 (45 FR 48510) and June 5, 1981 (46 FR 30300).

In evaluating the ITC's testing recommendations for isopropanol, EPA considered all available relevant information including the following: Information presented in the ITC's report recommending testing consideration and public comments on the ITC's recommendations; production volume, use, exposure, and release information reported by manufacturers of isopropanol under the TSCA section 8(a) Preliminary Assessment Information Rule (40 CFR Part 712); health and safety studies submitted under the TSCA section 8(d) Health and Safety Data Reporting Rule (40 CFR Part 716) concerning isopropanol; and published and unpublished data on isopropanol available to the Agency. From its evaluation, as described in this proposed rule, EPA is proposing health effects testing for isopropanol under TSCA section 4(a)(1)(B). By this action, EPA is responding to the ITC's designation of isopropanol for priority testing consideration as required by TSCA section 4(e).

II. Review of Available Data

A. Chemical Profile

Isopropanol is a colorless, volatile, flammable liquid with a slight odor resembling that of a mixture of ethanol and acetone (Ref. 1), the air odor threshold is 22 ppm (Ref. 2). The freezing point of isopropanol is −88.5 °C and its boiling point is 82.3 °C (Ref. 1). It is miscible in water, ethanol, acetone, and benzene (Ref. 3). At 20 °C, it has a vapor pressure of 33 mmHg and a density of 0.7849 g/cm ^{3} (Ref. 1). The log octanol/water partition coefficent of isopropanol is 0.05 (Ref. 4).

Three grades of isopropanol are marketed in the United States: Anhydrous, and two aqueous solutions containing 95 volume percent and 91 volume percent of isopropanol, respectively (Ref. 1). The 91 volume percent is an azeotropic mixture with water and is usually referred to as CBM (constant-boiling-mixture) isopropanol (Ref. 1).

B. Production

Isopropanol is produced in the United States primarily by two basic commercial processes involving synthesis from propylene; the indirect hydration (sulfuric acid) process and the direct hydration process. The indirect hydration process utilizes a C_3 feedstock stream containing 40 to 60 percent propylene from refinery off-gas that is absorbed in concentrated sulfuric acid and the resulting ester then hydrolyzed. Although there are two variants of the indirect hydration process, the one currently employed by U.S. producers is the weak-acid process (Ref. 57). A strong-acid process is no longer in use. The product is packaged in drums, pails, or glass jugs or shipped in tank cars or trucks (Ref. 6).

The annual production volume of isopropanol has been in excess of 1 billion lb since 1956 (Ref. 7), and it ranked 50th for chemicals produced in the United States in 1985 (Ref. 8).

Isopropanol is manufactured in the United States by four companies (Arco Chemical Company, Exxon Chemical Company, Shell Oil Company, and Union Carbide) at five locations with a combined production capacity of 2.5 billion lb per year as of January 1987 (Refs. 9 and 10). Imports increased from 48 million lb in 1980 to over 100 million lb each year from 1983 to 1986. Exports have exceeded 130 million lb each year since 1980, and increased from approximately 180 million lb per year in 1984 to 1985 to 267 million lb in 1986 (Refs. 7 and 64).

C. Uses

Estimated uses of isopropanol in 1987 were: Coating solvents, 18 percent; process solvents, 14 percent; pharmaceuticals, 14 percent; household and personal products, 14 percent; acetone production, 10 percent; miscellaneous solvents and chemical intermediates, 10 percent; and exports, 20 percent (Ref. 11).

The major use of isopropanol is as a solvent in consumer products and industrial products and procedures. As an industrial process solvent, isopropanol is used as an extractant in many procedures involving natural products such as fat, oils, gums, shellacs, waxes, drugs, spices, and flavorings (Refs. 3 and 13). Its solvent properties for a variety of oils, gums, waxes, resins, and alkaloids make it an important solvent in printing inks, paints, and varnishes (Ref. 1). While formerly the major source of demand for isopropanol, acetone production is now a relatively minor use. Acetone is now manufactured primarily as a by-product of phenol production by cumene oxidation, and is manufactured from isopropanol only as a supplementary supply source.

Many consumer products have been reported to contain isopropanol, including hair sprays, liniments, lotions, cosmetics, perfumes, floor detergents, shoe polishes, insect repellants, flea and tick sprays, air fresheners, windshield deicers, windshield cleaners, paints, and polishes (Ref. 1). Many home, industrial, and medicinal products containing isopropanol rely on its germicidal properties. Included in this category are sanitizers and antiseptics such as rubbing alcohol, a 70 percent isopropanol aqueous solution (Ref. 1). Some of these uses come under the jurisdiction of the Federal Food, Drug, and Cosmetic Act and the Federal Insecticide, Fungicide, and Rodenticide Act and are not subject to TSCA.

Isopropanol is an important chemical intermediate. Commercially important

VOL
53
ISS
51
MR
16
1988
UMI

chemicals derived from it include aluminum isopropoxide, isopropyl acetate, isopropylamine diisopropylamine, isopropyl myristate, isopropyl oleate, and isopropyl xanthate (Refs. 1 and 14). Of these, recent production figures are available only for isopropylamine, which had a production volume of 54 million lb in 1985 (Ref. 12).

Isopropanol also is added to gasoline as an antistall agent. Other automotive uses include windshield deicers and windshield washer concentrates (Ref. 14).

D. Human Exposure and Release

1. Occupational

The National Occupational Hazard Survey (NOHS), conducted by the National Institute for Occupational Safety and Health (NIOSH) from 1972 to 1974, estimated that there were 8,899,594 exposures in 357,173 plants, potentially exposing 5,483,862 people to isopropanol in the workplace in 1970 (Ref. 15). The National Occupational Exposure Survey (NOES) estimates that 1,857,972 workers (60 percent of whom were female) were potentially exposed to isopropanol in the workplace in 1980 (Ref. 16).

Due to its large production volume and use in so many industries and products as a solvent, considerable exposure to isopropanol is expected. An assessment of worker exposure during manufacture was performed by EPA in 1985 (Refs. 6 and 17). These results are summarized in the following Table 1.

TABLE 1.—WORKER EXPOSURE TO ISOPROPANOL DURING 1985 [1]

Exposure phase	Workers exposure [2]	Exposure type	
		Inhalation [3] (mg/m^3)	Dermal [3] (mg/day)
Manufacturing (4 sites)	20–25/day/site	50 [4]	1,300–3,900
Processing (100 sites):			
Ink	1/day/site	5–52	1,300–3,900
Coatings	5/day/site	ND [5]–120	1,300–3,900
Uses:			
Acetone mfg. (4–6 sites)	6–10/day/site	3–4 [2]	1,300–3,900
Coatings (1,000 sites)	10,000–60,000	1–10, 5–11	1,900–5,500
Inks (7,000–11,000 sites)	83,000 [6]	50–1,470, 0–8,000, 240–280	260–780
Rubbing alcohol (5,900 sites)	1,000,000 [6]	ND–110	900–2,700

[1] Source: (Ref. 18).
[2] Estimated.
[3] Measured concentration, unless indicated otherwise.
[4] Upper limit.
[5] Not detected.
[6] National Occupational Exposure Survey (NOES).

Most of these exposures occurred at concentrations that are less than the 400 ppm, 8-hour time-weighted average, which is the Occupational Safety and Health Administration (OSHA) Permissible Exposure Limit (PEL), the National Institute for Occupational Safety and Health (NIOSH) recommended exposure limit, and the American Conference of Government and Industrial Hygienists (ACGIH) Threshold Limit Value (TLV). During manufacture, human exposure to isopropanol is primarily through inhalation as a result of filling operations, sampling, and reactor cleanup (Ref. 6).

Sources of occupational exposure include:

a. Use as a solvent in the application and manufacture of surface coatings, including stain, varnish, nitrocellulose lacquers, quick-drying inks and paints, textile coatings and dyes, dopes, and polishes.

b. Use in manufacture and handling of acetone.

c. Use in organic synthesis for isopropyl derivatives, including phenols, acetates, xanthates, ether, amines, myristate, palmitate, nitrite, and glycerin.

d. Use in manufacture of personal care items including liniments, skin lotions, permanent wave lotions, and hair color rinses.

e. Use in preparation, manufacture, packaging, and consumption of disinfectants and sanitizers, including rubbing alcohol, other antiseptic solutions, skin astringents, mouth washes, and medicated sprays.

f. Use in manufacture of cleaning and degreasing agents, including stain and spot removers, glass cleaners, rug and upholstery cleaners, tar remover, liquid soap, and windshield cleaner fluid and use in manufacture of deicing, defogging and antifreeze products.

g. Use in extraction and purification of alkaloids, proteins, chlorophyll, perfumes, sulfuric acid, vitamins, kelp, pectin, resins, gums, and waxes.

h. Use in manufacture of rubber products; use as an additive in antistalling gasoline, lubricants, denatured ethyl alcohol, hydraulic brake fluids, and rocket fuel.

i. Use in manufacture of adhesives, including nitrocellulose film and microfilm cement and in manufacture of safety glass.

General dilution/ventilation and the use of personal protective equipment have been recommended by NIOSH as effective controls to reduce occupational exposure to isopropanol in each of these operations (Ref. 15).

2. Consumer and General Population

Fugitive emissions of isopropanol during production have been estimated to be 1.5 percent of production in 1976 (Ref. 19); no more recent estimates are available. Based on 1985 production figures (1.236 billion lb), this would mean that 18.5 million lb of isopropanol were lost as fugitive emissions during its manufacture. Virtually all of the isopropanol used as a solvent in inks, coatings, and related products, as well as many household and consumer products, is ultimately released to the atmosphere. The majority of these releases are in an indoor environment, potentially resulting in relatively high peak exposures, depending on the product and use circumstances, as well as longer exposures to lower levels of isopropanol after product use and before ventilation can entirely remove the chemical.

In a study to identify environmental pollutants in human milk, isopropanol was detected in all eight samples of mothers' milk from women living in four heavily industrial urban areas; no quantitation was performed (Ref. 20).

The extent of background pollutants, common air and water pollutants, or metabolites of naturally occurring products is unknown in this study.

Isopropanol has been identified in emissions from latex paint by Tichenor (Ref. 63) in experiments conducted to study indoor pollutants from building materials and consumer products. These experiments were performed as part of the EPA indoor air quality research program to characterize sources of indoor air pollutants.

Each year 22 million lb of isopropanol, or about 2 percent of its annual production, goes into rubbing alcohol, which is used in hospitals and industrial settings as an antiseptic and disinfectant (Ref. 6). Over 1 million workers are potentially exposed in this manner (Ref. 16). Levels of exposure from not-detected to 110 mg/m^3 of isopropanol have been estimated from OSHA inspection at two medical centers (Ref. 6). Exposure to rubbing alcohol (70 percent isopropanol) by the general population is also widespread.

Isopropanol occurs naturally as a plant volatile, as a product of fermentation, in animal wastes, and in volcanos and has been found in wine, beer, apples, pears, grapes, and pine logs (Refs. 13, and 21 through 27). Results of a Swedish study show that isopropanol is released in vehicle exhaust (Ref. 28).

3. Environmental Releases

Evidence suggests that considerable quantities of isopropanol may be released in wastewater that enters the aquatic environment. In a comprehensive EPA survey involving 4,000 samples of wastewater from industrial and publicly owned treatment works, 84 occurrences of isopropanol were reported from 19 industrial categories (Ref. 29). Additionally, 94 to 41,000 mg/L of isopropanol have been detected in leachate from municipal landfills (Refs. 30 and 31). Positive samples of groundwater taken from landfill sites have contained 86 to 2,600 mg/L of isopropanol (Ref. 31). Levels of isopropanol ranging from 10 to 2,000 mg/L have been found in a well in South Carolina near an industrial impoundment (Ref. 32).

E. Chemical Fate

Isopropanol enters the environment almost exclusively by evaporation or when discharged in wastewater. In the atmosphere, the major degradative process is expected to be reaction with photochemically formed hydroxyl radicals. Washout by precipitation may also contribute to its removal. Biodegradation should be the dominant degradative mechanism in water and soil. Isopropanol is readily biodegraded as determined in aerobic screening tests. Volatilization from water, especially shallow rivers, will be a significant transport process, as will leaching through soil. Isopropanol is not expected to break down by chemical means in the aqueous environment. Since it is miscible with fresh water, it is expected to remain in the aqueous compartment. In salt water, where it is less soluble, isopropanol may form surface films and evaporate. While no experimental data are available on the adsorption of isopropanol to soil or sediment, this should be insignificant because its octanol/water partition coefficient is low (0.05) (Refs. 33 and 34).

F. Health Effects

1. Acute Toxicity

The Agency has reviewed several studies and has found them sufficient to reasonably predict or determine the acute toxicity of isopropanol.

Oral LD50 values in the range of 4.4 to 8.0 g/kg have been determined for isopropanol in rats, rabbits, dogs, and mice indicating isopropanol to be of a low order of acute oral toxicity. An LD50 of 5.84 g/kg by dermal exposure has been established in the rabbit. A 2-hour LC50 value of 10.39 mg/L (49.120 ppm) has been determined by inhalation in mice. Following inhalation exposure, LC50 values of 1,900 and 22,500 were determined for female and male rats respectively. Studies on the acute effects of isopropanol in humans by the oral, inhalation and dermal routes are also available. These effects include hypotension, facial flushing, dizziness, gastritis, stupor, headaches, mental depression, body ache, nausea, and mild irritation of the ear, nose, and throat. The documentation for the acute effects of isopropanol is found in the isopropanol technical support document prepared by the Syracuse Research Corporation (Ref. 62).

2. Subchronic Toxicity

The Agency has reviewed all of the available studies on the subchronic toxicity of isopropanol and has found them insufficient to reasonably predict or determine the subchronic toxicity of isopropanol. Most of these studies were not conducted according to accepted, standard protocols, or complete data were not available to the Agency for review. The available data on the subchronic toxicity of isopropanol are not suitable for risk assessment purposes. This conclusion is borne out by the summaries that follow.

Daily dermal application of 50 percent isopropanol to albino rats for 187 days produced no skin injuries (Ref. 35), but experimental data are lacking for evaluation. In a 27-week study, rats were given isopropanol (0.5 to 10 percent) in their drinking water. Female rats receiving 1 or 5 percent isopropanol showed retardation of growth and body weight loss while rats in the 10 percent dose group refused to drink and died (due to unknown cause) after 7 to 28 days (Ref. 36). No effects were reported for the 0.5 percent group.

Savolainen et al. (Ref. 66) exposed 20 male Wistar rats to 300 ppm isopropanol vapors, 5 days per week, 6 hours per day for up to 21 weeks. Additional groups of 20 rats were sham-exposed (controls), sham-exposed with ethanol-water solution as sole drinking water source, or exposed to isopropanol vapors with ethanol-water solution as sole drinking water source. Within each group, 5 rats were sacrificed at intervals of 5, 10, 16, and 21 weeks for biochemical analyses of the nervous system. In addition, open field activity tests were conducted at 5-week intervals. Effects observed included reduced cerebellar superoxide dismutase and azoreductase activities in all treated groups, and elevated acid proteinase levels in the ethanol and isopropanol groups, while glial cell glutathione levels were unaltered. In rats administered either isopropanol alone or isopropanol with ethanol and sacrificed after 21 weeks, the lipid phosphorous/cholesterol ratio was slightly decreased relative to controls. The investigators proposed that the results suggest a general degeneration of nervous system tissue, but could not interpret the negative results regarding glutathione levels. Treatment-related changes in spontaneous open-field activity measures were negligible. At 15 weeks, however, isopropanol and combined isopropanol-ethanol treated rats administered caffeine prior to behavioral testing were less active than controls. This study failed to provide a comprehensive evaluation of all potential toxicologic end points.

In an oral subchronic study, Lehman et al. (Ref. 37) administered isopropanol solution to 3 dogs as a sole drinking water source, 1 hour per day for 6 months. Initially, the dogs were given a 1 percent isopropanol solution. By the end of the first month, the concentration had been raised to 4 percent and was maintained at that level until the end of the study. The dogs developed neuromuscular incoordination during the first exposure sessions; less incoordination was observed during subsequent exposures. The dogs

988
UMI

received a challenge intravenous dose of isopropanol of approximately one half (2.56 cm³) to three quarters (3.84 cm³) of the fatal dose at the end of the 6-month period. Thirty-six hours after this dose, one dog died with evidence of minor hemorrhaging, leucodiapedisis, and microglial involvement in the brain, and hydropic changes and tubular epithelial necrosis of the kidneys. The remaining dogs were sacrificed at this time, and showed only negligible pathological changes. EPA believes this study is inadequate due to unorthodox dosing schedule, the small number of dogs used, and the lack of controls.

Two Russian studies have also described the effects of subchronic exposure to isopropanol (Refs. 38 and 39). Baikov et al. (Ref. 38) exposed an unspecified strain of rats to 20, 2.5, and 0.6 mg/m³ isopropanol vapors continuously for 86 days. Statistically significant effects were observed only at the highest concentration. EPA believes that this study is inadequate to determine subchronic effects because the study suffered from a number of deficiencies including the lack of control animals, lack of details on experimental analysis, and use of obscure physiological measures. In the second study, Guseinov and Abasov (Ref. 39) exposed 10 male and 10 female "nonpurebred" white rats/group to 0, 0.1, or 0.5 mg/L (40 and 203 ppm) isopropanol vapors 5 days per week, 4 hours per day, for 4 months. Effects at the high concentration included increases in relative liver, spleen, and adrenal weight, vessel degeneration, changes in red and white cell counts, and a decrease in hippuric acid excretion and nonspecific cholinesterase activity. The significance of several of the observed effects is obscure, and other effects such as relative red and white cell counts in treated rats showed no consistent trend across months.

3. Chronic Toxicity

The Agency has reviewed the available studies and has found them insufficient to reasonably predict or determine the effect of long-term exposure to isopropanol. The only chronic toxicity data in animals are provided in a study by Boughton (Ref. 35) in which eight albino rats were exposed to 5 percent isopropanol in their drinking water for 304 days. There were no effects on mortality but rats developed forced breathing after several months of treatment. By 30 weeks the treated rats had a 23 percent decrease in weight gain relative to that of controls, and after 8.5 months all isopropanol-treated rats had a 16 percent increase in errors in 15 learning trials. The adequacy of the study is in question since only eight rats were treated. No other data have been found for chronic toxicity.

4. Oncogenicity

The Agency has reviewed all of the available studies on the oncogenicity of isopropanol and has found them insufficient to reasonably predict or determine the oncogenicity of isopropanol. None of the oncogenicity studies submitted to the Agency were conducted using currently accepted standard testing protocols.

Weil et al. (Ref. 40) conducted laboratory studies in six strains of mice on the tumorgenicity of isopropanol and byproducts associated with the strong-acid manufacturing process for isopropanol using different routes of exposure, but experimental details are lacking for assessment. In subcutaneous studies, mice were administered undiluted samples of 0.025 mL/animal for 20 to 40 weeks. However, the subcutaneous route of exposure is inappropriate for isopropanol, and the duration of the experiment was too short. In an inhalation study, mice were reportedly exposed to 0.0075 mg isopropanol/m³, 5 days per week, 3 to 7 hours per day, for 5 to 8 months. In a subsequent communication, however, Weil noted that the actual metered concentration of isopropanol was a millionfold higher (7,700 mg./m³) (Ref. 42). No increase in the incidence of tumors was observed in animals treated with isopropanol. However, an increase in the incidence of tumors was observed in the positive controls and in animals treated with some of the byproducts of the strong-acid process of isopropanol manufacture.

Van Esch (Ref. 43) administered an unspecified quantity of isopropanol to the diet of Swiss mice followed by biweekly applications of croton oil (a known tumor promoter) to the head. This treatment did not increase papilloma formation. Pyleva and Sakharov (Ref. 44) reported that application of isopropanol to the skin of CBA x C57BL mice had a "weak activating", but not a carcinogenic effect (not defined further). These studies were only available as abstracts. Other data were not reported in sufficient detail for evaluation.

Available animal data assessing oncogenicity are inadequate with regard to number of species used in the experiments, number of doses, inappropriate routes of exposure, and insufficiency of data reporting and duration of exposure, and thoroughness in reporting all test data.

5. Mutagenicity

The Agency has reviewed all of the available studies and has found them insufficient to reasonably predict or determine the genotoxicity of isopropanol. The only adequate study was one in which the NTP (Ref. 45) conducted a *Salmonella* reverse mutation assay (plate incorporation) with isopropanol. Isopropanol was tested at concentrations ranging from 100 to 10,000 ug/plate in the presence and absence of mammalian liver S9 fraction. Under the conditions of this assay, isopropanol produced no increase in the reversion frequency in *Salmonella* strains TA97, TA98, TA100, TA1535, or TA1537.

Brockman et al. (Ref. 46) reported that isopropanol had no effect on meiotic nondisjunction and subsequent aneuploidy in crossed strains of Neurospora crassa Only the maximum dose of isopropanol which was consistent with fertility was tested. This screening study is not adequate to address potential clastogenicity of isopropanol.

Isopropanol was assayed for its ability to cause transformation in Syrian hamster embryo cells infected with Simian SA7 virus (Ref. 47) and was found to be negative. At no concentration did isopropanol affect transformation rate; however, the control transformation rate was high and variable. Aristov et al. (Ref. 48) as reported in an abstract of a Russian study, showed that inhalation exposure to an unspecified concentration of isopropanol for 4 months resulted in a significantly increased number of aberrant metaphases in the bone marrow cells of albino rats. The no-effect level was 0.52 mg./m³. Full evaluation of this study is not possible due to the lack of details presented in the abstract.

EPA has therefore concluded that there is not sufficient information to reasonably determine or predict the genotoxic potential of isopropanol for gene mutations and chromosomal aberrations in mammalian systems.

6. Reproductive Effects and Developmental Toxicity

The Agency has reviewed all of the available reproductive effects and developmental toxicity studies for isopropanol and has found them insufficient to reasonably determine or predict the potential toxicity of isopropanol. Nelson et al. (Ref. 49) recently conducted a study of the developmental toxicity effects of isopropanol in female Sprague-Dawley

rats. Groups of 15 animals were exposed to 0 ppm, 3,500 ppm, 7,000 ppm, or 10,000 ppm isopropanol vapor 7 hours per day from days 1 to 19 of gestation. On gestation day 20, the dams were sacrificed, and the number of corpora lutea, resorptions, and live fetuses were recorded. The fetuses were removed and examined for external malformations. Half of the fetuses were analyzed for skeletal malformations, and the other half were examined for visceral malformations.

Administration of the two highest concentrations resulted in reversible maternal toxicity. Initial exposure to 10,000 ppm produced narcosis in dams, and treatment with 7,000 ppm was associated with an unsteady gait. Exposure to 10,000 ppm resulted in significant decrease in maternal body weight gain. Weight gain was slightly reduced in dams exposed to 7,000 ppm. Exposure to 3,500 ppm produced no maternal toxicity.

Effects of isopropanol exposure on developmental parameters included a dose-related decrease in fetal body weight, a reduced number of pregnancies (6/15 were not pregnant, reduced number of implantations), and an increased number of fetal resorptions (4/15 litters had total resorptions) in dams exposed to 10,000 ppm. There were significant increases in skeletal malformations among fetuses in the two higher dose groups. Fetal body weights were reduced in all treated groups. This study is inadequate due to the fact that initially there were only 15 rats per group and in the highest dose group (10,000 ppm) there were only 5 litters available for examination and evaluation.

Lehman et al. (Ref. 37) conducted a three-generation reproductive study. Six female and three male white rats were given free access to 2.5 percent isopropanol in drinking water for 80 days and then mated. This procedure was repeated for the subsequent 2 generations, but only 13 first generation and 10 second generation females were maintained in the experimental protocol. Compared to control rats, first (but not second) generation progeny had reversible delays in development. These were not further defined. Deficiencies in this study include the number of animals used and the lack of details regarding the assessment of developmental toxicity.

Additional data on isopropanol reproductive toxicity were obtained from a Russian study (Ref. 50). In the first series of experiments, isopropanol was administered (probably orally) to female rats for 20 days at doses of 252 or 1,006 mg/kg. Administration of either dose for 20 days during pregnancy resulted in decreased numbers of fetuses in treated females. Treatment with the higher dose was associated with embryolethality. Furthermore, 10 out of 70 fetuses in the high dose group had visceral anomalies in comparison with 0 out of 90 control fetuses. Treatment of non-pregnant females for 45 days with the same doses resulted in statistically significant increases in the length of the estrus cycle. In a second series of studies, isopropanol was administered at 1,800 mg/kg/day to white rats for 3 months prior to pregnancy. There was a significantly higher embryolethality rate among treated rats in comparison with controls. In the chronic portion of the study, male and female rats were administered 0.018, 0.18, 1.8, and 18 mg/kg isopropanol through the drinking water for 6 months. The timing of the exposure period in relation to the mating period was unspecified. Experimental and control male and female rats were cross-mated in a 2x2 factorial design. Offspring mortality was most prevalent in the groups containing experimental females.

When data were collapsed across mating condition, the rats administered 18 mg/kg isopropanol had a 35 percent decrease in weight gain, and the treated offspring had dose-related impairments in a behavioral turning task. This study is deficient due to the limited sample sizes (5 to 7 rats per experimental cell) and ambiguous measuring techniques.

Currently BIBRA is conducting a study at the request of the Government of the United Kingdom consisting of a single-generation reproductive study in the rat with dosages at 0.5 percent, 1.0 percent, and 2 percent isopropanol in drinking water. Ten males were exposed 70 days prior to mating and 20 females were exposed 21 days prior to mating, during mating, during pregnancy, and until sacrificed. Offspring were treated with isopropanol during rearing and until killed. The test protocols for reproductive effects indicated that only 10 females were dosed. In addition, the protocol is for a one-generation study. EPA believes a two-generation study is necessary to sufficiently address the potential reproductive effects of a chemical.

A single-species teratology study in the rat with dosages at 0.5 percent, 1.5 percent and 2.5 percent isopropanol in drinking water is also being conducted at the request of the Government of the United Kingdom. EPA has reviewed the protocol for developmental toxicity in the rat and has determined that it is incomplete. The adequacy of this study will be assessed after receipt of the data.

The TSCA test guideline (40 CFR 798.4900(e)(1)(i)) stipulates that at least two mammalian species be used for testing in order to completely assess the potential developmental toxicity of a chemical. If the study conducted for the Government of the UK is regarded as adequate, then only a single-species developmental toxicity study will be required. If the study is inadequate, then developmental toxicity studies in two mammalian species will be required.

7. Neurotoxicity

The Agency has reviewed all of the available studies and has found them insufficient to reasonably predict or determine the neurotoxicity of isopropanol. The experimental evidence accumulated to date is very limited and some of the data are based upon results of tests performed using isopropanol in combination with other alcohols.

Maizlish et al. (Ref. 51) looked at 240 workers exposed to mixtures of organic solvents over a 7-year period of isopropanol exposure and determined that there was no deleterious effect on six behavioral parameters. The workers included a subset at one plant in which isopropanol was found to be 161 percent of TLV (644 ppm). The significance of the findings with regard to isopropanol is difficult to assess since it was only one component in the solvent mixtures studied.

In a laboratory study, Wallgren (Ref. 52) administered 0.043 mole/kg (2.6 g/kg) isopropanol to groups of 3- to 4-month-old rats and monitored performance on an inclined plane task. After a baseline measure, the investigators administered the alcohol and conducted six tests at 20-minute intervals. Isopropanol treatment reduced the angle at which the rats could maintain themselves to 67.7 percent of baseline values. There was no appreciable recovery 2 hours after treatment.

Leander et al. (Ref. 53) assessed schedule-controlled behavior in three male pigeons after oral administration of 5 percent isopropanol directly into the proventriculus (glandular stomach) twice weekly. Responses were reduced with increasing doses. Other related data as to response rates with varied electric shocks are inadequate due to the small number of animals and the use of isopropanol in combination with ethanol.

Boughton (Ref. 35) administered 5 percent isoproprenol to male rats in their drinking water for 304 days and found no subjective behavioral signs. After 8.5 months, rats given isopropanol had a 16 percent increase in errors in

VOL 53
ISS 51
MR 16
1988
UMI

their performance in elevated T-mazes for 15 learning trials and had increased running times. Maze performance returned to normal 1 month after treatment ended.

8. Epidemiology

Several studies pertaining to worker exposures to isopropanol have been reviewed. These studies involve workers in the manufacture of isopropanol by the "strong-acid" process. Currently the method of production being used is a closed-system weak-acid process in which propylene is reacted with sulfuric acid and the isopropyl esters are further hydrolyzed to isopropanol. To date, no epidemiology studies have been submitted to the Agency on workers involved in the manufacture of isopropanol using only the newer weak-acid process.

Weil (Ref. 40) investigated the incidence of cancers in workers involved in isopropanol manufacture. Of the various substances to which the workers may have been exposed, only propylene, isopropyl ether, sulfur dioxide, and isopropanol were sufficiently volatile to be inhaled in large quantities. Although an increase in sinus tumors was observed, NIOSH (Ref. 42) concluded that the increase could not be associated with a specific compound and that the entire manufacturing process should be regulated as a "cancer hazard process" Eckardt (Ref. 54) reported that, after appropriate industrial hygiene controls and the weak-acid process were initiated, no cancers were found for a period of more than 20 years. Similar results were obtained in a second plant after conversion to the closed-system weak-acid process. NIOSH (Ref. 55) has since reaffirmed that a carcinogen appeared to have been present in the strong-acid process. Evidence was provided by Wright (Ref. 56) that this carcinogen was likely to have been diisopropyl sulfate.

As reviewed in IARC (1977) (Ref. 13), enhanced incidence of respiratory tract cancer has been reported in two plants manufacturing isopropanol by the strong-acid process. In one plant in which isopropyl oils were formed as byproducts, 7 neoplasms were found among 71 men who had worked for more than 5 years between 1928 and 1950. A conservative estimate is that the incidence of paranasal sinus cancer in this group of workers is more than 3 times that expected in the general population. In another isopropyl alcohol manufacturing factory, in operation in the United States since 1927, two sinus cancers and two intrinsic laryngeal cancers occurred among a total of 11 cancers in 779 employees. All cancer cases occurred in subjects who had worked in the factory for more than 9 years. The incidence of sinus and laryngeal cancers in this group was reported to be 21 times that expected in the general population aged 45 to 54 years.

Additional occupational studies at Shell Oil Refineries in Texas and England (Refs. 57 through 60) were conducted to further assess the impact of the isopropanol production process on worker mortality, with particular emphasis on excess cancer deaths. The group consisted of 124 employees who worked in the isopropanol production unit (strong-acid process) and were transferred subsequently to the epichlorohydrin production area. Analysis of the mortality incidence among 433 isopropanol production workers, who worked in the unit for at least one quarter, showed two deaths from buccal and pharyngeal cancer. The two cases of buccal and pharyngeal cancers were diagnosed in the workers who were subsequently exposed to epichlorohydrin, but 4 out of 7 of the respiratory cancer deaths were in individuals exposed to both production processes. The mixed exposure, the lack of concurrent control data (workers exposed to neither production process), the short followup times, and the low incidence of tumor-related deaths make interpretation of the results difficult.

Alderson and Rattan (Ref. 61) conducted an epidemiological study of workers at a plant that manufactured isopropanol by the strong-acid process. Nine neoplasms were found among 262 men who had worked for more than 1 year between 1950 and 1975. Neoplasms were found at the following sites: 1 in nose and nasal sinus, 1 in esophagus, 2 in lung and pleura, 2 in kidneys and adrenals, and 2 in brain and central nervous system (CNS). Only the single case of nose and sinus cancer was deemed to be of statistical significance. These studies were performed on workers in a manufacturing process that is no longer in use and its relevance to the current process is unknown. To date, no epidemiological studies have been submitted to the Agency for workers employed in the weak-acid process of manufacture of isopropanol.

9. Metabolism and Pharmacokinetics

The Agency has reviewed all of the available studies and has found them insufficient to reasonably predict or determine the metabolism and pharmacokinetics of isopropanol (Ref. 62).

The studies reviewed encompass absorption, tissue distribution, biotransformation, and elimination data mainly in rats, dogs, rabbits, and humans. No data are available for the mouse. The data provide evidence that isopropanol is readily absorbed by the oral, inhalation, and dermal routes of exposure, and that the major metabolic pathway is transformation to acetone by alcohol dehydrogenase (ADH). Elimination of both parent compound and the major metabolite occurs predominantly through the lungs and in the urine.

The studies appear to provide sufficient data to qualitatively assess the biotransformation of isopropanol. However, none of the studies reviewed provide sufficient quantitative data to assess percent absorption, mechanism of elimination, or a materials balance for the relevant species by the oral or inhalation routes of exposure. The Agency is unable to use these data to extrapolate toxic effects from lower species to human, from high to low doses, or from route to route (Ref. 67). Such data are needed to fully assess the metabolism and pharmacokinetics of isopropanol.

III. Findings

Under TSCA section 4(a)(1)(B), EPA finds that isopropanol is produced in substantial quantities and that there is or may be substantial human exposure from its manufacture, processing, disposal, and use.

Approximately 1 billion lb of isopropanol has been produced yearly since 1956 (Ref. 7).

There is substantial human exposure to isopropanol in the workplace. The National Occupational Hazard Survey (NOHS) conducted by the National Institute for Occupational Safety and Health (NIOSH) from 1972 to 1974 estimated that there were 6,889,594 exposures in 357,173 plants, potentially exposing 5,483,862 people to isopropanol in the workplace in 1970. The National Occupational Exposure Survey (NOES) estimates that 1,857,972 workers, 60 percent of whom were female, were potentially exposed to isopropanol in the workplace in 1980.

Isopropanol is used as a solvent and is a component of numerous industrial products, consumer products, and commercial sprays. The above uses may result in widespread exposure to workers and consumers. The Agency believes that exposures associated with the manufacture, processing, disposal, and use of isopropanol and its products provide a sufficient basis for a finding of substantial human exposure under TSCA section 4(a)(1)(B) for isopropanol.

On the basis of findings given in Unit II of this document, EPA finds that existing data are insufficient to reasonably determine or predict the subchronic, chronic, oncogenic, genotoxic, reproductive, developmental, and neurotoxic effects of human exposure to isopropanol resulting from its manufacture, processing, disposal, and use and that testing is necessary to develop such data. EPA also finds that there are insufficient data to reasonably predict and compare the absorption, distribution, metabolism, and excretion of isopropanol in the body as a result of oral or inhalation exposure due to isopropanol's manufacture, processing, and use, and that an oral-inhalation comparative pharmacokinetic study of isopropanol is necessary to develop such data. EPA believes that the data generated from this testing will be relevant to a determination as to whether the manufacture, processing, disposal, and use of isopropanol does or does not present an unreasonable risk of injury to human health.

IV. Proposed Rule

A. Proposed Testing and Test Standards

The Agency is proposing that testing be conducted in accordance with specific test guidelines set forth in 40 CFR Parts 795 and 798. All persons conducting tests would conduct tests in accordance with the TSCA Good Laboratory Practice (GLP) Standards (40 CFR 792).

On the basis of the findings presented in Unit III, the Agency is proposing that isopropanol be tested under TSCA section 4(a)(1)(B) for: (1) Subchronic inhalation toxicity, 40 CFR 798.2450; (2) oncogenicity by inhalation, 40 CFR 798.3300; (3) reproductive toxicity by gavage, 40 CFR 798.4700; (4) developmental toxicity by gavage, 40 CFR 798.4900; (5) neurotoxicity by inhalation, 40 CFR 798.6050, 798.6200, and 798.6400; (6) developmental neurotoxicity by gavage, 40 CFR 795.250; (7) genotoxicity, 40 CFR 798.5300, 798.5275, 798.5200, 798.5375, 798.5385, 798.5450, and 798.5460; and (8) pharmacokinetics, 40 CFR 795.231.

To assess the degree of toxicological activity of isopropanol upon various target organs, the Agency is proposing that isopropanol be tested for subchronic toxicity by inhalation, 40 CFR 798.2450. To assess the neurotoxic effects of repeated inhalation exposures to isopropanol, the Agency is proposing a subchronic neurobehavioral toxicity evaluation consisting of a neuropathologic evaluation of tissues perfused *in situ*, 40 CFR 798.6400, a functional observation battery, 40 CFR 798.6050, and measurement of motor activity, 40 CFR 798.6200. This proposed battery of neurotoxic evaluation may be combined with the subchronic test 40 CFR 798.2450. To assess the effects of acute neurotoxic inhalation exposures to isopropanol, the Agency is proposing an acute neurobehavioral toxicity evaluation consisting of a functional observations battery, 40 CFR 798.6050, and measurement of motor activity, 40 CFR 798.6200.

To fully assess the developmental neurotoxicity potential of isopropanol the Agency is proposing a developmental neurotoxicity evaluation, 40 CFR 795.250, based upon the TSCA section 4(a)(1)(B) finding. In addition, the Agency is concerned because other simple short-chain alcohols have shown developmental neurotoxic effects. Data on ethanol indicate that it is not only a known developmental toxicant but that it is also a developmental neurotoxicant (Ref. 49). Furthermore, *t*-butanol has been shown to produce developmental neurotoxic effects in animal species (Ref. 49).

Due to substantial exposure to isopropanol and a lack of data regarding potential chronic toxicity or oncogenic effects, the Agency believes that the oncogenicity part of the test program is justified without waiting for results of gene mutation tests. The Agency is thus proposing a 2-year inhalation bioassay in two species, 40 CFR 798.3300. EPA has often used a tiered approach to oncogenicity testing when making exposure findings under section 4(a)(1)(B). EPA and others have found shorter term tests, i.e. subchronic tests and mutagenicity screening tests, very useful for determining the priority of oncogenicity testing needs. However, EPA believes that in the case of isopropanol with its potential for substantial worker and consumer exposure, a 2-year bioassay is necessary to give the Agency the degree of assurance required for regulatory decision-making.

The Agency is proposing testing for reproductive effects, 40 CFR 798.4700, and developmental toxicity, 40 CFR 798.4900, because of the widespread human exposure and lack of data to reasonably predict these effects. EPA is proposing that these two tests be done by gavage.

To assess the potential for isopropanol to cause gene mutations, the Agency is proposing that testing be conducted for gene mutations in cells in culture, 40 CFR 798.5300. If the results of the cells in culture test are positive, a *Drosophila* sex-linked recessive lethal assay (SLRL) would be conducted using the method, 40 CFR 798.5275. A positive result in the SLRL assay would trigger a mouse specific locus test, 40 CFR 798.5200. If the cells in culture test is negative, no further testing would be required. If the SLRL assay is negative, the mouse specific locus test would not be required.

To assess the potential for isopropanol to cause chromosomal aberrations, the Agency is proposing that an *in vitro* cytogenetic assay be conducted on isopropanol, 40 CFR 798.5375. If the results of the *in vitro* test are positive, a dominant-lethal assay would be required, 40 CFR 798.5450. A positive result in the dominant-lethal assay would trigger a heritable translocation assay, 40 CFR 798.5460. If the *in vitro* cytogenetics assay is negative, the *in vivo* bone marrow assay, 40 CFR 798.5385, would be required. Should the *in vivo* bone marrow test results prove negative, no further chromosomal aberrations testing would be required. A positive result in the in *vivo* bone marrow test would trigger the dominant-lethal assay 40 CFR 798.5450. Again, if the dominant-lethal test is positive, a heritable translocation assay, 40 CFR 798.5460 would be conducted.

If the results from the dominant-lethal assay and/or the SLRL are positive, EPA would hold a public program review prior to requiring initiation of the heritable translocation and/or mouse specific locus testing. Public participation in this program review would be in the form of written public comments or a public meeting. Request for public comments or notification of a public meeting would be published in the **Federal Register**. Should the Agency determine, based on the weight of the evidence then available, that proceeding to the heritable translocation test and/or mouse specific locus assay is no longer warranted, the Agency would propose to repeal that test requirement and, after public comment, would issue a final amendment to rescind the requirement.

For a more detailed discussion concerning mutagenicity tiered testing and program review, see the final test rule for the C_9 aromatic hydrocarbon fraction (50 FR 20662; May 17, 1985).

EPA is proposing a tiered testing approach to evaluate whether isopropanol elicits heritable gene mutations. Positive results in SLRL would trigger the requirement for conducting a mouse visible specific locus (MVSL) test. EPA believes that the MVSL is necessary, when these lower-tier tests are positive, to establish

BEST COPY AVAILABLE

definitively whether a substance is capable of eliciting heritable gene mutations. Under the approach proposed, EPA would consider the positive results in the lower-tier tests in a public program review, together with other relevant information, during which interested persons would be able to give their views to the Agency. If, after the review, EPA determined that the MVSL was still appropriate, EPA would notify the test sponsors by letter or **Federal Register** notice that they must conduct the test. If EPA determined that the test was no longer necessary, EPA would propose to amend the rule to delete the test requirement.

Other test rules have included the requirement for the MVSL, including those for the C_9 aromatic hydrocarbon fraction (50 FR 20662), diethylenetriamine (50 FR 21398), and four fluoroalkenes (52 FR 21516). EPA based the requirement in those rules, in part, on information and assumptions about the cost of conducting the test and the availability of laboratories capable of performing the test. The information and assumptions have since proven to be incorrect. Accordingly, EPA is in the process of reexamining the MVSL requirement for all those chemical substances for which the MVSL has been required or proposed to be required. In particular EPA is reviewing whether any laboratories are available to perform the MVSL for industry in accordance with the TSCA Good Laboratory Practice Standards at 40 CFR Part 792 and the cost of such testing. EPA is also reviewing possible alternative tests to the MVSL for which costs may be lower or laboratory availability may be more certain.

Once EPA completes its evaluation of this additional information, EPA will publish a notice in the **Federal Register** concerning the MVSL for isopropanol and other substances subject to proposed and final TSCA section 4 test rules. This notice will provide up-to-date information on the cost of MVSL testing, availability of laboratories to perform the MVSL, and possible alternative tests to the MVSL together with their costs and laboratory availability. The notice will also address EPA's intentions about any changes to the MVSL requirements in the various test rules and will provide an opportunity for public comment. If, after this exercise, EPA concludes that the MVSL is appropriate for isopropanol, EPA will include the MVSL requirements with any appropriate modifications in the final rule.

To fully assess the potential toxicity of isopropanol for quantitative risk assessment purposes, the Agency is proposing metabolism and pharmacokinetics testing by the oral and inhalation routes of exposure. The Agency believes this testing of isopropanol is necessary to reduce uncertainties associated with the extrapolation of test data from high to low doses, from species to species, and from one route of exposure to another. Pharmacokinetic data in rats are being proposed to determine comparative, dose-dependent, oral and inhalation absorption, tissue distribution, bioaccumulation, metabolism, and excretion data. These data are needed for extrapolation purposes. The necessary extrapolations can only be made on the basis of metabolism and pharmacokinetics data obtained from studies performed by both routes of isopropanol administration. Repeated dose studies are needed in order to learn whether multiple exposures modify the metabolism and/or pharmacokinetics of isopropanol.

Although there is some human and rat data provided, these data are not adequate to support the required extrapolations. The Agency is proposing that pharmacokinetics studies be conducted for isopropanol as described in proposed 40 CFR 795.231.

The Agency is proposing that the TSCA health effects test guidelines be employed as the test standards for the purpose of the proposed tests for isopropanol. The TSCA test guidelines for health effects testing specify generally accepted minimum conditions for determining the health effects for substances like isopropanol to which humans are expected to be exposed. The Agency's review of the TSCA Test Guidelines, which occurs on a yearly basis according to the process described at 47 FR 41857 (September 2, 1982), has found no reason to conclude that these guidelines need to be modified significantly.

B. Test Substance

EPA is proposing that isopropanol (CAS No. 67–63–0) of at least 99.9 percent purity be used as the test substance. EPA has specified a relatively pure substance for testing because the Agency is interested in evaluating the effects attributable to isopropanol itself. EPA believes that this grade of isopropanol is readily available for testing purposes.

C. Persons Required to Test

Section 4(b)(3)(B) specifies that the activities for which the Agency makes section 4(a) findings (manufacture, processing, distribution in commerce, use, and/or disposal) determine who bears the responsibility for testing. Manufacturers are required to test if the findings are based on manufacturing ("manufacture" is defined in section 3(7) of TSCA to include "import"). Processors are required to test if the findings are based on processing ("process" is defined in section 3(10) of TSCA as the preparation of a chemical substance or mixture, after its manufacture, for distribution in commerce). Both manufacturers and processors are required to test if the exposures giving rise to the potential risk occur during use, distribution, or disposal.

Because EPA has found that there are insufficient data and experience to reasonably determine or predict the effects on human health of the manufacture, processing, disposal, and use of isopropanol, EPA is proposing that persons who manufacture and/or process, or who intend to manufacture and/or process isopropanol, other than as an impurity, at any time from the effective date of the final test rule to the end of the reimbursement period be subject to the testing requirements in this proposed rule. While EPA has not identified any byproduct manufacturers of isopropanol, such persons would be covered by the requirements of this test rule. The end of the reimbursement period will be 5 years after the last final report is submitted or an amount of time equal to that which was required to develop data, if more than 5 years, after the submission of the last final report required under the test rule.

Because TSCA contains provisions to avoid duplicative testing, not every person subject to this proposed rule would individually conduct testing. Section 4(b)(3)(A) of TSCA provides that EPA may permit two or more manufacturers or processors who are subject to a rule to designate one such person or a qualified third person to conduct the tests and submit data on their behalf. Section 4(c) provides that any person required to test may apply to EPA for an exemption from the requirement. The Agency anticipates that the current manufacturers of isopropanol would form the reimbursement pool and sponsor the required testing. EPA promulgated procedures for applying for TSCA section 4(c) exemptions in 40 CFR Part 790, Subpart E.

Manufacturers, including importers, subject to this rule would be required to submit either a letter of intent to perform testing or an exemption application within 30 days after the effective date of the final test rule. The required procedures for submitting such

letters and applications are described in 40 CFR Part 790.

Processors subject to this rule, unless they are also manufacturers, would not be required to submit letters of intent or exemption applications, or to conduct testing, unless manufacturers fail to submit notices of intent to test or later fail to sponsor the required tests. The Agency expects that the manufacturers would pass an appropriate portion of the costs of testing on to processors through the pricing of their products or reimbursement mechanisms. If manufacturers fail to submit notices of intent to test or fail to sponsor all the required tests, the Agency would publish a separate notice in the **Federal Register** to notify processors to respond; this procedure is described in 40 CFR Part 790.

EPA is not proposing to require the submission of equivalence data as a condition for exemption from the proposed testing for isopropanol.

Manufacturers and processors who are subject to the final test rule would comply with the test rule development and exemption procedures in 40 CFR Part 790 for single-phase rulemaking.

D. Reporting Requirements

As required in 40 CFR 799.10, all data developed under the final rule would be reported in accordance with its TSCA Good Laboratory Practice (GLP) Standards which appear in 40 CFR Part 792.

In accordance with 40 CFR Part 790 under single-phase rulemaking procedures, test sponsors would be required to submit individual study plans at least 45 days prior to the initiation of each study.

EPA is required by TSCA section 4(b)(1)(C) to specify the time period during which persons subject to a test rule must submit test data. The Agency is proposing specific reporting requirements for each of the proposed tests for isopropanol in the following Table 2.

TABLE 2.—PROPOSED TESTING, TEST STANDARDS, AND REPORTING REQUIREMENTS FOR ISOPROPANOL

Test	Test standard (40 CFR citation)	Reporting deadline for final report[1]	Interim (6-month) reports required
Subchronic Toxicity:			
1. Subchronic inhalation toxicity	§ 798.2450	15	2
Chronic Toxicity:			
2. Oncogenicity	§ 798.3300	53	8
Specific Organ/Tissue Toxicity:			
3. Reproduction and fertility effects	§ 798.4700	24	4
4. Developmental toxicity	§ 798.4900	12	1
Gene Toxicity-Gene Mutations:			
5. Mammalian cells in culture	§ 798.5300	6	
6. *Drosophila* sex-linked recessive lethal	§ 798.5275	18	2
7. Mouse specific locus	§ 798.5200	[2] 48	7
Chromosomal Aberrations:			
8. *In vitro* cytogenetics	§ 798.5375	15	2
9. *In vivo* cytogenetics	§ 798.5385	15	2
10. Dominant lethal assay	§ 798.5450	24	3
11. Heritable translocation assay	§ 798.5460	[2] 24	3
Acute Neurotoxicity:			
12. Functional observation battery	§ 798.6050	15	2
13. Motor activity	§ 798.6200	15	2
Subchronic Neurotoxicity:			
14. Functional observation battery	§ 798.6050	15	2
15. Motor activity	§ 798.6200	15	2
16. Neuropathology	§ 798.6400	15	2
17. Developmental neurotoxicity screen	§ 795.250	15	2
Pharmacokinetics:			
18. Pharmacokinetics (oral and inhalation)	§ 795.231	15	2

[1] Number of months after the effective date of the final rule, except as indicated.

[2] Figure indicates the reporting deadline, in months, calculated from the date of notification of the test sponsor by certified letter or FEDERAL REGISTER notice that, following public program review of all of the then existing data for isopropanol, the Agency has determiend that the required testing must be performed.

TSCA section 14(b) governs Agency disclosure of all test data submitted pursuant to section 4 of TSCA. Upon receipt of data required by the final rule, the Agency would publish a notice of receipt in the **Federal Register** as required by section 4(d).

Persons who export a chemical substance or mixture which is subject to a final section 4 test rule are subject to the export reporting requirements of section 12(b) of TSCA. Final regulations interpreting the requirements of section 12(b) are in 40 CFR Part 707. In brief, as of the effective date of the final test rule, an exporter of isopropanol would report to EPA the first export or intended export of isopropanol to a particular country in a calendar year. EPA would notify the foreign country concerning the test rule for the chemical.

V. Issues for Comment

1. This proposed rule specifies TSCA test guidelines as the test standards for health effects testing of isopropanol. The Agency is soliciting comments as to whether these test guidelines are appropriate and applicable for the testing of isopropanol.

2. Also regarding the testing of isopropanol, the Agency requests comment on:

a. The adequacy of the proposed testing to characterize the health effects of isopropanol.

b. The reporting requirements for the specified health effects tests.

c. Any alternative approaches that should be considered.

3. The Agency requests comment on the route of exposure for the testing program. The Agency is proposing that most of the proposed tests be conducted by inhalation because it is the most relevant route for human exposure to isopropanol under TSCA. The reproductive effects test, developmental toxicity, and developmental neurotoxicity tests, however, are being

VOL 53 ISS 51 MR 16 1988 UMI

proposed by gavage due to the technical difficulties in performing these tests by inhalation for isopropanol.

4. The Agency is proposing pharmacokinetics testing in the rat to determine comparative dose-dependent oral and inhalation absorption, tissue distribution, bioaccumulation, metabolism, and excretion data. The Agency believes that these data are useful for dose selection and for high to low dose extrapolations, route to route extrapolations, and animal species to human extrapolations.

The Agency requests comment on:

a. Selection of the rat for the pharmacokinetic studies

b. Need for pharamacokinetic data in the mouse for bioassay dose-selection and for risk assessment.

c. Need for and time-course of the elements required in the pharamacokinetic standard. Specifically, should absorption, distribution, and excretion data be completed prior to the subchronic studies? Should the metabolic fate studies run concurrently, or sequentially after the results of the subchronic toxicity studies are completed?

VI. Economic Analysis of the Proposed Rule

To assess the potential economic impact of this rule, EPA has prepared an economic analysis that evaluates the potential for significant economic impacts on the industry as a result of the required testing. The economic analysis estimates the costs of conducting the required testing and evaluates the potential for significant adverse economic impact as a result of these test costs by examining four market characteristics of isopropanol: (1) Price sensitivity of demand; (2) market expectations; (3) industry cost characteristics; and (4) industry structure. If these indications are negative, no further economic analysis is performed. However, if the first level of analysis indicates a potential for significant economic impact a more comprehensive and detailed analysis is conducted which more precisely examines the magnitude and distribution of the expected impact.

Total testing costs for the proposed testing of isopropanol are estimated to range from $2.7 to $3.8 million. In order to predict the financial decision-making practices of manufacturing firms, these costs have been annualized. Annualized costs are compared with annual revenue as an indication of potential impact. The annualized costs represent equivalent constant costs which would have to be recouped each year of the payback period in order to finance the testing expenditure in the first year.

The annualized test costs, using a 7 percent cost of capital over a period of 15 years, range from $291,000 to $414,000. Based on 1986 production of 1.3 billion lb, the unit test costs range from $0.00022 to $0.00032 per pound. These costs are equivalent to 0.097 to 0.139 percent of the current price of $0.23 per pound.

EPA believes that the potential for adverse economic impact resulting from the costs of testing is low. This conclusion is based on the following observations:

1. The annualized cost of testing is very low, at approximately 0.14 percent of product prices in the upper bound case.

2. Demand for isopropanol does not appear to be sensitive to a price increase in this range.

Refer to the economic analysis which is contained in the public record for this rule making for a complete discussion of test cost estimation and potential for economic impact resulting from these costs (Ref. 12).

VII. Availability of Test Facilities and Personnel

Section 4(b)(1) of TSCA requires EPA to consider "* * * the reasonably foreseeable availability of the facilities and personnel needed to perform the testing required under the rule." Therefore, EPA conducted a study to assess the availability of test facilities and personnel to handle the additional demand for testing services created by section 4 test rules. Copies of the study, Chemical Testing Industry: Profile of Toxicological Testing, can be obtained through the National Technical Information Service (NTIS), 5285 Port Royal Road, Springfield, VA 22161 (PB 82–140773). On the basis of this study, the Agency believes that there will be available test facilities and personnel to perform the testing specified in this proposed rule.

EPA has reviewed the availability of contract laboratory facilities to conduct the neurotoxicity testing requirements (Ref. 65) and believes that facilities will be made available for conducting these tests. The laboratory review indicates that few laboratories are currently conducting these tests according to TSCA test guidelines and TSCA GLP standards. However, the barriers faced by testing laboratories to gear up for conducting these tests are not formidable. Laboratories will need to invest in testing equipment and personnel training, but EPA believes that these investments will be recovered as the neurotoxicity testing program under TSCA section 4 continues. EPA's expectations of laboratory availability were borne out under the testing requirements of the C_9 aromatic hydrocarbon fraction test rule (50 FR 20675; May 17, 1985). Pursuant to that rule, the manufacturers were able to contract with a laboratory to conduct the testing according to TSCA test guidelines and TSCA GLP standards.

VIII. Public Meetings

If persons indicate to EPA that they wish to present oral comments on this proposed rule to EPA officials who are directly responsible for developing the rule and supporting analyses, EPA will hold a public meeting after the close of the public comment period of Washington, DC. Persons who wish to attend or to present comments at the meeting should call the TSCA Assistance Office (TAO): (202) 554–1404 by May 2, 1988. No meeting will be held unless members of the public indicate that they wish to make oral presentations. While the meeting will be open to the public, active participation will be limited to those persons who arranged to present comments and to designated EPA participants. Attendees should call the TAO before making travel plans to verify whether a meeting will be held.

Should a meeting be held, the Agency will transcribe the meeting and include the written transcript in the public record. Participants are invited, but not required, to submit copies of their statements prior to or on the day of the meeting. All such written materials will become part of EPA's record for this rulemaking.

IX. Rulemaking Record

EPA has established a record for this rulemaking (docket number OPTS–42097). This record contains the basic information considered by the Agency in developing this proposal and appropriate **Federal Register** notices. The Agency will supplement this record with additional relevant information.

This record includes the following information:

A. Supporting Documentation

(1) **Federal Register** notices pertaining to this rule consisting of:

(a) Notice containing the ITC designation of isopropanol to the Priority List (51 FR 41417; November 14, 1986) and all comments on isopropanol received in response to that notice.

(b) Rules requiring TSCA sections 8 (a) and (d) reporting on isopropanol (51 FR 41320; November 14, 1986).

(c) Notice of final rule on EPA's TSCA Good Laboratory Practice Standards (48 FR 53922; November 29, 1983).

(d) Notice of interim final rule on single-phase test rule development and exemption procedures (50 FR 20652; May 17, 1985).

(e) Notice of final rule on data reimbursement policy and procedures (48 FR 31786; July 11, 1983).

(f) Interim Final Rule: Procedures Governing Testing Consent Agreements and Test Rules Under the Toxic Substances Control Act (51 FR 23706, June 30, 1986).

(2) Support documents consisting of:

(a) Technical support document for proposed rule.

(b) Economic impact analysis of proposed rule for isopropanol.

(3) TSCA test guidelines cited as test standards for this rule.

(4) Communications before proposal consisting of:

(a) Written public comments and letters.

(b) Contact reports of telephone conversations.

(c) Meeting summaries.

(5) Reports—published and unpublished factual materials including Chemical Testing Industry: Profile of Toxicological Testing (October, 1981).

X. Other Regulatory Requirements

A. Executive Order 12291

Under Executive Order 12291, EPA must judge whether a rule is "major" and therefore subject to the requirement of a Regulatory Impact Analysis. EPA has determined that this proposed test rule would not be major because it does not meet any of the criteria set forth in section 1(b) of the Order; i.e., it would not have an annual effect on the economy of at least $100 million, would not cause a major increase in prices, and would not have a significant adverse effect on competition or the ability of U.S. enterprises to compete with foreign enterprises.

This proposed rule was submitted to the Office of Management and Budget (OMB) for review as required by Executive Order 12291. Any written comments from OMB to EPA, and any EPA response to those comments, are included in the rulemaking record.

B. Regulatory Flexibility Act

Under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*, Pub. L. 96–354, September 19, 1980), EPA is certifying that this test rule, if promulgated, would not have a significant impact on a substantial number of small businesses because: (1) They would not be expected to perform testing themselves, or to participate in the organization of the testing effort; (2) they would experience only very minor costs, if any, in securing exemption from testing requirements; and (3) they are unlikely to be affected by reimbursement requirements.

C. Paperwork Reduction Act

The information collection requirements contained in this proposed rule have been approved under the provisions of the Paperwork Reduction Act of 1980, 44 U.S.C. 3501 *et seq.*, and have been assigned OMB number 2070–0033. Comments on these requirements should be submitted to the Office of Information and Regulatory Affairs of OMB marked "Attention Desk Officer for EPA." The final rule will respond to any OMB or public comments of the information collection requirements.

List of Subjects in 40 CFR Parts 795 and 799

Chemicals, Environmental protection, Hazardous substances, Testing Laboratories, Provisional testing, Recordkeeping and reporting requirement.

Dated: March 9, 1988.

J.A. Moore,

Assistant Administrator for Pesticides and Toxic Substances.

Therefore, it is proposed that 40 CFR Ch. I be amended as follows:

PART 795—[AMENDED]

1. In Part 795:

A. The authority citation for Part 795 continues to read as follows:

Authority: 15 U.S.C. 2603.

b. By adding § 795.231 to read as follows:

§ 795.231 Pharmacokinetics of isopropanol.

(a) *Purpose.* The purpose of these studies is to:

(1) Ascertain whether the pharmacokinetics and metabolism of isopropanol ("test substance") are similar after oral and inhalation administration.

(2) Determine bioavailability of the test substance after oral, dermal, and inhalation administration.

(3) Examine the effects of repeated dosing on the pharmacokinetics and metabolism of the test substance.

(b) *Definitions.* (1) "Bioavailability" refers to the rate and relative amount of administered test substance which reaches the systemic circulation.

(2) "Metabolism" means the study of the sum of the processes by which a particular substance is handled in the body, and includes absorption, tissue distribution, biotransformation, and excretion.

(3) "Percent absorption" means as 100 times the ratio between total excretion of radioactivity following oral or inhalation administration and total excretion of radioactivity following intravenous administration of test substance.

(4) "Pharmacokinetics" means the study of the rates of absorption, tissue distribution, biotransformation, and excretion.

(c) *Test procedures*—(1) *Animal selection*—(i) *Species.* The rat shall be used for pharmacokinetics testing because it has been used extensively for metabolic and toxicological studies.

(ii) *Test animals.* For pharmacokinetics testing, adult male and female rats (Fisher 344 or strain used for major toxicity testing), 7 to 9 weeks of age, shall be used. The animals should be purchased from a reputable dealer and shall be identified upon arrival at the testing laboratory. The animals shall be selected at random for the testing groups and any animal showing signs of ill health shall not be used. In all studies, unless otherwise specified, each test group shall contain at least 4 animals of each sex for a total of at least 8 animals.

(iii) *Animal care.*—(A) Animal care and housing should be in accordance with DHEW Publication No. (NIH)–78–23, 1978, entitled "Guidelines for the Care and Use of Laboratory Animals."

(B) The animals should be housed in environmentally controlled rooms with at least 10 air changes per hour. The rooms shall be maintained at a temperature of 24±2 °C and humidity of 50±10 percent with a 12-hour light/dark cycle per day. The animals shall be kept in a quarantine facility for at least 7 days prior to use and shall be acclimated to the experimental environment for a mimimum of 48 hours prior to treatment.

(C) During the acclimatization period, the animals should be housed in suitable cages. All animals shall be provided with certified feed and tap water *ad libitum.*

(2) *Administration of test substances*—(i) *Test substance.* The use of radioactive test substance is required for all studies. Ideally, the purity of both radioactive and nonradioactive test substance should be greater than 99 percent. The radioactive and nonradioactive substances shall be chromatographed separately and together to establish purity and identity. If the purity is less than 99 percent or if the chromatograms differ significantly, EPA should be consulted.

(ii) *Dosage and treatment*—(A) *Intravenous.* The low dose of test substance, in an appropriate vehicle, shall be administered intraveneously to four rats of each sex.

(B) *Oral.* Two doses of test substance shall be used in the oral portion of the study, a low dose and a high dose. The high dose should ideally induce some overt toxicity, such as weight loss. The low dose level should correspond to a no observed effect level. The oral dosing shall be accomplished by gavage or by administering the encapsulated test substance. If feasible, the same high and low doses should be used for oral and dermal studies.

(c) *Inhalation.*—Two concentrations of the test substance shall be used in this portion of the study, a low concentration and a high concentration. The high concentration should ideally induce some overt toxicity, while the low concentration should correspond to a no observed level. Inhalation treatment should be conducted using a "nose-cone" or "head only" apparatus to prevent ingestion of the test substance through "grooming".

(iii) *Dosing and sampling schedule.* After administration of the test substance, each rat shall be placed in a separate metabolic unit to facilitate collection of excreta. For the inhalation studies, excreta from the rats shall also be collected during the exposure periods. At the end of each collection period, the metabolic cages shall be cleaned to recover any excreta that might adhere to the cages. All studies, except the repeated dose study, shall be terminated at 7 days, or after at least 90 percent of the radioactivity has been recovered in the excreta, whichever occurs first.

(A) *Intravenous study.* Group A shall be dosed once intravenously at the low dose of test substance.

(B) *Oral studies.* (*1*) Group B shall be dosed once *per os* with the low dose of the test substance.

(*2*) Group C shall be dosed once *per os* with the high dose of the test substance.

(C) *Inhalation studies.* A single 6-hour exposure period shall be used for each group.

(*1*) Group D shall be exposed to a mixture of the test substance in air at the low concentration.

(*2*) Group E shall be exposed to a mixture of test substance in air at the high concentration.

(D) *Repeated dosing study.* Group F shall receive a series of single daily oral low doses of nonradioactive test substance over a period of at least 7 consecutive days. Twenty-four hours after the last nonradioactive dose, a single oral low dose of radioactive test substance shall be administered. Following dosing with radioactive substance, the rats shall be placed in individual metabolic units as described above. The study shall be terminated 7 days after the last dose, or after at least 90 percent of the radioactivity has been recovered in the excreta, whichever occurs first.

(3) *Types of studies*—(i) *Pharmacokinetics studies.* Groups A through F shall be used to determine the kinetics of absorption of the test substance. In groups administered the substance by intravenous or oral routes, (i.e., Groups A, B, C, F), the concentration of radioactivity in blood and excreta shall be measured following administration. In groups administered the substance by the inhalation route (i.e., Groups D and E) the concentration of radioactivity in blood and excreta shall be measured at selected time intervals during and following the exposure period. In addition, in the groups administered the substance by inhalation (i.e., Groups D and E), the concentration of test substance in inspired air shall be measured at selected time intervals during the exposure period.

(ii) *Metabolism studies.* Groups A through F shall be used to determine the metabolism of the test substance. Excreta (urine, feces and expired air) shall be collected for identification and quantification of test substance and metabolites.

(4) *Measurements*—(i) *Pharmacokinetics.* For animals from each group shall be used for these purposes.

(A) *Bioavailability.* The levels of radioactivity shall be determined in whole blood, blood plasma or blood serum at 15 minutes, 30 minutes, 1 hour, 2 hours, 8 hours, 24 hours, 48 hours, and 96 hours after initiation of dosing.

(B) *Extent of absorption.* The total quantities of radioactivity shall be determined for excreta collected daily for 7 days, or after at least 90 percent of

VOL 53 ISS 51 MR 16 988 UMI

the radioactivity has been recovered in the excreta.

(C) *Excretion.* The quantities of radioactivity eliminated in the urine, feces, and expired air shall be determined separately over appropriate time intervals. The collection of the intact test substance or its metabolites, including carbon dioxide, may be discontinued when less than one percent of the dose is found to be exhaled as radioactive carbon dioxide in 24 hours.

(D) *Tissue distribution.* At the termination of each study, the quantities of radioactivity in blood and in various tissues, including bone, brain, fat, gonads, heart, kidney, liver, lungs, muscle, skin, and residual carcass of each animal shall be determined.

(E) *Changes in pharmacokinetics.* Results of pharmacokinetics measurements (i.e., biotransformation, extent of absorption, tissue distribution, and excretion) obtained in rats receiving the single low oral dose of test substance (Group B) shall be compared to the corresponding results obtained in rats receiving repeated oral doses of test substance (Group F).

(F) *Biotransformation.* Appropriate qualitative and quantitative methods shall be used to assay urine, feces, and expired air collected from rats. Efforts shall be made to identify any metabolite which comprises 5 percent or more of the dose eliminated.

(G) *Changes in biotransformation.* Appropriate qualitative and quantitative assay methodology shall be used to compare the composition of radioactive substances in excreta from the rats receiving a single oral dose (Group B and C) with those in the excreta from rats receiving repeated oral doses (Group F).

(ii) [Reserved]

(d) *Data and reporting.* The final test report shall include the following:

(1) *Presentation of results.* Numerical data shall be summarized in tabular form. Pharmacokinetics data shall also be presented in graphical form. Qualitative observations shall also be reported.

(2) *Evaluation of results.* All quantitative results shall be evaluated by an appropriate statistical method.

(3) *Reporting results.* In addition to the reporting requirements as specified in the EPA Good Laboratory Practice Standards (40 CFR 792.185), the following specific information shall be reported:

(i) Species and strains of laboratory animals;

(ii) Chemical characterization of the test substance, including:

(A) For the radioactive test substance, information on the site(s) and degree of radiolabeling, including type of label, specific activity, chemical purity, and radiochemical purity.

(B) For the nonradioactive substance, information on chemical purity.

(C) Results of chromatography.

(iii) A full description of the sensitivity, precision, and accuracy of all procedures used to generate the data.

(iv) Percent absorption of the test substance after oral and inhalation exposures to rats.

(v) Quantity and percent recovery of radioactivity in feces, urine, expired air, and blood.

(vi) Tissue distribution reported as quality of radioactivity in blood and in various tissues, including bone, brain, fat, gonads, heart, kidney, liver, lung, muscle, skin and in residual carcass of rats.

(vii) Biotransformation pathways and quantities of the test substance and metabolites in excreta collected after administering single high and low doses to rats.

(viii) Biotransformation pathways and quantities of the test substance and metabolites in excreta collected after administering repeated low doses to rats.

(ix) Pharmacokinetic model(s) developed from the experimental data.

PART 799—[AMENDED]

2. In Part 799:

a. The authority citation for Part 799 continues to read as follows:

Authority: 15 U.S.C. 2603, 2611, 2625.

b. By adding § 799.2325 to read as follows:

§ 799.2325 Isopropanol.

(a) *Identification of of test substance.* (1) Isopropanol (CAS No. 67–63–0) shall be tested in accordance with this section.

(2) Isopropanol of at least 99.9 percent purity shall be used as the test substance.

(b) *Persons required to submit study plans, conduct tests, and submit data.* All persons who manufacture (including import or byproduct manufacture) or process isopropanol, other than as an impurity, from (44 days after the publication date of the final rule in the Federal Register) to the end of the reimbursement period shall submit letters of intent to conduct testing, submit study plans, conduct tests in accordance with Part 792 of this chapter, and submit data or submit exemption applications as specified in this section, Subpart A of this part, and Parts 790 and 792 of this chapter for single-phase rulemaking.

(c) *Health effects testing*—(1) *Subchronic inhalation toxicity*—(i) *Required testing.* A subchronic inhalation toxicity test shall be conducted with isopropanol in accordance with § 798.2450 of this chapter.

(ii) *Reporting requirements.* (A) The subchronic inhalation toxicity test shall be completed and the final report submitted to EPA within 15 months of the effective date of the final rule.

(B) Progress reports shall be submitted to EPA for the subchronic inhalation toxicity test at 6-month intervals beginning 6 months after the effective date of the final rule until submission of the final report.

(2) *Oncogenicity*—(i) *Required testing.* An oncogenicity test shall be conducted by inhalation with isopropanol in accordance with § 798.3300 of this chapter.

(ii) *Reporting requirements.* (A) The oncogenicity test shall be completed and the final report submitted to EPA within 53 months of the effective date of the final rule.

(B) Progress reports shall be submitted at 6-month intervals beginning 6 months after the effective date of the final rule until submission of the final report.

(3) *Reproduction and fertility effects*—(i) *Required testing.* A reproduction and fertility effects test shall be conducted by gavage with isopropanol in accordance with § 798.4700 of this chapter.

(ii) *Reporting Requirements.* (A) The reproduction and fertility effects test shall be completed and the final report submitted to EPA within 24 months of the effective date of the final rule.

(B) Progress reports shall be submitted at 6-month intervals begining 6 months after the effective date of the final rule until submission of the final report.

(4) *Developmental toxicity*—(i) *Required testing.* A developmental toxicity test shall be conducted by gavage with isopropanol in accordance with § 798.4900 of this chapter.

(ii) *Reporting Requirements.* (A) The developmental toxicity test shall be completed and the final report submitted to EPA within 12 months of the effective date of the final rule.

(B) A progress report shall be submitted 6 months after the effective date of the final rule.

(5) *Mutagenic effects—gene mutations*—(i) *Required testing.* (A) A gene mutation test in mammalian cells shall be conducted with isopropanol in accordance with § 798.5300 of this chapter.

(B)(*1*) A sex-linked recessive lethal test in *Drosophila melanogaster* shall be

conducted with isopropanol in accordance with § 798.5275 of this chapter except for the provisions in paragraphs (d)(5) (ii) and (iii), unless the results of the mammalian cells in the culture gene mutation test conducted pursuant to paragraph (c)(5)(i)(A) of this section are negative.

(*2*) For the purpose of this section the following provisions also apply:

(*i*) *Route of administration.* The route of administration shall be by exposure to isopropanol vapors.

(ii) [Reserved]

(C)(*1*) A mouse specific locus test shall be conducted with isopropanol by inhalation in accordance with § 798.5200 of this chapter except for the provisions in paragraphs (d)(5) (ii) and (iii), if the results of the sex-linked recessive lethal test conducted pursuant to paragraph (c)(5)(i)(B) of this section are positive and if, after a public program review, EPA issues a Federal Register notice or sends a certified letter to the test sponsor specifying that the testing shall be initiated.

(*2*) For the purpose of this section the following provisions also apply:

(*i*) *Dose levels.* The duration of exposure shall be for 6 hours per day.

(*ii*) *Route of administration.* Animals shall be exposed to isopropanol by inhalation.

(ii) *Reporting requirements.* (A) The gene mutation tests shall be completed and final report submitted to EPA as follows:

(*1*) The gene mutation in mammalian cells assay within 6 months of the effective date of the final rule.

(*2*) The sex-linked recessive-lethal test in *Drosophila melanogaster* within 18 months of the effective date of the final rule.

(*3*) The mouse specific-locus test within 48 months of the date of EPA's notification of the test sponsor by certified letter or Federal Register notice under paragraph (c)(5)(i)(C) of this section that testing shall be initiated.

(B) Progress reports shall be submitted to EPA for the *Drosophila* sex-linked recessive lethal test at 6-month intervals beginning 6 months after the effective date of the final rule until the submission of the final report.

(C) Progress reports shall be submitted to EPA for the mouse specific locus assay at 6-month intervals beginning 6 months after the date of EPA's notification of the test sponsor that testing shall be initiated until submission of the final report.

(6) *Mutagenic effects—chromosomal aberrations*—(i) *Required testing.* (A) An *in vitro* cytogenetics test shall be conducted with isopropanol in accordance with § 798.5375 of this chapter.

(B)(*1*) An *in vivo* cytogenetics test shall be conducted with isopropanol in accordance with § 798.5385 of this chapter except for the provisions in paragraphs (d)(5) (iii) and (iv), if the *in vitro* test conducted pursuant to paragraph (c)(6)(i)(A) of this section is negative.

(*2*) For the purpose of this section, the following provisions also apply:

(*i*) *Route of administration.* Animals shall be exposed to isopropanol by inhalation.

(*ii*) *Treatment schedule.* The duration of exposure shall be for 6 hours per day for 5 consecutive days with one sacrifice time or for 6 hours per day for 1 day with 3 sacrifice times.

(C)(*1*) A dominant lethal assay shall be conducted with isopropanol in accordance with § 798.5450 of this chapter except for the provisions in paragraphs (d)(5) (ii) and (iii), unless both the *in vitro* and *in vivo* cytogenetics tests conducted pursuant to paragraphs (c)(6)(i) (A) and (B) of this section are negative.

(*2*) For the purpose of this section, the following provisions also apply:

(*i*) Route of administration. Animals shall be exposed to isopropanol by inhalation.

(*ii*) *Treatnemt schedule.* The duration of exposure shall be for 6 hours per day for 5 consecutive days.

(D)(*1*) A heritable translocation test shall be conducted with isopropanol in accordance with § 798.5460 of this chapter except for the provisions in paragraphs (d)(5) (ii) and (iii), of the results of the dominant lethal assay conducted pursuant to paragraph (c)(6)(i)(C) of this section are positive and if, after a public program review, EPA issues a Federal Register notice or sends a certified letter to the test sponsor specifying that the testing shall be initiated.

(*2*) For the purpose of this section, the following provisions also apply:

(*i*) *Route of administration.* Animals shall be exposed to isopropanol by inhalation.

(*ii*) [Reserved]

(ii) *Reporting requirements.* (A) The chromosomal aberration tests shall be completed and the final reports submitted to EPA as follows:

(*1*) The *in vitro* cytogenetics test within 15 months of the effective date of the final rule.

(*2*) The *in vivo* cytogenetics test within 15 months of the effective date of the final rule.

(*3*) The dominant lethal assay within 24 months of the effective date of the final rule.

(*4*) The heritable translocation test within 24 months of the date of EPA's notification of the test sponsor by certified letter or Federal Register notice under paragraph (c)(6)(i)(D) of this section that testing shall be initiated.

(B) Progress reports shall be submitted to EPA for the *in vitro* cytogenetics, the *in vivo* cytogenetics, and the dominant lethal assays at 6-month intervals beginning 6 months after the effective date of the final rule until submission of the applicable final report.

(C) Progress reports shall be submitted to EPA for the heritable translocation assay at 6-month intervals beginning 6 months after the date of EPA's notification of the test sponsor that testing shall be initiated until submission of the final report.

(7) *Neurotoxicity*—(i) *Required testing.* (A)(*1*) A functional observation battery shall be conducted with isopropanol in accordance with § 798.6050 of this chapter except for the provisions in paragraphs (d) (5) and (6).

(*2*) For the purpose of this section, the following provisions also apply:

(*i*) *Duration and frequency of exposure.* For subchronic study, animals shall be dosed for 6 hours per day, 5 days per week for 90 days. For acute study, animals shall be dosed for 4 to 6 hours once.

(*ii*) *Route of exposure.* Animals shall be exposed to isopropanol by inhalation.

(B)(*1*) A motor activity test shall be conducted with isopropanol in accordance with § 798.6200 of this chapter except for the provisions in paragraphs (d)(5) and (6).

(*2*) For the purpose of this section, the following provisions also apply:

(*i*) *Duration and frequency of exposure.* For subchronic study, animals shall be dosed for 6 hours per day, 5 days per week for 90 days. For acute study, animals shall be dosed for 4 to 6 hours once.

(*ii*) *Route of exposure.* Animals shall be exposed to isopropanol by inhalation.

(C)(*1*) A neuropathology test shall be conducted with isopropanol in accordance with § 798.6400 of this chapter except for the provisions in paragraphs (d)(5) and (6).

(*2*) For the purpose of this section, the following provisions also apply:

(*i*) *Duration and fequency of exposure.* Animals shall be dosed for 6 hours per day, 5 days per week for 90 days.

(*ii*) *Route of exposure.* Animals shall be exposed to isopropanol by inhalation.

(D) A developmental neurotoxicity test shall be conducted with isopropanol in accordance with § 795.250 of this chapter.

(ii) *Reporting requirements.* (A) The functional observation battery, motor activity, neuropathology, and developmental neurotoxicity tests shall be completed and the final reports submitted to EPA within 15 months of the effective date of the final rule.

(B) Progress reports shall be submitted to EPA for the functional observation battery, motor activity, neuropathology, and developmental neutoxicity tests at 6-month intervals beginning 6 months after the effective date of the final rules until submission of the applicable final report.

(8) *Pharmacokinetic studies*—(i) *Required testing.* An oral and inhalation pharmacokinetic test shall be conducted with isopropanol in accordance with § 795.231 of this chapter.

(ii) *Reporting requirements.* (A) The pharmacokinetic test shall be completed and the final report submitted to EPA within 15 months of the effective date of the final rule.

(B) Progress reports shall be submitted to EPA for the pharmacokinetics test at 6-month intervals beginning 6 months after the effective date of the final rule until submission of the final report.

(d) *Effective dates.* (1) This test rule shall be effective 44 days after date of publication of the final rule in the Federal Register.

(2) The guidelines and other test methods cited in this section are referenced as they exist on the effective date of the final rule.

(Information collection requirements have been approved by the Office of Management and Budget under control number 2070-0033)

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Health Care Financing Administration

42 CFR Parts 405, 431, 433, 434, 456, 462, 466, 473, 476, and 489

[HSQ-135-P]

Medicare and Medicaid Programs; Changes to Peer Review Organizations Regulations

AGENCY: Health Care Financing Administration (HCFA), HHS.

ACTION: Proposed rule.

SUMMARY: This rule sets forth several proposed changes to the regulations governing Peer Review Organizations. Some of these changes are the result of the passage of legislation (that is, the Consolidated Omnibus Budget Reconciliation Act of 1985, enacted on April 7, 1986 and the Omnibus Budget Reconciliation Act of 1986, enacted on October 21, 1986). Other changes are of a technical nature and are intended to clarify and correct the regulations concerning issues that have arisen in the course of implementing the Peer Review Organization program.

DATE: Comments will be considered if we receive them at the appropriate address, as provided below, no later than 5:00 p.m. on May 16, 1988.

ADDRESS: Mail comments to the following address: Health Care Financing Administration, Department of Health and Human Services, Attention: HSQ-135-P, P.O. Box 26676, Baltimore, Maryland 21207.

If you prefer, you may deliver your comments to one of the following addresses:

Room 309-G, Hubert H. Humphrey Building, 200 Independence Avenue SW., Washington, DC, or
Room 132, East High Rise Building, 6325 Security Boulevard, Baltimore, Maryland.

SUPPLEMENTARY INFORMATION:

I. Legislative History

The Peer Review Improvement Act of 1982 (Title I, Subtitle C of the Tax Equity and Fiscal Responsibility Act of 1982 (Pub. L. 97-248)) amended Part B of Title XI of the Social Security Act (the Act) to establish the Utilization and Quality Control Peer Review Organization (PRO) program. The 1982 legislation provided that PROs assume the responsibiiities that previously had been assigned to Professional Standard Review Organizations and fiscal intermediaries. Those responsibilities include the review of health care services funded under Medicare (Title XVIII of the Act) to determine whether those services are medically necessary, are furnished at the appropriate level of care, and are of a quality that meets professionally recognized standards. In addition, PROs monitor and validate a sample of diagnostic and procedural information supplied by hospitals to fiscal intermediaries regarding the inpatient hospital prospective payment system.

To carry out their responsibilities, PROs acquire information from the medical records of patients and from other records maintained by health institutions, practitioners and claims payment agencies. In addition, they generate information regarding the quality and appropriateness of health care services. PROs use this information to develop and review profiles (practice patterns) that enable them to focus on suppliers of health care (for example, practitioners and hospitals) and specific aspects of Medicare payment (for example, the assignment of discharges to diagnosis-related groups (DRG) in the hospital prospective payment system) for the purpose of assessing the quality of care being furnished, and to recommend corrective action. PROs transmit their determinations to intermediaries responsible for making payments under the Act.

The PRO legislation contained several provisions affecting data collection and disclosure. Section 1160 of the Act contains the majority of a PRO's statutory responsibilities concerning the disclosure of information. This section recognizes both the need to protect the interests of patients, health care practitioners, and providers of health care in the confidentiality of their medical records and the need to disclose certain information.

On April 17, 1985, we published in the Federal Register several final rules that implemented the PRO program (50 FR 15312-15374). The PRO regulations are located in various parts of Title 42 of the CFR (that is, Parts 405, 462, 466, 473, 476, 489, and 1004). As the result of the passage of the Consolidated Omnibus Budget Reconciliation Act of 1985 (Pub. L. 99-272) on April 7, 1986 and of the Omnibus Budget Reconciliation Act of 1986 (Pub. L. 99-509) on October 21, 1986, we are proposing several conforming changes to those regulations and, in addition, several technical changes, the need for which have become clear as we have gained experience with the PRO progam.

II. Proposed Changes

A. Assistants at Cataract Surgery

Section 9307(a) of Pub. L. 99-272 added a new exclusion of coverage provision that now appears as section 1862(a)(15) of the Act. That section now provides that payment for the services of an assistant at surgery in a cataract operation is not allowed unless, before the surgery is performed, the appropriate PRO (under Part B of Title XI of the Act), or in cases where a PRO does not exist, the appropriate carrier (under section 1842 of the Act) has approved the use of the assistant in the

surgical procedure because the patient has a complicating medical condition. This provision also applies to physician assistants when they are to be used as assistants at cataract surgical procedures.

Section 9338 of Pub. L. 99-509 enacted a new section 1861(s)(2)(K) of the Act to extend Medicare coverage to physician assistants who, under the supervision of a physician, provide services of the type that would be considered physician services if performed by a doctor of medicine or osteopathy. This provision applies only to States in which physician assistants are legally authorized to perform physician services. Therefore, whenever a surgeon proposes to use a physician assistant as an assistant at cataract surgery, that surgeon must seek approval from the PRO before the procedure is performed in order to receive payment from Medicare for the physician assistant.

To incorporate this provision into the regulations, we would add a new paragraph (n) to § 405.310, which deals with services excluded from coverage. The new paragraph would address coverage of services for assistants at surgery in a cataract operation. In addition, we would expand § 473.32(a)(1)(ii) in order to provide for a reconsideration of an initial denial determination relating to procedures for assistants at surgery in a cataract surgery that are to be performed by a facility other than a hospital.

We would also add a new § 466.71(a)(9) in order to include the review of services for assistants at surgery in a cataract operation in the scope of PRO review. In addition, we would add a conforming cross-reference in § 466.71(b), which deals with payment determinations.

B. More than one Member on an HMO Board

Section 9404 of Pub. L. 99-272 amended section 1153(b)(2)(A) of the Act to allow an organization to be a PRO even if it has more than one member who is on a health maintenance organization (HMO) board. To implement this provision of Pub. L. 99-272, we would add a new paragraph (b) to § 462.106 that would provide that, effective April 7, 1986 (the date of enactment of Pub. L. 99-272), an organization is eligible to be a PRO even though it has more than one member who is also serving on the board of directors of an HMO.

C. Consumer Representation

Section 9353(b) of Pub. L. 99-509 enacted a new section 1152(3) of the Act to require that PROs have at least one individual who serves on its governing board as a represenative of consumers. Because of variations in the size of governing boards, we are considering basing consumer representation on a sliding scale or requiring a minimum percentage requirement. The following is an example of the sliding scale we are considering:

PRO board members	Consumer representative requirements
Under 21	1
21 to 60	2
Over 60	3

A recent survey of 42 PROs under contract indicates that the size of the PRO boards surveyed ranges from 9 to 41 members. Thus, the new statutory requirement of one consumer representative in this sample of PROs would result in a range of consumer representation of eleven percent (one out of nine) to two and four tenths percent (one out of forty-one) to two and four tenths percent (one out of forty-one). In addition, section 9353(a)(2) of Pub. L. 99-509 provides competitive procurement procedures for organizations other than PROs. These procedures, as well as the awarding of new PRO contracts, could result in larger governing boards in the future. Therefore, we invite public comments on the idea of a fixed percentage requirement of consumer representation or providing a sliding scale requirement.

The term consumer representative is not defined in section 1152 of the Act. Therefore, we are proposing in § 462.101, which deals with eligibility requirements for a PRO contract, that the consumer representative be a Medicare beneficiary who is not currently a practicing physician; a retired physician; or a governing board member, officer, partner, an owner of more than five pervent interest, or a managing employee of a health care facility or association of health care facilities. We would exclude such a person from being eligible as a consumer representative because we believe people in these circumstances may have conflicting interests. We invite comments on what the role of the consumer representative should be (for example, to educate consumers as to PRO functions, to advise PROs on medical review policies, or to contribute to the identification of practitioners or hospitals for purposes of making PRO sanction recommendations to the Office of the Inspector General).

In conjunction with the proposed revision to § 462.101, we would make a conforming change to § 462.107 by adding a cross-reference to § 462.101(c).

D. Medicaid Quality Review of HMO Services

Section 9431 of Pub. L. 99-509 amended section 1902(a)(3) of the Act by adding a new paragraph (C) to require State Plans for Medicaid Assistance to provide for an annual independent, external review of the quality of HMO services. This review must be conducted by a PRO under Part B of Title XI of the Act, or by a private accreditation body. Section 1902(a)(3) of the Act was further amended by section 4113(b) of the Omnibus Budget Reconciliation Act of 1987. As amended, the provisions of section 1902(a)(30) of the Act permit a State to contract with an entity that meets the requirements determined by the Secretary as set forth in section 1152 of the Act. Thus, we permit States to contract with non-PRO organizations that have a contract to review HMO and competitive medical plan (CMP) services in accordance with section 1154(a)(4)(C) of the Act. The results of these reviews are to be made available to the State, and upon request, to HCFA. The initial external review must be conducted no later than July 1, 1988 and must cover payments for Medicaid made on or after July 1, 1987.

Section 9431(b)(1) of Pub. L. 99-509 and section 4113(b) of Pub. L. 100-203 also amended sections 1902(d) and 1903(a)(3)(C) of the Act. Section 1902(d) of the Act deems the quality review requirement of section 1902(a)(30) of the Act met if the State contracts with a PRO or with an entity that meets the requirements, as determined by the Secretary described in section 1152 of the Act to perform this quality review. Section 1903(a)(3)(C) of the Act permits 75 percent Federal financial participation for these quality review contract costs incurred by the PRO or by an entity that meets the requirements determined by the Secretary, as described in section 1152 of the Act. If a State contracts with a private accreditation body to do quality of care reviews, then the contract costs are matched at the regular 50 percent rate.

Currently, § 434.53 requires State Medicaid agencies to establish a system requiring periodic (at least once a year) medical audits in order to insure that each contractor of medical services furnishes quality and accessible health care to enrolled recipients of HMOs and other prepaid health plans. We believe that the periodic medical audit currently required by § 434.53 would be

VOL
53
ISS
51
MR
16
1988
UMI

duplicative of the external quality review required by section 9431 of Pub. L. 99–509. Therefore, we are proposing to revise § 434.53 to eliminate the requirement for periodic medical audits and to add new requirements for external reviews.

We are proposing to define external reviews as reviews not conducted by the State or by an HMO. We are proposing to define a private accreditation body as the Accreditation Association for Ambulatory Health Care, the Joint Commission on Accreditation of Healthcare Organizations (formerly the Joint Commission on Accreditation of Hospitals), or other national accreditation body recognized by the Secretary for providing reasonable assurance that the requirements of the contract are met. We specifically invite comments on these proposed definitions.

In addition, we are proposing to make conforming changes to §§ 431.630(a), 433.15(b)(6)(i), 456.2(b)(2), and 456.650(c)(2) to reference the quality review functions described in section 1902(a)(30)(C) of the Act.

E. Reconsiderations and Appeals of Denials

Section 1866(f)(2)(A) of the Act authorizes the Secretary, based on information supplied by a PRO, to "deny payment (in whole or in part) under Part A for inpatient hospital services provided in connection with an unnecessary admission (or subsequent admission of the same individual) * * *." This authority is in addition to the utilization and quality review activities specified in Title XI of the Act.

Section 1862(d) of the Act entitles a provider of services to a hearing if it is dissatisfied with an initial denial determination made in accordance with section 1866(f)(2)(A) of the Act. Hearings and judicial review of PRO determinations made in accordance with Title XI of the Act are covered in 42 CFR Part 473 of the PRO regulations. However, there is no provision in Part 473 or in Part 405, Subpart G (Reconsiderations and Appeals under the Hospital Insurance Program) that addresses the rights of a provider of services to request a hearing concerning denial determinations made in accordance with section 1866(f)(2)(A) of the Act. Therefore, we are proposing to revise the PRO review functions to include denial determinations made in accordance with section 1866(f)(2) of the Act. We would revise § 466.83, which deals with initial denial determinations, to provide that a PRO's initial denial determination made in accordance with section 1866(f)(2)(A) of the Act is governed by Part 405, Subpart G.

In addition, we would revise the PRO reconsideration and appeal regulations to clarify that appeals (beyond the PRO's reconsideration) of an initial denial determination under section 1866(f)(2)(A) of the Act are governed by Part 405, Subpart G. Thus, we would revise § 473.14(c) of the PRO regulations to provide that after a PRO reconsideration, any further appeals would be governed by Subpart G of Part 405. We plan to make necessary changes to Part 405, Subpart G in a separate rulemaking document concerning revisions to Medicare appeal rights.

F. Other Changes

1. Section 1152 of the Act requires that a PRO be composed of, or have available to it, a substantial number of licensed doctors of medicine or osteopathy who are engaged in the practice of medicine or surgery in the PRO area and are representative of the practicing physicians in the area. Section 462.102 sets forth the specific requirements a PRO must meet in order to be considered a physician-sponsored organization. In particular, this section specifies criteria an organization must meet in order to meet the substantial number and representation requirements of section 1152 of the Act. As currently written, § 462.102 fails to make it clear that, in order to be considered a physician-sponsored organization the PRO must—

- Be composed of a substantial number of licensed doctors;
- Be composed of physicians who are representative of practicing physicians in the area; and
- Not be a health care facility or be affiliated with a health care facility or health care facility association.

Also, § 462.102 contains some incorrect references that we would correct in this rule. Section 462.102(c), which establishes requirements PROs must meet in order to be composed of physicians who are representative of practicing physicians in the area, incorrectly references § 462.102(a)(2). In § 462.102(d), the reference to § 462.102(a) incorrectly requires an organization to meet all of the criteria, described above, in order to receive bonus points during the contract evaluation process. Therefore, we are proposing to revise § 462.102 to clarify that the substantial number and representation requirements are two separate and distinct requirements each having their own criteria. The proposed clarification would also correct the incorrect cross-references described above.

2. We would also revise § 466.76 to require a PRO to discuss its administrative and review procedures with health care facilities and physicians in the area. Currently, § 466.76 requires PROs to discuss these procedures only with facilities. However, PROs review the care provided in facilities by physicians. PRO review determinations have an impact upon physicians as well as facilities. Therefore, we believe that it is important for PROs to discuss their administrative and review procedures with both the facility and physicians providing care in the facility.

3. Section 466.78(a) requires hospitals participating in Medicare to maintain a written agreement with a PRO operating in the area in which the hospital is located. Section 9353(e) of Pub. L. 99–509 amended sections 1866(a) and 1876(i) of the Act to require HMOs and CMPs with risk contracts, skilled nursing facilities (SNFs), and home health agencies (HHAs) seeking payment for services provided to Medicare beneficiaries to maintain a written agreement with a PRO operating in the area in which the organization, facility, or agency is located. The HMO and CMP agreements must be maintained with a PRO beginning April 1, 1987. However, these agreements need not be maintained if a non-PRO organization has a contract with Medicare to review HMOs and CMPs, as provided for in section 1154(a)(4)(C) of the Act. SNF and HHA agreements must be maintained with PROs beginning October 1, 1987. Thus, we are proposing to revise § 466.78(a) to require risk HMOs and CMPs and SNFs and HHAs to maintain agreements with PROs as required by section 9353(e) of Pub. L. 99–509. In addition, we would revise § 489.20 to require each SNF and HHA to maintain an agreement with a PRO as part of its basic commitment under its provider agreement with Medicare.

4. Section 466.78(b)(2) provides that health care facilities that submit Medicare claims must cooperate in the assumption and conduct of PRO reviews. The facility must provide patient care data and other pertinent data to the PRO at the time the PRO is collecting review information necessary for making its determinations. Section 466.78(b)(2) currently provides that when the PRO review is conducted offsite, the facility must photocopy and deliver to the PRO, without charge, all required information within 30 days of the request.

This policy was challenged by a group of Wisconsin hospitals that brought suit against the Wisconsin Peer Review

Organization (WiPRO) and the Secretary arguing that the "without charge" provision did not adequately take into account the hospitals' increased costs of offsite review. On October 2, 1986, a decision was handed down by the United States District Court for the Western District of Wisconsin in the case of *Burlington Memorial Hospital et al.* v. *Bowen*, 644 F. Supp. 1020 (W.D. Wis. 1986) in favor of the plaintiffs.

The Court found that HCFA's rulemaking record did not adequately address HCFA's contention that photocopying costs were already acknowledged as part of a hospital's payment under the Medicare prospective payment system. However, the court concurred with HCFA's position that the statute does not require that these costs be paid twice, that is, once under the prospective payment system and again under section 1866(a)(1)(F) of the Act, which requires that costs to hospitals relating to agreements with PROs be paid directly by the Secretary to the PRO on behalf of the hospital.

The thrust of the court's holding in the *Burlington Memorial Hospital* case was echoed in a similar suit, *American Hospital Association (AHA)* v. *Bowen*, No. 86–1487–A (E.D. Va. July 13, 1987) and *Beverly Hospital et al.* v. *Bowen*, No. 86–3079 (L.F.O.), (D.D.C. Oct. 20, 1987). In the *AHA* and *Beverly Hospital* cases, the courts expressed the expectation that the Department would promulgate regulations that would specifically accommodate the increased costs that providers incur in the context of offsite review.

In light of these court decisions, we are proposing to revise § 466.78(b)(2) and add a new paragraph (c) to that section. We would provide that HCFA will furnish PROs with funds to be used by PROs to pay hospitals under the prospective payment system directly for photocopying and mailing records for offsite review. These payments will be in addition to a hospital's per discharge payments under the prospective payment system. Hospitals not being paid under the prospective payment system would continue to be paid for photocopying costs under Medicare's principles of reasonable cost.

Under the authority of the revised § 466.78, PROs would negotiate with prospective payment hospitals in their area and, within established constraints, implement a payment process with each hospital that would determine the frequency of payments and the manner by which the PRO would verify aspects of the hospital's photocopying costs. By allowing PROs to negotiate separate payment processes for each hospital, we believe that PROs would be able to reflect more accurately the review methodology (that is, the onsite/offsite mix) used by the PRO.

In prospective payment hospitals, the supplemental payment for photocopying would be made at a national rate based on a fixed cost per page. The fixed cost per page would be determined based on the following assumptions:

- The hospital leases photocopy equipment and the lease costs are in the average price range of similar equipment leased by HCFA. We arrived at what we believe to be the average equipment rental costs by arraying the costs of a number of different machines that typify the spectrum of machines on the market ranging from small to very large.

While we recognize that there is a vast universe of photocopy machines that are available in the market, it would be prohibitively expensive to scientifically ascertain what possible numbers of each machine are being used among the nation's hospitals. It is for this reason that we chose to identify typical machines that could reasonably represent the spectrum of size and cost that would tend to be found nationally. For each machine, we determined not just the basic rental amount, but the costs as well for maintenance and overage (the cost per page over and above what is included in the basic rental agreement).

- Costs for supplies (paper, toner, developer) likewise reflect an average. Understanding that hospitals vary in size and purchasing power, costs for paper are based on bulk order economies that providers typically take advantage of, and not according to prices that might be paid at retail by individual consumers. For the current year, we are basing this element of the rate on a provider's projected average use of 150 cases of paper (for all of its photocopying needs) that can be purchased for slightly in excess of $30 per case.

In arriving at this amount, we tried to be mindful of those who are concerned that our reimbursement rate enable them to purchase paper that is of sufficient quality as not to threaten copier break downs. This amount is almost double the amount we initially considered when developing a formula for the reimbursement of photocopying costs.

Costs for toner and developer were figured on the basis of a machine producing 748,000 pages annually, an amount that we believe surely exceeds the amount experienced by smaller providers.

- We are assuming an average cost of $16,310 per year in salary for the operator of a photocopying machine. Once again, provider experience here may vary, but it is our judgment that the operation of these machines is not a complicated task regardless of the fact medical records are not always comprised of pages that are the same size or that are inserted in the file in a uniform manner. Certainly, training an individual to operate a photocopying machine (and to replace file documents back into a file) is not a particularly specialized or difficult undertaking, nor does it require great technical expertise on the part of the trainee.

It would not be at all unreasonable to expect that a person would earn the minimum wage for this task, but to provide some margin for those providers that are unable to hire staff at this level we are assuming a figure that in fact not only exceeds the minimum wage by about 225 percent, but represents the payment level for an experiencing midlevel secretary in the Federal government.

- We are ascribing fringe benefits of employees to be 27.9 percent of salaries, which is the standard percentage dictated by the cost principles set forth in the Office of Management and Budget (OMB) Circular A–76. While there may be other yardsticks to measure this component of costs, we find this to be a reasonable resource since the thrust of this OMB circular is to help the government compare potentially incurred costs to determine whether the costs can be more economically incurred internally or through contract with a commercial source.
- We are concluding that a typical photocopying machine copies 748,000 pages per year. This amount is based on copying documents at a rate of six pages per minute for every hour in an eight-hour day, five days a week, 52 weeks a year. We believe this calculation to be relatively generous since it is based entirely upon the hand feeding of documents into the photocopying machine for duplication. While certainly many five may require this kind of treatment, it is obvious that there are many photocopying tasks that may be accomplished through automatic feeds that greatly increase the number of pages that can be generated by a machine on an hourly basis, much less annually. Were we to figure in the proportion of documents that could be expected to be reproduced by automatic feeds, it would no doubt significantly reduce the resulting figures for the cost per page to the hospital. Since our proposal provides for reimbursement on

VOL 53 ISS 51 MR 16 1988 UMI

a cost per page basis, hospitals are free to be overinclusive in photocopying requested records if this approach is more cost effective than a perhaps more time consuming culling of documents.

The fixed cost per page would be determined by dividing the cost of photocopying (equipment rental, supplies, salaries, and fringe benefits) by the number of pages. Under the current application of this methodology, the resulting cost per page is equivalent to $0.0498. While we would expect the methodology to remain constant, the numbers that underlie each assumption in the methodology may be subject to change over time as economic considerations dictate. If it is later determined that changes in the payment rate per page are warranted, announcement of the new rate would be published in the **Federal Register**.

We are proposing to reimburse postage costs as an item over and above the reimbursement we would pay for photocopying costs. Since, on the whole, overnight delivery is not generally a requirement of PROs, we are proposing in general, to pay the costs of mailing records based on actual costs up to the first class postage rate. Not only is first class mail delivered by employees of the United States Postal Service a reasonable means, in terms of speed and cost, to serve as a reimbursement basis, but the use of the first class rate clearly provides the kind of reasonable expectation of confidentiality that many providers wish to have when mailing copies of personally identified medical records through the mail. We would emphasize, however, that for PRO reviews of hospital denial notices, for which time is of the essense, we are proposing to pay the overnight mail rate. Modifications would be made to all PRO contracts specifying reimbursement rates and allocating additional funds for these expenses.

Payment for PRO review is governed by section 1866(a)(1)(F) of the Act, which requires hospitals to maintain an agreement with a PRO and provides that the "cost of such agreement to the hospital * * * shall be paid directly by the Secretary to such (PRO) on behalf of such hospital in accordance with a rate per review established by the Secretary * * *." The legal structure of this arrangement is, in our view, important to determining the extent of Medicare's financial responsibility. The Act contemplates a consultancy-type agreement between each hospital and its PRO that is paid for by Medicare. As is the case in any consultancy agreement, if a hospital were to contract with a peer review organization for a review of the hospital's cases, the hospital would, in addition to the requirement to pay the price for the review specified in the contract, incur certain obligations. In particular, hospital employees would be required to assist the contractor by answering questions, providing space in the facility as necessary, providing necessary documents for review, performing incidental photocopying, and so forth.

We believe that the statute, in requiring Medicare to pay for the costs of the "agreement" between the PRO and the hospital, rather than requiring Medicare to pay the "costs for PRO review" or some similar formulation, contemplated that Medicate would not separately reimburse for all possible effects of PRO review on a hospital's operations. Rather, like any other administrative or overhead expense, these incidental effects of PRO review would be paid for through the basic prospective payment system payment amounts.

Thus, when we first considered the issue of the reimbursement of hospital photocopying costs at the time the current regulations were published, it was our belief that these costs were already being met as part of the hospital's payment under the prospective payment system since those payments are, by definition, intended not only to reimburse a hospital for the provision of the medical care itself, but for all the associated costs that underlie a hospital's operations that can be attributed to the Medicare program. Since a hospital's administrative expenses (for example, photocopying and related administrative costs) were already figured in the provider's base year calculations, we perceived no need to make additional payments to cover this item of expense. Moreover, hospitals' experience under the Professional Standard Review Organization (PSRO) program (that is, the quality review program which was superseded by the PRO program) expressly included record gathering and monitoring and a certain amount of photocopying responsibilities. These costs served as part of the basis for a provider's base year reporting and, hence, were represented both in the provider's hospital-specific rate and, ultimately, in the national DRG rates.

It has become clear to us, however, that, since the inception of the PRO program, there has been some change in the manner in which some PROs have performed their responsibilities, namely, the appearance of offsite review. Unlike the nature of the PRO process as it was implemented at the outset, and unlike the opreation of the largely delegated PSRO program before it, offsite review has become to some degree prevalent in a manner that was not anticipated at the time of the issuance of the current regulations. Specifically, for those hospitals that have experienced increased offsite review, there is little question that these providers have had photocopying tasks that they did not have previously. It is the recognition of these additional costs that has made us recognize a need to revise the photocopying regulations.

In determining that we should now pay certain costs of photocopying related to PRO review, we do not concede that we are necessarily required to do so under the law. The prospective payment system is designed to cover the general category of administrative costs without regard to particular increased or decreased burdens that particular hospitals might incur because of changes in Medicare program requirements, other legal requirements, or other external forces that may impose greater or lesser administrative burdens on a hospital. Based on the court decisions reviewing the photocopying situation, however, we have concluded that the cost of photocopying for some hospitals has become large enough that it could reasonably be the object of separate reimbursement.

The recognition of increased costs, however, does not mean that a revised regulation must accommodate every conceivable element of cost that may be associated with the photocopying process, and it is for this reason that we are limiting our proposed reimbursement increase to those costs associated with the photocopying of medical records that have not previously been taken into account. Specifically, the added costs of items such as equipment, supplies, and staff are those that can be clearly traced to the advent of offsite review. What are not so easily traced to this element of a hospital's operations are those incidental or indirect expenses that are not necessarily attributable to offsite review.

For example, we considered whether to include in the proposed methodology a factor that would reflect the time spent by a hospital in retrieving medical records, carrying them to the photocopying machine, making sure that the records were correctly reinserted into the file, and carrying them back for re-insertion into the permanent file. We concluded that these activities were of such an inconsequential nature that they could not reasonably be undertaken in anticipation of Federal reimbursement.

Whether or not this is the case, it is clear to us that this type of administrative activity is precisely the sort that has been recognized as part of a hospital's prospective payment system payments for which offsite review has had an imperceptible, if any, impact. Indeed, similar, if not identical, costs were necessarily incurred by hospitals in the conduct of review under the PSRO system, and these indirect costs of PSRO review were part of the hospitals' base year reporting and, thus, were reflected in their current rates.

Specifically, the retrieval of files, their conveyance to a copying facility, and their orderly return to a main file room are activities that very much describe the basic outlines of what all hospitals faced when operating under the PSRO system. Certainly, whenever denial notices needed to be sent, denial reconsiderations processed, sanction reports issued, medical care evaluation studies conducted, or a hospital's capability to perform delegated review monitored, files necessarily had to be retrieved, examined, considered for copying, and returned to their proper place. Each of these activities alone, and clearly all of them in combination, posed in varying degrees the kind of significant use of administrative staff that gave rise to measurable costs that were charged to the Medicare program (and have been carried forward in the prospective payment system payment rates). For us to conclude now that offsite review has in fact created a whole new category of indirect costs never previously accommodated, would be to ignore more than 15 years of program experience.

We also considered whether to include in the calculation of costs a component for space costs attributable for off site review. We rejected this possibility, however, for two reasons. First, the prospective payment system already encompasses a capital cost pass-through that is designed specifically to reimburse providers for their allocable costs represented by that share of the hospital's physical plant investment whose use may be apportioned to their Medicare participation. This would expressly include space set aside by a hospital for photocopying purposes. Second, for those hospitals that now experience only offsite review, less space need now be devoted to PRO activity since, by definition, it is taking place outside the facility.

There are two other factors that lead us to believe that the approach we are proposing is a reasonable one. First, the methodology focuses on the reimbursement of a hospital's average costs notwithstanding the fact that whatever added costs that a provider might incur as a result of offsite review are marginal in nature. Specifically, hospitals already had photocopying equipment and supplies, and personnel to operate the equipment long before they had incremental responsibilities brought about by offsite review. Thus, while we could have limited our cost calculations only to accommodate a hospital's marginal costs, we have chosen instead, by reimbursing PRO photocopying expenses on an average cost basis, to credit a hospital as if offsite review were creating some of these basic administrative costs for the first time. Second, while there have been isolated examples (such as Wisconsin) where offsite review became the norm rather than the exception, the fact remains that onsite review still remains by far the most prevalent practice nationwide. Our contract negotiations with PROs were conducted to ensure that at least 80 percent of reviews were conducted onsite. Currently, only about 12 percent are to be performed offsite. Moreover, it is our intention to continue to encourage PROs to conduct their responsibilities onsite to the extent that they can do so within budgetary constraints.

We fully understand that the cost experience of each provider is different in varying degrees from that of its peers. In the context of this regulation, for example, there may be hospitals that do not employ photocopy machine operators and rely instead on higher salaried administrative personnel to undertake the copying responsibilities that are necessitated by peer review. These providers may sustain greater per unit costs than their larger counterparts that have large-scale document reproduction capacities that will be wholly unaffected not just by offsite review, but by peer review itself. Nevertheless, we do not agree with those who contend that Medicare should pay the actual photocopying costs of each hospital, regardless of amount.

In the first place, we believe that reimbursement of each hospital's individually determined photocopying costs would be inconsistent with the basic statutory design. In the case of prospective payment system hospitals, we no longer have the authority under section 1861 of the Act to reimburse a hospital's costs. Authority to pay for photocopying costs must be found in section 1866(a)(1)(F) of the Act, which provides that payment is to be based on a "rate per review established by the Secretary." This language plainly contemplates the establishment of fixed payment amounts, rather than consideration of the costs of individual hospitals. Moreover, in light of general abolition of cost reimbursement, it would be unreasonable to re-establish a cost allocation methodology and associated auditing to ascertain the amount of photocopying costs associated with PRO review, an amount that is minuscule in relation to the total costs of any individual hospital.

It is for these reasons that we believe that our approach in proposing to revise the photocopying regulation would satisfy the concerns expressed by the courts in the *Burlington* and *AHA* cases. Both courts expressed a desire to see a Departmental policy that recognized the impact of offsite review on hospital costs, while recognizing the statute's preclusion of reimbursing hospitals twice for the same cost. We believe that the balance that we have tried to strike in this proposed rule is designed to meet these twin objectives.

We are proposing to make the change in the regulation governing the reimbursement of photocopying costs effective April 1, 1987. The April 1 date signifies the date upon which HCFA determined that an adjustment to the current rule was justified in light of what was essentially a change in circumstances surrounding the implementation of the PRO program, namely the increase in the use of offsite review which may have increased costs of a provider in a way that was not accounted for in the prospective payment system.

We do not believe that any added retroactivity would be justified. The fact remains that at the time that § 466.78 was promulgated, the rule reflected the best information available to the Department in terms of what responsibilities providers could reasonably expect to have to PROs. At that time, we determined that a provider's direct and indirect costs of photocopying were already reflected in its prospective payment system payment rate since these costs were included in the provider's base year calculations.

As we have discussed above, photocopying costs were clearly not a new responsibility arising out of the PRO program since these obligations had been present for some time under the predecessor PSRO program. Providers were routinely being reimbursed for these costs through application of reasonable cost principles and there was no reason to believe that a provider's cost experience would be any different under the new system. Certainly, there was no basis for concluding that Congress intended for

VOL
53
ISS
51
MR
16
988
UMI

providers to be reimbursed twice for these costs. Yet, this would have been precisely the result if we had chosen to pay for photocopying costs through the indirect cost element of the prospective payment system and through a specific pass-through in the form of a supplemental photocopying payment discretely aimed at these particular costs.

Thus, given the limited use of offsite review by PROs in the early stages of the program, we did not believe that there was any legal basis for reimbursing these costs in any different manner than the one we adopted. However, recognizing that the complexion of the program was changing to reflect a greater use of offsite review (and the likelihood of its consequent upward effect on a provider's direct costs), we have concluded that, for periods after April 1, 1987, an adjustment to a provider's reimbursement is warranted.

Pursuant to the Court's decision in the *Beverly Hospital* case, we have examined the mechanism that is available for providers that desire to challenge the validity of this regulation (including its April 1, 1987 effective date) in order to claim additional amounts of reimbursement. Any such challenges, as well as any challenge relating to reimbursement for photocopying costs relating to offsite review for cost reporting periods ending before the effective date of this regulation, must be expressed in the dorm of a claim for additional payment for inpatient costs on the hospital's cost report submitted to the intermediary and subject to review pursuant to the provisions of section 1878 of the Act and Subpart R of Part 405.

5. Section 466.78(b)(4) requires hospitals to provide PROs with copies of its notices of noncoverage issued under § 412.42(c). PRO contracts for 1986 through 1988 require PROs to review hospital notices of noncoverage issued under §§ 405.334 and 412.42(c). We believe that in order to perform this review effectively and to protect Medicare beneficiaries from being inappropriately charged by hospitals, PROs must receive copies of the notices of noncoverage. Therefore, we would revise § 466.78(b)(4) to require hospitals to provide PROs copies of notices of noncoverage that are issued under §§ 405.334 and 412.42(c).

6. Currently, § 466.93 requires a PRO physician to discuss a proposed denial with both the attending physician and the hospital. We would revise § 466.93 to allow other hospital staff (that is, nonphysicians) to comment on a proposed denial and to permit PRO nonphysician reviewers to discuss the proposed denial. We are proposing this change in order to conform the regulations to current program policy.

Section I.M. 2003.1 of the PRO manual, published in March 1985, permits hospitals to use nonphysician personnel to comment on proposed denials and also allows PROs to use nonphysician personnel to receive and act on hospitals comments. The purpose of this provision is to afford a hospital peer to peer discussions regarding proposed denials. This means that, if a hospital chooses to use a physician to comment on proposed denials, the PRO must also provide a physician for the discussion. If the hospital chooses to utilize nonphysician personnel, the PRO can also use nonphysician personnel for the discussion.

7. Section 466.94 requires a PRO to provide written notice of all intial denials to the intermediary or carrier. We have found this requirement to be administratively costly. Thus, we are proposing to revise § 466.94 to require that the only time the PRO would be required to notify the intermediary or carrier of a denial determination would be when the denial determination required an action on the part of the intermediary or carrier. It is our belief that this proposed change will both reduce PRO paperwork requirements and reduce the cost of processing claims.

8. The concept of PRO peer review requires that, whenever possible, the PRO must use physician reviewers who practice in a setting similar to the setting of the physician whose services are under review. For example, a physician reviewer who practices in a rural setting would be involved in the review of services provided in the rural setting. Likewise, physician reviewers who practice in an urban setting would be involved in the review of care rendered in an urban setting. We would revise § 466.98 in order to clarify that the PRO, in making initial denial determinations, must use physician reviewers who practice in a setting similar to the setting of the physician whose services are under review. However, we would provide an exception to this requirement if the PRO determines that peers are not available.

9. Section 466.100 describes PRO's use of norms, criteria, and standards as defined in § 466.1. We are proposing to revise § 466.100(a) by eliminating the requirement that PROs use national admission norms to select procedures for preadmission review. In practice, PROs do not generally select preadmission procedures through the use of national admission norms.

We would also revise § 466.100(b) to clarify the purpose and use of criteria. We are adding this explanation because we believe there is widespread misunderstanding on the part of the general public regarding how the criteria are applied. We believe it important that our regulations clearly explain that the criteria are used as screening tools for the purpose of identifying questionable cases for referrals to physician reviewers.

Currently, PROs use criteria for utilization and quality of care reviews. We are proposing to revise § 466.100(b) to include quality of care in the list of review activities for which PROs must use criteria. This change would conform the regulations to current practice. We would also revise paragraph (d) of § 466.100 in order to delete the reference to standards. PROs do not apply standards in the conduct of review and do not routinely develop written standards or variant standards apart from those included in review criteria. The standards necessary for conducting quality review studies would be described in paragraph (c) of § 466.100.

10. Section 473.15 provides that a provider or practitioner dissatisfied with a change to the diagnostic or procedural coding information made by a PRO as the result of DRG validation under section 1866(a)(1)(F) of the Act is entitled to a review of that change if the change caused an assignment of a different DRG and resulted in a lower payment. Thus, the PRO contracts for the years 1984 through 1986 permitted providers and practitioners to request a subsequent review of DRG changes that resulted in a lower-weighted DRG. this subsequent review was permitted because a change in a DRG assignment to a lower-weighted DRG results in reduced payments to providers. However, all changes in DRG assignments (whether to a higher-or lower-weighted DRG) are included in our error computation statistics, and providers with high error computations are placed on intensified review. Since providers can be adversely affected by DRG changes regardless of whether they are to a higher-or-lower-weighted DRG, we believe that it is appropriate to revise § 473.15 to provide for a subsequent review of all DRG changes.

In addition, by including in § 473.15(b) a general cross-reference to "§§ 473.18 through 473.36," we inadvertently implied that beneficiaries may request review of DRG coding changes resulting from DRG validation activities by PROs because that general cross-reference includes references to §§ 473.18(a) and 473.32(a). Beneficiaries are not entitled to a review of changes relating to diagnostic or procedural coding resulting from DRG validation. Thus, we would revise § 473.15(b) to remove the incorrect references to §§ 473.18(a) and 473.32(a).

Also in § 473.18, which lists the locations to which beneficiaries may submit requests for reconsiderations, we are proposing to delete paragraph (a)(3), which references the Railroad Retirement Board Office (if the beneficiary is a railroad retiree) as one of the locations at which a reconsideration request may be filed. There have been several administrative problems in getting these requests forwarded to the appropriate PRO. Thus, to alleviate these problems, we have decided to eliminate this location.

11. The PRO Interim Manual Transmittal (section I.M. 2002.1) requires that a PRO reconsideration reviewer be a board-certified specialist or a board-eligible specialist (that is, eligible to take the boards) in the field under review. However, § 473.28, which specifies the qualifications of a reconsideration reviewer, requires only that the reviewer be a specialist in the type of service under review. In order to conform the regulations to current policy and program guidelines, we are proposing to revise § 473.28 to require that the review specialist be board-certified or board-eligible in the type of services under review.

12. Section 9353(d)(1) of Pub. L. 99–509 amended section 1160(b)(1) of the Act to require PROs to share information with State licensing or certification agencies or with national accreditation bodies that request confidential information relating to a specific case or possible pattern of substandard care to the extent that the information is required by the requesting agency or body to carry out official functions. As provided in section 9353(d)(2) of Pub. L. 99–509, the provisions contained in section 9353(d)(1) of Pub. L. 99–509 are applicable to requests for data and information made on or after April 21, 1987. Thus, we are proposing to revise § 476.133 to include a requirement that a PRO must disclose to Federal and State agencies, licensing, certification, and national accreditation bodies acting in accordance with section 1865 of the Act information that displays practice or performance patterns of a practitioner or provider that relate to possible patterns of substandard care. (Under section 1865 of the Act, a provider may be deemed to meet certification requirements for participation in Medicare if the provider is accredited as a hospital by the Joint Commission on Accreditation of Healthcare Organizations.) Currently, PROs are only required to disclose this information to licensing and certification bodies, not accreditation bodies.

13. Section 1160(a)(2) of the Act prohibits disclosure of confidential PRO information except as provided for in regulations in order to ensure adequate protection of the rights and interests of patients, health care practitioners, or providers of health care. Currently, regulations set forth in Part 476 do not provide for the release of confidential PRO information to Veteran's Administration (VA) hospitals or to the PRO's VA counterpart (VA MEDIPRO). However, occasionally, a PRO's review of services provided to Medicare beneficiaries in civilian hospitals indicate that substandard care may have been provided in a VA hospital. Under our current regulations, this information cannot be provided to the VA and as a result, cases or patterns of substandard care may go uncorrected.

Section 476.138 provides for the release of confidential PRO information for specified purposes, which includes disclosure to licensing and certification bodies, disclosure to the courts, and disclosure to State and local public health officials when necessary to protect the public health. We are proposing to revise § 476.138 to permit PROs to disclose confidential information regarding practice or performance patterns of a VA hospital or practitioner in a VA hospital to their VA counterpart (VA MEDIPRO). However, this information would be releasable only to the extent that the information is necessary in order to carry out a function within the jurisdiction of the VA MEDIPRO.

In a final report issued by the Office of the Inspector General (OIG) entitled "Medicaid Licensure and Discipline: An Overview, Report No. — P-01-8600064," dated June 6, 1986, the OIG recommended that § 416.138 of our regulations be revised to require PROs to disclose to licensing and certification bodies confidential information involving patterns of care. The OIG has informed us that, at a minimum, "confidential information involving patterns of care" would include a copy of the PRO sanction report that was forwarded to the OIG (see § 1004.70).

Currently, PROs are required to disclose confidential information to licensing and certification bodies only upon request. (PROs may currently disclose this information without a request.) We request public comment as to whether additional information releases to licensing and certification bodies should be mandatory or whether each body should work directly with its PRO to request additional confidential information.

We would also provide in § 476.138 that a PRO may without a request, and must upon request, disclose confidential information relating to a specific case or to a possible pattern of substandard care to State or Federal licensing bodies responsible for the professional licensure of practitioners or institutions and to national accreditation bodies acting in accordance with section 1865 of the Act. Confidential information, including PRO medical necessity and quality of care determinations must be disclosed by the PRO but only to the extent that this confidential information is required by an agency to carry out a function within the jurisdiction of the agency in accordance with Federal or State law. We are proposing to require PROs to disclose, with or without a request, a copy of a PRO sanction report forwarded to OIG in accordance with § 1004.70 to any State of Federal licensing body or national accreditation body if the report concerns practitioners or institutions under the jurisdiction of that body.

14. Currently, under § 476.140, PROs must disclose quality review study information onsite (that is, on the PRO's premises) and may disclose quality review study information offsite (that is, away from the PROs premises) to institutions and practitioners so long as the information disclosed is limited to that institution or practitioner. Because we believe that practitioners and institutions whose practice patterns need to be corrected should be informed as quickly as possible of quality review study information in order to expedite corrective action, we would revise § 476.140 to require PROs to disclose quality review information offsite if requested.

III. Regulatory Impact Statement

Executive Order (E.O.) requires us to prepare and publish an initial regulatory impact analysis for any proposed regulation that meets one of the E.O. criteria for a "major rule"; that is, that would be likely to result in—

- An annual effect on the economy of $100 million or more;
- A major increase in costs or prices for consumers, individual industries, Federal, State, or local government agencies, or geographic regions; or
- Significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-

based enterprises in domestic or export markets.

In addition, we generally prepare an initial regulatory flexibility analysis that is consistent with the Regulatory Flexibility Act (RFA) (5 U.S.C. 601 through 612), unless the Secretary certifies that a proposed regulation would not have a significant economic impact on a substantial number of small entities. Also, section 1102(b) of the Act requires the Secretary to prepare a regulatory impact analysis if this proposed rule may have a significant impact on the operations of a substantial number of small rural hospitals. Such an analysis also must conform to the provisions of section 603 of the RFA.

Since PROs are our contractors, they are not among the types of entities to which the RFA is primarily intended to apply. Nonetheless, when a rule would have a substantial effect on them, it is our practice to treat all PROs as small entities.

We consider hospitals subject to the prospective payment system to be small entities. We are proposing to pay for hospitals' photocopying and mailing costs of records for offsite review. We anticipate that these costs would result in less than $10 million yearly in hospital revenue.

The other changes described in this proposed rule would merely conform the regulations to the law or consist of technical changes that we would make to the regulations to encompass necessary changes as a result of program experience. Therefore, we have determined that a regulatory impact analysis is not required. Also, we have determined, and the Secretary certifies that this proposed rule would not have a significant economic impact on a substantial number of small entities and would not have a significant impact on the operations of a substantial number of small rural hospitals. We have, therefore, not prepared a regulatory flexibility analysis.

IV. Other Required Information

A. Paperwork Reduction Act

Sections 466.78 (a) and (b) and 466.94 (a) and (d) of this proposed rule contain revisions to information collection requirements that have been approved under control numbers 0938–0445 by the Office of Management and Budget (OMB) under the Paperwork Reduction Act of 1980 (44 U.S.C. 3507).

Sections 434.53(b), 476.138(a), 476.140(a) and 489.20(f) of this proposed rule contain new or revised information collection requirements that are subject to approval by OMB. We will submit an information collection request to OMB for approval of these requirements as required by 44 U.S.C. 3507. Organizations and individuals desiring to submit comments on these information collection requirements should direct them to the agency official designated for this purpose whose name appears in this preamble, and to the Office of Information and Regulatory Affairs at the following address: Office of Information and Regulatory Affairs, OMB, Room 3208 New Executive Office Building, Washington, DC 20503, Attn: HCFA Desk Officer.

B. Public Comments

Because of the large number of pieces of correspondence we normally receive on a proposed rule, we are not able to acknowledge or respond to them all individually. However, in preparing a final rule, we will consider all comments contained in correspondence that we receive by the date specified in the "DATES" section of this preamble, and we will respond to the comments in the preamble of that rule.

List of Subjects

42 CFR Part 405

Administrative practice and procedure, Health facilities, Health professions, Kidney diseases, Laboratories, Medicare, Nursing homes, Reporting and recordkeeping requirements, Rural areas, X-rays.

42 CFR Part 431

Grant programs-health, Health facilities, Medicaid, Reporting and recordkeeping requirements.

42 CFR Part 433

Administrative practice and procedure, Claims, Grant programs-health, Medicaid, Reporting and recordkeeping requirements.

42 CFR Part 434

Grant programs-health, Health Maintenance Organizations (HMO), Medicaid, Reporting and recordkeeping requirements.

42 CFR Part 456

Administrative practice and procedure, Grant programs-health, Health facilities, Medicaid, Reporting and recordkeeping requirements.

42 CFR Part 462

Grant programs-health, Health care, Health professions, Peer review organizations.

42 CFR Part 466

Grant programs-health, Health care, Health facilities, Health professions, Peer review organizations.

42 CFR Part 473

Administrative practice and procedure, Health care, Health professions, Peer review organizations.

42 CFR Part 476

Health care, Health professions, Health records, Peer Review Organizations, Penalties, Privacy.

42 CFR Part 489

Health facilities, Medicare.

Health Care Financing Administration, Department of Health, and Human Services

42 CFR Chapter IV would be amended as set forth below:

PART 405—FEDERAL HEALTH INSURANCE FOR THE AGED AND DISABLED

A. Part 405, Subpart C is amended as follows:

Subpart C—Exclusions, Recovery of Overpayment, Liability of a Certifying Officer and Suspension of Payment

1. The authority citation for Subpart C continues to read as follows:

Authority: Secs. 1102, 1815, 1833, 1842, 1861, 1862, 1866, 1870, 1871, and 1879 of the Social Security Act (42 U.S.C. 1302, 1395g, 1395l, 1395u, 1395x, 1395y, 1395cc, 1395gg, 1395hh, and 1395pp) and 31 U.S.C. 3711.

2. In § 405.310, the introductory text is republished and a new paragraph (n) is added to read as follows:

§ 405.310 Particular services excluded from coverage.

The following services are excluded from coverage.

* * * * *

(n) Services of assistants at surgery during cataract operations unless the use of such an assistant is authorized, before the surgery is performed, by the appropriate PRO (under Part B of title XI of the Act) or by the appropriate carrier under section 1842 of the Act because the use of an assistant is necessary based on the existence of a complicating medical condition.

B. Part 431, Subpart M is amended as follows:

PART 431—STATE ORGANIZATION AND GENERAL ADMINISTRATION

Subpart M—Relations with Other Agencies

1. The authority citation for Part 431 continues to read as follows:

Authority: Sec. 1102 of the Social Security Act (42 U.S.C. 1302).

2. In § 431.630, paragraph (a) is revised to read as follows:

§ 431.630 Coordination of Medicaid with PROs.

(a) The State plan may provide for the review of the Medicaid services (including quality review functions described in section 1902(a)(30(C) of the Act) through a contract with a PRO designated under Part 462 of this chapter. Medicaid requirements for medical and utilization review are deemed to be met for those services or providers subject to review under the contract.

* * * * *

PART 433—STATE FISCAL ADMINISTRATION

C. Part 433, Subpart A is amended as follows:

Subpart A—Federal Matching Provisions

1. The authority citation for Part 433 continues to read as follows:

Authority: Sec. 1102 of the Social Security Act (42 U.S.C. 1302).

2. In § 433.15, paragraph (b)(6)(i) is revised to read as follows:

§ 433.15 Rates of FFP for administration.

* * * * *

(b) *Activities and rates.*

* * * * *

(6)(i) Funds expended for the performance of medical, utilization, and quality reviews by a PRO or an entity that meets the requirements of section 1152 of the Act as determined by the Secretary under a contract entered into under section 1902(d) of the Act: 75 percent (section 1903(a)(3)(C) of the Act).

* * * * *

PART 434—CONTRACTS

D. Part 434, Subpart D is amended as follows:

Subpart D—Contracts with HMOs and PHPs: Medicaid Agency Responsibilities

1. The authority citation for Part 434 continues to read as follows:

Authority: Sec. 1102 of the Social Security Act (42 U.S.C. 1302).

2. Section 434.53 is revised to read as follows:

§ 434.53 Periodic medical audits.

(a) The agency must provide for an annual review of the quality of services furnished to enrolled recipients in each HMO that provides services under section 1903(m) of the Act. The review must apply to Medicaid payments made for calendar quarters beginning on or after July 1, 1987. The agency must provide for an independent, external review (that is, a review that is not conducted by the State or an HMO) through a contract with—

(1) A PRO or an entity that meets the requirements of section 1152 of the Act, as determined by the Secretary (that is, organizations that have a contract to review HMO and CMP services as provided in accordance with section 1154(a)(4)(C) of the Act); or

(2) A private accreditation body such as the Accreditation Association for Ambulatory Health Care, the Joint Commission on Accreditation of Healthcare Organizations, or other national accreditation body recognized by the Secretary as providing reasonable assurance that the requirements of paragraph (b) of this section are met.

(b) The contract referred to in paragraph (a) of this section must—

(1) Meet the general requirements for all contracts as described in § 434.6(a);

(2) Include a monitoring and evaluation plan in order for the State to ensure satisfactory contractor performance;

(3) Ensure that the review activities performed by the contractor are not inconsistent with PRO review activities for medicare services, and include a description of whether and to what extent contractor determinations are considered conclusive for Medicaid payment purposes; and

(4) Provide that the results of the review be made available to the State, and upon request to Federal officials as permitted under section 1902(a)(30)(C) of the Act.

E. Part 456 is amended as follows:

PART 456—UTILIZATION CONTROL

1. The authority citation for Part 456 continues to read as follows:

Authority: Sec. 1102 of the Social Security Act (42 U.S.C. 1302), unless otherwise noted.

Subpart A—General Provisions

2. In Subpart A, § 456.2, the introductory text of paragraph (b) and paragraph (b)(2) are revised to read as follows:

§ 456.2 State plan requirements.

* * * * *

(b) These requirements may be met by the agency by—

* * * * *

(2) Deeming of medical and utilization review requirements if the agency contracts with a PRO or an entity that meets the requirements of section 1152 of the Act, as determined by the Secretary to perform that review, (including quality review, functions described in section 1902(a)(30)(C) of the Act) which in the case of inpatient acute care review will also serve as the initial determination for PRO medical necessity and appropriateness review for patients who are dually entitled to benefits under Medicare and Medicaid.

* * * * *

3. Subpart J is amended to read as follows:

Subpart J—Penalty for Failure to Make a Satisfactory Showing of an Effective Institutional Utilization Control Program

a. The authority citation for Subpart J continues to read as follows:

Authority: Sec. 1102 and 1903(g) of the Social Security Act (42 U.S.C. 1302 and 1396b(g)).

§ 456.650 [Amended]

b. In § 456.650, the introductory text of paragraph (c) is republished and paragraph (c)(2) is revised to read as follows:

* * * * *

(c) *Scope.*

The reductions required by this subpart do not apply to—

* * * * *

(2) Facilities in which a PRO or an entity that meets the requirements of section 1152 of the Act, as determined by the Secretary is performing medical and utilization reviews (including quality review functions described in section 1902(a)(30)(C) of the Act) under contract with the Medicaid agency in accordance with § 431.630 of this chapter.

F. Part 462 is amended as follows:

PART 462—PEER REVIEW ORGANIZATIONS

1. The authority citation for Part 462 continues to read as follows:

Authority: Secs. 1102, 1152, and 1153 of the Social Security Act (42 U.S.C. 1302, 1320c–1 and 1320–2).

VOL
53

51
MR
16
1988
UMI

Subpart C—Utilization and Quality Control Peer Review Organizations

2. Section 462.101 is revised to read as follows:

§ 462.101 Eligibility requirements for PRO contracts.

In order to be eligible for a PRO contract, an organization must—

(a) Be either a physician-sponsored organization as described in § 462.102; or a physician-access organization as described in § 462.103;

(b) Demonstrate its ability to perform review functions as described in § 462.104; and

(c) Have at least one consumer representative on its governing board. The consumer representative must be a Medicare beneficiary who is not—

(1) A practicing or retired physician; or

(2) A current governing board member, officer, partner, part owner holding five percent or more ownership, or a managing employee of a health care facility or association of health care facilities.

3. Section 462.102 is revised to read as follows:

§ 462.102 Eligibility of physician-sponsored organizations.

(a) *Eligibility.* To be eligible for designation as a physician-sponsored PRO, an organization must—

(1) Be composed of a substantial number of licensed doctors of medicine and osteopathy who are practicing medicine in the review area;

(2) Be composed of physicians who are representative of the physicians practicing in the area; and

(3) Not be a health care facility, health care facility association, or health care facility affiliate, as specified in § 462.105.

(b) *Substantial number requirement.* In order to meet the requirements of paragraph (a)(1) of this section, an organization must state and have documentation in its files showing that it is composed of at least 10 percent of the licensed doctors of medicine and osteopathy practicing medicine or surgery in the review area.

(c) *Representation requirement.* In order to meet the requirements of paragraph (a)(2) of this section, an organization must—

(1) State and have documentation in its files demonstrating that it is composed of at least 20 percent of the licensed doctors of medicine and osteopathy practicing medicine or surgery in the review area; or

(2) If the organization is not composed of at least 20 percent of the licensed doctors of medicine and osteopathy practicing medicine or surgery in the review area, then the organization must demonstrate in its contract proposal, through letters of support from physicians or physician organizations, or through other means, that it is representative of the area physicians.

(d) *Evaluation points.* Organizations that meet the requirements in paragraphs (a) (1) and (2) of this section will receive, during the contract evaluation process, a set number of bonus points.

4. The content of § 462.106 is designated as paragraph (a) and a new paragraph (b) is added to read as follows:

§ 462.106 Prohibition against contracting with payor organizations.

* * * * *

(b) Effective April 7, 1986, an organization is eligible to be a PRO even though it has more than one member who is also serving on the Board of Directors of an HMO.

* * * * *

5. In § 462.107, the introductory text is republished and paragraph (a) is revised to read as follows:

§ 462.107 PRO contract award.

HFCA, in awarding PRO contracts, will take the following actions—

(a) Identify from among all proposals submitted in response to an RFP for a given PRO area all proposals submitted by organizations that meet the requirements of § 462.101(c) and either § 462.102 or § 462.103;

* * * * *

G. Part 466, Subpart C is amended as follows:

PART 466—UTILIZATION AND QUALITY CONTROL REVIEW

1. The authority citation for Part 466 continues to read as follows:

Authority: Secs. 1102, 1154, and 1871 of the Social Security Act (42 U.S.C. 1302, 1320c-3 and 1395hh).

Subpart C—Review Responsibilities of Utilization And Quality Control Peer Review Organizations (PROs)

2. In § 466.71, the introductory text of paragraph (a) is republished; paragraphs (a)(7) and (a)(8) are revised; paragraph (a)(9) is added; and a new paragraph (b) is revised to read as follows:

§ 466.71 PRO review requirements.

(a) *Scope of PRO review.* In its review, the PRO must determine (in accordance with the terms of its contract)—

* * * * *

(7) The medical necessity, reasonableness and appropriateness of inpatient hospital care for which additional payment is sought under the outlier provisions of §§ 412.82 and 412.84 of this chapter.

(8) Whether a hospital has misrepresented admission or discharge information or has taken an action that results in—

(i) The unnecessary admission of an individual entitled to benefits under Part A;

(ii) Unnecessary multiple admissions of an individual; or

(iii) Other inappropriate medical or other practices with respect to beneficiaries or billing for services furnished to beneficiaries; and

(9) Whether payments should be made for the services of assistants at cataract surgery because the patient has a complicating medical condition.

(b) *Payment determinations.* On the basis of the review specified under paragraphs (a) (1), (2), (3), (6), (7), (8) and (9) of this section, the PRO must determine whether payment may be made for these services. A PRO may grant a period of not more than two days (grace days) for the purpose of arranging postdischarge care when the provider did not know or could not reasonably be expected to have known that payment for the service(s) would not be made under the Medicare program as specified in § 405.330(b) of this chapter.

* * * * *

3. Section 466.76 is revised to read as follows:

§ 466.76 Cooperation with health care facilities.

Before implementation of review, a PRO must make a good faith effort to discuss the PRO's administrative and review procedures with health care facilities and physicians in the area.

4. In § 466.78, paragraph (a) is revised; the introductory text of paragraph (b) and paragraphs (b)(2) and (b)(4) are revised; and a new paragraph (c) is added to read as follows:

§ 466.78 Responsibilities of health care facilities.

(a) *Written agreements with a PRO.*

(1) Beginning November 15, 1984, every hospital seeking payment for services provided to Medicare beneficiaries must maintain a written agreement with a PRO operating in the area in which the hospital is located. These agreements must provide for the PRO review specified in § 466.71(a).

(2) Beginning April 1, 1987, each HMO and CMP with a risk contract that is seeking payment for services provided to Medicare beneficiaries must maintain a written agreement with the PRO operating in the area in which the HMO or CMP is located. A written agreement need not be maintained if a non-PRO organization has a contract with Medicare to review HMOs and CMPs as provided for in section 1154(a)(4)(C) of the Act.

(3) Beginning October 1, 1987, each SNF and HHA seeking payment for services provided to Medicare beneficiaries must maintain a written agreement with the PRO operating in the area in which the HHA or SNF is located.

(b) *Cooperation with PROs.* Health care facilities that submit Medicare claims must cooperate in the assumption and conduct of PRO review. Facilities must meet the following requirements:

* * * * *

(2) Provide patient care data and other pertinent data to the PRO at the time the PRO is collecting review information that is required for the PRO to make its determinations. When review is performed away from the facility, the facility must photocopy and deliver to the PRO, all required information within 30 days of a request. PROs will reimburse hospitals paid under the prospective payment system for the costs of photocopying and postage relating to reviews performed away from the hospital in accordance with a prenegotiated payment rate and the methodology described in paragraph (c) of this section. When the PRO does post-admission, preprocedure review, the facility must provide the necessary information before the procedure is performed, unless it must be performed on an emergency basis.

* * * * *

(4) When the facility has issued a written determination in accordance with § 405.334 or 412.42(c)(3) of this chapter that a beneficiary does not require, or no longer requires inpatient hospital care, it must submit a copy of its determination to the PRO within three working days.

* * * * *

(c) *Photocopying reimbursement methodology for prospective payment system hospitals.* (1) Hospitals subject to the prospective payment system are paid for their photocopying costs that are directly attributable to the hospitals' responsibility to PROs requiring the photocopying of hospital records for offsite review. The payment is based on a fixed amount per page as determined by HCFA in accordance with the methodology described in paragraph (c)(2) of this section.

(2) The fixed amount per page for photocopying costs is determined as follows:

(i) *Step one.* HCFA adds the average costs of photocopy equipment rental, supplies, salary of a photocopy machine operator, and the costs of fringe benefits as determined in accordance with the principles set forth in OMB Circular A–76.

(ii) *Step two.* The amount determined in step one is divided by the number of pages copied by the average photocopying machine annually.

5. The content of § 466.83 is designated as paragraph (a) and a new paragraph (b) is added to read as follows:

§ 466.83 Initial denial determinations.

* * * * *

(b) A determination by a PRO that a hospital has taken an action that results in the unnecessary admission or multiple admissions of an individual entitled to benefits under Medicare Part A, and such action has had the effect of circumventing the prospective payment system then, the determination will be considered an initial denial determination which is appealable under Part 405, Subpart G of this chapter.

6. In § 466.93, the introductory text is republished, paragraphs (a) and (b) are revised, and a new paragraph (c) is added to read as follows:

§ 466.93 Opportunity to discuss proposed initial denial determination and changes as a result of a DRG validation.

Before a PRO reaches an initial denial determination or makes a change as a result of a DRG validation, it must—

(a) Promptly notify the provider or supplier and the patient's attending physician (or other attending health care practitioner) of the proposed determination or DRG change;

(b) Afford an opportunity for the physician, or physician representative of the provider (or other attending health care practitioner) to discuss the matter with the PRO physician and to explain the nature of the patient's need for health care services, including all factors that preclude treatment of the patient as an outpatient or in an alternative level of inpatient care; and

(c) Allow other hospital staff to comment on a proposed denial. Nonphysician PRO staff may assist in receiving and considering provider comments.

7. In § 466.94, the introductory text of paragraph (a)(1) is republished, and paragraphs (a)(1)(ii), and (a)(1)(iv), and (d) are revised to read as follows:

§ 466.94 Notice of PRO initial denial determination and changes as a result of a DRG validation.

(a) *Notice of initial denial determination*—(1) *Parties to be notified.* A PRO must provide written notice of an initial denial determination to—

* * * * *

(ii) The attending physician, or other attending health care practitioner, responsible for the services furnishes to the patient;

* * * * *

(iv) The fiscal intermediary or carrier, if the denial requires an action by the intermediary of carrier.

* * * * *

(d) *Notice to payers.* The PRO must provide prompt written notice of an initial denial determination or DRG changes to the intermediary or carrier within the same time periods as the notices to the other parties as provided in paragraph (a)(2) of this section.

* * * * *

8. In § 466.98, paragraph (a) is revised to read as follows:

§ 466.98 Reviewer qualifications and participation.

(a) *Peer review by physician*—(1) *Requirements.* (i) Except as provided in paragraph (a)(2) of this section, each person who makes an initial denial determination about services furnished or proposed to be furnished by a licensed doctor of medicine, osteopathy, or dentistry must—

(A) Be, respectively, a licensed doctor of medicine, osteopathy, or dentistry who practices in a setting similar to that in which the physician whose services are under review practices; and

(B) Maintain active staff privileges in one or more hospitals in the PRO area.

(ii) For purposes of this paragraph (a), individuals authorized to practice medicine in American Samoa, the Northern Mariana Islands, and the Trust Territory of the Pacific Islands as "medical officers" may only make determinations on care ordered or furnished by their peers. Medical Officers may not make determinations on care ordered or furnished by licensed doctors of medicine, osteopathy, or dentistry.

(2) *Exception.* If a PRO determines that no appropriate physician reviewer as described in paragraph (a)(1) of this section is available to make initial denial determinations, then a doctor of medicine or osteopathy may make denial determinations for services

BEST COPY AVAILABLE

ordered or performed by a doctor in any of the three specialties.

* * * * *

9. In § 466.100, paragraphs (a) and (b) and the introductory text of paragraph (d) are revised to read as follows:

§ 466.100 Use of norms and criteria.

(a) *Use of norms.* As specified in its contract, a PRO must use national, or where appropriate, regional norms in conducting review to achieve PRO contract objectives.

(b) *Use of criteria.* PRO health care professionals (nonphysicians) must use criteria to screen cases for medical necessity, appropriateness, and quality and refer questionable cases to a PRO physician for a determination. In assessing the need for and appropriateness and quality of care of an inpatient health care facility stay, a PRO must apply criteria to determine the following:

(1) The necessity for facility admission and continued stay (in cases of day outliers in hospitals under prospective payment).

(2) The necessity for surgery and other invasive diagnostic and therapeutic procedures.

(3) The appropriateness of providing services at a particular health care facility or at a particular level of care. The PRO must determine whether the beneficiary requires the level of care received or whether a lower and less costly level of care would be equally effective.

(4) The quality of care furnished.

* * * * *

(d) *Variant criteria.* A PRO may establish specific criteria to be applied to certain locations and facilities in the PRO area if the PRO determines that—

* * * * *

H. Part 473, Subpart B is amended as follows:

PART 473—RECONSIDERATIONS AND APPEALS

Subpart B—Utilization and Quality Control Peer Review Organization (PRO) Reconsiderations and Appeals

1. The authority citation for Part 473 continues to read as follows:

Authority: Secs. 1102, 1154, 1155, 1866, 1871, and 1879 of the Social Security Act (42 U.S.C. 1302, 1320c–3, 1320c–4, 1395cc, 1395hh, and 1395pp).

2. In § 473.14, a new paragraph (c)(3) is added to read as follows:

§ 473.14 Applicability.

* * * * *

(c) *Nonapplicability of rules to related determinations.*

* * * * *

(3) Determinations made under § 466.83(b) of this chapter are made in accordance with section 1866(f)(2)(A) of the Act, and appeals of these determinations are governed by the reconsideration and appeal procedures described in Part 405, Subpart G of this chapter. References in that subpart to initial and reconsider determinations made by an intermediary, carrier, or HCFA include initial and reconsidered determinations made by a PRO.

3. In § 473.15, paragraphs (a) (1) and (b) are revised to read as follows:

§ 473.15 PRO review of changes resulting from DRG validation.

(a) *General rules.* (1) A provider or practitioner dissatisfied with a change to the diagnostic or procedural coding information made by a PRO as a result of DRG validation under section 1866(a)(1)(F) of the Act is entitled to a review of the change if the change—

(i) Caused an assignment of a different DRG; and

(ii) Resulted in a higher or lower payment.

* * * * *

(b) *Procedures.* Procedures described in § 413.18(b) of this chapter and §§ 473.20, 473.22, 473.24, 473.26, 473.28, 473.30, 473.32(b), 473.34, 473.36, and 473.48 (a) and (c) for a PRO reconsideration or reopening also apply to PRO review of a DRG coding change.

* * * * *

§ 473.18 [Amended]

4. In § 473.18, paragraph (a)(3) is removed.

5. In § 473.28, the introductory text is republished and paragraph (c) is revised to read as follows:

§ 473.28 Qualifications of a reconsideration reviewer.

A reconsideration reviewer must be someone who is—

* * * * *

(c) A board-certified or board-eligible (that is, eligible to take the boards) specialist in the type of services under review, except where meeting this requirement would compromise the effectiveness or efficiency of PRO review.

6. In § 473.32, the introductory text of paragraph (a) is revised, the introductory text of paragraph (a)(1) is republished, and paragraph (a)(1)(ii) is revised to read as follows:

§ 473.32 Time limits for issuance of the reconsidered determination.

(a) *Beneficiaries.* If a beneficiary files a timely request for reconsideration of an initial denial determination, the PRO must complete its reconsidered determination and send written notice to the beneficiary within the following time limits:

(1) Within three working days after the PRO receives the request for reconsideration if—

* * * * *

(ii) The initial determination relates to procedures performed by a facility, or to institutional services for which admission to the institution is sought; the initial determination was made before the procedures were performed or before the patient was admitted to the institution; and a request was submitted timely for an expedited reconsideration.

* * * * *

I. Part 476, Subpart B is amended as follows:

PART 476—ACQUISITION, PROTECTION, AND DISCLOSURE OF PEER REVIEW INFORMATION

Subpart B—Utilization and Quality Control Peer Review Organization (PROs)

1. The authority citation for Part 476 continues to read as follows:

Authority: Secs. 1102, 1154(a), 1156(a) and 1160 of the Social Security Act (42 U.S.C. 1302, 1320c–3(a), 1320c–5(a), and 1320c–9).

2. In § 476.133, the introductory text of paragraph (a) is republished and paragraph (a)(2)(ii) is revised to read as follows:

§ 476.133 Disclosure of information about practitioners, reviewers and institutions.

(a) *General requirements for disclosure.* Except as specified in paragraph (b) of this section, the following provisions are required of the PRO.

* * * * *

(2) *Disclosure to others.* (ii) Effective April 21, 1987, in accordance with section 1160 of the Act and the procedures for disclosures specified in §§ 476.137 and 476.138, a PRO must disclose information, upon request, that displays practice or performance patterns of a practitioner or institution to the following:

(A) Federal and State agencies that are responsible for the investigation of fraud and abuse in connection with the Medicare or Medicaid programs.

(B) Federal and State agencies that are responsible for licensing and

certification of practitioners and providers and national accreditation bodies acting in accordance with section 1865 of the Act.

* * * * *

3. In § 476.138, the introductory text of paragraph (a) is republished, paragraph (a)(1) is revised, and a new paragraph (a)(4) is added to read as follows:

§ 476.138 Disclosure for other specified purposes.

(a) *General requirements for disclosure.* Except as specified in paragraph (b) of this section, the following provisions are required of the PRO.

(1) *Disclosures to licensing and certification bodies.* (i) A PRO may, without a request, and must, upon request, disclose to State and Federal licensing bodies responsible for the professional licensure of practitioners or providers and to national accreditation bodies acting in accordance with section 1865 of the Act, confidential information relating to a specific case of a possible pattern of substandard care. Confidential information, including PRO medical necessity and quality of care determinations, must be disclosed by the PRO but only to the extent that it is required by an agency to carry out a function within the jurisdiction of the agency in accordance with Federal or State law.

(ii) With or without a request a PRO must provide a copy of any PRO sanction report forwarded to the Office of Inspector General in accordance with Section 1004.70 of this title to any State or Federal licensing body of national accreditation body if the report concerns practitioners or institutions that are subject to the jurisdiction of that body.

* * * * *

(4) *Disclosure to the Veteran's Administration counterpart (VA MEDIPRO).* A PRO must disclose confidential information upon request, and may without a request, to its counterpart in the Veterans Administration (VA MEDIPRO). Confidential information, including medical necessity and quality of care determinations, may only be disclosed to the extent that the information displays practice or performance patterns of a VA hospital or practitioner in a VA hospital, and only to the extent that the information is required to carry out a function within the jurisdiction of the VA MEDIPRO.

* * * * *

4. In § 476.140, the introductory text of paragraph (a) is revised, paragraph (a)(1) is amended by replacing the semicolon at the end of the paragraph with a period, paragraph (a)(2) is revised, paragraph (c) is deleted, and paragraphs (d) and (e) are redesignated and revised as paragraphs (c) and (d), respectively, to read as follows:

§ 476.140 Disclosure of quality review study information.

(a) A PRO must disclose, onsite, quality review study information with identifiers of patients, practitioners or institutions to the following:

* * * * *

(2) An institution or practitioner, if the information is limited to health care services furnished by the institution or practitioner. The PRO must upon request and may without a request disclose this information offsite.

* * * * *

(c) An institution or group of practitioners may redisclose quality review study information, if the information is limited to health care services they provided.

(d) Quality review study information with patient identifiers is not subject to subpoena or discovery in a civil action, including an administrative, judicial or arbitration proceeding. This restriction does not apply to HHS, including Inspector General, administrative subpoenas issued in the course of audits and investigations of Department programs, in the course of administrative hearings held under the Social Security Act, or to disclosures to the General Accounting Office as necessary to carry out its statutory responsibilities.

PART 489—PROVIDER AGREEMENTS UNDER MEDICARE

J. Part 489, Subpart B is amended as follows:

1. The authority citation for Part 489 continues to read as follows:

Authority: Secs. 1102, 1861, 1872(h), 1864, 1866, and 1871 of the Social Security Act (42 U.S.C. 1302, 1385x, 1385(h), 1395aa, 1395cc, and 1395hh) and sec. 602(k) of Pub. L. 98–21 (42 U.S.C. 1395ww note).

2. The introductory text of § 489.20 is republished and a new paragraph (f) is added to read as follows:

§ 489.20 Basic commitments.

The provider agrees—

* * * * *

(f) In the case of a SNF or HHA that furnishes services that may be paid for under Medicare, to maintain an agreement with a utilization and quality control peer review organization (if there is one that is operating in the area in which the facility or agency is located and that has a contract with HCFA under Part B of title XI of the Act) for that organization to review information related to SNF or home health services.

BILLING CODE 4120-01-M

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Parts 2, 73, 74 and 78

[Gen. Docket No. 87–552]

Relax the Equipment Authorization Procedures

AGENCY: Federal Communications Commission.

ACTION: Proposed rule.

SUMMARY: The Commission is proposing to amend its rules to relax the equipment authorization procedure required for certain equipment operated in the broadcast and cable television services. This action would change the appropriate procedure form either type acceptance or notification to either notification or verification. The public would realize faster service by the Commission, and would also realize a cost savings from the paperwork reduction stemming from the changes proposed.

DATES: Comments due on or before May 6, 1988 and reply comments on or before May 26, 1988.

ADDRESSES: Federal Communications Commission, Washington, DC 20554.

FOR FURTHER INFORMATION CONTACT: George Harenberg, Technical Standards Branch, Office of Engineering and Technology, (202) 653–7314.

SUPPLEMENTARY INFORMATION: This is a summary of the Commission's Notice of Proposed Rule Making (FCC No. 87–376) relating to the Commission's action adopted on December 1, 1987 and released February 1, 1988.

The full text of the Commission decision is available for inspection and copying during normal business hours in the FCC Dockets Branch (Room 230) 1919 M Street NW., Washington, DC. The complete text of this decision may also be purchased from the

VOL
53

Commission's copy contractor, International Transcription Service, (202) 857-3800, 2100 M Street NW., Suite 140, Washington, DC 20037.

SUMMARY: 1. The Commission is initiating this Notice of Proposed Rule Making in which it is proposed to relax the equipment authorization procedure required for certain equipment used in the broadcast and cable television services. This action will modify the procedures required for operating in the affected services from either type acceptance or notification to either notification or verification. The Commission believe that the equipment marketed for use in these services has a satisfactory record of compliance with the technical standards set forth in the Rules, and that continued regulatory oversight can therefore be relaxed.

2. The Commission is proposing to place Parts 74 and 78 microwave transmitters, and all Part 73 transmitting equipment except for equipment associated with the Emergency Broadcast Service, now currently subject to either the type acceptance or notification procedures, under the verification procedure. Additionally, transmitters operated in frequency bands below 900 MHz which are currently subject to type acceptance are proposed to be placed under the notification procedure rather than verification. It is believed that these devices have a higher potential for causing interference due to non-directional transmission characteristics, the degree of congestion currently existing in many of the frequency bands employed for these services, and the extensive number of receivers employed by consumers on many of these bands, coupled with the significant degree of equipment being developed for operation within many of the frequency bands allocated for low power auxiliary stations.

3. We also invite comments as to whether or not it would be appropriate to include FM broadcast boosters, FM translators, TV translators, and UHF translator boosters under the verification procedure as well. That procedure may be applicable since these devices are produced and operated in limited quantities and are employed at fixed locations, making interference sources easier to locate.

4. In order to incorporate the above proposals into the regulations, changes to Part 2, 73, 74 and 78 of the Rules are required. The changes to these rule parts would entail changes only to the reference specifying the required level of equipment authorization.

5. This is a non-restricted notice and comment rule making proceeding. *See* §1.1231 of the Commission's rules, 47 CFR 1.1231 for rules governing permissible *ex parte* contracts.

Initial Regulatory Flexibility Analysis

Pursuant to the Regulatory Flexibility Act of 1980, 5 U.S.C. section 605, it is certified that the proposed rules will not, if promulgated, have a significant economic impact on a substantial number of small entities because it relaxes the Commission's rules and reduces the Commission's application burden.

Comments

Pursuant to applicable procedures set forth in §§1.415 and 1.419 of the Commission's rules, 47 CFR 1.415 and 1.419, interested parties may file comments on or before May 6, 1988, and reply comments on or before May 26, 1988. All relevant and timely comments will be considered by the Commission before final action is taken in this proceeding.

H. Walker Feaster III,
Acting Secretary.

BILLING CODE 6712-01-M

DEPARTMENT OF TRANSPORTATION

National Highway Traffic Safety Administration

49 CFR Part 531

[Docket No. FE-88-01; NO1]

Passenger Automobile Average Fuel Economy Standards; Request for Comments

AGENCY: National Highway Traffic Safety Administration (NHTSA), DOT.

ACTION: Notice of receipt of petition; request for comments.

SUMMARY: On February 12, 1988, the agency received a petition from the Automobile Importers of America to reduce the corporate average fuel economy standards for passenger cars for model years (MY's) 1989 and 1990. The standards currently are set for these years at 27.5 mpg, and AIA requests that they be lowered to 26.0 mpg. To aid in its determination whether or not to grant the petition, the agency seeks information from manufacturers on their efforts at meeting the CAFE standards, their product plans, and projected estimated CAFE levels. This document requests answers to a list of questions, as well as data on several areas of vehicle specifications.

DATE: Written comments on this notice must be submitted by April 11, 1988.

ADDRESSES: Comments on this notice must refer to the docket and notice number set forth above and be submitted (preferably 10 copies) to the Docket Section, National Highway Traffic Safety Administration, Room 5109, 400 Seventh Street SW., Washington, DC 20590. Submissions containing information for which confidential treatment is requested should be submitted (3 copies) to the Chief Counsel, NHTSA, DOT, Room 5219, 400 Seventh Street SW., Washington, DC 20590; in addition, 7 copies from which the purportedly confidential information has been deleted should be sent to the Docket Section, at the previously indicated address.

FOR FURTHER INFORMATION CONTACT: Mr. Orron Kee, Office of Market Incentives, National Highway Traffic and Safety Administration, 400 Seventh Street SW., Washington, DC 20590 (202) 366-0846.

SUPPLEMENTARY INFORMATION: On February 12, 1988, the Automobile Importers of America, Inc. (AIA) submitted a petition to reduce the passenger car corporate average fuel economy (CAFE) standards from 27.5 mpg to 26.0 mpg for MY 1989 and 1990. (Docket No. PRM-FE-11) AIA represents 19 foreign automobile manufacturers who import all or a portion of their product lines into the United States for sale to American consumers. Members include such manufacturers as BMW, Isuzu, Mazda, Peugeot, Saab, Toyota, and Yugo. On March 1, 1988, AIA member Volvo submitted a letter and data in support of the AIA petition. (Docket No. PRM-FE-13).

If the agency were to lower the current MY 1989 CAFE stadard of 27.5 mpg, it would have to do so within the time remaining before the beginning of the model year, which is in the Fall of 1988. Accordingly, the agency wishes to move expeditiously in a determination of whether to grant or deny this petition. To assist it in evaluating the issues raised in AIA's petition, the agency seeks information from manufacturers concerning its efforts at compliance with the MY 1989 and 1990 CAFE standards, as well as specific information on its product plans and marketing efforts. The agency requests that anyone interested in this petition submit information as requested in this document no later than April 11, 1988.

Any request for confidentiality must comply with the agency's regulations on

confidentiality, found at 49 CFR Part 512, including a cover letter which sets out the specific basis for the claim of confidentiality. As noted in the "ADDRESSES" section of this preamble, the information submitted under a calim of confidential treatment must be accompanied by public versions of the same material, which is submitted directly to docket.

The information sought by the agency is presented in two parts. Part A asks about a manufacturer's efforts at and estimates of achieving the currently prescribed CAFE level of 27.5 mpg. This includes such information as actions taken to meet the standards, changes in product plans, projected CAFE levels for MY 1989–1990, as well as the impact of uncertainties facing manufacturers and the effect of other Federal standards. Part B requests more specific data concerning a manufacturer's fleet(s), models, and identified technological features and specifications for MY 1988–1990.

Part A

1. What are your current CAFE projections for MY 1989–90? Describe the uncertainties affecting your capabilities during this time period, the effect of each uncertainty on your CAFE during this period, and how these uncertainties should be considered in possibly amending fuel economy standards. Also, include your response answers to the questions addressed in Part B. Charts are provided as examples of a format for this information.

2. Provide a quantitative analysis of the impact on your company, including economic, competitive, and financial consequences, if the current standards remain at 27.5 mph.

3. What are the potential impacts of other Federal standards on your CAFE levels for these two model years? Please include the type of standard (safety, emissions, etc.).

4. Provide a description of any changes in your product plans during MY 1986, 1987, and 1988 which increased or decreased your fuel economy capability, the reasons for such changes, and the impact of those changes on your CAFE.

5. Provide a description of the specific actions taken to reach a CAFE of 27.5 mpg in MY 1989 and beyond, the impact of those actions, and why the original assessment of these actions is no longer valid. Please note that the statute establishing the CAFE program, as early as 1975, specified a CAFE standard of 27.5 mpg for these years, thus providing at least 13 years of leadtime.

Part B

I. Definitions

As Used in This Part B

1. The terms "automobile," "fuel economy," "manufacturer," and "model year," have the meaning given them in section 501 of the Motor Vehicle Information and Cost Savings Act, 15 U.S.C. 2001 (the Act).

2. The term "basic engine" has the meaning given in 40 CFR 600.002-80(a)(21). When identifying a basic engine, the commenter should provide the following information:

(i) Engine displacement (in cubic inches).

(ii) Number of cylinders or rotors.

(iii) Cylinder configuration (V, in-line, etc.).

(iv) Number of carburetor barrels, if applicable.

(v) Other engine characteristics, abbreviated as folows:

DD—Direct Injection Diesel
ID—Indirect Injection Diesel
R—Rotary
TB—Throttle Body Fuel Injection S.I. (Spark Ignition)
MP—Multiport Fuel Injection S.I.
TD—Turbocharged Diesel
TS—Turbocharged S.I.
FFS—Feedback Fuel System, carbureted

3. "Commenter" means each manufacturer (including all its divisions) providing answers to the questions set forth in this document, and its officers, employees, agents or servants.

4. "Variants of existing engines" means versions of an existing basic engine that differ from that engine in terms of displacement, method of aspiration, induction system or that weigh at least 25 pounds more or less than that engine.

5. "Percent fuel economy improvement" means that percentage which corresponds to the amount by which respondent could improve the fuel economy of vehicles in a given model of compliance grouping through the application of a specified technology, averaged over all vehicles of that model or in that class which could feasibly use the technology. Projections of percent fuel economy improvement should be based on the assumption of maximum efforts by commenter to achieve the highest possible fuel economy increase through application of the technology, and should be adjusted for constant vehicle utility. The baseline for determination of percent fuel economy improvement is the level of technology and vehicle performance with respect to acceleration and gradeability for commenter's 1988 model year passenger automobiles in the equivalent class.

6. "Percent production implementation rate" means that percentage which corresponds to the maximum number of passenger automobiles of a specified class which could feasibly employ a given type of technology if respondent made maximum efforts to apply the technology by a specified model year.

7. "Possession" means possession, custody or control.

8. "Production percentage" means the percent of commenter's passenger automobilies of a specified model projected to be manufactured in a specified model year.

9. "Project" or "Projection" refers to the best estimates made by respondent, whether or not based on less than certain information.

10. "Relating to" means constituting, defining, containing, explaining, embodying, reflecting, identifying, stating, referring to, dealing with, or in any way pertaining to.

11. "Test weight" is used as defined in 40 CFR 86.082-2.

12. "Transmission Class" is used as defined in 40 CFR 600.002-80(22). When identifying a transmission class, commenter also must indicate whether the transmission is equipped with a lockup torque converter (LUTC), a split torque converter (STC), and/or a wide gear ratio range (WR) and specify the number of forward gears.

13. The term "curb weight," and "passenger-carrying volume" are used as defined in 49 CFR 523.2.

14. "Redesign" means any change, or combination of changes, to a vehicle that would change its weight by 50 pounds or more or change its frontal area by 2 percent or more.

15. "Domestically manufactured" is used as defined in section 503(b)(2)(E) of, the Act.

16. For the purposes of this Part B, a "compliance grouping" of passenger automobiles means a group for which compliance is computed separately (e.g., imported passenge cars or domestically produced passenger cars).

17. For the purposes of this Part B, a "model" of passenger automobile is a line, such as the Chevrolet Camaro or Caprice, etc., which exists within a class. "Model type" is used as defined in 40 CFR 600.002-80.

18. "Carline" is used as defind in 40 CFR 600.002-80.

II. Assumptions

All assumptions concerning emission standards, noise and damageability regulations, safety standards, etc., should be listed and described in detail by the commenter.

III. Specifications

1. Identify all passenger automobile models currently offered for sale whose production you project discontinuing before or during MY 1990 and indentify the last model year in which each will be offered.

2. Identify all basic engines offered by commenter in MY 1988 passenger automobiles which commenter projects ceasing to offer for sale in passenger automobiles before or during MY1990, inclusive, and identify the last model year in which each will be offered.

3. Does the commenter currently project offering for sale any new or re-designed passenger automobiles, including vehicles smaller than those new produced, during any of model years 1988 through 1990? If so, provide the following information for each model (e.g., Chevrolet Nova, Ford Escort). Model types which are essentially identical except for their nameplates (e.g., Dodge Omni/Plymouth Horizon) may be combined into one item. See Table A for a sample format.

a. EPA size class to be offered for sale (e.g., mid-size sedan, small station wagon). Provide passenger-carrying volume and number of seating positions.

b. Description of basic engines, including optional horsepower and torque ratings, if any; displacement, number and configuration of cylinders and type of carburetor or fuel injection system.

c. Transmission type (manual, automatic, number of forward speeds, overdrive, etc., as applicable), including gear ratios and final drive, alternative ratios offered, and driveline configuration.

d. (i) The range of curb weights offered for each body type.

(ii) The range of test weights offered for each body type.

e. The range of projected fuel economies on the EPA composite driving cycle for each body type in the initial model year of production.

f. Projected introduction date (model year).

g. Projected sales for each model year from the projected year of introduction through MY 1990, expressed both as an absolute number of units sold and as a percentage of all passenger automobiles sold by commenter.

h. Indicate if domestically manufactured or imported.

i. Projections of:

(i) Existing models replaced by new models.

(ii) Reduced sales of commenter's existing models, both passenger automobiles and light trucks as a result of the sale of each of the new models.

(iii) New sales not captured from any of the commenter's existing models.

4. Does commenter project introducing any variants of existing basic engines or any new basic engines, other than those mentioned in your response to question 3, in its passenger automobile fleets in MY's 1988 through 1990? If so, for each basic engine or variant indicate:

a. The project year of introduction,

b. Type (e.g., conventional, diesel or stratified charge),

c. Displacement,

d. Type of carburetion or fuel injection,

e. Cylinder configuration (e.g., V–8, V–6, I–4, etc.),

f. Horsepower and torque ratings,

g. Models in which engines are to be used, giving the introduction model year for each model if different from "a," above.

5. For each of the model years 1988 through 1990, and for each passenger automobile model projected to be manufactured by commenter (if answers differ from the various models), provide the requested information ((i) through (vi)) for each of items "a" through "l" listed below:

(i) A description of the nature of the technological improvement;

(ii) The percent fuel economy improvement averaged over the model, if answers vary within the model;

(iii) The basis for your answer to 5(ii), (e.g., data from dynamometer tests conducted by commenter, engineering analysis, computer simulation, reports of test by others);

(iv) The percent production implementation rate and the reasons why a higher implementation rate is not feasible or necessary to comply with 27.5 mpg standard;

(v) A description of the 1988 baseline technologies; and

(vi) The reasons for differing answers you provide to items (ii) and (iv) for different models in each model year. Include as a part of your answer to 5(ii) and 5(iv) a tabular presentation, a sample portion of which is shown in Table B.

a. Improved automatic transmissions. Projections of percent fuel economy improvements should include a description of how the benefits are to be obtained.

b. Improved manual transmissions. Projections of percent fuel economy improvement should include the benefits of increasing mechanical efficiency, using improved transmission lubricants, and other measures (specify).

c. Overdrive transmissions. If not covered in "a" or "b" above, project the percent fuel economy improvement attributable to overdrive transmissions (integral or auxiliary gear boxes), two-speed axles, or other similar devices intended to increase the range of available gear ratios. Describe the devices to be used and the application by model, engine, axle ratio, etc.

d. Use of engine crankcase lubricants of lower viscosity or with additives to improve friction characteristics, accelerate engine break-in, or otherwise improved lubricants to lower engine friction horsepower. When describing the 1988 baseline, specify the viscosity of and any fuel economy-improving additives used in the factory-fill lubricants.

e. Reduction of engine parasitic losses through improvement of engine-driven accessories or accessory drives. Typical engine-driven accessories include water pump, cooling fan, alternator, power steering pump, air conditioning compressor, vacuum pump, and emissons air injection pump.

f. Reduction of tire rolling losses, through changes in inflation pressure, use of materials or constructions with less hysteresis, geometry changes (e.g., increased aspect ratio), reduction in sidewall and tread deflection, and other methods. When describing the 1988 baseline, include a description of the tire types used and the percent usage rate of each type.

g. Reduction in other driveline losses, including losses in the non-powered wheels, the differential assembly, wheel bearings, universal joints, brake drag losses, use of improved lubricants in the differential and wheel bearings, and optimizing suspension geometry (e.g., to minimize tire scrubbing loss).

h. Turbocharging:

i. Improvements in the efficiency of spark ignition engines including (a) increased compression ratio; (b) leaner air-to-fuel ratio; (c) revised combustion chamber configuration; (d) fuel injection; (e) electronic fuel metering; (f) interactive electronic control of engine operating parameters (spark advance, exhaust gas recirculation, air-to-fuel ratio); (g) variable valve timing or valve lift; (h) roller cam followers; (i) reduced piston ring tension; and (j) other methods (specify).

j. Naturally aspirated diesel engines, with direct or indirect fuel injection.

k. Turbocharged diesel engines with direct or indirect fuel injection.

l. Stratified-charge reciprocating or rotary engines, with direct or indirect fuel injection.

6. For each model of commenter's passenger automobile fleet projected to be manufactured in each of MY's 1988 through 1990, describe the methods used to achieve reductions in average test

weight. For each specified model year and model, describe the extent to which each of the following methods for reducing vehicle weight will be used:

a. Substitution of materials.

b. "Downsizing" of existing vehicle design to reduce exterior size while maintaining interior roominess and comfort for passengers, and utility, i.e., the same, or approximately the same, interior volume using the same, basic body configuration and driveline layout as current counterparts.

c. Use of new vehicle body configuration concepts which provide improved weight to interior passenger volume ratio.

7. To the extent commenter projects a CAFE less than 27.5 mpg or suggests the existence of risks which may result in a CAFE of less than 27.5 mph indicate why commenter can't make sufficient additional improvements through the methods listed in items 5 and 6 in the available leadtime.

8. For each model year 1988 through 1990, list all projected passenger automobile model types and provide the information specified in "a" through "l" below for each model type. The information should be in tabular form, with a separate table for each model year. (See Table C for a sample format.) Domestic and non-domestic model types are to be listed separately (identify any model types with less than 75 percent domestic content included in the domestic fleet exemption). Engines having the same displacement but belonging to different engine families are to be grouped separately.

In each model year, begin with the EPA size class having the least interior volume range and continue size class listing from top to bottom in order of classes with increasing interior volume on the left side of the table. Subdivide each size class into specific model types in order of increasing average test weight. List the categories of information in items "a" through "l" below in the order specified from left to right across the top of the table. Include in the table for each model year the total sales-weighted average engine displacement, average N/V, average test weight, average PAU, and harmonic average fuel economy for domestic and non-domestic passenger cars for each EPA size class and for all of the commenter's passenger automobiles.

a. Carline, e.g., 260E, Cavalier. Identify body code designation and representative model name for passenger cars. Model types which are essentially identical except for their nameplates (e.g., Chevrolet Celebrity/Pontiac 6000 may be combined into one line item.

b. EPA size class.

c. Basic engine: Include the engine Characteristics used in Definition 2.

d. Transmission class (e.g., A3, A4, A40D, M5, CVT): Include the characteristics used in Definition 12.

e. Average N/V, rounded to one decimal place.

f. Average equivalent test weight.

g. Average PAU setting: Provide the value and show whether the value (or estimated value) is based on coastdown testing (T) or calculated from the vehicle frontal area (C). Round the PAU value to one decimal place.

h. Composite fuel economy (sales weighted, harmonically averaged over the specified vehicles, rounded to the nearest 0.1 mpg).

i. Type of emission control system.

j. Source of fuel economy figure: T=test or E=estimate.

k. Projected sales for the vehicles described in each line item.

l. EPA interior volume index.

9. Please provide (a) historical and (b) your estimates of projected *total industry* U.S. passenger automobile sales for each model year 1988 through 1990, inclusive. Include your company's projection of total imported car sales during each of these model years. Subdivide these sales into EPA market classes. See Table D for sample format.

10. Please provide your company's assumptions for U.S. gasoline and diesel fuel prices during 1988–1990.

Notices

Federal Register
Vol. 53, No. 51
Wednesday, March 16, 1988

This section of the FEDERAL REGISTER contains documents other than rules or proposed rules that are applicable to the public. Notices of hearings and investigations, committee meetings, agency decisions and rulings, delegations of authority, filing of petitions and applications and agency statements of organization and functions are examples of documents appearing in this section.

ACTION

Information Collection Request Under OMB Review

AGENCY: ACTION.

ACTION: Information collection request under review.

SUMMARY: This notice sets forth certain information about an information collectioin proposal by ACTION, the Federal Domestic Volunteer Agency.

Background

Under the Paperwork Reduction Act (44 U.S.C., Chapter 35), the Office of Management and Budget (OMB) reviews and acts upon proposals to collect information from the public or to impose recordkeeping requirements. ACTION has submitted the information collection proposal described below to OMB. OMB and ACTION will consider comments on the proposed collection of information and recordkeeping requirements. Copies of the proposed forms and supporting documents [requests for clearance (SF 83), supporting statement, instructions, transmittal letter, and other documents] may be obtained from the agency clearance officer.

Need and Use

Project Grant Application: Older American Volunteer Programs—This form is required by ACTION and OMB of all new grant applicants and those requesting annual refunding.

To Obtain Information About or to Submit Comments on This Proposed Information Collection, Please Contact Both:

Melvin E. Beetle, ACTION Clearnace Officer, ACTION, Room M-601, 806 Connecticut Ave., NW, Washington, DC 20525, Tel: (202) 634-9318, and
James Houser, Desk Officer for ACTION, Office of Management and Budget, New Executive Office Bldg., Room 3002, Washington, DC 20503, Tel: (202) 395-7316.

Office of ACTION issuing the Proposal: DO/OAVP.

Title of Form: Project Grant Application: Older American Volunteer Programs.

Type of Request: Revision of currently approved collection.

Frequency of Collection: Annual.

General Description of Respondents: Public and private non-profit organizations.

Estimated Number of Annual Responses: 1100.

Estimated Annual Reporting or Disclosure Burden: 9,900 hours.

Respondent's Obligation to Reply: Required to obtain or retain benefit.

Dated: March 10, 1988.

Melvin E. Beetle,

ACTION Clearance Officer.

[FR Doc. 88-5708 Filed 3-15-88; 8:45 am]

BILLING CODE 8050-28-M

Special Volunteer Programs, Availability of Funds; Demonstration Grants

A. The Program Demonstration and Development Division of ACTION announces the availability of funds during fiscal year 1988 for demonstration grants under the Special Volunteer Programs authorized by the Domestic Volunteer Service Act of 1973, as amended (Pub. L. 93-113, Title I, Part C; 42 U.S.C. 4992).

The purpose of this program is to strengthen and supplement efforts to meet a broad range of needs, particularly those related to human and social concerns such as illicit drug use by youth, by encouraging and enabling persons from all walks of life and from all age groups to perform meaningful and constructive volunteer service in agencies, institutions, and situations where the application of human talent and dedication may help to meet such needs.

Consideration will be limited to innovative proposals using volunteers in one of the following three strategies for preventing the use of illicit drugs by youth:

1. The employment of a state-wide parent network to develop new and/or expand existing local volunteers parent groups.
2. The mobilization and coordination of low-income community parents and youth groups, community organizations, businesses, religious institutions, and local government agencies into effective illicit drug prevention networks.
3. The development or expansion of public housing focused illicit drug use prevention and education programs operated by tenant/parent groups, organizations with parent components, or public housing authorities.

B. *Eligible Applicants.* Only applications from private non-profit incorporated organizations and public agencies will be considered.

C. *Available Funds and Scope of the Grant.* ACTION anticipates awarding grants averaging $30,000 but not exceeding $50,000.

Publication of this announcement does not obligate ACTION to award any specific number of grants or to obligate any specific amount of money for demonstration grants.

D. *General Criteria for Grant Selection.* Grant applications will be reviewed and evaluated in comparison with the criteria outlined below, as appropriate, as well as conformance to the instructions included in the application. Grant applicants with a demonstrated competence in using volunteers to prevent the use of illicit drugs by youth will be given preference.

1. Potential to recruit and train volunteers in areas of priority.
2. Promise of developing innovations or knowledge in mobilizing and sustaining State and local volunteer efforts to prevent illicit drug use by youth.
3. Potential for replication of the project model including: Plans for implementation and dissemination of results of the project including any products such as reports and manuals for use by others.
4. Plans for continuation of the activities and self-sufficiency of the program following the completion of the project supported by ACTION funds.
5. Carefully formulated measurable time phased objectives, including self-sufficiency, and feasibility of methods for meeting those objectives.
6. Capability of proposed staff.
7. Likelihood of completion of project within proposed timetable.
8. Feasibility of proposed budget.
9. Adequacy of plans for data gathering and evaluation.

10. Letters of support from collaborating agencies and organizations where such could be expected to contribute to the value or success of the project.
11. While specific levels of matching funds are not a requirement for grants, evidence of local public and private sector support (financial and in-kind) is strongly encouraged and will be considered in the decisionmaking process. Applicants capable of such contributions should specify the sources and nature of in-kind and other non-federal contributions. These contributions must be deemed allowable costs in accordance with ACTION requirements.

E. *Application Review Process.* ACTION's Program Demonstration Branch which has expertise in volunteer demonstration programs, will review and evaluate all eligible applications submitted under this announcement. ACTION's Associate Director for Domestic and Anti-Poverty Operations will make the final selection from among the highest ranked applications. ACTION reserves the right to ask for evidence of any claims of past performance or future capability.

F. *Application Submission and Deadline.* One signed original and two copies of all completed applications must be submitted to the appropriate ACTION State Office no later than 5:00 p.m. local standard time on April 27, 1988. Only those applications that are received at the appropriate ACTION State Office by 5:00 p.m. local standard time on this date will be eligible.

All grant applications must consist of:

a. Application for Federal Assistance (SF 424 Pages 1-2 and ACTION Form A-1017 pages 3-10) with narrative budget justification and a narrative of project goals and objectives, and assurances.

b. CPA certification of accounting capability.

c. Articles of incorporation.

d. Proof of non-profit status or an application for non-profit status, which should be made through documentation.

e. Resume of candidates for the position of project director, if available, or the resume of the director of the applicant agency or project.

f. Organization chart of the applicant organization showing how the project is related to the organization.

To receive an application kit, please contact your ACTION State Office. Following is an address list of ACTION Regional Offices, along with the addresses of ACTION State Offices under their jurisdiction:

Region I

ACTION Regional Office, 10 Causeway St., Room 473, Boston, MA 02222-1039
ACTION State Office, Abraham Ribicoff Federal Bldg., 450 Main St., Room 524, Hartford, CT 06103-3002
ACTION State Office, Federal Bldg., Room 305, 76 Pearl St., Portland, ME 04101-4188
ACTION State Office, 10 Causeway St., Room 467, Boston, MA 02222-1038
ACTION State Office, Federal Post Office and Courthouse, 55 Pleasant St., Room 316, Concord, NH 03301-3939 (New Hampshire/Vermont)
ACTION State Office, John E. Fogarty Bldg., Room 200, 24 Weybosset St., Providence, RI 02903-2882

Region II

ACTION Regional Office, 6 World Trade Center, Room 758, New York, NY 10048-0206
ACTION State Office, 402 East State St., Room 426, Trenton, NJ 08608-1507
ACTION State Office, 6 World Trade Center, Room 758, New York, NY 10048-0206 (Metropolitan New York)
ACTION State Office, U.S. Courthouse and Federal Bldg., 445 Broadway, Room 103, Albany, NY 12207-2923 (Upstate New York)
ACTION State Office, Frederico DeGetau Federal Office Bldg., Carlos Chardon Ave., Suite 662, Hato Rey, PR 00918-2241 (Puerto Rico/Virgin Islands)

Region III

ACTION Regional Office, U.S. Customs House, 2nd and Chestnut St., Room 108, Philadelphia, PA 19106-2912
ACTION State Office, Federal Bldg., Room 372-D, 600 Federal Place, Louisville, KY 40202-2230
ACTION State Office, Federal Bldg., 31 Hopkins Plaza, Room 1125, Baltimore, MD 21201-2814 (Delaware/Maryland)
ACTION State Office, Federal Bldg., Room 500, 85 Marconi Blvd., Columbus, OH 43215-2886
ACTION State Office, U.S. Customs House, Room 108, 2nd and Chestnut Sts., Philadelphia, PA 19106-2998
ACTION State Office, 400 North 8th St., P.O. Box 10066, Richmond, VA 23240-1832, (Virginia/District of Columbia)

Region IV

ACTION Regional Office, 101 Marietta St. NW., Suite 1003, Atlanta, GA 30323-2301

DEPARTMENT OF AGRICULTURE

Forms Under Review by Office of Management and Budget

March 11, 1988.

The Department of Agriculture has submitted to OMB for review the following proposals for the collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35) since the last list was published. This list is grouped into new proposals, revisions, extensions, or reinstatements. Each entry contains the following information:

(1) Agency proposing the information collection: (2) title of the information collection; (3) form number(s), if applicable; (4) how often the information is requested; (5) who will be required or asked to report; (6) an estimate of the number of responses; (7) an estimate of the total number of hours needed to provide the information; (8) an indication of whether section 3504(h) of Pub. L. 96–511 applies; (9) name and telephone number of the agency contact person.

Questions about the items in the listing should be directed to the agency person named at the end of each entry. Copies of the proposed forms and supporting documents may be obtained from: Department Clearance Officer, USDA, OIRM, Room 404–W Admin. Bldg., Washington, DC 20250, (202) 447–2118.

Comments on any of the items listed should be submitted directly to: Office of Information and Regulatory Affairs, Office of Management and Budget, Washington, DC 20503, Attn: Desk Officer for USDA.

If you anticipate commenting on a submission but find that preparation time will prevent you from doing so promptly, you should advise the OMB Desk Officer of your intent as early as possible.

Agricultural Marketing Service

National Advisory Committee for Tobacco Inspection Services; Meeting

In accordance with the Federal Advisory Committee Act (5 U.S.C. App. 1) announcement is made of the following committee meeting:

Name: National Advisory Committee for Tobacco Inspection Services.

Date: April 11, 1988.

Time: 1:30 p.m.

Place: Tobacco Division, Agricultural Marketing Service, U.S. Department of Agriculture, Training Laboratory, Room 402, 33 Waller Avenue, Lexington, Kentucky 40504.

Purpose: To review various regulations issued pursuant to the Tobacco Inspection Act (7 U.S.C. 511 *et seq.*) and to discuss the level of tobacco inspection and related services. In particular, the Committee will analyze the financial status of the inspection program and recommend to the Secretary of Agriculture the rate of the user fee for the 1988 crop. The Committee will review the current formula and also consider other options for pairing or grouping burley markets and distributing graders among the markets for the 1988–89 selling season.

The meeting is open to the public. Persons, other than members, who wish to address the Committee at the meeting should contact the Director, Tobacco Division, Agricultural Marketing Service, U.S. Department of Agriculture, 300 12th Street SW., P.O. Box 96456, Washington, DC 20090–6456 (202) 447–2567, prior to the meeting. Written statements may be submitted to the Committee prior to or at the meeting.

Dated: March 9, 1988.

William T. Manley,

Acting Administrator.

DEPARTMENT OF COMMERCE

Agency Information Collection Under Review by the Office of Management and Budget (OMB)

DOC has submitted to OMB for clearance the following proposal for collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35).

Agency: National Oceanic and Atmospheric Administration

Title: Regulations on Conservation of Living Antarctic Resources.
Form Number: Agency—N/A; OMB—N/A.
Type of Request: New Collection.
Burden: 4 respondents; 14 reporting hours.
Needs and Uses: Persons planning to harvest or import living marine resources or their products from the Antarctic must obtain permits and file reports. This information will be used by the National Marine Fisheries Service to meet the research and enforcement obligations of the Antarctic Treaty.
Affected Public: Businesses or other for-profit institutions.
Frequency: On occasion; annually.
Respondent's Obligation: Required to obtain or retain a benefit.
OMB Desk Officer: John Griffen, 395–7340.

Copies of the above information collection proposal can be obtained by calling or writing DOC Clearance Officer, Edward Michals, (202) 377–3271, Department of Commerce, Room 6622, 14th and Constitution Avenue, NW., Washington, DC 20230.

Written comments and recommendations for the proposed information collection should be sent to John Griffen, OMB Desk Officer, Room 3228, New Executive Office Building, Washington, DC 20503.

Dated: March 10, 1988.

Edward Michals,

Department Clearance Officer, Office of Management and Organization.

Agency Form Under Review by the Office of Management and Budget (OMB)

DOC has summitted to OMB for clearance the following proposal for collection of information under the provision of the Paperwork Reduction Act (44 U.S.C. Chapter 35).

Agency: Office of Productivity, Technology and Innovation.

Title: Access of U.S. Scientists to Foreign Research Facilities.

Form Number: NA.

Type of Request: New.

Burden: 50 respondents; 250 reporting hours.

Needs and Used: The requested information from firms and universities will help Federal laboratories evaluate cooperative research and development proposals from foreign firms, assist U.S. negotiators in determining strategy for bilateral science and technology agreements, and assist agencies in developing policies and procedures regarding visiting foreign scientists.

Frequency: On occasion.

Affected Public: Businesses or other for-profit institutions.

Respondent's Obligation: Voluntary.

OMB Desk Officer: John Griffen, 395–7340.

Copies of the above information collection proposal can be obtained by calling or writting DOC Clearance Officer, Edward Michals (202) 377–3271, Department of Commerce, Room H6622, 14th and Constitution Avenue NW., Washington, DC 20230.

Written comments and recommendation for the proposed information collection should be sent to John Griffen, OMB Desk Officer, Room 3228 New Executive Office Building, Washington DC 20503.

Dated: March 11, 1988.

BILLING CODE 3510-07-M

Foreign-Trade Zones Board

[Docket No. 15–88]

Foreign-Trade Zone 122, Nueces/San Patricio Counties, TX (Corpus Christi Port of Entry); Application for Subzone, Reynolds Metals Alumina Plant, San Patricio & Aransas Counties

An application has been submitted to the Foreign-Trade Zones Board (the Board) by the Port of Corpus Christi Authority, grantee of FTZ 122, requesting special-purpose subzone status for the alumina (aluminum oxide) plant of Reynolds Metals Company in San Patricio and Aransas Counties, Texas, adjacent to the Corpus Christi Customs port of entry. The application was submitted pursuant to the provisions of the Foreign-Trade Zones Act, as amended (19 U.S.C. 81a–81u), and the regulations of the Board (15 CFR Part 400). It was formally filed on March 4, 1988.

The Reynolds plant is situated on two parcels (1977 acres). The first site is on State Highway 35 at Route 351 in San Patricio County, some 10 miles northeast of Corpus Christi. The second parcel is on FM Route 881 at Route 136 in San Patricio and Aransas Counties, some 16 miles northeast of Corpus Christi. The facility employs 750 persons and is used to refine bauxite to produce alumina. The bauxite is sourced abroad, and is dutiable at $.044 per ton. Some two-thirds of the alumina is exported.

Zone procedures would exempt Reynolds from Customs duty payments on the material used in its exports, and allow it to defer duties on imports. The company would also be exempt from state and local ad valorem taxes on foreign-sourced bauxite or alumina produced from foreign-sourced bauxite. The applicant indicates that the savings will help improve the company's international competitiveness.

In accordance with the Board's regulations, an examiners committee has been appointed to investigate the application and report to the Board. The committee consists of: Dennis Puccinelli, (Chairman), Foreign-Trade Zones Staff, U.S. Department of Commerce, Washington DC 20230; Don Gough, Deputy Assistant Regional Commissioner, U.S. Customs Service, Southwest Region, 5850 San Felipe St., Houston, TX 77057; and, Colonel John A. Tudela, District Engineer, U.S. Army Engineer District Galveston, P.O. Box 1229, Galveston, TX 77553.

Comments concerning the proposed subzone are invited in writing from interested parties. They should be addressed to the Board's Executive Secretary at the address below and postmarked on or before April 25, 1988.

A copy of the application is available for public inspection at each of the following locations:

Port Director's Office, U.S. Customs Service, Government Plaza, 400 Mann St., Suite 305, Corpus Christi, TX 78401;
Office of the Executive Secretary, Foreign-Trade Zones Board, U.S. Department of Commerce, Room 1529, 14th & Pennsylvania, NW., Washington, DC 20230.

VOL 53 ISS 51 MR 16 1988 UMI

Dated: March 10, 1988.

John J. Da Ponte, Jr.,
Executive Secretary.

International Trade Administration

Short-Supply Review on Certain Carbon Steel Special Sections; Request for Comments

AGENCY: Import Administration/International Trade Administration, Commerce.

ACTION: Notice of request for comments.

SUMMARY: The Department of Commerce hereby announces its review of a request for a short-supply determination under Article 8 of the U.S.-EC Arrangement on Certain Steel Products, with respect to certain carbon steel special sections.

DATE: Comments must be submitted on or before March 28, 1988.

ADDRESS: Send all comments to Nicholas C. Tolerico, Director, Office of Agreements Compliance, Import Administration, U.S. Department of Commerce, Room 7866, 14th Street and Constitution Avenue NW., Washington, DC 20230.

FOR FURTHER INFORMATION CONTACT: Richard O. Weible, Office of Agreements Compliance, Import Administration, U.S. Department of Commerce, Room 7866, 14th Street and Constitution Avenue NW., Washington, DC 20230, (202) 377–0159.

SUPPLEMENTARY INFORMATION: Article 8 of the U.S.-EC Arrangement on Certain Steel Products provides that if the U.S. "* * * determines that because of abnormal supply or demand factors, the US steel industry will be unable to meet demand in the USA for a particular product (including substantial objective evidence such as allocation, extended delivery periods, or other relevant factors) an additional tonnage shall be allowed for such product or products * * *."

We have received a short-supply request for certain carbon steel special sections, under three inches in cross-sectional dimension, for use in the manufacture of window frames.

Any party interested in commenting on this request should send written comments as soon as possible, and no later than March 28, 1988. Comments should focus on the economic factors involved in granting or denying this request.

Commerce will maintain this request and all comments in a public file. Anyone submitting business proprietary information should clearly identify the business proprietary portion of the submission and also provide a nonproprietary submission which can be placed in the public file. The public file will be maintained in the Central Records Unit, Room B–099, Import Administration, U.S. Department of Commerce at the above address.

Gilbert B. Kaplan,
Acting Assistant Secretary for Import Administration.

March 4, 1988.

Minority Business Development Agency

Solicitation of Applications; Minority Business Development Center Program; Bakersfield Metropolitan Statistical Area

AGENCY: Minority Business Development Agency, Commerce.

ACTION: Notice.

SUMMARY: The Minority Business Development Agency (MBDA) announces that it is soliciting applications under its Minority Business Development Center (MBDC) Program to operate an MBDC for a 3 year period, subject to available funds. The cost of performance for the first 12 months is estimated at $194,118 for the project performance period of August 1, 1988 to July 31, 1989. The MBDC will operate in the Bakersfield Metropolitan Statistical Area (MSA). The first year cost for the MBDC will consist of $165,000 in Federal funds and a minimum of $29,118 in non-Federal funds (which can be a combination of cash, in-kind contribution and fees for services).

The I. D. Number for this project will be 09–10–88018–01.

The funding instrument for the MBDC will be a cooperative agreement and competition is open to individuals, nonprofit and for-profit organizations, local and state governments, American Indian tribes and educational institutions.

The MBDC will provide management and technical assistance to eligible clients for the establishment and operation of businesses. The MBDC program is designed to assist those minority businesses that have the highest potential for success. In order to accomplish this, MBDA supports MBDC programs that can: coordinate and broker public and private sector resources on behalf of minority individuals and firms; offer them a full range of management and technical assistance; and serve as a conduit of information and assistance regarding minority business.

Applications will be judged on the experience and capability of the firm and its staff in addressing the needs of minority business individuals and organizations; the resources available to the firm in providing management and technical assistance; the firm's proposed approach to performing the work requirements included in the application; and the firm's estimated cost for providing such assistance. It is advisable that applicants have an existing office in the geographic region for which they are applying.

The MBDC will operate for a three (3) year period with periodic reviews culminating in annual evaluations to determine if funding for the project should continue. Continued funding will be at the discretion of MBDA based on such factors as the MBDC's satisfactory performance, the availability of funds, and Agency priorities.

A pre-application conference to assist all interested applicants will be held at the following address and time: Minority Business Development Agency, U.S. Department of Commerce, 221 Main Street, Room 1280, San Francisco, California 94105, March 31, 1988 at 10:00 a.m.

Proposals Are to be Mailed To The Following Address: Minority Business Development Agency, U.S. Department of Commerce, San Francisco Regional Office, 221 Main Street, Room 1280, San Francisco, California 94105, 415/974–9597.

Closing Date: The closing date for applications is April 20, 1988. Applications must be postmarked by midnight April 20, 1988.

FOR FURTHER INFORMATION CONTACT: Dr. Xavier Mena, Regional Director, San Francisco Regional Office.

SUPPLEMENTARY INFORMATION: Questions concerning the preceding information, copies of application kits and applicable regulations can be obtained at the above address.

COMMITTEE FOR THE IMPLEMENTATION OF TEXTILE AGREEMENTS

Adjustment of Import Limits for Certain Cotton Textile Products Produced or Manufactured in Sri Lanka

March 11, 1988.

The Chairman of the Committee for the Implementation of Textile Agreements (CITA), under the authority contained in E.O. 11651 of March 3, 1972, as amended, has issued the directive published below to the Commissioner of Customs to be effective on March 17, 1988. For further information contract Kimbang Pham, International Trade Specialist, Office of Textiles and Apparel, U.S. Department of Commerce, (202) 377–4212. For information on the quota status of this limit, please refer to the Quota Status Reports which are posted on the bulletin boards of each Customs port or call (202) 343–6580. For information on embargoes and quota re-openings, please call (202) 377–3715.

Summary

In the letter published below, the Chairman of the Committee for the Implementation of Textile Agreements directs the Commissioner of Customs to increase the current limit for cotton textile products in Category 342, produced or manufactured in Sri Lanka. As a result, the limit for Category 343, which is currently closed, will re-open.

Background

On May 15, 1987, a notice was published in the **Federal Register** (52 FR 18413) which announced import restraint limits for certain cotton, wool, man-made fiber, silk blend and other vegetable fiber textiles and textile products, produced or manufactured in Sri Lanka and exported during the twelve-month period which began on June 1, 1987 and extends through May 31, 1988. Subsequent directives published on January 4, 1988 amended these limits for two separate periods which began on June 1, 1987 and extended through December 31, 1987 and on January 1, 1988 and extends through May 31, 1988.

Under the terms of the Bilateral Cotton, Wool and Man-Made Fiber Textile Agreement of May 10, 1983, as amended, between the Governments of the United States and Sri Lanka, and at the request of the Government of Sri Lanka, the limit for Category 342 is being increased for carryover for the period January 1, 1988 through May 31, 1988.

In addition, import charges, amounting to 9,919 dozen, are being deducted from the charges made to the current limit for Category 342 and charged to the limit established for the period which began on June 1, 1986 and extended through May 31, 1987.

A description of the textile categories in terms of T.S.U.S.A. numbers is available in the CORRELATION: Textile and Apparel Categories with Tariff Schedules of the United States Annotated (see **Federal Register** notice 52 FR 47745, dated December 11, 1987).

The letter to the Commissioner of Customs and the actions taken pursuant to it are not designed to implement all of the provisions of the bilateral agreement, but are designed to assist

OL

MI

only in the implementation of certain of its provisions.

James H. Babb,

Chairman, Committee for the Implementation of Textile Agreements.

Committee for the Implementation of Textile Agreements

March 11, 1988.

Commissioner of Customs, *Department of the Treasury, Washington, D.C. 20229.*

Dear Mr. Commissioner: This directive amends, but does not cancel, the directive issued to you on December 30, 1987 by the Chairman, Committee for the Implementation of Textile Agreements, concerning imports into the United States of certain cotton, wool, man-made fiber, silk blend and other vegetable fiber textiles and textile products, produced or manufactured in Sri Lanka and exported during the period which began on January 1, 1988 and extends through May 31, 1988.

Effective on March 17, 1988, the directive of December 30, 1987 is further amended to increase the limit for cotton textile products in Category 342 to 114,289 dozen,[1] as provided under the terms of the bilateral agreement of May 10, 1983, as amended.[2]

Also effective on March 17, 198, you are directed to deduct 9,919 dozen from the charges made to the current limit for Category 342. This same amount is to be charged to the limit established for Category 342 for the period June 1, 1988 through May 31, 1989.

The Committee for the Implementation of Textile Agreements has determined that these actions fall within the foreign affairs exception to the rulemaking provisions of 5 U.S.C. 553(a)(1).

Sincerely,

James H. Babb,

Chairman, Committee for the Implementation of Textile Agreements.

BILLING CODE 3510-DR-M

COMMODITY FUTURES TRADING COMMISSION

Chicago Board of Trade Proposed Futures Contract

AGENCY: Commodity Futures Trading Commission.

ACTION: Notice of availability of the terms and conditions of proposed commodity futures contract.

SUMMARY: The Chicago Board of Trade ("CBT") has applied for designation as a future contract market in 30-day interest rate futures. The Deputy Director of the Division of Economic Analysis ("Division") of the Commodity Futures Trading Commission ("Commission"), acting pursuant to the authority delegated by Commission Regulation 140.96, has determined that publication of the proposal is in the public interest, will assist the Commission in considering the views of interested persons and is consistent with the purposes of the Commodity Exchange Act.

DATE: Comments must be received on or before May 16, 1988.

ADDRESS: Interested person should submit their views and comments to Jean A. Webb, Secretary, Commodity Futures Trading Commission, 2033 K Street, NW., Washington, DC 20581. Reference should be made to the CBT 30-day interest rate futures contract.

FOR FUTURE INFORMATION CONTACT: Naomi Jaffe, Division of Economic Analysis, Commodity Futures Trading Commission, 2033 K Street, NW., Washington, DC 20581, (202) 254–7227.

SUPPLEMENTARY INFORMATION: The proposed contract terms and conditions provide for cash settlement based on the average daily Fed funds rate for delivery month. This average is a simple average of the daily overnight rates as determined by the Federal Reserve Bank of New York.

Copies of the terms and conditions of the proposed futures contract will be available for inspection at the Office of the Secretariat, Commodity Futures Trading Commission, 2033 K Street, NW., Washington, DC 20581. Copies of the terms and conditions can be obtained through the Office of the Secretariat by mail at the above address or by phone at (202) 254–6314.

Other materials submitted by the CBT in support of the application for contract market designation may be available upon request pursuant to the Freedom of Information Act (5 U.S.C. 552) and the Commission's regulations thereunder (17 CFR Part 145 (1987)), except to the extent they are entitled to confidential treatment as set forth in 17 CFR 145.5 and 145.9. Requests for copies of such materials should be made to the FOI, Privacy and Sunshine Acts Compliance Staff of the Office of the Secretariat at the Commission's headquarters in accordance with 17 CFR 145.7 and 145.8.

Any person interested in submitting written data, views or arguments on the terms and conditions of the proposed futures contract, or with respect to other materials submitted by the CBT in support of the application, should send such comments to Jean A. Webb, Secretary, Commodity Futures Trading Commission 2033 K Street, NW., Washington, DC 20581, by the specified date.

Issued in Washington, DC., on March 10, 1988.

Blake Imel,

Deputy Director, Division of Economic Analysis.

BILLING CODE 6351-01-M

DEPARTMENT OF DEFENSE

Corps of Engineers, Department of the Army

Intent To Prepare Draft Environmental Impact Statement, Dutch Creeks, Henryetta, OK

AGENCY: Tulsa District, Tulsa, Oklahoma, U.S. Army Corps of Engineers, DOD.

ACTION: Notice of intent to prepare a Draft Environmental Impact Statement (DEIS).

SUMMARY: This study is to determine the feasibility of providing flood protection for the flood plain of Coal and Dutch Creeks in Henryetta, Oklahoma.

FOR FURTHER INFORMATION CONTACT: Mr. Paul Mace, Chief, Environmental Resources Branch, U.S. Army Corps of Engineers, Tulsa District, PO Box 61, Tulsa, OK 74121–0061, phone (918) 581–7857.

SUPPLEMENTARY INFORMATION: Coal and Dutch Creeks are in urban areas. This study is designed to determine the feasibility of providing flood protection for existing residential, commercial, and public areas in the flood plain. The authorization for the Coal and Dutch Creeks Project, is contained in section 205 of the Flood Control Act of 1948 as amended. Flooding along Coal and Dutch Creeks causes an estimated $432,000 in average annual damages.

Alternatives

Several structural and nonstructural solutions for reducing flood damages were considered, including reservoirs, channel modification, regional detention, flood plain management, flood plain acquisition, flood proofing and levees.

Coordination

The U.S. Fish and Wildlife Service has prepared a Fish and Wildlife Coordination Act Report. The draft supplement will be circulated for review and all comments will be incorporated into the final environmental impact statement.

Scoping

A separate scoping meeting will not be held.

Availability

Estimated date when the DEIS will be available is *April 1988.*

Date: February 29, 1988.

Robert D. Brown,

Chief, Planning Division.

BILLING CODE 3710-39-M

DEPARTMENT OF EDUCATION

National Council on Vocational Education; Public Meeting

AGENCY: National Council on Vocational Education, Education.

ACTION: Notice of public meeting of the Council.

SUMMARY: This notice sets forth the proposed agenda of a forthcoming meeting of the National Council on Vocational Education. It also describes the functions of the Council. Notice of this meeting is required under section 10(a)(2) of the Federal Advisory Committee Act, and is intended to notify the general public of its opportunity to attend.

DATE: March 14, 1988—9:00 a.m. to 4:00 p.m.

ADDRESS: Channel Inn Motel, 650 Water Street, Southwest, Washington, DC, 554-2400.

SUPPLEMENTARY INFORMATION: The National Council on Vocational Education is established under section 104 of the Vocational Education Amendments of 1968, Pub. L. 90–576.

The Council is established to:

(A) Advise the President, the Congress, and the Secretary of Education concerning the administration of, preparation of general regulations for, and operation of, vocational education programs supported with assistance under this title;

(B) Review the administration and operation of vocational education programs under this title, including the effectiveness of such programs in meeting the purposes for which they are established and operated, make recommendations with respect thereto, and make annual reports of its findings and recommendations (including recommendations for changes in the provisions of this title) to the Secretary for transmittal to Congress; and

(C) Conduct independent evaluations of programs carried out under this title and publish and distribute the results thereof.

Agenda: The proposed agenda will include: Committee Reports, Annual Report Review, Review of past projects, Future Activities.

FOR FURTHER INFORMATION CONTACT: Dr. Joyce Winterton, Executive Director, 330 C Street SW., Suite 4060, Washington, DC 20202, (202) 732–1884.

Records are kept of all Council proceedings, and are available for public inspection at the above address from the hours of 9:00 a.m. to 4:00 p.m.

Signed at Washington, DC, February 19, 1988.

Joyce Winterton,

Executive Director.

BILLING CODE 4000-01-M

DEPARTMENT OF ENERGY

Assistant Secretary for International Affairs and Energy Emergencies

Proposed Subsequent Arrangement; Government of Canada

Pursuant to section 131 of the Atomic Energy Act of 1954, as amended (42 U.S.C. 2160) notice is hereby given of a proposed "subsequent arrangement" under the Agreement for Cooperation between the Government of the United States of America and the Government of Canada concerning Civil Uses of Atomic Energy, as amended.

The subsequent arrangement to be carried out under the above-mentioned agreement involves approval of the following sale:

Contract Number S–CA–407, for the sale of 10 micrograms of thorium-229 to McMaster University, Hamilton, Ontario, Canada, for use in mass spectrometry analysis of uranium and thorium in rocks and cave deposits.

In accordance with section 131 of the Atomic Energy Act of 1954, as amended, it has been determined that this subsequent arrangement will not be inimical to the common defense and security.

This subsequent arrangement will take effect no sooner than fifteen days after the date of publication of this notice.

Date: March 11, 1988.

For the Department of Energy.

George J. Bradley, Jr.,

Principal Deputy Assistant Secretary for International Affairs and Energy Emergencies.

BILLING CODE 6450-01-M

Federal Energy Regulatory Commission

[Docket Nos. ER88-269-000 et al.]

Public Service Co., et al., Electric Rate and Corporate Regulation Filings

Take notice that the following filings have been made with the Commission:

1. Public Service Company

[Docket No. ER88-269-000]

March 9, 1988.

Take notice that on March 2, 1988, Public Service Company of New Mexico (PNM) tendered for filing in accordance with §§ 35.1(a) and 131.52 of the Commission's regulations a Certificate of Concurrence of Texas-New Mexico Power Company (TNP) in the above-referenced docket of "Amendment No. 6 to Contract for Electric Service" between PNM and TNP.

Comment date: March 24, 1988, in accordance with Standard Paragraph E at the end of this notice.

2. Consumer Power Company

[Docket No. ER88-276-000]

March 9, 1988.

Take notice that on March 2, 1988, Consumer Power Company (Company) tendered for filing Supplement Nos. 1, 2, and 3 to the Transmission Service Agreement between the Company and the Michigan Public Power Agency (MPPA) dated as of December 20, 1985 (Transmission Agreement).

Comment date: March 24, 1988, in accordance with Standard Paragraph E at the end of this document.

3. Ocean State Power

[Docket No. EC88-14-000]

March 10, 1988.

Take notice that on March 4, 1988, Ocean State Power (Ocean State) tendered for filing an Application with the Federal Energy Regulatory Commission (FERC), in Docket No. EC88-14-000 For Authorization To Reorganize Its Partnership pursuant to sections 203 and 204 of the Federal Power Act (FPA), 16 U.S.C. 824b and 824c, and the Commission's regulations promulgated thereunder at 18 CFR Parts 33 and 34. Ocean State also seeks an exemption from the competitive bidding requirements of 18 CFR 34.2(a).

Ocean State is currently a Massachusetts partnership consisting of two Delaware corporations, Ocean State Power Company (OSP Co.) and JMAI Power Corporation (JPC). Upon receipt of the requisite regulatory approval, the Ocean State partnership agreement will be amended and restated under the laws of the State of Rhode Island and four additional partners will be brought into Ocean State. The proposed four new partners are wholly-owned subsidiaries of TransCanada PipeLines Limited, New England Electric System, Newport Electric Corporation, and Eastern Utilities Associates. In addition, the partnership interests of OSP Co. and JPC will be transferred to one company—OSP Corp, a wholly-owned subsidiary of J. Makowski, Inc.

Comment date: March 24, 1988, in accordance with Standard Paragraph E at the end of this notice.

4. Consolidated Edison Company of New York, Inc.

[Docket No. ER88-261-000]

March 10, 1988.

Take notice that on March 4, 1988, Consolidated Edison Company of New York, Inc. (Con Edison) tendered for filing, as an initial rate schedule and supplement, agreements to sell firm power and energy to the Connecticut Light and Power Company (CL&P) and Boston Edison Company (Boston Edison). The agreement provides for an energy reservation charge of $65.92 per megawattday and an energy charge based upon incremental costs of generation.

Con Edison requests waiver of the notice requirements of § 35.3 of the Commission's regulations so that the Rate Schedule can be made effective as of December 23, 1987.

Con Edison states that a copy of this filing has been served by mail upon CL&P, Boston Edison and the New England Power Pool.

Comment date: March 24, 1988, in accordance with Standard Paragraph E at the end of this notice.

5. Portland General Electric Company

[Docket No. ER88-278-000]

March 10, 1988.

Take notice that on March 2, 1988, Portland General Electric Company (Portland) tendered for filing (i) an Amendment to the PGE Rate Schedule FERC No. 22, the agreement entitled Pacific-Portland Sales and Exchange Agreement dated August 25, 1972 (Agreement), between Pacific Gas and Electric Company (Pacific) and Portland, and (ii) the Certificate of Concurrence of Pacific Gas and Electric Company.

The Amendment includes the following revisions to the Agreement: (i) The rate paid by Pacific for capacity made available by Portland, (ii) the number of months and hours during the on-peak hours that capacity is made available to Pacific, and (iii) the terms and conditions under which energy may be delivered to Pacific and replacement energy is made available to Portland. Service to Pacific pursuant to the Amendment is proposed to begin on May 1, 1988.

This Amendment will have no effect on the rights and obligations of Southern California Edison Company (Edison) pursuant to the Assignment Agreement among Pacific, Portland and Edison.

Portland requests, if necessary, a waiver of the Commission's notice requirements in order to begin service under the Amendment on May 1, 1988.

Copies of the filing have been served upon Pacific Gas and Electric Company, Southern California Edison Company, the Oregon Public Utility Commission and the Public Utilities Commission, State of California.

Comment date: March 24, 1988, in accordance with Standard Paragraph E at the end of this notice.

6. Commonwealth Edison Company

[Docket No. ER88-200-000]

March 10, 1988.

Take notice that on March 3, 1988, Commonwealth Edison Company (Edison) tendered for filing, on behalf of itself and Iowa Electric Light and Power Company (Iowa), a revised Letter Agreement establishing the rates, terms and conditions under which Edison and Iowa will begin to make short term power and general purpose energy available to each other. The Letter Agreement, as originally filed, had provided for capped maximum prices for short term power and general purpose energy. The revised Letter Agreement provides, in addition, for a minimum price for such transactions.

Edison and Iowa request waiver of the Commission's notice requirements in order to permit an effective date of February 1, 1988. Copies of the filing were served upon Iowa, the Illinois Commerce and the Iowa State Commerce Commission.

Comment date: March 24, 1988, in accordance with Standard Paragraph E at the end of this notice.

7. Public Service Company of New Mexico

[Docket No. ER88-274-000]

March 10, 1988.

Take notice that on March 1, 1988, Public Service Company of New Mexico (PNM) tendered for filing as an initial rate schedule an Economy Energy Agreement between PNM and the City of Burbank, California (Burbank). Under the Agreement PNM and Burbank will make economy energy available to each other at rates reflecting current market conditions.

Copies of the filing have been served upon Burbank and the New Mexico Public Service Commission.

Comment date: March 24, 1988, in accordance with Standard Paragraph E at the end of this notice.

8. Iowa Power and Light Company

[Docket No. ER88-277-000]

March 10, 1988.

Take notice that on March 1, 1988, Iowa Power and Light Company (Iowa Power) tendered for filing a Rate Schedule (Schedule), between Iowa Power and Associated Electric Cooperative, Inc. (AEC), dated December 31, 1987.

The Schedule provides for the sale of system participation capacity and energy from Iowa Power to AEC between December 7-31, 1987.

Iowa Power and AEC request that the Commission waiver its prior notice requirements and accept the Schedule for filing with an effective date of December 7, 1987.

Copies of this filing were served upon each affected party and the Iowa State Utilities Board.

Comment date: March 24, 1988, in accordance with Standard Paragraph E at the end of this notice.

9. Green Mountain Power Corporation

[Docket No. ER88-280-000]

March 10, 1988.

Take notice that on March 3, 1988, Green Mountain Power Corporation (GMP) tendered for filing as a rate schedule an executed agreement dated as of January 11, 1988, between GMP and the City of Burlington, Vermont, Electric Department (BED). The proposed rate schedule provides for the sale of non-firm energy by GMP to BED.

GMP states that a copy of the filing was served on BED, as well as the Vermont Public Service Board and Vermont Department of Public Service.

Comment date: March 24, 1988, in accordance with Standard Paragraph E at the end of this notice.

Standard Paragraph

E. Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214). All such motions or protests should be filed on or before the comment date. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,

Acting Secretary.

BILLING CODE 6717-01-M

[Project No. 3186-003]

Joseph M. Keating; Availability of Environmental Assessment

March 15, 1988.

In accordance with the National Environmental Policy Act of 1969 (NEPA) and the Federal Energy Regulatory Commission's (Commission's) regulations, 19 CFR Part 380 (Order No. 486, 52 FR 47897), the Office of Hydropower Licensing reviewed the application for license filed by Jospeh M. Keating for the Pyramid Creek Project located in California on Pyramid Creek near Twin Bridges, and prepared an environmental assessment (EA)

Copies of the EA are available for review in the Commission's Public Reference Branch, Room 1000, 825 North Capitol Street NE., Washington DC 20426 or call (202) 357-8118 for further information.

Lois D. Cashell,

Acting Secretary.

BILLING CODE 6717-01-M

[Docket Nos. CI88-346-000 et al.]

Cabot Energy Marketing Corp., et al.; Natural Gas Certificate Filings

March 11, 1988.

Take notice that the following filings have been made with the Commission:

1. Cabot Energy Marketing Corporation

[Docket No. CI88-346-000]

Take notice that on March 3, 1988, Cabot Energy Marketing Corporation (Applicant), of 550 Westlake Park Boulevard, Suite 900, P.O. Box 4544, Houston, Texas, 77210-4544, filed an application pursuant to sections 4 and 7 of the Natural Gas Act and Part 157 of the Commission's Regulations for a blanket certificate of public convenience and necessity with pregranted abandonment authority for an unlimited term.

Applicant requests a certificate authorizing: (1) Sales in interstate commerce for resale by Applicant, (2) sales to Applicant by others, and (3) sales in interstate commerce for resale by Applicant's suppliers with Applicant acting as agent. Applicant states that such sales will include natural gas made available pursuant to abandonment authority granted by the Commission in separate proceedings without regard to the NGPA category of such gas. Applicant also requests pregranted abandonment authority with respect to all such sales, all as more fully set forth in the application which is on file with the Commission and open for public inspection.

Comment date: March 28, 1988, in accordance with Standard Paragraph J at the end of this notice.

2. Northern Natural Gas Company, Division of Enron Corporation

[Docket No. CP88-241-000]

Take notice that on February 18, 1988, Northern Natural Gas Company, Division of Enron Corporation (Northern), 2223 Dodge Street, Omaha, Nebraska 68102, filed in Docket No. CP88-241-000 a request, pursuant to § 284.223 of the Commission's Regulations, for authorization to provide a transportation service for Spot Market Corporation (Spot Market), a broker of natural gas, under Northern's blanket certificate issued in Docket No. CP86-435-000, pursuant to section 7 of the Natural Gas Act, all as more fully set forth in the application which is on file with the Commission and open for public inspection.

Northern proposes to transport natural gas for Spot Market from one receipt point in Iowa to three delivery points in Kansas and Iowa.

Northern indicates that the peak day volumes would be 100,000 MMBtu, the average daily volumes would be 50,000 MMBtu and the annual volumes would be 36,500,000 MMBtu. Northern also indicates that service respective to the provisions stipulated under Section

284.223(a) is reported in Docket No. ST88-2065.

Comment date: April 28, 1988, in accordance with Standard Paragraph G at the end of this notice.

3. Texas Eastern Transmission Corporation

[Docket No. CP88-254-000]

Take notice that on February 24, 1988, Texas Eastern Transmission Corporation (Texas Eastern), P.O. Box 2521, Houston, Texas 77252, filed in Docket No. CP88-254-000 an application pursuant to section 7(b) of the Natural Gas Act for permission and approval to abandon compression facilities, all as more fully set forth in the application which is on file with the Commission and open for public inspection.

Texas Eastern proposes to abandon by sale to Marathon Oil Company (Marathon) two 2,200 horsepower compressor units located in West Cameron South Addition, Block 620, offshore Louisiana. Texas Eastern states that the facilities were installed to enable it to receive gas supplies from West Cameron Block 806 and 620.

It is stated that pursuant to an agreement dated October 28, 1985, Marathon operates and maintains the compressor units at its sole cost. Texas Eastern states that at present one of the compressor units is damaged. It is explained that the damaged unit has not been repaired because the remaining reserves from Block 806 and 620 have declined to the point where the remaining unit is capable of handling the compression requirements.

Texas Eastern and Marathon have determined that it would be in their mutual interest if Marathon owned the units, it is explained. It is further explained, that Marathon has offered to purchase the two units from Texas Eastern at a price of $100,000. Texas Eastern states that Marathon would use the damaged unit for spare parts to keep the other unit operating. In the event Marathon relocates the two compressor units, Marathon would provide the necessary compression to ensure continous flow of gas supplies from West Cameron Blocks 806 and 620 to Texas Eastern.

Comment date: April 1, 1988, in accordance with Standard Paragraph F at the end of this notice.

4. United Gas Pipe Line Company

[Docket No. CP88-257-000]

Take notice that on February 25, 1988, United States Pipe Line Company (United), P.O. Box 1478, Houston, Texas, 77251-1478, filed in Docket No. CP88-257-000 an application, pursuant to section 7(b) of the Natural Gas Act, for permission and approval to abandon certain natural gas purchase facilities, via sale and least to Mako Energy, Inc. (Mako), all as more fully set forth in the application which is on filed with the Commission and open to public inspection.

It is stated that United proposes to abandon in place for sale to Mako approximately 9.73 miles of 16-inch pipeline, known as the Mustang Island Field Low Pressure Lateral, beginning at its northern terminus in the Edmund St. John Survey, San Patricio County, Texas, and continuing in a generally southern direction to end at a point in the West Little Survey, Nueces County, Texas. It is stated that United also propose to abandon in place for sale to Mako approximately 0.43 miles of 6-inch pipeline, known as the Ransom Island Field Lateral, beginning at its western terminus at the tie-in to the Mustang Island Field Low Pressure Lateral, located in State Tract 331 and continuing in an easterly direction to end at a point in State Tract 336, being all within Nueces County, Texas. United further proposes to abandon in place for lease to Mako approximately 1.064 miles of 20-inch pipeline, except for a pig trap at station 0+00, beginning at the northern terminus of the Mustang Island Lateral and continuing in a generally northwestern direction to a gate valve located at station 0+37 on said line in Edmund St. John Survey, San Patricio County, Texas, it is stated.

It is stated that the Mustang Island Field Lateral was constructed in 1952 to gather the gas reserves produced by Sunray DX Oil Company, and the Ransom Island Field Lateral was built in 1970 to gather production received from Kings Resources. United States that, because of declining field production, measurement facilities were removed form the Ransom Island Field lateral in 1980. Also, Sun Exploration and Production Company (Sun) had given advance notice to its working interest owners and United that it would be permanently closing its Redfish Bay Products Plant because it was receiving insufficient inlet gas volume, it is stated. After the plant closes, United activated its bypass valve and closed off all side valves going to Sun's plant on December 31, 1985, it is stated. As a result, all measurement, chart handling and dehydration requirements became the responsibility of each producer invovled, it is stated.

United requests that this abandonment be made effective January 18, 1988. On that date, United states that it executed a bill of sale to convey the Mustang Island Low Pressure Lateral and the Ransom Field Lateral to Mako. It is stated that, before the sale took place, United determined that these laterals were nonjurisdictional in nature per section 1(a) of the Natural Gas Act and therefore United was not required to obtain abandonment authority from the Commission. Subsequent to that determination and subsequent to the sale, United personnel discovered that these gathering facilities had been certificated, it is stated.

Comment date: April 1, 1988, in accordance with Standard Paragraph F at the end of this notice.

5. Southern Natural Gas Company

[Docket No. CP88-256-000]

Take notice that on February 25, 1988, Southern Natural Gas Company (Southern), P.O. Box 2563, Birmingham, Alabama 35202, filed an application in Docket No. CP88-256-000 pursuant to section 7(b) of the Natural Gas Act for permission and approval to abandon certain pipeline and measurement facilities, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Southern proposes to abandon its North Black Bay Meter Station, appartenances, and related pipeline. Southern states that the subject facilities, consist of one 4-inch meter run and appurtenances, and about 0.923 mile of 4-inch pipeline that extends from Chevron U.S.A. Inc's (Chevron) North Black Bay platform located in Plaquemines Parish, Louisiana, to Southern's 10-inch Black Bay Line. It is explained that the station has been used by Southern to purchase natural gas from Chevron. It is further explained that Chevron has informed Southern that it foresees no future use for this station, as all gas is currently sold to Southern at another station. Therefore, Southern proposes to abandon the subject facilities. Southern states that the pipeline would be disconnected and abandoned in place and the meter and appartenances would be removed. Removal cost of the facilities is estimated to be $6,000, it is stated.

Comment date: April 1, 1988, in accordance with Standard Paragraph F at the end of this notice.

Alabama-Tennessee Natural Gas Company

[Docket No. CP88-300-000]

Take notice that on March 3, 1988, Alabama-Tennessee Natural Gas Company (A–T), P.O. Box 918, Florence, Alabama 35631, filed a certificate application in Docket No. CP88-300-000 pursuant to section 7(c) of the Natural Gas Act requesting a limited-term certificate of public convenience and necessity to perform a transportation service for Tennessee River Pulp & Paper Company, Division of Packaging Corporation of America (shipper), all as more fully set forth in the application which is on file with the Commission and open to public inspection.

A–T proposes to implement the service pursuant to the terms and conditions of a transportation contract between A–T and shipper, dated February 25, 1988. It is indicated that A–T has agreed to transport up to ten billion Btu of natural gas per day on an interruptible basis for a term of one year from the date of initial deliveries. A–T states that the transportation contract provides that shipper will cause gas to be delivered to various points of interconnection of the facilities of Tennessee Gas Pipeline Company (Tennessee), Columbia Gulf Transmission Company (Columbia), or Tennessee River Intrastate Gas Company, Inc. (TRIGAS), for redelivery to A–T. A–T indicates that it would receive such gas at the existing points of interconnection between the facilities of A–T and Tennessee located in Alcorn County, Mississippi and/or Colbert County, Alabama, and/or an existing point of interconnection between the facilities of A–T and Columbia located in Alcorn County, Mississippi, and/or the existing point of inteconnection of the facilities of A–T and TRIGAS located in Colbert County, Alabama. It is indicated that TRIGAS would receive gas from Texas Eastern Transmission Corporation for redelivery to A–T. A–T states that it would redeliver to shipper a thermally equivalent quantity of gas at existing points of interconnection between the facilities of A–T and shipper.

A–T proposes to charge rates provided by its Rate Schedule IT ranging from a maximum of 10.41 cents per Mcf to a minimum of 0.53 cents per Mcf.

Comment date: April 1, 1988, in accordance with Standard Paragraph F at the end of this notice.

Standard Paragraphs

F. Any person desiring to be heard or make any protest with reference to said filing should on or before the comment date file with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, a motion to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a motion to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to jurisdiction conferred upon the Federal Energy Regulatory Commission by sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission or its designee on this filing if no motion to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a motion for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for the applicant to appear or be represented at the hearing.

G. Any person or the Commission's staff may, within 45 days after the issuance of the instant notice by the Commission, file pursuant to Rule 214 of the Commission's Procedural Rules (18 CFR 385.214) a motion to intervene or notice of intervention and pursuant to § 157.205 of the Regulations under the Natural Gas Act (18 CFR 157.205) a protest to the request. If no protest is filed within the time allowed therefor, the proposed activity shall be deemed to be authorized effective the day after the time allowed for filing a protest. If a protest is filed and not withdrawn within 30 days after the time allowed for filing a protest, the instant request shall be treated as an application for authorization pursuant to section 7 of the Natural Gas Act.

J. Any person desiring to be heard or make any protest with reference to said filings should on or before the comment date file with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC 20426 a motion to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party in any proceeding herein must file a petition to intervene in accordance with the Commission's rules.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for the applicant to appear or be represented at the hearing.

Lois D. Cashell,

Acting Secretary.

[Docket No. G-6591-004 et al.]

Conoco Inc., et al.; Applications for Abandonment of Service and Petitions To Amend Certificates[1]

March 10, 1988.

Take notice that each of the Applicants listed herein has filed an application pursuant to section 7 of the Natural Gas Act for authorization to abandon service as described herein, all as more fully described in the respective applications which are on file with the Commission and open to public inspection.

Any person desiring to be heard or to make any protest with reference to said applications should on or before March 24, 1988, file with the Federal Energy Regulatory Commission, Washington, DC 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party in any proceeding herein must file a petition to intervene in accordance with the Commission's rules.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicants to appear or to be represented at the hearing.

Lois D. Casbell,

Acting Secretary.

BILLING CODE 6717-01

[Docket Nos. CP88-248-000 et al.]

Carnegie Natural Gas Co. et al.; Natural Gas Certificate Filings

March 9, 1988.

Take notice that the following filings have been made with the Commission:

1. Carnegie Natural Gas Company

[Docket No. CP88-248-000]

Take notice that on February 22, 1988, Carnegie Natural Gas Company (Carnegie), 800 Regis Avenue, Pittsburgh, Pennsylvania 15236, filed in Docket No. CP88-248-000, an application pursuant to Section 7 of the Natural Gas Act and Subpart F of the Part 157 of the Commission's Regulations for a blanket certificate of public convenience and necessity authorizing Carnegie to engage in any of the routine activities specified in §§ 157.208 through 157.216 of the Commission's Regulations, including permission and approval to abandon, all as more fully set forth in the request on file with the Commission and open to public inspection.

Comment date; March 30, 1988, in accordance with Standard Paragraph F at the end of this notice.

2. National Fuel Gas Supply Corporation, Penn-York Energy Corporation

[Docket No. CP88-258-000]

Take notice that on February 25, 1988, National Fuel Gas Supply Corporation (National) and Penn-York Energy Corporation) Penn-York), 10 Lafayette Square, Buffalo, New York 14203, filed in Docket No. CP88-258-000 an application pursuant to sections 7(b) and 7(c) of the Natural Gas Act for authorization to modify the class of storage service being provided by Penn-York to Penn Fuel, Inc. (Penn Fuel) and Connecticut Light & Power (CL&P) and to decrease the level of peaking and banking service provided to Penn-York under National's Rate Schedule X-49, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Penn-York proposes to change the class of storage service it currently provides to Penn Fuel and CL&P from 110-day service under Penn-York Rate Schedule SS-1 to 150-day service under Penn-York Rate Schedule SS-2. It is stated that the change in the class of service to be received by its customers will not affect the aggregate level of service provided by Penn-York and will not require the installation, abandonment or modification of any facilities.

It is further stated that the peaking and banking service National provides to Penn-York is required to enable Penn-York to provide 110-day storage service to its customers and because Penn Fuel and CL&P have requested to change their class of service to 150-day service, the level of peaking and banking service required by Penn-York would be reduced. National proposes to decrease the level of peaking and banking service it provides to Penn-York under Rate Schedule X-49 from a maximum daily rate of 55,645 Mcf and a maximum credit volume of 2,663,000 Mcf to a maximum daily rate of 27,986 Mcf and a maximum credit volume of 2,079,400 Mcf.

Comment date: March 30, 1988, in accordance with Standard Paragraph F at the end of this notice.

3. Trunkline Gas Company

[Docket No. CP88-246-000]

Take notice that on February 19, 1987, Trunkline Gas Company (Trunkline), P.O. Box 1642, Houston, Texas 77251-1642, filed in Docket No. CP88-246-000 a request pursuant to § 157.205 of the Commission's Regulations under the Natural Gas Act (18 CFR 157.205) for authorization to transport natural gas for Exxon Corporation (Exxon), a producer of natural gas, under the certificate issued in Docket No. CP86-586-000 pursuant to Section 7 of the Natural Gas Act, all as more fully set forth in the request which is on file with the Commission and open to public inspection.

Trunkline proposes to transport up to 250,000 dt of gas on a daily basis and up

to 91,250,000 dt on an annual basis for Exxon. It is stated that Trunkline would receive the gas from Exxon at existing interconnections between Trunkline and Exxon in South Timbalier, offshore Louisiana. It is explained that Trunkline would deliver for Exxon's account equivalent volumes less 0.7 percent for fuel use at existing interconnections with Monterey Pipeline Company and Southern Natural Gas Company, both located in St. Mary Parish, Louisiana. It is further explained that the gas would then be redelivered to Humble Gas System, Inc. and to four local distribution customers of Southern (Atlanta Gas Light Company, Southern Carolina Pipeline Corporation, Chattanooga Gas Company and Alabama Gas Company).

It is asserted that Trunkline filed an initial report in Docket No. ST88-2078, reporting that the service commenced January 1, 1988, under the automatic authorization provisions of § 284.223(a) of the Commission's Regulations. It is further asserted that no construction of facilities would be required to effect the transportation service. Trunkline proposes to charge Exxon the interruptible transportation rate specified in Trunkline's currently effective Rate Schedule PT. It is stated that the transportation service would have a primary term of one month from the initial date of service under §§ 284.223(a) and would continue on a month-to-month basis thereafter.

Comment date: April 25, 1988, in accordance with Standard Paragraph G at the end of this notice.

4. Tennessee Gas Pipeline Company

[Docket No. CP88-260-000]

Take notice that on February 26, 1988, Tennessee Gas Pipeline Company (Applicant), P.O. Box 2511, Houston, Texas 77252, filed in Docket No. CP88-260-000 a request pursuant to § 157.205 of the Regulations under the Natural Gas Act (18 CFR 157.205) that Applicant be allowed to establish two new delivery points for its customer Orange and Rockland Utilities, Inc. (O & R), under Applicant's blanket certificate issued in Docket No. CP82-413-000 on September 1, 1982, pursuant to section 7(c) of the Natural Gas Act, all as more fully set forth in the request on file with the Commission and open to public inspection.

Applicant states that pursuant to O & R's request, it has agreed to establish under Applicant's CD-3 Rate Schedule a new delivery point at Applicant's existing Broad Run Sales Meter Station which is an existing point of interconnection with Columbia Gas Transmission Corportion (Columbia) in Broad Run, West Virginia. Applicant further states that the new delivery point would be restricted for use only with respect to deliveries of interruptible sales gas under its R Rate Schedule and that deliveries would be limited to 50,000 dth/day. It is stated that O & R would request Columbia to transport these quantities from Broad Run to Columbia's existing interconnection with O & R under Columbia's Order No. 436/500 authorizations.

Applicant states that it has also agreed to establish a new CD-5 delivery point to O & R at the Mahwah Sales Meter Station which is an existing point of interconnection between Applicant and Algonquin Gas Transmission Company (Algonquin) in Mahwah, New Jersey. Applicant states that deliveries of CD-5 gas would be limited to 30,000 dth/day. It is stated that O & R gas would request Algonquin to transport these quantities from Mahwah to Algonquin's existing interconnection with O & R under Algonquin's Order No. 436/500 authorization.

Applicant does not propose to change its existing authorization to deliver up to 50,000 Mcf/day of interruptible sales gas to O & R at Mahwah under Applicant's R Rate Schedule. Applicant states that Algonquin would continue to transport the R gas from Mahwah under its T-1 Rate Schedule.

Applicant proposes no increase or decrease in the total daily and/or annual CD quantities that O & R is entitled to purchase from Applicant. Applicant submits that the establishment of a new delivery point to O & R outside of Applicant's Rate Zone 5 would have no adverse rate consequences since no CD quantities would be delivered at the CD-3 delivery point at Broad Run. Applicant further submits that it has sufficient capacity to accomplish the deliveries as proposed without detriment or disadvantage to any of Applicant's other customers.

Comment date: April 25, 1988, in accordance with Standard Paragraph G at the end of this notice.

Standard Paragraphs

F. Any person desiring to be heard or make any protest with reference to said filing should on or before the comment date file with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, a motion to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a motion to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to jurisdiction conferred upon the Federal Energy Regulatory Commission by sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission or its designee on this filing if no motion to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a motion for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for the applicant to appear or be represented at the hearing.

G. Any person or the Commission's staff may, within 45 days after the issuance of the instant notice by the Commission, file pursuant to Rule 214 of the Commission's Procedural Rules (18 CFR 385.214) a motion to intervene or notice of intervention and pursuant to § 157.205 of the Regulations under the Natural Gas Act (18 CFR 157.205) a protest to the request. If no protest is filed within the time allowed therefor, the proposed activity shall be deemed to be authorized effective the day after the time allowed for filing a protest. If a protest is filed and not withdrawn within 30 days after the time allowed for filing a protest, the instant request shall be treated as an application for authorization pursuant to section 7 of the Natural Gas Act.

Lois D. Cashell,

Acting Secretary.

[FR Doc. 88-5765 Filed 3-15-88; 8:45 am]

BILLING CODE 6717-01-M

[Docket Nos. QF88-86-000 et al.]

Inland Steel Co. et al.; Small Power Production and Cogeneration Facilities; Qualifying Status; Certificate Applications, Etc.

Comment date: Thirty days from publication in the Federal Register, in accordance with Standard Paragraph E at the end of this notice.

March 11, 1988.

Take notice that the following filings have been made with the Commission.

1. Inland Steel Company

[Docket No. QF88-86-000]

On February 17, 1988, Inland Steel Company (Applicant) of 30 West Monroe Street, Chicago, Illinois 60603, amended its application, filed November 12, 1987, for certification of a facility as a qualifying cogeneration facility pursuant to § 292.207 of the Commission's regulations. No determination has been made that the submittal constitutes a complete filing.

The topping-cycle cogeneration facility currently proposed will be located at Applicant's Indiana Harbor Works in East Chicago, Indiana. The facility will consist of a new 131 MW extraction/condensing steam turbine generator and three high-pressure steam boilers. Extraction steam from the steam turbine will be used at Applicant's Indiana Harbor Works plant for process uses throughout the coke plant and in the blast furnace. The primary energy source will be by-product blast furnace gas.

2. Smith Cogeneration Management Limited Partnership I (Stillwater)

[Docket No. QF88-280-000]

On February 29, 1988, Smith Cogeneration Management Limited Partnership I (Applicant), of First Oklahoma Tower, Suite 810, 210 West Park Avenue, Oklahoma City, Oklahoma 73201 submitted for filing an application for certification of a facility as a qualifying cogeneration facility pursuant to § 292.207 of the Commission's regulations. No determination has been made that the submittal constitutes a complete filing.

The proposed topping-cycle cogeneration facility will be located at the University of Oklahoma in Stillwater, Oklahoma. The facility will consist of a combustion turbine generator, a supplementary fired heat recovery steam generator and an extraction/condensing steam turbine generator. The thermal energy recovered from the facility will be used for space heating and mechanical chillers at the University of Oklahoma. The primary energy source will be natural gas. The net electric power production capacity of the facility will be 103.855 MW. The installation of the facility will commence in mid-1989.

3. Smith Cogeneration Management Limited Partnership I (Norman)

[Docket No. QF88-279-000]

On February 29, 1988, Smith Cogeneration Management Limited Partnership I (Applicant), of First Oklahoma Tower, Suite 810, 210 West Park Avenue, Oklahoma City, Oklahoma 73201 submitted for filing an application for certification of a facility as a qualifying cogeneration facility pursuant to § 292.207 of the Commission's regulations. No determination has been made that the submittal constitutes a complete filing.

The proposed topping-cycle cogeneration facility will be located at the University of Oklahoma in Norman, Oklahoma. The facility will consist of a combustion turbine generator, a supplementary fired heat recovery steam generator and an extraction/condensing steam turbine generator. The thermal energy recovered from the facility will be used for space heating and mechanical chillers at the University of Oklahoma. The primary energy source will be natural gas. The net electric power production capacity of the facility will be 102.7 MW. The installation of the facility will commence in mid-1988.

Standard Paragraph

E. Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214). All such motions or protests should be filed on or before the comment date. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,

Acting Secretary.

[FR Doc. 88-5751 Filed 3-15-88; 8:45 am]

BILLING CODE 6717-01-M

[Docket Nos. RP87-70-006 and TA88-1-2-004]

East Tennessee Natural Gas Co.; Rate Filing

March 10, 1988.

Take notice that on March 4, 1988, East Tennessee Natural Gas Company (East Tennessee), tendered for filing ten copies of the following revised tariff sheet to Original Volume No. 1 of its FERC Gas Tariff, to be effective March 1, 1988:

Thirty-Fifth Revised Sheet No. 4

East Tennessee states that the purpose of this filing is (a) to implement interim rate reduction in consideration of the filing of a settlement Stipulation and Agreement (Stipulation) in Docket No. RP87-70 and (b) to correct the cumulative adjustments to Rate Schedules SG and I, which were misstated in East Tennessee's PGA filing in Docket No. TA88-1-2. East Tennessee states that it is filing Interim Rates to reduce the effective base tariff rates, which were accepted conditionally by Commission Order of December 29, 1987, in Docket No. RP87-70, while the Stipulation is pending before the Commission.

East Tennessee states that it has requested appropriate waivers so that the revised rates can be made effective March 1, 1988. East Tennessee states that copies of this filing have been mailed to all of its jurisdictional customers and affected state regulatory commissions.

Any persons desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure. All such motions or protests should be filed on or before March 17, 1988. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,

Acting Secretary.

[FR Doc. 88-5758 Filed 3-15-88; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. RP88-71-000]

El Paso Natural Gas Co.; Change in Rates

March 10, 1988.

Take notice that on March 3, 1988, El Paso Natural Gas Company ("El Paso") tendered for filing a notice of change in rates (and certain identified tariff provisions) for natural gas service rendered to jurisdictional customers under all rate schedules currently contained in Volume Nos. 1 and 1-A and certain rate schedules in Volume Nos. 2 and 2A of El Paso's FERC Gas Tariff. El Paso states that such change in rates is necessary in order for El Paso to revise and reinstitute the standby charge for sales customers who elect to swing to transportation service while retaining their current call on sales gas. El Paso has requested that the Statement of Rates tariff sheets become effective in lieu of their counter-part sheets contained in El Paso's compliance filing at Docket No. RP88-44-000 and that the remaining sheets be made effective, all as of the date on which El Paso would otherwise be permitted to implement the revised rates pending at Docket No. RP88-44-000.

El Paso states that on February 26, 1988 at Docket Nos. RP88-44-000 and CP88-203-000, it filed a request for rehearing of the Federal Energy Regulatory Commission's ("Commission") January 29, 1988 order at said dockets, addressing, among other things, the requirement that reinstatement of standby charges would require certificate authorization under section 7. For the reasons stated in such request for rehearing, El Paso states its belief that the standby charges can be reinstituted through a notice of rate change filing under section 4 without the necessity of also securing a certificate under section 7.

El Paso further states that in the January 29, 1988 order, the Commission directed El Paso, *inter alia,* to remove take-or-pay costs from its demand component and to classify these costs to its sales commodity charge and to reflect production costs in the commodity portion of the rates. El Paso states that it classified the take-or-pay costs to the sales commodity charge and the standby charge in the instant filing.

In the event the Commission rejects the above mentioned standby charge, El Paso proposed alternate tariff sheets containing an alternate standby charge to be made effective in lieu of their counterparts, as appropriate. The alternate tariff sheets include El Paso's take-or-pay buyout and buydown costs in the sales commodity rate only.

El Paso requested that the tendered tariff sheets be accepted by the Commission and permitted to become effective thirty (30) days after the date of filing. El Paso requested that waiver be granted of all applicable rules, regulations and orders as may be necessary to receive a shortened suspension period so that the submitted tariff sheets become effective as of the date on which El Paso would otherwise be permitted to implement the revised rates pending at Docket No. RP88-44-000. Further, specific waiver of certain requirements of §§ 154.63 and 154.66, as applicable, was also requested by El Paso.

El Paso states that a copy of the notice of change has been served upon all interstate pipeline system customers of El Paso and upon all interested state regulatory commissions.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE. Washington, DC., 20426, in accordance with Rules 214 and 211 of the Commission's Rules of Practice and Procedure. All such motions or protests should be filed on or before March 17, 1988. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Casbell,

Acting Secretary.

[FR Doc. 88-5756 Filed 3-15-88; 8:45 am]

BILLING CODE 6717-01-M

[Docket Nos. TA88-2-16-002 and TA88-2-16-001 [1]]

National Fuel Gas Supply Corp.; Proposed Tariff Changes

March 10, 1988.

Take notice that on March 3, 1988, National Fuel Gas Supply Corporation (National) tendered for filing as part of its FERC Gas Tariff, First Revised Volume No. 1, Substitute Twelfth Revised Sheet No. 4, Third Revised Sheet No. 1, First Revised Sheet No. 5, Second Revised Sheet No. 60, Second Revised Sheet No. 61, Second Revised Sheet No. 63, Second Revised Sheet No. 64, Second Revised Sheet No. 65, Second Revised Sheet No. 66, First Revised Sheet No. 69, and First Revised Sheet No. 70 to become effective February 1, 1988.

National states that the purpose of Substitute Twelfth Revised Sheet No. 4 is to reflect a net increase of 2.14 cents per Dth. This change consists of an increase in current purchase gas cost of 13.22 cents per Dth, and a further decrease in the purchase gas cost surcharge adjustment of 11.08 cents per Dth.

National states that the tariff changes also eliminate references to incremental pricing in accordance with Commission Order No. 478.

National states that copies of this filing were served upon the company's jurisdictional customers and the regulatory commissions of the states of New York, Ohio, Pennsylvania, Delaware, and New Jersey.

Any person desiring to be heard or to protest said filing should file a motion to intervene or a protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with Rules 214 and 211 of the Commission's Rules of Practice and Procedure (18 CFR 385.214, 385.211 (1987)). All such motions or protests should be filed on or before March 17, 1988. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,

Acting Secretary.

[Docket No. TA88-4-37-001]

Northwest Pipeline Corp.; Base Tariff Rate Restatement and Redesignation of Tariff Sheet Number

March 10, 1988.

Take notice that on February 26, 1988, Northwest Pipeline Corporation ("Northwest") submitted for filing.

---

[1] On March 1, 1988, National submitted revised tariff sheets in compliance with the Commission's Order of January 28, 1988, which was designated as Docket No. TA88-3-16-001. Later, National discovered errors and on March 3, 1988, resubmitted a corrected copy, designated as Docket No. TA88-3-16-002, to replace, in its entirety, the submission of March 1, 1988.

OL 53 ISS 51 MR 16 988 MI

Second Amended Thirty-Ninth Revised Sheet No. 10, to be part of its FERC Gas Tariff, First Revised Volume No. 1, effective April 1, 1988.

Northern states that the above-mentioned tariff sheet is tendered to restate the base tariff rates to reflect those of a filing with an earlier effective date, and to redesignate First Amended Thirty-Ninth Revised Sheet No. 10 as filed on February 16, 1988 in the above-captioned docket, to Second Amended Thirty-Ninth Revised Sheet No. 10.

A copy of this filing has been mailed to all jurisdictional sales customers, affected state commissions, and all parties on the TA88-4-37 service list.

Any persons desiring to be heard or protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with Rules 211 or 214 of the Commission's Rules of Practice and Procedure. All such motions or protests should be filed on or before March 17, 1988. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,

Acting Secretary.

BILLING CODE 6717-01-M

[Docket No. GP88-12-000]

Colorado Interstate Gas Co. v. RJB Gas Pipeline Co.; Complaint

March 11, 1988.

Take notice that on February 5, 1988, Colorado Interstate Gas Company (CIG) filed a complaint against RJB Gas Pipeline Company (RJB) pursuant to rule 206 of the Commission's rules of practice and procedure. 18 CFR 385.206 (1987). CIG alleges that RJB is charging rates or attempting to collect rates in excess of those set forth in Title I of the Natural Gas Policy Act of 1978 (NGPA).

CIG states that it purchases gas from RJB in Baca County, Colorado, under three separate contracts covering gas produced in the Vilas and Walsh Fields. The gas in question is priced under NGPA section 105. CIG states that since March 1, 1979, it has paid RJB the maximum lawful price (MLP) for the gas. CIG asserts that these gas purchase contracts contain take-or-pay clauses that require CIG to pay for a minimum volume of gas, as specified under the contracts, regardless of whether CIG actually takes the gas. CIG further asserts that RJB has obtained judgment in state court ordering CIG to pay for these minimum volumes of gas even though CIG has not taken them. The court also rejected CIG's request that it be given make-up rights for these payments, holding that CIG had no make-up rights because the contracts had expired. The state court also rejected CIG's motion to dismiss for lack of jurisdiction.

CIG alleges that it has already paid RJB the MLP for the gas delivered under the contracts. CIG contends that any additional amount it is required to pay RJB under the contracts will violate Title I of the NGPA and result in RJB receiving an amount in excess of the MLP. CIG requests that the Commission take jurisdiction in the matter and issue an order finding that RJB's demand for and collection of take-or-pay payments under the gas purchase contracts in question constitutes a demand for payment in excess of the MLP established under Title I of the NGPA, and that any such payments made by CIG to RJB must be refunded with interest.

The procedures applicable to the conduct of this complaint proceeding are found in sections 211 and 214 of the Commission's rules of practice and procedure. 18 CFR 385.211 and 385.214 (1987). All motions to intervene or protests should be submitted to the Federal Energy Regulatory Commission, 825 North Capitol Street, NE, Washington, DC 20426. Such interventions or protests must be filed on or before April 11, 1988. All protests will be considered by the Commission but will not serve to make protestants parties. Any person wishing to become a party must file a motion to intervene in accordance with rule 214.

Lois D. Cashell,

Acting Secretary.

BILLING CODE 6717-01-M

Nagasco Marketing, Inc., et al.; Applications for Extension of Blanket Limited-Term Certificates With Pregranted Abandonment[1]

March 11, 1988.

Take notice that each Applicant listed herein has filed an application pursuant to section 7 of the Natural Gas Act and the Federal Energy Regulatory Commission's (Commission) regulations thereunder for amendment of its blanket limited-term certificate with pregranted abandonment previously issued by the Commission for a term expiring March 31, 1988, to extend such authorization for the term listed herein, all as more fully set forth in the applications which are on file with the Commission and open for public inspection.

Any person desiring to be heard or to make any protest with reference to said applications should on or before March 28, 1988, file with the Federal Energy Regulatory Commission, Washington, DC 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to the proceeding herein must file a petition to intervene in accordance with the Commission's rules.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicants to appear or to be represented at the hearing.

Lois D. Cashell,

Acting Secretary.

[Docket Nos. RP87-102-002 and TA88-1-40-001]

Raton Gas Transmission Co.; Compliance Filing

March 11, 1988.

Take notice that on February 18, 1988, Raton Gas Transmission Company (Raton) tendered for filing Substitute

Eighth Revised Sheet No. 4 as part of its FERC Gas Tariff, Original Volume No. 1, proposed to be effective March 1, 1988.

Raton states that Substitute Eighth Revised Sheet No. 4 is intended to accommodate the Commission Staff's position at a technical conference held in this proceeding and replaces Eighth Revised Sheet No. 4, which previously became effective October 1, 1987, by Commission order issued September 25, 1987. Raton further states that the purpose of this filing is to implement an I-1 rate of 299.33 cents in place of the filed rate of 280.234 cents. Finally, Raton states that it is withdrawing Substitute Eighth Revised Sheet No. 4 filed on February 12, 1988 and requests waiver of the filing fee for the instant filing.

Any person desiring to be heard or to protest said filing should file a motion to intervene or a protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with Rules 214 and 211 of the Commission's Rules of Practice and Procedure (18 CFR 385.214, 385.211 (1987)). All such motions or protests should be filed on or before March 18, 1988. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

BILLING CODE 6717-01-M

[Docket No. RP88-25-004]

South Georgia Natural Gas Co.; Proposed Changes in FERC Gas Tariff

March 11, 9888.

Take notice that on March 8, 1988, South Georgia Natural Gas Company (South Georgia) tendered for filing the following tariff sheets to its FERC Gas Tariff, First Revised Volume No. 1, to be effective December 1, 1987;

Original Sheet No. 16CC.1

Second Revised Sheet Nos. 16L–16N
Second Revised Sheet Nos. 16BB–16CC
Second Revised Sheet Nos. 34T–34V

South Georgia states that on November 16, 1987, it filed in this proceeding revisions to its FERC Gas Tariff to establish as part of its Tariff Rate Schedules FT and IT, the General Terms and Conditions for Rate Schedules FT and IT, and Forms of Service Agreement under Rate Schedules FT and IT. On January 15, 1988, South Georgia filed revised tariff sheets pursuant to the Commission's Order Accepting Filing and Suspending Tariff Sheets, Subject to Refund and Conditions, Granting Waiver of Notice Requirement and Convening Technical Conference issued December 16, 1987. The Office of Pipeline and Producer Regulation issued a Letter Order dated February 12, 1988, which rejected certain revised tariff sheets without prejudice to South Georgia filing revised sheets within 15 days. South Georgia states that, pursuant to approval of the Commission Staff, South Georgia has submitted the revised tariff sheets listed above and has requested a waiver of the Commission's Regulations to make the revised sheets effective December 1, 1987.

South Georgia states that copies of the filing were mailed to all of South Georgia's jurisdictional purchasers, shippers, and interested state commissions, as well as the parties listed on the Commission's official service list compiled in this proceeding.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with the Commission's Rules of Practice and Procedure (18 CFR 385.211 or 385.214). All such motions or protests should be filed on or before March 18, 1988. Protests will be considered by the Commission in determining the appropriate action to be taken but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,

Acting Secretary.

BILLING CODE 6717-01-M

ENVIRONMENTAL PROTECTION AGENCY

[OPTS-50566; FRL-3340-8]

Consent Orders and Significant New Use Rules Issued Under Section 5 of the Toxic Substances Control Act; Availability of Document and Request for Comment

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of availability and request for comment.

SUMMARY: This notice announces the availability of the document "Standard Provisions for section 5(e) Consent Orders and Corresponding Significant New Use Rule Provisions Issued Under the Toxic Substances Control Act" (TSCA) and the Agency's request for public comment on the provisions contained in the document. The document is available from EPA's TSCA Assistance Office.

DATES: The document will be available for distribution on March 25, 1988. Comments must be received by April 25, 1988.

ADDRESSES: The document may be requested by mail or telephone from EPA's TSCA Assistance Office at the following address or telephone number: Environmental Protection Agency, TSCA Assistance Office (TS-799), Office of Toxic Substances, Room E-543, 401 M Street SW., Washington, DC 20460 (202-554-1404).

Written comments must be mailed or delivered to the same address.

FOR FURTHER INFORMATION CONTACT: Michael M. Stahl, Acting Director, TSCA Assistance Office (TS-799), Office of Toxic Substances, Environmental Protection Agency, 401 M Street SW., Washington, DC 20460 (202-554-1404).

SUPPLEMENTARY INFORMATION: The EPA Office of Toxic Substances (OTS) is currently revising the standard provisions for consent orders EPA issues under section 5 of TSCA. These provisions govern the manufacture, processing, distribution in commerce, use, and disposal of new chemical substances pending the development of information sufficient to permit a reasoned evaluation of the health and environmental effects of those substances. The subjects addressed by the provisions include testing requirements, personal protective equipment, employee information and training, product labeling, material safety data sheets, use restrictions, distribution restrictions, disposal restrictions, and recordkeeping requirements.

The solicitation of public comments at this time is part of an Agency effort to standardize the language of the provisions of all section 5(e) consent orders issued by the Agency to the extent possible so that the time and resources required for consent order development can be minimized. Once these revisions are finalized, manufacturers and importers of new chemical substances who agree to the terms of the standard consent order provisions will benefit from an abbreviated order development process and more uniform regulatory provisions with which to comply.

EPA strongly encourages persons who believe they may be submitting premanufacture notices, and thus may be offered the option of agreeing to a consent order, to comment on the language of these standard provisions at this time. Requests to change the language of standard provisions during development of specific consent orders inevitably delay the development process due to the added levels of administrative review such requests necessitate. Persons who are willing to accept standard provisions will generally find that they are able to conclude negotiations, sign an order, and begin production more quickly than those who do not.

The Agency intends to issue a Significant New Use Rule (SNUR) to reflect the terms of each consent order it issues under section 5(e). The SNUR will extend the terms of the order to persons other than the original premanufacture notice submitter who may wish to manufacture or process the chemical substance. On April 29, 1987, the Agency proposed standard language for use in SNURs. That language has been modified to incorporate public comment and is included in the document now being made available so that persons who may be subject to a consent order may compare the provisions that will be used in a corresponding SNUR. The standard language for SNURs may be modified further to reflect comments submitted in response to the document now being made available.

Dated: March 10, 1988.

Charles L. Elkins,

Director, Office of Toxic Substances.

BILLING CODE 6560-50-M

FEDERAL COMMUNICATIONS COMMISSION

[FCC 88–12]

Offer of Comparably Efficient Interconnection to Enhanced Service Providers

AGENCY: Federal Communications Commission.

ACTION: Memorandum opinion and order conditionally approving Bell Atlantic's comparably efficient interconnection (CEI) plan for a message storage service.

SUMMARY: The Commission conditionally approved Bell Atlantic's Comparably Efficient Interconnection plan for a message storage service for complying with the CEI parameters and pricing requirements established in the *Phase I Order* (104 FCC 2d 958 (1986), 51 FR 24350 (1986)) in *Computer III*, finding that Bell Atlantic satisfied most of those parameters and requirements.

ADDRESS: Federal Communications Commission, 1919 M Street, NW., Washington, DC.

FOR FURTHER INFORMATION CONTACT: Raymond Dujack, Policy and Program Planning Division, Common Carrier Bureau (202) 632–9342.

SUPPLEMENTARY INFORMATION: This is a summary of the Commission's Memoradum Opinion and Order (FCC 88–12), adopted January 14, 1988, and released February 18, 1988. The full text of this Commsision decision is available for inspection and copying during normal business hours in the FCC Office of Public Affairs (Room 202), 1919 M Street, NW., Washington, DC. The complete text of this decision may also be purchased from the Commission's copy contractors, International Transcription Service, (202) 857–3800, 2100 M Street, NW., Suite 140, Washington, DC 20037.

Summary of Memoradum Opinion and Order

1. On January 14, 1988, the FCC conditionally approved the Comparably Efficient Interconnection (CEI) plan for message storage service that was filed by Bell Atlantic on March 6, 1987, pursuant to the *Phase I Order* (104 FCC 2d 958 (1986), 51 FR 24350 (1986)) in *Computer III*. Bell Atlantic's proposed service will allow non-telephone company information service providers to store messages electronically in telephone company-owned equipment located in central offices which the public would access through the public switched network, via line-side connections to the end office switch. Bell Atlantic may require a waiver of the MJF provisions to offer this service. Bell Atlantic's CEI pricing proposal, its plan for complying with the network information disclosure safeguard, and its proposed quarterly reports that compare the timing of installation and maintenance were also approved by the Commission.

2. However, the Commission conditioned approval of the plan on Bell Atlantic's obtaining approval of amendments to its ONA plan that demonstrate that such reports are not needed, as specified in the *Computer III, Phase II Reconsideration Order* (FCC 88–10, released Feb. 18, 1988), or of amendments to its CEI plan that includes more detail in its quality and reliability reports. Bell Atlantic is required to amend its plan to conform with the customer proprietary network information requirements of the *Computer III, Phase II Reconsideration Order*.

Ordering Clause

3. It is hereby ordered, that pursuant to sections 1, 4(i) and (j), 201, 202, 203, 205, 218, and 405 of the Communications Act of 1934, as amended, 47 U.S.C. 151, 154(i) and (j), 201, 202, 203, 205, 218, and 405, and 5 U.S.C. 553, and Bell Atlantic CEI Plan described in paragraph 1 above IS APPROVED, subject to the conditions described herein.

Federal Communications Commission.

H. Walker Feaster III,

Acting Secretary.

[FR Doc. 88–5742 Filed 3–15–88; 8:45 am]

BILLING CODE 6712-01-M

[FCC 88–11]

Furnishing of Enhanced Services and Customer-Premises Equipment by Communications Common Carriers; Pacific Bell and Nevada Bell

AGENCY: Federal Communications Commission.

ACTION: Memorandum Opinion and Order conditionally approving Pacific Bell and Nevada Bell's Comparably Efficient Interconnection plan for Voice Mail Services.

SUMMARY: The Commission conditionally approved Pacific Bell and Nevada Bell's Comparably Efficient Interconnection (CEI) plan for Voice Mail Services, a type of enhanced service that allows users to leave and retrieve messages stored in equipment collocated with Pacific's basic service facilities. The Commission approved Pacific's plan for complying with the CEI parameters and pricing requirements established in the *Phase I Order* (104 FCC 2d 958 (1986), 51 FR 24350 (1986)) in *Computer III*.

ADDRESS: Federal Communications Commission, 1919 M Street NW., Washington, DC 20554.

FOR FURTHER INFORMATION CONTACT: Marion Gordon, Policy and Program Planning Divison, Common Carrier Bureau (202) 632–6363.

SUPPLEMENTARY INFORMATION: This is a summary of the Commission's Memorandum Opinion and Order (FCC 88–11), adopted January 14, 1988, and released February 18, 1988. The full text of this Commission decision is available for inspection and copying during normal business hours in the FCC Office of Public Affairs (Room 202), 1919 M Street NW., Washington, DC. The complete text of this decision may also be purchased from the Commission's copy contractors, International Transcription Service, (202) 857–3800, 2100 M Street, NW., Suite 140, Washington, DC 20037.

Summary of Memorandum Opinion and Order

1. On January 14, 1988, the FCC conditionally approved the Comparably. Efficient Interconnection (CEI) plan for Voice Mail Service (VMS) that was filed by the Pacific Bell and Nevada Bell (Pacific) on July 2, 1987, pursuant to the *Phase I Order* (104 FCC 2d 958) (1986), 51 FR 24350 (1986)) in *Computer III*. Pacific's VMS is a type of enhanced service that allows users to leave and retrieve messages stored in equipment collocated with Pacific's basic facilities. The Commission approved Pacific's proposals for complying with the CEI parameters and pricing requirements.

2. However, the Commission placed certain conditions on Pacific's plan. First, FCC approval is conditioned upon Pacific's obtaining approval either of amendments to its ONA plan that demonstrate that such reports are not needed, as specified in the *Computer III, Phase II Reconsideration Order* (FCC 88–10, released Feb. 18, 1988), or amendments to its CEI plan that include more detail in its quality and reliability reports. Pacific must also amend its plan to conform with the customer proprietary network information requirements of the *Computer III, Phase II Reconsideration Order*. The Commission noted that Pacific must disclose information about network changes or new network services related to VMS whenever required by the Commission's rules. It also required Pacific to describe, by March 21, 1988, the billing arrangements, if any, that will be available to providers of competing services.

Ordering Clause

3. It is hereby ordered, that pursant to sections 1, 4 (i) and (j), 201, 202, 203, 205, 218, and 405 of the Communications Act of 1934, as amended, 47 U.S.C. 151, 154 (i) and (j), 201, 202, 203, 205, 218, and 405, and 5 U.S.C. 553, Pacific's CEI Plan for VMS is approved, subject to the conditions described herein.

Federal Communications Commission.

H. Walker Feaster III,

Acting Secertary.

BILLING CODE 6712-01-M

FEDERAL MARITIME COMMISSION

Notice of Agreement(s) Filed

The Federal Maritime Commission hereby gives notice of the filing of the following agreement(s) pursuant to section 5 of the Shipping Act of 1984.

Interested parties may inspect and obtain a copy of each agreement at the Washington, DC. Office of the Federal Maritime Commission, 1100 L Street, NW., Room 10325. Interested parties may submit comments on each agreement to the Secretary, Federal Maritime Commission, Washington, DC 20573, within 10 days after the date of the **Federal Register** in which this notice appears. The requirements for comments are found in § 572.603 of Title 46 of the Code of Federal Regulations. Interested persons should consult this section before communicating with the Commission regarding a pending agreement.

Agreement No.: 224–200099.

Title: Seagate Corporation Terminal Agreement.

Parties:

Seagate Corporation (Seagate)
Delaware Operating Company (DOC)

Synopsis: The proposed agreement provides for DOC to render terminal and stevedoring services for Seagate at Piers 82–84 in the Port of Philadelphia.

By Order of the Federal Maritime Commission.

Josepn C. Polking,

Secretary.

Dated: March 11, 1988.

[FR Doc. 88–5702 Filed 3–15–88; 8:45 am]

BILLING CODE 6730-01-M

Agreement(s) Filed

The Federal Maritime Commission hereby gives notice of the filing of the following agreement(s) pursuant to section 5 of the Shipping Act of 1984.

Interested parties may inspect and obtain a copy of each agreement at the Washington, DC. Office of the Federal Maritime Commission, 1100 L Street, NW., Room 10325. Interested parties may submit comments on each agreement to the Secretary, Federal Maritime Commission, Washington, DC 20573, within 10 days after the date of the **Federal Register** in which this notice appears. The requirements for comments are found in § 572.603 of Title 46 of the Code of Federal Regulations. Interested persons should consult this section before communicating with the Commission regarding a pending agreement.

Agreement No.: 217–010051–015.

Title: Mediterranean Force Majeure Agreement.

Parties:

Compania Trasatlantica Espanola
  (Spanish Line)
Costa Container Line
Farrell Lines, Inc.
Italia Di Navigazione, S.p.A.
Jugolinija
Lykes Bros. Steamship Co., Inc.
A.P. Moller Maersk Line
Nedlloyd Lijnen, B.V.
Sea-Land Service, Inc.
Trans Freight Lines
Zim Israel Navigation Co., Inc.

Synopsis: The proposed amendment would change the name of the agreement to the Mediterranean Space Charter Agreement. It would also eliminate the requirement of a force majeure situation to trigger the chartering authority of the agreement, replacing it with more general space chartering authority at the discretion of the parties and would add an arbitration provision to the agreement. The parties have requested a shortened review period.

By Order of the Federal Maritime Commission.

Joseph C. Polking,

Secretary.

Dated: March 11, 1988.

BILLING CODE 6730-01-M

Shipping Conditions in the United States/Korea Trade; Filing of Petition; Pacific America Line (PACAM)

Navios Management, Inc. d/b/a Pacific America Line ("PACAM"), a common carrier by water in the United States/Korea trade has filed a petition under section 19 of the Merchant Marine Act, 1920, 46 U.S.C. app. 876 requesting that the Federal Maritime Commission issue regulations under 46 CFR Part 585 to adjust or meet conditions unfavorable to shipping in the foreign trade of the United States. Specifically, PACAM alleges that the cargo preference laws of the Republic of Korea ("ROK"), which reserve for ROK-flag ocean carriers 100 percent of all the steel products exported from the ROK by water, subject to a waiver system, have resulted in irreparable harm to PACAM.

In order for the Commission to make a thorough evaluation of Petitioner's allegations, interested persons are requested to submit views, arguments and/or data on the petition no later than April 15, 1988. Responses shall be directed to the Secretary, Federal Maritime Commission, Washington, DC

VOL 53 ISS 51 MR 16 1988 UMI

20573, in an original and 15 copies. Responses shall also be served on counsel for Petitioner: Alan F. Wohlstetter, Esq., Denning & Wohlstetter, 1700 K Street, NW., Washington, DC 20006.

Concurrently with the publication of the petition, the Commission, by separate letter, is requesting that the Department of State review the matter to determine whether the situation can be resolved through diplomatic channels, and if so, to make whatever efforts appropriate towards reaching such a resolution.

Copies of the petition are available for examination at the Washington, DC, office of the Commission, 1100 L Street, NW., Room 11101.

By the Commission March 9, 1988.

Joseph C. Polking,

Secretary.

[FR Doc. 88-5701 Filed 3-15-88; 8:45 am]

BILLING CODE 6730-01-M

[Docket No. 88-6]

Jorge Villena aka George Villena, Sea-Trade Shipping, Star Bright Container Line, and Caribbean Sun International; Order of Investigation

This proceeding is instituted pursuant to sections 11, 12 and 13 of the Shipping Act of 1984 ("1984 Act"), 46 U.S.C. app. sections 1710, 1711, and 1712 and sections 22, 27, and 32 of the Shipping Act, 1916 ("1916 Act"), 46 U.S.C. app. sections 821, 826, and 831.

It appears that Jorge Villena aka George Villena is operating as a non-vessel operating common carrier ("NVO") in the foreign and domestic commerce of the United States, individually, and as Sea-Trade Shipping, Star Bright Container Line, and Caribbean Sun International. He conducts business from an office located at 1401 NW., 70th Avenue, Miami, Florida.

In *Cari-Cargo International, Inc. Jorge Villena and Sea Trade Shipping* (I.D. April 24, 1986, administratively final June 5, 1986), the Commission found the respondents named therein, Jorge Villena, Cari-Cargo International, and Sea Trade Shipping, to have violated various sections of the 1916 Act and sections 8(a)(1) (by operating without a tariff on file at the Commission), 10(a)(1) (by underpaying vessel-operating common carriers by means of cargo misdescriptions), and 10(b)(1) (by failing to charge rates specified in tariffs on file at the Commission) of the 1984 Act, 46 U.S.C. app. sections 1707(a)(1), 1709(a)(1), and 1709(b)(1). Each of the named respondents was ordered to cease and desist from violating those sections of the 1984 Act.

It appears that Mr. Villena presently conducts the NVO operations of Sea-Trade Shipping and Star Bright Container Line under filed tariffs and Caribbean Sun International without a tariff on file at the Commission.

It further appears that Mr. Villena has engaged in charging different compensation for the transportation of property than the rates and charges shown in the tariffs of Sea-Trade and Star Bright.

It further appears that in conducting such NVO operations Mr. Villena knowingly and willfully, by false, unjust, or unfair device, attempted to and obtained ocean transportation for property at less than the rates or charges that would otherwise be applicable.

Now Therefore It Is Ordered, That pursuant to section 11 of the 1984 Act and section 22 of the 1916 Act, an investigation into the practices of Jorge Villena aka George Villena, Sea-Trade Shipping, Star Bright Container Line, and Caribbean Sun International is hereby instituted to determine:

1. Whether, during the period from June 5, 1986 and continuing to the present, Jorge Villena, Sea-Trade Shipping, Star Bright Container Line or Caribbean Sun International knowingly and willfully violated section 10(a)(1) of the 1984 Act, and/or section 16, Initial Paragraph of the 1916 Act, directly or indirectly, by a false or other unjust or unfair device or means, by obtaining or attempting to obtain ocean transportation for property at less than the rates or charges that would otherwise be applicable;

2. Whether, during the period from June 5, 1986 and continuing to the present, Jorge Villena, Sea-Trade Shipping, Star Bright Container Line or Caribbean Sun International violated section 10(b)(1) of the 1984 Act, section 2 of the Intercoastal Shipping Act, 1933, and/or section 18(a) of the 1916 Act by charging, demanding, collecting, or receiving greater, less, or different compensation for the transportation of property or for any service in connection therewith than the rates and charges that are shown in applicable tariffs or service contracts;

3. Whether, during the period from June 5, 1986 and continuing to the present, Jorge Villena or Caribbean Sun International violated section 8(a)(1) of the 1984 Act, section 2 of the Intercoastal Shipping Act, 1933, and/or section 18(a) of the 1916 Act, by failing to file with the Commission and keep open to public inspection, tariffs showing all rates, charges, classifications, rules, and practices between all points or ports on his or their own routes and on any through transportation route that has been established; and

4. Whether, in the event Jorge Villena, Sea-Trade Shipping, Star Bright Container Line, and Caribbean Sun International violated any of the above-cited provisions, civil penalties should be assessed and, if so, the amount of such penalties and whether any other appropriate order should be entered.

It Is Further Ordered, That a public hearing be held in this proceeding and that the matter be assigned for hearing before an Administrative Law Judge of the Commission's Office of Administrative Law Judges at a date and place to be hereafter determined by the Administrative Law Judge, in compliance with Rule 61 of the Commission's Rules of Practice and Procedure, 46 CFR 502.61;

It Is Further Ordered, That Jorge Villena, Sea-Trade Shipping, Star Bright Container Line, and Caribbean Sun International be designated Respondents in this proceeding;

It Is Further Ordered, That pursuant to the terms of Rule 61 of the Commission's Rules of Practice and Procedure, 46 CFR 502.61, the initial decision of the Administrative Law Judge shall be issued by March 10, 1989 and the final decision of the Commission shall be issued by July 10, 1989.

It Is Further Ordered, That the Commission's Bureau of Hearing Counsel is designated a party to this proceeding;

It Is Further Ordered, That notice of this Order be published in the Federal Register, and a copy be served on parties of record;

It Is Further Ordered, That other persons having an interest in participating in this proceeding may file petitions for leave to intervene in accordance with Rule 72 of the Commission's Rules of Practice and Procedure, 46 CFR 502.72;

It Is Further Ordered, That all future notices, orders, and/or decisions issued by or on behalf of the Commission in this proceeding, including notice of the time and place of hearing or prehearing conference, shall be served on parties of record; and

It Is Further Ordered, That all documents submitted by any party of record in this proceeding shall be directed to the Secretary, Federal Maritime Commission, Washington, DC 20573, in accordance with Rule 118 of the Commission's Rules of Practice and Procedure, 46 CFR 502.118, and shall be served on all parties of record.

By the Commission.

Joseph C. Polking,

Secretary.

BILLING CODE 6730-01-M

FEDERAL RESERVE SYSTEM

Landmark/Community Bancorp, Inc., et al.; Formations of; Acquisition by; and Mergers of Bank Holding Companies; Correction

This notice corrects a previous **Federal Register** notice (FR Doc. 88-1700) published at page 2539 of the issue for Thursday, January 28, 1988.

Under the Federal Reserve Bank of Boston, the entry for Landmark/Community Bancorp, Inc. is revised to read as follows:

A. **Federal Reserve Bank of Boston** (Robert M. Brady, Vice President) 600 Atlantic Avenue, Boston, Massachusetts 02106:

1. *Landmark/Community Bancorp, Inc.,* Hartford, Connecticut; to acquire 100 percent of the voting shares of Landmark Financial Corpporation, Hartford, Connecticut, and thereby indirectly acquire The Landmark Bank, Hartford, Connecticut; Community Bancorp, Inc., Glastonbury, Connecticut, and thereby indirectly acquire Community National Bank, Glastonbury, Connecticut; and up to 24.9 percent of the voting shares of SBT Corp., Old Saybrook, Connecticut, and thereby indirectly acquire a parallel interest in Saybrook Bank and Trust Company, Old Saybrook, Connecticut.

Comments on this application must be received by April 1, 1988.

Board of Governors of the Federal Reserve System, March 11, 1988.

James McAfee,

Associate Secretary of the Board.

[FR Doc. 88-5680 Filed 3-15-88; 8:45 am]

BILLING CODE 6210-01-M

Lincoln Financial Corp. et al., Formation of; Acquisitions by; and Mergers of Bank Holding Companies

The companies listed in this notice have applied for the Board's approval under section 3 of the Bank Holding Company Act (12 U.S.C. 1842) and § 225.14 of the Board's Regulation Y (12 CFR 225.14) to become a bank holding company or to acquire a bank or bank holding company. The factors that are considered in acting on the applications are set forth in section 3(c) of the Act (12 U.S.C. 1842(c)).

Each application is available for immediate inspection at the Federal Reserve Bank indicated. Once the application has been accepted for processing, it will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing to the Reserve Bank or to the offices of the Board of Governors. Any comment on an application that requests a hearing must include a statement of why a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute and summarizing the evidence that would be presented at a hearing.

Unless otherwise notes, comments regarding each of these applications must be received not later than April 4, 1988.

A. **Federal Reserve Bank of Chicago** (David S. Epstein, Vice President) 230 South LaSalle Street, Chicago, Illinois 60690:

1. *Linclon Financial Corporation,* Fort Wayne, Indiana; to acquire 100 percent of the voting shares of Rush County National Corporation, Rushville, Indiana, and thereby indirectly acquire Rush County National Bank of Rushville, Rushville, Indiana.

2. *Peoples Bancorporation of Northwest Iowa,* Rock Valley, Iowa; to become a bank holding company by acquiring 83.6 percent of the voting shares of Peoples Bank & Trust, Rock Valley, Iowa. Comments on this application must be received by April 7, 1988.

Board of Governors of the Federal Reserve System, March 11, 1988.

James McAfee,

Associate Secretary of the Board.

BILLING CODE 6210-01-M

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Health Care Financing Administration

Medicaid Program; Hearing: Reconsideration of Disapproval of a South Dakota State Plan Amendment

AGENCY: Health Care Financing Administration (HCFA), HHS.

ACTION: Notice of hearing.

SUMMARY: This notice announces an administrative hearing on May 3, 1988 in Denver, Colorado to reconsider our decision to disapprove South Dakota State Plan Amendment 87-4.

Closing Date: Requests to participate in the hearing as a party must be received by the Docket Clerk March 31, 1988.

FOR FURTHER INFORMATION CONTACT: Docket Clerk, Hearing Staff, Bureau of Eligibility, Reimbursement and Coverage, 300 East High Rise, 6325 Security Boulevard, Baltimore, Maryland 21207, Telephone: (301) 966-4470.

SUPPLEMENTARY INFORMATION: This notice announces an administrative hearing to reconsider our decision to disapprove South Dakota State Plan Amendment 87-4.

Section 1116 of the Social Security Act and 45 CFR Parts 201 and 213 establish Department procedures that provide an administrative hearing for reconsideration of a disapproval of a State plan or plan amendment. HCFA is required to publish a copy of the notice to a State Medicaid Agency that informs the agency of the time and place of the hearing and the issues to be considered. (If we subsequently notify the agency of additional issues that will be considered at the hearing, we will also publish that notice.)

Any individual or group that wants to participate in the hearing as a party must petition the Hearing Officer within 15 days after publication of this notice, in accordance with the requirements contained in 45 CFR 213.15(b)(2). Any interested person or organization that wants to participate as amicus curiae must petition the Hearing Officer before the hearing begins in accordance with the requirements contained in 45 CFR 213.15(c)(1). If the hearing is later rescheduled, the Hearing Officer will notify all participants.

The issue in this matter is whether South Dakota SPA 87-4 which adds case management services to its Medicaid State plan violates section 1915(g) (1) and (2) and section 1902(a)(23) of the Social Security Act and implementing Federal regulations at 42 CFR 447.201.

Section 1915(g)(2) of the Social Security Act defines case management as, "Services which will assist individuals eligible under the plan in gaining access to needed medical, social, educational and other services." The State proposes to equate Medicaid case management with court-appointed guardianship. Under State plan amendment 87-4 the State defines case management services to include entering into contracts on behalf of a client, managing client finances, and making annual reports to the court. While these may be appropriate activities for legal guardians, they do not comport with the statutory definition of Medicaid case management services. South Dakota further includes legal services within its definition of case management. HCFA believes this is outside the scope of case

OL

988
MI

management services as defined in section 1915(g)(2) of the Act which entails "assisting individuals * * * in gaining access to * * * services." HCFA has determined the actual provision of those services to which access is gained, however, is not encompassed in this definition.

Additionally, section 1915(g)(1) of the Act forbids the use of case management services in any manner which would restrict the choice of an individual to receive medical assistance in violation of section 1902(a)(23) of the Act. The provisions of section 1902(a)(23) apply both to the choice of case management providers and to the nature of the case management services provided.

The State proposes that case managers would either choose a guardian for the client or become guardians themselves. As legal guardians, case managers would make the final decisions regarding care for the client. Since it is the case management provider who chooses the guardian, who in turn is empowered by the court to make decisions on behalf of the client, HCFA has determined this would violate the explicit statutory requirement that case management services not restrict freedom of provider choice. Moreover, South Dakota limits case management providers to "private nonprofit" corporations and develops provider qualifications based on the ability of the agency to provide court-appointed guardianship. HCFA believes such qualifications also serve to restrict free choice of provider in violation of section 1902(a)(23) of the Act.

Furthermore, Congress expressed specific concern that payment for case management services not duplicate payments for this purpose made by other payors (H. Rep. No. 453, 99th Cong., 1st Sess 546 (1985)). The Medicaid statute also precludes payment for services for which another payor is legally responsible or for which no payment would otherwise be required. HCFA believes the provision of guardianship services under the guise of case management services under Medicaid would duplicate provisions under State law for court-appointed guardianship. Moreover, HCFA believes by including in this case management target group those "developmentally disabled individuals residing in ICF, SNF, ICF/MR or home and community-based facilities * * * "another source of payment duplication is created. Activities described as case management, such as gathering essentially information on client background, are an integral part of the institutional or home and community-based services for which Medicaid payment is already made.

Federal regulations at 42 CFR 447.201 require that a State plan describe the policy and methods to be used in setting payment rates for each type of service included in the State's Medicaid plan. Although South Dakota has asked for a retroactive effective date of July 1, 1987, HCFA has determined the State has not provided a description of a payment methodology to be applied to case management services.

The notice to South Dakota announcing an administrative hearing to reconsider the disapproval of its State plan amendment reads as follows:

Mr. James W. Ellenbecker,
Secretary, South Dakota Department of Social Services, Office of Medical Services, Richard F. Kneip Building, 700 Governors Drive, Pierre, South Dakota 57501-2291

Dear Mr. Ellenbecker: This is to advise you that your request for reconsideration of the decision to disapprove South Dakota State Plan Amendment 87-4 was received on February 10, 1988.

You have requested a reconsideration of whether this plan amendment conforms to the requirements for approval under the Social Security Act and pertinent Federal regulations.

There are four issues in this matter. The first issue is whether South Dakota's definition of case management services is within the scope of the statutory definition of case management services found in section 1915(g)(2) of the Social Security Act. The second issue is whether the use of case management services as defined by South Dakota would violate a beneficiary's free choice of provider under section 1902(a)(23) of the Act. The third issue is whether the State provides for duplication of payments for Medicaid payment for which another entity is legally obligated or for which no payment would otherwise be required. The fourth issue is whether South Dakota has provided a payment methodology for case management services as required by 42 CFR 447.201.

I am scheduling a hearing on your request to be held on May 3, 1988 at 10:00 a.m. in Room 491, Federal Building, 1961 Stout Street, Denver, Colorado. If this date is not acceptable, we would be glad to set another date that is mutually agreeable to the parties.

I am designating Mr. Stanley Krostar as the presiding officer. If these arrangements present any problems, please contact the Docket Clerk. In order to facilitate any communication which may be necessary between the parties to the hearing, please notify the Docket Clerk of the names of the individuals who will represent the State at the hearing. The Docket Clerk can be reached at (301) 966-4470.

Sincerely,

William L. Roper, M.D.,
Administrator.

(Sec. 1116 of the Social Security Act (42 U.S.C. 1316))

(Catalog of Federal Domestic Assistance Program No. 13.714, Medicaid Assistance Program)

Dated: March 10, 1988.

William L. Roper,
Administrator, Health Care Financing Administration.

BILLING CODE 4120-03-M

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Office of Administration

[Docket No. N-88-1787]

Submission of Proposed Information Collections to OMB

AGENCY: Office of Administration, HUD.

ACTION: Notices.

SUMMARY: The proposed information collection requirements described below have been submitted to the Office of Management and Budget (OMB) for review, as required by the Paperwork Reduction Act. The Department is soliciting public comments on the subject proposals.

ADDRESSES: Interested persons are invited to submit comments regarding this proposal. Comments should refer to the proposal by name and should be sent to: John Allison, OMB Desk Officer, Office of Management and Budget, New Executive Office Building, Washington, DC 20503.

FOR FURTHER INFORMATION CONTACT: David S. Cristy, Reports Management Officer, Department of Housing and Urban Development, 451 7th Street, Southwest, Washington, DC 20410, telephone (202) 755-6050. This is not a toll-free number. Copies of the proposed forms and other available documents submitted to OMB may be obtained from Mr. Cristy.

SUPPLEMENTARY INFORMATION: The Department has submitted the proposals for the collection of information, as described below, to OMB for review, as required by the Paperwork Reduction Act (44 U.S.C. Chapter 35).

The Notices list the following information: (1) The title of the information collection proposal; (2) the office of the agency to collect the information; (3) the description of the need for the information and its proposed use; (4) the agency form number, if applicable; (5) what members of the public will be affected by the proposal; (6) how frequently information submissions will be required; (7) an estimate of the total numbers of hours needed to prepare the information submission; (8) whether the proposal is new or an extension, reinstatement, or revision of an information collection requirement; and (9) the names and telephone numbers of an agency official familiar with the proposal and of the OMB Desk Officer for the Department.

Authority: Sec. 3507 of the Paperwork Reduction Act, 44 U.S.C. 3507; section 7(d) of the Department of Housing and Urban Development Act, 42 U.S.C. 3535(d).

Dated: March 10, 1988.

John T. Murphy,
Director, Information Policy and Management Division.

Proposal: Insurance Claims Package 223(F)

Office: Administration.

Description of the Need for the Information and its Proposed Use: This information is needed so that lenders can claim insurance benefits on defaulted loans. HUD uses the information to compute the claim settlement due the mortgagee.

Form Number: HUD-27008, 27009B, 27009D, and 27009F.

Respondents: Businesses or Other For-Profit.

Frequency of Respondents: On Occasion.

Estimated Burden Hours: 60.

Status: Extension.

Contact: Alice P. Thomas, HUD, (202) 755-7523; John Allison, OMB, (202) 395-6880.

Date: March 10, 1988.

Proposal: Section 8 Housing Voucher Program

Office: Housing.

Description of the Need for the Information and its Proposed Use: Section 207 of the Housing and Urban-Rural Recovery Act of 1983 amends section 8 of the U.S. Housing Act of 1937 to authorize HUD to conduct a housing voucher demonstration program using a payment standard. The payment standard which is based on the fair market rent is used to determine the monthly assistance which may be paid for a family.

Form Number: None.

Respondents: State or local Governments.

Frequency of Respondents: On Occasion, Monthly, Quarterly, and Annually.

Estimated Burden Hours: 240.

Status: Reinstatement.

Contact: Gwendolyn S. Carter, HUD, (202) 755-6477; John Allison, OMB, (202) 395-6880.

Date: March 10, 1988.

BILLING CODE 4210-01-M

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

[ID-030-07-4332-10]

Emergency Closure of Public Lands, Idaho

AGENCY: Bureau of Land Management, Interior.

ACTION: Public lands closure.

SUMMARY: The Idaho Falls District of the Bureau of Land Management (BLM) announces the closure of public lands located in the Stinking Springs area north of the South Fork of the Snake River.

DATE: March 4, 1988.

SUPPLEMENTARY INFORMATION: Notice is hereby given that effective March 4, 1988 BLM-administered public lands located in the Stinking Springs area north of the South Fork of the Snake River near Heise, Idaho are closed to motor vehicle use. The area is bounded generally by the South Fork of the Snake River Road on the south and west, the Kelly Canyon Road and Targhee National Forest on the north and east. The legal description of the lands is as follows:

Boise Meridian

Township 4 North, Range 41 East

Section 32: SE¼, SE¼NE¼, and lands east of the Kelly Canyon Road in the NE¼NE¼, NW¼NE¼, SW¼NE¼, and NE¼SW¼.
Section 33: All.

Township 3 North, Range 41 East

Section 2: SW¼.
Section 3: All.
Section 4: SE¼, SE¼SW¼, NE¼SW¼, NW¼SW¼.
Section 5: NW¼NE¼.
Section 8: Lots 6 and 8.
Section 9: NE¼, NW¼, SE¼, NE¼SE¼, and Lots 2 and 3.
Section 10: NW¼, SW¼, NE¼NE¼, NW¼NE¼, SW¼NE¼, and the N½ of Lots 1 and 2.
Section 11: N½NW¼, and Lots 2, 3 and N½ of Lot 4.
Section 15: Lots 7 and 8.

All Federal lands administered by the Bureau of Land Management described above are closed to motor vehicles beginning March 4, 1988. Exceptions to this closure include administrative use of vehicles on the described public lands by the Bureau of Land Management and permittees authorized by the agency.

The purpose of this closure is to protect watershed, wildlife and scenic values from damage caused by off-road vehicle use, and allow vegetation to establish on roads and trails that were seeded in the fall of 1987.

The authority for this closure is 43 CFR 8341.2. This emergency closure will remain in effect until formal designations can be made as specified in the Medicine Lodge Resource Management Plan finalized November 29, 1985. The emergency closure is necessary because of the early spring conditions and unexpected accessibility of the area to motor vehicles.

BLM is considering an interim designation to follow the emergency closure that would close the area except for a motorcycle trail along the Stinking Springs road to the rim of the Snake River Canyon. An environmental analysis is being prepared for the proposed trail that will evaluate the impacts of alternate routes and no action.

FOR FURTHER INFORMATION CONTACT: Lloyd H. Ferguson, District Manager, Idaho Falls District, 940 Lincoln Road, Idaho Falls, Idaho 83401, (208) 529-1020.

Dated: March 7, 1988.

Lloyd H. Ferguson,
District Manager.

BILLING CODE 4310-GG-M

INTERSTATE COMMERCE COMMISSION

Forms Under Review by Office of Management and Budget

The following proposal for collection of information under the provisions of the Paperwork Reduction Act (44) U.S.C. Chapter 35) is being submitted to the Office of Management and Budget for review and approval. Copies of the forms and supporting documents may be obtained from the Agency Clearance Officer, Ray Houser (202) 275-6723. Comments regarding this information collection should be addressed to Ray Houser, Interstate Commerce Commission, Room 1325, 12th and Constitution Ave., NW., Washington, DC 20423 and to Gary Waxman, Office of Management and Budget, Room 3228 NEOB, Washington, DC 20503, (202) 395-7340.

Type of Clearance: New Collection.

Bureau/Office: Office of Transportation Analysis.

Title of Form: Railroad User Survey.

OMB Form No.:

Agency Form No.: OTA-1

Frequency: Non-recurring.

Respondents: Shippers using new shortline and regional railroads.

No. of Respondents: 590.

Total Burden Hrs.: 197.

Brief Description of the need & proposed use: This survey will be used to collect selected data from shippers on the impact of new short line and regional railroads. The information will be analyzed and the results reported to congress to help assess our present policy of promoting growth of such railroads.

Noreta R. McGee,

Secretary.

BILLING CODE 7035-01-M

[Ex Parte No. MC-37 (Sub-40)]

Commercial Zones And Terminal Areas

AGENCY: Interstate Commerce Commission.

ACTION: Notice of availability of environmental assessment and request for comments.

SUMMARY: An environmental assessment (EA) has been prepared for this proceeding which proposes to expand motor carrier commercial zones and terminal areas to take into account economic and demographic changes, as well as changes in the motor carrier carrier industry since the extent of commercial zones and terminal areas was last considered in 1976. The EA concludes that the adoption of this action would not have a significant impact on energy consumption or the quality of the human environment. The EA identifies potential adverse and beneficial environmental effects, but concludes that adverse environmental effects, if any, would be slight and short-lived. The EA will be served on all parties of record. Other interested parties may receive copies of the EA from the contact person listed below.

DATES: Comments are requested and should be filed by April 15, 1988.

ADDRESS: Send an original and one copy of pleadings addressed to:

(1) Ex. Parte No. MC-37 (Sub-No. 40)-
Environmental Assessment, Office of the Secretary, Case Control Branch,
Interstate Commerce Commission,
Washington, DC 20423.

FOR FURTHER INFORMATION CONTACT: Dennis B. Wierdak (Telephone 202-275-0841 or 275-0800).

Assistance for the hearing-impaired is available through TDD services (202) 275-1721.

BILLING CODE 7035-01-M

DEPARTMENT OF JUSTICE

Immigration and Naturalization Service

[INS #1100-88]

Proposed Implementation; English Language/Standardized Citizenship Test for Legalization

AGENCY: Immigration and Naturalization Service, Justice.

ACTION: Notice of proposed solicitation.

SUMMARY: Section 245A(b)(1)(D)(i) of the Immigration and Nationality Act (Act), as amended by the Immigration Reform and Control Act of 1986 (IRCA), requires that applications for permanent resident status under section 245A(a) of the Act, unless otherwise exempt, must demonstrate either that they have certain basic English language and citizenship skills or that they are satisfactorily pursuing a course of study recognized by the Attorney General to achieve such skills. In order to facilitate the manner in which those applicants who wish to demonstrate that they comply with section 245A(b)(1)(D)(i) of the Act, the Immigration and Naturalization Service (INS) is considering implementing a standardized English language and citizenship skills examination as an alternative testing method. The purpose of this notice is to announce the Service's consideration of implementation of a standardized English language/citizenship test for legalization purposes and to request comments from entities who are capable and interested in developing and implementing standardized tests for this effort. The selection criteria that appear in the supplementary information are in draft form. The INS shall incur no financial liability and intends to make no payments to any entity participating in this program.

DATES: Written comments from parties interested in developing and administering an alternative testing process based on the draft criteria in the supplementary information must be received by close of the business day (5:00 p.m.) on or before March 30, 1988.

ADDRESSES: Written comments should be mailed in triplicate to Deputy Assistant Commissioner, Legalization, Immigration and Naturalization Service, 425 I Street, NW., Washington, DC 20536, or delivered to room 5250 at the same address.

FOR FURTHER INFORMATION CONTACT: Terrance M. O'Reilly, Deputy Assistant Commissioner, Legalization, (202) 786-3658.

SUPPLEMENTARY INFORMATION: The Immigration Reform and Control Act of 1986 (IRCA) provides for the legalization of status of certain qualified aliens in a two-step adjustment process. Section 245A(b)(1)(D)(i) of the Immigration and Nationality Act, as amended, Pub. L. 99-603 ("Act") provides in pertinent part that legalized aliens seeking adjustment of status to permanent resident under section 245A(a) of the Act must, unless otherwise exempt, demonstrate that they "* * * meet the requirements of section 312 (relating to minimal understanding of ordinary English and a knowledge and understanding of the history and government of the United States). In order to facilitate the manner in which legalized aliens can demonstrate that they comply with these requirements, the INS is considering implementing a standardized English language (reading and writing) and basic citizenship skills examination as an alternative testing method. If adopted, the test could be made available to applicants for naturalization as well. Existence of an alternative test would not restrict a legalization applicant from being tested in the required proficiencies by INS. Acceptance of a program will not restrict the INS from accepting or developing other alternative testing methods. The agreement by the INS to accept any alternative testing program will be non-financial. The INS agrees to accept the test results of the program or programs it has approved.

The following criteria and requirements are provided for submission of proposals: (1) The testing entity must have demonstrated experience in developing and administering reliable standard examinations in the English language and civics areas (for example, tests are currently recognized and accepted by an established public or private institution of learning recognized as such by a qualified state certifying agency); (2) the testing entity will be required to meet with INS representatives to review the test copy and to set the standards for passing test scores. The test should be structured as a pass/fail and should be accomplished within a maximum of thirty (30) minutes; (3) once the INS approves a test, the contents will not be changed by the testing entity unless otherwise directed by the INS; (4) the test questions must come from the revised (1987) Federal Textbooks on Citizenship, which are expected to be available from the Government Printing Office by March 1988; (5) the testing entity will be required to field test the examination prior to implementation in cooperation with the INS; (6) the testing entity must be capable of administering the examination over a broad geographical area of not less than a statewide basis. In administering the examination, the testing entity will be responsible for obtaining and managing adequate testing locations, controlling the time period in which the testing is to be accomplished, staffing the administration of the test, and furnishing supplies; (7) pricing of the examination per applicant will be a reasonable fee to be agreed upon by INS and the testing entity. If the applicant fails to test, he/she shall be given the opportunity to be re-tested one time at no additional cost. The re-test shall be a variance of the initial test; (8) the testing entity will be required to publicize the availability of the examination to legalization applicants. The INS will also maintain a register of the approved entity or entities. This register will be made available to the public; (9) the testing entity will be responsible for scoring the examination and must provide the results to the applicant and INS within five (5) business days from the date of the test; (10) the testing entity must provide for test security. INS will review the procedures the entity has or will establish to provide for test security and integrity; (11) INS reserves the right to determine, through inspection or other means, the continued reliability and integrity of the test. Any testing entity approved by INS may be removed from the register for good cause.

Richard E. Norton,

Associate Commissioner, Examinations.

Date: February 26, 1988.

BILLING CODE 4410-10-M

DEPARTMENT OF LABOR

Occupational Safety and Health Administration

Iowa State Standards; Approval

1. Background

Part 1953 of Title 29, Code of Federal Regulations prescribes procedures under section 18 of the Occupational Safety and Health Act of 1970 (29 U.S.C. 667) (hereinafter called the Act) by which the Regional Administrators for Occupational Safety and Health (hereinafter called the Regional Administrator) under a delegation of authority from the Assistant Secretary of Labor for Occupational Safety and Health (hereinafter called the Assistant Secretary) (29 CFR 1953.4) will review and approve standards promulgated pursuant to a State plan which has been approved in accordance with section 18(c) of the Act and 29 CFR Part 1902. On July 20, 1973, notice was published in the **Federal Register** (38 FR 19368) of the approval of the Iowa plan and the adoption of Subpart J of Part 1952 containing the decision. Iowa was granted final approval under section 18(e) of the Occupational Safety and Health Act of 1970 on July 2, 1985.

The Iowa plan provides for the adoption of Federal standards (by reference after comments and public hearing). By letter dated August 13, 1987 from Walter H. Johnson, Deputy Labor Commissioner to Alonzo L. Griffin, Area Director, and incorporated as part of the plan, the State submitted State standards comparable to: Occupational Exposure to Ethylene Oxide; Labeling Requirements, 29 CFR 1910.1047 as published in the **Federal Register** (50 FR 41494 dated October 11, 1985) and Occupational Exposure to Cotton Dust; Final Rule, 29 CFR 1910.19, 1910.1000 and 1910.1043 as published in the **Federal Register** (50 FR 51173 dated December 13, 1985). These standards which are contained in Chapter 88 of the Code of Iowa (1983) were promulgated after public comment requested on March 26, 1986, hearing held on April 28, 1986 and resolution adopted by the Division of Labor Services on June 27, 1986 pursuant to Chapter 17a, Iowa Code. The standards were effective on August 20, 1986 and notice of their adoption was published by the State on July 16, 1986. The State also submitted State standards comparable to: Electrical Standards for Construction; Amendments, 29 CFR 1926.151, 1926.152, 1926.351, 1926.803, 1926.400, 1926.401, 1926.402, 1926.403, 1926.404, 1926.405, 1926.406, 1926.407, 1926.408, 1926.409–1926.415, 1926.416, 1926.417, 1926.431, 1926.432, 1926.433–1926.440, 1926.4441, 1926.442–1926.448 and 1926.449 as published in the **Federal Register** (51 FR 25318 dated July 11, 1986). These standards which are contained in Chapter 88 of the Code of Iowa (1983) were promulgated after public comment requested on October 22, 1986, hearing held on November 13, 1986 and resolution adopted by the Division of Labor Services on April 17, 1987 pursuant to Chapter 17a, Iowa Code. The standards were effective on June 10, 1987 and notice of their adoption was published by the State on May 6, 1987. The State also submitted State standards comparable to: Occupational Exposure to Cotton Dust, Corrections and Information Collection Requirements Approval, 29 CFR 1910.1043 as published in the **Federal Register** (51 FR 24325 dated July 3, 1986); Occupational Exposure to Ethylene Oxide, Amendments, 29 CFR 1910.1047 as published in the Federal Register (51 FR 25053 dated July 10, 1986) and Commercial Diving Standard, Amendments, 29 CFR 1910.430 as published in the **Federal Register** (51 FR 33033 dated September 18, 1986). These standards which are contained in Chapter 88 of the Code of Iowa (1983) were promulgated after public comment requested on October 22, 1986, hearing held on November 12, 1986 and resolution adopted by the Division of Labor Services on May 12, 1987 pursuant to Chapter 17a, Iowa Code. The standards were effective on July 8, 1987 and notice of their adoption was published by the State June 3, 1987.

2. Decision

Having reviewed the State submission in comparison with the Federal standards it has been determined that the State standards are identical to the comparable Federal standards and should therefore be approved.

3. Location of Supplement for Inspection and Copying

A copy of the standards supplement along with the approved plan, may be inspected and copied during normal business hours at the following locations: Directorate of Federal/State Operations, Office of State Programs, Room N3700, 200 Constitution Avenue NW., Washington, DC 20210; Office of the Regional Administrator, OSHA, Room 406 Federal Office Building, 911 Walnut Street, Kansas City, Missouri 64106; and Division of Labor Services, 1000 E. Grand, Des Moines, Iowa 50319.

4. Public Participation

Under 29 CFR 1953.2(c) of this Chapter, the Assistant Secretary may prescribe alternative procedures to expedite the review process or for other good cause which may be consistent with applicable laws. The Assistant Secretary finds that good cause exists for not publishing the supplement to the Iowa State plan as a proposed change and making the Regional Administrator's approval effective upon publication for the following reasons:

1. The standards are identical to the comparable Federal standards and are therefore deemed to be at least as effective.
2. The standards were adopted in accordance with the procedural requirements of State law and further public participation and notice would be unnecessary.

This decision is effective this March 16th, 1988.

(Sec. 18, Pub. L. 91–596, 84 Stat. 1608 (29 U.S.C. 667)).

Signed at Kansas City, Missouri this 14th day of August 1987.

Roger A. Clark,

Regional Administrator.

[FR Doc. 88–5711 Filed 3–15–88; 8:45 am]

BILLING CODE 4510-26-M

Iowa State Standards; Notice of Approval

1. Background

Part 1953 of Title 29, Code of Federal Regulations prescribes procedures under section 18 of the Occupational Safety and Health Act of 1970 (29 U.S.C. 667) (hereinafter called the Act) by which the Regional Administrators for Occupational Safety and Health (hereinafter called the Regional Administrator) under a delegation of authority from the Assistant Secretary of Labor for Occupational Safety and Health (hereinafter called for Assistant Secretary) (29 CFR 1953.4)) will review and approve standards promulgated pursuant to a State plan which has been approved in accordance with section 18(c) of the Act and 29 CFR Part 1902. On July 20, 1973, notice was published in the **Federal Register** (38 FR 19368) of the approval of the Iowa plan and the adoption of subpart J of Part 1952 containing the decision. Iowa was granted final approval under Section 18(e) of the Occupational Safety and Health Act of 1970 on July 2, 1985.

The Iowa plan provides for the adoption of Federal standards (by reference after comments and public hearing). By letter dated September 2, 1987 from Walter H. Johnson. Deputy Labor Commissioner to Alonzo L. Griffin, Area Director, and incorporated as part of the plan, the State submitted State standards comparable to: Health and Safety Standards; Accident Prevention Tags; Amending Final Rule, 29 CFR 1910.145 as published in the **Federal Register** (51 FR 33260 dated September 19, 1986). This standard which is contained in Chapter 88 of the Code of Iowa (1983) was promulgated after public comment requested on May 20, 1987, hearing scheduled for June 10, 1987 (not conducted due to failure of anyone to appear) and resolution adopted by the Divisions of Labor Services on August 6, 1987 pursuant to Chapter 17a, Iowa Code. The standard was effective on September 30, 1987 and notice of its adoption was published by the State on August 26, 1987. The State also submitted State standards comparable to: Recordkeeping Requirements for Tests, Inspections, and Maintenance Checks revising recordkeeking requirements, 29 CFR 1910.68, 1910.106, 1910.157, 1910.179, 1910.180, 1910.181, 1910.217, 1910.218, 1910.252, and 1910.440 as published in the **Federal Register** (51 FR 34560 dated September 29, 1986) and Hazardous Waste Operations and Emergency Response; Interim Final Rule, 29 CFR 1910.120 as published in the **Federal Register** (51 FR 45663 dated December 19, 1986). These standards which are contained in Chapter 88 of the Code of Iowa (1983) were promulgated after public comment requested on May 6, 1987, hearing scheduled for May 27, 1987 (not conducted due to failure of anyone to appear) and resolution adopted by the Division of Labor Services on August 6, 1987 pursuant to Chapter 17a, Iowa Code. The standards were effective on September 30, 1987 and notice of their adoption was published by the State on August 26, 1987. The State also submitted State standards comparable to: Hazardous Waste Operations and Emergency Response: Corrections, 29 CFR 1910.120 as published in the **Federal Register** (52 FR 16241 dated May 4, 1987) and Field Sanitation; Final Rule, 29 CFR 1928.110 as published in the **Federal Register** (52 FR 16095 dated May 1, 1987). These standards which are contained in Chapter 88 of the Code of Iowa (1983) were promulgated after public comment requested on June 3, 1987, hearing scheduled for June 24, 1987 (not conducted due to failure of anyone to appear) and resolution adopted by the Division of Labor Services on August 6, 1987 pursuant to Chapter 17a, Iowa Code. The Standards were effective on September 30, 1987.

2. Decision

Having reviewed the State submission in comparison with the Federal standards it has been determined that the State standards are identical to the comparable Federal standards and are therefore approved.

3. Location of Supplement for Inspection and Copying

A copy of the standards supplement along with the approved plan, may be inspected and copies during normal business hours at the following locations: Directorate of Federal/State Operations, Office of State Programs, Room N3700, 200 Constitutin Avenue NW., Washington, DC 20210; Office of the Regional Administrator, OSHA, Room 406 Federal Office Building, 911 Walnut Street, Kansas City, Missouri 64106; and Division of Labor Services, 1000 E. Grand, Des Moines, Iowa 50319.

4. Public Participation

Under 29 CFR 1953.2(c) of this Chapter, the Assistant Secretary may prescribe alternative procedures to expedite the review process or for other good cause with may be consistent with applicable laws. The Assistant Secretary finds that good cause exists for not publishing the supplement to the Iowa State plan as a proposed change and making the Regional Administrator's approval effective upon publication for the following reasons:

1. The standards are identical to the comparable Federal standards and are therefore deemed to be at least as effective.
2. The standards were adopted in accordance with the procedural requirements of State law and further public participation and notice would be unnecessary.

This decision is effective March 16, 1988.

(Sec. 18, Pub. L. 91–596, 84 Stat. 1608 (29 U.S.C. 667))

Signed at Kansas City, Missouri this 2nd day of November 1987.

Roger A. Clark,

Regional Administrator.

BILLING CODE 4510-26-M

Oregon Safety Standards; Notice of Approval

1. Background

Part 1953 of Title 29, Code of Federal Regulations prescribes procedures under section 18 of the Occupational Safety and Health Act of 1970 (hereinafter called the Act) by which the Regional Administrator for Occupational Safety and Health (hereinafter called Regional Administrator) under a delegation of authority from the Assistant Secretary of Labor for Occupational Safety and Health (hereinafter called the Assistant Secretary) (29 CFR 1953.4) will review and approve standards promulgated pursuant to a State plan which has been approved in accordance with section 18(c) of the Act and 29 CFR Part 1902. On December 28, 1972, notice was published in the **Federal Register** (37 FR 28628) of the approval of the Oregon plan and the adoption of Subpart D to Part 1952 containing the decision.

The Oregon plan provides for adoption of State standards that are at least as effective as comparable Federal standards promulgated under section 6 of the Act. Section 1953.30 provides that "where any alteration in the Federal program could have an adverse impact on the at least as effective as" status of the State program, a program change supplement to a State plan shall be required.

In response to Federal standards changes, the State has submitted by letter dated January 8, 1987, from William J. Brown, Director, to James W. Lake, Regional Administrator, and incorporated as part of the plan, an amendment to State Standards comparable to 29 CFR 1910.1043, Cotton Dust; 29 CFR 1910.1000, Table Z–1 (Cotton Dust); and 29 CFR 1910.19(f), Special Provisions for Air contaminants, as published in the **Federal Register** (50 FR 51173) dated December 13, 1985, and 29 CFR 1910.1043, Cotton Dust; Corrections and Information Collection Requirements Approval, as published in the **Federal Register** (51 FR 24324) dated July 3, 1986. These rules establish a final standard for Occupational Exposure to Cotton Dust, including a permissible exposure limit.

On March 18, 1986, and October 30, 1986, Notices of Proposed Amendment of Rules were mailed to those persons on the State's mailing list established pursuant to OAR 436–01–000. The Notices were published in the State Administrative Rules Bulletin on March 15, 1986 and November 1, 1986. These actions failed to elicit written comments or requests for public hearings. The State's rules pertaining to Occupational exposure to Cotton Dust and Special Provisions for air contaminants (Cotton Dust), contained in OAR chapter 437, Division 146, were adopted effective June 13, 1986. The State's rule pertaining to Corrections and Information Collection Requirements (Cotton Dust), contained in OAR Chapter 437, Division 146, was adopted effective June 13, 1986. The State's rule pertaining to Corrections and Information Collection Requirements (Cotton Dust), contained in OAR Chapter 437, Division 146, was adopted effective December 4, 1986.

2. Decision

The above State standards have been reviewed and compared with the relevant Federal standards and OSHA has determined that the differences between the State and Federal standards are minimal and that the standards are thus substantially identical. The differences are the incorporation of the State's rule numbering system, references to other State rules, and editorial changes. OSHA therefore approves these standards.

3. Location of Supplement For Inspection and Copying

A copy of the standards supplement, along with the approved plan, may be inspected and copied during normal business hours at the following locations: Office of the Regional Administrator, Occupational Safety and Health Administration, Room 6003, Federal Office Building, 909 Fist Avenue, Seattle, Washington 98174; Workers' Compensation Department, Labor and Industries Building, Salem, Oregon

BEST COPY AVAILABLE

VOL 53 ISS 51 MR 16 1988 UMI

97310; and the Office of State Programs, Room N-3476, 200 Constitution Avenue NW., Washington, DC 20210.

4. Public Participation

Under 29 CFR 1953.2(c) the Assistant Secretary may prescribe alternative procedures to expedite the review process or for other good cause which may be consistent with applicable laws. The Assistant Secretary finds the good cause exists for not publishing the supplement to the Administrator's approval effective upon publication for the following reason:

1. The amended sections of the State's rules are substantially identical to those amended by the Federal standard which were promulgated in accordance with Federal law including meeting requirements for public participation. The standards were adopted in accordance with the procedural requirement of State law which included opportunity for public comment and further public participation would be repetitious.

This decision is effective March 15, 1988.

(Sec. 18, Pub. L. 91-596, 84 Stat. 1608 (29 U.S.C. 667)

Signed at Seattle, Washington this 28th day of March.

Ronald T. Tsunehara,

Acting Regional Administrator.

[FR Doc. 88-5713 Filed 3-15-88; 8:45 am]

BILLING CODE 4510-26-M

Virginia State Standards; Approval

1. Background

Part 1953 of Title 29, Code of Federal Regulations prescribed procedures under section 18 of the Occupational Safety and Health Act of 1970 (hereinafter called the Act) by which the Regional Administrator for Occupational Safety and Health (hereinafter called the Regional Administrator) under a delegation of authority from the Assistant Secretary of Labor for Occupational Safety and Health (hereinafter called the Assistant Secretary), (29 CFR 1953.4) will review and approve standards promulgated pursuant to a State plan which has been approved in accordance with section 18(c) of the Act and 29 CFR Part 1902. On September 28, 1976, notice was published in the Federal Register (41 FR 42655) of the approval of the Virginia State plan and the adoption of Subpart EE to Part 1952 containing the decision.

The Virginia State plan provides for the adoption of all Federal standards as State standards after comments and public hearing. Section 1952.210 of Subpart EE sets forth the State's schedule for the adoption of Federal standards. By letter dated June 17, 1987, from Commissioner Carol Amato, Virginia Department of Labor and Industry, to Linda R. Anku, Regional Administrator, and incorporated as part of the plan, the State submitted State standards identical to: (1) 29 CFR 1910.145(f), pertaining to revisions to Accident Prevention Tags as published in the Federal Register of September 19, 1986 (51 FR 33251); (2) 29 CFR 1910.430, pertaining to corrections and revisions to the Commercial Diving Standard as published in the Federal Register of September 18, 1986 (51 FR 33033); (3) 29 CFR 1910 pertaining to amendments to Recorkeeping Requirements for Tests, Inspections and Maintenance Checks as published in the Federal Register of September 29, 1986 (51 FR 34552); (4) 29 CFR 1910.1200 pertaining to amendments to the Hazard Communication Standard published in the Federal Register of September 30, 1986 (51 FR 34590); (5) 29 CFR 1910.1101 and 29 CFR 1926.58 adopting the Asbestos Standard for General Industry and the Construction Industry as published in the Federal Register of October 17, 1986 (51 FR 37002), and (6) 29 CFR 1910.120 adopting the Hazardous Waste Operations and Emergency Response Standard as published in the Federal Register of December 19, 1986 (51 FR 45663).

2. Decision

Having reviewed the State submissions in comparison with the Federal Standards, it has been determined that the State standards are identical to the Federal standards and accordingly are approved.

3. Location of Supplement for Inspection and Copying

A copy of the standards supplement, along with the approved plan, may be inspected and copied during normal business hours at the following locations: Office of the Regional Administrator, 3535 Market Street, Suite 2100, Philadelphia, PA 19104; Office of the Commissioner of Labor and Industry, 205 North Fourth Street, Richmond, Virginia 23241; and the OSHA Office of State Programs, Room N-3476, Third Street and Constitution Avenue NW., Washington, DC 20210.

4. Public Participation

Under 29 CFR 1953.2(c), the Assistant Secretary may prescibe alternative procedures to expedite the review process or for other good cause which may be consistent with applicable laws. The Assistant Secretary finds that good cause exists for not publishing the supplement to the Virginia State plan as a proposed change and making the Regional Administrator's approval effective upon publication for the following reasons:

a. The standards are identical to the Federal standards which were promulgated in accordance with Federal law including meeting requirements for public participation.

b. The standards were adopted in accordance with the procedural requirements of State law and further participation would be unnecessary.

This decision is effective March 16, 1988.

(Sec. 18, Pub. L. 91-596, 84 Stat. 1608 (29 U.S.C. 667)

Signed at Philadelphia, Pennsylvania this 2nd day of November 1987.

Linda R. Anku,

Regional Administrator.

BILLING CODE 4510-26-M

NATIONAL AERONAUTICS AND SPACE ADMINISTRATION

[Notice 88-23]

NASA Advisory Council (NAC), Aeronautics Advisory Committee (AAC); Meeting

AGENCY: National Aeronautics and Space Administration.

ACTION: Notice of meeting.

SUMMARY: In accordance with the Federal Advisory Committee Act, Pub. L. 92-463, as amended, the National Aeronautics and Space Administration announces a forthcoming meeting on the NASA Advisory Council, Aeronautics Advisory Committee, Ad Hoc Review Team on Flight Research and Technology.

DATE AND TIME: March 24, 1988, 8 a.m. to 4 p.m. (to be held at Dryden Flight Research Facility) and March 25, 1988, 8 a.m. to 4 p.m. (to be held at Ames Research Center).

ADDRESS: National Aeronautics and Space Administration, Dryden Flight Research Facility, Room 1, Building 1400, Edwards, CA 93523 and National Aeronautics and Space Administration, Ames Research Center, Committee Room, Building 200, Moffett Field, CA 94035.

FOR FURTHER INFORMATION CONTACT: Mr. Jack Levine, Office of Aeronautics and Space Technology, National Aeronautics and Space Administration, Washington, DC 20546, 202/453-2835.

SUPPLEMENTARY INFORMATION: The NAC Aeronautics Advisory Committee (AAC) was established to provide overall guidance to the Office of Aeronautics and Space Technology (OAST) on aeronautics research and technology activities. Special ad hoc review teams are formed to address specific topics. The Ad Hoc Review Team on Flight Research and Technology, chaired by Mr. Joseph T. Gallagher, is comprised of six members. The meeting will be open to the public up to the seating capacity of the room (approximately 20 persons including the team members and other participants). It is imperative that the meeting be held on these dates to accommodate the scheduling priorities of the key participants.

Type of Meeting: Open.

Agenda:

March 24, 1988
- 8 a.m.—Overview of Ames Flight Research Activities.
- 10 a.m.—Product of Flight Research Programs.
- 1 p.m.—Capability of Facilities.
- 3 p.m.—Tour of Facilities.
- 4 p.m.—Adjourn.

March 25, 1988
- 8 a.m.—Flight Research Resources.
- 10 a.m.—Partners, Past and Future.
- 11 a.m.—Challenges.
- 2 p.m.—Future Programs.
- 4 p.m.—Adjourn.

Ann Bradley,

Advisory Committee Management Officer, National Aeronautics and Space Administration.

March 10, 1988.

[FR Doc. 88-5717 Filed 3-15-88; 8:45 am]

BILLING CODE 7510-01-M

[Notice (88-25)]

Intent To Grant an Exclusive Patent License; Air Products and Chemicals, Inc.

AGENCY: National Aeronautics and Space Agency Administration.

ACTION: Notice of intent to grant an exclusive patent license.

SUMMARY: NASA hereby gives notice of intent to grant to Air Products and Chemicals, Inc., of Allentown, Pennsylvania, an exclusive license to practice the invention protected by U.S. Patent No. 4,490,229 entitled "Deposition of Diamondlike Carbon Films," which issued on December 25, 1984, to the United States of America as represented by the Administrator of the National Aeronautics and Space Administration. The exclusive license will contain appropriate terms and conditions to be negotiated in accordance with NASA Patent Licensing Regulations (14 CFR Part 1245). NASA will negotiate the final terms and conditions and grant the license unless, within 60 days of the date of this Notice, the Director of Patent Licensing receives written objections to the grant, together with supporting documentation. The Director of Patent Licensing will review all written responses to the Notice and then recommend to the Associate General Counsel for Intellectual Property whether to grant the license.

DATE: Comments to the Notice must be received by May 16, 1988.

ADDRESS: National Aeronautics and Space Administration, Code GP, Washington, DC 20546.

FOR FURTHER INFORMATION CONTACT: Mr. Harry Lupuloff, NASA Director of Patent Licensing, (202) 453-2430.

John E. O'Brien,

General Counsel.

Date: March 10, 1988.

BILLING CODE 7510-01-M

NUCLEAR REGULATORY COMMISSION

[Docket No. 50-346]

Toledo Edison Co. and the Cleveland Electric Illuminating Co., Davis-Besse Nuclear Power Station, Unit No. 1; Denial of Amendment to Facility Operating License and Opportunity for Hearing

The U.S. Nuclear Regulatory Commission (the Commission) has denied, in part, a request by the Toledo Edison Company for an amendment to Facility Operating License No. NPF-3, issued to Toledo Edison Company and The Cleveland Electric Illuminating Company (the licensees), for operation of the Davis-Besse Nuclear Power Station, Unit No. 1, located in Ottawa County, Ohio. Notice of consideration of issuance of this amendment was published in the Federal Register on July 2, 1986 (51 FR 24265).

The proposed amendment, in part, would delete the requirement specified in Technical Specification 6.5.1.6.e concerning Station Review Board responsibility to investigate and report Technical Specification (TS) violations. The Commission has determined that this TS provides assurance that the results of investigations of TS violations are brought to the attention of responsible corporate management and, therefore, should not be deleted.

All other provisions of the amendment request have been approved by Amendment No. 109 dated March 9, 1988. Notice of Issuance of Amendment

VOL 53
ISS 51
MR 16
1988
UMI

No. 109 will be published in the Commission's biweekly **Federal Register** notice.

Toledo Edison Company was notified of the Commission's denial of the proposed TS change by letter dated March 9, 1988.

By April 15, 1988, the licensees may demand a hearing with respect to the denial described above and any person whose interest may be affected by this proceeding may file a written petition for leave to intervene.

A request for hearing or petition for leave to intervene must be filed with the Secretary of the Commission, U.S. Nuclear Regulatory Commission, Washington, DC 20555, Attention: Docketing and Service Branch, or may be delivered to the Commission's Public Document Room, 1717 H Street, NW., Washington, DC, by the above date.

A copy of any petitions should also be sent to the Office of the General Counsel/Rockville, U.S. Nuclear Regulatory Commission, Washington, DC 20555, and to Gerald Charnoff, Esq., Shaw, Pittman, Potts and Trowbridge, 2300 N Street, NW., Washington, DC 20037, attorney for the licensees.

For further details with respect to this action, see: (1) The application for amendment dated January 22, 1986, as clarified August 25 and December 28, 1987, and January 15 and February 17, 1988, (2) the Commission's letter to Toledo Edison Company dated March 9, 1988, and (3) the Commission's Safety Evaluation issued with Amendment No. 109 to NPF–3 dated March 9, 1988, which are available for public inspection at the Commission's Public Document Room, 1717 H Street, NW., Washington, DC, and at the University of Toledo Library, Documents Department, 2801 Bancroft Avenue, Toledo, Ohio. A copy of items (2) and (3) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, DC 20555, Attention: Director, Division of Reactor Projects—III, IV, V and Special Projects.

Dated at Rockville, Maryland, this 9th day of March, 1988.

For the Nuclear Regulatory Commission.

Albert W. De Agazio,

Project Manager, Project Directorate III–3, Division of Reactor Projects—III, IV, V, and Special Projects.

[FR Doc. 88–5715 Filed 3–15–88; 8:45 am]

BILLING CODE 7590-01-M

[Docket No. 50–271–OLA–2; ASLBP No. 88–567–04–OLA]

Vermont Yankee Nuclear Power Corp.; Establishment of Atomic Safety and Licensing Board

Pursuant to delegation by the Commission dated December 29, 1972, published in the **Federal Register**, 37 FR 28710 (1972), and 2.105, 2.700, 2.702, 2.714, 2.714a, 2.717 and 2.721 of the Commission's Regulations, all as amended, an Atomic Safety and Licensing Board is being established in the following proceeding to rule on petitions for leave to intervene and/or requests for hearing and to preside over the proceeding in the event that a hearing is ordered.

Vermont Yankee Nuclear Power Corporation, Vermont Yankee Nuclear Power Station

[Facility Operating License No. DPR–28]

This Board is being established pursuant to a notice published by the Commission on January 26, 1988, in the **Federal Register** (53 FR 2114) entitled, "Amendment to Facility Operating License and Opportunity for Prior Hearing." The proposed amendment would change the technical Specifications to eliminate the present requirements to test the remaining train(s) of the ECCS and SLC Systems when one train has a component out of service.

The Board is comprised of the following Administrative Judges:

Charles Bechhoefer, Chairman, Atomic Safety and Licensing Board Panel, U.S. Nuclear Regulatory Commission, Washington, DC 20555
Glenn O. Bright, Atomic Safety and Licensing Board Panel, U.S. Nuclear Regulatory Commission, Washington, DC 20555;
James H. Carpenter, Atomic Safety and Licensing Board Panel, U.S. Nuclear Regulatory Commission, Washington, DC 20555.

Issued at Bethesda, Maryland, this 9th day of March 1988.

B. Paul Cotter, Jr.,

Chief Administrative Judge, Atomic Safety and Licensing Board Panel.

[FR Doc. 88–5763 Filed 3–15–88; 8:45 am]

BILLING CODE 7590-01-M

[Docket No. 50–271–OLA–3; ASLBP No. 88–568–05–OLA]

Vermont Yankee Nuclear Power Corp.; Establishment of Atomic Safety and Licensing Board

Pursuant to delegation by the Commission dated December 29, 1972, published in the **Federal Register**, 37 FR 28710 (1972), and §§ 2.105, 2.700, 2.702, 2.714, 2.714a, 2.717 and 2.721 of the Commission's Regulations, all as amended, an Atomic Safety and Licensing Board is being established in the following proceeding to rule on petitions for leave to intervene and/or requests for hearing and to preside over the proceeding in the event that a hearing is ordered.

Vermont Yankee Nuclear Power Corporation, Vermont Yankee Nuclear Power Station

[Facility Operating License No. DPR–28]

This Board is being established pursuant to a notice published by the Commission on January 28, 1988, in the **Federal Register** (53 FR 2115) entitled, "Consideration of Issuance of Amendment to Facility Operating License and Opportunity for Prior Hearing." The proposed amendment would revise surveillance frequency requirements for trip system logic testing and calibration from once every six months to once per operating cycle and requires more detailed testing than is presently required by Technical Specifications.

The Board is comprised of the following Administrative Judges:

Helen F. Hoyt, Chairperson, Atomic Safety and Licensing Board Panel, U.S. Nuclear Regulatory Commission, Washington, DC 20555;
Oscar H. Paris, Atomic Safety and Licensing Board Panel, U.S. Nuclear Regulatory Commission, Washington, DC 20555
Frederick J. Shon, Atomic Safety and Licensing Board Panel, U.S. Nuclear Regulatory Commission, Washington, DC 20555.

Issued at Bethesda, Maryland, this 9th day of March 1988.

B. Paul Cotter, Jr.,

Chief Administrative Judge, Atomic Safety and Licensing Board Panel.

[FR Doc. 88–5770 Filed 3–15–88; 8:45 am]

BILLING CODE 7590-01-M

[Docket No. 50–275–OLA; ASLBP No. 88–566–03–OLA]

Pacific Gas and Electric Co.; Establishment of Atomic Safety and Licensing Board

Pursuant to delegation by the Commission dated December 29, 1972, published in the **Federal Register**, 37 FR 28710 (1972), and §§ 2.105, 2.700, 2.702, 2.714, 2.714a, 2.717 and 2,721 of the Commission's Regulations, all as amended, an Atomic Safety and Licensing Board is being established in the following proceeding to rule on petitions for leave to intervene and/or requests for hearing and to preside over the proceeding in the event that a hearing is ordered.

Pacific Gas and Electric Company Diablo Canyon Nuclear Power Plant, Unit 1;

[Facility Operating License No. DPR–80]

This Board is being established pursuant to a notice published by the Commission on October 21, 1987 in the **Federal Register** (52 FR 39296 and 39304) entitled, "Notice of Consideration of Issuance of Amendment to Facility Operating License and Proposed No Significant Hazards Consideration Determination and Opportunity for Hearing." The proposed amendment would revise License Condition 2.C.(7) of the Diablo Canyon full power license, DPR–80, to allow submittal of the Long Term Seismic Program (LTSP) final report by July 31, 1989, rather than by July 31, 1988.

The Board is comprised of the following Administrative Judges:

Ivan W. Smith, Chairman Atomic Safety and Licensing Board Panel, U.S. Nuclear Regulatory Commission, Washington, DC 20555;
Jerry Harbour Atomic Safety and Licensing Board Panel, U.S. Nuclear Regulatory Commission, Washington, DC 20555;
Gustave A. Linenberger, Jr., Atomic Safety and Licensing Board Panel, U.S. Nuclear Regulatory Commission, Washington, DC 20555.

Issued at Bethesda, Maryland, this 9th day of March 1988.

B. Paul Cotter, Jr.,

Chief Administrative Judge, Atomic Safety and Licensing Board Panel.

BILLING CODE 7590-01-M

Withdrawal of Intent To Establish a Local Public Document Room for the Potential High-Level Waste Geologic Repository Site in Deaf Smith, TX

On October 29, 1987, the Nuclear Regulatory Commission (NRC) published notice of its intent to establish a local public document room (LPDR) for the proposed high-level waste geologic repository site in Deaf Smith, Texas (52 FR 41638). However, as a result of the Nuclear Waste Policy Amendments Act of 1987, the Deaf Smith, Texas, site is no longer being considered for the repository, and the NRC withdraws its intent to establish the Deaf Smith, Texas, local public document room.

The Nuclear Waste Policy Amendments Act of 1987 focuses on a single site in Yucca Mountain, Nevada, as the location for the high-level waste geologic repository. The NRC has already established a local public document room for the Nevada site at the University of Nevada—Las Vegas (53 FR 4473; February 16, 1988).

Dated at Bethesda, Maryland, this 11th day of March 1988.

For the Nuclear Regulatory Commission.

Donnie H. Grimsley,

Director, Division of Rules and Records, Office of Administration and Resources Management.

BILLING CODE 7590-01-M

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–25441; File No. SR–PHLX–87–35]

Self-Regulatory Organizations; Philadelphia Stock Exchange, Inc.; Order Approving Proposed Rule Change

On November 9, 1987, the Philadelphia Stock Exchange, Inc. ("Phlx") submitted a proposed rule change to the Securities and Exchange Commission ("Commission"), pursuant to section 19(b)(1) of the Securities Exchange Act of 1934 ("Act") [1] and Rule 19b–4 [2] thereunder, to amend Rule 1014(e) [3] by changing the term underlying "security" to underlying "interest" and by clarifying the meaning of the term "trading session."

The proposed rule change was noticed in Securities Exchange Act Release No. 25198, December 15, 1987. No comments were received on the proposed rule change.

The proposed rule change will substitute the term underlying "interest" for underlying "security" in Rule 1014(e)(i). The proposed rule change also will adopt a commentary clarifying the meaning of the term "trading session" in light of the recently instituted evening trading hours on the Foreign Currency Options ("FCO") Floor. On September 16, 1987, the Phlx began trading foreign currency options during an evening trading session. These evening sessions are held Sunday through Thursday evening between 7:00 p.m. and 11:00 p.m. This evening trading session is in addition to the Phlx's normal Monday through Friday 8:00 a.m. to 2:30 p.m. foreign currency option trading session.

Under Rule 1014(e), a registered options trader ("ROT") is prohibited from acting both as a market maker and as a floor broker who executes off-floor orders in options on the same underlying security during the same trading session. The purpose of this provision is to avoid the possibility that a market maker may trade ahead of a customer order or otherwise take advantage of a customer account in conducting proprietary trading activities. Currently, the evening trading sessions are considered part of the next day's trading session for clearing, margin and other purposes.[4] For example, foreign currency option trading that occurs on Monday evening is considered part of Tuesday's 8:00 a.m. to 2:30 p.m. trading session. The proposed Rule change will divide further the daytime and evening foreign currency option trading sessions on the same calendar day into two separate and distinct trading sessions for the purpose of rule 1014(e). Accordingly, the proposed rule change will allow an ROT to act as a floor broker (market maker) by day and a market maker (floor broker) by night.

The Phlx states that FCO participants have asked the exchange for clarification as to whether trading during the daytime hours of 8:00 a.m., and 2:30 p.m. and the evening hours of 7:00 p.m. and 11:00 p.m. on the same calendar day is considered trading during one session or two separate sessions.

The Phlx believes that since the market may move substantially from one day to the next, under the current rule, the ability of an ROT to prefer himself over a customer, or to trade ahead of a customer order, is limited by prohibiting the ROT from acting in a dual capacity in the same sessions. The Phlx further argues that this same

JMI

reasoning applies with equal force in considering the daytime and evening segments on the FCO Floor to be separate trading session. Finally, the Phlx states that amending Rule 1014(e)(i) to change the term underlying "security" to underlying "interest" is designed to reflect the fact that Phlx trades options on foreign currencies and stock indices as well as on individual securities.

The Commission finds that the proposed rule change is consistent with the Act and in particular the requirements of Section 6 and the Rules and Regulations thereunder. The Commission notes that interpreting "trading sessions" in Phlx Rule 1014(e)(i) to mean that the day trading sessions on the FCO Floor during the hours of 8:00 a.m. and 2:30 p.m. are separate and distinct from the evening trading session on the FCO Floor during the hours of 7:00 p.m. and 11:00 p.m. on the same calendar day is consistent with the way the Phlx treats these trading sessions for margin and capital purposes. In addition, the Commission believes that the period of cessation of trading between the day and evening trading sessions (four and one-half hours) and the evening and day trading sessions (nine and one-half hours) is sufficiently substantial so that the two sessions are more akin to two separate trading days rather than one. Since the ability of an ROT to prefer himself over a customer, or trade ahead of a customer order, is limited by prohibiting the ROT from acting in a dual capacity in the same session, the overall objectives of the securities laws—investor protection and maintenance of fair and orderly markets—are satisfied.

Finally, since the term "interest" more accurately represents the nature of the products traded on the Phlx than does the term "security", the Commission also believes that changing the term underlying "security" in Rule 1014(e)(i) to underlying "interest" is appropriate because the Phlx trades options on foreign currencies and stock indexes as well as on individual securities.

It is therefore ordered, pursuant to section 19(b)(2) of the Act,[5] that the proposed rule change be, and hereby is, approved.

For the Commission, by the Division to Market Regulation, pursuant ot delegated authority.[6]

Jonathan G. Katz,

Secretary.

Application and Opportunity for Hearing; Citicorp Homeowners, Inc. and Citicorp

March 9, 1988.

Notice is hereby given that Citicorp Homeowners, Inc. (the "Company") and Citicorp (collectively, the "Applicants") have filed an application, pursuant to Section 310(b)(1)(ii) of the Trust Indenture Act of 1939 (the "Act"), in connection with an indenture qualified under the Act dated September 1, 1984 (the "Indenture") between Citicorp Homeowners Mortgage Acceptance Corporation 1, Inc. ("CHMAC 1"), a wholly owned, limited purpose subsidiary of the Company, and Mercantile Bank N.A., formerly Mercantile Trust Company N.A. ("Mercantile"), as trustee (the "Trustee"), for a determination by the Securities and Exchange Commission (the "Commission") that Mercantile's trusteeship under such indenture and under certain Pooling and Servicing Agreements (the "Agreements") described below, which have not been qualified under the Act, is not so likely to involve a material conflict of interest as to make it necessary in the public interest or for the protection of investors to disqualify Mercantile from acting as Trustee under the Indenture or the Agreements.

Section 310(b) of the Act provides in part that if a trustee under an indenture qualified under the Act has or shall acquire any conflicting interest it shall within ninety days after ascertaining that it has such a conflicting interest either eliminate the conflicting interest or resign as trustee. Subsection (1) of section 310(b) provides, with certain exceptions, that a trustee under a qualified indenture shall be deemed to have a conflicting interest if such trustee is trustee under another indenture under which securities of an obligor under the indenture securities are outstanding. However, under clause (ii) of subsection (1), there may be excluded from the operation of the subsection another indenture under which other securities of the same obligor are outstanding, if the issuer shall have sustained the burden of proving, on application to the Commission and after opportunity for hearing thereon, that trusteeship under both the qualified indenture and such other indenture is not so likely to involve a material conflict of interest as to make it necessary in the public interest or for the protection of investors to disqualify such trustee from acting as trustee under one of such indentures

In support of its application, the Applicant alleges that:

1. In October 1984, CHMAC 1 issued the following series of Collateralized Mortgage Obligations ("CMOs") under the Indenture:

(a) $100,000,000 11½% Class A-1 CMOs with a stated maturity of October 1, 1986;

(b) $115,000,000 12⅜% Class A-2 CMOs with a stated maturity of October 1, 1988;

(c) $135,000,000 12½% Class A-3 CMOs with a stated maturity of April 1, 1991;

(d) $150,000,000 12½% Class A-4 CMOs with a stated maturity of April 1, 2008.

2. The CHMAC 1 CMOs are secured principally by assignments to the Trustee of fixed-rate conventional residential mortgage loans originated or acquired by the Company and serviced by Citicorp Homeowners Services, Inc. ("CHSI"), and by certain obligations of Citicorp, the ultimate parent of both the Company and CHMAC 1, pursuant to a Minimum Principal Payment Guaranty and a Limited Credit Guaranty (the "CMO Guaranties").

3. Citicorp's obligations under the CMO Guaranties rank equally with all of its unsecured and unsubordinated indebtedness.

4. On September 19, 1986, the Securities and Exchange Commission declared effective a shelf registration statement, File No. 33-6718, filed by the Company and Citicorp on Forms S-11 and S-3, respectively (the "Pass-Through Registration Statement"). The Pass-Through Registration Statement provides for the issuance by the Company, in series, of up to $1,000,000,000 aggregate principal amount of mortgage pass-through certificates and the issuance by Citicorp of its related limited guaranties, described more fully below.

5. On December 1, 1986, the Securities and Exchange Commission declared effective shelf registration statements, File Nos. 33-6979 and 33-5702, filed by the Company, Citicorp and certain other affiliates of Citicorp, on Form S-11 (and on Form S-3 insofar as it relates to Citicorp) (together, the "CMO Registration Statement"). The CMO Registration Statement provides for the issuance in series, of up to $700,000,000 aggregate principal amount of collateralized mortgage obligations which may be collateralized by mortgage pass-through certificates issued under the CMO Registration Statement by the Company, and for the issuance by Citicorp of its related limited guaranties, described more fully below. The mortgage pass-through certificates issued or to be issued under the Pass-Through Registration Statement and the CMO Registration Statement are hereinafter collectively referred to as the "Certificates".

6. Each Certificate evidences an ownership interest in one of a number of trusts created by the Company. The trust property of each trust consists of a separate and distinct pool of conventional single-family fixed-rate first mortgage loans originated or acquired and serviced by the Company (the "Mortgage Loans") and related property conveyed to the trust by the Company. Each pool (the "Mortgage Pool") is evidenced by a separate series of Certificates issued pursuant to a separate pooling and servicing agreement (each a "Pooling and Servicing Agreement") entered into among the Company as seller and servicer, and the trustee of the trust fund (the "Certificate Trustee") as named in the applicable prospectus supplement.

7. Citicorp has delivered a guaranty (each, a "Guaranty") to the Certificate Trustee for each Mortgage Pool. Under the Guaranty, Citicorp will to a limited extent honor demands for payment to cover delinquencies or losses with respect to the Mortgage Loans. Citicorp's obligations under each Guaranty will rank equally with all unsecured and unsubordinated indebtedness of Citicorp.

8. Certain Certificates have been issued pursuant to the Pass-Through Registration Statement and the CMO Registration Statement, namely, Series 1986-9 Certificates; Series 1986-10 Certificates; Series 1986-11 Certificates; Series 1986-12 Certificates; and Series 1987-1 Certificates; Series 1987-2 Certificates; Series 1987-3 Certificates; Series 1987-Ia Certificates; Series 1987-Ib Certificates; Series 1987-Ic Certificates; Series 1987-4 Certificates; Series 1987-5 Certificates; Series 1987-6-R Certificates; and Series 1987-7 Certificates. The Company has named Mercantile as Certificate Trustee under the Pooling and Servicing Agreements Pursuant to which Certificates were issued.

9. Section 6.08 of the Indenture states: "The Trustee is subject to [Trust Indenture Act] section 310(b) * * *"

10. Citicorp's obligations under the Guaranties relating to the Certificates, and under the Principal Payment Guaranty and Limited Credit Guaranty relating to the CHMAC 1 CMOs are all unsecured and unsubordinated and are equal in rank to Citicorp's other unsecured and unsubordinated indebtedness.

11. The individual pools of mortgage loans underlying each series of Certificates are separate and distinct from one another and from the pool of mortgage loans pledged to secure the CHMAC 1 CMOs. Citicorp's obligations under the CMO Guaranties and the Guaranties relating to the Certificates are similarly distinct because they are each triggered only be delinquency, default or loss in regard to a particular pool of mortgage loans.

12. For the foregoing reasons, the Applicants believe that the naming of Mercantile as Certificate Trustee under one or more Pooling and Servicing Agreements, providing for the issuance of Certificates is not so likely to involve a material conflicting interest as to make it necessary in the public interest or for the protection of investors that Mercantile be disqualified from acting as trustee under the Indenture.

The Applicants have waived notice of hearing, and any and all rights to specify procedures under Rule 8(b) of the Commission's Rules of Practice in connection with this matter.

For a more detailed account of the matters of fact and law asserted, all persons are referred to the application, which is a public document on file in the Offices of the Commission at the Public Reference Room, 460 Fifth Street, NW., Judiciary Plaza, Washington, DC.

Notice is further given that any interested person may, not later than April 4, 1988, request in writing that a hearing be held on such matter, stating the nature of his or her interest, the reasons for such request, and the issues of law or fact raised by such application which he or she desires to controvert, or may request that he or she be notified if the Commission should order a hearing thereon. Any such request should be addressed to: Secretary, Securities and Exchange Commission, 450 Fifth Street, NW., Washington, DC 20549. At any time after said date, the Commission may issue an order granting the application, upon such terms and conditions as the Commission may deem necessary or appropriate in the public interest and the interest of investors, unless a hearing is ordered by the Commission.

For the Commission, by the Division of Corporation Finance, pursuant to delegated authority.

Jonathan G. Katz,

Secretary.

BILLING CODE 8010-01-M

[Release No. IC-16310; File No. 812-6879]

Application for Exemption; Life Insurance Company of Virginia, et al.

March 10, 1988.

AGENCY: Securities and Exchange Commission ("SEC").

ACTION: Notice of application for exemption under the Investment Company Act of 1940 ("1940 Act").

Applicants: The Life Insurance Company of Virginia ("Life of Virginia"); Life of Virginia Separate Account 4 ("Separate Account 4"); and Forth Financial Securities Corporation.

Relevant 1940 Act Sections: Exemption requested under section 6(c) from sections 26(a)(2) and 27(c)(2) of the Act.

Filing Date: This application was filed on September 24, 1987.

Hearing or Notification of Hearing: If no hearing is ordered, the application will be granted. Any interested person may request a hearing on this application or ask to be notified if the hearing is ordered. Any requests must be received by the SEC by 5:30 p.m. on April 4, 1988. Request a hearing in writing, giving the nature of your interest, the reason for the request, and the issues you contest. Serve the applicants with the request either personally or by mail, and also send it to the Secretary of the Commission, along with proof of service by affidavit, or, in the case of an attorney at law, by certificate. Request notifications of the date of the hearing by writing to the Secretary of the Commission.

ADDRESSES: Secretary, SEC 450 Fifth Street, NW., Washington, DC 20549. The Life Insurance Company of Virginia, 6610 West Broad Street, Richmond, Virginia 23230.

FOR FURTHER INFORMATION CONTACT: Staff Attorney Wendell M. Faria (272-3450) or Special Counsel Lewis B. Reich (202) 272-2061 (Division of Investment Management, Office of Insurance Products and Legal Compliance).

SUPPLEMENTARY INFORMATION: Following is a summary of the application; the complete application is available for a fee from either the Commission's Public Reference Branch in person or the Commission's commercial copier (800) 231-3282 (in Maryland (301) 258-4300).

Applicants' Representations and Statements

1. Separate Account 4 was established by Life of Virginia in connection with a proposed issuance of certain individual

flexible premium variable deferred annuity Policies ("Policies").

2. Separate Account 4 has twenty Investment Subdivisions, each of which invests exclusively in the shares of a portfolio of a series-type mutual fund. Currently, there are four such funds available under the Policies: American Life/Annuity Series, the Variable Insurance Products Fund, the Life of Virginia Series Fund, Inc., and the Oppenheimer Variable Account Funds (the "Funds"). Each of the Funds is registered with the Commission as an open-end, diversified investment company.

3. An amount will be deducted from the daily net asset value of Separate Account 4 to reimburse Life of Virginia for certain mortality and expense risks assumed under the Policies. The mortality risk assumed by Life of Virginia arises from its contractual obligation to make Income Payments to each payee regardless of how long all payees or any individual payee may live. Although Income Payments will reflect the investment performance of the shares purchased by each Investment Subdivision of Separate Account 4, they will not be affected by the mortality experience of persons receiving such payments or of the general population. The expense risk assumed by Life of Virginia is that the expenses incurred in issuing and administering the Policies will be greater than estimated and, therefore, will exceed the expense charge limit set by the Policies. This asset charge will be deducted daily in an amount equal to an effective annual rate of 1.15% of the average daily net assets of Separate Account 4, of which approximately .80% will be allocated to cover mortality risks and approximately .35% for expense risks. The rate of this charge is guaranteed never to increase.

4. Applicants do not concede the applicability of sections 26(a)(2)(C) and 27(c)(2) of the Act to the mortality and expense risk charge. However, in order to avoid any possibility that questions may be raised as to the potential applicability of those provisions to this charge, Applicants request exemption from these provisions to the extent necessary to permit the assessment of a charge for mortality and expense risks against the assets of Separate Account 4.

5. Applicants assert that the mortality and expense risk charge is a reasonable charge to compensate Life of Virginia for the risk that the payees of Income Payments will live longer as a group than has been anticipated in setting the annuity rates guaranteed in the policies; for the risk that a Policyowner's Death Benefit could exceed his/her Cash Value; for the risk that administrative expenses will be greater than the amounts derived from the administrative charge; and for the risk that the amounts realized from the sales charges will be insufficient to cover actual distribution expenses.

6. Life of Virginia represents, in support of the request, that the charge of 1.15% for mortality and expense risks assumed by Life of Virginia is within the range of industry practice with respect to comparable annuity products. This representation is based upon Life of Virginia's analysis of publicly-available information about similar industry products, taking into consideration such factors as current charge levels, existence of charge level guarantees, and guaranteed annuity rates. Life of Virginia represents that it will maintain at its Home Office and make available to the Commission, a memorandum setting forth in detail the products analyzed in the course of, and the methodology and results of, its comparative survey made to support this representation.

7. Life of Virginia has concluded that there is a reasonable likelihood that the proposed distribution financing arrangements will benefit Separate Account 4 and the Policyowners. A memorandum setting forth the basis for this representation will be maintained by Life of Virginia at its Home Office and will be available to the Commission.

8. Applicants also represent that Separate Account 4 will invest only in management investment companies which undertake, in the event such a company adopts a plan under Rule 12b–1 to finance distribution expenses, to have a board of directors (or trustees), a majority of whom are not interested persons of the company, approve any such plan under Rule 12b–1.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

Jonathan G. Katz,

Secretary.

[FR Doc. 88–5704 Filed 3–15–88; 8:45 am]

BILLING CODE 8010-01-M

[Release No. 35–24596]

Filings Under the Public Utility Holding Company Act of 1935 ("Act"); Mississippi Power and Light Co., et al.

March 10, 1988.

Notice is hereby given that the following filing(s) has/have been made with the Commission pursuant to provisions of the Act and rules promulgated thereunder. All interested persons are referred to the application(s) and/or declaration(s) for complete statements of the proposed transaction(s) summarized below. The application(s) and/or declaration(s) and any amendment(s) thereto is/are available for public inspection through the Commission's Office of Public Reference.

Interested persons wishing to comment or request a hearing on the application(s) and/or declaration(s) should submit their views in writing by April 4, 1988, to the Secretary, Securities and Exchange Commission, Washington, DC 20549, and serve a copy on the relevant applicant(s) and/or declarant(s) at the address(es) specified below. Proof of service (by affidavit or, in case of an attorney at law, by certificate) should be filed with the request. Any request for hearing shall identify specifically the issues of fact or law that are disputed. A person who so requests will be notified of any hearing, if ordered, and will receive a copy of any notice or order issued in the matter. After said date, the application(s) and/or declaration(s), as filed or as amended, may be granted and/or permitted to become effective.

Mississippi Power & Light Company, et al. (70–7325)

Middle South Utilities, Inc. ("Middle South"), 225 Baronne Street, New Orleans, Louisiana 70112, a registered holding company, and its electric utility subsidiary company, Mississippi Power & Light Company ("MP&L"), P.O. Box 1640, Jackson, Mississippi 39215, have filed a post-effective amendment to their application-declaration pursuant to sections 6(a), 7, 9(a) and 10 of the Act.

By order dated December 24, 1986 (HCAR No. 24283), MP&L was authorized to issue and sell, and Middle South to acquire, from time-to-time through December 31, 1987, an aggregate of 2,609,000 shares of MP&L's authorized but unissued common stock, without nominal or par value, at $23.00 per share, for an aggregate cash purchase price of $60,007,000. As of December 31, 1987, none of the shares had been sold.

It is now proposed that MP&L issue and sell, and Middle South acquire, from time-to-time through December 31, 1988, the 2,609,000 shares of MP&L's authorized but unissued common stock.

Louisiana Power & Light Company, et al. (70–7328)

Middle South Utilities, Inc. ("Middle South"), 225 Baronne Street, New Orleans, Louisiana 70112, a registered holding company, and its electric utility

subsidiary company, Louisiana Power & Light Company ("LP&L"), 142 Delaronde Street, New Orleans, Louisiana 70174, have filed a post-effective amendment to their application-declaration pursuant to sections 6(a), 7, 9(a) and 10 of the Act.

By order dated December 30, 1986 (HCAR No. 24288), LP&L was authorized to issue and sell, and Middle South to acquire, from time-to-time through December 31, 1987, an aggregate of 11,364,000 shares of LP&L's authorized but unissued common stock, without nominal or par value, at $6.60 per share, for an aggregate cash purchase price of approximately $75 million. As of December 31, 1987, none of the shares had been sold.

It is now proposed that LP&L issue and sell, and Middle South acquire, from time-to-time through December 31, 1988, the 11,364,000 shares of LP&L's authorized but unissued common stock.

Ohio Power Company (70–7498)

The Ohio Power Company ("OPCo"), 301 Cleveland Avenue, SW., Canton, Ohio 44702, a subsidiary of American Electric Power Company, Inc., a registered holding company, has filed a declaration pursuant to sections 6(a) and 7 of the Act and Rules 50 and 50(a)(5) thereunder.

OPCo proposes to issue and sell, from time-to-time through December 31, 1988, first mortgage bonds ("Bonds") and/or unsecured promissory notes ("Notes") in an aggregate amount of up to $200 million, in any combination thereof. The Bonds will be in one or more series, each with a maturity of not less than five years and not more than thirty years. The interest rate and the price of the Bonds will be determined by the competitive bidding procedures of Rule 50 of the Act, as modified by the Commission's Statement of Policy, dated September 2, 1982 (HCAR No. 22623). OPCo may amend its declaration to seek an exception from the competitive bidding requirements of Rule 50 so that it may offer the Bonds through a negotiated public offering or private placement.

The Notes will have a maturity of not less than two years nor more than ten years, will be issued to one or more commercial banks or other financial institutions pursuant to a proposed term-loan agreement and will bear interest at a fixed rate per annum. In the event a placement fee is required in connection with the sale and issuance of the Notes, OPCo has requested an exception from the competitive bidding requirements of Rule 50 pursuant to Rule 50(a)(5).

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

Jonathan G. Katz,

Secretary.

[FR Doc. 88–5705 Filed 3–15–88; 8:45 am]

BILLING CODE 8010-01-M

[Release No. IC–16309/File No. 812–6914]

Russell Insurance Funds, Inc., et al.

Date: March 9, 1988.

AGENCY: Securities and Exchange Commission ("SEC").

ACTION: Notice of application for exemption under the Investment Company Act of 1940 ("1940 Act").

Applicants: Russell Insurance Funds, Inc.; Frank Russell Investment Management Company.

Relevant 1940 Act Sections: Exemption requested under section 6(c) from section 15(a)(1) and Rule 18f–2; and portions of Rule 20a–2; Items 5(b)(iii) and 16(a)(iii) of Form N–1A; Item 48 of Form N–SAR; and sections 6–07(2) (a), (b) and (c) of Regulation S–X.

Summary of Application: Applicants seek an order exempting them from the requirement to disclose in the Funds' prospectuses, proxy statements, and other public documents the fees paid by Frank Russell Investment Management Company to discretionary investment portfolio managers otherwise unaffiliated with the Applicants. The total advisory fee paid by the Funds to Management Company will be disclosed. Applicants also seek an order eliminating their obligation to include in certain proxy statements the balance sheets of, and information concerning transactions in securities of, the otherwise unaffiliated discretionary investment managers.

Filing Date: The application was filed on October 21, 1987, and amended on January 19, 1988.

Hearing or Notification of Hearing: If no hearing is ordered, the Application will be granted. Any interested person may request a hearing on this application, or ask to be notified if a hearing is ordered. Any requests must be received by the SEC by 5:30 p.m. on April 4, 1988. Request a hearing in writing, giving the nature of your interest, the reason for the request, and the issues you contest. Serve the Applicants with the request, either personally or by mail, and also send it to the Secretary of the SEC, along with proof of service by affidavit, or, for lawyers, by certificate. Request notifications of the date of a hearing by writing to the Secretary of the SEC.

ADDRESSES: Secretary, SEC, 450 5th Street NW., Washington, DC 20549. Russell Insurance Funds, Inc., et al., 1500 First Interstate Plaza, Tacoma, WA 98402.

FOR FURTHER INFORMATION CONTACT: Jeffrey M. Ulness, Attorney (202) 272–2026 or Lewis B. Reich, Special Counsel (202) 272–2061 (Office of Insurance Products and Legal Compliance).

SUPPLEMENTARY INFORMATION: Following is a summary of the application; the complete application is available for a fee from either the SEC's Public Reference Office in person or the SEC's commercial copier (800) 231–3282 (in Maryland (301) 258–4300).

Applicants' Representations

1. Russell Insurance Funds, Inc. ("RIF"), is a newly-organized, series-type, open-end management investment company which will initially offer shares representing interests in five different investment portfolios ("Funds"). Each Fund, other than the Money Market Liquidity Fund, will be advised by two or more discretionary investment managers ("Money Managers") otherwise unaffiliated with Applicants. (An investment company structured in this manner is sometimes referred to as a "multi-manager fund.")

2. Frank Russell Investment Management Company ("FRIMCo") will administer the operations of RIF; will recommend hiring, monitor, and recommend termination of the Money Managers (subject to the approval by RIF's Board of Directors), and will be solely responsible for paying the Money Managers' fees. FRIMCo will provide these services pursuant to a written investment advisory contract meeting all of the requirements of section 15 (a) and (c) of the Act. Frank Russell Company ("FRC"), the corporate parent of FRIMCo, will serve as a consultant to FRIMCo and RIF.

3. RIF is completely independent from, and not dependent upon, any of the Money Managers for day-to-day management or operation services. The Money Managers are selected for RIF based primarily upon the research and recommendation of FRC. Each Money Manager is paid an annual fee based upon assets it manages; there are no performance or incentive fees. The fee to be paid to a Money Manager by FRIMCo will be set forth in Schedules to the contract with RIF and FRIMCo.

4. Applicants state that they are able to negotiate discounts from the Money Managers' "posted" fee rates, the ultimate effect of which is to reduce the management fee which FRIMCo would

VOL 53 ISS 51 MR 16 1988 UMI

otherwise find necessary to charge RIF; but that they can obtain these reductions only if the fees are not publicly disclosed.

5. Applicants assert that the principal reasons for requiring disclosure of fees paid to a mutual fund's investment adviser(s) are: (a) To inform the shareholder of expenses to be charged to the fund; and (b) to enable the investor to compare that fee to the fees charged by other mutual funds. Applicants assert that their proposal satisfies those objectives because the FRIMCo management fee will be fully disclosed to prospective investors and shareholders, who will therefore know what the Funds' charges are and be able to compare them with those of other investment options.

6. Applicants contend that disclosure of the Money Managers' fees would be detrimental to RIF's shareholders if the result were to be higher fees to FRIMCo, and therefore higher fees to RIF and its shareholders.

7. Applicants assert that disclosure of those is of no benefit or practical use to shareholders because shareholders could not obtain the lower fee on their own. Moreover, Applicants assert that the Funds are not dependent upon the Money Managers for administration and distribution services, and FRIMCo and RIF have common interests in negotiating the "lowest reasonable and fair" fees with the Money Managers.

8. With respect to the disclosure of transactions in securities of the Money Managers, the Applicants assert that: (1) RIF is likely to be one of many accounts managed by the Money Managers; (2) no director, officer, or employee of RIF, FRIMCo, or FRC has any material stock ownership interest in any of the Money Managers; and (3) Money Managers cannot use their domination over RIF to "sell" their contracts with RIF or interests in the Money Managers' businesses in the types of transactions dealt with in section 15(f) of the Act. Accordingly, Applicants assert that potentially lengthy disclosure of transactions in securities of Money Managers would provide no meaningful benefit to RIF shareholders.

9. Similarly, Applicants assert that the inclusion of balance sheets of 10 or more Managers would result in significantly increased administrative burdens and costs to RIF without providing any material information to shareholders because RIF is not dependent upon the Money Managers for day-to-day operations and distribution.

Applicants' Legal Conclusion

Applicants assert that the requested orders are necessary and appropriate in the public interest since they reduce the total fees and expenses of the Funds by enabling FRIMCo to reduce its costs of providing discretionary portfolio management services; and they do not deprive investors or shareholders of any information reasonably needed by a shareholder to determine whether to invest in RIF or to vote to approve a Money Manager's contract.

Applicants' Conditions

Applicants agree that if the requested order is granted, FRIMCo will submit to RIF's Board of Directors, including the Directors who are not interested persons of Applicants, information concerning the "posted" fee rates of the Money Managers as well as the fees to be paid by FRIMCo, in connection with the Board's consideration of any investment advisory contract pursuant to section 15 (a) and (c) of the Act; and that they will maintain and preserve this information as a record pursuant to Rule 31a–1(b)(4), dealing with Board of Directors minutes, and Rule 31a–1(b)(11), dealing with advisory materials, and preserve these records in the manner and for the period presented in Rule 31a–2(a)(2).

Applicants further agree that if they should in the future agree to pay a "performance fee" to any Money Manager, the agreement to pay this type of fee would be disclosed in RIF's prospectus. Applicants also agree that they will disclose in RIF's prospectus and proxy statements that the Money Managers may serve other registered investment companies.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

Jonathan G. Katz,

Secretary.

Manager, Air Traffic Division.

[FR Doc. 88–5674 Filed 3–15–88; 8:45 am]

BILLING CODE 4910-13-M

Federal Highway Administration

Environmental Impact Statement; Orange County, CA

AGENCY: Federal Highway Administration (FHWA), DOT.

ACTION: Revised notice of intent.

SUMMARY: The FHWA is issuing this notice to advise the public that an environmental impact statement containing Tier II level information will be prepared for a proposed highway project in Orange County, California. A previous Notice of Intent was published in the **Federal Register** on October 22, 1986. The previous notice indicated that only Tier I level of information was to be prepared.

FOR FURTHER INFORMATION CONTACT: Glenn Clinton, District Engineer, Federal Highway Administration, P.O. Box 1915, Sacramento, CA 95812–1915, Telephone: (916) 551–1310.

SUPPLEMENTARY INFORMATION: The FHWA, working with the California Department of Transportation (Caltrans), Foothill/Eastern Transportation Corridor Agency (TCA), and Orange County Environmental Management Agency (OCEMA) will prepare an environmental impact statement (EIS) on a proposal to locate an alignment for the Eastern Transportation Corridor, a highspeed multimodal facility with 8 to 10 lanes and a median of sufficient width for high occupancy vehicles (HOV) or mass-transit. Transportation improvements are needed to serve existing and planned development. The proposed Eastern Transportation Corridor would extend southeasterly from State Route 91 near the cities of Anaheim and Yorba Linda through the foothills of the Santa Ana Mountains to Interstate 5 in the vicinity of Myford Road and/or State Route 133 in or near the cities of Irvine and Tustin for a distance of 12 to 16 miles.

Alternatives under consideration include (1) taking no action, (2) constructing a new 8 to 10 lane facility, and (3) several no build alternatives including improvements to existing transit facilities and expanded bus and rail transit services. Incorporated into and studied with the various build alternatives will be design variations of grade and alignments.

The local agencies have initiated the preparation of an environmental impact report on the project pursuant to the California Environmental Quality Act. Consultation by Orange County with the public began in April 1984 followed by formal scoping involving public agencies and the general public in May of 1985. In July of 1985, the County Board of Supervisors, responding to scoping comments, directed that the study area be expanded. After the additional studies and public meetings, the County Board of Supervisors approved the alternative alignments currently being studied. An additional scoping meeting was held by Caltrans and FHWA on November 20, 1986 subsequent to publication of the previous Notice of Intent for this project.

These consultations identified areas of special concern along the proposed route which are the focus of the locally initiated (County/Foothill/Eastern TCA) environmental studies. FHWA believes that this early consultation has been extensive and consistent with 40 CFR 1501.7. However, in order to inform potentially affected agencies and the public of FHWA involvement in a Tier II level instead of the previously identified Tier I level, this revised notice is being published.

To ensure that the full range of issues related to this proposed route are addressed and all significant issues identified in light of any changed circumstances since October 1986, comments and suggestions are invited from all interested parties. Comments and questions concerning this proposed action and the EIS should be directed to the FHWA at the address provided above.

Issued on: March 8, 1988.

Glenn Clinton,

District Engineer, Sacramento, California.

[FR Doc. 88–5682 Filed 3–15–88; 8:45 am]

BILLING CODE 4910-22-M

Federal Railroad Administration

Petition for Exemption or Waiver of Compliance; Indiana Harbor Belt Railroad Co.

In accordance with 49 CFR 211.9 and 211.41, notice is hereby given that the Federal Railroad Administration (FRA) has received a request for an exemption from or waiver of compliance with certain requirements of its safety standards. The individual petition is described below, including the party seeking relief, the regulatory provisions involved, and the nature of the relief being requested.

Interested parties are invited to participate in this proceeding by submitting written views, data, or comments. FRA does not anticipate scheduling a public hearing in connection with this proceeding since the facts do not appear to warrant a hearing. If any interested party desires an opportunity for oral comment, he or she should notify FRA, in writing, before the end of the comment period and specify the basis for the request.

All communications concerning this proceeding should identify the appropriate docket number (Waiver Petition Docket Number RSOR–88–1) and must be submitted in triplicate to the Docket Clerk, Office of Chief Counsel, Federal Railroad Administration, Nassif Building, 400 Seventh Street SW., Washington, DC 20590. Communications received before April 29, 1988, will be considered by FRA before final action is taken. Comments received after that date will be considered as far as practicable. All written communications concerning this proceeding are available for examination during regular business hours (9 a.m.–5 p.m.) in Room 8201, Nassif Building, 400 Seventh Street SW., Washington, DC 20590.

The individual petitioner seeking an exemption or waiver of compliance is:

Indiana Harbor Belt Railroad Company

[Waiver Petition Docket Number RSOR–88–1]

The Indiana Harbor Belt Railroad (IHB) seeks an expanded exemption from the requirement to use torpedoes while providing flag protection (Railroad Operating Practices, Title 49, Code of Federal Regulations, § 218.37). In March 1978, the IHB was granted a waiver of this requirement that applies only to its main line between Hammond, Indiana and 31st Street, LaGrange, Illinois (FRA Waiver Petition No. RSOR–77–29). The expanded trackage for which exemption is now requested consists of an additional 7.5 miles of its main line between Ivanhoe, Indiana and Franklin Avenue, Franklin Park, Illinois.

IHB submits that the debris and noise from exploding torpedoes present a hazard and annoyance to the public in this highly congested area where trains operate at lower speeds. IHB feels the request is not contrary to the public interest or safety.

Issued in Washington, DC, on March 8, 1988.

J.W. Walsh,

Associate Administrator for Safety.

[FR Doc. 88–5691 Filed 3–15–88; 8:45 am]

BILLING CODE 4910-06-M

Petitions for Exemption or Waiver; Natchez Trace Railroad, et al.

In accordance with 49 CFR 211.9 and 211.41, notice is hereby given that 11 railroads have petitioned the Federal Railroad Administration (FRA) for a waiver of compliance with the provisions of the Hours of Service Act (83 Stat. 464, Pub. L. 91–169, 45 U.S.C. 64a(e)).

The Hours of Service Act currently makes it unlawful for a railroad to require specified employees to remain on duty for a period in excess of 12 hours. However, the Hours of Service Act contains a provision that permits a railroad which employs not more than 15 employees who are subject to the statute to seek an exemption from the 12-hour limitation.

Natchez Trace Railroad (NTR)

[FRA Waiver Petition Docket No. HS–87–18]

The NTR seeks a continuation of a previously issued exemption so that it may permit certain employees to remain on duty not more than 16 hours in any 24-hour period. The NTR states that it is not its intention to employ a train crew over 12 hours per day under normal operating conditions, but that, if granted, this exemption would help the NTR's operation if it encountered unusual

OL 53 ISS 51 MR 16 988 MI

operating conditions or circumstances. The NTR provides service between Grand Junction, Tennessee, and Oxford, Mississippi, a distance of 54.5 miles.

The petitioner indicates that granting the exemption is in the public interest and will not adversely affect safety. Additionally, the petitioner asserts that it employs not more than 15 employees and has demonstrated good cause for granting this exemption.

Oregon, California and Eastern Railway (OCE)

[FRA Waiver Petition Docket No. HS–87–19]

The OCE seeks a continuation of a previously issued exemption so that it may permit certain employees to remain on duty not more than 16 hours in any 24-hour period. The OCE states that it is not its intention to employ a train crew over 12 hours per day under normal operating conditions, but that, if granted, this exemption would help the OCE's operation if it encountered unusual operating conditions or circumstances. The OCE provides service between Klamath Falls and Ely, Oregon, a distance of 65 miles.

The petitioner indicates that granting the exemption is in the public interest and will not adversely affect safety. Additionally, the petitioner asserts that it employs not more than 15 employees and has demonstrated good cause for granting this exemption.

Seminole Gulf Railway L.P. (SGLR)

[FRA Waiver Petition Docket No. HS–87–20]

The SGLR seeks this exemption so that it may permit certain employees to remain on duty not more than 16 hours in any 24-hour period. The SGLR states that it is not its intention to employ a train crew over 12 hours per day under normal operating conditions, but that, if granted, this exemption would help its operation if it encountered unusual operating conditions or circumstances. The SGLR provides service on over 115 miles of track between Arcadia and Vanderbilt Beach, and between Oneco and Venice, all located within the state of Florida.

The petitioner indicates that granting the exemption is in the public interest and will not adversely affect safety. Additionally, the petitioner asserts that it employs not more than 15 employees and has demonstrated good cause for granting this exemption.

Indiana and Ohio Central Railroad (IOCR)

[FRA Waiver Petition Docket No. HS–87–21]

The IOCR seeks this exemption so that it may permit certain employees to remain on duty not more than 16 hours in any 24-hour period. The IOCR states that it is not its intention to employ a train crew over 12 hours per day under normal operating conditions, but that, if granted, this exemption would help its operation if it encountered unusual operating conditions or circumstances. The IOCR provides service on over 46 miles of track between Logan, Ohio, and Columbus, Ohio.

The petitioner indicates that granting the exemption is in the public interest and will not adversely affect safety. Additionally, the petitioner asserts that it employs not more than 15 employees and has demonstrated good cause for granting this exemption.

Ohio—Rail Corporation (OHIC)

[FRA Waiver Petition Docket No. HS–88–1]

The OHIC seeks this exemption so that it may permit certain employees to remain on duty not more than 16 hours in any 24-hour period. The OHIC states that it is not its intention to employ a train crew over 12 hours per day under normal operating conditions, but that, if granted, this exemption would help its operation if it encountered unusual operating conditions or circumstances. The OHIC provides service on over 33.8 miles of track between Minerva, Ohio, and Hopedale, Ohio. The company also operates two branch lines, the 3.8 mile Wolf Run Branch and the 1.8 mile Tuscarawas Branch.

The petitioner indicates that granting the exemption is in the public interest and will not adversely affect safety. Additionally, the petitioner asserts that it employs not more than 15 employees and has demonstrated good cause for granting this exemption.

Green Mountain Railroad Corporation (GMRC)

[FRA Waiver Petition Docket No. HS–88–2]

The GMRC seeks a continuation of a previously issued exemption so that it may permit certain employees to remain on duty not more than 16 hours in any 24-hour period. The GMRC states that it is not its intention to employ a train crew over 12 hours per day under normal operating conditions, but that, if granted, this exemption would help the GMRC's operation if it encountered unusual operating conditions or circumstances. The GMRC provides freight service between North Walpole, New Hampshire, and Rutland, Vermont, a distance of 52 miles.

The petitioner indicates that granting the exemption is in the public interest and will not adversely affect safety. Additionally, the petitioner asserts that it employs not more than 15 employees and has demonstrated good cause for granting this exemption.

Florida Central Railroad (FCR)

[FRA Waiver Petition Docket No. HS–88–3]

The FCR seeks this exemption so that it may permit certain employees to remain on duty not more than 16 hours in any 24-hour period. The FCR states that it is not its intention to employ a train crew over 12 hours per day under normal operating conditions, but that, if granted, this exemption would help its operation if it encountered unusual operating conditions or circumstances. The FCR provides service on over 60 miles of former CSX Transportation trackage in the Orlando, Florida, area.

The petitioner indicates that granting the exemption is in the public interest and will not adversely affect safety. Additionally, the petitioner asserts that it employs not more than 15 employees and has demonstrated good cause for granting this exemption.

Galveston Railway Incorporated (GR)

[FRA Waiver petition Docket No. HS–88–4]

The GR seeks this exemption so that it may permit certain employees to remain on duty not more than 16 hours in any 24-hour period. The GR states that it is not its intention to employ a train crew over 12 hours per day under normal operating conditions, but that, if granted, this exemption would help its operation if it encountered unusual operating conditions or circumstances. The GR provides industrial switching service to the Port of Galveston, Texas.

The petitioner indicates that granting the exemption is in the public interest and will not adversely affect safety. Additionally, the petitioner asserts that it employs not more than 15 employees and has demonstrated good cause for granting this exemption.

Prescott and Northwestern Railroad Company (PNW)

[FRA Waiver Petition Docket No. HS–88–5]

The PNW seeks a continuation of a previously issued exemption so that it may permit certain employees to remain on duty not more than 16 hours in any 24-hour period. The PNW states that it is not its intention to employ a train crew over 12 hours per day under normal operating conditions, but that, if granted, this exemption would help the PNW's operation if it encountered unusual operating conditions or circumstances. The PNW provides freight service between Prescott and Highland, Arkansas, a distance of 31.05 miles.

The petitioner indicates that granting the exemption is in the public interest

and will not adversely affect safety. Additionally, the petitioner asserts that it employs not more than 15 employees and has demonstrated good cause for granting this exemption.

Clarendon and Pittsford Railroad (CLP)

[FRA Waiver Petition Docket No. HS–88–6]

The CLP seeks a continuation of a previously issued exemption so that it may permit certain employees to remain on duty not more than 16 hours in any 24-hour period. The CLP states that it is not its intention to employ a train crew over 12 hours per day under normal operating conditions, but that, if granted, this exemption would help CLP's operation if it encountered unusual operating conditions or circumstances. The CLP provides service between Whitehall, New York, and Rutland, Vermont, a distance of 24 miles and from Florence Junction to Florence, Vermont, a distance of 1 mile.

The petitioner indicates that granting the exemption is in the public interest and will not adversely affect safety.

Additionally, the petitioner asserts that it employs not more than 15 employees and has demonstrated good cause for granting this exemption.

Vermont Railway (VTR)

[FRA Waiver Petition Docket No. HS–88–7]

The VTR seeks a continuation of a previously issued exemption so that it may permit certain employees to remain on duty not more than 16 hours in any 24-hour period. The VTR states that it is not its intention to employ a train crew over 12 hours per day under normal operating conditions, but that, if granted, this exemption would help the VTR's operation if it encountered unusual operating conditions or circumstances. The VTR provides service between Burlington, Vermont, and White Creek, New York, a distance of 128 miles.

The petitioner indicates that granting the exemption is in the public interest and will not adversely affect safety. Additionally, the petitioner asserts that it employs not more than 15 employees and has demonstrated good cause for granting this exemption.

Interested persons are invited to participate in these proceedings by submitting written views and comments. FRA has not scheduled an opportunity for oral comment since the facts do not appear to warrant it. If any interested party desires an opportunity for oral comment, he or she should notify FRA, in writing, before the end of the comment period and specify the basis for his or her request. Any communications concerning these proceedings should identify the appropriate docket number (e.g., Waiver Petition Docket Number HS–87–20) and must be submitted in triplicate to the Docket Clerk, Office of Chief Counsel, Federal Railroad Administration, Nassif Building, 400 Seventh Street, SW., Washington, DC 20590.

Communications received before April 29, 1988, will be considered by FRA before final action is taken. Comments received after that date will be considered as far as practicable. All comments received after that date will be considered as far as practicable. All comments received will be available for examination both before and after the closing date for comments during regular business hours (9 a.m.–5 p.m.) in Room 8201, Nassif Building, 400 Seventh Street, SW., Washington, DC 20590.

Issued in Washington, DC, on March 8, 1988.

J.W. Walsh,

Associate Administrator for Safety.

Sunshine Act Meetings

Federal Register
Vol. 53, No. 51
Wednesday, March 16, 1988

This section of the FEDERAL REGISTER contains notices of meetings published under the "Government in the Sunshine Act" (Pub. L. 94-409) 5 U.S.C. 552b(e)(3).

FEDERAL RESERVE SYSTEM, BOARD OF GOVERNORS

"FEDERAL REGISTER" CITATION OF PREVIOUS ANNOUNCEMENT: 53 FR 7464, March 8, 1988.

PREVIOUSLY ANNOUNCED TIME AND DATE OF THE MEETING: 11:00 a.m., Monday, March 14, 1988.

CHANGES IN THE MEETING: Addition of the following closed items(s) to the meeting:

Proposed statement to be presented to the Commerce, Consumer, and Monetary Affairs Subcommittee of the House Committee on Government Operations regarding the Real Estate Appraisal Reform Act of 1987.

CONTACT PERSON FOR MORE INFORMATION: Mr. Joseph R. Coyne, Assistant to the Board; (202) 452-3204.

Date: March 14, 1988.

James McAfee,

Associate Secretary of the Board.

[FR Doc. 88-5894 Filed 3-14-88; 3:41 pm]

BILLING CODE 6210-01-M

EQUAL EMPLOYMENT OPPORTUNITY COMMISSION

DATE AND TIME: 9:30 a.m. (eastern time) Tuesday, March 22, 1988.

PLACE: Clarence M. Mitchell, Jr., Conference Room, No. 200-C on the Second Floor of the Columbia Plaza Office Building, 2401 E Street NW., Washington DC 20507

STATUS: Part of the meeting will be open to the Public and Part will be closed to the public.

MATTERS TO BE CONSIDERED:

Open Session

1. Announcement of Notation Vote(s)
2. A report on Commission Operations (Optional)
3. Request to Approve the Renewal of a Contract for the Mailout and Processing of the 1988 Employer Information Report (EEO-1) Survey

Closed Session

1. Agency Adjudication and Determination on Federal Agency Discrimination Complaint Appeals.
2. Litigation Authorization: General Counsel Recommendations.

Note.—Any matter not discussed or concluded may be carried over to a later meeting. (In addition to publishing notices on the EEOC Commission meetings in the **Federal Register**, the Commission also provides a recorded announcement a full week in advance on future Commission sessions. Please telephone (202) 634-6748 at all times for information on these meetings.)

CONTACT PERSON FOR MORE INFORMATION: Hilda D. Rodriguez, Executive Officer (Acting) on (202) 634-6748.

Dated: March 11, 1988.

Hilda D. Rodriguez,

Executive Officer (Acting), Executive Secretariat.

INTERNATIONAL TRADE COMMISSION

TIME AND DATE: Monday, March 21, 1988 at 3:00 p.m.

PLACE: Room 101, 500 E Street, SW., Washington, DC 20436.

STATUS: Open to the public.

MATTERS TO BE CONSIDERED:

1. Agenda
2. Minutes
3. Ratifications
4. Petitions and Complaints
5. Inv. 731-TA-388 (P) (Certain All Terrain Vehicles from Japan—briefing and vote.
6. Any items left over from previous agenda.

CONTACT PERSON FOR MORE INFORMATION: Kenneth R. Mason, Secretary (202) 252-1000.

March 9, 1988.

Kenneth R. Mason,

Secretary.

[FR Doc. 88-5777 Filed 3-14-88; 9:46 am]

BILLING CODE 7020-02-M

UNITED STATES PAROLE COMMISSION

DATE AND TIME:

Thursday, March 24 9:00 a.m. to 5:00 p.m.
Friday, March 25 9:00 a.m. to 5:00 p.m.

PLACE: 5550 Friendship Boulevard, Chevy Chase, Maryland 20815.

STATUS: Open.

MATTERS TO BE CONSIDERED: The following matters have been placed on the agenda for the open Parole Commission meeting:

1. Adoption of minutes of previous Commission meeting.

2. Reports from the Chairman, Vice Chairman, Commissioners, Legal, Research, Case Management and Administrative Sections.

3. Presentation by Dr. Edward Janoff concerning AIDS.

4. Presentation by Charlie Varnon, Chief U.S. Probation Officer, Eastern District of California.

5. Consideration of community confinement and punishment; other cost-effective community corrections proposals which do not adversely affect public protection.

6. Consideration of program to monitor supervision.

7. Consideration of proposal to advance presumptive parole dates.

8. Consideration of proposal to develop a means to obtain data on collection of fines and restitution on curfew parole dates.

9. Consideration of proposal that United States Probation Service be required to submit a supervision report (Form F-3) after the parolee's first year in the community and every year thereafter.

10. Proposal for revision of 28 CFR 2.56(e) to provide for prompt disclosure of prehearing assessments, hearing summary, and/or tape recording of the hearing.

11. Proposal for better monitoring by Probation Officers concerning payment of fines or restitution (discussion only).

12. Proposal that WITSEC coordinators in Central Office screen materials and send only appropriate materials to the regions (discussion only).

Consent Agenda Items

13. Proposal for modification of 28 CFR 2.64 to reflect amendments to Sentencing Reform Act of 1984.

14. Proposal that disclosure of Bureau of Prisons of documents also contained within the Parole Commission's file be conducted by the Parole Commission. If the requester wishes the OP document in his parole file to be processed.

15. Proposal that Procedures Manual paragraph 2.11-14 be amended to clarify that it refers to prisoners out of the institution for testimony or prosecution in court.

AGENCY CONTACT: James Beck, Director Research Section, United States Parole Commission, (301) 492-5936.

Date: March 11, 1988.

Patrick J. Glynn,

General Counsel, U.S. Parole Commission.

[FR Doc. 88-5816 Filed 3-14-88; 10:50 am]

BILLING CODE 4410-01-M

UNITED STATES PAROLE COMMISSION

DATE AND TIME: Saturday, March 26, 1988 9:00 a.m. to 1:00 p.m.

PLACE: 5550 Friendship Blvd., Chevy Chase, Maryland 20815.

STATUS: Closed pursuant to a vote to be taken at the beginning of the meeting.

MATTERS TO BE CONSIDERED: Appeals to the Commission of approximately 14 cases decided by the National Commissioners pursuant to a reference under 28 CFR 2.27. These are all cases originally heard by examiner panels wherein inmates of Federal prisons have applied for parole or are contesting revocation of parole or mandatory release.

CONTACT PERSON FOR MORE INFORMATION: David J. Dorworth, Chief Case Analyst, National Appeals Board, United States Parole Commission, (301) 492-5987.

Date: March 11, 1988.

Patrick J. Glynn,

General Counsel, U.S. Parole Commission.

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 150

[Docket No. 25117; Amdt. No. 150-1]

Expansion of Applicability of Part 150 to Heliports

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This rule expands the applicability of the rules governing the airport noise compatibility planning process to include free-standing public-use heliports and allows operators of those heliports to benefit from the Airport Improvement Program (AIP). The rule expansion is needed because the current rule only includes heliports that are located on public-use airports used by fixed-wing aircraft.

DATE: Effective date of this amendment is March 16, 1988.

FOR FURTHER INFORMATION CONTACT: Mr. Robert B. Hixson, Noise Policy and Regulatory Branch (AEE-110), Noise Abatement Division, Office of Environment and Energy, Federal Aviation Administration, 800 Independence Ave., SW., Washington, DC 20591. Telephone: (202) 267-3565.

SUPPLEMENTARY INFORMATION:

Background

Part 150 of the Federal Aviation Regulations (14 CFR Part 150) contains standards for airport operators who volunteer to submit noise exposure maps and airport noise compatibility planning programs to the FAA. Operators of airports whose maps have been found to be in compliance with the applicable requirements of Part 150 and whose programs have been approved by the FAA in accordance with the provisions set forth under Part 150 are then eligible to apply for noise control project funding under the AIP. The Aviation Safety and Noise Abatement Act of 1979, as amended, (49 U.S.C. 2101 *et seq*, "the ASNA Act") also provides certain legal protections for airport proprietors whose maps have been accepted by the FAA.

Operators of public-use airports have been able to avail themselves of the benefits of Part 150 since its original adoption on an interim basis on January 19, 1981 (46 FR 8316, January 26, 1981). However, in that interim rule and in the final rule adopted December 13, 1984 (49 FR 49260, December 18, 1984), access to Part 150 was denied to the operators of public-use heliports used exclusively by helicopters, "free-standing public-use heliports." The restriction was imposed because there were relatively few free-standing public-use heliports and because adequate computational tools for drawing noise contours around heliports were not available at that time. The recent opening of several prototype public-use heliports and the FAA's development of a Heliport Noise Model (HNM) computer program have prompted expansion of Part 150 to include free-standing public-use heliports.

Discussion of the Comments and the Amendment

On November 4, 1986, FAA issued a notice of proposed rulemaking (NPRM) to expand Part 150 to include free-standing public-use heliports. Interested parties were afforded the opportunity to participate in the development of this final rule by submitting written comments to the public regulatory docket on or before February 3, 1987. Six comments were received in response to Notice No. 86-17 (51 FR 40037; November 4, 1986) and all have been duly considered in promulgating this amendment. All of the comments supported expansion of the applicability of Part 150 to include free-standing public-use heliports. However, three of the comments also included specific suggestions about one or more of the FAA's proposed amendments.

The comments received in response to the notice were grouped by broad categories of issues and are discussed below.

1. Applicability of Rule

Based on his understanding that Part 150, the ASNA Act, and the Airport Improvement Program are related to "public airports" rather than "public-use airports," one commenter suggested that the expanded Part 150 program will not result in significant benefits to the public since the majority of heliports are privately owned and will not be eligible for funds through the ASNA Act and Part 150, even if these heliports are made available for public use.

In replying to this comment it is first necessary to clarify the applicability of the Part 150 program. The amended § 150.3 applies to "airport noise compatibility planning activities of the operators of 'public-use airports,' including heliports, as that term is used in section 101(1) of the ASNA Act as amended (49 U.S.C. 2101) and as defined in section 503(a)(17) of the Airport and Airway Improvement Act of 1982 (49 U.S.C. 2202)." Section 503(a)(17) of the Airport and Airway Improvement Act defines a public-use airport as "(a) any public airport, (b) any privately owned reliever airport, and (c) any privately owned airport which is determined by the Secretary to enplane annually 2,500 or more passengers and receive scheduled passenger service of aircraft which is used or to be used for public purposes." Section 503(a)(16) of the Airport and Airway Improvement Act defines a public airport as "any airport which is used or to be used for public purposes, under the control of a public agency, the landing area of which is publicly owned." Thus, although the expansion of Part 150 to include heliport noise compatibility planning programs will not include privately owned heliports not used for public purposes, it will include those which are used for public purposes as defined in the Airport and Airway Improvement Act.

2. Availability of Heliport Noise Model

One commenter recommended that reference to the Heliport Noise Model (HNM) not be included in the amendment because the HNM is not available and its ability to produce results which accurately reflect actual heliport noise conditions in its present stage of development may be in question. The commenter also stated that other less complicated methods of producing noise contours are now available to the user public.

The commenter is correct that the final HNM was not available when the NPRM was published; however, it is now available. The HNM represents the best method for obtaining helicopter noise contours. Since the date the docket closed, the HNM has been evaluated by a significant part of the helicopter industry and the FAA has approved the HNM for use in Part 150 heliport studies. It should be noted that the regulation permits the use of FAA approved methodologies or computer programs other than the HNM to obtain noise contours. However, FAA is not aware of any other methodologies applicable to helicopter noise that accurately reflect the noise impact. As with airport noise modeling, where FAA has approved more than one methodology, FAA will approve additional methodologies for heliport noise modeling when their effectiveness is demonstrated.

3. Use of Heliport Noise Model

One commenter suggested changing the wording of the third sentence of proposed section A150.103(c) from "For static operation (hover), identify helicopter type and duration in minutes shall be identified" to "For static operations (hover), identify the types of helicopters involved and the total annual duration in minutes of the hover operation for each type." It should be noted that the NPRM contained a typographical error in this sentence.

Although the FAA agrees with the intent of the commenter in clarifying the wording of this sentence, the total annual duration in minutes of the hover operation is not used as input for the HNM. The HNM develops noise exposure contours by computing the noise exposure for a typical day, with the number of operations for the typical day being the average of the daily operations for a one year period. Thus, the HNM input for hover operations consists of (a) the helicopter type, (b) the duration in minutes of the hover operation for a particular helicopter type, and (c) the average number of daily operations for that helicopter type based on an annual average. The intent of this requirement is to put the data into its most useful form for input to the HNM. Should, at a future date, additional models for assessing heliport noise impacts be approved by the FAA for use in Part 150 studies, that approval will also take into account the date input requirements of those models. Therefore, the final rule retains the HNM inputs. However, to clarify the meaning of this sentence in the regulation, it has been reworded as follows: "For static operation (hover), the helicopter type, the number of daily operations based on an annual average, and the duration in minutes of the hover operation shall be identified."

Synopsis of the Final Rule

Sections 150.3 and 150.7 have been amended to include all public-use heliports. Section A150.103 has been amended to reference use of the HNM and to insert map scale and size requirements which are appropriate to heliports.

Regulatory Evaluation

The FAA evaluated the regulatory impact of removing the Part 150 restrictions which apply to the operators of heliports. It was determined that this rule is consistent with the objectives of Executive Order 12291 as part of the President's Regulatory Reform Program to reduce regulatory burdens on the public. Since Part 150 is a voluntary program, heliport operators, like other airport operators, will participate only when it is in their best interests. Since the new rule only increases the number of airport operators eligible to apply for Federal matching grants under the Airport Improvement Program (AIP) by one-tenth of one percent, the incremental administrative costs to the FAA will be insignificant. Grant funds come from the AIP in which an 8% set-aside is held for noise mitigation purposes. AIP funding is derived from an 8% tax on passenger tickets and a general aviation fuel tax, as mandated by Congress. The expansion of the program to include heliports is not expected to adversely impact current AIP funding. In addition, this rule will have no impact on trade opportunities for U.S. firms doing business overseas or for foreign firms doing business in the United States.

Regulatory Flexibility Analysis

As explained in the background section, this amendment to Part 150 to include free-standing public-use heliports will broaden access to a voluntary Federal program. Heliport operators who submit maps or programs under the amendment will do so voluntarily and on the basis of self-interest. Since Part 150 is a voluntary program, this amendment will have no significant economic impact, either positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act. Moreover, as of June 1986, only six heliports would be eligible to participate in the Part 150 program; none are small entities.

Environmental Analysis

Pursuant to Department of Transportation "Policies and Procedures for Considering Environmental Impacts" (FAA Order 1050.1D), a Finding of No Significant Impact has been made. This amendment to Part 150 does not significantly affect the quality of the human environment.

Reporting and Recordkeeping

In accordance with the Paperwork Reduction Act of 1980 (Pub. L. 96-511), the reporting and recordkeeping provisions in this regulation will be submitted for approval to the Office of Management and Budget (OMB). Participation in the voluntary noise compatibility planning process is estimated by the FAA to affect only six heliports and the reporting and recording impact is minimal. Submission to OMB of the reporting and recording provisions will be made as an amendment to the existing OMB approval for Part 150 (OMB control number 2120-0517). The revised reporting and recordkeeping provisions are not effective until OMB approval has been obtained and notice of the approval is published in the **Federal Register**. Pending OMB approval, FAA will review any submission from an eligible heliport in accordance with the regulations implementing the provisions of the Paperwork Reduction Act of 1980. 5 CFR Part 1320.

Federalism Implications

The regulations proposed herein would not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Thus, in accordance with Executive Order 12612, preparation of a Federalism Assessment is not warranted.

Conclusion

The only costs associated with this amendment are (1) the voluntary costs incurred by a heliport operator for the initial preparation and submission of a noise exposure map and compatibility program and (2) the minimal FAA administrative costs. Therefore, the FAA has determined that this amendment involves a regulation that is not major under Executive Order 12291 or significant under the Department of Transportation Regulatory Policies and Procedures (44 FR 11034; February 26, 1979). Since no small entities will be affected by the rule, it is certified under the criteria of the Regulatory Flexibility Act that the rule will not have a significant economic impact, either positive or negative, on a substantial number of small entities. A copy of the final regulatory evaluation prepared for this project may be examined in the public docket or obtained from the person indentified under the caption "**FOR FURTHER INFORMATION CONTACT.**"

List of Subjects in 14 CFR Part 150

Airports, Noise exposure maps, Noise compatibility programs, Land uses.

The Amendment

Accordingly, Part 150 of the Federal Aviation Regulations (14 CFR Part 150) is amended as follows:

PART 150—AIRPORT NOISE COMPATIBILITY PLANNING

1. The authority citation for Part 150 is revised to read as follows:

Authority: 49 U.S.C. 1348, 1354(a), 1421, 1431, 2101, 2102, 2103(a), 2104 (a) and (b), 2201 *et seq.*; 49 U.S.C. 106(g) (Revised, Pub. L. 97-449, January 12, 1983).

§ 150.3 [Amended]

2. By running from § 150.3 the words "not used exclusively by helicopters" and substitution in their place the words "including heliports".

§ 150.7 [Amended]

3. By removing from the term "Airport" in § 150.7 the words "not exclusively used by helicopters" and substituting in their place the words "including helicopters".

Appendix A [Amended]

4. By amending paragraph (a) of section A150.103 of Appendix A to add the words "for airports or the Heliport Noise Model (HNM) for heliports" after the words "Integrated Noise Model (INM)".

5. By amending section A150.103(b) of Appendix A to insert at the beginning of the paragraph the words "Except as provided in paragraph (c) of this section."

6. By amending section A150.103 of Appendix A to add a new paragraph (c) to read as follows:

Sec. A150.103 Use of computer prediction model.

* * * * *

(c) For heliports, the map scale required by paragraph (b)(1) of this section shall not be less than 1 inch to 2,000 feet and shall indicate heliport boundaries, takeoff and landing pads, and typical flight tracks out to at least 4,000 feet horizontally from the landing pad. Where these flight tracks cannot be determinded, obstructions or other limitations on flight tracks in and out of the heliport shall be identified within the map areas out to at least 4,000 feet horizontally from the landing pad. For static operation (hover), the helicopter type, the number of daily operations based on an annual average, and the duration in minutes of the hover operation shall be identified. The other information required in paragraph (b) shall be furnished in a form suitable for input to the HNM or other FAA approved methodology or computer program.

Issued in Washington, DC, on March 10 1988.

T. Allan McArtor,

Administrator.

Mandatory Reporting for Emergency Evacuation Systems and Components; Final Rule

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 121

[Docket No. 25289; Amdt. 121-195]

Mandatory Reporting for Emergency Evacuation Systems and Components

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: The purpose of this amendment is to revise the mechanical reliability reporting requirement contained in Part 121 of the Federal Aviation Regulations to require certificate holders to report each failure, malfunction, or defect of emergency evacuation systems and components. This amendment is necessary to collect, record, analyze, and disseminate data concerning those failures, malfunctions, or defects that occur during training, testing, or actual emergency conditions to improve the levels of emergency evacuation system reliability and safety.

EFFECTIVE DATE: April 15, 1988.

FOR FURTHER INFORMATION CONTACT: Mr. George R. Johnson, Project Development Branch (AFS-360), Office of Flight Standards, Federal Aviation Administration, 800 Independence Avenue SW., Washington, DC 20591, Telephone (202) 267-3798.

SUPPLEMENTARY INFORMATION:

Background

On May 22, 1987, the Federal Aviation Administration (FAA) issued Notice of Proposed Rulemaking (NPRM) No. 87-5 (52 FR 20982; June 3, 1987). The notice proposed to amend the mechanical reliability reporting requirement contained in Part 121 of the Federal Aviation Regulations (FAR) to require certificate holders to report each failure, malfunction, or defect of emergency evacuation systems and components. Section 121.703(a) of the FAR requires each certificate holder to report the occurrence or detection of failures, malfunctions, or defects of 16 specified categories. Section 121.703(c) requires the certificate holder to report any other failure, malfunction or defect in an aircraft that occurs, or is detected at any time if, in its opinion, that failure, malfunction or defect has endangered, or may endanger, the safe operation of an aircraft used by the certificate holder.

The ability to evacuate an airplane safely and quickly during an emergency is a major concern to the FAA, the aviation industry and the public. As part of an effort to collect information about and address these concerns, the FAA sponsored a technical conference in Seattle, Washington, from September 3-6, 1985, related to emergency evacuation of transport category airplanes. Discussions covered the number, capacity, distribution and marking of emergency exits, full-scale evacuation demonstrations, the validity of the data derived from full-scale evacuation tests versus that data obtained from mathematical analysis. Also discussed were the criteria to be used to decide when the mathematical analysis method (used because of full-scale demonstration cost, impracticality, or other reasons) would be acceptable in lieu of a full-scale demonstration. The discussions also covered escape slides and the design standards and certification testing requirements for these slides, slide maintenance failure reporting, and other related topics. Working groups were established to review and discuss existing regulations in Parts 25 and 121 of the FAR and recommended regulatory and non-regulatory changes.

During the conference, a representative from a leading manufacturer stated that its testing of transport category airplane cabin evacuation slides resulted in a 90 percent success rate. Airline pilots, cabin crewmembers and maintenance personnel presented different opinions, expressing their views about the general unrealiability of evacuation slides.

Several comments were made about the lack of, or inadequacy of, reporting of failures, malfunctions, and defects of emergency evacuation systems and components (such as evacuation slides, gas bottles, cables, door indicators, motors, clips, girth bar attachments, etc.). Discussion focused on the present Service Difficulty Report System, the collection and disposition of those reports, the malfunctions and defects that are not presently reported, and potential solutions to the problems discussed. Members of groups representing flight attendants, the National Transportation Safety Board and the National Transportation Safety Association stated their concerns that failures, malfunctions or defects of evacuation systems or components are not being reported to the FAA, thus creating a vacuum of knowledge. The process by which failures, malfunctions, or defects are presently reported was criticized for excluding a large number of events, such as the inadvertent deployment of evacuation slides during cabin safety demonstrations or maintenance checks and overhauls. Representatives from the FAA and other organizations expressed concern that regulatory authorities were unaware of emergency evacuation system incidents taking place in the field and that some of this information could be significant to safety.

There has also been legislative concern regarding the safe evacuation of aircraft. A congressional hearing on this matter was held by the Subcommittee on Investigations and Oversight of the House Committee of Public Works and Transportation on June 24 to 26, 1985. Mechanical Reliability Reports (MRR) and Service Difficulty Reports (SDR) are utilized by the FAA primarily as a maintenance and continued airworthiness surveillance tool and are published in the Aviation Standards Service Difficulty Report Summary by FAA's Aviation Standard National Field Office at Oklahoma City, Oklahoma. This summary consists of air carrier MRR's and is available to FAA personnel, industry affiliates and others with a need for access to this information. This information provides the FAA with reliability and airworthiness statistical data necessary for planning, directing, controlling, and evaluating certain aircraft products, such as emergency evacuation systems and components. These reports also provide a means for measuring the effectiveness of the self-evaluation techniques being employed by certain segments of the civil aviation industry.

Discussion of Comments

The FAA received six comments in response to Notice 87-5 from organizations or associations with an interest in aircraft safety. Two commenters, the National Transportation Safety Board (NTSB) and the Syndicate National De Personnel Navigant Commercial (SNPNC), of France, were in agreement with the proposal as written, and support this regulatory action. The Association of Flight Attendants (AFA) and the National Transportation Safety Association, Inc. also support the amendment, but both suggest it be expanded to include life preservers and life rafts. The Airline Pilots Association (ALPA) suggests adding life rafts, slides and personal flotation devices in their supportive comment.

Although life preservers, life rafts, and personal flotation devices are primarily intended for use during an emergency evacuation of an aircraft, this survival equipment is not considered to be part of the emergency evacuation system, or components thereof, and therefore, is beyond the scope of this amendment. Regarding the suggestion to include slides in the amendment, the evacuation slides and slide/rafts are considered to

be an integral part of the emergency evacuation system and are covered under the provisions of this amendment. However, in response to both a prior NTSB safety recommendation, and an ALPA petition for rulemaking, the FAA is currently developing a regulatory project that will address the continuing airworthiness of emergency water survival equipment that is installed as part of the required safety equipment of aircraft operating under the provisions of FAR Parts 121, 125 and certain portions of Part 135. This project is intended to include the reliability of life preservers.

The Air Transport Association of America (ATA) submitted comments that were essentially in disagreement with the proposal. ATA points out that two of its members do not oppose the proposal, with one of the two already reporting emergency evacuation system failures and malfunctions through the MRR system. ATA also states that two other members would not oppose the proposal if the reporting provisions were narrowed to those defects that would or could actually prevent the systems from performing their intended functions. The thrust of ATA's objection is that emergency evacuation systems may not be appropriate to the SDR system, and that the MRR system, as currently operating, is ineffective. The ATA also contends that the FAA's cost and benefit estimates to support the amendment were derived arbitrarily and lacked sufficient documentation.

The decision to include the mandatory reporting of defects and malfunctions of emergency evacuation systems and components in the MRR system was based on the recommendations of the Maintenance and Reliability Working Group that was part of the emergency evacuation task formed following the September 1986 Public Technical Conference in Seattle. This group reported that the lack of mandatory reporting of emergency evacuation system defects and malfunctions impaired the monitoring of evacuation equipment in service. As a result, the group reported that the FAA does not have a sufficient data base to evaluate door failures which occur in the automatic mode, and the repairs or modifications required to insure a reliable evacuation system. The group recommended that a system of comprehensive mandatory reporting be established to provide for equipment reliability monitoring. The MRR system provides the ideal vehicle for this reporting.

Regarding ATA's comment on the ineffectiveness of the MRR system, it is beyond the scope of this amendment to attempt to address any problem areas that may exist in the reporting system. However, the FAA recognizes that there are faults with the system and a program has been initiated to attempt to remedy these faults.

ATA also commented that the wording of the amendment could result in the submission of useless data that would waste the time of both the operator and FAA personnel analyzing the data. As an example, a scratch in the paint on a emergency exit door could be construed as a "defect" and, as such, would require reporting. The FAA does not agree. It is the responsibility of the operator to evaluate the significance of the defects with a view to the effect that defect would have on the reliability of the affected system or component. The FAA acknowledges operators' ability to recognize safety-significant occurrences and findings, and does not anticipate an overabundance of useless information in response to this amendment. With respect to ATA's critical comments concerning the cost and benefit estimates of Notice 87-5, the FAA disagrees that its cost and benefit estimates were derived arbitrarily and lack sufficient documentation. While the cost and benefit estimates reflect some uncertainty, primarily related to the number of accidents and the magnitude of their respective casualty losses due to defective or inoperative emergency evacuation systems and components, they are considered to be reasonably reliable. These estimates are based on factual data and the informed judgement of FAA personnel, and they have been thoroughly documented in the detailed regulatory evacuation contained in the docket. Since the commenter does not provide any additional, more illuminating, cost and benefit estimates, the FAA will continue to use those benefit and cost estimates contained in Notice 87-5.

Economic Summary

Benefit-Cost-Analysis

This regulatory evaluation examines the benefit and cost elements of a Final Rule to establish mandatory reporting for each failure, malfunction, or defect of emergency evacuation systems and components. The rule amends Part 121 of the Federal Aviation Regulations (FAR), and it will require each certificate holder to report all failures, malfunctions, or defects of emergency evacuation systems and components. This action is necessary to collect, record, analyze, and disseminate data concerning those failures, malfunctions, or defects that occur during training, testing, or actual emergency conditions, so as to improve the reliability and safety of those systems and components. At present, air carriers and airmen report these malfunctions on a voluntary basis. There have been 106 voluntary reports submitted to the FAA between 1980 and 1985.

The rule was prompted largely as a result of concerns expressed by members of groups representing flight attendants, the National Transportation Safety Board, and the National Transportation Safety Association. These organizations stated that failures, malfunctions, or defects of evacuation systems and components are not being adequately reported to the FAA.

Benefits

The FAA states that potential benefits in the form of enhanced safety expected to accrue from implementation of the rule range between $2,600 and $131,000 annually. Such enhanced safety will result in reduced injuries or fatalities during emergency evacuation of air carriers because the improved data provided to FAA as a result of this rule will enable the agency to take timely action to correct deficiencies in emergency evacuation equipment. This timely corrective action would not be possible if the information were not available.

Costs

The FAA estimates that the total cost of compliance expected to accrue from implementation of the rule, dispersed among all air carriers, will range between $25 and $90 annually (in 1985 dollars). This assessment is based largely on information received from personnel at the FAA's Aviation Standards National Field Office in Oklahoma City, Oklahoma.

The FAA believes this rule is clearly cost-beneficial. The Regulatory Evaluation that has been placed in the docket contains additional information related to the costs and benefits expected to accrue from the implementation of this rule.

Regulatory Flexibility Determination

The Regulatory Flexibility Act of 1980 (RFA) was enacted to ensure that small entities are not unnecessarily and disproportionately burdened by government regulations. The RFA requires agencies to review rules which may have "a significant economic impact on a substantial number of small entities."

Virtually all of the small entities potentially impacted by the rule are operators of scheduled aircraft for hire who own nine or fewer aircraft, but not necessarily operated. After comparing the upper range of the total annual incremental cost of compliance ($90) to the annualized threshold of significant impact ($51,000), the FAA concludes that a substantial number of small entities would not be significantly impacted by the rule. In order for a small entity to be significantly impacted by the rule, it will have to submit more than an estimated 1,100 service difficulty reports annually to the FAA. This number is approximately 61 times more than the annual average of 18 for all air carriers presently submitting such reports to the FAA. The FAA believes that it is very unlikely this number of reports will be prepared and submitted annually by any one of the subject small entities. Therefore, the FAA believes the rule to require mandatory reporting of deficiencies in emergency evacuation systems and components will not have a significant economic impact on a substantial number of small entities.

International Trade Impact Assessment

The rule is expected to have neither an adverse impact on the trade opportunities for U.S. firms doing business abroad nor on foreign firms doing business in the United States. The rule will primarily have a cost impact on scheduled operators of U.S. registered air carriers such as turbojet and turboprop aircraft who report deficiencies in their emergency evacuation systems and components to the FAA. The size of this cost impact is expected to be small for those reasons previously noted in Section III of the detailed regulatory evaluation.

Conclusion

This amendment will enable the FAA to achieve prompt and appropriate corrections of conditions adversely affecting continued airworthiness of emergency evacuations systems and components. This will be achieved through the collection of service difficulty reports, their consolidation and collation in a common data bank, analysis of that data, and the rapid dissemination of trends, problems, and alert information to the appropriate segments of the aviation community and the FAA.

The amendment provides benefits, with negligible costs to the aviation public, by establishing mandatory reporting requirements which enhance the reliability of the data base for emergency evacuation systems and components.

Because this amendment is not likely to result in an annual effect on the economy of $100 million or more, or a major increase in costs for consumers, industry, or Federal, State, or local government agencies, it has been determined that it is not a major proposal under Executive Order 12291. In addition, this amendment will have little or no impact on trade opportunities for U.S. firms doing business overseas or for foreign firms doing business in the United States. The FAA has determined that this action is not significant under Department of Transportation Regulatory Policies and Procedures (44 FR 11034; February 26, 1979). In addition, as noted above, the FAA certifies that under the criteria of the Regulatory Flexibility Act, this regulation will not have a significant economic impact on a substantial number of small entities. A copy of the final evaluation prepared for this action, including a Regulatory Flexibility determination and Trade Impact Assessment, has been placed in the regulatory docket. A copy may be obtained by contacting the person identified under "For Further Information Contact."

Paperwork Reduction Act

Information collection requirements in § 121.703(a) have been approved previously by the Office of Management and Budget under the provisions of the Paperwork Reduction Act of 1980 (Pub. L. 96–511) and have been assigned OMB control number 2120–0008.

List of Subjects in 14 CFR Part 121

Aviation safety, Safety, Air carrier, Air transportation, Common carriers.

The Rule

Accordingly, the Federal Aviation Administration amends Part 121 of the Federal Aviation Regulations [14 CFR Part 121] as follows:

PART 121—CERTIFICATION AND OPERATIONS: DOMESTIC, FLAG AND SUPPLEMENTAL AIR CARRIERS AND COMMERCIAL OPERATORS OF LARGE AIRCRAFT

1. The authority citation for Part 121 is revised to read as follows:

Authority: 49 U.S.C. 1354(a), 1355, 1356, 1357, 1401, 1421–1430, 1472, 1485, and 1502; 49 U.S.C. 106(g) (Revised, Pub. L. 97–449, January 12, 1983).

2. By amending § 121.703 by removing the word "and" at the end of paragraph (a)(15); by removing the period at the end of paragraph (a)(16) and inserting "; and" in its place; and by adding a new paragraph (a)(17) to read as follows:

§ 121.703 Mechanical reliability reports.

(a) * * *

(17) Emergency evacuation systems or components including all exit doors, passenger emergency evacuation lighting systems, or evacuation equipment that are found defective, or that fail to perform the intended functions during an actual emerency or during training, testing, maintenance, demonstrations, or inadvertent deployments.

* * * * *

Issued in Washington, DC, on March 10, 1988.

T. Allan McArtor,

Administrator.

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. 87-NM-127-AD; Amdt. 39-5876]

Airworthiness Directives; McDonnell Douglas Model DC-9-80 (MD-80) Series Airplanes, Fuselage Numbers 1237 through 1368

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment revises an existing airworthiness directive, applicable to certain McDonnell Douglas Model DC-9-80 (MD-80) series airplanes, which currently requires inspection and replacement of certain cowl door latches. That amendment was prompted by reports of failures of cowl door latches on the engine nacelle. Failure of the cowl door latches could lead to loss of directional control during critical flight regimes, or cause a hazard to the public by falling debris. This amendment requires the replacement of certain cowl door latches installed on additional airplanes, fuselage numbers 1237 through 1276.

EFFECTIVE DATE: April 25, 1988.

ADDRESSES: The applicable service information may be obtained from McDonnell Douglas Corporation, 3855 Lakewood Boulevard, Long Beach, California 90846, Attention: Director of Publications, C1-L00 (54-60). This information may be examined at FAA, Northwest Mountain Region, 17900 Pacific Highway South, Seattle, Washington, or at 4344 Donald Douglas Drive, Long Beach, California.

FOR FURTHER INFORMATION CONTACT: Mr. Michael N. Asahara, Sr., Aerospace Engineer, Airframe Branch, ANM-122L, FAA, Northwest Mountain Region, Los Angeles Aircraft Certification Office, 4344 Donald Douglas Drive, Long Beach, California 90808; telephone (213) 514-6321.

SUPPLEMENTARY INFORMATION: A proposal to amend Part 39 of the Federal Aviation Regulations to revise AD 87-15-06, Amendment 39-5691 (52 FR 28134; July 28, 1987), to require replacement of certain cowl door latches installed on McDonnell Douglas Model DC-9-80 series airplanes, serial numbers 1237 through 1276, was published in the Federal Register on November 2, 1987 (52 FR 42001).

Interested persons have been afforded an opportunity to participate in the making of this amendment. Due consideration has been given to the single comment received.

The commenter requested that the proposed compliance period be extended from 45 days to 90 days after the effective date of AD. The commenter advised that this request is based upon the ability of the manufacturer to deliver parts required by the AD. The FAA does not agree with the commenter. After further investigation and contact with the manufacturer, the FAA has determined that the initial compliance time of 45 days reflected in the proposed rule is appropriate based on the availability of parts.

After careful review of the available data, including the comment noted above, the FAA has determined that air safety and the public interest require the adoption of the following rule.

It is estimated that 39 airplanes of U.S. registry will be affected by this AD, that it will take approximately 2.5 manhours per airplane to accomplish the required actions, and that the average labor cost will be $40 per manhour. Based on these figures, the total cost impact of the AD on U.S. operators is estimated to be $3,900.

For the reasons discussed above, the FAA has determined that this regulation is not considered to be major under Executive Order 12291 or significant under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and it is further certified under the criteria of the Regulatory Flexibility Act that this rule will not have a significant economic impact, positive or negative, on a substantial number of small entities, because few, if any, Model DC-9-80 (MD-80) series airplanes are operated by small entities. A final evaluation has been prepared for this regulation and has been placed in the docket.

List of Subjects in 14 CFR Part 39

Aviation safety, Aircraft.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration amends § 39.13 of Part 39 of the Federal Aviation Regulations (14 CFR 39.13) as follows:

PART 39—[AMENDED]

1. The authority citation for Part 39 continues to read as follows:

Authority: 49 U.S.C. 1354(a), 1421 and 1423; 49 U.S.C. 106(g) (Revised, Pub. L. 97-449, January 12, 1983), and 14 CFR 11.89.

§ 39.13 [Amended]

2. By revising AD 87-15-06, Amendment 39-5691 (52 FR 28134; July 28, 1987), by redesignating existing paragraphs "B., C., D., and E.," as "C., D., E., and F.," respectively, and adding a new paragraph B., as follows:

McDonnell Douglas: Applies to McDonnell Douglas Model DC-9-80 (MD-80) series airplanes, Fuselage Numbers 1237 through 1368, certificated in any category. Compliance required as indicated, unless previously accomplished.

To ensure the integrity of the cowl door latches, accomplish the following:

A. Within 7 days after the effective date of this AD, unless already accomplished within the last 7 days, visually inspect P/N 7958533-517 (Hartwell P/N H2816-3) cowl door latch assemblies for fractures, paying particular attention to the attachment hook. Perform this inspection in accordance with McDonnell Douglas Alert Service Bulletin A71-42, dated June 24, 1987 (hereinafter referred to as ASB A71-42), or later FAA-approved revisions.

1. If fracture is found, prior to further flight replace all latch assemblies on the affected door.

2. If fracture is not found, repeat the visual inspections of the cowl door latches at intervals not to exceed 7 days, until such time as P/N 7958533-517 (Hartwell P/N H2816-3) latch assemblies are replaced with new P/N 7958533-519 (Hartwell P/N H2816-5) latch assemblies in accordance with ASB A71-42.

B. For fuselage number 1237 through 1276 only: Within 45 days after the effective date of this AD, install new latch assemblies P/N 7958533-519 (Hartwell P/N H2816-5), in accordance with ASB A71-42.

C. For fuselage numbers 1277 through 1368 only: Within 70 days after the effective date of this AD, install new latch assemblies, P/N 7958533-519 (Hartwell P/N H2816-5), in accordance with ASB A71-42.

D. Installation of new cowl door latches, P/N 7958533-519 (Hartwell P/N 2816-5), constitutes terminating action for this AD.

E. Alternate means of compliance which provide an acceptable level of safety may be used when approved by the Manager, Los Angeles Aircraft Certification Office, FAA, Northwest Mountain Region.

F. Special flight permits may be issued in accordance with FAR 21.197 and 21.199 to operate airplanes to a base in order to comply with the requirements of this AD.

All persons affected by this directive who have not already received the appropriate service information from the manufacturer may obtain copies upon request to McDonnell Douglas Corporation, 3855 Lakewood Boulevard, Long Beach, California 90846, Attention: Director of Publications, C1-L00 (54-60). These documents may be examined at the FAA, Northwest Mountain Region, 17900 Pacific Highway South, Seattle, Washington or the Los Angeles Aircraft Certification Office, 4344 Donald Douglas Drive, Long Beach, California.

This amendment becomes effective April 25, 1988.

Issued in Seattle, Washington, on March 7, 1988.

Wayne J. Barlow,

Director, Northwest Mountain Region.

NATIONAL AERONAUTICS AND SPACE ADMINISTRATION

48 CFR Part 14

Federal Acquisition Regulation (FAR); Mistake in Bid Procedures

AGENCIES: Department of Defense (DoD), General Services Administration (GSA), and National Aeronautics and Space Administration (NASA).

ACTION: Proposed rule.

SUMMARY: The Civilian Agency Acquisition Council and the Defense Acquisition Regulatory Council are considering changes to Federal Acquisition Regulation 14.406–3 to clarify the obligation of the contracting officer to disclose all appropriate information when requesting additional evidence to support a contractor's bid when there is a basis to believe that the bid might contain a mistake.

DATE: Comments should be submitted to the FAR Secretariat at the address shown below on or before May 16, 1988, to be considered in the formulation of a final rule.

ADDRESS: Interested parties should submit written comments to: General Services Administration, FAR Secretariat (VRS), 18th & F Streets, NW., Room 4041, Washington, DC 20405.

Please cite FAR Case 88–16 in all correspondence related to this issue.

FOR FURTHER INFORMATION CONTACT: Margaret A. Willis, FAR Secretariat, Room 4041, GS Building, Washington, DC 20405.

SUPPLEMENTARY INFORMATION:

A. Background

Recently, questions have arisen with respect to the contracting officer's obligation to fully disclose to the contractor all the information which the contracting officer possesses, when the contracting officer suspects a potential mistake in bid prior to award. The proposed coverage is intended to emphasize the importance for the contracting officer to fully describe to the contractor all conditions which had caused the contracting officer to conclude that there is a potential mistake in bid.

B. Regulatory Flexibility Act

The proposed rule is not expected to have significant economic impact on a substantial number of small entities within the meaning of the Regulatory Flexibility Act, 5 U.S.C. 601 *et seq.* because the rule merely clarifies the responsibility of the contracting officer to advise the bidder of the basis for suspecting a potential mistake in bid. An initial regulatory flexibility analysis has therefore not been performed. Comments are invited from small businesses and other interested parties.

Comments from small entities concerning the affected FAR Subpart will also be considered in accordance with section 610 of the Act. Such comments must be submitted separately and cite FAR Case 88–610 in correspondence.

C. Paperwork Reduction Act

The Paperwork Reduction Act (Pub. L. 96–511) does not apply because the proposed rule does not impose any additional recordkeeping or information collection requirements or collection of information from offerors, contractors, or members of the public which require the approval of OMB under 44 U.S.C. 3501, *et seq.*

List of Subjects in 48 CFR Part 14

Government procurement.

Dated: March 8, 1988.

Harry S. Rosinski,

Acting Director, Office of Federal Acquisition and Regulatory Policy.

Therefore, it is proposed that 48 CFR Part 14 be amended as set forth below:

PART 14—SEALED BIDDING

1. The authority citation for Part 14 continues to read as follows:

Authority: 40 U.S.C. 486(c); 10 U.S.C. Ch. 137; and 42 U.S.C. 2473(c).

2. Section 14.406–3 is amended by revising paragraph (g)(1)(iv) to read as follows:

14.406–3 Other mistakes disclosed before award.

* * * * *

(g) * * *

(1) * * *

(iv) Of any other information, proper for disclosure, that leads the contracting officer to believe that there is a mistake in bid.

* * * * *

BILLING CODE 6820-61-M

---

48 CFR Part 32

Federal Acquisition Regulation (FAR); Progress Payments, First Article

AGENCIES: Department of Defense (DoD), General Services Administration (GSA), and National Aeronautics and Space Administration (NASA).

ACTION: Proposed rule.

SUMMARY: The Civilian Agency Acquisition Council and the Defense Acquisition Regulatory Council are considering changes to Federal Acquisition Regulation (FAR) 32.501–5 concerning progress payments when there is a requirement for an approved first article.

DATE: Comments should be submitted to the FAR Secretariat at the address shown below on or before May 16, 1988, to be considered in the formulation of a final rule.

ADDRESS: Interested parties should submit written comments to: General Services Administration, FAR Secretariat (VRS), 18th & F Streets, NW., Room 4041, Washington, DC 20405.

Please cite FAR Case 88–15 in all correspondence related to this issue.

FOR FURTHER INFORMATION CONTACT: Margaret A. Willis, FAR Secretariat, Room 4041, GS Building, Washington, DC 20405.

SUPPLEMENTARY INFORMATION:

A. Background

The proposed revision to FAR 32.501–5 is considered necessary to improve the Government's ability to protect its financial interests on first article approval items. The Defense Acquisition Regulation had required the contracting officer to limit progress payments on first article work. There was no Federal Procurement Regulation equivalent. It had been intended that the FAR adopt adequate safeguards in FAR Subpart 9,3. Ultimately, however, neither FAR Subpart 9.3 nor FAR Part 32 gave the contracting officer the authority to incorporate additional protective terms for progress payments on first article work. This placed the Government's financial interests in first article work at risk and resulted in cases where unliquidated progress payments could not be recovered. The proposed revision to FAR 32.501–5 allows the contracting officer the authority to limit progress payments on first article work by a stated dollar amount or percentage. The provision is permissive, not mandatory.

B. Regulatory Flexibility Act

The proposed change to FAR 32.501–5 may have a significant economic impact on a substantial number of small entities within the meaning of the Regulatory Flexibility Act, 5 U.S.C. 601 *et seq.* An Initial Regulatory Flexibility Analysis has been prepared and is summarized as follows: Small businesses will be

impacted to the extent that they are involved in first article work. Agencies do not maintain statistics on how many contracts contain first article approval provisions. One agency estimates that it annually awards roughly 2,000 contracts requiring first article approval; about 40% to 50% being to small businesses. Since the proposed revision is permissive rather than mandatory, use of the protective limitation cannot be predicted. The Initial Regulatory Flexibility Analysis (IRFA) is being submitted to the Chief Counsel for Advocacy of the Small Business Administration.

A copy of the IRFA may be obtained from the FAR Secretariat, Attn: Margaret A. Willis, Room 4041, GS Building, 18th and F Streets, NW., Washington, DC 20405. Comments are invited. Comments from small entities concerning the affected FAR section will also be considered in accordance with section 610 of the Act. Such comments must be submitted separately and cite FAR Case 88–610 in correspondence.

C. Paperwork Reduction Act

The Paperwork Reduction Act (Pub. L. 96–511) does not apply because the proposed rule does not impose any additional recordkeeping or information collection requirements or collection of information from offerors, contractors, or members of the public which require the approval of OMB under 44 U.S.C. 3501, *et seq.*

List of Subjects in 48 CFR Part 32

Government procurement.

Dated: March 4, 1988.

Harry S. Rosinski,

Acting Director, Office of Federal Acquisition and Regulatory Policy.

Therefore, it is proposed that 48 CFR Part 32 be amended as set forth below:

PART 32—CONTRACT FINANCING

1. The authority citation for Part 32 continues to read as follows:

Authority: 40 U.S.C. 486(c); 10 U.S.C. Ch. 137; and 42 U.S.C. 2473(c).

2. Section 32.501–5 is amended by adding paragraph (e) to read as follows:

32.501–5 Other protective terms.

* * * * *

(e) If first article testing and approval is required (see Subpart 9.3), the contracting officer may include a provision limiting progress payments on first article work by a stated amount or percentage.

Farmers Home Administration

7 CFR Parts 1924, 1941, 1962, and 1965

Implementation of Provisions of the Supplemental Appropriations Act, (Public Law 100–71), Dated July 11, 1987

AGENCY: Farmers Home Administration, USDA.

ACTION: Final rule.

SUMMARY: The Farmers Home Administration (FmHA) amends its regulations to authorize the making of annual production loans or the granting of subordinations to delinquent FmHA borrowers, who operate or will operate not larger than family size farms; and who apply for assistance and show they can realistically project a positive cash flow, but only to the extent of repaying all annual production monies borrowed and all supplier credit obtained (including interest only on these amounts) for the planned production and marketing cycle, rather than on all current payments on debts outstanding. This assistance will be available only to those delinquent borrowers who do not qualify for an annual production loan after all servicing options have been considered, as set forth in Subpart A of Part 1951, "Account Servicing Policies", along with certain other requirements. The reason for amending these regulations is to comply with a provision in Chapter X of the Supplemental Appropriations Act for 1987, (Pub. L. 100–71, 101 Stat. 429), dated July 11, 1987. The Act requires FmHA to restore its procedures and policies to those in effect from October 1982, through November 30, 1985, known as the "Continuation Policy."

EFFECTIVE DATE: March 16, 1988.

ADDRESS: The Regulatory Impact Statement (RIA) will be made available for public inspection during regular working hours at the following address:

Office of the Chief, Directives Management Branch, USDA, Room 6348, South Agriculture Building, 14th Street and Independence Avenue, SW., Washington, DC 20250.

FOR FURTHER INFORMATION CONTACT: Mark Falcone, Senior Loan Officer, Farmer Programs Loan Making Division, Farmers Home Administration, USDA, South Agriculture Building, 14th Street and Independence Avenue, SW., Washington, DC 20250, telephone (202) 475–4019.

SUPPLEMENTARY INFORMATION:

Classification

This action has been reviewed under USDA procedures established in Departmental Regulation 1512–1, which implements Executive Order 12291, and has been determined to be major because it will result in an annual effect on the economy of $100 million or more.

Memorandum of Law

I have reviewed the regulations which the Farmers Home Administration (FmHA) is issuing as a final rule to implement a provision in Chapter X of Pub. L. 100–71, the Supplemental Appropriations Act for 1987 (101 Stat. 429). I find that these regulations comply with that statute and that FmHA has the authority to issue such regulations pursuant to § 339 of the Consolidated Farm and Rural Development Act (7 U.S.C. 1989).

Christopher Hicks,

General Counsel.

Summary of RIA

The USDA has developed a Preliminary Regulatory Impact Analysis (PRIA) which was summarized in the proposed rule. A study was done to document the cost of implementing this rule. While four comments were received concerning the rule, none addressed the PRIA. Therefore, there is no reason to revise these estimates.

Even though the cost exceeds the likely benefits, there is no discretion in implementing this rule as it is law.

Intergovernmental Consultation

For the reasons set forth in the final rule related to Notice 7 CFR Part 3015, Subpart V (48 FR 29115, June 24, 1983) and FmHA Instruction 1940–J, "Intergovernmental Review of Farmers Home Administration Programs and Activities" (December 23, 1983), Farm Operating Loans are excluded from the scope of Executive Order 12372, which requires intergovernmental consultation with State and local officials.

Programs Affected

These changes affect the FmHA operating loan program, as listed in the Catalog of Federal Domestic Assistance: 10.406—Farm Operating Loans

Environmental Impact Statement

This document has been reviewed in accordance with 7 CFR Part 1940, Subpart G, "Environmental Program." It is the determination of FmHA that the final action does not constitute a major Federal action significantly affecting the quality of the human environment, and in accordance with the National Environmental Policy Act of 1969, Pub. L. 91–190, an Environmental Impact Statement is not required.

Discussion of Final Rule

On November 16, 1987, FmHA published a proposed rule in the Federal Register (52 FR 43768—43766) with a common period ending December 16, 1987. The purpose of this final rule is to implement a provision in Chapter X of the Supplemental Appropriations Act for 1987 (Pub. L. 100–71, 101 Stat. 429). That Act provides for the making of annual production loans and the granting of subordinations to delinquent FmHA borrowers, who cannot otherwise be assisted after considering all servicing options as set forth in Subpart A of Part 1951, "Account Servicing Policies". Such delinquent borrowers who apply for assistance must show they can realistically project a positive cash flow, but only to the extent of repaying all annual production monies borrowed and all supplier credit obtained for the planned production and marketing cycle, rather than on all current payments on debts outstanding, subject to certain conditions as enumerated in § 1941.14 of Subpart A of Part 1941 of this chapter.

Discussion of Comments

Four comment letters were received, all from FmHA County Supervisors, including one from the President of the National Association of County Supervisors.

The letters indicated concern over the proposed rule, such as: (1) Delaying the inevitable discontinuation of a farming operation, and causing further deterioration of the business, by providing additional financial assistance to a farmer who is so heavily burdened with debt; and (2) the extreme hardship on county offices in administering this policy.

While these comments make valid points, the statute requires that delinquent FmHA borrowers be offered such assistance and, therefore, FmHA has no choice but to comply with the statute.

Two commenters also expressed the view that this type of assistance should be offered to non-delinquent borrowers as well. Public Law 100–71 does not require this, and such a proposal would not be administratively feasible because of the expense involved. Besides, non-delinquent borrowers already have the opportunity to restructure their FmHA debt under FmHA's servicing regulations and thus to apply and qualify for annual production loans under the other provisions in Subpart A of Part 1941.

One commenter also criticized the requirement to obtain non-disturbance agreements as leading to poor relations among lenders. FmHA believes such a requirement is necessary to protect the Government's interest since assistance to the borrowers involved presents a greater risk to the Government's financial position. However, FmHA has loosened the provision somewhat to just require non-disturbance agreements from those to whom the applicant is behind schedule in payments and will remain so at the time of loan approval.

This commenter went on to suggest changes to further restrict the flow of money to such delinquent borrowers, such as requiring that all the borrowers' income be assigned to FmHA and put in a supervised bank account and limiting the annual production loan to 60% of the value of projected gross sales. FmHA believes that adoption of these comments would severely restrict a borrower's ability to continue operating and, in the case of the 60% limit, would not comply with Pub. L. 100–71. Therefore, FmHA is not adopting these suggestions.

Discussion of Changes

Upon a further review and due to the Agricultural Credit Act of 1987 (Pub. L. 100–233) that was enacted on January 6, 1988, we have made some changes in the final rule that differ from the proposed rule, including some minor changes for clarification.

In the introductory language of § 1941.14, we have made it clear that the loans made or subordinations granted under that section will be available only to those delinquent borrowers who have not yet been accelerated. FmHA's "Continuation Policy," which these regulations restore, did not apply to accelerated borrowers. If, for any reason, an acceleration is withdrawn, then the delinquent borrower affected would be able to apply for a loan or subordination under this section.

Section 1941.14(a)(6) has been revised to state that non-disturbance agreements will be obtained for the term of the FmHA annual production loan being made, but only from creditors to whom the applicant will be behind in payments at the time of loan approval.

Because of the Agriculture Credit Act of 1987, we have revised § 1941.14(c) and (d) from the proposed rule to delete all references to Forms FmHA 1924–25, "Notice of Intent to Take Adverse Action," and FmHA 1924–26, "Borrower Acknowledgement of Notice to Take Adverse Action," and to liquidation action. These paragraphs now instruct the County Supervisor to follow the procedure in § 1941.33(b) and (d) of Part 1941 after an eligibility determination has been made. In essence, this states that further processing of the loan application will continue if the applicant is determined eligible. If an unfavorable decision is made, the applicant will be notified in writing and will be informed of the opportunity to appeal the decision.

List of Subjects

7 CFR Part 1924

Agriculture, Construction and repair, Loan programs—Agriculture.

7 CFR Part 1941

Crops, Livestock, Loan programs—Agriculture, Rural areas, Youth.

7 CFR Part 1962

Crops, Government property, Livestock, Loan programs—Agriculture, Rural areas.

7 CFR Part 1965

Foreclosure, Loan programs—Agriculture, Rural areas.

Therefore, Chapter XVIII, Title 7, Code of Federal Regulations is amended as follows:

PART 1924—CONSTRUCTION AND REPAIR

1. The authority citation for Part 1924 continues to read as follows:

Authority: 7 U.S.C. 1989; 42 U.S.C. 1480; 5 U.S.C. 301; 7 CFR 2.23; 7 CFR 2.70

Subpart B—Management Advice to Individual Borrowers and Applicants

2. Section 1924.57 is amended by revising paragraph (c)(5)(ii) to read as follows:

§ 1924.57 Planning.

* * * * *

(c) * * *

(5) * * *

(ii) Meet necessary payments on all debts, except as provided in § 1941.14 of Subpart A of Part 1941 of this chapter, for annual production loans made to delinquent borrowers.

PART 1941—OPERATING LOANS

3. The authority citation for Part 1941 continues to read as follows:

Authority: 7 U.S.C. 1989; 5 U.S.C. 301; 7 CFR 2.23; 7 CFR 2.70.

Subpart A—Operating Loan Policies, Procedures and Authorizations

4. Section 1941.14 is added to read as follows:

§ 1941.14 Annual production loans to delinquent borrowers.

Delinquent borrowers who otherwise meet the eligibility requirements in § 1941.12 of this subpart, whose accounts have not been accelerated by FmHA, and who cannot be assisted after considering all servicing options in Subpart A of Part 1951 of this chapter, including distressed Farmer Programs loans for softwood timber production in applicable areas, may qualify for annual production loans under this section or subordinations under Subpart A of Part 1962 and Part 1965 of this chapter, when the conditions in paragraph (a) of this section are met.

(a) Such delinquent borrowers must apply for assistance and must meet all of the following conditions before their loan is approved:

(1) The borrower has acted in good faith by demonstrating sincerity and honesty in meeting all agreements and promises made with and to the FmHA.

(2) The borrower has been unable to pay accounts as scheduled due to:

(i) Reduction in essential income from a non-farm job, e.g., unemployment or underemployment of the borrower-operator or spouse, caused by circumstances beyond the borrower's control; or

(ii) Reduction in income caused by illness, injury or death of an individual borrower; or, in the case of an entity borrower, the stockholder, member, joint operator or partner who operates the farm; or

(iii) Reduction in income caused by natural disaster(s), an outbreak of uncontrollable disease, and/or uncontrollable insect damage, which caused severe loss of agricultural production that reduced the repayment ability of the borrower to the degree that scheduled payments could not be met.

(3) The borrower has applied the improvements and key management practices spelled out in Item D of Form FmHA 431–2, "Farm and Home Plan," or in any other acceptable farm plan of operation.

(4) The borrower has properly maintained chattel and real estate security, and properly accounted for the sale of security, including crops, livestock and livestock production.

(5) A farm plan of operation projecting realistic production, commodity prices, family living expenses, and operating expenses, is developed; the proposed cash flow projection shows that all operating expenses, reasonable family living expenses, and principal and accruing interest on all production loans and supplier credit for the production and marketing cycle can be repaid from

the planned income. Borrowers will not be required to show that they can pay any principal or interest on other debts outstanding.

(6) Non-disturbance agreements will be obtained, for the term of the FmHA annual production loan being made, from *all* creditors to whom the applicant is indebted when repayment of the indebtedness is behind schedule and will remain so at the time the FmHA loan is approved.

(b) Loan funds will be used to pay annual operating and family living expenses *only*, as further explained in § 1941.16 of this subpart.

(c) If the borrower is eligible for assistance under this section, follow the procedures in § 1941.33(b) of this subpart.

(d) If the borrower is not eligible for assistance under this section, the County Supervisor will so inform the borrower in accordance with § 1941.33(d) of this subpart.

(e) Form FmHA 1941-1, "Criteria for Continuing Assistance to Delinquent Borrowers" is used to document the basis for continued assistance. The County Supervisor will date and sign the form and place it in position number three of the case file. At loan closing, or at the time of approval of a subordination, the County Supervisor will advise borrowers, by FmHA Form Letter 1941-A-1, "Advice to Borrower of Financial Condition," of their serious financial condition; the importance of carrying out the plan, as developed, for the production and marketing cycle being financed; and that FmHA is continuing to provide assistance for their operations only on a year-to-year basis. Borrowers will be further advised that their farming operations will be evaluated at the end of the production season and a decision willl be made, at that time, whether FmHA will consider assistance for another year to continue their operations. The County Supervisor will answer any question(s) a borrower has concerning the letter and explain its purpose. FmHA Form Letter 1941-A-1 will be signed and dated by the County Supervisor and the borrower(s) at loan closing or at the time of approval of a subordination. A copy will be given to the borrower, and the original will be retained in the case file to acknowledge the borrower's receipt of the letter.

PART 1962—PERSONAL PROPERTY

5. The authority citation for Part 1962 continues to read as follows:

Authority: 7 U.S.C. 1989; 5 U.S.C. 301; 7 CFR 2.23; 7 CFR 2.70.

Subpart A—Servicing and Liquidation of Chattel Security

6. Section 1962.30 is amended by redesignating paragraphs (b)(1) through (b)(8) as paragraphs (b)(2) through (b)(9) and by adding a new paragraph (b)(1) to read as follows:

§ 1962.30 Subordination and waiver of FmHA liens on chattel security.

* * * * *

(b) * * *

(1) A subordination for an annual production loan only to a delinquent borrower may also be approved, if the borrower meets the requirements set forth in § 1941.14 of Subpart A of Part 1941 of this chapter.

* * * * *

PART 1965—REAL PROPERTY

7. The authority citation for Part 1965 continues to read as follows:

Authority: 7 U.S.C. 1989; 42 U.S.C. 1480; 5 U.S.C. 301; 7 CFR 2.23; 7 CFR 2.70.

Subpart A—Servicing of Real Estate Security for Farmer Program Loans and Certain Note-Only Cases

8. Section 1965.12 is amended by revising (b)(2)(ii)(C) to read as follows:

§ 1965.12 Subordination of FmHA mortgage to permit refinancing, extension, increase in amount of existing prior lien, to permit a new prior lien, or to permit reamortization.

* * * * *

(b) * * *

(2) * * *

(ii) * * *

(C) When a farm tract secures any FmHA loan, and it is determined essential for the borrower to remain in farming, the State Director may approve a subordination for annual operating credit when no other alternative exists. The reason(s) and justification supporting the subordination for operating expenses will be fully documented in the case file by the County Supervisor prior to submission to the State Director. A subordination for an annual production loan only, to a delinquent borrower, may also be approved by the State Director, if the borrower meets the requirements in § 1941.14 of Subpart A of Part 1941 of this chapter.

Federal Aviation Administration

14 CFR Part 25

Improved Structural Requirements for Pressurized Cabins and Compartments in Transport Category Airplanes; Notice of Proposed Rulemaking

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 25

[Docket No. 25567; Notice No. 88–5]

Improved Structural Requirements for Pressurized Cabins and Compartments in Transport Category Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: This notice proposes to amend Part 25 of the Federal Aviation Regulations (FAR) to upgrade the structural requirements for transport category airplane pressurized cabins by: (1) Amending the criteria for evaluation of the secondary effects of openings in the pressure vessel, and (2) extending the area of consideration to include openings anywhere within the pressure vessel. The required opening sizes to be considered would not be changed. This proposal is a result of an FAA review of the pressurized cabin load requirements, and is intended to make the pressurized cabin load requirements less design-dependent and more objective. It would require evaluation of openings in any pressurized compartment and examination of the effects of differential pressure loads on any critical structure inside or outside of the pressurized cabin.

DATES: Comments must be received on or before July 14, 1988.

ADDRESS: Comments on this proposal may be mailed in duplicate to: Federal Aviation Administration, Office of the Chief Counsel, Attention: Rules Docket (AGC–204), Docket No. 25567, 800 Independence Avenue SW., Washington, DC 20591, or delivered in duplicate to: Room 915G, 800 Independence Avenue SW., Washington, DC 20591. Comments delivered must be marked: Docket No. 25567.

Comments may be inspected in Room 915G weekdays, except Federal holidays, between 8:30 a.m. and 5:00 p.m. In addition, the FAA is maintaining an information docket of comments in the Office of the Regional Counsel (ANM–7), FAA, Northwest Mountain Region, 17900 Pacific Highway South, C–68966, Seattle, Washington 98168. Comments in the information docket may be inspected in the Office of the Regional Counsel weekdays, except Federal holidays, between 7:30 a.m. and 4:00 p.m.

FOR FURTHER INFORMATION CONTACT: James Haynes, Policy & Procedures Branch (ANM–111), Transport Standards Staff, Aircraft Certification Division, FAA Northwest Mountain Region, 17900 Pacific Highway South, C–68966, Seattle, Washington 98168; telephone (206) 431–2113.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested persons are invited to participate in the proposed rulemaking by submitting such written data, views, or arguments as they may desire. Comments relating to the environmental, energy, or economic impact that might result from adoption of proposals contained in this notice are invited. Substantive comments should be accompanied by cost estimates. Commenters should identify the regulatory docket or notice number and submit comments, in duplicate, to the Rules Docket address specified above. All comments will be considered by the Administrator before taking action on the proposed rulemaking. The proposals contained in this notice may be changed in light of comments received. All comments will be available in the Rules Docket, both before and after the closing date for comments, for examination by interested persons. A report summarizing each substantive public contact with FAA personnel concerning this rulemaking will be filed in the docket. Commenters wishing the FAA to acknowledge receipt of their comments must submit with those comments a self-addressed, stamped postcard on which the following statement is made: "Comments to Docket No. 25567." The postcard will be date/time stamped and returned to the commenter.

Availability of NPRM

Any person may obtain a copy of this NPRM by submitting a request to the Federal Aviation Administration, Office of Public Affairs, Attention: Public Information Center, APA–230, 800 Independence Avenue SW., Washington, DC 20591; or by calling (202) 267–3484. Communications must identify the notice number of this NPRM. Persons interested in being placed on a mailing list for future NPRMs should also request a copy of Advisory Circular No. 11–2A, Notice of Proposed Rulemaking Distribution System, which describes the application procedures.

Background

Section 25.365 "Pressurized cabin loads" was revised by Amendment 25–54 (effective October 14, 1980) to include a new requirement for the structural evaluation of the effects of rapid depressurization resulting from a specific size opening in the fuselage. This requirement was initially instigated by a transport airplane accident in which a failed door resulted in decompression and collapse of the floor with subsequent jamming of the flight controls and loss of the airplane. Concerns brought to light by this accident included the reliability of outward opening doors and the potential harm to the airplane from openings that may occur in the pressure vessel from a variety of causes including the detonation of bombs, mid-air collisions, and maintenance and production errors. These concerns resulted in proposal number 1051 of the Biennial Airworthiness Review of 1974–1975, and the final result of this regulatory review was NPRM No. 75–31 (40 FR 29410; July 11, 1975).

Notice of Proposed Rulemaking No. 75–31 proposed to prevent floor failure, or any structural failure that would prevent continued safe flight and landing caused by the sudden release of pressure in any compartment through an opening at any approved operating altitude by considering openings from bomb detonations, nonplug door failures, engine disintegrations, bird strikes, and any other eventualities. However, the adopted rule (Amendment 25–54, effective October 14, 1980) limited the compartment openings to those caused by engine disintegration and other airplane or equipment failures and prescribed a computed opening size to account for the other events. In addition, the location of the computed opening was limited to the passenger and cargo compartments and the evaluation of the effects was limited to partitions, floors and bulkheads within the pressurized cabin.

The changes brought about by Amendment 25–54 addressed the original concerns by: (1) Revising § 25.783 "Doors" which significantly improved the standards for doors to the point that the failure of an outward opening door was considered extremely improbable, and (2) requiring a design that would prevent the collapse of floors and bulkheads in the event of a specific size opening in passenger and cargo compartments. The required opening size was up to 20 square feet depending on the maximum cross-sectional area of the fuselage.

The changes to § 25.783 were considered to adequately address the occurrence of fuselage openings resulting from the openings of large doors and the changes to § 25.365 were considered to provide protection against the secondary effects of decompression resulting from many other causes of fuselage openings. The principal cause of the openings considered in the proposal and the adoption of the rule was the detonation of bombs in the cabin during pressurized flight. However, the required opening size was considered large enough to cover other conceivable causes of openings such as structural failure resulting from corrosion; failure of rotating machinery; or the effects of maintenance, production and operation errors, so that the specific enumeration of events was not considered necessary.

The intent of the proposed change to § 25.365(e) in NPRM No. 75–31 was to provide some level of protection for the critical systems and components from the effects of decompression in the event of a fuselage opening that in itself may not cause loss of the airplane. The specific rule, as adopted, required the airplane to be designed to prevent collapse of floors and bulkheads in the event of a specified opening size. Physiological effects of depressurization on the crew and passengers, or loss of structural integrity at the opening location, were not considerations of NPRM No. 75–31 or of Amendment 25–54.

Section 25.365(e) required the airplane to be designed to prevent the collapse of floors and bulkheads that could result from an opening in any passenger or cargo compartment. The location of the opening was limited to these areas since they were considered the most likely locations for a bomb. In addition, a detonation in the cockpit area was considered more likely to result in direct loss of the airplane.

A similar retroactive requirement was issued in the form of an airworthiness directive and made applicable to all wide body airplanes. This airworthiness directive resulted in the strengthening of the floors and additional provisions for ventilation between compartments. The benefits gained from this requirement may have been realized in 1984 when a Boeing 747 airplane survived a 40 square foot opening from a bomb detonation.

Discussion

Although § 25.365(e), as adopted by Amendment 25–54, significantly reduced the vulnerability of transport airplanes to openings in the pressure vessel, its focus now appears too limited. The principal concern was originally loss of critical flight control systems from secondary structural failures; however, the regulation focused on collapse of floors and bulkheads which were the specific events that occurred in the instigating accident. As a result, transport airplanes are only required to be designed to prevent failure of these components. Hazards to critical systems, other than those resulting from the collapse of floors and bulkheads, are not addressed by the current rule.

Pressure venting into normally unpressurized compartments and cavities can cause secondary structural damage to components other than floors and bulkheads which in turn can lead to failure of critical flight control systems and components. The loss of a Boeing 747 airplane in 1985 may have been caused by an opening in the rear pressure bulkhead, venting pressure into an unpressurized area of the vertical fin, resulting in further structural damage to the empennage and finally in loss of the critical flight control systems. The actual opening in this case may have been less than the maximum that would have been required under § 25.365(e). Although § 25.365(e) of Amendment 25–54 was not directly applicable to this particular airplane, an airworthiness directive (AD No. 75–15–05), containing some of the essential provisions of § 25.365(e), was applicable but did not require evaluation of this type of event, though such secondary failures were part of the general concerns that led to the AD. Rather than focus on the general objective and concerns regarding structural requirements for pressurized cabins, the airworthiness directive and the current role focus on the specific events that occurred in a particular accident.

Although there are additional rules requiring failsafe and damage tolerant evaluation, they are limited to the normal design envelope or to specific discrete events. The purpose of § 25.365(e) is to provide some level of protection against secondary failures due to depressurization caused by events outside the normal design envelope. The original concerns specified in the Biennial Airworthiness Review of 1974–1975 were openings resulting from bomb detonations, mid-air collisions, engine disintegrations, bird strikes, and the effects of production, operation and maintenance errors. The level of protection established by the current rule is based on the evaluation of an opening size of up to 20 square feet depending on the fuselage diameter. Service experience does not indicate a deficiency in the required opening size and no change in opening size is proposed. The proposed rule would require evaluation of structural components under pressure differential loads resulting from decompression to insure continued safe flight and landing. The loss of structural integrity at the opening location or physiological effects on occupants are not considerations of the proposed rule.

The current rule limits the location of the opening required by § 25.365(e)(2) to passenger and cargo compartments. The required size of the opening was considered to be large enough to account for a survivable bomb detonation as well as other conceivable events. Although a bomb detonation might be catastrophic within itself in smaller compartments such as the cockpit area, the original concern was for openings due to other causes as well. Openings caused by structural failures resulting from severe corrosion or poor maintenance and repair, or both, are as likely in small compartments as in other locations of the pressure vessel. It is also likely that openings of this size in the cockpit area could be survivable in some cases and it is proposed that they be evaluated to insure that the airplane will not be lost due to secondary failures or collapse of other critical components. Recent experience has also shown that no area of the pressure vessel is immune to bomb detonation and there is some likelihood that they could be survivable regardless of the location if sufficient protection from secondary effects is provided. Some compartments within the pressurized cabin may be so small and of such a geometry that the specified maximum opening could not reasonably be expected to involve only the one compartment. It is proposed that such compartments be evaluated for the largest opening that can be expected to remain confined within the compartment. For the larger openings, up to the maximum specified, the compartment may be combined with an adjacent compartment and both treated as a single compartment.

The proposed regulation would require evaluation of secondary effects after decompression resulting from a specified opening anywhere in the pressure vessel. Specifically, the proposal would require that no structural failure resulting from the effects of decompression would prevent continued safe flight and landing. All effects on systems, equipment or other structural components resulting from the secondary structural failures would have to be evaluated.

Regulatory Evaluation

The proposed rule potentially impacts U.S. and foreign manufacturers that sell newly type certificated transport category airplanes in the U.S.

The FAA estimates the incremental cost of compliance that would accrue from implementation of the proposed rule would be minor. This assessment is

VOL
53
ISS
51
MR
16
1988
UMI

based largely on information received from industry sources. According to the industry sources, the Japan Airlines (JAL) flight 123 accident prompted increased worldwide safety awareness which, coupled with an anticipation of FAA rulemaking action related to the subject accident, provided most of the impetus behind the voluntary adoption of structural changes (similar to those required by the proposed rule) by manufacturers of transport category airplanes (including business jets). Manufacturers of these airplanes reviewed their existing and future designs for possible flaws similar to those believed to have contributed to the JAL flight 123 accident. Appropriate structural changes were made to some airplanes in the design stage and to some airplanes currently in use by operators. For these reasons, the FAA believes compliance with the proposed rule would not impose any significant additional costs on manufacturers of transport category airplanes.

The potential benefits of the proposed rule represent the prevention of casualty losses (fatalities and to a lesser extent property damage) that would occur if sufficient protection were not taken against the effects of decompression resulting from openings anywhere within pressure vessels of transport category airplanes.

Based largely on information received from industry sources, the FAA expects the proposed rule to ensure that a sufficient level of safety would be attained with regard to the effects of openings up to 20 square feet in size anywhere within the pressurized fuselages of U.S. transport category airplanes. If, however, the proposed rules were not adopted, at least one aviation accident involving a transport category airplane would more than likely take place during the next 10 years. It is estimated that one such accident would amount to either a uniform stream of $13.6 million annually or a cumulative $84 million discounted over the next 10 years, in 1985 dollars, starting in 1988. These estimates represent only one accident, because it is not known how many aviation accidents would occur over the subject 10-year period, though probability of occurrence for one of them would be almost certain.

On balance, the FAA believes this regulatory actions is cost beneficial.

The Regulatory Evaluation that has been placed in the docket contains additional information related to the costs and benefits that are expected to accrue from the implementation of this proposed rule.

Under the criteria of the Regulatory Flexibility Act (RFA) of 1980, the FAA has determined that the proposed rule would not have a significant economic impact on a substantial number of small entities. The RFA applies only to U.S. entities. In the United States, there are only two manufacturers that specialize in the manufacture of commercial transport category airplanes: (1) The Boeing Company and (2) The McDonnell Douglas Corporation. In addition, there are a number of General Aviation (GA) manufacturers that manufacture commercial transport category airplanes such as business jets. Some of these GA manufacturers include: (1) Gates Learjet, (2) Cessna Aircraft, and (3) Gulfstream America.

The FAA size threshold for a determination of a small entity for U.S. airplane manufacturers is 75 employees. None of the transport category airplane manufacturers are considered small entities, and all U.S. manufacturers of such airplanes are believed to have more than 75 employees. Thus, no significant economic impact would be incurred by a substantial number of small entities.

The proposed rule is not expected to have an adverse impact on the trade opportunities of either U.S. manufacturers of transport category airplanes doing business abroad or foreign aircraft manufacturers doing business in the United States. Since the certification rules are applicable to both foreign and domestic manufacturers which sell in the United States, there would be no competitive trade advantage to either.

Conclusion

For the reasons given earlier in the preamble, the FAA has determined that this is not a major regulation as defined in Executive Order 12291. The FAA has determined that this action is not significant as defined in Department of Transportation Regulatory Policies and Procedures (44 FR 11034; February 26, 1979). In addition, it is certified under the criteria of the Regulatory Flexibility Act that this regulation, at promulgation, will not have a significant economic impact, positive or negative, on a substantial number of small entities.

List of Subjects in 14 CFR Part 25

Air transportion, Aircraft, Aviation safety, Safety.

The Proposed Amendment

Accordingly, the FAA proposes to amend Part 25 of the Federal Aviation Regulations (FAR) 14 CFR Part 25 as follows:

PART 25—AIRWORTHINESS STANDARDS: TRANSPORT CATEGORY AIRPLANES

1. The authority citation continues to read as follows:

Authority: 49 U.S.C. 1344, 1354(a), 1355, 1421, 1423, 1424, 1425, 1428, 1429, 1430; 49 U.S.C. 106(g) (Revised Pub. L. 97-449, January 12, 1983), 49 CFR 1.47(a).

2. By amending § 25.365, by revising the introductory text, by revising paragraphs (e) introductory text and (e)(2), and by adding a new paragraph (h) to read as follows:

§ 25.365 Pressurized cabin loads.

For each airplane with a pressurized cabin the following apply:

* * * * *

(e) Partitions, bulkheads, and floors in pressurized cabins must be designed to withstand the effects of a sudden release of pressure through an opening in any compartment at any approved operating altitude resulting from any of the following conditions acting simultaneously with 1g level flight loads. Under these loads, the structure must not fail and must not deform such as to interfere with safe flight and landing.

* * * * *

(2) Any opening in any compartment of the pressurized cabin up to the size H_0 in square feet. However, small compartments may be combined with an adjacent pressurized compartment and both considered as a single compartment for openings that cannot reasonably be expected to be confined within the small compartment. The size $H_0=PA_s$

where:

H_0 = maximum opening in square feet, need not exceed 20 square feet.

$$P=\frac{A_s}{6{,}240}+.024$$

A_s = maximum cross-sectional area of pressurized shell normal to the longitudinal axis, in square feet; and

* * * * *

(h) Any structure, internal or external to the pressurized cabin, the failure of which could interfere with continued safe flight and landing, must be designed to withstand any loads arising from the conditions specified in paragraph (e) of this section, acting simultaneously with the expected 1g level flight loads.

Issued in Seattle, Washington, on March 8, 1988.

Temple H. Johnson, Jr.,

Acting Director, Northwest Mountain Region.

LIST OF PUBLIC LAWS

Note: No public bills which have become law were received by the Office of the Federal Register for inclusion in today's **List of Public Laws.**

Last List March 11, 1988

Public Laws

are now available for the 100th Congress, 2nd Session, 1988

Pamphlet prints of public laws, often referred to as slip laws, are the initial publication of Federal laws upon enactment and are printed as soon as possible after approval by the President. Legislative history references appear on each law. Subscription service includes all public laws, issued irregularly upon enactment, for the 100th Congress, 2nd Session, 1988.

(Individual laws also may be purchased from the Superintendent of Documents, Washington, DC 20402-9328. Prices vary. See Reader Aids Section of the Federal Register for announcements of newly enacted laws and prices).

FEDERAL REGISTER Published daily, Monday through Friday, (not published on Saturdays, Sundays, or on official holidays), by the Office of the Federal Register, National Archives and Records Administration, Washington, DC 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.

The Federal Register provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive orders and Federal agency documents having general applicability and legal effect, documents required to be published by act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The Federal Register will be furnished by mail to subscribers for $340.00 per year, or $170.00 for 6 months in paper form, or $188.00 per year, or $94.00 for six months in microfiche form, payable in advance. The charge for individual copies is $1.50 for each issue, or $1.50 for each group of pages as actually bound. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402, or charge to your GPO Deposit Account or VISA or Mastercard.

There are no restrictions on the republication of material appearing in the **Federal Register.**

How To Cite This Publication: Use the volume number and the page number. Example: 52 FR 12345.

THE FEDERAL REGISTER
WHAT IT IS AND HOW TO USE IT

FOR: Any person who uses the Federal Register and Code of Federal Regulations.

WHO: The Office of the Federal Register.

WHAT: Free public briefings (approximately 3 hours) to present:

1. The regulatory process, with a focus on the Federal Register system and the public's role in the development of regulations.
2. The relationship between the Federal Register and Code of Federal Regulations.
3. The important elements of typical Federal Register documents.
4. An introduction to the finding aids of the FR/CFR system.

WHY: To provide the public with access to information necessary to research Federal agency regulations which directly affect them. There will be no discussion of specific agency regulations.

TAMPA, FL

WHEN: March 24; at 9:30 a.m.
WHERE: Auditorium
Tampa-Hillsborough County Public Library
900 North Ashley Drive, Tampa, FL.

Rules and Regulations

Federal Register
Vol. 53, No. 52
Thursday, March 17, 1988

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.
The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each week.

DEPARTMENT OF AGRICULTURE

Commodity Credit Corporation

7 CFR Part 1421

Standards for Approval of Warehouses for Grain, Rice, Dry Edible Beans, and Seed

AGENCY: Commodity Credit Corporation, USDA.

ACTION: Final rule.

SUMMARY: The purpose of this rule is to amend the regulations at 7 CFR 1421.5551 *et seq.* relating to the Commodity Credit Corporation (CCC) Standards for Approval of Warehouses for Grain, Rice, Dry Edible Beans, and Seed. The final rule will change provisions relating to when the President or Executive Vice President, CCC, may temporarily waive one or more of the standards of this subpart.

EFFECTIVE DATE: April 18, 1988.

FOR FURTHER INFORMATION CONTACT: Steven Closson, Chief, Storage Contract Branch, Warehouse Division, USDA, Room 5962-South Building, P.O. Box 2415, Washington, DC 20013, (202) 447-5647.

SUPPLEMENTARY INFORMATION: This final rule has been reviewed in conformity with Executive Order 12291 and Departmental Regulation 1512-1 and has been classified as "not major" since implementation of the provisions of this rule will not result in: (1) An annual effect on the economy of $100 million or more; (2) a major increase in costs or prices for consumers, individual industries, Federal, State, or local governments, or geographical regions; or (3) significant adverse effects on competition, employment, investment, productivity, innovation, the environment, or the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

This program is not subject to the provisions of Executive Order 12372 which require intergovernmental consultation with State and local officials. See the Notice related to 7 CFR Part 3015, Subpart V, published at 48 FR 28115 (June 24, 1983).

It has been determined that this rule will not increase the federal paperwork burden for individuals, small businesses, and other persons. CCC is also not required by 5 U.S.C. 553 or any other provision of law to publish a notice of proposed rulemaking with respect to the subject matter of this rule. Therefore, the Regulatory Flexibility Act is not applicable to this rule, and a Regulatory Flexibility Analysis was not prepared.

It has been determined by an environmental evaluation that this action will have no significant adverse impact on the quality of the human environment. Therefore, neither an Environmental Assessment nor an Environmental impact Statement is needed.

The CCC Charter Act (15 U.S.C. 714 *et seq.*) authorizes CCC to conduct various activities to stabilize, support, and protect farm income and prices. CCC is authorized to carry out such activities as asking price support available with respect to various agricultural commodities, removing and disposing of surplus agricultural commodities, exporting or aiding in the exportation of agricultural commodities, and procuring agricultural commodities for sale both in the domestic market and abroad.

Section 4(h) of the CCC Charter Act provides that CCC may not acquire real property in order to provide storage facilities for agricultural commodities, unless CCC determines that private facilities for the storage of such commodities are inadequate. Further, section 5 of the CCC Charter Act provides that, in carrying out the Corporation's purchasing and selling operations, and in the warehousing, transporting, processing, or handling of agricultural commodities, CCC is directed to use, to the maximum extent practicable, the usual and customary channels, facilities, and arrangements of trade and commerce.

Accordingly, CCC has published Standards for Approval of Warehouses for Grain, Rice, Dry Edible Beans, and Seed which must be met by warehousemen before CCC will enter into storage agreements with such warehousemen for the storage of grain and other commodities which are owned by CCC or which are serving as collateral for CCC price support loans.

Presently, program requirements permit producers to obtain price support loans on their grain only when it is stored in approved space on the farm or in commercial warehouses. In a small number of specific instances, some producers as well as commercial warehousemen, may not have sufficient storage space available to meet their needs. Some producers may be required to haul their grain a considerable distance to a CCC approved warehouse with space available in order to obtain a price support loan even though a commercial warehouse may be available within the community that is not CCC approved because it cannot meet all of these standards. The regulations at 7 CFR 1421.5557 now permit the CCC to exempt in writing, applicants in such an area from one or more of the standards of this subpart and may establish such other standards as are considered necessary to safeguard the interests of CCC.

However, warehousemen who are currently under contract with CCC are required to meet all of the terms and conditions of the regulations. The status of the warehouseman, particularly his ability to meet financial requirements of the standards, may have changed. This places the President or Executive Vice President, CCC, in the position of being unable to waive one or more of the standards even if the warehouse space is needed by CCC.

Accordingly, a notice of proposed rulemaking was published by the Department in the **Federal Register** on August 17, 1987, 52 FR 30689, requesting comments with respect to changes in the Standards for Approval of Warehouses for Grain, Rice, Dry Edible Beans, and Seed. The comment period was for 30 days and ended on September 16, 1987.

An amendment to the regulations at 7 CFR 1421.5557 was proposed which would permit the President or the Executive Vice President, CCC, to temporarily waive one or more of the standards for warehousemen who are currently under contract with CCC when it is determined that the warehouse services are needed in a local area.

VOL 53 ISS 52 MR 17 988 UMI

One comment was received from a national grain and feed association concerning the proposed rule. They opposed any rule which would pemit CCC to temporarily waive one or more of the standards for warehousemen who are currently approved under the Uniform Grain Storage Agreement (UGSA). Their main objection was that CCC may waive the financial requirements in the standards and thereby provide less security for grain depositors and an economic advantage to UGSA warehouses obtaining the exemption. In addition, they believed that CCC did not articulate adequately the extent to which the waiver authority would be used and did not demonstrate the need for the change.

The Standards of Approval are intended to protect the interest of CCC. Although some benefit may accrue to other depositors, that benefit is solely incidental to the primary purpose of the Standards; the protection of the interest of CCC. The regulations at 7 CFR 1421.5557 now permit the CCC to exempt, in writing, applicants for the UGSA from one or more of the standards when it is determined that the warehouse services are needed in the local area. During 1987, CCC has waived the standards for four warehousemen. In three of these cases, the warehousemen were required to furnish irrevocable Letters of Credit to meet their maximum net worth requirements. The three warehousemen were doing business with financial institutions that were not insured by the Federal Deposit Insurance Corporation (FDIC). The financial institutions furnished the warehousemen with an irrevocable Letter of Credit and the standard requiring all irrevocable Letters of Credit be issued by a bank that is insured by FDIC was waived temporarily until the warehousemen were able to obtain a Letter of Credit from a FDIC insured bank.

The fourth waiver granted this year involved a parent company's wholly-owned subsidiary that purchased a new warehouse. The waiver permitted the parent company to submit a financial statement, which included the financial position of the wholly-owned subsidiary and the new warehouse, to meet CCC financial requirements for the new warehouse. However, before the waiver was granted, the parent company had to execute a Guarantee Agreement which required the parent company to promptly pay any monies which become due and owing to CCC from the new warehouse.

As evidenced by the four waivers granted this year, the CCC exercises prudent control over the waiver authority. In each of the cases cited, CCC was not at a greater financial risk because it granted the waivers nor did any of the warehouses involved have an economic advantage over their competitors. The CCC cannot predict the frequency or the specific reason the waiver authority will be used in the future. However, the CCC intends to use the waiver authority only when: (1) It is in the best interest of CCC; (2) there is no greater financial risk to CCC, and (3) the warehouse will meet all standards within a short period of time.

Accordingly, it has been determined that the provisions of the proposed rule should be adopted without change as a final rule.

List of Subjects in 7 CFR Part 1421

Grain, Loan programs, Agriculture, Oilseeds, Peanuts, Price support programs, Soybeans, Surety bonds, Tobacco, Warehouses.

Final Rule

Accordingly, the regulations at 7 CFR part 1421 are amended as follows:

PART 1421—[AMENDED]

1. The authority citation for 7 CFR Part 1421, *Subpart—Standards for Approval of Warehouses for Grain, Rice, Dry Edible Beans, and Seed* continues to read as follows:

Authority: Secs. 4 and 5 of the Commodity Credit Corporation Charter Act, as amended, 1072 (15 U.S.C. 714 b and c); secs. 101, 201, 301, 401, 403, and 405 of the Agricultural Act of 1949, as amended, 63 Stat. 1051, as amended, 1052, as amended, 1053, as amended, 1054, as amended (7 U.S.C. 1441, 1446, 1447, 1421, 1423, and 1425); secs. 101A, 105C, and 107D of Pub. L. 99-198, unless otherwise noted.

2. Section 1421.5557 is revised to read as follows:

§ 1421.5557 Exemption from requirements.

If warehousing services in any area cannot be secured under the provisions of the subpart and no reasonable and economic alternative is available for securing such services for commodities under CCC programs, the President or Executive Vice President, CCC, may temporarily exempt, in writing, applicants for storage agreements and warehousemen who are currently under contract with CCC in such area from one or more of the standards of this subpart and may establish such other standards as are considered necessary to satisfactorily safeguard the interests of CCC.

Signed at Washington, DC on March 11, 1988.

Milton Hertz,

Executive Vice President, Commodity Credit Corporation.

[FR Doc. 88-5833 Filed 3-16-88; 8:45 am]

BILLING CODE 3410-05-M

DEPARTMENT OF THE TREASURY

Customs Service

19 CFR Part 101

[T.D. 88-14]

Change in the Customs Service Field Organization—Port Manatee, FL

AGENCY: Customs Service, Treasury.

ACTION: Final rule.

SUMMARY: This document amends the Customs Regulations to establish a new Customs port of entry to be known as Port Manatee in the Tampa, Florida, Customs District of the Southeast Region. The change is part of a Customs continuing program to obtain more efficient use of its personnel, facilities, and resources, and to provide better service to carriers, importers, and the public.

EFFECTIVE DATE: April 18, 1988.

FOR FURTHER INFORMATION CONTACT: Bernie Harris, Office of Inspection and Control (202-566-9425).

SUPPLEMENTARY INFORMATION: As part of Customs continuing program to obtain more efficient use of its personnel, facilities and resources, and to provide better service to carriers, importers, and the public, Customs published a notice in the **Federal Register** on August 25, 1987 (52 FR 32025) proposing to amend § 101.3, Customs Regulations (19 CFR 101.3), to change the Customs field organization by establishing a new Customs port of entry at Port Manatee, Florida, within the Tampa, Florida, Customs District, Southeast Region.

Discussion of Comments

Three comments were received in response to the **Federal Register** notice. Two comments strongly supported the proposal. A third comment expressed some concern about a possible reduction of Customs service presently provided at Tampa which may be caused by the creation of a new port of entry. Since we already service Port Manatee out of our Tampa location, the assignment of a Customs officer thereto would not affect our current ability to service Tampa. Therefore, after further review of the matter, Customs has determined that it is in the public

interest to establish a Customs port of entry at Port Manatee, Florida.

Geographical Description

The geographical limits of Port Manatee, Florida, will be that portion of Manatee County bounded on the north by the Manatee-Hillsborough County line, on the east by U.S. Interstate Highway I-75, on the south by State Highway 64, but excluding the western offshore island communities of Anna Maria, Bradenton Beach, Holmes Beach, and Longboat Key.

Regulatory Flexibility Act

The provisions of the Regulatory Flexibility Act relating to an initial and final regulatory flexibility analysis (5 U.S.C. 603, 604) are not applicable to this document. Customs routinely establishes, expands, and consolidates Customs ports of entry throughout the U.S. to accommodate the volume of Customs-related activity in various parts of the country. Although this change may have a limited effect upon small entities in the Tampa, Florida, area, it is not expected to have a significant economic impact upon a substantial number of small entities to the extent contemplated by the Regulatory Flexibility Act. Accordingly, it is certified under the provisions of section 3 of the Regulatory Flexibility Act (5 U.S.C. 605(b)) that the amendment will not have a significant economic impact on a substantial number of small entities.

Executive Order 12291

Because the amendment relates to the Customs field organization, and will not result in a "major rule" as defined in E.O. 12291, a regulatory impact analysis is not required.

Drafting Information

The principal author of this document was Arnold L. Sarasky, Regulations and Disclosure Law Branch, Office of Regulations and Rulings, U.S. Customs Service. However, personnel from other offices participated in its development.

Authority

This change is made under the authority vested in the President by section 1 of the Act of August 1, 1914, 38 Stat. 623, as amended (19 U.S.C. 2), and delegated to the Secretary of the Treasury by E.O. 10289, September 17, 1951 (3 CFR Parts 1949-1953 Comp., Ch. II), and pursuant to the authority provided by Treasury Department Order No 1010-5 (47 FR 2449).

List of Subjects in 19 CFR Part 101

Customs duties and inspection, Exports, Imports, Organization and functions (Government agencies).

Amendments to the Regulations

PART 101—GENERAL PROVISIONS

1. The authority citation for Part 101, Customs Regulations (19 CFR Part 101), continues to read as follows:

Authority: 5 U.S.C. 301, 19 U.S.C. 1, 66, 1202 (Gen. Hdnote. 11), 1624, Reorganization Plan 1 of 1965: 3 CFR 1965 Supp.

§ 101.3 [Amended]

2. To reflect this change, the list of Customs regions, districts, and ports of entry in § 101.3(b), Customs Regulations (19 CFR 101.3(b)), is amended by inserting in appropriate alphabetical order, "Port Manatee, including the territory described in T.D. 88-14" in the column headed "Ports of entry" in the Tampa, Florida, Customs District of the Southeast Region.

Wm. Rosenblatt,

Acting Commissioner of Customs.

Approved: March 1, 1988.

Francis A. Keating II,

Assistant Secretary of the Treasury.

[FR Doc. 88-5883 Filed 3-16-88; 8:45 am]

BILLING CODE 4820-02-M

Internal Revenue Service

26 CFR Part 1

[T.D. 8188]

Income Tax; Consolidated Return Regulations; Adjustment on Disposition of Stock of Subsidiary

AGENCY: Internal Revenue Service, Treasury.

ACTION: Temporary regulations.

SUMMARY: This document contains temporary regulations that add new § 1.1502-32T to the consolidated return regulations. The temporary regulations supplement the adjustment under § 1.1502-32(g) on the disposition by a member of stock of a subsidiary. The text of the temporary regulations set forth in this document also serves as the text of the proposed regulations cross-referenced in the notice of proposed rulemaking in the proposed rules section of this issue of the **Federal Register**.

EFFECTIVE DATE: These regulations are effective for stock of a subsidiary that ceases to be a member of an affiliated group filing a consolidated return during a taxable year of the group ending after November 30, 1987. A member may elect to apply the new rules to stock not otherwise covered by such rules if the stock is disposed of in a taxable year ending after November 30, 1987.

FOR FURTHER INFORMATION CONTACT: Judith C. Winkler of the Legislation and Regulations Division, Office of Chief Counsel, Internal Revenue Service, 1111 Constitution Avenue NW., Washington, DC 20224, Attention: CC:LR:T (Telephone 202-566-3458, not a toll-free number).

SUPPLEMENTARY INFORMATION:

Background

This document adds temporary regulations § 1.1502-32T to Part 1 of Title 26 of the Code of Federal Regulations. The temporary regulations added by this document will remain in effect until superseded by later temporary or final regulations relating to these matters.

General Description

Section 1.1502-32(g) of the consolidated return regulations provides that when a subsidiary in a group filing a consolidated return leaves the group, members of the group owning stock in the subsidiary must reduce the basis of such stock by the excess of the net positive adjustments for all consolidated return years over the net negative adjustments for all consolidated return years. The reduction is made on the first day of the subsidiary's first separate return year, and it applies only to stock retained by members. Section 1.1502-32(g) also applies if a member that owns stock in a subsidiary leaves the group. The purpose of the reduction is to prevent artificial losses when the stock retained by the member is subsequently sold.

Members of a group filing a consolidated return are subject to the investment adjustment rules of § 1.1502-32. These investment adjustment rules require that the basis of the stock of subsidiary members be increased to reflect undistributed earnings and profits and decreased upon the distribution of these earnings and profits. The effect of the investment adjustment rules is to ensure that the income and loss of members of a consolidated group are taken into account only once in computing the taxable income of the group. Without § 1.1502-32(g), during a separate return year a subsidiary could distribute consolidated earnings and profits without the members making a corresponding reduction in the basis of their retained stock. Thus in separate return years, members would retain the high basis in the subsidiary's stock that they obtained through positive investment adjustments for earnings and profits during the consolidated years. Absent the § 1.1502–32(g) reduction in basis, a separate return year distribution of the subsidiary's consolidated earnings and profits would set the stage for an artificial loss on the sale of the subsidiary's stock.

For example, assume that in 1986, corporation P forms subsidiary S with $100 capital. In 1986 and 1987, P and S file consolidated returns and S has earnings and profits of $200. On the last day of 1987, P's basis in the stock of S is $300 (due to the investment adjustment rules of § 1.1502–32). On December 31, 1987, P sells one-half of its S stock to corporation X, a nonmember, for $150. P has no gain on this sale ($150 amount realized less $150 basis in one-half S stock). On January 1, 1988, P's basis in its remaining S stock is reduced by $100 under the provisions of § 1.1502–32(g) (the portion of the $200 positive investment adjustment resulting from S's earnings that is attributable to P's remaining 50 percent stock ownership in S).

Absent § 1.1502–32(g), S could create an artificial loss by distributing its $200 earnings and profits ($100 to P and $100 to X) on January 1, 1988. P would not be required to make a negative adjustment to its basis in its remaining S stock to reflect this distribution, since S would no longer be a member of the P group and therefore would not be subject to the investment adjustment rules of § 1.1502.32. P's basis in the S stock it retained would remain $150, even though the value of the S stock held by P would be $50 following the distribution. Therefore, P could sell its remaining S stock for $50 and recognize a $100 loss on the sale.

Section 1.1502–32(g) prevents a distribution of consolidated earnings and profits by a subsidiary after disaffiliation from creating the potential for a subsequent artificial loss on the sale of the subsidiary's stock, by requiring a reduction in the basis of the stock at the time of disaffiliation. However, the reduction that § 1.1502–32(g) requires may cause harsh results in certain situations because the basis adjustment occurs at the time of disaffiliation, whether or not dividend stripping subsequently occurs.

To avoid the effect of § 1.1502–32(g), consolidated groups have utilized the deemed dividend provisions of § 1.1502–32(f)(2). Under § 1.1502–32(f)(2), a group may capitalize the earnings and profits of a subsidiary by treating the earnings and profits as distributed to the parent and immediately contributed by the parent to the capital of the subsidiary. After a deemed dividend, there generally is no net positive adjustment remaining in the stock of the subsidiary. Instead, the basis of the subsidiary's stock has been increased by the deemed capital contribution. There is no need to apply § 1.1502–32(g), since there are no longer any earnings and profits in the subsidiary.

The deemed dividend, however, is available only to groups that own 100 percent of the subsidiary's stock on each day of its taxable year. Also, since a deemed dividend applies to the subsidiary's earnings and profits account as of the last day of the prior taxable year, it cannot be used to capitalize earnings and profits accumulated in the final consolidated return year. Groups that own subsidiaries with minority shareholders have used the consent dividend provisions of section 565 as a substitute for the deemed dividend provisions. Groups also have used the consent dividend to capitalize the earnings and profits of the subsidiary for its final consolidated return year. T.D. 8166, published December 15, 1987, restricts the use of consent dividends under section 565 to corporations that are subject to the accumulated earnings tax, personal holding companies, foreign personal holding companies, regulated investment companies, and real estate investment trusts. Because of the restrictions placed upon the use of consent dividends by T.D. 8166, most groups do not qualify to use consent dividends.

Explanation of Provision

The temporary regulations do not change the amount of the adjustment, and they continue to treat the portion of the adjustment in excess of the basis of the adjusted stock as immediately includible in income as income described in § 1.1502–19(a). The temporary regulations, however, do not immediately reduce basis when a subsidiary (or a member that owns the subsidiary's stock) leaves the group. Instead, the basis reduction is deferred, generally until the subsidiary makes a distribution that would have caused a reduction in the basis of its stock had affiliation continued to exist.

The deferral of the basis reduction is accomplished through the establishment of a basis reduction account that applies to the stock of the subsidiary retained by the member. The basis reduction account also applies to any stock acquired by the member in exchange for the disaffiliated subsidiary's stock if the acquired stock has a substituted basis in the hands of the member. In addition, it continues to apply if the stock is transferred to another member. However, if the stock is transferred to a nonmember corporation that is related to the transferror corporation within the meaning of section 304, the basis of the stock is reduced, immediately before the transfer, by the amount of the basis reduction account, and the basis reduction account is eliminated. A special rule provides for the elimination of a basis reduction account when a nonmember whose stock is subject to the basis reduction account becomes a member.

An anti-duplication rule is provided to deal with cases where a distribution of earnings and profits would result in reductions in basis under both the temporary regulations and other provisions of the Code and regulations.

The regulations also provide that members owning stock of a subsidiary that ceased to be a member of the group in a taxable year ending on or before November 30, 1987, may elect to apply the new rules to stock disposed of in a taxable year of the group ending after November 30, 1987. Taxpayers that make this election must certify that they have the information necessary to determine these adjustments.

Special Analyses

A general notice of proposed rulemaking is not required by 5 U.S.C. 553 for temporary regulations. Accordingly, the temporary regulations do not constitute regulations subject to the Regulatory Flexibility Act (5 U.S.C. Chapter 6). The Commissioner of Internal Revenue has determined that this temporary rule is not a major rule as defined in Executive Order 12291 and that a regulatory impact analysis therefore is not required. The collection of information requirements contained in these regulations have been submitted to the Office of Management and Budget in accordance with the requirements of the Paperwork Reduction Act of 1980. These requirements have been approved by OMB (Control number 1545–1046).

Drafting Information

The principal author of the temporary regulations is Judith C. Winkler of the Legislation and Regulations Division of the Office of Chief Counsel, Internal Revenue Service. However, other personnel of the Internal Revenue Service and Treasury Department participated in developing the regulations, on matters of both substance and style.

Income taxes, Controlled group of corporations, Consolidated returns.

Adoption of Amendments to the Regulations

Accordingly, 26 CFR Part 1 is amended as follows:

PART 1—INCOME TAX: TAXABLE YEARS BEGINNING AFTER DECEMBER 31, 1953

Paragraph 1. The authority citation for Part 1 is amended by adding the following citations:

Authority: 26 U.S.C. 7805. * * * § 1.502–32T also issued under 26 U.S.C. 1502.

Par. 2. Section 1.1502–32 is amended by adding paragraph (g)(4) to read as follows:

§ 1.1502–32 [Amended]

* * * * *

(g) * * *

(4) For dispositions of stock in taxable years ending after November 30, 1987 see § 1.1502–32T.

Par. 3. There is added immediately after § 1.1502–32 a new § 1.1502–32T to read as follows:

§ 1.1502–32T Investment adjustments (temporary).

(a) *Adjustment on disposition*—(1) *Amount of adjustment.* A member owning stock in a subsidiary shall determine the net basis increase in each share of such stock that the member owns on the first day of the first separate return year of the member or of the subsidiary, whichever occurs first. The net basis increase is the excess with respect to such share of—

(i) The net positive adjustment under § 1.1502–32(e)(2) for all consolidated return years, over

(ii) The net negative adjustments under § 1.1502–32(e)(1), plus any decreases under § 1.1502–32(f) (1)(i), for all consolidated return years.

(2) *Amount taxable.* If the net basis increase with respect to a share exceeds the basis of the share, the amount of the excess shall, as of the day immediately preceding such first day, be included in the income of the member as income described in § 1.1502–19(a).

(3) *Basis reduction on distribution*—(i) *General rule.* The amount of the net basis increase not included in income under paragraph (a)(2) is treated as a "basis reduction account." If subsequently there is a dividend distribution with respect to the share, the basis of the share is reduced under this section by the amount of the distribution, but only to the extent of the basis reduction account for that share. The basis reduction account is decreased by distributions to which the preceding sentence applies.

(ii) *Anti-duplication rule; earnings and profits adjustments.* Adjustments under paragraph (a)(3)(i) of this section to the basis of a share for distributions shall not duplicate adjustments otherwise applicable to the same distributions, such as adjustments under § 1.1502–32(b)(2)(iii) with respect to the consolidated return of another group. If the preceding sentence applies because of a reduction under § 1.1502–32, the basis reduction account is decreased, except to the extent a distribution is attributable to earnings and profits earned after the establishment of the basis reduction account. Appropriate adjustments shall also be made with respect to the earnings and profits of each member.

(4) *Special rules*—(i) *Nonmember becomes a member.* If a nonmember whose stock is subject to a basis reduction account becomes a member of the group with respect to which the net basis increase under paragraph (a)(1) of this section was determined, the basis reduction account for the stock is eliminated.

(ii) *Disposition of stock subject to a basis reduction account*—(A) *In general.* Except as provided in paragraph (a)(4)(ii) (B) and (C) of this section, if stock subject to a basis reduction account is disposed of by a member, the basis reduction account is eliminated.

(B) *Exchanges in substituted basis transactions.* If a member exchanges stock subject to a basis reduction account for stock of another corporation, and the member's basis in the stock received in the exchange is determined in whole or in part by reference to the member's basis in the stock exchanged, the stock received becomes subject to the basis reduction account, and the rules of this section apply to the stock received as if it were the stock exchanged. For purposes of the preceding sentence, a reorganization described in section 368(a)(1)(F) shall be considered to result in an exchange.

(C) *Transfers to members.* Stock that is subject to a basis reduction account in the hands of a transferor member will continue to be subject to the basis reduction account in the hands of a transferee member.

(D) *Reduction of basis in certain transactions.* If stock that is subject to a basis reduction account is transferred to a nonmember, and the nonmember is controlled by the transeferor within the meaning of section 304(c), the basis of the stock is reduced, immediately before the transfer, by the amount of the basis reduction account at that time and the basis reduction account is eliminated.

(iii) *Exchange of member stock for nonmember stock creating a basis reduction account.* If a member exchanges stock of a member subsidiary for stock of a nonmember, and the member's basis in the stock received in the exchange is determined in whole or in part by reference to the member's basis in the stock exchanged, then the stock of the nonmember shall be treated as becoming subject to this section as a result of the exchange, as if the member subsidiary had become a nonmember immediately before the exchange.

(5) *Example.* The following example illustrates the application of paragraph (a) of this section.

Example: (i) Corporation P forms corporation S with a capital contribution of $100. P and S file a consolidated return for 1987. S has $100 of earnings and profits for 1987, which increases P's basis in the S stock by $100. On January 1, 1988, X, the common parent of an unrelated group, buys all the stock of P, and P and S are included in the consolidated return of the X group for 1988. During 1988, S has earnings and profits of zero, and it distributes $10 to P. On January 1, 1989, P sells all of the stock of S to an unrelated purchaser.

(ii) Under paragraph (a)(1) of this section, P must determine its net basis increase in the stock of S as of the first day of P's or S's first separate return year. Under § 1.1502–1(e), consolidated return years of the X group are separate return years of the P group, and the computation is therefore made as of January 1, 1988. The net basis increase is $100. Since this amount is less than $200, the basis of the stock, no amount is taxable under paragraph (a)(2) of this section. The basis of the S stock is not reduced under this section on January 1, 1988, but a basis reduction account is established under paragraph (a)(3)(i) of this section in the amount of $100.

(iii) The $10 distribution by S is a distribution to which this section applies, since (from the standpoint of the former P group) it is a dividend distribution to a member with respect to stock of a subsidiary for which there is a basis reduction account. However, the distribution also results in a basis reduction in the stock of S under § 1.1502–32(b)(2)(iii)(c), since (from the standpoint of the X group) it is a distribution of earnings and profits accumulated in separate return years of S. Under paragraph (a)(3)(ii) of this section, the reduction under paragraph (a)(3)(i) is not made, and since the distribution is not attributable to earnings and profits earned after the basis reduction account was established, the basis reduction account is decreased from $100 to $90.

(iv) P's basis for determining gain or loss on the sale of the S stock is $190. The remaining $90 basis reduction account in the stock is eliminated under paragraph (a)(4)(ii)(A) of this section as a result of P's sale of the stock.

MI

(b) *Effective date*—(1) *General rule.* Paragraph (a) of this section applies, and § 1.1502–32(g) does not apply, to stock of a subsidiary that ceases to be a member of a group during a taxable year of the group ending after November 30, 1987.

(2) *Election to apply paragraph (a).* A member owning shares of stock of a subsidiary to which paragraph (a) of this section does not apply, may elect to have paragraph (a) and not § 1.1502–32(g) apply to shares disposed of in a taxable year of the group ending after November 30, 1987. The election shall contain a certification that the member has the information necessary to determine the adjustments required by paragraph (a) of this section. The election is made by attaching a statement to the return of the member for the taxable year in which the stock is disposed of. To the extent that the basis of stock is increased pursuant to an election under this paragraph (b)(2), appropriate adjustments shall be made to the earnings and profits of each member for the taxable year in which the election is made and subsequent years to reflect such increase in basis and, as appropriate, adjustments later made to the basis reduction account.

The provisions contained in this Treasury Decision are needed to immediately amend the consolidated return regulations in response to the restrictions placed upon the use of consent dividends by temporary regulations under section 565. It is therefore found impracticable and contrary to the public interest to issue this Treasury Decision with notice and public procedure under subsection (b) of section 553 of Title 5 of the United States Code or subject to the effective date limitation of subsection (d) of that section.

Lawrence B. Gibbs,

Commissioner of Internal Revenue.

Approved: March 14, 1988.

O. Donaldson Chapoton,

Assistant Secretary of the Treasury.

BILLING CODE 4830-01-M

DEPARTMENT OF LABOR

Office of Labor-Management Standards

29 CFR Part 452

Candidacy Age Requirements in Union Officer Elections

AGENCY: Office of Labor-Management Standards, Labor.

ACTION: Final rule.

SUMMARY: This document amends the Department of Labor's interpretative regulations concerning restrictions on candidacy for union office which are based on personal characteristics. The amendment provides that a union's general maximum age restriction on candidacy would be unreasonable. The amendments are made, in part, because of recent amendments to the Age Discrimination in Employment Act of 1967.

EFFECTIVE DATE: March 17, 1988.

FOR FURTHER INFORMATION CONTACT: Kay Oshel, Chief, Division of Interpretations and Standards, Office of Labor-Management Standards, Department of Labor, Washington, DC 20210; telephone 202-523-7373 (this is not a toll free number).

SUPPLEMENTARY INFORMATION: The Department of Labor's interpretative regulations on union officer elections under the Labor-Management Reporting and Disclosure Act of 1959, as amended (LMRDA), are set forth at 29 CFR Part 452. Those regulations provide at § 452.46 that a labor organization may establish certain restrictions on the right to be a candidate based on personal characteristics which have a direct bearing on fitness for office and which are not inconsistent with any Federal law. Section 452.46 presently indicates that a compulsory retirement age for officers, consistent with Federal law, would be an acceptable basis on which to restrict candidacy in LMRDA officer elections. Amendment is needed to reflect a recent revision of the Age Discrimination in Employment Act of 1967, as amended (ADEA), which prohibits a labor union's general compulsory retirement of individuals.

The ADEA provides at 29 U.S.C 623(c) that it is unlawful for a union to "limit, segregate, or classify its membership * * * in any way which would deprive or tend to deprive any individual of employment opportunities, or would limit such employment opportunities * * * because of such individual's age." Candidacy for union office has been regarded as an employment opportunity within the meaning of the ADEA.

As originally enacted, the ADEA protections against age discrimination extended only to individuals between 40 and 65 years of age. It was amended in 1978 to extend those protections to individuals up to 70 years old. Public Law 99–592 has most recently amended the ADEA to remove the maximum age limit on its coverage. Effective January 1, 1987, the ADEA prohibits a labor organization's general compulsory retirement of individuals over forty years of age. A labor organization rule establishing a general compulsory retirement age for officers or a comparable age restriction on candidacy would, therefore, be inconsistent with the ADEA. Accordingly, such a rule would be an unreasonable restriction on candidacy in LMRDA elections.

Publication in Final

The undersigned has determined that this amendment of the regulations need not be published as a proposed rule as generally required by the Administrative Procedure Act (APA), 5 U.S.C. 553, since this rulemaking merely sets forth interpretative rules and general statements of policy. It is, thus, exempt under section 553(b)(A) of the APA.

Effective Date

Furthermore, the undersigned has determined that good cause exists for waiving the customary requirement for delay in the effective date of a final rule for 30 days following its publication since this rule is interpretative and a statement of policy. Therefore, these amendments shall be effective upon publication. See 5 U.S.C. 553(d)(2).

Classification—Executive Order 12291

This rule does not constitute a "major rule" as that term is defined in section 1(b) of Executive Order 12291 on Federal Regulation issued on February 17, 1981. Analysis of the rule indicates that it will not result in: (1) an annual effect on the economy of $100 million or more; (2) a major increase in costs or prices for consumers, individual industries, Federal, State, or local government agencies, or geographic regions; or (3) significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

Regulatory Flexibility Act

Because no notice of proposed rulemaking is required for this rule under 5 U.S.C. 553(b), the requirements of the Regulatory Flexibility Act, Pub. L. 96–354, 94 Stat. 1165, 5 U.S.C. 601 *et seq.*, pertaining to the regulatory flexibility analysis do not apply. See 5 U.S.C. 601(2).

Paperwork Reduction Act

This final rule is not subject to section 3504(h) of the Paperwork Reduction Act, since it does not contain any new collection of information requirement.

List of Subjects in 29 CFR Part 452

Labor unions.

Adoption of Amendments of Regulations

Accordingly, 29 CFR Part 452 is amended as set forth below.

PART 452—[AMENDED]

1. The authority citation for Part 452 continues to read as follows:

Authority: Secs. 401, 402, 73 Stat. 532, 534; 29 U.S.C. 481, 482; Secretary's Order No. 3–84 (49 FR 20578).

2. Section 452.46 is revised to read as follows:

§ 452.46 Characteristics of candidate.

A labor organization may establish certain restrictions on the right to be a candidate on the basis of personal characteristics which have a direct bearing on fitness for union office. A union may, for example, require a minimum age for candidacy. However, a union may not establish such rules if they would be inconsistent with any other Federal law. Thus, it ordinarily may not limit eligibility for office to persons of a particular race, color, religion, sex, or national origin since this would be inconsistent with the Civil Rights Act of 1964. Nor may it establish a general compulsory retirement age or comparable age restriction on candidacy since this would be inconsistent with the Age Discrimination in Employment Act of 1967, as amended. A union may not require candidates for office to be registered voters and to have voted in public elections during the year preceding their nominations. Nor may it require that candidates have voted in the previous union election to be eligible. Such restrictions may not be said to be relevant to the members' fitness for office.

Signed at Washington, DC, this 14th day of March, 1988.

Salvatore R. Martoche,

Assistant Secretary for Labor-Management Standards.

BILLING CODE 4510-86-M

DEPARTMENT OF TRANSPORTATION

Coast Guard

33 CFR Part 117

[CGD5-88-003]

Drawbridge Operation Regulations; Atlantic Intracoastal Waterway, NC

AGENCY: Coast Guard, DOT.

ACTION: Final rule.

SUMMARY: At the request of the U.S. Army Corps of Engineers, Wilmington, North Carolina, the Coast Guard is changing the regulations governing the drawbridges across the Atlantic Intracoastal Waterway at mile 113.8 in Fairfield, at mile 157.2 in Hobucken, and at mile 195.8 in Beaufort, North Carolina, by restricting the number of bridge openings during the boating season. This action will accommodate the needs of vehicular traffic and reduce wear and tear on the machinery of these 50-year-old bridges, while still providing for the reasonable needs of navigation. This rule also consolidates all of the drawbridge regulations for the North Carolina segment of the Atlantic Intracoastal Waterway in one section.

EFFECTIVE DATE: These regulations become effective on April 18, 1988.

FOR FURTHER INFORMATION CONTACT: Ann B. Deaton, Bridge Administrator, at (804) 398-6222.

SUPPLEMENTARY INFORMATION: On September 8, 1987, the Coast Guard published a notice of proposed rule making in the **Federal Register** (52 FR 33836) concerning the bridges at Fairfield and Hobucken, North Carolina. The Commander, Fifth Coast Guard District also published the proposal as a Public Notice dated November 9, 1987. In the notice of proposed rulemaking, interested persons were given until October 26, 1987, to submit comments. In the public notice, interested persons were given until December 18, 1987, to submit comments.

On June 22, 1987, the Coast Guard published an interim rule with a request for comments in the **Federal Register** (52 FR 23441) concerning the Core Creek bridge at Beaufort, North Carolina. Interested persons were given until August 28, 1987, to submit comments. A public notice was not issued.

Drafting Information

The drafters of these regulations are Linda L. Gilliam, Project Officer, and CDR Robert J. Reining, Project Attorney.

Discussion of Comments

The U.S. Army Corps of Engineers has requested that the drawbridges at Fairfield and Hobucken, North Carolina, only be required to open on the hour and half hour, daily between 7:00 a.m. and 7:00 p.m., from April 1 through November 30, and that the Core Creek Bridge at Beaufort, North Carolina, only be required to open on the hour and half hour between 6:00 a.m. and 7:00 p.m., from April 1 through November 30. Both measures were intended to help alleviate highway congestion, but also to reduce wear and tear on these 50-year-old bridges, which are scheduled to be replaced by fixed bridges. Because of the difficulties the Corps of Engineers was having maintaining the Core Creek bridge at Beaufort, an interim rule with a request for comments was issued.

Three comments were received as a result of the public notice relating to the bridges at Fairfield and Hobucken. The Major of the City of Elizabeth City in a letter dated December 14, 1987, offered no objections to the change in the regulations, but expressed a concern for the lack of mooring facilities for vessels awaiting bridge openings. A letter from the Committee of 100 in Elizabeth City expressed the same views as the Mayor of the City of Elizabeth City and offered no objection to the change in the regulations. Since mooring facilities for vessels falls within the jurisdiction of the U.S. Army Corps of Engineers, the above mentioned letters have been forwarded to the U.S. Army Corps of Engineers in Wilmington, North Carolina, for consideration. The U.S. Fish and Wildlife Service in Raleigh, North Carolina, responded to the public notice offering no objection to the change in the regulations.

It is the Coast Guard's position that the lack of mooring facilities does not constitute a safety hazard for vessels waiting for a bridge opening. While the construction of such facilities would provide a convenience to the boaters, they are not necessary.

No comments were received in response to the interim rule for the Core Creek bridge.

Since the proposed amendments relating to the bridges at Fairfield and Hobucken and the interim rule for the Core Creek bridge will relieve highway congestion during the summer seasons, reduce the wear and tear on the bridge machinery, and will still provide for the reasonable needs of navigation, they are being adopted.

In addition, this rule consolidates all of the regulations governing drawbridges over the Atlantic Intracoastal Waterway in North Carolina into one section.

Since the regulations governing the S58 drawbridge across the Atlantic Intracoastal Waterway, mile 206.7, at Atlantic Beach, North Carolina, were revoked on December 8, 1987, paragraph (b)(4) of the proposal has been deleted and the remaining subparagraphs renumbered. (See the December 29, 1987, **Federal Register** [52 FR 49010] for the rule revoking those regulations.)

This rule also incorporates the final rule for the drawbridge across the Atlantic Intracoastal Waterway, mile

VOL
53
ISS
52
MR
17
988
UMI

283.1, at Wrightsville Beach, North Carolina, which was published in the Federal Register on December 21, 1987 (52 FR 48283). That rule went into effect on January 20, 1988. As a result, paragraph (b)(6) of the proposed rule (renumbered as paragraph (b)(5)) has been amended to conform with that amendment.

Economic Assessment and Certification

These regulations are considered to be non-major under Executive Order 12291 on Federal Regulation and nonsignificant under Department of Transportation regulatory policies and procedures (44 FR 11034; February 26, 1979).

The economic impact of the proposal has been found to be so minimal that a full regulatory evaluation is unnecessary. This conclusion is based on the fact that the regulation will have no effect on commercial navigation or on any industries that depend on waterborne transportation. Since the economic impact of these regulations is expected to be minimal, the Coast Guard certifies that they will not have a significant impact on a substantial number of small entities.

List of Subjects in 33 CFR Part 117

Bridges.

Regulations

In consideration of the foregoing, Part 117 of Title 33, Code of Federal Regulations, is amended as follows:

PART 117—DRAWBRIDGE OPERATION REGULATIONS

1. The authority citation for Part 117 continues to read as follows:

Authority: 33 U.S.C. 499; 49 CFR 1.46; 33 CFR 1.05(g).

2. Section 117.821 is revised to read as follows:

§ 117.821 Atlantic Intracoastal Waterway, Albemarle Sound to Wrightsville Beach, North Carolina.

(a) The drawbridges over the Atlantic Intracoastal Waterway in North Carolina shall open on signal for public vessels of the United States, state and local government vessels, commercial vessels, and any vessel in an emergency involving danger to life or property.

(b) The drawbridges over the Atlantic Intracoastal Waterway in North Carolina shall open on signal for pleasure vessels, except that the following drawbridges may remain closed to pleasure vessels if they open on signal for waiting pleasure vessels at the times and during the periods specified below:

(1) S.H. 94 bridge, mile 113.7, at Fairfield, NC, from April 1 to November 30, between 7:00 a.m. and 7:00 p.m., must open if signaled on the hour and half hour.

(2) S.R. 304 bridge, mile 157.2, at Hobucken, NC, from April 1 to November 30, between 7:00 a.m. and 7:00 p.m., must open if signaled on the hour and half hour.

(3) S.R. 101 bridge, mile 195.8, at Beaufort (Core Creek), NC, from April 1 to November 30, between 6:00 a.m. and 7:00 p.m., must open if signaled on the hour and half hour.

(4) S.R. 50 bridge, mile 260.7, at Surf City, NC, from May 1 to October 31, between 7:00 a.m. and 7:00 p.m., must open if signaled on the hour.

(5) S.R. 74 bridge, mile 283.1, at Wrightsville Beach, NC, between 7:00 a.m. and 7:00 p.m., must open if signaled on the hour.

(c) If a pleasure vessel is approaching a drawbridge, which is only required to open on the hour or on the hour and half hour, and cannot reach the draw on the hour or half hour, the drawtender may delay the required opening up to 10 minutes past the hour or half hour.

Dated: March 8, 1988.

A. D. Breed,

Rear Admiral, U.S. Coast Guard; Commander, Fifth Coast Guard District.

BILLING CODE 4910-14-M

DEPARTMENT OF THE INTERIOR

Office of Hearings and Appeals

43 CFR Part 4

Special Rules Applicable to Surface Coal Mining Hearings and Appeals

AGENCY: Office of Hearings and Appeals, Interior.

ACTION: Final rule.

SUMMARY: The Office of Hearings and Appeals promulgates final regulations to provide procedures for administrative review of the proposed assessment of individual civil penalties against a director, officer, or agent of a corporation under the Surface Mining Control and Reclamation Act of 1977. These rules are necessary to inform parties of who may petition for review of a proposed assessment, when and where the petition must be filed, what the contents of a petition must be, what must be proved at a hearing and who bears the burden of proof, and who may petition for a review of a decision by an administrative law judge. The intended effect of these regulations is to provide the mechanisms for administrative review of proposed individual civil penalties.

EFFECTIVE DATE: These rules are effective April 18, 1988.

FOR FURTHER INFORMATION CONTACT: Will A. Irwin, Administrative Judge, Interior Board of Land Appeals, Office of Hearings and Appeals, U.S. Department of the Interior, 4015 Wilson Boulevard, Arlington, Virginia 22203. Phone: (703) 235-3750.

SUPPLEMENTARY INFORMATION: On December 24, 1986, the Office of Hearings and Appeals (OHA) published proposed regulations providing procedures for administrative review of the proposed assessment of individual civil penalties against a director, officer, or agent of a corporation under section 518(f) of the Surface Mining Control and Reclamation Act of 1977 (the Act), 30 U.S.C. 1268(f) (1982). 51 FR 47846–46848 (Dec. 24, 1986). The Office of Surface Mining Reclamation and Enforcement (OSM) also published proposed regulations implementing section 518(f) on that day. *See* 51 FR 46838–46844 (Dec. 24, 1986) Comments on OHA's proposed regulations were received from five organizations. These comments are summarized and OHA's responses are provided in the following discussion.

Editorial changes have been made in the final rule to conform with the terminology used in the corresponding OSM rule on individual civil penalties. The document used to notify an individual concerning the assessment of a penalty is now called a "notice of proposed individual civil penalty assessment."

1. Section 4.1302

One comment argues that § 4.1302(a) "lacks the necessary flexibility for the protection of an individual's right to due process" and should be revised to allow the filing of a petition for review of a proposed assessment after 30 days of its service under extenuating circumstances such as "faulty service of the assessment or ambiguous nature of the propose assessment." "OHA should change the mandatory language which precludes the exercise of discretion to consider a petition filed late for good cause," the comment suggests, as well as delete the second sentence of proposed § 4.1302(b), which specifies the sanctions for untimely filing of a petition, because it has "no statutory support."

OHA distinguishes between deadlines for filing documents that inititate administrative review proceedings, which it regards as jurisdictional, and

deadlines for filing subsequent briefs or other pleadings. Untimely filing of documents in the former category, such as petitions for review under § 4.1302, mandates dismissal of the proceeding, while dismissal of the proceeding for untimely filing of documents in the later category is discretionary and depends in part on whether another party was prejudiced by the untimely filing. *See, e.g., James C. Mackey*, 96 IBLA 356, 358, 94 I.D. 132, 134 (1987). The distinction is well-recognized, *see, e.g., Pressentin*, v. *Seaton*, 284 F.2d 195, 199 (D.C. Cir. 1960), and may be established under the authority of 5 U.S.C. 301 (1982) as well as under the authority of the Surface Mining Act. *See* 51 FR 16319–20 (May 2, 1986). The suggestion is rejected.

2. Section 4.1303

One comment objected to the requirement in proposed § 4.1303(a)(3) that an individual filing a petition for review provide a copy of the permit, order or final decision that the corporate permittee is charged with violating. Such document might be difficult for an individual to find in time for filing within 30 days, especially if he has left the corporation, and it is more appropriate for OSM to produce them as part of its prima facie case, the comment argues. Finally, the comment notes, comparable regulations only require a petitioner to file items that have previously been served on him. *See, e.g.*, 43 CFR 4.1164(c).

The proposed regulation has been revised to require the filing only of all documents that OSM has served on the individual in connection with the proposed civil penalty. *See* 30 CFR 724.17(a), 846.17(a).

3. Section 4.1304

A comment observes that there is no sanction comparable to § 4.1302(b), second sentence (discussed above), for failure to comply with the requirement of § 4.1304 that OSM file an answer or motion, or a statement that it will not file an answer or motion, within 30 days of receipt of a copy of a petition. The commenter proposes that no extension be available for a filing under § 4.1304, and that failure to timely file in accordance with it be deemed to be a statement that OSM will not file anything in response to a petition.

OHA has held, as the commenter apparently recognizes, that OSM's failure to file an answer should not result in vacating a notice of violation or cessation order, absent extreme circumstances. *William Francis Rice*, 3 IBSMA 17, 88 I.D. 299 (1981). Although failure to comply with § 4.1304 would presumably be regarded similarly, the regulation is intended to require OSM to file either an answer or a motion or a statement that it does not intend to file a substantive answer or motion so that the administrative law judge will have a clear indication when the case is ready to be set for hearing. Although treating OSM's silence as a statement that it would not file anything would have the same effect as the proposed regulation, OHA prefers the definiteness that will result from requiring that it file one of the documents specified. The suggestion is not accepted.

4. Section 4.1307(a)

One comment objects that proposed § 4.1307(a)(1) goes beyond the authority of section 518(f) in authorizing imposition of an individual civil penalty for violation "of any requirement of the Act or implementing regulations," and states the quoted language must be stricken.

Section 518(f) authorizes a civil penalty for a director, officer, or agent of a corporation "[w]henever a corporate permittee violates a condition of a permit * * * or fails or refuses to comply with any order issued under section 521 of this Act * * *." § 4.1307(a)(1) has been revised to correspond to this language.

Under § 4.1307(a)(1), OSM can meet its burden by establishing a prima facie case of either a violation, or of a failure or refusal. In cases where an individual civil penalty is based on a failure or refusal, OSM need not prove the fact of a violation; it need only show that it cited a violation in an order issued to a corporate permittee. Section 518(f) of the Act subjects a director, officer or agent of a corporation to an individual civil penalty for the corporation's failure or refusal to comply with an applicable order, even where the director, officer or agent had no role in committing the underlying violation itself.

5. Section 4.1307(b)

Two comments object to the provision of proposed § 4.1307(b) that the "existence of a corporate permittee's violation * * * is conclusively established if the violation or order has been upheld in a final decision" in an administrative review proceeding before OHA. The commenters presume that the rule is based on principles of res judicata or collateral estoppel, but object that a corporate director, officer, or agent would not necessarily be either a party to administrative litigation involving the corporation's violation or in privity with the corporation. No precedent exists for "the concept of a *per se* application of collateral estoppel without a specific showing of the requisite privity," it is argued.

The question is when a director, officer, or agent of a corporation may be precluded from relitigating the issue whether that corporation violated a permit condition or failed or refused to comply with an order issued under section 521 or by the Secretary. The answer is that

> when an administrative body has acted in a judicial capacity and has issued a valid and final decision on disputed issues of fact properly before it, collateral estoppel will apply to preclude relitigation of fact issues only if: (1) there is identity of the parties or their privies; (2) there is identity of issues; (3) the parties had an adequate opportunity to litigate the issues in the administrative proceeding; (4) the issues to be estopped were actually litigated and determined in the administrative proceeding; and (5) the findings on the issues to be estopped were necessary to the administrative decision.

Pantex Towing Corp. v. *Glidewell*, 763 F.2d 1241, 1245 (11th Cir. 1985). *See United States* v. *Utah Construction & Mining Co.*, 384 U.S. 394, 421–22 (1966); *Nasem* v. *Brown*, 595 F.2d 801, 806–07 (D.C. Cir. 1979). Under these circumstances an individual may be collaterally estopped from contesting the existence of a corporate permittee's violation or failure or refusal to comply with an order.

The provision authorizing the preclusion of this issue has been added to § 4.1307(a)(1), proposed § 4.1307(b) has been deleted, and proposed § 4.1307(c) has been redesignated as § 4.1307(b).

6. Section 4.1307(c)

Three comments observe that, unlike 43 CFR 4.1155 in civil penalty proceedings involving permittees under section 518(a) of the Act, proposed § 4.1307(c) imposes the ultimate burden of persuasion on the individual to show by a preponderance of the evidence that the elements for imposing the proposed penalty have not been established. Unless a basis exists for distinguishing why the ultimate burden of persuasion should be allocated differently between the two proceedings, the comments suggest that § 4.1307(c) (now § 4.1307(b)) be revised to allocate this burden of persuasion to OSM as it is in § 4.1155.

43 CFR 4.1155 provides that OSM shall have the burden of going forward to establish a prima facie case and the ultimate burden of persuasion as to the fact of violation and as to the amount of the penalty. As to the fact of violation, the allocation of the ultimate burden of persuasion to OSM in § 4.1155 is inconsistent with § 4.1171, which

allocates the ultimate burden to the applicant for review because "the legislative history clearly states that an applicant for review has the ultimate burden of proof in proceedings to review notices and orders. S.R. No. 128, 95th Cong., 1st Sess. 93 (1977)." 43 FR 34381 (Aug. 3, 1978). Because the allocation of the ultimate burden in § 4.1155 as to the fact of violation is inconsistent with this congressional intent, and because there are now contradictory ultimate burdens of persuasion as to the fact of violation in consolidated application for review/petition for review of civil penalty proceedings involving the same notice of violation or cessation order (see section 518(b) of the Act and 43 CFR 4.1113), OHA has proposed an amendment to § 4.1155 that will allocate to OSM the ultimate burden of persuasion as to the amount of the civil penalty and allocate to the petitioner for review the ultimate burden of persuasion as to the fact of violation. 52 FR 38246 (Oct. 15, 1987). For these reasons, the allocation of the ultimate burden of persuasion in § 4.1307(b) as to § 4.1307(a)(1) will remain on the individual, as it will on the issue of whether he was an officer or director, since he will have readier access to facts on this issue. A new 4.1307(c) is added, however, providing that OSM bears the ultimate burden of persuasion as to whether the individual was an agent of the corporation, as to § 4.1307(a)(3), and as to the correctness of the amount of the civil penalty proposed, because these are issues it is appropriate for the government to demonstrate.

7. Section 4.1308

Section 4.1308(b) has been revised to conform when payment is due with 30 CFR 724.18 or 846.18.

8. Section 4.1309

One comment suggests OHA clarify whether a petition for discretionary review is required to exhaust administrative remedies before seeking judicial review under section 526 of the Act and, if so, specify that the time for seeking judicial review begins with the issuance of the Board's decision.

Filing of a petition for discretionary review is required for the exhaustion of administrative remedies. A statement is added to § 4.1309(f) that if a petition is denied by order, the decision of the administrative law judge shall be final for the Department, subject to 43 CFR 4.5. The date of such an order, or of a decision by the Board on the petition if it is granted, would be the date of the order or decision for purposes of section 526(a)(2).

Section 4.1309(g) has been added to provide that payment of a penalty is due in accordance with 30 CFR 724.18 or 846.18.

Determination of Effects

Because this rulemaking only provides administrative review procedures, the Department has determined that it is not major, as defined by Exec. Order No. 12291, and certifies that it will not have a significant economic effect on a substantial number of small entities under the Regulatory Flexibility Act, 5 U.S.C. 601 *et seq.*

National Environmental Policy Act

The Department has determined that these rules will not significantly affect the quality of the human environment, on the basis of the categorical exclusion of regulations of a procedural nature set forth in 516 DM 2, Appendix 1, § 1.10.

Paperwork Reduction Act

These rules contain no information collection requirements requiring Office of Management and Budget approval under 44 U.S.C. 3501.

Drafting

These rules were drafted by Will A. Irwin, Administrative Judge, Interior Board of Land Appeals, Office of Hearings and Appeals.

List of Subjects in 43 CFR Part 4

Administrative practice and procedure, Mines, Penalties, Surface mining

For the reasons stated in the preamble, Subpart L of Part 4 of Title 43 of the Code of Federal Regulations is amended by adding §§ 4.1300–4.1309 as set forth below.

Dated: February 2, 1988.

Earl E. Gjelde,
Under Secretary.

PART 4—[AMENDED]

1. The authority citation for 43 CFR Part 4, Subpart L continues to read:

Authority: 30 U.S.C. 1256, 1260, 1261, 1264, 1268, 1271, 1272, 1275, 1293; 5 U.S.C. 301.

2. 43 CFR Part 4, Subpart L, is amended by adding a new heading and §§ 4.1300–4.1309 to read:

Petitions for Review of Proposed Individual Civil Penalty Assessments Under Section 518(f) of the Act

Sec.
4.1300 Scope.
4.1301 Who may file.
4.1302 Time for filing.
4.1303 Contents and service of petition.
4.1304 Answer, motion, or statement of OSM.
4.1305 Amendment of petition.
4.1306 Notice of hearing.
4.1307 Elements; burdens of proof.
4.1308 Decision by administrative law judge.
4.1309 Petition for discretionary review.

Petitions for Review of Proposed Individual Civil Penalty Assessments Under Section 581(f) of the Act

§ 4.1300 Scope.

These regulations govern administrative review of proposed individual civil penalty assessments under section 518(f) of the Act against a director, officer, or agent of a corporation.

§ 4.1301 Who may file.

Any individual served a notice of proposed individual civil penalty assessment may file a petition for review with the Hearings Division, Office of Hearings and Appeals, U.S. Department of the Interior, 4015 Wilson Boulevard, Arlington, VA 22203. Phone: 703–235–3800.

§ 4.1302 Time for filing.

(a) A petition for review of a notice of proposed individual civil penalty assessment must be filed within 30 days of its service on the individual.

(b) No extension of time will be granted for filing a petition for review of a notice of proposed individual civil penalty assessment. Failure to file a petition for review within the time period provided in paragraph (a) shall be deemed an admission of liability by the individual, whereupon the notice of proposed assessment shall become a final order of the Secretary and any tardy petition shall be dismissed.

§ 4.1303 Contents and service of petition.

(a) An individual filing a petition for review of a notice of proposed individual civil penalty assessment shall provide—

(1) A concise statement of the facts entitling the individual to relief;

(2) A copy of the notice of proposal assessment;

(3) A copy of the notice(s) of violation, order(s) or final decision(s) the corporate permittee is charged with failing or refusing to comply with that have been served on the individual by OSM; and

(4) A statement whether the individual requests or waives the opportunity for an evidentiary hearing.

(b) Copies of the petition shall be served in accordance with § 4.1109 (a) and (b) of this part.

§ 4.1304 Answer, motion, or statement of OSM.

Within 30 days from receipt of a copy of a petition, OSM shall file with the Hearings Division an answer or motion, or a statement that it will not file an answer or motion, in response to the petition.

§ 4.1305 Amendment of petition.

(a) An individual filing a petition may amend it once as a matter of right before receipt by the individual of an answer, motion, or statement of OSM made in accordance with § 4.1304 of this part. Thereafter, a motion for leave to amend the petition shall be filed with the administrative law judge.

(b) OSM shall have 30 days from receipt of a petition amended as a matter of right to file an answer, motion, or statement in accordance with § 4.1304 of this part. If the administrative law judge grants a motion to amend a petition, the time for OSM to file an answer, motion, or statement shall be set forth in the order granting the motion to amend.

§ 4.1306 Notice of hearing.

The administrative law judge shall give notice of the time and place of the hearing to all interested parties. The hearing shall be of record and governed by 5 U.S.C. 554.

§ 4.1307 Elements; burdens of proof.

(a) OSM shall have the burden of going forward with evidence to establish a prima facie case that:

(1) A corporate permittee either violated a condition of a permit or failed or refused to comply with an order issued under section 521 of the Act or an order incorporated in a final decision by the Secretary under the Act (except an order incorporated in a decision issued under sections 518(b) or 703 of the Act or implementing regulations), unless the fact of violation or failure or refusal to comply with an order has been upheld in a final decision in a proceeding under §§ 4.1150–4.1158, 4.1160–4.1171, or 4.1180–4.1187, and 4.1270 or 4.1271 of this part, and the individual is one against whom the doctrine of collateral estoppel may be applied to preclude relitigation of fact issues;

(2) The individual, at the time of the violation, failure or refusal, was a director, officer, or agent of the corporation; and

(3) The individual willfully and knowingly authorized, ordered, or carried out the corporate permittee's violation or failure or refusal to comply.

(b) The individual shall have the ultimate burden of persuasion by a preponderance of the evidence as to the elements set forth in § 4.1307(a)(1) of this part and as to whether he was a director or officer of the corporation at the time of the violation or refusal.

(c) OSM shall have the ultimate burden of persuasion by a preponderance of the evidence as to whether the individual was an agent of the corporation, as to 4.1307(a)(3) of this part, and as to the amount of the individual civil penalty.

§ 4.1308 Decision by administrative law judge.

(a) The administrative law judge shall issue a written decision containing findings of fact and conclusions of law on each of the elements set forth in § 4.1307 of this part.

(b) If the administrative law judge concludes that the individual is liable for an individual civil penalty, he shall order that it be paid in accordance with 30 CFR 724.18 or 846.18, absent the filing of a petition for discretionary review in accordance with § 4.1309 of this part.

§ 4.1309 Petition for discretionary review.

(a) Any party may petition the Board to review an order or decision by an administrative law judge disposing of an individual civil penalty proceeding under § 4.1308 of this part.

(b) A petition under this section shall be filed on or before 30 days from the date of receipt of the order or decision sought to be reviewed, and the time for filing shall not be extended.

(c) A petitioner under this section shall list the alleged errors of the administrative law judge and shall attach a copy of the order or decision sought to be reviewed.

(d) Any party may file with the Board a response to the petition for review within 10 days of receipt of a copy of such petition.

(e) Not later than 30 days from the filing of a petition for review under this section, the Board shall grant or deny the petition in whole or in part.

(f) If the petition for review is granted the rules in §§ 4.1273–4.1276 of this part are applicable. If the petition is denied, the decision of the administrative law judge is final for the Department, subject to § 4.5 of this part.

(g) Payment of a penalty is due in accordance with 30 CFR 724.18 or 846.18.

[FR Doc. 88–5729 Filed 3–16–88; 8:45 am]
BILLING CODE 4310–79–M

DEPARTMENT OF TRANSPORTATION

National Highway Traffic Safety Administration

49 CFR Parts 571 and 572

[Docket No. 74–14; Notice 54]

Anthropomorphic Test Dummies

AGENCY: National Highway Traffic Safety Administration (NHTSA), DOT.

ACTION: Final rule; response to petitions for reconsideration.

SUMMARY: In July 1986, this agency published a final rule mandating the use of the Hybrid III test dummy in compliance testing under Standard No. 208 beginning September 1, 1991. That same rule permitted the optional use of the Hybrid III test dummy for compliance testing beginning October 23, 1986. Eleven organizations filed petitions for reconsideration of this rule.

In response to these petitions, the agency is making three significant and several other changes to the final rule published in July 1986. The first of the significant changes is the suspension of the September 1, 1991 date for mandatory use of the Hybrid III test dummy in compliance testing. The mandatory use date is being suspended because, inadvertently, insufficient time was permitted to address the technical questions that may arise through the use of this new test dummy.

The second significant change is the amendment of the thorax deflection requirement to increase the permissible deflection of the Hybrid III thorax (chest) during compliance testing from two to three inches. The thorax deflection limit is being increased because it appears that most 2-point automatic belt designs used in current vehicles would not comply with the previously established two inch thorax deflection limit. The available accident data do not show an increased risk of thorax injuries to occupants of 2-point belt systems, as compared with occupants of 3-point belt systems or air bags. On the other hand, some limited biochemical data appear to suggest that 2-point belted occupants may suffer chest injuries more frequently than their 3-point belted or air bag restrained counterparts. These inconsistencies between the different data cannot be resolved at the present time. The agency intends to take the necessary steps to obtain sufficient data in this area to arrive at a satisfactory resolution of the inconsistencies. Given the current uncertainties, however, this rule establishes a three inch chest deflection

limit for the Hybrid III test dummy. The available data for 2-point and 3-point belt systems and for air bags indicate that this three inch limit is practicable and meets the need for safety.

The third significant change is a delay until September 1, 1990 in the use of the Hybrid III dummy for compliance testing of vehicles that do not use any restraint system to provide automatic occupant protection. Such restraint systems have generally been called "passive interiors". Up to this point, the agency has established the same chest deflection limit for Hybrid III dummies restrained by safety belts and those that are unrestrained. However, the agency wants to further investigate whether it is appropriate to establish separate chest deflection limits for unrestrained and safety-belt restrained Hybrid III dummies. Additionally, the agency wants to determine if the Hybrid III dummy with a three inch chest deflection limit is equivalent to the older type of test dummy when both are unrestrained. The temporary delay in the use of the Hybrid III test dummy for certain vehicles will provide the agency with sufficient time to determine whether a chest deflection limit lower than three inches should be proposed for unrestrained Hybrid III dummies, and, if so, which lower limit should be proposed.

This notice also makes several other changes to the July 1986 rule in response to the petitions for reconsideration. These are:

1. This notice adjusts the required calibration responses for the dummy's thorax and femur. The thorax force response adjustment is necessary to reflect the characteristics of the dummy's rib cage structure when the ribs are manufactured with new rib damping material. The femur force adjustment narrows the acceptable force response range during calibration. Both of these adjustments will result in more consistently repeatable dummy impact responses during crash testing. NHTSA has made the appropriate adjustments to the drawing and specifications package for the Hybrid III dummy to reflect these changes.

2. This notice makes certain clarifying amendments to Standard No. 208 to permit the use of the Hybrid III test dummy for compliance testing with all the requirements of Standard No. 208 and to permit the use of both types of test dummies in any Standard No. 208 testing conducted before the use of the Hybrid III becomes mandatory.

EFFECTIVE DATE: The regulatory changes made in response to the petitions for reconsideration are effective on March 17, 1988.

FOR FURTHER INFORMATION CONTACT: Mr. Stanley H. Backaitis, Crashworthiness Division, NRM–12, NHTSA, 400 Seventh Street SW., Washington, DC 20590 (202–366–4912).

SUPPLEMENTARY INFORMATION:

Background

In December 1983, General Motors (GM) petitioned the agency to amend 49 CFR part 572, *Anthropomorphic Test Dummies*, to include specifications for the Hybrid III test dummy that GM had developed. GM stated in its petition that the Hybrid III test dummy provides more meaningful information about the occupant protection potential of a vehicle than does the test dummy specified in Subpart B of Part 572. GM also argued that the Hybrid III test dummy's impact responses during a crash are more representative of human responses. Additionally, GM stated that the Hybrid III allows the assessment of more types of potential injuries, with 31 total measurements as opposed to eight measurements with the Part 572 Subpart B test dummy. GM also claimed that the repeatability and reproducibility of the Hybrid III are as good as those of the Subpart B test dummy. In support of these claims, GM submitted numerous documents to the agency.

After evaluating the petition and the supporting documents, NHTSA published a proposal on April 12, 1985 (50 FR 14602). That notice proposed to adopt the Hybrid III test dummy as an alternative to the Part 572 Subpart B test dummy for compliance testing under Standard No. 208, *Occupant Crash Protection* (49 CFR 571.208) until September 1, 1991. After that date, the agency proposed to use only the Hybrid III test dummy for compliance testing under Standard No. 208.

The agency proposed that action because it tentatively concluded that the Hybrid III test dummy appeared to represent an appreciable advance in the state-of-the-art of human simulation. NHTSA was particularly interested in the Hybrid III test dummy because of its apparently superior biofidelity and updated anthropometry, as compared with the Part 572 Subpart B test dummy. Further, because the Hybrid III test dummy has the capability of monitoring almost four times as many injury indicating parameters as the Subpart B test dummy, it can be used to measure injury producing forces, accelerations, deflections, moments, etc. for areas of the body that are not instrumented in the Subpart B test dummy. For instance, the Hybrid III test dummy has instrumentation capable of measuring injury producing forces experienced by the neck and lower legs. Although these body areas show a high incidence of serious and/or disabling injuries in crashes, the agency cannot make use of the Subpart B test dummy to evaluate the extent of the protection afforded to these body areas by vehicle safety systems. Because of these attributes of the Hybrid III test dummy, NHTSA believed that it should eventually replace the Subpart B test dummy as the tool used to evaluate the protection that vehicles afford occupants during frontal crashes.

The Final Rule

After evaluating the comments on the April 1985 proposal, NHTSA published a final rule adopting the Hybrid III test dummy on July 25, 1986 (51 FR 26688). This final rule made some adjustments to the calibration procedures proposed to be used with the Hybrid III test dummy. The calibration procedures involve a series of static and dynamic tests of the test dummy components to determine whether the responses of the dummy fall within specified ranges. These calibration procedures help ensure that the test dummy has been properly assembled and that the assembled test dummy will give repeatable and reproducible results during crash testing. (Repeatability refers to the ability of the same test dummy to produce the same results when subjected to identical tests. Reproducibility refers to the ability of one test dummy to provide the same results as another test dummy built to the same specifications.)

The preamble to the final rule also stated that the agency had concluded that the two types of test dummies were equivalent; i.e., when both test dummies were restrained by lap/shoulder belts or with air bags, only minimal differences in test results were shown by the two types of dummies. The importance of equivalence is that vehicles, which will pass or fail Standard No. 208 using one type of dummy, will achieve essentially the same result using the other dummy.

The exception to the finding of equivalence occurred for chest acceleration measurements for unrestrained Hybrid III test dummies. The chest acceleration measurements for unrestrained Hybrid III dummies were consistently lower than the chest acceleration measurements for unrestrained Part 572 Subpart B dummies. If the two test dummies were to be equivalent, some additional measurement of injury producing forces to the chest of the Hybrid III test dummy would have to be recorded to compensate for the lower chest acceleration measurements with this test dummy. Chest injuries generally are caused by excessive loading on the chest, when the chest contacts the restraint system and possibly the steering system, if the occupant is restrained, or the steering system or other passenger compartment components, if the occupant is unrestrained. The agency concluded that a measurement of chest deflection in testing with the Hybrid III test dummy would appropriately compensate for that dummy's lower chest acceleration measurements when it was unrestrained. Therefore, the July 1986 final rule specified a limit on the amount of thorax deflection that could occur with the Hybrid III test dummy, as the means of ensuring equivalence of the two types of test dummies. See 51 FR at 26693–26694.

Having determined that a thorax deflection limit was necessary to ensure equivalence of the two types of test dummies, the obvious question was what that limit should be. The agency began by examining biomedical data on thorax deflection. Excessive chest deflection can produce rib fractures which can impair breathing and inflict serious damage to the internal organs within the perimeter of the chest structure. The agency began by examining test results to compare the measured responses of Hybrid III test dummies and the injuries induced in cadavers under identical impact conditions. Injuries induced in the cadavers were rated on the Abbreviated Injury Scale (AIS). An AIS rating of 1 is a minor injury, while an AIS of 3 is a serious injury. The rated cadaver injuries were then compared with the chest deflection experienced by a Hybrid III test dummy under identical impact conditions.

In tests using a relatively stiff air bag, which was preinflated and not vented, the cadaver sustained an average injury level of AIS 1.5 (minor to moderate), while the Hybrid III test dummy experienced a 2.7 inch chest deflection under the same conditions. NHTSA concluded that these results demonstrated that a system that symmetrically and uniformly distributes impact loads over the entire chest can produce approximately three inches of chest deflection, as measured on the Hybrid III dummy, and still adequately protect an occupant from serious injury.

However, the testing with belt restraints that did not uniformly or symmetrically spread loads over the entire chest and with other protective systems where the impact loads were highly concentrated over a relatively small area suggested that chest deflection in other portions of the chest could be significantly greater than was shown by the centrally-mounted chest deflection gauge on the Hybrid III dummy. Accordingly, it appeared reasonable to establish a chest deflection limit of less than three inches to ensure that those restraint systems would provide a level of chest protection comparable to that provided by restraint systems that symmetrically spread the load over the entire chest surface. When evaluating lap/shoulder belts in a laboratory environment, the cadavers had moderate to serious injuries (AIS of 2.6) induced under the same conditions that the Hybrid III experienced chest deflection of 1.6 inches. Additionally, some pendulum test, were conducted for GM. In these tests, blunt, concentrated loads are intended to simulate unrestrained vehicle occupant impacts into the steering wheel or other interior components. This testing showed that the cadavers had serious chest injuries induced (average AIS of 2.8) under the same impact conditions in which the Hybrid III dummy measured 2.63 inches of chest deflection.

The available biomechanical data on this subject are based on a limited number of cadaver tests that are not large enough to make statistically significant injury projections. While the agency could not and did not rely on these limited biomechanical data *alone* to justify a decision to establish any particular limit for chest deflection, these data did suggest that a limit as low as 1.6 inches of chest deflection should be considered for the Hybrid III test dummy.

In addition to the indications from the biomechanical data that a chest deflection limit of less than three inches should be adopted for impact exposures that provide concentrated loadings over a limited area of the chest, the agency was also concerned that the Hybrid III test dummy could, in many instances, underestimate actual chest deflection. The Hybrid III measures chest deflection by a deflection sensor located near the third rib of the test dummy, on the midsternum of the dummy's chest. NHTSA testing has shown that the Hybrid III's deflection sensor underestimates chest displacement when a load is applied to an area away from the deflection sensor.

The agency recognized the limitations of the biomechanical data when it was considering what chest deflection limit should be established for restraint systems that can provide concentrated loadings over a limited area of the chest. Given these limitations, NHTSA examined the chest deflection levels that occur with current vehicle restraint systems. To do this, NHTSA examined the crash performance of existing restraint systems in available accident files, such as National Accident Sampling System (NASS) and Fatal Accident Reporting System (FARS). These data showed that existing 2- and 3-point safety belts, when used, offer vehicle occupants a high level of safety protection, including protection against the risk of serious chest injuries. Therefore, the agency determined that the chest deflection limit could safely be set at a level that was compatible with the level of chest deflection that would be experienced in 30 mph tests with existing 2- and 3-point belt designs.

Test data available to the agency at the time of the final rule indicated that the two inch limit could be satisfied by existing designs of 3-point manual belts, 2-point automatic belts, and 3-point manual belts with air bags. For instance, the data available of 3-point manual safety belts in 30 mph frontal impacts with the Hybrid III test dummy showed chest deflections ranging from an average of 0.67 inches in NHTSA car-to-car testing to 1.89 inches in GM sled testing. For the Volkswagen 2-point automatic belts, the data showed chest deflections ranging from 0.79 inches to 1.09 inches in NHTSA testing. Based on these data, the agency concluded that a two inch chest deflection limit was an achievable level for existing restraint system designs.

Thus, the decision to adopt a two inch chest deflection limit for restraint systems that did not generally distribute the load over the entire chest area was based on the following factors:

1. The limited biomechanical data that were available suggested that there was a safety need for a chest deflection limit at a level below three inches;

2. A chest deflection limit below three inches would compensate for the Hybrid III's tendency to underestimate chest deflection when a load is applied to a small area away from the deflection sensor; and

3. Existing 2- and 3-point belt systems could comply with a two inch chest deflection limit, based on the limited testing data available to the agency.

Petitions for Reconsideration

The agency received petitions for reconsideration of this final rule from nine different organizations. Many of the petitions for reconsideration raised

issues involving the positioning of the Hybrid III dummy during compliance testing. In its November 23, 1987 final rule establishing dynamic testing requirements for light trucks and light multipurpose passenger vehicles (MPV's) (52 FR 44898), NHTSA permitted the use of Hybrid III test dummies for compliance testing of those vehicle types. The dummy positioning issues that were raised in the petitions for reconsideration of the Hybrid III dummy had to be resolved in that rule, to allow the Hybrid III dummies to be properly positioned during compliance testing. Although that rule addressed only light trucks and MPV's, the positioning problems in those vehicle types are similar to the positioning problems for passenger cars. Accordingly, the dummy positioning procedures set forth therein are applicable to positioning the Hybrid III test dummy in any type of vehicle, including passenger cars. Persons interested in reviewing the agency's response to the Hybrid III test dummy positioning issues raised in the petitions for reconsideration should consult that document. This notice addresses all other issues raised in the petitions for reconsideration of the final rule establishing requirements for the Hybrid III test dummy.

Chest Deflection Limits

The chest deflection limits generated the most requests for reconsideration. Chrysler, Ford, GM, Honda, the Motor Vehicle Manufacturers Association (MVMA), Nissan, Renault, Toyota, Volkswagen, and Volvo all asked for some changes to these requirements. GM stated that it uses a two inch deflection limit as an internal design and performance guide in its development of belt restraint systems. However, GM stated that there is no biomedical basis for such a limit. GM concluded by stating that it believed a two inch chest deflection limit was overly conservative as a mandatory requirement and that a three inch limit would be a more appropriate regulatory requirement.

Toyota stated that the two inch limit was unreasonable. Toyota stated that it has no knowledge of any accidents in which occupants of a Cressida equipped with this automatic belt system have suffered serious chest injuries. Yet, according to this petitioner, in 30 miles per hour (mph) barrier impact tests using the Hybrid III test dummy, the 2-point automatic belt system installed in its Cressida model causes chest deflections that average 2.3 inches, with a maximum of 2.9 inches. Thus, these vehicles would not comply with the two inch chest deflection limit. Toyota asserted that retention of the two inch chest deflection limit would force it to discontinue offering this 2-point automatic belt system, even though accident data indicate that the system offers effective occupant protection. Toyota urged the agency to increase the chest deflection limit to three inches for all restraint systems. Volkswagen made a similar point with respect to the 2-point automatic belt system installed in its Golf models, as did Chrysler for the 2-point automatic belt systems installed in some of its models.

Volvo stated that the data on which NHTSA had based the two inch deflection limit were inadequate to provide conclusive evidence of biomechanical tolerance levels. Renault requested the agency to amend the chest deflection limit to 2.5 inches until the uncertainties associated with the test data, which were the basis for the two inch limit, are fully resolved. MVMA asked that the two inch limit be suspended until the agency had resolved the issues surrounding this aspect of occupant protection.

Restrained Hybrid III dummies. In response to these petitions, NHTSA has thoroughly reexamined this subject. The agency has no basis for questioning its previous statements that the Hybrid III can underestimate actual chest deflections in certain circumstances Further, after again reviewing the available biomechanical data, the agency continues to believe those data suggest the need to establish a chest deflection limit for restraint systems that do not evenly distribute the load over the entire thorax surface at some level below three inches.

If the biomechanical data were complete and reliable, the agency could rely on these data alone as the primary support for a particular chest deflection limit somewhere below three inches. However, the currently available biomechanical data are limited. NHTSA believes that it should not rely on these biomechanical data *alone* to support a particular chest deflection limit. Even when the agency's concern about the Hybrid III dummy's propensity to underestimate actual chest deflection in certain situations is combined with the available biomechanical data, the agency cannot demonstrate at this time that a two inch chest deflection limit is necessary to meet the need for safety

The most broad-based data source available for examination when establishing a new chest deflection limit is the accident files for the restraint systems currently in production. As noted above, those accident files show that current 2- and 3-point safety belts, when used, afford a high level of protection against serious thorax injuries. When the agency adopted the two inch chest deflection limit, the data available to the agency indicated that existing 2- and 3-point safety belt systems would not have to be redesigned to comply with this requirement. In the case of 2-point automatic belts, the available data consisted of 1982 and 1984 Volkswagen Rabbit tests. This testing showed chest deflections of 1.09 and 1.06 for the Hybrid III dummy at the driver's position, and chest deflections of 0.79 and 0.86 inches for the Hybrid III dummy at the passenger's position. Based on these test results, the agency had no reason to believe that existing 2-point automatic belt systems would have to be redesigned to comply with the two inch chest deflection limit.

However, manufacturers of vehicles with 2-point automatic belt systems submitted new test results as part of their petitions for reconsideration, showing that their existing belt systems do not comply with a two inch chest deflection limit. As not above, Toyota and Chrysler submitted test results showing that their models with 2-point automatic belt systems would not comply with a two inch chest deflection limit. Most significantly. Volkswagen submitted test data for its 1987 Golf model. This vehicle uses a very similar design of 2-point automatic belts to that which was present in the 1982 and 1984 Rabbit models that were tested by the agency. Volkswagen's testing of its 1987 Golf showed that the Hybrid III test dummies at both the driver and the passenger positions experienced chest defections of 2.3 inches. These chest deflections are significantly higher than those measured in the NHTSA testing. Both Volkswagen and MVMA alleged in their petitions for reconsideration that a scaling error may account for the large differences in test results for what is essentially the same restraint system. Both petitioners stated that the agency may have improperly converted centimeters to inches. Volkswagen showed that when the NHTSA results were multiplied by 2.54 (the number of centimeters in one inch), the NHTSA and Volkswagen data show very good agreement.

In response to these allegations, NHTSA has begun an investigation of its previous test results. The preliminary conclusion from that investigation is that the discrepancy between the NHTSA and Volkswagen test results cannot be definitely attributed to a data processing scaling error in the NHTSA

data. However, it concluded that those previous test results must be regarded as highly suspect.

Subsequent sled tests by NHTSA using Volkswagen Golf interiors produced chest deflections substantially greater than the results of the previous NHTSA crash testing of Volkswagen Rabbits. For example, this subsequent sled testing of a Golf showed a chest deflection of 2.8 inches for the current design of the Golf interior and restraint system. The agency then made several modifications to the Golf interior and restraint system to explore the sensitivity of the parameters that influence the magnitude of measured chest deflection. One of these modifications resulted in a chest deflection of 1.9 inches. However, this modification increased the HIC level to 2362. None of the chest deflections measured in these 11 tests of the Golf were near the level of 1.09 inches measured in the previous NHTSA testing of the Rabbit, and all but the one modification discussed above had chest deflections above two inches.

Additionally, the agency has also conducted several 30 mph frontal impact tests of vehicles equipped with 2-point automatic belts. The Chrysler LeBaron had a chest deflection of 2.35 inches at the driver's position and 2.56 inches at the passenger's position. The Subaru XT had a chest deflection of 2.48 inches at the driver's position and 2.61 inches at the passenger's position. The Toyota Camry had a chest deflection of 1.66 inches at the driver's position and 2.15 inches at the passenger's position. These results likewise are substantially greater than the chest deflection of 1.09 inches measured for the Volkswagen Rabbit in the agency's previous testing.

The subsequent testing by NHTSA and by the manufacturers has not been able to replicate the results of NHTSA's previous testing of 2-point automatic belts. To date, the agency has not been able to identify the source(s) of the discrepancies between current and previous test results. Accordingly, the agency believes that it cannot rely on the chest deflection measurements obtained in that previous round of testing for any purpose until such time as the agency can explain or replicate those results.

Data available to the agency indicate that most of the two point belt systems currently offered and some three point belt systems could not comply with the two inch chest deflection limit. Moreover, the accident data for vehicles equipped with restriant systems that do not comply with the two inch chest deflection limit do *not show* that persons restrained by these belt systems experience a higher level of chest injuries in crashes than those restrained by belt systems that comply with the two inch chest deflection limit. Given these accident data and the acknowledged limitations of the available biomechanical data, the agency has concluded that it does not have an adequate basis for imposing a two inch chest deflection limit at this time. Accordingly, this notice amends the chest deflection level upward.

The remaining question is what level should be established as the limit for permissible chest deflection. As noted above, agency sled tests have measured a 2.8 inch chest deflection for the Volkswagen Golf. NHTSA vehicle tests measured chest deflections of 2.56 inches in the Chrysler LeBaron and 2.61 inches in the Subaru XT. In one of Toyota's tests, a chest deflection of 2.9 inches was measured in its Cressida model. The agency currently has no field evidence that persons restrained by the restraint systems in these vehicles are exposed to an unacceptable risk of serious chest injuries. Therefore, this notice amends the chest deflection limit for Hybrid III test dummies to specify that the chest deflection shall not exceed three inches for any occupant protection system.

Unrestrained Hybrid III dummies. As noted above, the available accident data suggest that, when the impact forces that produce 2.9 inches of chest deflection in the Hybrid III test dummy are imposed on the human chest by 2-point belts, those forces appear not to expose vehicle occupants to a significant risk of serious chest injury. Similarly, NHTSA has test data showing that, when the forces that produce 2.7 inches of chest deflection in the Hybrid III test dummy are imposed on the human chest by air bags, those forces appear not to expose vehicle occupants to a significant risk of serious chest injury. Accordingly, the agency believes that a three inch chest deflection limit for the Hybrid III test dummy when restrained by safety belts or air bags appears to meet the need for motor vehicle safety.

In both the NPRM and the final rule adopting the Hybrid III test dummy, the agency treated all occupant protection systems other than those that were "gas inflated and provide distributed loading to the torso during a crash" as a single category. This treatment had the effect of establishing the same chest deflection limit for Hybrid III dummies that were restrained by safety belts and those that were unrestrained. Following this same reasoning, one would infer that since the three inches of chest deflection in the Hybrid III dummy can safely be tolerated by vehicle occupants when those forces are imposed by safety belts, that same level of chest deflection could be safely tolerated when it is imposed on unrestrained vehicle occupants.

However, the accident data and the limited biomechanical data that are currently available for unrestrained occupants raise concerns about the decision to assign the same chest deflection limit to unrestrained and belt-restrained occupants. To respond to these concerns, NHTSA believes that it should reexamine the basis for its decision to establish the same chest deflection limit for belt-restrained and unrestrained Hybrid III test dummies.

Moreover, the preamble to the final rule establishing the Hybrid III test dummy expressed the agency's concerns about the equivalence of the Hybrid III test dummy and the Part 572 Subpart B test dummy, relying solely on data gathered when both types of test dummies were *unrestrained*. The equivalence of the two test dummies is essential if the agency is to ensure that permitting a choice of test dummies will not lead to a degradation in vehicle safety performance. That is, both test dummies must reach similar conclusions in identifying vehicle designs that could cause or increase occupant injury. Based on a review of all available data comparing the test responses of the two dummies, the agency concluded that there was no consistent trend for either test dummy to measure higher or lower Head Injury Criterion (HIC) or femur measurements than the other. With respect to chest acceleration responses, however, the preamble explained the following:

> In the case of chest acceleration measurements, the data again do not show higher or lower measurements for either test dummy, except in the case of unrestrained tests. In unrestrained tests, the data show that the Hybrid III generally measures lower chest g's than the existing Part 572 test dummy. This difference in chest g's measurement is one reason why the agency is adopting the additional chest deflection measurement for the Hybrid III, as discussed further below. 51 FR 26688, at 26694; July 25, 1986.

Later, the preamble said:

> In summary, the test data indicate the chest accleration responses between the Hybrid III and the existing Part 572 test dummy are about the same for restrained occupants, but differ for some cases of unrestrained occupants. This is to be expected since a restraint system would tend to make the two dummies react similarly even though they have different seating postures. The different seating postures, however, would allow unrestrained dummies to impact different vehicle surfaces, which would in most instances produce different responses. Since the Hybrid III dummy is more human-like, it

should experience loading conditions that are more human-like than would the existing Part 572 test dummy. One reason that the agency is adding a chest deflection criteria for the Hybrid III is that the unrestrained dummy's chest may experience more severe impacts with vehicle structures than would be experienced in an automatic belt or air bag collision. Chest deflection provides an additional measurement of potential injury that may not be detected by the chest acceleration measurement. *Id.*, at 26694–95.

NHTSA's 1986 determination that the Hybrid III and the Part 572 Subpart B test dummies were nevertheless equivalent test devices for unrestrained occupants was based on the addition of a chest deflection limit for unrestrained Hybrid III test dummies. The chest deflection limit was established at two inches, based primarily upon data that had been gathered for *belt-restrained* occupants. However, today's notice has amended the chest deflection limit for Hybrid III test dummies to three inches, based in part on the inadequate support for the two inch value. Despite our acknowledgement of the limitations in the support for the two inch value, NHTSA is also concerned that none of the limited available data indicate that a three inch chest deflection limit for *unrestrained* Hybrid III test dummies is the correct value to make the Hybrid III test dummy equivalent to the Part 572 Subpart B test dummy.

Given the limitations of the available data to support any particular chest deflection value for unrestrained occupants and the concerns about the equivalence of the Hybrid III and Subpart B test dummies without a two inch chest deflection limit, the agency has concluded that it should not permit the Hybrid III dummy to be used until September 1, 1990 to test vehicles that do not use any restraint systems (such as automatic safety belts or air bags) to provide automatic occupant protection. This period of time will allow the agency to gather and analyze additional data, so that it can determine whether a chest deflection limit of less than three inches is necessary for unrestrained Hybrid III test dummies, and, if so, what specific limit should be proposed.

Furthermore, the agency has already determined that the injury criteria applicable to unrestrained Subpart B test dummies are reasonably correlated to the tolerance limits of unrestrained vehicle occupants. Accordingly, mandating the use of the Subpart B test dummy until September 1, 1990, for compliance testing of vehicles that do not use restraints to provide occupant protection will ensure that any such vehicles afford a level of occupant protection equivalent to that afforded by vehicles that use restraint systems.

The agency would like to make clear that the available data do *not* establish that the three inch chest deflection limit for unrestrained Hybrid III test dummies fails to meet the need for safety or fails to ensure equivalence with the Subpart B test dummy. To repeat, the agency has always treated unrestrained and belt-restrained Hybrid III dummies as a single category for the purposes of chest deflection throughout this rulemaking. If the agency were to continue following this course, there would be no reason for the temporary delay in the use of the Hybrid III for certain types of vehicles. However, the accident data and the limited biomechanical data that are available suggest that it would not be appropriate to continue to treat belt-restrained and unrestrained Hybrid III test dummies in a single category for purposes of the chest deflection limit. The agency wants to investigate this subject further, to ensure that the chest deflection limit that is established for unrestrained Hybrid III test dummies both meets the need for safety and ensures that these dummies are equivalent to the Subpart B test dummy in similar conditions.

If the agency cannot substantiate its concerns with data by the time this temporary delay in the use of the Hybrid III dummy for some vehicles expires, NHTSA will assume that it is reasonable to continue imposing a single chest deflection limit for belt-restrained and unrestrained Hybrid III dummies. Accordingly, *unless* there is some future rulemaking action in this area, this rule provides that vehicles that do not use any restraint systems to provide occupant protection and that are manufactured on or after September 1, 1990 *may* use the Hybrid III test dummy with the three inch chest deflection limit in Standard No. 208 compliance testing.

The agency is not aware of any manufacturer's plans to certify a vehicle design as complying with Standard No. 208 without including any automatic restraint system before September 1, 1990. Hence, this temporary delay in the use of the Hybrid III for testing vehicles without any automatic restraint systems should not adversely affect any manufacturer. After this temporary delay has expired, the Hybrid III dummy will be available for compliance testing for any type of occupant protection system a manufacturer may certify as complying with Standard No. 208. This reflects the agency's continuing belief that the Hybrid III test dummy should eventually replace the older Subpart B test dummy as the tool used to evaluate the protection that *all* vehicles afford occupants during frontal crashes, including vehicles that do not use any restraint systems to protect the occupants, because of the Hybrid III's enhanced biofidelity and capability of measuring injury producing forces for areas of the body that are not measured by the Subpart B test dummy.

Mandatory Use Date for Hybrid III

There are a number of questions that are currently unresolved regarding the injury criteria that should be established for the Hybrid III dummy. The following are some of the issues that need to be addressed to develop sound injury criteria for that test dummy:

1. What is the extent of the occupant chest injury problem in real world motor vehicle crashes? How does the problem vary by restraint system type?
2. Is chest deflection a relevant chest injury measure, in addition to chest acceleration, when using the Hybrid III test dummy?
3. What process should be used to correlate laboratory-based test data about chest injuries with the actual accident data for chest injuries?
4. How accurate and valid are the current chest deflection measurement technology and any current technological alternatives for assessing chest injury potential (such as measurements of shoulder belt loading)?
5. To what extent should the performance requirement limiting chest deflection differentiate among the varous types of restraint systems?
6. Are the responses of the Hybrid III test dummy adequately repeatable when used to measure the chest deflection of various types of restraint systems?

The available data are inadequate to permit the agency to resolve these questions with a reasonable degree of confidence. Until the agency has a reasonable confidence in its answers to these types of questions, NHTSA believes it would be premature to mandate the use of only this test dummy for compliance testing under Standard No. 208. Accordingly, this notice suspends the mandatory use date for the Hybrid III test dummy. The July 1986 final rule had established September 1, 1991 as the date after which NHTSA would use only the Hybrid III test dummy for its passenger car compliance testing under Standard No. 208.

NHTSA has already initiated further testing of current restraint systems with the Hybrid III test dummy. In addition, the agency intends to broaden its biomechanical data base to fill in the gaps in the existing data regarding the appropriateness of limits on permissible

chest deflection. NHTSA will also attempt to correlate the biomechanical data, Hybrid III chest deflections and/or related injury assessments, and injuries observed in vehicle crashes. Finally, the agency will gather more chest deflection and injury data from vehicle test crashes. After the agency has performed this additional research, it will propose a new mandatory use date for the Hybrid III dummy in Standard No. 208 compliance testing.

In connection with this suspension of the mandatory use date for the Hybrid III dummy in NHTSA's compliance testing, the agency emphasizes that it is aware of the need to allow all manufacturers to obtain and gain experience with using the Hybrid III dummy *before* that test dummy is used for passenger car compliance testing. NHTSA previously determined that at least four years should be allowed for manufacturers to gain experience with the Hybrid III, after those test dummies were commercially available in sufficient quantities; 51 FR 26688, at 26699, July 25, 1986. When proposing a new mandatory use date for the Hybrid III, NHTSA will again specify a leadtime that is adequate to allow all manufacturers to gain experience with the Hybrid III test dummy. Because of the problems that have arisen vis-a-vis chest deflection, NHTSA will not include the time that has elapsed since the July 25, 1986 final rule in its leadtime estimate.

Other Issues Raised in Petitions for Reconsideration

As noted above, all issues related to the Hybrid III positioning procedures that were raised in these petitions for reconsideration were addressed in the November 23, 1987 final rule establishing dynamic testing requirements for light trucks and light multipurpose passenger vehicles (52 FR 44898). Interested persons are referred to that rule if they wish to review the agency's response to those issues. Besides the issues of the appropriate chest deflection limits, the mandatory use date for the Hybrid III test dummy, and the positioning procedures, the following issues were raised in petitions for reconsideration.

1. Acceptability of the Hybrid III's Design and Performance Specifications

Ford commented that the performance requirements for Hybrid III test dummies that were specified in the final rule were based on versions of the Hybrid III that reflected the proposed requirements. However, the version of the Hybrid III mandated in the final rule includes new rib damping material, knee sliders, ball-joint ankles, and so forth. Ford asserted that the performance requirements in the final rule may not have taken these changes into account. In addition to the changes noted by Ford, the requirements for the Hybrid III dummy specified in the final rule differed from those proposed with respect to the calibration procedures to be followed.

Ford's assertion that the agency failed to account for the changes made to the test dummy between the proposal and the final rule is not correct. In the case of the new rib damping material, data submitted by GM (Docket No. 74–14–N–45–027) and testing conducted for NHTSA show that the new rib damping material shifts the impact force response calibration limits upward by about six percent, but has little or no effect on the chest deflection characteristics.

The design changes to the knee, lower leg, and ankle were made to reduce the dummy's design complexity which, in turn, should enhance the dummy's reproducibility. The size, mass, mass distribution, and rigidity of the knee, lower leg, and ankle are identical to those which were proposed. Additionally, NHTSA conducted its testing of the Hybrid III dummy's knees with the proposed knees, that is, *without* a shear module. GM conducted its testing of the dummy's knees with the knees adopted in the final rule, that is, *with* the shear module. The agency and GM test results for the knees were nearly identical. These test results show that the addition of the knee shear module did not significantly affect the performance of the knees in testing.

Ford did not offer any explanation of why it believes the changes to the knee, lower leg, and ankle would affect the performance of the Hybrid III dummy during testing. The dummy calibration modifications that were made between the proposal and the final rule simply reduced the complexity and redundancy of the calibration procedures. The available evidence indicates that the only effect on the performance of the Hybrid III as a result of the calibration modifications was to ensure that the test dummy produces more consistent impact responses. Accordingly, NHTSA has not amended the rule in response to Ford's concern.

2. Calibration Requirements

The calibration procedures involve a series of static and dynamic tests of the test dummy components to determine whether the responses of the dummy fall within specified ranges. These calibration procedures help ensure that the test dummy has been properly assembled and that the assembled test dummy will give repeatable and reproducible results during crash testing.

a. *Thorax calibration response requirements.* In its petition, Ford asked NHTSA to revise the thorax calibration specifications to reflect the characteristics of the rib cage structure with the new United McGill rib damping material. NHTSA changed to this new rib damping material after proposing to use a different rib damping material. Ford also indicated that it has experienced some intermittent difficulties in getting its Hybrid III dummies to comply with the thorax calibration requirements. Honda, Volkswagen, and Toyota also indicated they had experienced problems with getting Hybrid III dummies to meet the thorax calibration requirements. These three manufacturers also indicated that they had difficulties obtaining consistent thorax impact responses. GM urged the agency to revise the midpoint of the thorax resistive forces specified in the calibration requirements upwards by 47.5 pounds. GM stated that this increase would more appropriately reflect the range of acceptable responses for newly manufactured Hybrid III test dummies incorporating the new rib damping material.

The agency believes that these petitions raise a legitimate point. NHTSA confirmed in its own testing and testing conducted by the Hybrid III dummy manufacturers that the rib design specification set forth in the final rule is too broad. The dimensional extremes permissible under that specification result in the test dummy's thorax exhibiting excessive impact response variations. During the months of November and December 1986, a series of round robin test were conducted by the two dummy manufacturers and GM to determine what rib steel and damping material combinations would produce the most consistent impact responses, while ensuring biofidelity with the human rib cage. Those tests indicated that a rib steel thickness of 0.080 inches and 0.53 inch thickness of the new rib damping material would yield the most consistent responses and retain biofidelity (NHTSA Docket No. 74–14–N45–027). However, this report also concluded that the calibration force requirements should be adjusted upwards by 80 pounds.

Subsequently, the agency performed a similar series of tests of the rib cages made by both dummy manufacturers, to ensure that rib cages that comply with these new specifications could be calibrated within the higher force levels and that rib cages that comply with these new specifications and that are calibrated at the higher force levels yield consistent impact responses. These tests showed that both dummy manufacturers can produce Hybrid III rib cages well within these new specifications and that both manufacturers' rib cages built to these new specifications gave repeatable and reproducible impact responses. (NHTSA Docket No. 74–14–N45–038).

Therefore, in response to the petitions and these test results, § 572.34(b) is revised to specify that the thorax shall resist a force of 1242.5±82.5 pounds. This is an increase of the midpoint force level by 80 pounds, or about six percent, over the previously specified level. The specifications for rib steel thickness have been narrowed from 0.078±0.002 inch to 0.080±0.001 inch. The specifications for rib damping material thickness are revised from a range of 0.250–0.625 inch to a range of 0.53±0.03 inch. These changes should ensure that the Hybrid III thorax will yield more consistent impact responses.

b. *Knee impact calibration responses.* Ford stated in its petition for reconsideration that the knee impact calibration should be conducted without the lower leg attached. In support of this request, Ford stated that it is hard to accurately measure the required angle specified for the lower leg, using the new lower leg. Additionally, Ford noted that § 572.35(c) requires the use of the new lower leg for knee impact testing, while Figure 24 shows the lower leg that was proposed, but not adopted in the final rule.

The agency was not persuaded by this argument. First, the agency has not encountered any problems in its testing with rotating the leg to the specified angle and maintaining it in the correct orientation. Ford did not explain what specific difficulties it has encountered. Second, removal of the lower leg would require the dummy to be disassembled during the calibration procedures. This would add time and effort to the calibration process with no corresponding benefit. Hence, this suggested change has not been adopted.

Additionally, Ford's suggestion that Figure 24 needs to be revised to show the version of the lower leg adopted in the final rule is not persuasive. The proposed lower leg included instrumentation on the tibia, while the final rule specified a non-instrumented tibia. There were no other differences in the lower leg. Figure 24 merely shows a lower leg, without identifying any particular lower leg by a part number or the like. The identification of the lower leg in § 572.35 correctly identifies the leg assembly with the non-instrumented tibia. Hence, no clarifying amendments are necessary.

Both Ford and GM stated that the knee impact calibration tolerances were overly broad in the final rule. That rule specified a tolerance of ±22 percent, with an acceptable variation of 44 percent (not less than 996 pounds nor more than 1566, with a midpoint of 1281 pounds). Ford stated that potential test variability would be significantly reduced if the range were narrowed to ±10 percent (not less than 1153 pounds nor more than 1409 pounds, with the midpoint remaining at 1281 pounds).

Based on a series of round robin tests between NHTSA and itself, GM also stated that the range of acceptable knee impact force requirements is too broad, expecially when compared with the typical knee impact responses of newly manufactured Hybrid III dummies. GM recommended, based on the round robin testing, that the calibration performance requirements be modified to be not less than 1060 pounds nor more than 1300 pounds. This would lower the midpoint of the acceptable range to 1180 pounds, and would fall within the ± 10 percent tolerance limit suggested by Ford.

After reconsidering this issue, NHTSA agrees with Ford and GM that the knee impact response range specified in the final rule is too broad. The knee response is governed primarily by the flesh covering the knee. It is relatively simple to control the consistency of this flesh when manufacturing new dummies, and relatively simple to replace the flesh on used dummies, when the response falls out of the acceptable calibration range. Based on the round robin testing, this notice adopts GM's suggested calibration range of 1060–1300 pounds. NHTSA and GM testing showed that this range is practicable and relatively simple to attain. This narrower range should also yield more repeatable impact responses from the Hybrid III dummies in crashes.

c. *Conforming Changes to the Drawings and Specifications Package for the Hybrid III Test Dummy.* As a part of the amendments to the calibration specifications and to correct errors in the previous package, NHTSA is making some changes to the drawings and specifications package for the Hybrid III test dummy. These changes consist of the following:

(i) A revised rib thickness specification;

(ii) A revised rib damping material specification;

(iii) A revised rib cage assembly specification (to reflect the changes in (i) and (ii));

(iv) A new abdominal insert specification (to eliminate possible interference by the insert with the lever arm of the chest deflection potentiometer);

(v) A new specification for the pelvis angle during thorax calibration tests; and

(vi) An update of the dummy assembly drawing to reflect these changes.

3. Chest Temperature Sensitivity

The final rule provided that the stabilized temperature of the Hybrid III test dummy is to be between 69 and 72 °F for the Standard No. 208 compliance testing. This narrow temperature range is necessary, because testing has shown that the Hybrid III test dummy's measurements of chest deflection and chest acceleration are temperature sensitive. The agency stated that it believed this temperature range was practicable.

Ford stated that its barrier crash facility cannot maintain the specified temperature range. However, Ford recommended that the temperature range could be broadened because "the new rib damping material will probably exhibit somewhat different temperature sensitivity." Based on this assumption, Ford suggested that the temperature range be broadened by 2 to 5 °F. As an alternative to broadening the temperature range, Ford suggested that this narrow temperature range be applied only to the dummy components that have shown great temperature sensitivity, and that the dummy components that do not exhibit temperature sensitivity should not be subject to tight temperature controls.

According to Mazda's petition for reconsideration, the specified temperature range can only be maintained with separate on-board air conditioning, and such an arrangement would limit the number and variety of tests that were possible. Like Ford, Mazda asserted that the reduced temperature sensitivity of the new rib damping material would permit the agency to expand the permissible temperature range, which Mazda suggested be set at 68 to 76 °F. Honda stated that its test facility could control the temperature within 8 °F and urged that the permissible temperature range be expanded to an 8 °F limit. Volvo stated that the permissible temperature range is practicable, but that it is excessively time consuming and complicated, especially because the test cycle has to be interrupted frequently for various technical reasons unrelated to temperature.

Contrary to the assertions by some of these petitioners, test data available in

the public docket (NHTSA Docket No. 74–14–N39–049) show that the new rib damping material has nearly the identical temperature sensitivity as the damping material it replaces. If the agency were to establish a broader temperature range for the testing, it would introduce excessive variability into the compliance test results. The preamble to the final rule discussed at length the several means that the agency and its contractors have used to maintain the temperature within the specified range (51 FR 26692). In addition, in a submission to the docket, General Motors indicated successful use of temperature normalization factors which a manufacturer may want to use to predict response values at the exact specified mean temperature. NHTSA has concluded that the specified temperature range is practicable and necessary to reduce variability of the test results, so this provision has not been changed in this notice.

4. Dummy Durability

Nissan stated that, in 35 mph sled tests, its Hybrid III test dummy had experienced damage to the neck, rib cage and wrists. Similarly, Volvo stated in its petition for reconsideration that the Hybrid III dummy is less durable in 35 mph impacts than the currently specified test dummy. Additionally, Volvo stated that the thorax needs more frequent replacement in 35 mph impacts than was stated by the agency. In the preamble to the final rule, the agency said that testing had shown that Hybrid III dummies could be used for about 17 crash tests before the ribs must be replaced, and concluded that this level of durability was reasonable. Volvo did not provide any data to support its assertions.

The agency has not examined the durability of the Hybrid III test dummy in 35 mph impact tests. However, the agency does not believe this issue is relevant to the announced use of the Hybrid III test dummy. The final rule specified that the Hybrid III dummy would be used in compliance testing for Standard No. 208, which requires 30 mph impacts. If and when the agency decides to use the Hybrid III dummy in testing for the New Car Assessment Program, which involves 35 mph frontal impacts, the agency will examine the durability of the dummy in 35 mph frontal impacts. Until such a decision is made, NHTSA believes that its resources can be better spent examining other issues related to the Hybrid III test dummy.

During extensive testing in 30 mph impacts conducted for NHTSA and manufacturers, the Hybrid III dummy has demonstrated adequate durability under those conditions (NHTSA Docket No. 74–14–GR–602). To the extent that the durability of the Hybrid III thorax may have been in question, agency testing has shown that Hybrid III test dummies with the new ribs and new rib damping material show minimal changes in force and deflection responses of the thorax after 20 consecutive pendulum impacts. After the 20th impact, the rib cage force and deflection response levels had changed less than 3 percent from the mean responses of the first four impacts. (NHTSA Docket No. 74–14–N45–038). Based on these test results, NHTSA concludes that the Hybrid III test dummy has adequate durability in 30 mph impacts.

5. Changes to the Text of Standard No. 208 and Part 572

Chrysler, Ford, and MVMA all requested the addition of text to sections S7.4.3–S7.4.5 to permit use of the Hybrid III test dummy to test compliance with the comfort and convenience requirements of S7.4. The final rule establishing dynamic testing requirements for light trucks and multipurpose passenger vehicles has already amended section S7.4.4 to permit the use of either type of test dummy for such testing. This notice makes similar changes to sections S7.4.3 and S7.4.5.

Renault asked that Standard No. 208 be clarified as to the question of whether the two dummy types may be used interchangeably in the driver and/or passenger positions. NHTSA has previously concluded that both dummy types yield equivalent safety assessments of vehicles. Therefore, until the time when only the Hybrid III test dummy is used for compliance testing, NHTSA believes manufacturers should be allowed to base their certifications of compliance on the use of either type of test dummy in any combination and in any of the designated seating positions. Language to this effect has been added to Standard No. 208.

Ford also suggested some technical changes to clarify certain parts of Standard No. 208 and Part 572. Ford stated that section S6.2.3 of Standard No. 208 currently provides that, "The resultant acceleration calculated from the thoracic instrumentation * * *" Ford stated that the acceleration is calculated from the output signal of the instrumentation, not from the instrumentation itself, and asked that the language be amended to state that. The agency agrees, and has made this change.

Ford stated that the positive and negative signs had been reversed in § 572.33 (b)(1)(ii) and (b)(2)(ii). This statement is incorrect. According to the sign convention for the output of the Hybrid III transducers referenced in § 572.31(a)(5) and sign conventions adopted by the Society for Automotive Engineers (SAE) Instrumentation Subcommittee, the positive and negative signs were correctly used in the sections questioned by Ford.

Ford also asked that the definition of and references to "time zero" be deleted from § 572.34(b), because the agency had deleted the proposed specifications that thorax load be measured 19 milliseconds after impact and that thorax displacement be measured 25 milliseconds after impact. Because of these deletions, Ford asserted that the references and definition of time zero were unnecessary and potentially misleading. NHTSA agrees with this point, and this rule has amended § 572.34 to delete the reference to "time zero."

Impact Assessments

1. *Economic and Other Impacts.* NHTSA has considered the impacts of this response to the petitions for reconsideration of the final rule on the Hybrid III test dummy and determined that it is neither "major" within the meaning of Executive Order 12291 nor "significant" within the meaning of the Department of Transportation's regulatory policies and procedures. The several technical corrections made by this notice should not significantly affect the cost estimates set forth in the final regulatory evaluation that was prepared in connection with the final rule on the Hybrid III test dummy. Interested persons are referred to that document, which is available in NHTSA Docket No. 74–14, Notice 45. Copies of that regulatory evaluation may be obtained by writing to: NHTSA Docket Section, Room 5109, 400 Seventh Street SW., Washington, DC 20590, or by calling the Docket Section at (202) 366–2992.

The most important changes made in this response to the petitions are the amendment of the chest deflection limit, the delay until September 1, 1990, in using the Hybrid III dummy for compliance testing of vehicles that don't use restraint systems to provide automatic occupant protection, and the suspension of the mandatory effective date for use of the Hybrid III dummy. The amendment of the chest deflection limit for the Hybrid III dummy is necessary to ensure that the adoption of a new compliance test device does not require the redesign of most existing designs of 2-point automatic belt systems. Amending the chest deflection limit to three inches both recognizes the effectiveness of existing 2-point automatic belt systems and avoids unnecessary adverse impacts on any party.

The temporary delay in the use of the Hybrid III test dummy for compliance testing of vehicles that provide automatic occupant protection without using any restraint systems is necessary to allow the agency to further examine its decision to establish the same chest deflection limits for those systems and systems that use either safety belts or air bags. No manufacturer currently certifies any such vehicle design, nor is the agency aware of any plans to certify such a vehicle design before September 1, 1990. Hence, this temporary delay should not adversely affect any person.

The suspension of the effective date for mandatory use of the Hybrid III test dummy is necessary to permit the agency to resolve some remaining technical issues, principally related to chest deflection. The agency does not believe that postponing the mandatory use date for the Hybrid III test will have any adverse impacts on any person. Those manufacturers that wish to certify their vehicles on the basis of testing with the Hybrid III test dummy are permitted to do so. Those manufacturers that wish to certify their vehicles on the basis of testing with the Part 572 Subpart B dummy are also permitted to do so. Once the agency has resolved the outstanding technical issues associated with the Hybrid III test dummy, a new date for the mandatory use of that test dummy in NHTSA's compliance testing will be proposed through the rulemaking process. That rulemaking will consider all the impacts associated with a new mandatory use date.

2. *Regulatory Flexibility Act.* NHTSA has also considered the effects of this regulatory action under the Regulatory Flexibility Act. I hereby certify that this response to the petitions for reconsideration will not have a significant economic impact on a substantial number of small entities. These changes will affect motor vehicle manufacturers, few of which are small entities. As described above, no adverse impacts will be associated with this action. Further, since no price increases will result from this action, small organizations and small governmental entities will not be affected by this action when they purchase new vehicles.

3. *Environmental Impacts.* NHTSA has analyzed this regulatory action for the purposes of the National Environmental Policy Act, and determined that this action will not have a significant impact on the quality of the human environment.

List of Subjects

49 CFR Part 571

Imports, Motor vehicle safety, Motor vehicles.

49 CFR Part 572

Motor vehicle safety.

In consideration of the foregoing, 49 CFR 571.208, *Occupant Crash Protection*, and 49 CFR part 572, *Anthropomorphic Test Dummies*, are amended as follows:

PART 571—[AMENDED]

1. The authority citation for Part 571 continues to read as follows:

Authority: 15 U.S.C. 1392, 1401, 1403, 1407; delegation of authority at 49 CFR 1.50.

§ 571.208 [Amended]

2. S5 of Standard No. 208 is amended by revising S5.1 introductory text and S5.2.1 introductory text to read as follows:

S5. *Occupant crash protection requirements.*

S5.1 Vehicles subject to S5.1 shall comply with either S5.1(a) or S5.1(b), or any combination thereof, at the manufacturer's option; except that vehicles manufactured before September 1, 1990 that comply with the requirements of S4.1.2.1(a) by means not including any type of seat belt or inflatable restraint shall comply with S5.1(a).

* * * * *

S5.2 *Lateral moving barrier crash test.*

S5.2.1 Vehicles subject to S5.2 shall comply with either S5.2.1(a) or S5.2.1(b), or any combination thereof, at the manufacturer's option; except that vehicles manufactured before September 1, 1990 that comply with the requirements of S4.1.2.1(c) by means not including any type of seat belt or inflatable restraint shall comply with S5.2.1(a).

* * * * *

3. S6.2 of Standard No. 208 is amended by revising S6.2.3 and S6.2.4 to read as follows:

S6.2 *Injury Criteria for the Part 572, Subpart E, Hybrid III Test Dummy.*

* * * * *

S6.2.3 The resultant acceleration calculated from the output of the thoracic instrumentation shown in drawing 78051–218, revision R incorporated by reference in Part 572, Subpart E of this chapter shall not exceed 60 g's, except for intervals whose cumulative duration is not more than 3 milliseconds.

S6.2.4 Compression deflection of the sternum relative to the spine, as determined by instrumentation shown in drawing 78051–317, revision A incorporated by reference in Part 572, Subpart E of this chapter, shall not exceed 3 inches.

* * * * *

4. S7.4 of Standard No. 208 is amended by revising S7.4.3 and the first sentence of S7.4.5, to read as follows:

S7.4 *Seat belt comfort and convenience.*

* * * * *

S7.4.3 *Belt contact force.* Except for manual or automatic seat belt assemblies that incorporate a webbing tension-relieving device, the upper torso webbing of any seat belt assembly shall not exert more than 0.7 pounds of contact force when measured normal to and one inch from the chest of an anthropomorphic test dummy, positioned in accordance with either S10 or S11 of this standard in the seating position for which that seat belt assembly is provided, at the point where the centerline of the torso belt crosses the midsagittal line on the dummy's chest.

* * * * *

S7.4.5 *Retraction.* When tested under the conditions of S8.1.2 and S8.1.3, with anthropomorphic test dummies whose arms have been removed and which are positioned in accordance with either S10 or S11, or any combination thereof, in the front outboard designated seating positions and restrained by the belt systems for those positions, the torso and lap belt webbing of any of those seat belt systems shall automatically retract to a stowed position either when the adjacent vehicle door is in the open position and the seat belt latchplate is released, or, at the option of the manufacturer, when the latchplate is released. * * *

* * * * *

PART 572—[AMENDED]

5. The authority citation for Part 572 continues to read as follows:

Authority: 15 U.S.C. 1392, 1401, 1403, 1407; delegation of authority at 49 CFR 1.50.

6. Section 572.31 is amended by revising paragraphs (a)(1), (a)(3), and (b) to read as follows: ((a) introductory text is republished for the convenience of the reader)

§ 572.31 General description.

(a) The Hybrid III 50th percentile size dummy consists of components and assemblies specified in the Anthropomorphic Test Dummy drawing

and specifications package which consists of the following six items:

(1) The Anthropomorphic Test Dummy Parts List, dated December 15, 1987, and containing 13 pages, and a Parts List Index, dated December 15, 1987, containing 8 pages.

* * * * *

(3) A General Motors Drawing Package identified by GM Drawing No. 78051–218, revision R, and subordinate drawings.

* * * * *

(b) The dummy is made up of the following component assemblies:

Drawing No.	Revision
78051–61 head assembly—complete	(T)
78051–90 neck assembly—complete	(A)
78051–89 upper torso assembly—complete.	(K)
78051–70 lower torso assembly—without pelvic.	
Instrumentation assembly, drawing No. 78051–59.	(D)
86–5001–001 leg assembly—complete (LH).	(E)
86–5001–002 leg assembly—complete (RH).	(E)
78051–123 arm assembly—complete (LH).	(D)
78051–124 arm assembly—complete (RH).	(D)

* * * * *

7. Section 572.33 is amended by revising paragraph (b)(1)(i) to read as follows:

§ 572.33 Neck.

* * * * *

(b) * * *

(1) *Flexion.* (i) Plane D, referenced in Figure 20, shall rotate between 64 degrees and 78 degrees, which shall occur between 57 milliseconds (ms) and 64 ms from time zero. In first rebound, the rotation of Plane D shall cross 0 degrees between 113 ms and 128 ms.

* * * * *

8. Section 572.34 is amended by revising paragraphs (a), (b), and (c)(2) to read as follows:

§ 572.34 Thorax.

(a) The thorax consists of the upper torso assembly in drawing 78051–89, revision K and shall conform to each of the drawings subtended therein.

(b) When impacted by a test probe conforming to § 572.36(a) at 22 fps ± 0.40 fps in accordance with paragraph (c) of this section, the thorax of a complete dummy assembly (78051–218, revision R) with left and right shoes (78051–294 and –295) removed, shall resist with a force of 1242.5 pounds ± 82.5 pounds measured by the test probe and shall have a sternum displacement measured relative to spine of 2.68 inches ± 0.18 inches. The internal hysteresis in each impact shall be more than 69% but less than 85%. The force measured is the product of pendulum mass and deceleration.

(c) *Test procedure.* (1) * * *

(2) Seat the dummy without back and arm supports on a surface as shown in Figure 23, and set the angle of the pelvic bone at 13 degrees plus or minus 2 degrees, using the procedure described in S11.4.3.2 of Standard No. 208 (§ 571.208 of this chapter).

* * * * *

9. Section 572.35(b) is revised to read as follows:

§ 572.35 Limbs.

(a) * * *

(b) When each knee of the leg assemblies is impacted, in accordance with paragraph (c) of this section, at 6.9 ft/sec ±0.10 ft/sec by the pendulum defined in § 572.36(b), the peak knee impact force, which is a product of pendulum mass and acceleration, shall have a minimum value of not less than 1060 pounds and a maximum value of not more than 1300 pounds.

* * * * *

10. Section 572.36 is amended by revising paragraphs (b), (c), (d), (e), (f), and (h) to read as follows:

§ 572.36 Test conditions and instrumentation.

* * * * *

(b) Test probe used for the knee impact tests is a 3 inch diameter cylinder that weights 11 pounds including instrumentation. Its impacting end has a flat right angle face that is rigid and has an edge radius of 0.02 inches. The test probe has an accelerometer mounted on the end opposite from impact with its sensitive axis colinear to the longitudinal centerline of the cylinder.

(c) Head accelerometers shall have dimensions, response characteristics, and sensitive mass locations specified in drawing 78051–136, revision A or its equivalent and be mounted in the head as shown in drawing 78051–61, revision T, and in the assembly shown in drawing 78051–218, revision R.

(d) The neck transducer shall have the dimensions, response characteristics, and sensitive axis locations specified in drawing 83–5001–008 or its equivalent and be mounted for testing as shown in drawing 79051–63, revision W, and in the assembly shown in drawing 78051–218, revision R.

(e) The chest acclerometers shall have the dimensisons, response characteristics, and sensitive mass locations specified in drawing 78051–136, revision A or its equivalent and be mounted as shown with adaptor assembly 78051–116, revision D for assembly into 78051–218, revision R.

(f) The chest deflection transducer shall have the dimensions and response characteristics specified in drawing 78051–342, revision A or equivalent and be mounted in the chest deflection transducer assembly 78051–317, revision A for assembly into 78051–218, revision R.

* * * * *

(h) The femur load cell shall have th dimensions, response characteristics, and sensitive axis locations specified in drawing 78051–265 or its equivalent and be mounted in assemblies 78051–46 and –47 for assembly into 78051–218, revision R.

* * * * *

Issued on March 11, 1988.

Diane K. Steed,

Administrator.

[FR Doc. 88–5828 Filed 3–14–88; 4:06 pm]

BILLING CODE 4910–59–M

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

50 CFR Part 14

Humane and Healthful Transport of Wild Mammals and Birds to the United States.

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Final rule; Supplement.

SUMMARY: On February 4, 1988, the Fish and Wildlife Service (Service) determined that it was necessary to delay the effective date of a final rule with regard to transport of wild animals from February 8, 1988, to August 1, 1988. This notice provides further information regarding the reasons for the Service's decision.

FOR FURTHER INFORMATION CONTACT: Mr. Marshall P. Jones, Acting Chief, Office of Management Authority, U.S. Fish and Wildlife Service, P.O. Box 27329, Washington, DC 20038–7329, telephone (202) 343–3968.

SUPPLEMENTARY INFORMATION: On February 10, 1988, the Service published a rule (53 FR 3894) delaying the effective date of its previously-published final rule on humane and healthful transport of wild animals and birds to the United States (52 FR 43274). While the February 10 rule sought comments relating to the content of the rule and possible interpretation or amendment thereof, it did not seek comments relating to the decision to delay the effective date. The

VOL 53
ISS 52
MR 17
1988
MI

Service wishes to clarify that it did not seek comments on the decision to delay the earlier final rule for good cause, as further explained herein. The decision not to seek comment was made for the following reasons:

(1) Comments received during January 1988, indicated substantial public confusion over implementation of the rule, and areas of potentially serious ambiguity. The Service's Law Enforcement division indicated its belief that, under these conditions, the rule could not be strictly enforced.

(2) These comments also indicated a risk that the confusion resulting from the final rules might actually result in harm or inhumane treatment to certain species.

(3) These comments indicated substantial reason to believe that certain sections might impose unnecessary hardship on the wildlife transportation and importation industries, or contained ambiguities which needed interpretation in order to comply. The Service received no comments specifically arguing that the final rule would impose a significant economic effect on a substantial number of small entities, as defined in the Regulatory Flexibility Act, 5 U.S.C. 601 *et seq*. However, some comments did indicate that small businesses and organizations might have had unanticipated adverse effects if the rules were allowed to go into effect. Such hardships, if avoidable, are not the intent of the Service and would be contrary to the goals of the cited Act.

(4) The final rule had diverged in certain respects from the proposed rule, based on new information which had become available during the comment period. The Service had determined that these changes were not of sufficient magnitude to require a new proposed rule. The information and requests subsequently submitted to the Service, however, have provided some new information indicating there might be a need not originally foreseen for reopening the rules for additional comment.

(5) The approaching effective date left no time to seek comment on the advisability of delaying the rules. The indications of problems in those rules were received by the Service over a timespan from January 4 to January 27. The final rule's effective date would have been February 8, 1988. No time remained in which to seek comment.

(6) In light of these considerations, it appeared appropriate to seek remedy for these problems through reopening of the comment period for 30 days, to be immediately followed by a review and analysis of needs for clarification of ambiguous sections, and preparation of revisions to other sections if necessary. In any event, the Service judged that the final regulations could take effect by August 1, 1988. While this delay of six months is regrettable, it is in the Service's view a necessary course of action to use this period to ensure that all provisions of the regulations are necessary, enforceable, effective, and consistent with all applicable laws.

For all the above reasons, the Service has concluded good cause existed to give immediate effect to this action, and that notice and public comment procedures would have been, and remain impracticable and contrary to the public interest. As indicated in its February 10, 1988, notice, the Service will consider comments relating to interpretation and improvement of the November 10, 1988, rule received through March 11, 1988, with the intent of putting in place regulations with an effective date of August 1, 1988.

Dated: March 11, 1988.

Susan Recce,

Acting Assistant Secretary for Fish and Wildlife and Parks.

[FR Doc. 88-5811 Filed 3-16-88; 8:45 am]

BILLING CODE 4310-55-M

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

50 CFR Part 380

[Docket No. 70998-7198]

Antarctic Marine Living Resources Convention Act of 1984

AGENCY: National Marine Fisheries Service (NMFS), NOAA, Commerce.

ACTION: Final rule.

SUMMARY: The Secretary of Commerce (Secretary) issues this final rule to implement the Antarctic Marine Living Resources Convention Act of 1984 (Act) which provides the legislative authority for United States implementation of the provisions of the Convention on the Conservation of Antarctic Marine Living Resources (Convention). The Convention establishes international mechanisms and creates legal obligations necessary for the protection and conservation of Antarctic marine living resources. Under the provisions of the Convention and the Act most of this rule is already in force with respect to U.S. citizens and nationals.

EFFECTIVE DATE: March 17, 1988.

FOR FURTHER INFORMATION CONTACT: Robin Tuttle (International Science, Development and Polar Affairs 202-673-5302).

SUPPLEMENTARY INFORMATION: Concern regarding the conservation of Antarctic marine living resources expressed by the Consultative Parties at the Ninth Consultative Meeting of the Antarctic Treaty, in 1977, and the importance of the provisions of Recommendation IX-2 led to the establishment of the Convention on the Conservation of Antarctic Marine Living Resources in 1980. The Convention applies to Antarctic marine living resources (those finfish, mollusks, crustacea, and all other species of living organisms, including birds, found in the area south of the Antarctic Convergence [1]). The objective of the Convention is conservation of Antarctic marine living resources. Any harvesting and associated activities in the area covered by the Convention must be conducted within the following principles of conservation established by the Convention:

(a) Prevention of decrease in the size of any harvested population to levels below those which ensure its stable recruitment (for this purpose its size should not be allowed to fall below a level close to that which ensures the greatest net annual increment);

(b) Maintenance of the ecological relationships between harvested, dependent, and related populations of Antarctic marine living resources, and the restoration of depleted populations to the levels defined in (a) above; and

(c) Prevention of changes or minimization of the risk of changes in the marine ecosystem which are not potentially reversible over two or three decades, taking into account the state of available knowledge of the direct and indirect impact of harvesting, the effect of the introduction of alien species, the effects of associated activities on the marine ecosystem, and the effects of environmental changes, with the aim of making possible the sustained conservation of Antarctic marine living resources.

The United States is a Contracting Party to the Convention, as well as a member of the Commission for the Conservation of Antarctic Marine Living Resources (Commission), established by the Convention. The function of the Commission is to give effect to the objective and principles of the Convention.

Article IX prescribes the procedures for the formulation, adoption and revision of conservation measures by the Commission. After adoption of measures the Commission must notify all of its members of the adopted measures. Conservation measures become binding upon all Commission members 180 days after the notification, unless a Commission member notifies the Commission within 90-days following such notification that it is unable to accept the conservation measure in whole or in part.

By the terms of a memorandum of understanding between the Department of Commerce, the Department of State and the National Science Foundation, the Department of State will, effective with the 1987 meeting of the Commission, coordinate Federal and public review within the 90-day period of all future conservation measures adopted by the Commission. This will permit public participation, through response to **Federal Register** notices, in U.S. decisions on whether or not to accept and be bound by conservation measures.

On November 8, 1984, the President of the United States signed the Antarctic Marine Living Resources Convention Act of 1984 (16 U.S.C. 2431 *et seq.*, the Act). The Act provides the legislative authority necessary to implement the Convention with respect to the United States.

The Secretary, after consultation with the Secretary of State, the Secretary of the department in which the Coast Guard is operating, and the heads of other appropriate departments or agencies of the United States promulgates this rule to implement and publish certain requirements under the Convention and provisions of the Act. This rule establishes a new Part 380 in Title 50 of the Code of Federal Regulations. Subpart B of this new part contains the conservation measures adopted by the Commission at its September 1984, 1985, and 1986 meetings. The United States has agreed to these measures and is bound by Article IX of the Convention to implement them. Under the Convention and the Act, they are in force with respect to U.S. citizens and nationals. Subpart B also contains an incidental catch limit on the take of *Notothenia rossii* (marbled rockcod) around the Kerguilen Islands (Statistical subarea 58.5) which was strongly recommended by the Commission for conservation reasons. This is being implemented immediately without a opportunity for comment because of this recommendation. Subpart A of this new part contains a purpose-and-scope section and a definitions section which support Subpart B.

The balance of Subpart A is reserved for proposed gear and vessel identification, permit, recordkeeping and other requirements to give effect to these conservation measures and other provisions of the Act and the Convention. As is explained in an accompanying proposed rule, public comment will be considered prior to implementing them as a final rule. (See the notice of proposed rulemaking elsewhere in this part of today's **Federal Register.**)

The final rule, and the rule issued after analysis of comments on the proposed rule, will regulate the harvest of Antarctic marine living resources and other associated activities by a person subject to the jurisdiction of the United States, and the importation into the United States of any Antarctic marine living resource. The proposed rule would require any person who harvests, by reducing to possession or attempting to reduce to possession any Antarctic marine living resource, to obtain a permit from NMFS or to obtain a permit from the National Science Foundation (NSF) for such activity. It also would require that any importation of Antarctic marine living resources into the United States must be accompanied by either an NMFS harvesting permit, an NSF permit to harvest or import, or an NMFS import permit covering those resources. A person operating under an NMFS permit must submit an accurate and complete reporting form required by the permit. The proposed rule also includes requirements related to enforcement similar to those for other fisheries under Federal management.

In order to notify the public of convention measures in effect under the terms of the Convention and the Act, and to implement some of them more specifically, this final rule (1) identifies all waters within 12 miles of South Georgia Island as closed to any harvesting; and (2) specifies that the use of certain mesh sizes in pelagic and bottom trawls for several Antarctic finfishes in prohibited. The Commission adopted, and the United States accepted, conservation measures that prohibit directed fishing for *Notothenia rossii* in statistical subareas 48.1, 48.2 and 48.3, and that require that the by-catches of *N. rossii* in these areas be kept to the level allowing the optimum recruitment to the stock. NMFS is implementing this in § 380.22 by setting catch limits in those areas, that is by limiting to one percent of the catch (by weight) the amount of *N. rossii* that can be taken from those areas. The Commission recommended that consultative parties to the Commission adopt identical measures to govern fishing in statistical subarea 58.5. The United States is therefore setting a catch limit for statistical subarea 58.5. The management measures in Subpart B do not apply to scientific research.

The Commission is currently considering a system of observation and inspection as provided for in Article XXIV of the Convention. When the system is established (See 16 U.S.C. 2434 (b)), and appropriate provision will be added to Part 380.

Classification

The Assistant Administator for Fisheries, NOAA (Assistant Administrator) prepared an environmental assessment (EA) for both this rule and the proposed rule under Executive Order 12114 and the Administrator concluded that there will be no significant impact on the environment as a result of this rule. A copy of the EA may be obtained from the Assistant Administator (See **ADDRESSES** section in the proposed rule for Part 380 published in this same issue of the **Federal Register**).

Under the terms of the Convention and the Act, the closed area of § 380.20, the mesh restrictions of § 380.21, and the catch restriction for subareas 48.1, 48.2 and 48.3 (found in § 380.22) are currently in effect. The Commission has recommended that the catch restriction of subarea 58.5 be implemented immediately to protect *Notothenia rossii* from over-exploitation. The Administrator therefore decided to implement that restriction, without an opportunity for public comment, by including it also in § 380.22. Furthermore, a statement of purpose and scope, and definitions of terms used in Subpart B (§§ 380.20–380.23) have been adopted now as §§ 380.1 and 380.2 of Subpart A. Because implementation of these measures is a foreign affairs function, section 553 of the Administrative Procedure Act does not apply.

Implementation of the remainder of this rule (§§ 380.3–380.11 of Subpart A) is also a foreign affairs function and therefore exempt from section 553 of the Administative Procedure Act. However, the Secretary has decided that this portion of the rule does not need to be implemented immediately and that the public should be provided the opportunity to comment on it. Therefore, the public is provided a 45-day comment period on the measures found in §§ 380.3–380.11 of Subpart A.

---

[1] The latitude of the Antarctic Convergence varies at different points of longitude from 45° to 60° S. latitude.

VOL 53 ISS 52 MR 17 1988 MI

This action is exempt from Executive Order 12291 because it involves a foreign affairs function of the United States. Because notice and comment rulemaking is not required for this rule, the Regulatory Flexibility Act does not apply; therefore, a regulatory flexibility analysis has not been prepared.

At present there are no U.S. vessels or vessels subject to the jurisdiction of the United States harvesting Antarctic marine living resources within the area to which these regulations apply, except for research purposes. Presently, the only Antarctic resources affected are scientific specimens taken under NSF permits. Accordingly, these regulations should not have an incremental economic impact of U.S. vessels harvesting or performing associated activities in the Convention area.

As the Commission for the Conservation of Antarctic Marine Living Resources adopts additional management measures which govern the harvesting of Antarctic marine living resources, and where such measures are considered for acceptance by the United States, there will be an opportunity to assess the economic impacts of each proposed measure.

The provisions of Part 380 put into immediate effect by this final rule contain no collection-of-information requirement subject to the Paperwork Reduction Act.

This final rule does not contain policies with federalism implications sufficient to warrant preparation of a federalism assessment under Executive Order 12612.

List of Subjects in 50 CFR Part 380

Antarctic, Fish and wildlife, Reporting and recordkeeping requirements.

Dated: March 14, 1988.

James E. Douglas, Jr.,

Deputy Assistant Administrator For Fisheries, National Marine Fisheries Service.

For the reasons set out in the preamble, Chapter III of Title 50, Code of Federal Regulations, is amended by adding a new Subchapter D consisting of Part 380 to read as follows:

SUBCHAPTER D—CONVENTION FOR THE CONSERVATION OF ANTARCTIC MARINE LIVING RESOURCES

PART 380—ANTARCTIC MARINE LIVING RESOURCES CONVENTION ACT OF 1984

Subpart A—General Provisions

Sec.
380.1 Purpose and scope.
380.2 Definitions.
380.3 Relationship to other treaties and laws. [Reserved]
380.4 Harvesting permits. [Reserved]
380.5 Import permits. [Reserved]
380.6 Reporting and recordkeeping requirements. [Reserved]
380.7 Vessel and gear identification. [Reserved]
380.8 Facilitation of enforcement. [Reserved]
380.9 Gear disposal. [Reserved]
380.10 Prohibitions. [Reserved]
380.11 Penalties. [Reserved]

Subpart B—Management Measures

380.20 Closed area.
380.21 Mesh size.
380.22 Catch restrictions.
380.23 Scientific research.

Authority: 16 U.S.C. 2431 *et seq.*

Subpart A—General Provisions

§ 380.1 Purpose and scope.

(a) The purpose of this part is to conserve and protect the Antarctic marine living resources and to implement the Antarctic Marine Living Resources Convention Act of 1984.

(b) This part regulates—

(1) The harvesting of Antarctic marine living resources or other associated activities by any person subject to the jurisdiction of the United States,

(2) The harvesting of Antarctic marine living resources or other associated activity by any vessel of the United States, and

(3) The importation into the United States of any Antarctic marine living resource.

§ 380.2 Definitions.

The terms used in this part have the following meanings:

Act means the Antarctic Marine Living Resources Convention Act of 1984 (16 U.S.C. 2431 *et seq.*).

Antarctic Convergence means a line joining the following points along the parallels of latitude and meridians of longitude:

Latitude	Longitude
50 °S	0.
50 °S	30 °E.
45 °S	30 °E.
45 °S	80 °E.
55 °S	80 °E.
55 °S	150 °E.
60 °S	150 °E.
60 °S	50 °W.
50 °S	50 °W.
50 °S	0

Antarctic finfishes include the following:

Scientific name	Common name.
Notothenia gibberifrons	Humped rockcod.
Notothenia rossii	Marbled rockcod.
Notothenia squamifrons	Grey rockcod.
Dissostichus eleginoides	Patagonian toothfish.
Patagonothen brevicauda guntheri.	Patagonian rockcod.
Pleuragramma antarcticum.	Antarctic silverfish.
Trematomus spp	Antarctic cods.
Chaenocephalus aceratus.	Blackfin icefish.
Chaenodraco wilsoni	Spiny icefish.
Champsocephalus gunnari.	Mackerel icefish.
Chionodraco rastrospinosus.	Ocellated icefish.
Pseudochaenichthys georgianus.	South Georgia icefish.

Antarctic marine living resources means the populations of finfish, mollusks, crustaceans, and all other species of living organisms, including birds, found south of the Antarctic Convergence, and their parts or products.

Assistant Administrator means the Assistant Administrator for Fisheries, National Oceanic and Atmospheric Administration, Washington, DC 20235, or a designee. *Address:* National Marine Fisheries Service, Washington, DC 20235.

Authorized officer means

(a) Any commissioned, warrant, or petty officer of the U.S. Coast Guard;

(b) Any special agent of the National Marine Fisheries Service;

(c) Any officer designated by the head of any Federal or State agency which has entered into an agreement with the Secretary and the Commandant of the U.S. Coast Guard to enforce the provisions of the Act; or

(d) Any U.S. Coast Guard personnel accompanying and acting under the direction of any person described in paragraph (a) of this definition.

Commission means the Commission for the Conservation of Antarctic Marine Living Resources established under Article VII of the Convention.

Convention means the Convention on the Conservation of Antarctic Marine Living Resources, done at Canberra, Australia, May 7, 1980, and entered into force with respect to the United States on April 7, 1982.

Convention waters means all waters south of the Antarctic Convergence.

Directed fishing with respect to any species or stock of fish, means any fishing that results in such fish comprising more than one percent by weight, at any time, of the catch on board the vessel.

Fish means finfish, mollusks, and crustaceans.

Fishing means

(a) The catching or taking of fish;

(b) The attempted catching or taking of fish;

(c) Any other activity which can reasonably be expected to result in the catching or taking of fish; or

(d) Any operations at sea in support of, or in preparation for, any activity described in paragraphs (a) through (c) of this definition.

Harvest means to engage in harvesting or other associated activities.

Harvesting or other associated activities means

(a) The harassing, molesting, harming, pursuing, hunting, shooting, wounding, killing, trapping, or capturing of Antarctic marine living resources;

(b) Attempting to engage in any activity set forth in paragraph (a) of this definition;

(c) Any other activity which can reasonably be expected to result in any activity described in paragraph (a); and

(d) Any operations at sea in support of, or in preparation for, any activity described in paragraphs (a) through (c) of this definition.

Harvesting vessel means any vessel of the United States (this includes any boat, ship, or other craft), which is used for, equipped to be used for, or of a type which is normally used for harvesting.

IRCS means International Radio Call Sign.

Import means to land on; bring into, or introduce into, or attempt to land on, bring into, or introduce into, any place subject to the jurisdiction of the United States, whether or not such landing constitutes an importation within the meaning of the customs laws of the United States.

Individual permit means an NSF permit issued under 45 CFR Part 670; or an NSF award letter (demonstrating that the individual has received an award from NSF to do research in the Antarctic); or a marine mammal permit issued under 50 CFR 216.31; or an endangered species permit issued under 50 CFR 222.21.

Land or landing means to begin offloading any fish, to arrive in port with the intention of offloading any fish, or to cause any fish to be offloaded.

NMFS means National Marine Fisheries Service, National Oceanic and Atmospheric Administration, Department of Commerce.

NSF means National Science Foundation.

Person means an individual, partnership, corporation, trust, association, or any other entity subject to the jurisdiction of the United States.

Recreational fishing means fishing with hook and line for personal use and not for sale.

Scientific Committee means the Scientific Committee for the Conservation of Antarctic Marine Living Resources established under Article XIV of the Convention.

Scientific research activities means any activity for which a person has a permit from NMFS under 50 CFR 216.31 or an award letter from NSF or a permit from the NSF under 45 CFR Part 670. Scientific research activities may also include harvesting or other associated activities if such activities are designated as scientific research activities by the Assistant Administrator.

Vessel of the United States means

(a) A vessel documented under chapter 121, title 46, United States Code, or a vessel numbered as provided in chapter 123 of that title;

(b) A vessel owned in whole or part by

(1) The United States or a territory, commonwealth, or possession of the United States;

(2) A State or political subdivision thereof;

(3) A citizen or national of the United States; or

(4) A corporation created under the laws of the United States or any State, the District of Columbia, or any territory, commonwealth, or possession of the United States; unless the vessel has been granted the nationality of a foreign nation in accordance with Article 5 of the 1958 Convention on the High Seas; and

(c) A vessel that was once documented under the laws of the United States and, in violation of the laws of the United States, was either sold to a person not a citizen of the United States or placed under foreign registry or a foreign flag, whether or not the vessel has been granted the nationality of a foreign nation in accordance with Article 5 of the 1958 Convention on the High Seas.

Vessel subject to the jurisdiction of the United States includes a vessel without nationality or a vessel assimilated to a vessel without nationality, in accordance with paragraph (2) of Article 6 of the 1958 Convention on the High Seas.

§ 380.3 Relationship to other treaties and laws. [Reserved]

§ 380.4 Harvesting permits. [Reserved]

§ 380.5 Import permits. [Reserved]

§ 380.6 Reporting and recordkeeping requirements. [Reserved]

§ 380.7 Vessel and gear identification. [Reserved]

§ 380.8 Facilitation of enforcement. [Reserved]

§ 380.9 Gear disposal. [Reserved]

§ 380.10 Prohibitions. [Reserved]

§ 380.11 Penalties. [Reserved]

Subpart B—Management Measures

§ 380.20 Closed area.

Fishing is prohibited in waters within 12 nautical miles of South Georgia.

§ 380.21 Mesh size.

(a) The use of pelagic and bottom trawls having the mesh size in any part of a trawl less than indicated is prohibited for any directed fishing for the following Antarctic finfishes:

(1) *Notothenia rossii* and *Dissostichus eleginoides*—120 mm; and

(2) *Notothenia gibberifrons, N. kempi, N. squamifrons* and *Champsocephalus gannari*—80 mm.

(b) Any means or device which would reduce the size or obstruct the opening of the meshes is not allowed.

(c) The following procedure will be used for assessing a mesh violation.

(1) Description of gauges.

(i) Gauges for determining mesh sizes will be 2 millimeters (mm) thick, flat, of durable material and capable of retaining their shape. They may have either a series of parallel-edged sides connected by intermediate tapering edges with a taper of one to eight on each side, or only tapering edges with the taper defined above. They will have a hole at the narrowest extremity.

(ii) Each gauge will be inscribed on its face with the width in millimeters both on the parallel-sided section, if any, and on the tapering section. In the case of the latter, the width will be inscribed every 1 mm interval, but the indication of the width may appear at regular intervals other than 1 mm.

(2) Use of the gauge.

(i) The net will be stretched in the direction of the long diagonal of the meshes.

(ii) A gauge as described in paragraph (c)(1) of this section will be inserted by its narrowest extremity into the mesh opening in a direction perpendicular to the plane of the net.

VOL. 53 ISS 52 MR 17 1988 UMI

(iii) The gauge may be inserted into the mesh opening either with a manual force or using a weight or dynamometer, until it is stopped at the tapering edges by the resistance of the mesh.

(3) Selection of meshes to be measured.

(i) Meshes to be measured will form a series of 20 consecutive meshes chosen in the direction of the long axis of the net, except that the meshes to be measured need not be consecutive if the application of paragraph (c)(3)(ii) of this section prevents it.

(ii) Meshes less than 50 cm from lacings, ropes, or codline will not be measured. This distance will be measured perpendicular to the lacings, ropes or codline with the net stretched in the direction of that measurement. No mesh will be measured which has been mended or broken or has attachments to the net fixed at that mesh.

(iii) Nets will be measured only when wet and unfrozen.

(4) The measurement of each mesh will be the width of the gauge at the point where the gauge is stopped, when using this gauge in accordance with paragraph (c)(2) of this section.

(5) Determination of the mesh size of the net will be the arithmetical mean in millimeters of the measurements of the total number of meshes selected and measured as provided for in paragraphs (c) (3) and (4) of this section, the arithmetical mean being rounded up to the next millimeter.

(6) Inspection procedure.

(i) One series of 20 meshes, selected in accordance with paragraph (c)(3) of this section, will be measured by inserting the gauge manually without using a weight or dynamometer. The mesh size of the net will then be determined in accordance with paragraph (c)(5) of this section. If the calculation of the mesh size shows that the mesh size does not appear to comply with the rules in force, then two additional series of 20 meshes selected in accordance with paragraph (c)(3) of this section will be measured. The mesh size will then be recalculated in accordance with paragraph (c)(5) of this section, taking into account the 60 meshes already measured; this recalculation will be the mesh size of the net.

(ii) If the captain of the vessel contests the mesh size determined in accordance with paragraph (c)(6)(i) of this section such measurement will not be considered for the determination of the mesh size and the net will be remeasured.

(A) A weight or dynamometer attached to the gauge will be used for remeasurement. The choice of weight or dynamometer is at the discretion of the inspectors. The weight will be fixed to the hole in the narrowest extremity of the gauge using a hook. The dynamometer may either be fixed to the hole in the narrowest extremity of the gauge or be applied at the largest extremity of the gauge.

(B) The accuracy of the weight or dynamometer must be certified by the appropriate national authority.

(C) For nets of a mesh size of 35 mm or less as determined in accordance with paragraph (c)(6)(i) of this section, a force of 19.61 newtons (equivalent to a mass of 2 kilograms) will be applied, and for other nets, a force of 49.03 newtons (equivalent to a mass of 5 kilograms).

(D) For the purposes of determining the mesh size in accordance with paragraph (c)(5) of this section, when using a weight or dynamometer, one series of 20 meshes only will be measured.

§ 380.22 Catch restrictions.

The catch limit for *N. rossii* is one percent of all Antarctic finfishes on board a vessel fishing in subareas 48.1, 48.2, 48.3, and 58.5 (see Figure 1).

BILLING CODE 3510-22-M

Proposed Rules

Federal Register
Vol. 53, No. 52
Thursday, March 17, 1988

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

DEPARTMENT OF THE TREASURY

Internal Revenue Service

26 CFR Part 1

[LR-28-88]

Consolidated Return Regulations

AGENCY: Internal Revenue Service, Treasury.

ACTION: Notice of proposed rulemaking by cross-reference to temporary regulations.

SUMMARY: In the Rules and Regulations portion of this issue of the **Federal Register**, the Internal Revenue Service is issuing temporary regulations that add new § 1.1502-32T to the consolidated return regulations. Section 1.1502-32T supplements the adjustment under § 1.1502-32(g) on the disposition by a member of stock of a subsidiary. The text of the new temporary regulations also serves as the comment document for this notice of proposed rulemaking.

DATES:

Proposed Effective Dates

The final regulations under section 1502 are proposed to be effective for stock of a subsidiary that ceases to be a member of an affiliated group filing a consolidated return during a taxable year of the group ending after November 30, 1987. A member may elect to apply the new rules to stock not otherwise covered by such rules if the stock is disposed of in a taxable year ending after November 30, 1987.

Dates for Comments and Requests for a Public Hearing

Written comments and requests for a public hearing must be delivered or mailed by May 16, 1988.

ADDRESS: Send comments and requests for a public hearing to: Commissioner of Internal Revenue, Attention: CC:LR:T [LR-28-88], Washington, DC 20224.

FOR FURTHER INFORMATION CONTACT: Judith C. Winkler of the Legislation and Regulations Division, Office of the Chief Counsel, Internal Revenue Service, 1111 Constitution Avenue NW., Washington, DC 20224 (Attention: CC:LR:T) or telephone 202-566-3458 (not a toll-free number).

SUPPLEMENTARY INFORMATION:

Background

Temporary regulations published in the Rules and Regulations portion of this issue of the **Federal Register** add new temporary regulations § 1.1502-32T to Part 1 of Title 26 of the Code of Federal Regulations ("CFR"). Final regulations are proposed to be based on the new temporary regulations. The final regulations generally would require a member of an affiliated group filing a consolidated return to reduce its basis in the stock of a disaffiliated subsidiary when the disaffiliated subsidiary distributes its earnings and profits. For the text of the new temporary regulations, see T.D. 8188 published in the Rules and Regulations portion of this issue of the **Federal Register**. The preamble to the temporary regulations explains the additions to the regulations.

Executive Order 12291 and Regulatory Flexibility Act

The Commissioner of Internal Revenue has determined that this proposed rule is not a major rule as defined in Executive Order 12291 and that a Regulatory Impact Analysis is therefore not required. Furthermore, the Secretary of the Treasury has certified that this rule, if issued, will not have a significant economic impact on a substantial number of small entities. The rule applies only to affiliated groups of corporations that have elected to file consolidated returns, which tend to be larger businesses. It would not significantly alter the reporting or recordkeeping duties of small entities. A regulatory flexibility analysis is therefore not required under the Regulatory Flexibility Act (5 U.S.C. chapter 6).

Comments and Request for a Public Hearing

Before these proposed regulations are adopted, consideration will be given to any written comments that are submitted (preferably eight copies) to the Commissioner of Internal Revenue. All comments will be available for public inspection and copying. A public hearing will be held upon written request to the Commissioner by any person who has submitted written comments. If a public hearing is held, notice of the time and place will be published in the **Federal Register**.

The collection of information requirements contained herein have been submitted to the Office of Management and Budget (OMB) for review under section 3504 (h) of the Paperwork Reduction Act. Comments on the requirements should be sent to the Office of Information and Regulatory Affairs of OMB, Attention: Desk Officer for Internal Revenue Service, New Executive Office Building, Washington, DC 20503. The Internal Revenue Service requests persons submitting comments to OMB to also send copies of the comments to the Service.

Drafting Information

The principal author of these proposed regulations is Judith C. Winkler of the Legislation and Regulations Division of the Office of Chief Counsel, Internal Revenue Service. However, other personnel of the Internal Revenue Service and Treasury Department participated in developing the regulations, on matters of both substance and style.

Lawrence B. Gibbs,
Commissioner of Internal Revenue.

BILLING CODE 4830-01-M

DEPARTMENT OF TRANSPORTATION

Coast Guard

33 CFR Part 110

[CGD11-88-01]

Anchorage Ground; San Francisco Bay, CA

AGENCY: Coast Guard, DOT.

ACTION: Notice of proposed rulemaking.

SUMMARY: The Coast Guard is considering a proposal to amend Anchorage 7 in San Francisco Bay by moving the southeastern corner of the anchorage 230 yards to the north. The shifting of the boundary would prevent damage from anchoring vessels to an existing submarine power cable and a newly installed fiber optic telecommunications cable. This would reduce the southern reaches of the anchorage in the shallow waters off Treasure Island.

DATES: Comments must be received on or before May 2, 1988.

ADDRESSES: Comments should be mailed to Commander(oan), Eleventh Coast Guard District, Union Bank Building, Rm. 701, 400 Oceangate, Long Beach, CA 90822. The comments and other materials references in this notice will be available for inspection and copying at Commander, Eleventh Coast Guard District, Office of Aids to Navigation, Room 701, 400 Oceangate, Long Beach, CA 90822. Normal office hours are between 7:30 a.m. and 4:00 p.m., Monday through Friday, except holidays. Comments may also be hand-delivered to this address.

FOR FURTHER INFORMATION CONTACT: Lieutenant Junior Grade Michael Lodge, Office of Aids to Navigation, Eleventh Coast Guard District, 400 Oceangate, Long Beach, CA 90822. Phone number: (213) 499–5410.

SUPPLEMENTARY INFORMATION: Interested persons are invited to participate in this rulemaking by submitting written views, data or arguments. Persons submitting comments should include their names and addresses, identify this notice [CCGD11–88–01] and the specific section of the proposal to which their comments apply, and give reasons for each comment. The regulations may be changed in light of comments received. All comments received before the expiration of the comment period will be considered before final action is taken on this proposal. No public hearing is planned, but one may be held if written requests for a hearing are received and it is determined that the opportunity to make oral presentations will aid the rulemaking process.

Drafting Information

The drafters of this notice are Lieutenant Junior Grade Michael Lodge, project officer, and Lieutenant Commander A.E. Brooks, project attorney, Eleventh Coast Guard District Legal Office.

Discussion of Proposed Regulation

The Twelfth Coast Guard District, dis-established and combined with the Eleventh Coast Guard District on 1 July 1987 (FR 21 April 1987 pg. 13082), proposed changes to Anchorage number 7 (FR 9 April 1987 pg. 11512). No comments had been received. Action had not been taken on this proposal prior to the District change. The proposal under docket CGD12–87–02 is withdrawn. However, under the authority of the Commander, Eleventh Coast Guard District, it is again proposed for the reasons stated below.

Anchorage No. 7 primarily exists for the temporary anchorage of commercial vessels for up to 12 hours duration. After that the vessel would proceed to either a pier facility or an alternative anchorage ground. The anchorage presently has a submarine power cable transversing the southeastern corner. In addition, the Coast Guard has been advised that AT&T has laid a Fiber Optics cable across San Francisco Bay between Oakland and San Francisco alongside the existing power cable. To prevent the possibility of damage to those cables from the anchoring of vessels, the southern boundary of Anchorage No. 7 would be pivoted approximately 230 yards north along Treasure Island. This change would have minimal impact on vessel anchorage since the area eliminated is infrequently used due to its shallow depth.

Economic Assessment and Certification

These proposed regulations are considered to be non-major under Executive Order 12291 on Federal Regulation and non-significant under Department of Transportation regulatory policies and procedures (44 FR 11034; February 26, 1979). The economic impact of this proposal is expected to be so minimal that a full regulatory evaluation is unnecessary. This proposal will have minor impact because the small area being deleted is seldom used due to limited depth of water.

Since the impact of this proposal is expected to be minimal, the Coast Guard certifies that, if adopted, it will not have a significant economic impact on a substantial number of small entities.

Anchorage grounds.

Proposed Regulations

In consideration of the foregoing, the Coast Guard proposes to amend Part 110 of Title 33 Code of Federal Regulations as follows:

PART 110—[AMENDED]

1. The authority citation for Part 110 continues to read as follows:

Authority: 33 U.S.C. 471, 2030, 2035 and 2071; 49 CFR 1.46 and 33 CFR 1.05–1(g). Section 110.1a and each section listed in 110.1a are also issued under 33 U.S.C. 1223 and 1231.

2. Section 110.224(e)(4) is revised to read as follows:

§ 110.224 San Francisco Bay, San Pablo Bay, Carquinez Strait, Suisun Bay, Sacramento River, San Joaquin River, and connecting waters, Calif.

* * * * *

(e)(4) *Anchorage No. 7, Treasure Island.* In San Francisco Bay at Treasure Island bounded a line connecting the following coordinates:

Latitude	*Longitude*
37°49'36"N	122°22'40"W; to
37°50'00"N	122°22'57"W; to
37°50'00"N	122°23'44"W; to
37°49'22.5"N	122°23'44"W; to
37°48'40.5"N	122°22'38"W; to

33 CFR Part 110

[CGD1–87–085]

Special Anchorage Areas; Shelter Island, NY

AGENCY: Coast Guard, DOT.

ACTION: Notice of proposed rulemaking.

SUMMARY: The Coast Guard is considering a proposal to establish two special anchorage areas in the waters adjacent to the Town of Shelter Island, New York. This proposal is being considered because the town fathers requested that these areas be so designated to provide safe anchorages well away from fairways where vessels less than 65 feet in length could safely remain unlighted at night. There are no such anchorages currently available in the immediate area. This area sustains a large number of pleasure boats during the summer months.

DATES: Comments must be received on or before May 2, 1988.

ADDRESSES: Comments should be mailed to Captain of the Port, Bldg. 109, Governors Island, NY 10004, Attention to: Vessel Movement Office. The comments and other materials referenced in this notice will be available for inspection and copying at the Vessel Movement Office, Bldg. 109, Governors Island, New York. Normal office hours are between 8:00 A.M. and 4:30 P.M., Monday through Friday, except holidays. Comments may also be hand delivered to that address. Persons wishing to visit the Vessel Movement Office must make an appointment so that clearance onto Governors Island (a military installation) can be arranged.

FOR FURTHER INFORMATION CONTACT: Lieutenant (junior grade) A.J. DiNinno, Vessel Movement Officer, Captain of the Port, New York at (212) 668–7933.

SUPPLEMENTARY INFORMATION: Interested persons are invited to participate in this rulemaking by submitting written views, data, or arguments. Persons submitting comments should include their names and addresses, identify this notice (CGD1–87–085) and the specific section of the proposal to which their comments apply, and give reasons for each comment. Receipt of comments will be acknowledged if a stamped, self-addressed postcard or envelope is enclosed. The regulations may be changed in light of comments received. All comments received before the expiration of the comment period will be considered before final action is taken on this proposal. No public hearing is planned, but one may be held if written requests for a hearing are received and it is determined that the opportunity to make oral presentations will aid the rulemaking process.

Drafting Information

The drafters of this notice are LTJG A.J. DiNinno, Project Officer, Captain of the Port, New York and CDR M.A. Leone, Project Attorney, First Coast Guard District Legal Office.

Discussion of Proposed Regulations

The two areas proposed for designation as special anchorages are located in the waters contiguous to Shelter Island. The northern area is located in that portion of Cedar Island Cove which is enclosed by a line drawn between Sungic Point and latitude 41° 04' 09" North, longitude 72° 17' 55" West in Coecles Harbor, Shelter Island, New York. The southern area is located in that portion of West Neck Harbor which is enclosed by a line drawn between latitude 41° 02' 48" North, longitude 72° 20' 28" West and a point on Shell Beach located at latitude 41° 02' 29" North, longitude 72° 21' 00" West. The Captain of the Port, New York was contacted by Councilmen Rowland V. Clark and Kenneth L. Lewis of the Town of Shelter Island Waterways Committee regarding the establishment of two special anchorage areas which would provide safe well defined anchorages for visiting recreational boaters. The town has indicated that it will administer these special anchorage areas. At the request of the Captain of the Port, New York, Councilman Lewis contacted the New York State Department of Environmental Conservation regarding this project. That office responded affirmatively to the special anchorage proposal. This rule would allow anchoring of small boats (vessels under 65 feet in length) without requiring them to display anchor lights or sound fog signals. The two areas will not effect navigable channels and are located where general navigation will not endanger or be endangered by unlighted vessels. This regulation is issued pursuant to 33 U.S.C. 2030, 2035, and 2070 as set out in the authority citation for all of Part 110.

Environment Impact

These proposed regulations do not alter the use of these areas in any way. They have been and will continue to be places for vessels to anchor.

Economic Assessment and Certification

These proposed regulations are considered to be non-major under Executive Order 12291 on Federal Regulation and nonsignificant under Department of Transportation regulatory policies and procedures (44 FR 11034; February 26, 1979). The economic impact of this proposal is expected to be so minimal that a full regulatory evaluation is unnecessary. Establishment of these proposed special anchorage areas will not require dredging or result in increased cost to any segment of the public. Since the impact of this proposal is expected to be minimal, the Coast Guard certifies that, if adopted, it will not have a significant economic impact on a substantial number of small entities.

Lists of Subjects in 33 CFR Part 110

Anchorage grounds.

Proposed Regulations

In consideration of the foregoing, the Coast Guard proposes to amend Part 110 of Title 33, Code of Federal Regulations as follows:

PART 110—[AMENDED]

1. The authority citation for Part 110 continues to read as follows:

Authority: 33 U.S.C. 471, 2030, 2035 and 2071; 49 CFR 1.46 and 33 CFR 1.05–1(g). Section 110.1a and each section listed in 110.1a is also issued under 33 U.S.C. 1223 and 1231.

2. In § 110.60, two new paragraphs (y) and (y-1) are added to read as follows:

§ 110.60 Port of New York and vicinity.

* * * * *

(y) *Coecles Harbor at Shelter Island, New York.* That portion of Coecles Harbor bounded on the north by a line drawn between the northernmost point of land at Sungic Point and latitude 41° 04' 09" North, longitude 72° 17' 55" West, thence eastward along the shoreline to the point of origin.

(y-1) *West Neck Harbor at Shelter Island, New York.* That portion of West Neck Harbor bounded on the north by a line between latitude 41° 02' 48" North, longitude 72° 20' 28" West and a point on Shell Beach located at latitude 41° 02' 29" North, longitude 72° 21' 00" West; thence eastward along the shoreline to the point of origin.

Dated: March 4, 1988.

R. L. Johanson,

Rear Admiral, United States Coast Guard Commander, First Coast Guard District.

BILLING CODE 4910-14-M

FEDERAL MARITIME COMMISSION

46 CFR Part 581

[Docket No. 88–7]

Service Contracts; "Most-Favored-Shipper" Provisions

AGENCY: Federal Maritime Commission.

ACTION: Proposed rule.

SUMMARY: The Commission proposes to amend its service contract regulations to prohibit the use of contract clauses that affect the rate charged under a service contract by referencing rates offered or published by other carriers or conferences, whether in their service contracts or their tariffs. However, contract clauses that adjust a service contract rate by referencing a rate in the contract carrier's or conference's own tariffs or service contracts would continue to be permitted.

DATE: Comments due on or before May 2, 1988.

ADDRESS: Comments (original and 15 copies) to:

Joseph C. Polking, Secretary, Federal Maritime Commission, 1100 L Street, NW., Washington, DC 20573, (202) 523–5725.

FOR FURTHER INFORMATION CONTACT:

Robert G. Drew, Director, Bureau of Domestic Regulation, Federal Maritime Commission, 1100 L Street NW., Washington, DC 20573, (202 523–5796.

Robert D. Bourgoin, General Counsel, Federal Maritime Commission, 1100 L Street NW., Washington, DC 20573, (202) 523–5740.

SUPPLEMENTARY INFORMATION:

I. Background

The International Council of Containership Operators ("ICCO") has filed a Petition for Rulemaking ("Petition") pursuant to Rule 51 of the Commission's Rules of Practice and

Procedure, 46 CFR 502.51.[1] The Petition requests that the Commission promulgate a rule prohibiting (1) the inclusion in service contracts subject to the Shipping Act of 1984 ("1984 Act" or "Act"), 46 U.S.C. app. 1701–1720, of so-called "most-favored-shipper" clauses, and (2) *de minimis* liquidated damages provisions. ICCO also requests that all existing contracts containing such provisions be declared "null and void."

The Petition was published in the **Federal Register** and interested persons were invited to comment. The Commission received 41 separate comments representing 56 parties. These comments divide into two groups: Carriers, conferences and carrier associations which support the Petition;[2] and shippers, shippers' associations and the Department of Justice ("DOJ") which oppose the Petition.[3] Comments were also submitted by three members of Congress.[4]

II. Summary of the Petition

ICCO alleges that experience with service contracts under the Shipping Act of 1984 reveals an imbalance between the interests of shippers and carriers that is contrary to the intent of Congress. The widespread use of so-called "most-favored-shipper" clauses and *de minimis* liquidated damages provisions in contracts is said to reflect a lack of mutuality of consideration and illusory cargo commitments. ICCO has proposed that the Commission adopt regulations which would prohibit the use of such provisions in service contracts.

ICCO defines a "most-favored-shipper" clause as being any form of service contract provision where the rate charged is contingent upon other rates for the same commodity charged by that or other carriers. ICCO identifies two primary types of such clauses. The first is where the contracting carrier agrees that the rate charged to the shipper will be the same as that the contracting carrier offers to any other shipper of the same commodity. The second, referred to by ICCO as the "Crazy Eddie" clause, is where the carrier agrees that the rate charged to the shipper will be the same rate that either that carrier, or any other carrier, offers by tariffs, service contract, or otherwise, to the shipper, or any other shipper, for that commodity.

ICCO submits that "most-favored-shipper" clauses are contrary to the requirement of the 1984 Act that a service contract provide for a certain rate or rate schedule. Additionally, ICCO argues that "Crazy Eddie" clauses are contrary to the Act's requirement that a carrier not charge rates other than those set forth in *its* tariffs or service contracts.

ICCO also contends that service contracts with *de minimis* liquidated damages provisions do not meet the definition of service contracts contained in the 1984 Act and should be prohibited. It maintains that a service contract must include a commitment by the shipper which allows a carrier to count on predictable revenues. However, *de minimis* liquidated damages clauses are alleged to be nothing more than written verification of the lack of a true shipper commitment. ICCO would, therefore, have the Commission prohibit any liquidated damages provision which is an amount less than seventy-five percent of the rate which would have been applied to that cargo had it been tendered and carried.

ICCO concludes that "most-favored-shipper" clauses and *de minimis* liquidated damages clauses in service contracts have had a destabilizing effect on ocean common carriage in the U.S. foreign commerce and are contrary to the requirements of the 1984 Act. ICCO further submits that the Commission has authority to promulgate rules to prohibit such clauses to ensure that service contracts comply with the requirements of the 1984 Act.

III. Summary of Comments

In light of the number of filings and the fact that many of the comments make the same points, the arguments of each commenter will not be individually summarized. Instead, the major comments will be presented in two broad categories—those generally supporting the Petition and those generally opposed to it.

Those carrier, conference and carrier association parties commenting in support of the Petition agree with the factual allegations and legal analysis set forth in the Petition. They maintain that the viability and integrity of service contracts are at issue and claim that if service contracts are to have any meaning, they must fulfill the traditional role of a contract—*i.e.*, be an agreement freely entered into by parties of essentially equal bargaining power who intend and expect to be bound by the contract. These supporting parties also contend that, because the industry is and will continue to be plagued by extensive overcapacity, it is unlikely that the relative bargaining power of the parties will come into balance. As a result, service contracts have allegedly become shams because big shippers, as a result of the leverage they command, dictate terms that make the contracts virtually meaningless. The types of

[3] In addition to DOJ, comments opposing the Petition were received from: National Industrial Transportation League; American Institute for Shippers' Associations, Inc.; General Electric Company; Digital Equipment Corporation; California Shipping Line, Inc.; International Shippers Association; Chemical Manufacturers Association; Ford Motor Company; Wine and Spirits Shippers Association; E.I. DuPont de Nemours and Company; PPG Industries, Inc.; Phillips Petroleum Company; General Foods Corporation; IBP, Inc.; and the International Association of NVOCCs.

[4] Congressional comments were received from: the Honorable Walter B. Jones, Chairman, House Committee on Merchant Marine and Fisheries; the Honorable Daniel K. Inouye and the Honorable Ted Stevens, then Ranking Majority and Minority members of the Senate Subcommittee on Merchant Marine (joint comment).

contracts that are the subject of the Petition are said to indicate how illusory some of these contracts have become.[5]

These parties further contend that the effects of "most-favored-shipper" provisions demonstrate the absence of mutuality in these contracts. A contract which gives a shipper a contract rate, usually below the tariff rate, with a promise that the rate will be further reduced if the market goes down, is argued to be fundamentally at odds with rate stability, rate equity, survival of carriers as competitors, and avoidance of rates that do not cover carriers' costs. Moreover, when "most-favored-shipper" clauses are coupled with damages provisions so minimal as to permit the shipper not to perform what is usually a minimal cargo commitment, any resemblance to a true, long-term contract if affreightment at fixed rates allegedly disappears.

These commenters argue that if the present chaotic environment continues, a major restructuring of carriers through merger, consolidation, or outright business failures will result. A further consequence will allegedly be a significant reduction in competition, through the reduction of competitors, and a concomitant concentration of economic power.

Carriers supporting the Petition also contend that the minimum standards set by the Commission for service contracts tend to determine how contracts are in fact written by many carriers, even against their better judgment. This creates pressure on other carriers to adopt similar service contracts which may lack mutuality and which could destroy the tariff structure and stability in a trade. Unless the Commission adopts standards to address "most-favored-shipper" clauses and the absence of real liquidated damages, the marketplace will allegedly produce results which conflict with the objectives of the 1984 Act.

The Honorable Daniel K. Inouye, then Ranking Majority Member and the honorable Ted Stevens, then Ranking Minority Member of the Subcommittee on Merchant Marine, U.S. Senate, Committee on Commerce, Science, and Transportation, express their concern that service contracts may be being used to circumvent the tariff filing requirements for ocean common carriers that the 1984 Act reaffirmed. They believe that if that is the case, two fundamental objectives of the 1984 Act—non-discriminatory treatment of shippers and rate stability—could be undermined. They further contend that service contracts were intended to provide greater rate stability by permitting shippers and carriers to make mutually binding, substantial commitments. Similarly, Congressman Walter B. Jones, Chairman, House Merchant Marine and Fisheries Committee, contends that a particular concern of that Committee is the maintenance of common carriage. He further expresses concern that the provision allowing service contracts should not be used to frustrate the original purpose of the Act—liner regulation.

Those opposed to the Petition are generally shippers and shippers' associations, but also include DOJ. DOJ contends that there is no need for regulation in the areas of liquidated damages and service commitments. It believes that carriers and shippers are freely entering into service contracts and would not do so unless it benefits each of them. Moreover, it contends that there is no provision in the 1984 Act that gives the Commission the authority to impose minimum levels for cargo and service commitments or for liquidated damages. DOJ notes that Congress did not require that liquidated damages be imposed. The "if any" language in the Act is said to indicate that Congress contemplated that there could be situations where a service contract would not include any liquidated damages for nonperformance.

DOJ also argues that it would be extremely difficult to set efficient minimum levels for liquidated damages, because liquidated damages should reflect the actual costs to the parties for breach of a service contract, and such costs would depend on the particular facts involved. It is possible that the optimal level of liquidated damages could, in certain cases, be *de minimis*. In any event, DOJ argues that carriers and shippers have the best knowledge of what their respective losses would be in the event of a breach, and thus, have the best basis on which to negotiate liquidated damages provisions.

Large volume shippers that utilize service contracts submitted their views on the underlying industry conditions that concern the carriers and conferences. They contend that the marketplace should set the tone and scope of contract pricing and terms, not a regulatory body. They further submit that pricing and contracting are dynamic, especially in an industry historically subject to wide fluctuation in pricing. In addition, they argue that carriers made shippers seek "most-favored-shipper" clauses because of the carriers' "rate-of-the-day" approach to contract pricing. Moreover, the types of clauses challenged by the Petition are said to be so common and characteristic of modern commercial contracts that there can be no doubt that such clauses do not render the obligation imposed by a contract wholly illusory in the eyes of the law.

These parties opposing the Petition also note that contract disputes must, under the 1984 Act, be resolved in the courts, not before the Commission. They therefore contend that the Commission should not be forced into setting languaghe which it cannot adjudicate and which would only serve to satisfy one party—the carriers. They further suggest that there is available under the existing law a far less involved solution to the problems cited in the Petition, *i.e.*, liner operations could resolve their contractual differences through negotiation with their customers.

Moreover, these shipper commenters claim that shippers need the flexibility afforded them by the complained of clauses to meet their competitive pressures. Properly designed clauses that are utilized by ethical companies allegedly enhance and preserve business opportunities and markets for both the carrier and the shipper. The effective removal of service contracts, as a result of the adoption of the proposed rules, might upset the commercial balance contained in the 1984 Act and frustrate the Congressional intent of the statute.

Lastly, some shippers' association commenters opposing the Petition contend that "most-favored-shipper" clauses do provide a mutuality of obligation, because mutuality of obligation does not require a fixed dollar value of revenue to the contracting carrier. They also argue that the legislative history of the 1984 Act contemplates "most-favored-shipper" clauses. In requiring carriers to offer essential terms to all similarly-situated shippers, Congress allegedly contemplated the use of "most-favored-shipper" clauses, and in some circumstances, service contracts do not need to state price terms.

The parties opposed to the Petition therefore suggest that the Petition be denied and that the Commission not propose any rules that might limit the flexibility of service contracts.

---

[5] Some commenters further believe that service contracts have become devices for special discounts from tariff rates to secure relatively small quantities of cargo. To this extent, they allegedly serve the same purposes and have the same deleterious effects as a prohibited rebate and do not provide the kinds of mutual, long-term obligations which transportation contracts should have to serve objectives other than one-shipper discounts.

IV. Discussion

A. Introduction

So-called "most-favored-shipper" clauses are provisions in service contracts which permit the rate to be changed if other, non-contract shippers are able to obtain transportation under better rates during the life of the contract. According to ICCO, these provisions generally fall into one of two distinct categories:

> Under the first if, during the term of the contract, the contract carrier (or conference) offers to any other shipper (by service contract or by tariff), a lower rate for that commodity for that service than is offered to the contract shipper under the service contract, the contract shipper will prospectively receive that lower rate.
>
> The second type of clause has been referred to as a "Crazy Eddie" clause * * *. Under a Crazy Eddie clause if, during the contract term, the contract carrier or *any other carrier* offers the contract shipper *or any other shipper* (by service contract or by tariff), a lower rate for that commodity for that service than is offered to the contract shipper under the service contract, the contract shipper will prospectively receive that lower rate.

ICCO Petition, at 8–9 (emphasis in original).

Liquidated damages clauses are provisions in contracts by which the parties set an amount to be paid an injured party in the event the contract is breached. In the area of service contracts, liquidated damages are most often provided for the breach which occurs when a shipper fails to meet its minimum cargo commitment.

The Petition requests a proposed rule which would prohibit both forms of "most-favored-shipper" clauses, while severely limiting cross-referencing to rates and charges not stated in a service contract.[6] The Petition also requests that the Commission prohibit service contracts which include a provision establishing liquidated damages for contract breach in an amount which is *de minimis.*[7] As noted above, ICCO believes that *de minimis* liquidated damages should be deemed to be an amount less than 75 percent of the contract rate.

The fundamental legal issue that must first be considered in addressing the Petition is whether the Commission has the statutory authority to regulate service contracts and establish substantive service contract standards. ICCO argues that the Commission has such authority. Many commenters disagree and argue that service contracts are private commercial arrangements and, although the Commission may establish "form and manner" standards relating to the filing and publication of service contracts, it has no authority to regulate the substance of contract terms.

In order to determine the scope of the Commission's authority to impose substantive service contract terms or standards, particularly those advanced by ICCO, it would be useful to review the Commission's rulemaking authority as it relates to service contract regulation.

B. General Rulemaking Authority

The source of the Commission's general rulemaking authority is contained in section 17(a) of the Shipping Act of 1984, 46 U.S.C. app. 1716(a), which provides:

> The Commission may prescribe rules and regulations as necessary to carry out this Act.

This provision is a recodification of the rulemaking authority contained in former seciton 43 of the Shipping Act, 1916 ("1916 Act"), 46 U.S.C. app. 841a, and can be presumed to incorporate the administrative and judicial interpretations given the prior provision. *Lorillard v. Pons*, 434 U.S. 575, 580–81 (1978).

Originally, the 1916 Act did not contain general rulemaking authority. This power was granted to the Commission by the 1961 amendments to the 1916 Act. Pub. L. 87–346, 75 Stat. 762. The legislative history of section 43 indicates that the authority conferred on the Commission is very broad. S. Rep. No. 860, 87th Cong., 1st Sess. 20, *reprinted in* 1961 U.S. Code Cong. & Ad. News 3108, 3128. Congress intended that he statute confer far-reaching rulemaking authority to enable the Commission to give precision to the general statutory standards. *Pacific Coast European Conference v. FMC,* 376 F.2d 785 (D.C. Cir. 1967). The statute imposes no specific limits on the Commission's rulemaking authority and the only general limits are that regulations must further the statute's requirements and impose no unequal burden on U.S.-flag carriers vis-a-vis their foreign competitors. *Alcoa S.S. Co. v. FMC,* 348 F.2d 756 (D.C. Cir. 1965).

The Commission is not limited to adopting rules that remedy specific proven acts of unlawful conduct, but may impose rules "reasonably adapted to the accomplishment of a Congressional objective" supported by reasonable inferences of illegal conduct derived from the language and acknowledged use of shipping documents. *See Outward Continental Conference v. FMC,* 385 F.2d 981 (D.C. Cir. 1967). Likewise, the Commission's rulemaking authority is applicable to all sections of the statute and, most importantly permits the precise definition of statutory standards that would otherwise arise by adjudication, so long as the regulations are congruous with the statutory and legislative intent and are shown to be a reasonable response to industry conditions. *See Trans-Pacific Freight Conference v. FMC,* 650 F.2d 1235 (D.C. Cir. 1980).

There is no provision in the 1984 Act that exempts service contracts from the rulemaking authority of section 17(a) or limits that authority to "form and manner" requirements. Although section 2(1) of the 1984 Act, 46 U.S.C. app. 1701(1), expresses a Congressional policy of minimum government intervention,[8] this purpose underlies the entire 1984 Act and cannot be construed as a specific limitation on the Commission's authority to regulate the use of service contracts or as a provision in derogation of the rulemaking authority generally conferred by section 17(a). *See Association of American Railroads v. Costle,* 562 F.2d 1301, 1316 (D.C. Cir. 1977). While section 2(1) may affect the policy choices presented the Commission in administering the 1984 Act, it should not be construed as imposing a *laissez-faire* regulatory regime as argued by some of those opposed to the Petition. *See International Brotherhood of Teamsters v. I.C.C.,* 801 F.2d 1423, 1430 (D.C. Cir. 1986).

---

[6] The ICCO Petition requests that the Commission allow a limited exception to an absolute requirement that service contracts be self-contained:

> A service contract may be incorporate by reference charges, surcharges, allowances, or adjustment factors set forth in the contract carrier's or contract conference's tariff.

ICCO Petition, at 22.

[7] In addition to urging the Commission to promulgate substantive standards concerning "most-favored-shipper" clauses and *de minimis* liquidated damages in service contracts, ICCO also proposes that such clauses in current service contracts be declared "null and void." Those parties opposed to the Petition argue that this would constitute unlawful retroactive rulemaking.

Declaring contract provsiions, now filed and in effect, to be "null and void" would appear to constitute a retroactive application of a newly promulgated rule. *See Georgetown University Hospital v. Bowen,* 821 F.2d 750 (D.C. Cir. 1987). Accordingly, it appears that a rule restricting the use of certain provisions in service contracts could only be applied to contracts filed after its effective date.

[8] Section 2(1) of the Act provides:

> The purposes of this Act are—(1) to establish a nondiscriminatory regulatory process for the common carriage of goods by water in the foreign commerce of the United States with a minimum of government intervention and regulatory costs * * *.

To the contrary, the legislative history of the 1984 Act indicates that Congress is "seriously concerned that service contracts not be employed so as to discriminate against all who rely upon the common carriage tradition of the liner system" and that Congress "expects the FMC to be cognizant of the effects * * * (on) common carriage that abuse of service contracting may occasion." H.R. Rep. No. 53, Part 1, 98th Cong., 1st Sess. 17 (1983). It appears that Congress intended the Commission to take an active role in ensuring that the integrity of the legislative scheme of the 1984 Act is preserved.

C. Statutory Provisions Relating to Service Contracts

The provisions of the 1984 Act that directly relate to service contracts are: (1) The service contract definition in section 3(21) of the 1984 Act, 46 U.S.C. app. 1702(21); (2) the "Tariffs" provisions governing the contents of service contracts in section 8(C) of the Act, 46 U.S.C. app. 1707(c); and (3) certain provisions in section 10, "Prohibited Acts," 46 U.S.C. 1709, which specify the service contract practices made unlawful by the 1984 Act.

1. The Service Contract Definition

The definition of a service contract in section 3(21) of the 1984 Act [9] contains several legal requirements. Only certain types of entities may enter into service contracts, and these contracts have specific attributes different from other types of contracts. That is, service contracts may *only* be entered into between shippers or shippers' associations and ocean common carriers or conferences and *must* contain *commitments* for: (a) A "certain minimum quantity of cargo over a fixed period of time" from the shipper; and (b) a "certain rate or rate schedule as well as a defined service level" from the carrier. Although the definition also contains a *permissive* element, *i.e.,* nonperformance provisions, all other elements are mandatory and without them a contract does not fall within the definition. Thus, a service contract, as defined in the 1984 Act, is not just a common law contract but also a statutory contract.

In urging a prohibition of "most-favored-shipper" clauses in service contracts, ICCO relies on the contract definition requirement of a "certain rate or rate schedule." This argument appears to be well-founded at least to the extent that the contract must be drafted so as to permit a person to ascertain the agreed upon rate from either the face of the document or a specified rate schedule document incorporated by reference in the service contract. While it does not necessarily mean that the contract may not contain alternative or contingent rates, it does appear to require more than the minimum certainty of terms required at common law.[10]

However, the definition of "service contract" does not lend support to the ICCO proposal to require service contracts to contain minimum liquidated damages clauses. Liquidated damages clauses are nonperformance provisions and, as such, are a permissive element of service contracts. The "service contract" definition in section 3(21) does not provide otherwise. Therefore, that definition does not give the Commission a basis to require liquidated damages for breach of contract, much less specify a level that must be stated in a service contract.

2. The "Tariffs" Provision for Service Contracts

Section 8(c) of the 1984 Act contains the core of the statutory scheme relevant to service contracts.[11] It requires, *inter alia,* that the "essential terms" of privately negotiated transportation contracts, including the "line-haul rate" and "liquidated damages for nonperformance, if any," be published in tariff format and made available to similarly situated shippers. Section 8(c) also provides that the exclusive remedy for a contract breach, unless the parties otherwise agree, "shall be an action in an appropriate court."

On their face, the section 8(c) provisions indicate parallels with key aspects of the service contract definition in section 3(21) of the Act. Consistent with use of the term "certain rate or rate schedule" in the service contract definition, requiring the publication of a "line-haul rate" in "tariff format" would appear to require a *specific numerical rate.* The legislative history of section 8(c) supports this interpretation and also indicates that Congress intended that the rate stated in a service contract would be a single-factor numerical rate for each specified volume committed by the shipper.[12] However, reference by incorporation to a rate stated in the contracting carrier's general public tariff is also contemplated.[13] Obviously, if the referenced tariff charge varies, then the contract charge will likewise vary. This type of varying rate provision appears to be permitted. Similarly, the "incorporation by reference" concept would appear to support tying the contract rate to the "essential terms" of other service contracts offered by the contracting carrier because those terms are also "published."

This analysis does not, however, appear to support the legality of the more extreme forms of "most-favored-shipper" clauses, particularly those where the contracting carrier agrees to match the lowest rate "offered" the shipper by any carrier in the trade covered by the contract. Tying the "line-haul rate" to an unpublished, nonbinding rate "offer" that cannot be readily ascertained by an interested party does not appear to "provide meaningful commercial disclosure," as contemplated by Congress. It does not inform other shippers of the rates available to them, either directly or by reference to other published rate matter. It would appear, therefore, that such clauses do not fulfill the minimum disclosure requirements of section 8(c) and are not permissible in contracts filed pursuant to that section.

---

[9] Section 3(21) of the 1984 Act, provides:

> (21) "service contract" means a contract between a shipper and ocean common carrier or conference in which the shipper makes a commitment to provide a certain minimum quantity of cargo over a fixed time period, and the ocean common carrier or conference commits to a certain rate or rate schedule as well as a defined service level—such as, assured space, transit time, port rotation, or similar service features; the contract may also specify provisions in the event of nonperformance on the part of either party.

[10] At common law, absolute certainty on price is not essential, only a definite agreement to agree on a price. *See Vigland v. Wylain, Inc.,* 633 F.2d 522, 526 (8th Cir. 1980).

[11] Section 8(c) of the 1984 Act provides:

> (c) SERVICE CONTRACTS.—An ocean common carrier or conference may enter into a service contract with a shipper or shippers' association subject to the requirements of this Act. Except for service contracts dealing with bulk cargo, forest products, recycled metal scrap, waste paper, or paper waste, each contract entered into under this subsection shall be filed confidentially with the Commission, and at the same time, a concise statement of its essential terms shall be filed with the Commission and made available to the general public in tariff format, and those essential terms shall be available to all shippers similarly situated. The essential terms shall include—
>
> (1) the origin and destination port ranges in the case of port-to-port movements, and the origin and destination geographic areas in the case of through intermodal movements;
>
> (2) the commodity or commodities involved;
>
> (3) the minimum volume;
>
> (4) the line-haul rate;
>
> (5) the duration;
>
> (6) service commitments; and
>
> (7) the liquidated damages for nonperformance, if any
>
> The exclusive remedy for a breach of a contract entered into under this subsection shall be an action in an appropriate court, unless the parties otherwise agree.

[12] *See* S. Rep. No. 3, 98th Cong., 1st Sess. 31–33 (1983).

[13] The Senate Report, in discussing the "line-haul rate" requirement and its relationship to volume commitments, explains:

> Many service contracts may provide for charges or allowances for transporting and handling the goods involved that may be different from those published in the otherwise applicable general tariff and, accordingly, any such variance must be identified in the line-haul rate disclosure. *To the extent any contract charge or allowance is the same, as that in the carrier's or conference's general public tariff, incorporation by reference will suffice.* (Emphasis added).

Id. at p. 31–32.

The type of "most-favored-shipper" clause that is the most difficult to evaluate under section 8(c) is that which ties in "line-haul rate" to the lowest rate published in either the tariffs or service contracts of another carrier operating in the trade covered by the contract. At a minimum, it does not appear that this type of clause constitutes the type of "incorporation by reference" provision found acceptable in the Senate Report because it does not reference the contracting carriers' *own* rate publications.

Section 8(c) does not support ICCO's position that the Commission may establish minimum liquidated damages standards. The language of section 8(c), like the definition, indicates that liquidated damages clauses are optional, the use of the term "if any," being particularly significant. This would suggest that Congress did not intend the Commission to establish a liquidated damages minimum. The language of section 8(c) also indicates that to the extent liquidated damages provisions provide for remedies due to volume commitment breaches, they are subject to enforcement by the courts.

3. Prohibited Acts

The final area of analysis of the Commission's authority to promulgate substantive standards for service contracts is whether any types of provisions are proscribed by the 1984 Act itself. The Commission might preclude certain service contract provisions to prevent violations of the "prohibited acts" contained in section 10 of the act. The provisions of section 10 presented or raised by the Petition are sections 10(b)(1) and 10(a)(1), 46 U.S.C. app. 1709(b)(1) and 1709(a)(1).

a. *Section 10(b)(1).* Section 10(b)(1) of the 1984 Act makes it unlawful for any carrier or conference to charge rates for any service different from those shown in its tariffs or service contracts.[14]

ICOO takes the position that service contracts which reference rates not actually stated in the contracting carrier's tariffs and essential terms publications, whether such rates be another carrier's tariffs or service contracts or reflect some third party offer, "are unlawful under section 10(b)(1)."

Section 10(b)(1) is an adaptation of former section 18(b)(3) of the 1916 Act [15] that was made applicable to tariffs and service contracts filed under the 1984 Act. The Commission by rule interpreted section 18(b)(3) to prohibit a carrier's tariff from referencing the rates published in any other carrier's tariff. 46 CFR 580.6(k)(2) (1985).[16] Because this rule prohibition continues in effect under the 1984 Act, section 10(b)(1) has been similarly applied.

Accordingly, to the extent the prohibitions of section 10(b)(1) of the 1984 Act were made applicable to service contracts, it appears that providing transportation under a service contract that incorporates by reference a competing carrier's tariff rates or service contract essential terms publication could be prohibited under the 1984 Act.

b. *Section 10(a)(1).* ICCO does not expressly allege a violation of section 10(a)(1) in its Petition with regard to *de minimis* liquidated damages clauses.[17] However, it does argue that service contracts that do not specify meaningful damages are illusory arrangements and, because they lack meaningful commitments, are not in fact "contracts." ICCO 's position is not without merit.

The Commission itself has recently noted that *de minimis* liquidated damages clauses may render a contract a "device to evade the otherwise applicable tariff rate," [18] and that "[s]ervice contracts with no meaningful cargo or service commitments could, at a minimum, violate section 10(a)(1) of the Act." [19] A "commitment" is required to make the contract a "service contract" as defined in section 3(21) of the 1984 Act. A service contract with a volume commitment that by its terms may be breached without significant penalties would appear not to contain a meaningul commitment on the part of the contracting shipper. As a result, such a contract could be deemed to constitute an "unjust or unfair device or means," allowing the shipper to obtain a contract rate different from the carrier's tariff rate "that would otherwise be applicable," in violation of section 10(a)(1) of the Act.

IV. Conclusion

The Commission has determined to grant the Petition and to issue a proposed rule providing the relief sought, but only to the extent indicated below.

1. Most-Favored-Shipper Clauses

The Commission is proposing a rule that would establish reasonable standards for the use of "most-favored-shipper" clauses in service contracts. Under this rule, the Commission would permit service contracts that allow the carrier to match the service contract rate with the contracting carrier's best "published" rate for the contract commodity in the contract trade area.[20]

The proposed rule would, however, prohibit service contract provisions which make a contracting carrier's rate dependent upon another carrier's contract rate or tariff rate, whether that rate be in the form of an unpublished offer or a rate published in that other carrier's tariff or service contracts. Any service contract that ties its governing rate to an unpublished, non-binding rate "offer" that cannot be readily ascertained by an interested party, does not appear to provide the "meaningful commercial disclosure" contemplated by Congress. Contracts with such open-ended rate clauses also do not appear to inform other shippers of the rates available to them, either directly or by reference to other published rate matter, and, as a result, do not appear to fulfill the minimum essential terms disclosure requirements of section 8(c).

Service contract rates made dependent on another carrier's tariff or service contract rates, while possibly less objectionable, also appear to be unacceptable. The "incorporation by reference" sanctioned in the 1984 Act's legislative history would not appear to extend to references of other carrier's rates. Moreover, this type of "most-favored-shipper" clause appears inconsistent with established Commission policy that precludes a carrier's tariff from referencing the rates published in any other carrier's tariff. This policy is grounded on historical precedent and was designed to lessen the burden on a shipper to refer to another carrier's tariff to determine applicable freight charges.

However, given the greater commercial freedoms service contracts appear to have been intended to provide, a direct application of tariff case law and policy to service contracting may be inappropriate. Accordingly, interested parties are specifically requested to address this issue.

2. De Minimis Liquidated Damages Provisions

ICCO's specific concern is that liquidated damages not be established at such low levels that they render meaningless any commitment made by the contract shipper to the carrier. Shippers correctly point out, on the other hand, that carriers are not forced to sign contracts with unacceptably low damages provisions.

That the Commission lacks the authority to directly regulate the use of liquidated damages provisions does not necessarily mean that the Commission is without authority to preclude service contract liquidated damages provisions which may permit evasion of the otherwise applicable tariff rate contrary to the 1984 Act and the policies underlying it, regardless of whether both parties to the contract willingly or unwillingly agree to those provisions. At a minimum, the Commission can police individual service contracts to ensure compliance with the Act. This would include investigations under section 10(a)(1) of the 1984 Act to determine whether contracts with *de minimis* liquidated damages provisions have been used as a device to unlawfully circumvent otherwise applicable tariff rates.

The fundamental problem involved in addressing *de minimis* liquidated damages provisions is devising an efficient and appropriate regulatory requirement that would preclude the possibility of illusory service contracting. Because the Commission cannot directly regulate the level of liquidated damages, it is difficult to prevent such contracting by regulation without establishing requirements that specify the consequences of non-performance of service contract commitments by prescribing the lawful rate that can be applied to contract shipments. We recognize, however, that restricting the freedom of contract parties to negotiate service contracts in this manner could inhibit the fundamental purposes of section 8(c) of the 1984 Act. Therefore, such a rulemaking must be evaluated very carefully and should only be undertaken upon a convincing showing the use of *de minimis* liquidated damages clauses is widespread and presents a serious problem that threatens the viability of the overall legislative scheme of the 1984 Act. Although the Petition and some comments indicate that the potential for illusory contracting through the use of *de minimis* liquidated damages clauses exists, and that such contracting may on occasion have occurred, it does not appear to be of sufficient magnitude to impose the significant restrictions on service contracting that effective remedial regulations could inevitably entail.

Moreover, surveys of recently filed service contracts indicate that although liquidated damages provisions are commonly below the contract rate level, they appear seldom set at a level that is patently *de minimis.*[21] Given this situation and the present capability of the Commission to identify and separately address any potentially unlawful arrangements, the policing of individual contracts identified in this fashion appears to be a more appropriate response to the ills complained of in the Petition.

However, this result should not be interpreted as the last word on this subject. If specious contracting through *de minimis* liquidated damages clauses becomes a widespread malpractice, policing of individual contracts exclusively in this fashion would require a substantial commitment of the Commission's limited resources and could prove impractical as well as inefficient. Under such circumstances the only alternative might be to establish regulatory requirements that would preclude the possibility of such unlawful service contracting. While this alternative does not appear to be required at this time, both shippers and carriers should be mindful of the potential industry-wide ramifications and the regulatory response, that the spread of contracting abuses would likely produce.

Finally, the Commission wishes to emphasize that the use of *de minimis* liquidated damages provisions or other contract provisions that may render a service contract other than a *bona fide* transaction is the type of activity or practice that Congress expected the Commission to prevent in order to preserve the common carriage system underlying the 1984 Act. *See,* H.R. Rep. No. 53, Part 1, 98th Cong., 1st Sess. 17 (1983). Meaningful minimum quantities of cargo over a fixed time period and rate and defined service level commitments between a carrier and a shipper are the legislative *quid pro quo* for departing from the published tarriff rates of the carrier that would otherwise apply. The failure of the contract parties to fulfill the basic requirements of this *quid pro quo* not only offends the legislative scheme crafted by Congress but also could, as noted above, make the service contract but a device to evade the carrier's tariff rates in violation of section 10(a)(1) of the 1984 Act. We believe that the Commission is not only empowered but also recognizes that it has the responsibility to take whatever regulatory action may be necessary and appropriate to ensure against this result.

Accordingly, it is the stated policy of the Commission to require meaningful rate and volume commitments on the part of the shipper and meaningful service commitments on the part of the carrier in all service contracts entered into under the authority of section 8(c) of the 1984 Act. The Commission will scrutinize contracts carefully at the time of filing to ensure that they contain such commitments, pursuant to the requirements of 46 CFR 581.1(n). Failure to comply with the requirements of 46 CFR 581.1(n), as herein interpreted, will result in the rejection of the contract pursuant to 46 CFR 581.8 or other appropriate Commission action.

The Commission is therefore limiting this rulemaking to the promulgation of standards for the use of most-favored-shipper clauses in service contracts. The proposed rule will: (1) Define "most-favored-shipper" clauses; (2) prohibit the use of such clauses; and (3) permit a service contract to reference only matters set forth in a contracting carrier's or conference's tariffs or essential term's publications.

---

[14] Section 10(b)(1) specifically provides:

(b) COMMON CARRIERS.—No common carrier, either alone or in conjunction with any other person, directly or indirectly, may—

(1) charge, demand, collect, or receive greater, less or different compensation for the transportation of property or for any service in connection therewith than the rates and charges that are shown in its tariffs or service contracts;

[15] Section 18(b)(3) of the 1916 Act, 46 U.S.C. 817(b)(3) (1983) provided, in pertinent part:

(3) No common carrier by water in foreign commerce or conference of such carriers shall charge or demand or collect or receive a greater or less or different compensation for the transportation of property or for any service in connection therewith than the rates and charges which are specified in its tariffs on file with the Commission and duly published and in effect at the time * * *

[16] 46 CFR 580.6(k)(2) provides:

(2) The publication of a statement in a tariff to the effect that the rates published therein take precedence over the rates published in some other tariff, or that the rates published in some other tariff take precedence over or alternate with rates published therein, is prohibited.

See also, 46 CFR 580.13(b).

[17] Section 10(a)(1) provides:

(a) IN GENERAL.—No person may—

(1) knowingly and willfully, directly or indirectly, by means of false billing, false classification, false weighing, false report of weight, false measurement, or by any other unjust or unfair device or means obtain or attempt to obtain ocean transportation for property at less than the rates or charges that would otherwise be applicable.

[18] Docket No. 86-6—*Service Contracts,* Notice of Proposed Rulemaking at 21, 51 FR 5734, 5739 (Feb. 18, 1986).

[19] *Service Contracts,* 24 S.R.R. 277, 301 (1987).

[20] This may also have the practical effect of allowing the contracting carrier to match the best *published* offering of a competitor, by amending its tariff to meet any published rate reduction of that competitor.

[21] Surveyed were a sample of 90 service contracts out of 2136 contracts filed between January 2, 1987 and April 21, 1987, and 100 out of 748 contracts filed between September 1, 1987 and November 30, 1987. The selections were based upon a random computer-generated sampling of filed service contracts and are considered representative of all the contracts filed during those periods. The sampling disclosed that while some 50% of filed contracts had liquidated damages at a level below the contract rate, only some 6% established liquidated damages at $100 per container or less.

The Commission has determined that these rules are not a "major rule" as defined in Executive Order 12291 dated February 27, 1981, because they will not result in:

(1) An annual effect on the economy of $100 million or more;

(2) A major increase in costs or prices for consumers, individual industries, Federal, State, or local government agencies or geographic regions; or

(3) Significant adverse effects on competition, employment, investment, productivity, innovations, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

The Commission finds that the proposed rule is exempt from the requirements of the Regulatory Flexibility Act (5 U.S.C. 601). Section 601(2) of that Act excepts from its coverage any "rule of particular applicability to rates or practices relating to such rates * * *" As the proposed rule relates to particular applications of rates and rate practices, the Regulatory Flexibility Act requirements are inapplicable.

The information collection requirements contained in this rule have been submitted to the Office of Management and Budget for review under section 3504(h) of the Paperwork Reduction Act (44 U.S.C. 350(h)). Comments on the information collection aspects of this rule should be submitted to the Office of Information and Regulatory Affairs of OMB, Attention: Desk Officer for the Federal Maritime Commission.

List of Subjects in 46 CFR Part 581

Maritime carriers, Contracts, Rates and fares.

Therefore, it is ordered, that the Petition for Rulemaking filed by the International Council of Containership Operators is granted to the extent indicated above and denied in all other respects.

Further, pursuant to 5 U.S.C. 553; sections 8, 10 and 17 of the Shipping Act of 1984 (46 U.S.C. app. 1707, 1709, and 1716); the Federal Maritime Commission proposes to amend Part 581 of Title 46 of the Code of Federal Regulations as follows:

PART 581—[AMENDED]

1. The authority citation for Part 581 continues to read:

Authority: 5 U.S.C. 553; 46 U.S.C. app. 1702, 1706, 1707, 1709, 1712, 1714–1716 and 1718.

§ 581.1 [Amended]

2. Section 581.1 is amended by redesignating paragraphs (f) through (t) as (g) through (u).

3. A new § 581.1(f) is added to read as follows:

§ 581.1 Definitions.

* * * * *

(f) "*Most-Favored-Shipper Clause*" means a service contract provision that allows the contract rate or rate schedule(s), or any other essential term(s), to be changed to adopt (by direct match, formula or by any other means) any provision offered to the contracting shipper or another shipper, by tariff filing, other service contract, or any other offering, by any other carrier or conference.

* * * * *

4. In § 581.5, paragraph (a)(3) is redesignated paragraph (a)(5) and new paragraphs (a)(3) and (a)(4) are added to read as follows:

§ 581.5 Content of essential terms; contingency clauses.

(a) * * *

(3) May not contain a most-favored-shipper clause as defined in this part.

(4) May incorporate by reference additional charges, surcharges, allowances, or adjustment factors as set forth in the service contract carrier's or conference's tariff of general applicability or service contract essential terms publication in the same trade in effect on the date of execution of the service contract. The reference must be made by specific FMC tariff or essential terms publication number to an active publication. The service contract may also provide for adjustments in such charges as effected by adjustments in the carrier's or conference's tariff of general applicability or essential terms publication. Each service contract shall describe any restriction(s) or limitation(s) which apply to such adjustments.

* * * * *

By the Commission.[22]

Joseph C. Polking,

Secretary.

Commissioner Ivancie concurring in part and dissenting in part:

I would have denied this Petition, with the exception of prohibiting certain most-favored-shipper clauses described below, because in my opinion it is premature to alter the Commission's service contract regulations inasmuch as there is an on-going and unfinished review of the effects of the Shipping Act of 1984 which will, among other things, directly affect the issue of service contracts. I, however, agree with the granting of this Petition to the limited extent that the proposed rule prohibits certain most-favored-shipper clauses that bind the contracting carrier to match unpublished, nonbinding offers. These types of offers cannot be adequately ascertained by interested parties and they do not afford a meaningful commercial disclosure, as contemplated by Congress.

BILLING CODE 6730-01-M

DEPARTMENT OF TRANSPORTATION

National Highway Traffic Safety Administration

49 CFR Part 571

[Docket No. 88–06, Notice 2]

Federal Motor Vehicle Safety Standards; Side Impact Protection

AGENCY: National Highway Traffic Safety Administration (NHTSA), DOT.

ACTION: Notice of proposed rulemaking, technical corrections.

SUMMARY: This document corrects a notice of proposed rulemaking (NPRM) on amending Standard No. 214, *Side Door Strength.* The NPRM proposed to upgrade Standard No. 214 by adopting dynamic test procedures and performance requirements for passenger cars and appeared at page 2239 of the **Federal Register** of January 27, 1988 (53 FR 2239). This notice is necessary to correct technical errors that appeared in the NPRM. (In another notice in today's **Federal Register**, the agency is correcting a related NPRM on a test dummy to be used in dynamic testing.)

FOR FURTHER INFORMATION CONTACT: Dr. Richard Strombotne, Office of Vehicle Safety Standards, NRM–12, Room 5320, National Highway Traffic Safety Administration, 400 Seventh Street SW., Washington, DC 20590. Telephone: (202) 366–4916.

The following corrections are made in FR Doc. 88–1541 appearing on 2239 in the issue of January 27, 1988:

1. On page 2245, column two, first full paragraph, "Component Test Procedure For Side Impact Protection" is corrected to read "Composite Test Procedure For Side Impact Protection".

PART 571—[AMENDED]

§ 571.214 [Amended]

2. S5.4 is corrected to read as follows:

S5.4 *Adjustable seat back placement.* Place adjustable seat backs in the manufacturer's nominal design riding position in the manner specified by the manufacturer. Place each adjustable head restraint in its highest adjustment position. Position adjustable lumbar supports so that they are set in their released, i.e., full back position.

3. S5.13.1 is corrected to read as follows:

S5.13.1 The anthropomorphic test dummies used for evaluation of a vehicle's side impact protection conform to the requirements of Subpart F of Part 572 of this Chapter. In a test in which the test vehicle is to be struck on its left side, each dummy is to be configured and instrumented to be struck on its left side, in accordance with Subpart F of Part 572. In a test in which the test vehicle is to be struck on its right side, each dummy is to be configured and instrumented to be struck on its right side, in accordance with Subpart F of Part 572.

4. S6 through S6.4.2 is corrected to read as follows (designated as S6 through S6.4.3):

S6 *Positioning procedure for the Part 572 Subpart F Test Dummy.* Position a correctly configured test dummy, conforming to Subpart F of Part 572 of this Chapter, in the front outboard seating position on the side of the test vehicle to be struck by the moving deformable barrier and another conforming test dummy in the rear outboard position on the same side of the vehicle, as specified in S6.1 through S6.4. Each test dummy is restrained only in seating positions for which there is an automatic belt restraint. In addition, any folding armrest is retracted.

S6.1 *Torso.*

S6.1.1 *For a test dummy in the driver position.*

(a) *For a bench seat.* The upper torso of the test dummy rests against the seat back. The midsagittal plane of the test dummy is vertical and parallel to the vehicle's longitudinal centerline, and passes through the center of the steering wheel rim.

(b) *For a bucket seat.* The upper torso of the test dummy rests against the seat back. The midsagittal plane of the test dummy is vertical and coincides with the longitudinal centerline of the bucket seat.

S6.1.2 *For a test dummy in the front outboard passenger position.*

(a) *For a bench seat.* The upper torso of the test dummy rests against the seat back. The midsagittal plane of the test dummy is vertical and parallel to the vehicle's longitudinal centerline, and the same distance from the vehicle's longitudinal centerline as would be the midsagittal plane of a test dummy positioned in the driver position under S6.1.1.

(b) *For a bucket seat.* The upper torso of the test dummy rests against the seat back. The midsagittal plane of the test dummy is vertical and parallel to the vehicle's longitudinal centerline, and coincides with the longitudinal centerline of the bucket seat.

S6.1.3 *For a test dummy in either of the rear outboard passenger positions.* The upper torso of the test dummy rests against the seat back. The midsagittal plane of the test dummy is vertical and parallel to the vehicle's longitudinal centerline, and, if possible, the same distance from the vehicle's longitudinal centerline as the midsagittal plane of a test dummy positioned in the driver position under S6.1.1. If it is not possible to position the test dummy so that its midsagittal plane is at this distance from the vehicle's longitudinal centerline, the test dummy is positioned so that the outermost point of the skin of the upper torso just touches the innermost surface of the vehicle next to the test dummy.

S6.2 *Lower torso.*

S6.2.1 *H-point.* The H-points of each test dummy coincide within ½ inch in the vertical dimension and ½ inch in the horizontal dimension of a point ¼ inch below the position of the H-point determined by using the equipment and procedures specified in SAE J826 (Apr 80) except that the length of the lower leg and thigh segments of the H-point machine are adjusted to 16.3 and 15.8 inches, respectively instead of the 50th percentile values specified in Table 1 of SAE J826.

S6.2.2 *Pelvic angle.* As determined using the pelvic angle gauge (GM drawing 78051–532 incorporated by reference in Part 572, Subpart E of this Chapter) which is inserted into the H-point gauging hole of the dummy, the angle of the plane of the surface on the lumbar-pelvic adaptor on which the lumbar spine attaches is 23 to 25 degrees from the horizontal, sloping upward toward the front of the vehicle.

S6.3 *Legs.* The upper legs of each test dummy rest against the seat cushion to the extent permitted by placement of the feet. The initial distance between the outboard knee clevis flange surfaces is 11.5 inches. To the extent practicable, the left leg of a test dummy in the driver position and both legs of test dummies in other positions are in vertical longitudinal planes. Final adjustment to accommodate placement of feet in accordance with S6.4 for various passenger compartment configurations is permitted.

S6.4 *Feet.*

S6.4.1 *For a test dummy in the driver position.* The right foot of the test dummy rests on the undepressed accelerator with the heel resting as far forward as possible on the floorpan. The left foot is set perpendicular to the lower leg with the heel resting on the floorpan in the same lateral line as the right heel.

S6.4.2 *For a test dummy in the front outboard passenger position.* The feet of the test dummy are placed on the vehicle's toeboard with the heels resting on the floorpan as close as possible to the intersection of the toeboard and floorpan. If the feet cannot be placed flat on the toeboard, they are set perpendicular to the lower legs and placed as far forward as possible such that the heels rest on the floorpan.

S6.4.3 *For a test dummy in either of the rear outboard passenger positions.* The feet of the test dummy are placed flat on the floorpan and beneath the front seat as far as possible without front seat interference. If necessary, the distance between the knees can be changed in order to place the feet beneath the seat.

Issued on March 11, 1988.

Barry Felrice,

Associate Administrator for Rulemaking.

49 CFR Part 572

[Docket No 88–07, Notice 2]

Side Impact Anthropomorphic Test Dummy

AGENCY: National Highway Traffic Safety Administration (NHTSA), DOT.

ACTION: Notice of proposed rulemaking, technical corrections.

SUMMARY: This document corrects a notice of proposed rulemaking (NPRM) on establishing the specifications and qualification requirements for a side impact anthropomorphic test dummy. The NPRM was issued in conjunction with a proposal to upgrade Standard No. 214 by adding dynamic test procedures and performance requirements for passenger cars and appeared at page 2254 of the **Federal Register** of January 27, 1988 (53 FR 2254). This notice is necessary to correct technical errors that appeared in the NPRM (In another notice in today's **Federal Register**, the agency is correcting a related NPRM.)

FOR FURTHER INFORMATION CONTACT: Dr. Richard Strombotne, Office of Vehicle Safety Standards, NRM–12, Room 5320, National Highway Traffic Safety Administration, 400 Seventh Street, SW. Washington, DC 20590. Telephone: (202) 366–4916.

---

[22] Commissioner Ivancie's concurring and dissenting opinion is attached.

The following corrections are made in FR Doc. 88–1542 appearing on 2254 in the issue of January 27, 1988:

PART 572—[AMENDED]

1. Section 572.42(a) introductory text, (b)(1) and (b)(4) are corrected to read as follows:

§ 572.42 Thorax.

(a) When the thorax of a completely assembled dummy (SA–SID–M001) is impacted by a test probe conforming to § 572.44(a) at 14 fps in accordance with paragraph (b) of this section, the peak accelerations at the location of the accelerometers mounted on the thorax in accordance with § 572.44(b) shall be:

* * * * *

(b) * * *

(1) With the dummy seated and positioned on a seating surface as specified in § 572.44(h), adjust the dummy legs at a setting of 1 g, which just supports the limbs' weight when the limbs are extended horizontally forward.

(2) * * *

(3) * * *

(4) Position the dummy as specified in § 572.44(h), so that the thorax's midsagittal plane and tangential plane to the Hinge Mounting Block (Drawing SID–034) are vertical.

* * * * *

2. Section 572.43 (a) and (b)(1) are corrected to read as follows:

§ 572.43 Lumbar spine and pelvis.

(a) When the pelvis of a fully assembled dummy (SA–SID–M001) is impacted laterally by a test probe conforming to § 572.44(a) at 14 fps in accordance with paragraph (b) of this section, the peak acceleration at the location of the accelerometer mounted in the pelvis cavity in accordance with § 572.44(c) shall be not less than 40 g and not more than 60 g. The acceleration-time curve for the test shall be unimodal and shall lie at or above the +20 g level for an interval not less than 3 milliseconds and not more than 7 milliseconds.

(b) *Test Procedure.* (1) With the dummy seated and positioned on a surface as specified in § 572.44(h), adjust the dummy's leg joints at a setting of 1 g, which just supports the limbs' weight when the limbs are extended horizontally forward.

* * * * *

3. Section 572.44 (b)(1), (c), (d), (e), and (h)(1) are corrected to read as follows:

§ 572.44 Instrumentation and test conditions.

* * * * *

(b) * * *

(1) One accelerometer is mounted on the Thorax to Lumbar Adaptor (SID 005) by means of a T12 Accelerometer Mounting Platform (SID 009) and T12 Accelerometer Mount (SID–037) with its seismic mass center at any distance up to 0.4 inches from a surface point on the Thorax to Lumbar Adaptor where two perpendicular planes aligned with the adaptor's vertical and horizontal center lines intersect.

* * * * *

(c) One accelerometer is mounted in the pelvis for measurement of the lateral acceleration with its sensitive axis perpendicular to the pelvic midsagittal plane The accelerometer is mounted on the rear wall of the instrument cavity (Drawing SID–067), with its seismic mass center located up to 0.30 inches from the point of intersection of the centerlines and 0.34 inches rearward of the rear wall of the instrument cavity.

(d) Instrumentation and sensors used must conform to the SAE J–211 (1980) recommended practice requirements. The outputs of the accelerometers installed in the dummy are then processed in the following manner:

(1) Analog data recorded in accordance with SAE J–211 (1980) recommended practice channel class 1000 specification.

(2) Filter the data with a 300 Hz. SAE Class 180 filter;

(3) Subsample the data to a 1600 Hz sampling rate; and

(4) Filter the data with a Finite Impluse Response (FIR) filter having the following characteristics—

(A) Passband frequency, 100 Hz.

(B) Stopband frequency, 189 Hz.

(C) Stopband gain, −50 db

(D) Passband ripple, 0.0225 db

(5) The digital computer program for the FIR filter is contained in Docket 79–04. Notice 02–018.

(e) The mountings for the spine, rib and pelvis accelerometers shall have no resonance frequency within a range of 3 times the frequency range of the applicable channel class.

* * * * *

(h) * * *

(1) The dummy is placed on a flat, rigid, clean, dry, horizontal smooth aluminum surface whose length and width dimensions are not less than 16 inches, so that the dummy's midsagittal plane is vertical and centered on the test surface. The dummy's torso is positioned to meet the requirements of § 572.42 and § 572.43. The seating surface is without the back support and the test dummy is positioned so that the dummy's midsagittal plane is vertical and centered on the seat surface.

* * * * *

Issued on March 11, 1988.

Barry Felrice,

Associate Administrator for Rulemaking.

[FR Doc. 88–5829 Filed 3–14–88; 1:01 pm]

BILLING CODE 4910-59-M

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

50 CFR Part 380

[Docket No. 70999–7199]

Antarctic Marine Living Resources Convention Act of 1984

AGENCY: National Marine Fisheries Service (NMFS), NOAA, Commerce.

ACTION: Proposed rule.

SUMMARY: The Secretary of Commerce (Secretary) requests comment on and proposes this rule to implement the Antarctic Marine Living Resources Convention Act of 1984 which provides the legislative authority for United States implementation of the provisions of the Convention on the Conservation of Antarctic Marine Living Resources (Convention). The Convention establishes international mechanisms and creates legal obligations necessary for the protection and conservation of Antarctic marine living resources.

DATE: Comments on this rule must be received by May 2, 1988.

ADDRESS: Comments on this rule and requests for copies of the environmental assessment prepared for this rule should be sent to the Assistant Administrator for Fisheries, NOAA, National Marine Fisheries Service, Washington, DC 20235. Mark on the envelope "Antarctic Convention Regulations."

Comments on the collection of information subject to the Paperwork Reduction Act should be directed to the Office of Information and Regulatory Affairs of OMB, Washington, DC 20503. Attention: Desk Officer for NOAA.

FOR FURTHER INFORMATION CONTACT: Robin Tuttle (International Science, Development and Polar Affairs, 202–673–5302).

SUPPLEMENTARY INFORMATION: For background information on this proposed rule, and definitions of some of the terms in it, see the final rule establishing this part which is published in this same issue of the Federal Register. NMFS has reserved §§ 380.3 through 380.11 in the final rule; this

proposed rule offers these sections for public comment. These sections for comment are not already in effect by international agreement and NOAA has some measure of discretion in their interpretation. Public comments will be used to develop the final rule to add these sections, now reserved, to 50 CFR Part 380.

Classification

See the final rule for Part 380 published in this same issue of the Federal Register for further classifications or determinations under other related laws.

The Assistant Administrator for Fisheries, NOAA (Assistant Administrator) prepared an environmental assessment (EA) for the final rule and this proposed rule under Executive Order 12114, and the Administrator concluded that there will be no significant impact on the environment as a result of these actions. A copy of the EA may be obtained from the Assistant Administrator at the address above.

This action is exempt from Executive Order 12291 because it involves a foreign affairs function of the United States. For the same reason section 553 of the Administrative Procedure Act does not apply. Nevertheless, NOAA is seeking comments on the proposed rule in order to provide the public with an opportunity to participate in the development of the Antarctic regulatory scheme. Because notice and comment rulemaking is not required for this rule, the Regulatory Flexibility Act does not apply; therefore, a regulatory flexibility analysis has not been prepared.

At present there are no U.S. vessels or vessels subject to the jurisdiction of the United States harvesting Antarctic marine living resources within the area to which these regulations apply, except for research purposes. Presently, the only Antarctic resources affected are scientific specimens taken under NSF permits. Accordingly, these regulations should not have an incremental economic impact on U.S. vessels harvesting or performing associated activities in the Convention area.

This rule contains a collection-of-information requirement subject to the Paperwork Reduction Act. A request to collect this information has been submitted to the Office of Management and Budget (OMB) for approval. Comments on this requirement may be sent to OMB (see ADDRESSES).

This proposed rule does not contain policies with federalism implications sufficient to warrant preparation of a federalism assessment under Executive Order 12612.

List of Subjects in 50 CFR Part 380

Antarctic, Fish and wildlife, Reporting and recordkeeping requirements.

Dated: March 14, 1988.

James E. Douglas, Jr.,

Deputy Assistant Administrator for Fisheries, National Marine Fisheries Service.

For the reasons set out in the preamble of this proposed rule and that of the final rule published in this same issue of the Federal Register, 50 CFR Part 380 is proposed to be amended as follows:

PART 380—ANTARCTIC MARINE LIVING RESOURCE CONVENTION ACT OF 1984

1. The authority citation for Part 380 continues to read as follows:

Authority: 16 U.S.C. 2431 *et seq.*

2. Subpart A is amended by adding §§ 380.3 through 380.11 to read as follows:

§ 380.3 Relationship to other treaties and laws.

(a) Persons affected by these regulations should be aware that other Federal treaties, statutes, and regulations may also apply to their activities.

(b) The Antarctic Conservation Act of 1978 (16 U.S.C. 2401 *et seq.*) implements the Antarctic Treaty Agreed Measures for the Conservation of Antarctic Fauna and Flora (12 U.S.T. 794). The provisions of the Conservation Act and its regulations titled "Conservation of Antarctic Animals and Plants" (45 CFR Part 670) apply to U.S. citizens engaged in certain specifically defined activities south of 60° S. latitude and may impose additional restrictions.

(c) Other Federal statutes and regulations regarding living resources that apply to persons affected by these regulations are the Marine Mammal Protection Act of 1972 (16 U.S.C. 1361 *et seq.*), the Endangered Species Act of 1973 (16 U.S.C. 1531 *et seq.*), the Migratory Bird Treaty Act (16 U.S.C. 701 *et seq.*), and their implementing regulations. These may impose additional restrictions on harvesting and importing.

§ 380.4 Harvesting permits.

(a) *General.*

(1) Each vessel of the United States that reduces an Antarctic marine living resource to its possession, or attempts to reduce an Antarctic marine living resource to its possession, must have a permit issued under this subsection and must have on board a completed permit form, or the individual doing the harvesting must have in his possession an individual permit for that harvesting. Notwithstanding the above, recreational fishing does not require a harvesting permit.

(2) Permits issued under this section do not authorize vessels of the United States or persons to harass, capture, harm, or kill marine mammals. No marine mammal may be taken in the course of fishing unless that vessel has on board a marine mammal certificate of inclusion issued under a general permit under the Marine Mammal Protection Act. Application procedures for permits to take marine mammals incidental to commercial fishing operations are contained in 50 CFR 216.24.

(b) *Responsibility of owners and operators.* The owners and operators of each harvesting vessel are jointly and severally responsible for compliance with the Act, this part, and any permit issued under the Act and this part. The owners and operators of each harvesting vessel are responsible for the acts of their employees and agents constituting violations, regardless of whether the specific acts were authorized or even forbidden by the employer or principal, and regardless of knowledge concerning the occurrence.

(c) *Application.* (1) Application forms are available from the Assistant Administrator. Completed applications for harvesting permits must be submitted for each vessel requiring a permit under this part. The applicant should allow 90 days for processing before the anticipated date to begin harvesting.

(2) Applicants must provide complete and accurate information requested on the permit application form.

(3) Substitutions of one vessel for another must be made by application to the Assistant Administrator. They are considered new applications.

(d) *Issuance.* (1) Permits may be issued to a harvesting vessel by the Assistant Administrator after the Assistant Administrator determines that the harvesting described in the application will meet the requirements of the Act and these regulations and approves the permit application.

(2) Before a permit is issued, the Assistant Administrator must determine that harvesting will not

(i) Decrease the size of any harvested population to levels below those which ensure its stable recruitment. For this purpose its size should not be allowed to fall below a level close to that which ensures the greatest net annual increment;

(ii) Upset the ecological relationships between harvested, dependent, and related populations of Antarctic marine living resources and the restoration of depleted populations to the levels defined in paragraph (d)(2)(i) of this section; and

(iii) Cause changes or increase the risk of changes in the marine ecosystem which are not potentially reversible over two or three decades, taking into account the state of available knowledge of the direct and indirect impact of harvesting, the effect of the introduction of alien species, the effects of associated activities on the marine ecosystem and of the effects of environmental changes, with the aim of making possible the sustained conservation of Antarctic marine living resources;

(iv) Violate the management measures of §§ 380.20, 380.21, and 380.22; or

(v) Violate any other conservation measures in force with respect to the United States under the Convention or the Act.

(3) A completed permit form must contain

(i) The name and IRCS of the harvesting vessel and its permit number;

(ii) A detailed description of the proposed harvesting;

(iii) The date of issuance and expiration;

(iv) A list of the information to be submitted to NMFS; and

(v) All conditions and restrictions, and any additional restrictions and technical modifications, appended to the permit.

(4) Separate permits are not issued for boats which are launched from larger vessels. Any enforcement action which results from the activities of a launched boat will be taken against the permitted vessel.

(e) *Duration.* A permit is valid from its date of issuance to its date of expiration unless it is revoked or suspended.

(f) *Transfer.* Permits are not transferable or assignable. A permit is valid only for the harvesting vessel to which it is issued.

(g) *Display.* Each harvesting vessel operator must have a properly completed permit form available on board the harvesting vessel when engaged in harvesting and must produce it at the request of an authorized officer.

(h) *Suspension and revocation.* 15 CFR Part 904 governs permit sanctions under this part. A permit may be revoked or suspended, or additional permit restrictions may be imposed if the harvesting vessel is involved in the commission of any violation of the Act or this part.

(i) *Change in application information.* (1) The owner or operator of a harvesting vessel must report in writing any change in the information supplied under paragraph (c) of this section to the Assistant Administrator within 15 calendar days of the change. Failure to report a change within the specified time voids the permit. If a change in ownership is not reported and the permit is voided, penalties involved may accrue to the previous owner.

(2) The Assistant Administrator may make technical modifications or changes in the information supplied in the permit application requested or reported by an applicant such as a change in IRCS, processing equipment, or tonnage, which will be effective immediately.

(3) If, in the opinion of the Assistant Administrator, a permit change requested by a harvesting vessel could significantly affect the states of any Antarctic marine living resource, such request will be processed as an application for a new permit under this section.

(4) The Assistant Administrator will notify the owner or operator of a harvesting vessel of any revision which must be made on the permit form as the result of a permit change.

(5) The vessel owner or operator must record the modification on the permit form.

(j) *Additional restrictions.* (1) The Assistant Administrator may, to achieve the purposes of the Convention and the Act, add additional restrictions to a permit for the conservation and management of Antarctic marine living resources. Violations of the additional restrictions will be treated as violations of this part.

(2) Notice of proposed additional restrictions will be sent to each harvesting vessel affected. The notice will include a summary of the reasons underlying the proposal. The owners of affected vessels or their representatives will be allowed 15 days to comment to the Assistant Administrator. The Assistant Administrator may make the proposed additional restrictions effective immediately, if necessary, to prevent substantial harm to Antarctic marine living resources.

(3) The final additional restrictions will be appended to the permit after the end of the 15-day comment period. Notice of the final additional restrictions will be sent to each person whose vessels are affected. A notice will include a response to comments from the owner or representative of the affected vessel.

(4) The effective date of additional restrictions which increase the regulatory burden is seven days after the Assistant Administrator's approval of the final version, or when the permit is issued, whichever is appropriate. The effective date of additional restrictions which relieve the regulatory burden is the date of approval.

(5) Additional restrictions may be modified by following the procedures of paragraphs (j)(2) through (j)(4) of this section.

§ 380.5 Import permits.

(a) *General.* (1) Any person importing Antarctic marine living resources into the United States must have either a permit under this subsection or a permit to harvest these resources as required by § 380.4.

(2) A permit issued under this subsection authorizes the importation of legally harvested Antarctic marine living resources but does not authorize any harvest of these resources.

(b) *Application.* (1) Application forms are available from the Assistant Administrator. Applicants should allow 30 days for processing before the anticipated date of importation.

(2) Applicants must provide complete and accurate information requested on the application form. This information will include, but not be limited to—

(i) The amount and type of Antarctic marine living resources to be imported;

(ii) The name of the vessel(s) that will harvest or has (have) harvested the resources;

(iii) The nationality (flag) of the harvesting vessel(s); and

(iv) A description of the method and location of the harvest of the resources to be imported, if the vessel involved is a vessel of a nation that is not a Contracting Party to the Convention or is a vessel of a nation that is not bound by a conservation measure that is in force with respect to the United States.

(c) *Issuance.* (1) Permits for importation may be issued after the Assistant Administrator finds that the importation meets the requirements of the Act and approves the permit application.

(2) Before a permit is issued the Assistant Administrator must find that the resources were not or will not be harvested in violation of any conservation measure in force with respect to the United States or in violation of any regulation in this section.

(3) A completed permit must contain

(i) The name of the importer;

(ii) The name of the vessel(s) involved in the harvesting;

(iii) The type and quantity of the resources to be imported;

(iv) The date of issuance and expiration; and

(v) Any conditions and restrictions deemed necessary by the Assistant Administrator.

(d) *Duration.* A permit is valid from its date of issuance to its date of expiration unless it is revoked or suspended.

(e) *Transfer.* Permits are not transferable or assignable.

(f) A copy of the permit must accompany the resources being imported.

(g) *Change in application information.* (1) The applicant must report in writing any change in the information supplied under paragraph (b) of this section to the Assistant Administrator within 15 calendar days of any change. Failure to report a change within the specified time voids the permit.

(2) The Assistant Administrator may make technical changes in the permit requested by an applicant which will be effective immediately, if the changed information does not affect the legality of the importation.

(3) If in the opinion of the Assistant Administrator a requested permit change could change the finding made under paragraph (c) of this section, the request will be processed as an application for a new permit under this section.

(h) *Dispostion of resources not accompanied by required documentation.* (1) When Antarctic marine living resources are imported into the United States unaccompanied by a permit authorizing import, the importer must either

(i) Abandon the resources,

(ii) Waive claim to the resources, or

(iii) Place the resources into a bonded warehouse for no more than 60 days to allow the importer to obtain a permit authorizing import.

(2) If, within 60 days of such marine resources being placed into a bonded warehouse, the District Director of Customs receives documentation that import of the resources into the United States is authorized by a permit, the resources will be allowed entry. If documentation of a permit is not presented within the specified 60 days, the importer's claim to the resources will be deemed waived.

(3) When resources are abandoned or claim to them waived, the resources will be delivered to the Administrator of NOAA, or a designee, for storage or disposal as authorized by law.

§ 380.6 Reporting and recordkeeping requirements.

The operator of any vessel required to have a permit under this part must

(a) Maintain on board the vessel an accurate and complete reporting form required by its permit;

(b) Make the report available for inspection by an authorized officer or designee of the Assistant Administrator; and

(c) Within the time specified in the permit submit to the Assistant Administrator a copy of the report.

§ 380.7 Vessel and gear identification.

(a) *Vessel identification.* (1) The operator of each harvesting vessel assigned an IRCS must display that call sign amidships on both the port and starboard sides of the deckhouse or hull, so that it is visible from an enforcement vessel, and on an appropriate weather deck so that it is visible from the air.

(2) The operator of each harvesting vessel not assigned an IRCS, such as small trawler associated with a mothership or one of a pair of trawlers, must display the IRCS of the associated vessel, followed by a numerical suffix specific for the nonassigned vessel.

(3) The vessel identification must be in a color in contrast to the background and must be permanently affixed to the harvesting vessel in block roman alphabet letters and arabic numerals at least one meter in height for harvesting vessels over 20 meters in length, and at least one-half meter in height for all other harvesting vessels.

(b) *Navigational lights and shapes.* Each harvesting vessel must display the lights and shapes prescribed by the International Regulations for Preventing Collisions at Sea, 1972 (TIAS 8587, and 1981 amendment TIAS 10672), for the activity in which the harvesting vessel is engaged (as described at 33 CFR Part 81).

(c) *Gear identification.* (1) The operator of each harvesting vessel must ensure that all deployed fishing gear which is not physically and continuously attached to a harvesting vessel is clearly marked at the surface with a buoy displaying the vessel identification of the harvesting vessel (see paragraph (a) of this section) to which the gear belongs, a light visible for two miles at night in good visibility, and a radio buoy. Trawl codends passed from one vessel to another are considered continuously attached gear and are not required to be marked.

(2) The operator of each harvesting vessel must ensure that deployed longlines, strings of traps or pots, and gillnets are marked at the surface at each terminal end with a buoy displaying the vessel identification of the harvesting vessel to which the gear belongs (see paragraph (a) of this section), a light visible for two miles at night in good visibility, and a radio buoy.

(3) Unmarked or incorrectly identified fishing gear may be considered abandoned and may be disposed of in accordance with applicable Federal regulations by any authorized officer.

(d) *Maintenance.* The operator of each harvesting vessel must

(1) Keep the vessel and gear identification clearly legible and in good repair;

(2) Ensure that nothing on the harvesting vessel obstructs the view of the markings from an enforcement vessel or aircraft; and

(3) Ensure that the proper navigational lights and shapes are displayed for the harvesting vessel's activity and are properly functioning.

§ 380.8 Facilitation of enforcement.

(a) *General.* (1) The owner, operator, or any person aboard any harvesting vessel subject to this part must immediately comply with instructions and signals issued by an authorized officer to stop the harvesting vessel; to move the harvesting vessel to a specified location; and to facilitate safe boarding and inspection of the vessel, its gear, equipment, records, and resource and resource products on board for purposes of enforcing the Act and this part.

(2) The operator of each harvesting vessel subject to this part must provide vessel position or other information when requested by NMFS or the Coast Guard within the time specified in the request.

(b) *Communications equipment.* (1) Each harvesting vessel must be equipped with a VHF–FM radiotelephone station location so that it may be operated from the wheelhouse. Each operator must maintain a continuous listening watch on channel 16 (156.8 mHz).

(2) Each harvesting vessel must be equipped with a radiotelegraph station capable of communicating via 500 kHz radiotelegraphy and at least one working frequency between 405 kHz and 535 kHz, and a radiotelephone station capable of communicating via 2182 kHz radiotelephony. Each operator must monitor and be ready to communicate via 500 kHz radiotelegraph and 2182 kHz radiotelephone each day from 0800 GMT to 0830 GMT and 2000 to 2030 GMT, and in preparation for boarding.

(3) Harvesting vessels that are not equipped with processing facilities and that deliver all catches to a processing vessel on the harvesting grounds are exempt from the requirements of paragraph (b)(2) of this section.

(4) Harvesting vessels with no IRCS which do not catch fish and are used as auxiliary vessels to handle codends, nets, equipment, or passengers for a processing vessel are exempt from the

requirements of paragraphs (b)(1) and (b)(2) of this section.

(5) The Assistant Administrator, with the agreement of the appropriate Coast Guard commander, may, upon request by the owner or operator, accept alternatives to the radio requirements of this section for certain harvesting vessels or types of harvesting vessels provided they are adequate for communications needs.

(c) *Communications procedures.* (1) Upon being approached by a Coast Guard vessel or aircraft or other vessel or aircraft with an authorized officer aboard, the operator of any harvesting vessel subject to this part must be alert for communications conveying enforcement instructions. The enforcement unit may communicate by channel 16 VHF–FM radiotelephone, 2182 kHz radiotelephone, 500 kHz radiotelegraph, message block from an aircraft, flashing light or flag signals from the International Code of Signals, hand signal, placard, loudhailer, or other appropriate means. The following signals extracted from the International Code of Signals are among those which may be used.

(i) "AA, AA, AA, etc," which is the call for an unknown station. The signaled vessel should respond by identifying itself or by illuminating the vessel identification required by § 380.6 of this part;

(ii) "RY–CY" meaning "You should proceed at slow speed, a boat is coming to you";

(iii) "SQ3" meaning "You should stop or heave to; I am going to board you": and

(iv) "L" meaning "You should stop your vessel instantly."

(2) Failure of a harvesting vessel's operator to stop the vessel when directed to do so by an authorized officer using VHF–FM radiotelephone (channel 16), 2182 kHz radiotelephone (where required), 500 kHz radiotelegraph (where required), message block from an aircraft, flashing light signal, flaghoist, or loudhailer constitutes a violation of this part.

(3) The operator of or any person aboard a harvesting vessel who does not understand a signal from an enforcement unit and who is unable to obtain clarification by radiotelephone or other means must consider the signal to be a command to stop the harvesting vessel instantly.

(d) *Boarding.* The operator of a harvesting vessel signaled for boarding must—

(1) Monitor 2182 kHz radiotelephone and 500 kHz radiotelegraph (if equipped) and channel 16 (156.8 mHz) VHF–FM radiotelephone;

(2) Stop immediately and lay to or maneuver in such a way as to maintain the safety of the harvesting vessel and facilitate boarding by the authorized officer and the boarding party;

(3) Provide the authorized officer or boarding party a safe pilot ladder. The operator must ensure the pilot ladder is securely attached to the harvesting vessel and meets the construction requirements of Regulation 17, Chapter V of the International Convention for the Safety of Life at Sea (SOLAS), 1974 (TIAS 9700 and 1978 Protocol, TIAS 10009), or a substantially equivalent standard approved by letter from the Assistant Administrator, with agreement of the Coast Guard. Safe pilot ladder standards are summarized below:

(i) The ladder must be of a single length of not more than 9 meters (30 feet), capable of reaching the water from the point of access to the harvesting vessel, accounting for all conditions of loading and trim of the harvesting vessel and for an adverse list of 15 degrees. Whenever the distance from sea level to the point of access to the ship is more than 9 meters (30 feet), access must be by means of an accommodation ladder or other safe and convenient means.

(ii) The steps of the pilot ladder must be

(A) Of hardwood, or other material of equivalent properties, made in one piece free of knots, having an efficient non-slip surface; the four lowest steps may be made of rubber of sufficient strength and stiffness or of other suitable material of equivalent characteristics;

(B) Not less than 480 millimeters (19 inches) long, 115 millimeters (4½ inches) wide, and 25 millimeters (1 inch) in depth, excluding any non-slip device; and

(C) Equally spaced not less than 300 millimeters (12 inches) nor more than 380 millimeters (15 inches) apart and secured in such a manner that they will remain horizontal.

(iii) No pilot ladder may have more than two replacement steps which are secured in position by a method different from that used in the original construction of the ladder.

(iv) The side ropes of the ladder must consist of two uncovered manila ropes not less than 60 millimeters (2¼ inches) in circumference on each side (or synthetic ropes of equivalent size and equivalent or greater strength). Each rope must be continuous with no joints below the top step.

(v) Battens made of hardwood, or other material of equivalent properties, in one piece and not less than 1.8 meters (5 feet 10 inches) long must be provided at such intervals as will prevent the pilot ladder from twisting. The lowest batten must be on the fifth step from the bottom of the ladder and the interval between any batten and the next must not exceed 9 steps.

(vi) Where passage onto or off the ship is by means of a bulwark ladder, two handhold stanchions must be fitted a' the point of boarding or leaving the harvesting vessel not less than 0.7 meter (2 feet 3 inches) not more than 0.8 meter (2 feet 7 inches) apart, not less than 40 millimeters (2½ inches) in diameter, and must extend not less than 1.2 meters (3 feet 11 inches) above the top of the bulwark.

(4) When necessary to facilitate the boarding or when requested by an authorized officer or observer, provide a manrope, safety line, and illumination for the ladder; and

(5) Take such other actions as necessary to ensure the safety of the authorized officer and the boarding party and to facilitate the boarding and inspection.

(e) *Access and records.* (1) The owner and operator of each harvesting vessel must provide authorized officers access to all spaces where work is conducted or business papers and records are prepared or stored, including but not limited to personal quarters and areas within personal quarters.

(2) The owner and operator of each harvesting vessel must provide to authorized officers all records and documents pertaining to the fishing activities of the vessel, including but not limited to production records, fishing logs, navigation logs, transfer records, product receipts, cargo stowage plans or records, draft or displacement calculations, customs documents or records, and an accurate hold plan reflecting the current structure of the vessel's storage and factory spaces.

(f) *Product storage.* The operator of each harvesting vessel storing Antarctic marine living resources in a storage space must ensure that all non-resource product items are neither stowed beneath nor covered by resource products, unless required to maintain the stability and safety of the vessel. These items include, but are not limited to, portable conveyors, exhaust fans, ladders, nets, fuel bladders, extra bin boards, or other movable non-product items. These items may be in the space when necessary for safety of the vessel or crew or for storage of the product. Lumber, bin boards, or other dunnage may be used for shoring or bracing of product to ensure safety of crew and to prevent shifting of cargo within the space.

§ 380.9 Gear disposal.

(a) The operator of a harvesting vessel may not dump overboard, jettision or otherwise discard any article or substance which may interfere with other fishing vessels or gear, or which may catch fish or cause damage to any marine resource, including marine mammals and birds, except in cases of emergency involving the safety of the ship or crew, or as specifically authorized by communication from the appropriate Coast Guard commander or authorized officer. These articles and substances include but are not limited to fishing gear, net scraps, bale straps, plastic bags, oil drums, petroleum containers, oil toxic chemicals or any manmade items retrieved in a harvesting vessel's gear.

(b) The operator of a harvesting vessel may not abandon fishing gear into Convention waters.

§ 380.10 Prohibitions.

(a) It is unlawful for any person to do the following:

(1) Reduce to possession or attempt to reduce to possession any Antarctic marine living resources without a permit for such activity as required by § 380.4;

(2) Import into the United States any Antarctic marine living resources without either a permit to import those resources as required by § 380.5 of this part or a permit to harvest those resources as required by § 380.4 of this part;

(3) Engage in harvesting or other associated activities in violation of the provisions of the Convention or in violation of a conservation measure in force with respect to the United States under Article IX of the Convention;

(4) To ship, transport, offer for sale, sell, purchase, import, export or have custody, control or possession of, any Antarctic marine living resource which he knows, or reasonably should have known, was harvested in violation of a conservation measure in force with respect to the United States under article IX of the Convention or in violation of any regulation promulgated under this title, without regard to the citizenship of the person that harvested, or vessel that was used in the harvesting of, the Antarctic marine living resource;

(5) Refuse to allow any authorized officer to board a vessel of the United States or vessel subject to the jurisdiction of the United States for the purpose of conducting any search or inspection in connection with the enforcement of the Act, this part, or any other regulation or permit issued under the Act;

(6) Resist a lawful arrest for any act prohibited by the Act, this part, or any permit issued under this part;

(7) Forcibly assault, resist, oppose, impede, intimidate or interfere with an authorized officer in the conduct of any boarding, inspection, or search described in paragraph (a)(5) of this section;

(8) Interfere with, delay, or prevent by any means the apprehension, arrest, or detention of another person, with the knowledge that such other person has committed any act prohibited by the Act, this part, or any permit issued under this part;

(9) Use any vessel to engage in harvesting after the revocation, or during the period of suspension, of an applicable permit issued under the Act;

(10) Fail to identify, falsely indentify, fail to properly maintain, or obscure the identification of a harvesting vessel or its gear as required by this part;

(11) Falsify, or fail to make, keep, maintain, or submit any record or report required by this part;

(12) Fish in a closed area specified in § 380.20;

(13) Trawl with a mesh size in any part of the trawl net smaller than that allowed for any directed fishing for Antarctic finfishes as specified in § 380.21(a);

(14) Use any means or device which would reduce the size or obstruct the opening of the trawl meshes specified in § 380.21(a);

(15) Possess fish in violation of the catch limit specified in § 380.22;

(16) Discard netting or other substances in the Convention Area in violation of § 380.9; or

(b) It is unlawful to violate or attempt to violate any provision of this part, the Act, any other regulation promulgated under the Act or any permit issued under the Act.

§ 380.11 Penalties.

Any person or harvesting vessel found to be in violation of this part will be subject to the civil and criminal penalty provisions and forfeiture provisions prescribed in the Act, 15 CFR Part 904 (Civil Procedures), and other applicable laws.

BILLING CODE 3510-22-M

---

50 CFR Part 672

[Docket No. 80112–8012]

Groundfish of the Gulf of Alaska

AGENCY: National Marine Fisheries Service (NMFS); NOAA Commerce.

ACTION: Proposed rule; request for comments.

SUMMARY: The Secretary of Commerce (Secretary) has determined that the risk of overharvesting sablefish by hook-and-line vessels in the Gulf of Alaska justifies implementing an "area registration" program to provide information on the numbers of these vessels participating in the fishery. The Secretary, therefore, proposes to implement an area registration program beginning in 1988, that requires operators of hook-and-line vessels to notify the Director, Alaska Region, NMFS (Regional Director), before fishing for groundfish in any area or district which is open to directed fishing for sablefish with hook-and-line gear. This requirement is necessary to allow the Regional Director to estimate fishing effort to avoid exceeding the hook-and-line harvest quotas. This action is intended as a conservation and management measure that will prevent the overharvest of sablefish and promote orderly fishing while providing for full utilization of the sablefish resource.

DATES: Comments must be submitted on or before March 29, 1988.

ADDRESS: Copies of the environmental assessment (EA) for this action may be obtained from Robert W. McVey, Director, National Marine Fisheries Service, P.O. Box 1668, Juneau, AK 99802. Comments on the EA are specifically invited. Comments on the collection of information requirements should be directed to the Office of Information and Regulatory Affairs of OMB, Washington, DC 20503, Attention: Desk Officer for NOAA.

FOR FURTHER INFORMATION CONTACT: Ronald J. Berg (Fishery Biologist, NMFS), 907–586–7230.

SUPPLEMENTARY INFORMATION:

Background

The domestic and foreign groundfish fisheries in the exclusive economic zone (3–200 miles offshore) of the Gulf of Alaska are managed under the Fishery Management Plan for Groundfish of the Gulf of Alaska (FMP). The FMP was developed by the North Pacific Fishery Management Council (Council) under the Magnuson Fishery Conservation and Management Act (Magnuson Act) and is implemented by regulations at 50 CFR 611.92 for foreign fishing and Part 672 for domestic fishing.

Total allowable catches (TACs) of sablefish are established for the Southeast Outside/East Yakutat and West Yakutat Districts of the Eastern

Regulatory Area and for the Central and Western Regulatory Areas in the Gulf of Alaska (see Figure 1 of 50 CFR 611.92). Shares of the TACS are assigned to hook-and-line gear. Large numbers of vessels using hook-and-line gear are expected to participate in the fishery in 1988 and subsequent years. The potential for hook-and-line vessels exceeding harvest quotas for sablefish in any of the above management areas is high.

This fishery grew rapidly in recent years. It displaced the foreign fishery completely in 1986. Numbers of hook-and-line vessels making landings in each of the management areas increased markedly between 1985 and 1986 and between 1986 and 1987 (see tabulation below of numbers of vessels making landings). Percentage increases between 1986 and 1987 ranged between 45 and 79 percent.

NUMBERS OF HOOK-AND-LINE VESSELS MAKING LANDINGS DURING 1985, 1986, AND 1987

	1985	1986	1987	% change 1986–87
Southeast outside East Yakutat districts	115	243	353	45
West Yakutat district	80	131	216	65
Central area	121	216	391	79
Western area	53	63	94	49

Numbers of hook-and-line vessels fishing for sablefish in 1988 will almost certainly increase markedly from the numbers fishing in 1987, because continued high prices for sablefish will attract entrants into the fishery. Also, the Council has identified this fishery as a candidate for limited entry. Increased effort usually occurs in fisheries where limited entry is being considered, because fishermen seek to establish recognized rights in whatever limited entry scheme is implemented.

The directed hook-and-line sablefish fishery will start April 1. Because of the rapid growth of the fishery, projecting fishing effort in 1988 and subsequent years cannot be done with precision by reference to past years. Information on the actual amount of effort is needed to predict when area quotas will be taken; area registration is necessary to obtain this information.

Alternatives to area registration are estimates of effort based on: (1) Counting vessels which are Federally permitted to fish for groundfish with hook-and-line gear in 1988; (2) physically counting vessels in ports; (3) surveying processors to obtain an estimate of the number of vessels buying ice and/or bait; or (4) projecting numbers of vessels based on the increase from 1986 to 1987. Counting Federally permitted hook-and-line vessels would not provide accurate estimates of effort by management area. Physically counting vessels in port or surveying processors is labor intensive, costly, and prone to error. Projecting effort from past effort changes assumes some kind of predictable relationship in the increase in numbers of vessels. NMFS projects that effort will increase, but the extent of the increase is not known.

A program for area registration was implemented for the 1987 sablefish season by emergency rule (52 FR 9171, March 23, 1987) under Magnuson Act section 305(e). The Regional Director was able to use the numbers of vessels registered to estimate the amount of effort on the grounds. The amount of effort was substantial and represented marked increases from vessel effort in 1986. For examples, see the above tabulation of vessels making landings.

When sablefish are abundant and fishermen experience good catches, TACs can be achieved rapidly. Even at current levels of effort, an extra day of fishing can cause the TACs to be grossly exceeded. In 1987, season lengths in the Gulf of Alaska were short. The shortest seasons were in the Southeast Outside/East Yakutat and the West Yakutat Districts where initial season openings were 8–½ and 14 days, respectively. Experience gained by fishery managers during 1987 from the area registration program then in effect will improve the efficacy of area registration as a useful tool for predicting fishery closures. For these reasons, the Secretary proposes to establish area registration is the Gulf of Alaska, which would be in effect in each management area beginning with the 1988 hook-and-line sablefish directed fishing season.

The proposed area registration program will be designed to minimize burdens of fishermen. As in the past, vessel operators will be informed by news releases and contacts with organizations that they may begin registering on March 14, 1988, by calling (a) one of the following numbers during business hours, 8:00 a.m. to 4:30 p.m., local time, Monday through Friday; or between the hours of 8:00 a.m. to 12:00 noon and 1:00 p.m. to 4:30 p.m., local time, Saturday and Sunday: Juneau, Alaska—Fishery Management Division, 706 West Ninth Street, toll-free telephone, in Alaska 800–478–7644, outside Alaska 800–334–7865; or (b), one of the following numbers during business hours, 8:00 a.m. to 4:30 p.m., local time, Monday through Friday: Kodiak, Alaska, Enforcement Division, 1211 Gibson Cove Road, telephone 907–486–3298; Sitka, Alaska, Enforcement Division, Post Office Building, telephone 907–747–6940.

The only information that the Regional Director will require to be submitted is the name of the person who is registering, the vessel's Federal Gulf of Alaska groundfish permit number, the regulatory area or regulatory district being registered for, and the date the vessel will start fishing. All groundfish fishermen using hook-and-line gear who are regulated under 50 CFR Part 672 must register before fishing for groundfish in any of the regulatory areas or districts in the Gulf of Alaska that are open to directed fishing for sablefish with hook-and-line gear. This means fishermen will be required to register each time they begin fishing in a different area. The Secretary has specified separate sablefish TACs for the Western Area, Central Area, West Yakutat District, and the combined East Yakutat/Southeast Outside Districts. Fishermen who intend to fish in either the East Yakutat District or Southeast Outside District, therefore, are required to register for the combined pair.

Even those fishermen who are fishing with hook-and-line gear for other groundfish species, such as rockfish and Pacific cod, must register if they are fishing in areas open to directed fishing for sablefish with hook-and-line gear. Imposition of area registration on all hook-and-line fishermen during the sablefish directed fishing season is necessary to facilitate enforcement of area registration. Otherwise, no practical means exist to differentiate whether a hook-and-line fisherman is fishing for sablefish or some other species of groundfish regulated under 50 CFR Part 672. As a practical matter, however, the economic return to fishermen fishing for sablefish is so great during the short sablefish directed

fishing seasons that few hook-and-line fishermen will be fishing for any groundfish species other than sablefish.

Classification

The Assistant Administrator for Fisheries, NOAA, has determined that this rule is necessary for the conservation and management of the sablefish fishery in the Gulf of Alaska and that it is consistent with the Magnuson Act and other applicable law.

The Alaska Region, National Marine Fisheries Service, prepared an environmental assessment/regulatory impact review (EA/RIR) for this rule. The Assistant Administrator for Fisheries concluded that no significant impact on the environment will occur as a result of this rule. You may obtain a copy of the EA/RIR from the Regional Director at the address above.

The NOAA Administrator determined that this proposed rule is not a "major rule" requiring a regulatory impact analysis under Executive Order 12291. This determination is based on the socio-economic impacts discussed in the EA/RIR. A program for area registration is superior to other alternatives considered. Since NMFS conducted an area registration program during the 1987 hook-and-line fishery, NMFS considers costs incurred in that program to be representative of those that will occur in future years. The analysis is summarized as follows:

In 1987, fishermen registered with the National Marine Fisheries Service either in person or by telephone at offices in Juneau, Kodiak, or Sitka. If they registered by telephone, they called either from a local telephone or long distance. For long distance telephone calls, NMFS provided a toll-free telephone number both for calls from within and from outside Alaska. Actual billings to NMFS were $437 for long distance calls made from outside Alaska and $2,244 for long distance calls made from within Alaska.

NMFS also hired a temporary employee whose main job was to answer telephone calls to register fishermen. His salary of $1,680 was a cost to NMFS. Some time was spent by existing NMFS personnel in administering the program. During the time that area registration was in effect, NMFS personnel spent about 1 man-week, or 40 hours, in administration of the program. At a salary of about $20 per hour, the labor invested by NMFS was worth about $800. Since no new NMFS personnel were hired to administer the program, this amount was not a direct cost as a result of the area registration program, but is included here for perspective.

Although the costs of making telephone calls were borne by NMFS, fishermen were required to spend some of their own time to register prior to fishing. NMFS estimates that fishermen spent an average of 5 minutes per registration during 1987. Using 1987 as an estimate of costs of the program for subsequent years, about 770 fishermen will register a total of 1,118 times. At 5 minutes per registration, 5,590 minutes, or 93 hours will be spent by fishermen in this program. If time expended is worth $10 per hour, fishermen will spend about $930 in this program, or an average of about $1.20 per fishermen. This analysis shows that the total costs, including NMFS labor and private costs, will be about $5,300.

Successful management of the sablefish fishery prevents stocks from being overharvested, which reduces the risk that overfishing will occur. The purpose of the area registration program is to promote successful management of the hook-and-line sablefish fishery. The benefits of this program can be expressed in terms of the value of the sablefish harvest. In 1988, the total exvessel value of sablefish in the hook-and-line fishery will be about $34 million. This value is estimated from the total amount of sablefish assigned to hook-and-line gear, which is 23,100 metric tons, multiplied by 2,204 pounds per metric ton, multiplied by 0.67, which is the round weight to dressed weight conversion factor, and multiplied by $1 per pound dressed weight. To the extent that successful management prevents overharvesting the quota, this program conveys a benefit to the fishermen by promoting a stable fishery in future years, which in 1988 is worth about $34 million exvessel.

The General Counsel of the Department of Commerce certified to the Small Business Administration that this proposed rule, if adopted, will not have a significant economic impact on a substantial number of small entities because registration for a particular area is estimated to take fishermen only about 5 minutes to either register in person or place a toll free telephone call at a time cost of about $1.20 per fishermen (using a labor rate of $10 per hour). As a result, a regulatory flexibility analysis was not prepared.

This rule contains a collection of information requirement subject to the Paperwork Reduction Act. A request to collect this information has been submitted to the Office of Management and Budget for approval.

NOAA has determined that this rule will be implemented in a manner that is consistent to the maximum extent practicable with the approved coastal zone management program of the State of Alaska. This determination has been submitted for review by the responsible State agencies under section 307 of the Coastal Zone Management Act.

This proposed rule does not contain policies with federalism implications sufficient to warrant preparation of a federalism assessment under Executive Order 12612.

List of Subjects in 50 CFR Part 672

Fisheries.

Dated: March 14, 1988.

James E. Douglas, Jr.,

Deputy Assistant Administrator for Fisheries, National Marine Fisheries Service.

For the reasons set out in the preamble, Part 672 is proposed to be amended as follows:

PART 672—GROUNDFISH OF THE GULF OF ALASKA

1. The authority citation for Part 672 continues to read as follows:

Authority: 16 U.S.C. 1801 *et seq.*

2. For reasons given in the preamble, a new § 672.6 is added to read as follows:

§ 672.6 Area registration.

(a) *General.* The operator of any fishing vessel regulated under this part must register the vessel with the Regional Director and be issued a registration number before fishing for groundfish with hook-and-line gear in any regulatory area or regulatory district, defined at § 672.2 of this part, that is open to directed fishing for sablefish with hook-and-line gear, except that registration will be combined for the Southeast Outside and East Yakutat Districts.

(b) *Information required for area registration.* For each registration, registrants must select only one regulatory area or regulatory district and provide the following information:

(1) The name of the vessel operator;

(2) The name of the vessel;

(3) The vessel's Federal Gulf of Alaska groundfish permit number;

(4) The date the vessel will begin fishing for groundfish in the selected regulatory area or regulatory district with hook-and-line gear; and

(5) The regulatory area or regulatory district in which such hook-and-line fishing will take place.

(c) *Limitations.* (1) Any registration under this section will have the effect of canceling any previous registration as of the date specified under paragraph (b)(4) of this section.

(2) The information required by paragraph (b) of this section must be submitted at:

(i) One of the following three NMFS locations in person or by telephone at one of the following numbers during business hours, 8:00 a.m. to 4:30 p.m., local time, Monday through Friday:

Fishery Management Division, National Marine Fisheries Service, 709 W. 9th Street, Juneau, Alaska, Toll-free telephone (In Alaska) 800–478–7644, (Outside Alaska) 800–334–7865

Enforcement Division, National Marine Fisheries Service, 1211 Gibson Cove Road, Kodiak, Alaska, Telephone 907–486–3298

Enforcement Division, National Marine Fisheries Service, Sitka, Alaska, Telephone 907–747–6940

or

(ii) at one of the following numbers between the hours of 8:00 a.m. to 12:00 noon, and 1:00 p.m. to 4:30 p.m., local time, Saturday and Sunday:

Fishery Management Division, National Marine Fisheries Service, Juneau, Alaska, Toll-free telephone (In Alaska) 800–478–7644, (Outside Alaska) 800–334–7865.

(3) It is unlawful for any person to fish for groundfish from a vessel regulated under this part with hook-and-line gear in any regulatory area or regulatory district, which is open to directed fishing for sablefish with hook-and-line gear, unless that vessel has been registered in accordance with this section and is in receipt of a registration number.

Notices

Federal Register

Vol. 53, No. 52

Thursday, March 17, 1988

This section of the FEDERAL REGISTER contains documents other than rules or proposed rules that are applicable to the public. Notices of hearings and investigations, committee meetings, agency decisions and rulings, delegations of authority, filing of petitions and applications and agency statements of organization and functions are examples of documents appearing in this section.

ADMINISTRATIVE CONFERENCE OF THE UNITED STATES

Meeting of the Committee on Judicial Review

ACTION: Committee on Judicial Review; notice of public meetings.

SUMMARY: Pursuant to the Federal Advisory Committee Act (Pub. L. 92–463), notice is hereby given of two meetings of the Committee on Judicial Review of the Administrative Conference of the United States. The committee will discuss two draft reports, one of which will be considered at each meeting: a study concerning assignment of federal court jurisdiction over interlocutory challenges to agency action, prepared by Professor Thomas O. Sargentich, Washington School of Law, American University, and a study of nonacquiescence in federal court decisions by administrative agencies, prepared by Professors Samuel Estreicher and Richard Revesz, New York University School of Law.

DATES: Thursday, March 31, 1988, at 9:30 a.m. (Topic: Sargentich study of jurisdiction over interlocutory challenges). Thursday, April 7, 1988, at 10:00 a.m. (Topic: Estreicher and Revesz study of nonacquiescence by agencies).

Location: Office of the Administrative Conference of the United States, Suite 500, 2120 L Street, NW., Washington, DC 20037.

Public Participation: The committee meeting is open to the interested public, but limited to the space available. Persons wishing to attend should notify the contact person at least two days prior to the meeting. The committee chairman, if he deems it appropriate, may permit members of the public to present oral statements at the meeting. Any member of the public may file a written statement with the committee before, during, or after the meeting. Minutes of the meeting will be available on request.

FOR FURTHER INFORMATION CONTACT: Mary Candace Fowler, Office of the Chairman, Administrative Conference of the United States, 2120 L Street, NW., Suite 500, Washington, DC 20037. Telephone: (202) 254–7065.

Dated: March 14, 1988.

Jeffrey S. Lubbers,

Research Director.

BILLING CODE 6110-01-M

DEPARTMENT OF AGRICULTURE

Office of International Cooperation and Development

Cooperative Agreements; Colorado State University

AGENCY: Office of International Cooperation and Development (OICD), USDA.

ACTION: Notice of intent.

Activity: OICD intends to enter into a Cooperative Agreement with Colorado State University to provide partial support funding for collaborative international research on Increasing Plant Growth and Disease Resistance with New Trichoderma harizianum Mutants.

Authority: Section 1458 of the National Agricultural Research, Extension and Teaching Policy Act of 1977, as amended (7 U.S.C. 3291), and the Food Security Act of 1985 (Pub. L. 99–198).

OICD announces the availability of funds in fiscal year 1988 (FY1988) to enter into a cooperative agreement with Colorado State University (CSU) to collaborate on international research for Increasing Plant Growth and Disease Resistance with New Trichoderma harizianum Mutants. Approximately $20,000 will be available in FY1988 to CSU to conduct collaborative research with Hungary's University of Technical Sciences.

Assistance will be provided only to CSU, which is contributing resources and experience to conduct the research. Funds provided by OICD will be used for supplies, research assistants and travel costs. Hungary's University of Technical Sciences will support their portion of the research.

Based on the above, this is not a formal request for application. It is estimated $20,000 will be available in FY1988 to support this work. A total of $54,480 is anticipated to be provided for this cooperative research effort over a three-year period, subject to the availability of federally appropriated funds in future fiscal years.

Information on proposed Agreement #58–319R–8–023 may be obtained from: Nancy J. Croft, Contracting Officer, USDA/OICD/Management Services Branch, Washington, DC 20250–4300.

Date: March 14, 1988.

Allen Wilder,

Contracting Officer.

BILLING CODE 3410-DP-M

Cooperative Agreements; Howard University

AGENCY: Office of International Cooperation and Development (OICD), USDA.

ACTION: Notice of intent.

Activity: OICD intends to enter into a Cooperative Agreement with Howard University to provide partial support funding for collaborative international research on Vernonia galamensis as Potential Raw Materials for Industrial Use.

Authority: Section 1458 of the National Agricultural Research, Extension and Teaching Policy Act of 1977, as amended (7 U.S.C. 3291), and the Food Security Act of 1985 (Pub. L. 99–198).

OICD announces the availability of funds in fiscal year 1988 (FY 1988) to enter into a cooperative agreement with Howard University to collaborate on international research on the utilization of Vernonia galamensis. Approximately $25,000 will be available in FY 1988 to Howard University's Departments of Chemistry and Nutrition and Food to conduct collaborative research with the Department of Research and Specialist Services in Zimbabwe's Ministry of Agriculture.

Assistance will be provided only to Howard University, which is contributing resources and experience to conduct the research. Funds provided by OICD will be used to supplement costs for supplies, processing, laboratory assistants, and travel. Zimbabwe's Department of Research and Specialist Services in the Ministry of Agriculture will support their portion of the research.

Based on the above, this is not a formal request for application. It is estimated $25,000 will be available in FY 1988 to support this work. A total of $50,000 is anticipated to be provided for this cooperative research effort over a two-year period, subject to the availability of federally appropriated funds in future fiscal years.

Information on proposed Agreement #58–319R–8–020 may be obtained from: Nancy J. Croft, Contracting Officer, USDA/OICD/Management Services Branch, Washington, DC 20250–4300.

Allen Wilder,

Contracting Officer.

Date: March 14, 1988.

BILLING CODE 3410-DP-M

Cooperative Agreements; Oregon State University

AGENCY: Office of International Cooperation and Development (OICD), USDA.

ACTION: Notice of intent.

Activity: OICD intends to enter into a Cooperative Agreement with Oregon State University to provide partial support funding for collaborative international research on Application of US and French Data Bases to Evaluate Crop Water Requirement Estimating Methods and Effects of Climate.

Authority: Section 1458 of the National Agricultural Research, Extension and Teaching Policy Act of 1977, as amended (7 U.S.C. 3291), and the Food Security Act of 1985 (Pub. L. 99–198).

OICD announces the availability of funds in fiscal year 1988 (FY1988) to enter into a cooperative agreement with Oregon State University to collaborate on international research on Application of US and French Data Bases to Evaluate Crop Water Requirement Estimating Methods and Effects of Climate. Approximately $22,000 will be available in FY1988 to Oregon State University's Department of Agriculture Engineering to conduct collaborative research with France's National Institute of Agronomy Research.

Assistance will be provided only to Oregon State University, which is contributing resources and experience to conduct the research. Funds provided by OICD will be used to supplement costs for equipment and supplies, a research assistant, and international travel. France's National Institute of Agronomy Research will support their portion of the research.

Based on the above, this is not a formal request for application. It is estimated $22,000 will be available in FY1988 to support this work. A total of $55,800 is anticipated to be provided for this cooperative research effort over a three-year period, subject to the availability of federally appropriated funds in future fiscal years.

Information on proposed Agreement #58–319R–8–021 may be obtained from: Nancy J. Croft, Contracting Officer, USDA/OICD/Management Services Branch, Washington, DC 20250–4300.

Date: March 14, 1988.

Allen Wilder,

Contracting Officer.

Cooperative Agreements; University of Rhode Island

AGENCY: Office of International Cooperation and Development (OICD), USDA.

ACTION: Notice of intent.

Activity: OICD intends to enter into a Cooperative Agreement with the University of Rhode Island to provide partial support funding for collaborative international agricultural research on the Colorado Potato Beetle's Ecology, Natural Enemies, and Pest Potential.

Authority: Section 1458 of the National Agricultural Research, Extension and Teaching Policy Act of 1977, as amended (7 U.S.C. 3291), and the Food Security Act of 1985 (Pub. L. 99–198).

OICD announces the availability of funds in fiscal year 1988 (FY1988) to enter into a cooperative agreement with the University of Rhode Island to collaborate on international research on the Colorado Potato Beetle's Ecology, Natural Enemies, and Pest Potential. Approximately $21,000 will be available in FY1988 to the University's Department of Plant Sciences to conduct collaborative research with Mexico's Morelos State University.

Assistance will be provided only to the University of Rhode Island, which is contributing resources and experience to conduct the research. Funds provided by OICD will be used to supplement costs of equipment and supplies, research assistants and travel. Mexico's Morelos State University will support their portion of the research.

Based on the above, this is not a formal request for application. It is estimated $21,000 will be available in FY1988 to support this work.

Information on proposed Agreement #58–319R–8–024 may be obtained from: Nancy J. Croft, Contracting Officer, USDA/OICD/Management Services Branch, Washington, DC 20250–4300.

Date: March 14, 1988.

Cooperative Agreements; Rutgers University

AGENCY: Office of International Cooperation and Development (OICD), USDA.

ACTION: Notice of intent.

Activity: OICD intends to enter into a Cooperative Agreement with Rutgers University to provide partial support funding for collaborative international research on Integrated Vegetable Production Systems for Controlled Environment Agriculture.

Authority: Section 1458 of the National Agricultural Research, Extension and Teaching Policy Act of 1977, as amended (7 U.S.C. 3291), and the Food Security Act of 1985 (Pub. L. 99–198).

OICD announces the availability of funds in fiscal year 1988 (FY1988) to enter into a cooperative agreement with Rutgers University to collaborate on international research on Integrated Vegetable Production Systems for Controlled Environment Agriculture. Approximately $20,000 will be available in FY1988 to Rutgers University to conduct collaborative research with the Dutch Ministry of Agriculture's Institute of Agricultural Engineering, Vegetable Research Station, and Center for Agrobiological Research.

Assistance will be provided only to Rutgers University, which is contributing resources and experience to conduct the research. Funds provided by OICD will be used to supplement costs for supplies, a research assistant, and international travel. The Dutch Ministry of Agriculture will support their portion of the research.

Based on the above, this is not a formal request for application. It is estimated $20,000 will be available in FY1988 to support this work. A total of $49,655 is anticipated to be provided for this cooperative research effort over a three-year period, subject to the availability of federally appropriated funds in future fiscal years.

Forest Service

Supplements To Draft Environmental Impact Statements for Land and Resource Management Plans of the Deschutes, Ochoco, Okanogan, Olympic, Siuslaw, Wallowa-Whitman, and Wenatchee National Forests of Oregon and Washington

AGENCY: Forest Service, USDA.

ACTION: Notice of Intent to prepare supplements to draft environmental impact statements for seven National Forests in Oregon and Washington.

SUMMARY: The Department of Agriculture, Forest Service, has withdrawn its intent to prepare a supplements to draft environmental impact statements (EIS) for the Deschutes, Ochoco, Okanogan, Olympic, Siuslaw, Wallowa-Whitman, and Wenatchee National Forests. The purpose of each supplement was to present for public review and comment additional information that was not included in the draft EIS and proposed plan for these seven National Forests. The technical basis for the proposed supplement is still undergoing review at the national level, creating uncertainty about the need and scope for supplements. In view of this uncertainty, the Notice of Intent which scheduled documents for public review in August and September 1987, is now being withdrawn.

The Notice of Intent, published in the **Federal Register** of July 17, 1987, is hereby rescinded (52 FR 27035).

FOR FURTHER INFORMATION CONTACT: Questions and comments about these supplements should be directed to Tom Nygren, Acting Director of Planning, P.O. Box 3623, Portland, OR 97208; Phone (503) 221–2387.

Dated: March 11, 1988.

COMMISSION ON CIVIL RIGHTS

Kentucky Advisory Committee; Public Meeting

Notice is hereby given, pursuant to the provisions of the Rules and Regulations of the U.S. Commission on Civil Rights, that a meeting of the Kentucky Advisory Committee to the Commission will convene at 1:00 p.m. and adjourn at 3:30 p.m., on March 24, 1988, at the Radisson Hotel, Broadway and Vine Streets, Lexington, Kentucky. The purpose of the meeting is to review for approval a briefing report summarizing information received at community forums conducted by the Advisory Committee in Lexington and Louisville and to develop program plans for FY 1988.

Persons desiring additional information, or planning a presentation to the Committee, should contact Committee Chairperson, Porter G. Peeples, Sr., or Melvin Jenkins, Director of the Central Regional Division (816) 374–5253, (TDD 816/374–5009). Hearing impaired persons who will attend the meeting and require the services of a sign language interpreter, should contact the Regional Division at least five (5) working days before the scheduled date of the meeting.

The meeting will be conducted pursuant to the provisions of the rules and regulations of the Ccmmission.

Dated at Washington, DC, March 2, 1988.

Susan J. Prado,

Acting Staff Director.

DEPARTMENT OF COMMERCE

International Trade Administration

Advisory Committees for Trade Policy Matters

SUMMARY: In accordance with subsection 135(c) of the Trade Act of 1974, 19 USC 2155, as amended by the Trade Agreements Act of 1979, (Pub. L. 95–39), the provisions of the Federal Advisory Committee Act, 5 U.S.C. App. 2, and 41 CFR Subpart 101–6.10 (1987), Federal Advisory Committee Management Rule, it has been determined by the Secretary of Commerce (the Secretary) and the United States Trade Representative (the USTR) that the renewal of the Advisory Committes for Trade Policy Matters is in the public interest.

- Committee of Chairmen of Industry Advisory Committees for Trade Policy Matters
- Industry Sector Advisory Committees for Trade Policy Matters
  - (ISCA 1)—Aerospace Equipment
  - (ISCA 2)—Capital Goods
  - (ISCA 3)—Chemicals and Allied Products
  - (ISCA 4)—Consumer Goods
  - (ISCA 5)—Electronics and Instrumentation
  - (ISCA 6)—Energy
  - (ISCA 7)—Ferrous Ores and Metals
  - (ISCA 8)—Footwater, Leather, and Leather Products
  - (ISCA 9)—Industrial and Construction Material and Supplies
  - (ISCA 10)—Lumber and Wood Products
  - (ISCA 11)—Nonferrous Ores and Metals
  - (ISCA 12)—Paper and Paper Products
  - (ISCA 13)—Services
  - (ISCA 14)—Small and Minority Bunisess
  - (ISCA 15)—Textiles and Apparel
  - (ISCA 16)—Transportation, Construction, and Agricultural Equipment
  - (ISCA 17)—Wholesaling and Retailing
- Industry Functional Advisory Committee on Customs Matters
- Industry Functional Advisory Committee on Standards
- Industry Functional Advisory Committee on Intellectual Property Rights

The committees were established in 1980, and renewed in 1982, 1984, and 1986 to provide technical and policy advice and information to the Secretary and the USTR on trade policy matters, including factors relevant to U.S. positions in trade negotiations, and on other matters arising in connection with the administration of U.S. trade policy. Members of each committee are appointed by and serve at the discretion of the Secretary and the USTR. It is proposed that each committee will meet at least semi-annually at the request of the Secretary and the USTR, and will function solely as an advisory body in compliance with the provisions of the Federal Advisory Committee Act. The Trade Advisory Center, International Trade Administration (ITA) of the Department of Commerce, administers the program.

Copies of the Committees' charters will be filed with appropriate committees of the Congress and copies will be forwarded to the Library of Congress.

EFFECTIVE DATE: March 8, 1988.

Membership: Representatives from industry or industry associations wishing to be considered for appointment to serve on these committees are requested to make application in writing to the Trade Advisory Center, Room H–4012, U.S. Department of Commerce, Washington, DC 20230, telephone: (202) 377–3268. Comments and inquiries may be sent to the same address.

FOR FURTHER INFORMATION CONTACT: Clare Soponis, Director, Trade Advisory Center, telephone (202) 377–3268.

Date: March 11, 1988.

Michael R. Czinkota,

Deputy Assistant Secretary for Trade Information and Analysis.

BILLING CODE 3510-DR-M

Guaranteed Access Levels for Cotton and Man-Made Fiber Textile Products From the Dominican Republic

March 14, 1988.

FOR FURTHER INFORMATION CONTACT: Naomi Freeman, International Trade Specialist, Office of Textiles and Apparel, U.S. Department of Commerce, (202) 377–4212.

Background

A notice was published in the **Federal Register** on December 28, 1987 (52 FR 48858) announcing that the United States had requested consultations to establish levels of restraint on exports from the Dominican Republic of products in Categories 338/339 (cotton knit shirts), 342/642 (cotton and man-made fiber skirts) and 647/648 (man-made fiber trousers, slacks and shorts). Consultations are scheduled to be held this month.

In previous consultations on called categories with the Dominican Republic, guaranteed access levels have been established for shipments qualifying for the Special Access Program.

In view of this fact, it is recommended that firms that intend to use the guaranteed access level, should one be established as a result of consultations on these called categories, begin using form ITA–370P to accompany the shipment of cut parts exported from the United States that would qualify under the Special Access Program.

This action is without prejudice to the outcome of consultations with the Domician Republic on these called categories.

U.S. Customs will sign the first section of the form ITA–370P accompanying the shipment of cut parts exported from the United States. Until notification to the contrary, all shipments of products in these categories will require a visa issued by the Government of the Dominican Republic for entry into the United States. Entry cannot be made under the Special Access Program.

James H. Babb,

Chairman, Committee for the Implementation of Textile Agreements.

[FR Doc. 88–5877 Filed 3–16–88; 8:45 am]

BILLING CODE 3510-DR-M

Adjustment of Import Limits for Certain Cotton and Man-Made Fiber Textile Products Produced or Manufactured in Sri Lanka

March 14, 1988.

The Chairman of the Committee for the Implementation of Textile Agreement (CITA), under the authority contained in E.O. 11651 of March 3, 1972, as amended, has issued the directive published below to the Commissioner of Customs to be effective on March 18, 1988. For further information contact Kimbang Pham, International Trade Specialist, Office of Textiles and Apparel, U.S. Department of Commerce, (202) 377–4212. For information on the quota status of these limits, please refer to the Quota Status Reports which are posted on the bulletin boards of each Customs port or call (202) 343–6580. For information on embargoes and quota re-openings, please call (202) 377–3712.

Summary

In the letter published below, the Chairman of the Committee for the implementation of Textile Agreements directs the Commissioner of Customs to restore unused carryforward to the current limits for Categories 341 and 648.

Background

A CITA directive dated May 12, 1987 (52 FR 18413), as amended on November 16, 1987 (52 FR 44623) and December 30, 1987 (53 FR 52), established limits for cotton and man-made fiber textile products in Categories 341 and 648, among others, produced or manufactured in Sri Lanka and exported during the period which began on June 1, 1987 and extended through December 31, 1987. The November 16, 1987 directive is being rescinded.

A CITA directive also dated December 30, 1987 (53 FR 53) established import restraint limits for certain cotton, wool, man-made fiber, silk blend and other vegetable fiber textiles and textile products, including Categories 341 and 648, produced or manfactured in Sri Lanka and exported during the five-month period which began on January 1, 1988 and extends through May 31, 1988.

Under the terms of the Bilateral Cotton, Wool and Man-Made Fiber Textile Agreement of May 10, 1983, as amended, between the Governments of the United States and Sir Lanka, the current limits for Categories 341 and 648 are being adjusted to restore carryforward that was requested but not used during the previous agreement year which began on June 1, 1986 and extended through May 31, 1987.

A description of the textile categories in terms of T.S.U.S.A. numbers in available in the CORRELATION: Textile and Apparel Categories with Tariff Schedules of the United States Annotated (see **Federal Register** notice 52 FR 47745, dated December 11, 1987).

This letter and the actions taken pursuant to it are not designed to implement all of the provisions of the bilateral agreement, but are designed to assist only in the implementation of certain of its provisions.

James H. Babb,

Chairman, Committee for the Implementation of Textile Agreement.

Committee for the Implementation of Textile Agreements

March 14, 1988.

Commissioner of Customs,
Department of the Treasury,
Washington, DC 20229

Dear Mr. Commissioner: This directive cancels and supersedes the directive of November 16, 1987 from the Chairman, Committee for the Implementation of Textile Agreements, adjusting the limits of cotton and man-made fiber textile products in Categories 341 and 648, produced or manufactured in Sri Lanka and exported during the twelve-month period which began on June 1, 1987 and extends through May 31, 1988.

This directive amends, but does not cancel, the directive issued to you on December 30, 1987 concerning imports into the United States of certain cotton, wool, man-made fiber, silk blend and other vegetable fiber textiles and textile products, produced or manufactured in Sri Lanka and exported during the five-month period which began on January 1, 1988 and extends through May 31, 1988.

Effective on March 18, 1988, the directive of December 30, 1987 is amended to adjust limits for cotton and man-made fiber textile products in the following categories, as provided under the terms of the bilateral agreement of May 10, 1983, as amended [1]

Category	12-mo. adjusted limit [1]
341	222,915 doz.
648	73,611 doz.

[1] The limits have not been adjusted to account for any imports exported after December 31, 1987.

The Committee for the Implementation of Textile Agreements has determined that these actions fall within the foreign affairs

---

[1] The bilateral agreement provides, in part, that: (1) specific limits and sublimits may be exceeded by certain designated percentages of the square yard equivalent total, provided the amount of the increase is compensated for by a decrease in equivalent square yards in one or more other specific limits; (2) specific limits may be increased for carryover or carryforward; (3) administrative adjustments or arrangements may be made to resolve minor problems arising in the implementation of the agreement.

BEST COPY AVAILABLE

exception to the rulemaking provisions of 5 U.S.C. 553(a)(1).

Sincerely,

James H. Babb,

Chairman, Committee for the Implementation of Textile Agreements.

BILLING CODE 3510-DR-M

Changes in Authority To Issue Export Visas and Certification for Certain Cotton, Wool, Man-Made Fiber, Silk Blend and Other Vegetable Fiber Textiles and Textile Products From the Dominican Republic

March 11, 1988.

AGENCY: Committee for the Implementation of Textile Agreements.

ACTION: Notice.

AUTHORITY: Bilateral Cotton, Wool and Man-Made Fiber Textile Agreement of December 18, 1986 between the Governments of the United States and the Dominican Republic

SUMMARY: The Government of the Dominican Republic has notified the United States Government that, effectively immediately, Dominga Martinez Cruz has been authorized to issue export visas and certifications for textiles and textile products exported from the Dominican Republic, replacing Jose Manuel Fernandez. Accordingly, shipments of textiles and textile products accompanied by an export visa or certification issued by Jose Manuel Fernandez will be denied entry by U.S. Customs. Importers are advised that a new visa must be obtained or a visa waiver must be requested from the Government of the Dominican Republic.

FOR FURTHER INFORMATION CONTACT: Naomi Freeman, International Trade Specialist, Office of Textiles and Apparel, U.S. Department of Commerce, (202) 377–4212.

SUPPLEMENTARY INFORMATION: See **Federal Register** notices 46 FR 34619, dated July 2, 1981; and 51 FR 6595, dated March 4, 1987.

BILLING CODE 3510-DR-M

Amendment to the Export Visa Arrangement for Certain Cotton and Man-Made Fiber Textile Products From Indonesia

March 14, 1988.

The Chairman of the Committee for the Implementation of Textile Agreements (CITA), under the authority contained in E.O. 11651 of the March 3, 1972, as amended, has issued the directive published below to the Commissioner of Customs to be effective on March 18, 1988. For further information contact Jennifer Tallarico, International Trade Specialist, Office of Textiles and Apparel, (202) 377–4212.

Summary

In the letter published below, the Chairman of the Committee for the Implementation of Textile Agreements directs the Commissioner of Customs to prohibit entry into the United States for consumption, or withdrawal from warehouse for consumption, into the United States of textile products in merged Categories 342/642 exported from Indonesia on and after July 1, 1987 for which the Government of Indonesia has not issued an appropriate export visa.

Background

A CITA directive dated May 19, 1987 was published in the **Federal Register** (52 FR 20134) which announced the establishment of a new export visa arrangement for entry into the United States for consumption, or withdrawal from warehouse for consumption, of certain cotton, wool, man-made fiber, silk blend and other vegetable fiber textiles and textile products, produced or manufactured in Indonesia.

A further CITA directive dated December 24, 1987 was published in the **Federal Register** (52 FR 49189) which amended the visa arrangement to coincide with the implementation of the new category system.

Under the terms of the Bilateral Textile Agreement of September 25 and October 3, 1985, as amended, the directive of May 19, 1987, as amended, is further amended to include coverage of cotton and man-made fiber textile products in merged Categories 342/642, produced or manufactured in Indonesia and exported to the United States on and after July 1, 1987.

A description of the textile categories in terms of T.S.U.S.A. numbers is available in the CORRELATION: Textile and Apparel Categories with Tariff Schedules of the United States Annotated (see **Federal Register** notice 52 FR 47745, dated December 11, 1987).

James H. Babb,

Chairman, Committee for the Implementation of Textile Agreements.

Committee for the Implementation of Textile Agreements

March 14, 1988.

Commissioner of Customs,

Department of the Treasury, Washington, DC 20229.

Dear Mr. Commissioner: This directive amends, but does not cancel, the directive issued to you on May 19, 1987, as amended on December 24, 1987, by the Chairman of the Committee for the Implementation of Textile Agreements concerning export visa requirements for certain cotton, wool, man-made fiber, silk blend and other vegetable fiber textiles and textile products, produced or manufactured in Indonesia.

Effective on March 18, 1988, you are directed to prohibit shipments of cotton and man-made fiber textile products in merged Categories 342/642 entered for consumption or withdrawn from warehouse for consumption into the Customs territory of the United States (i.e., the 50 States, the District of Columbia and the Commonwealth of Puerto Rico), which have been produced or manufactured in Indonesia and exported on and after July 1, 1987 from Indonesia for which the Government of Indonesia has not issued an appropriate visa.

Further, should additional categories, merged categories or part categories be added to the bilateral agreement or become subject to import quotas, the entire category or categories shall be automatically included in the coverage of the visa arrangement. Merchandise exported on or after the date the category is added to the agreement or becomes subject to import quotas shall require a visa. In the event that a sublimit of a merged category exists, or is established, a visa for that category is required.

The Committee for the Implementation of Textile Agreements has determined that these actions fall within the foreign affairs exception to the rulemaking provisions of 5 U.S.C. 553(a)(1).

Sincerely,

James H. Babb,

Chairman, Committee for the Implementation of Textile Agreements.

[FR Doc. 88–5880 Filed 3–16–88; 8:45 am]

BILLING CODE 3510-DR-M

Request for Public Comment on Bilateral Textile Consultations With the Government of Jamaica to Review Trade in Categories 342/642

March 14, 1988.

The Chairman of the Committee for the Implementation of Textile Agreements (CITA), under the authority contained in E.O. 11651 of March 3, 1972, as amended, has issued the directive published below to the Commissioner of Customs to be effective on March 18, 1988. For further information contact Naomi Freeman, International Trade Specialist, Office of Textiles and Apparel, U.S. Department of Commerce, (202) 377–4212. For information on the quota status of this limit, please refer to the Quota Status Reports which are posted on the bulletin boards of each Customs port. For information on

embargoes and quota re-openings, please call (202) 377–3715. For information on categories on which consultations have been requested call (202) 377–3740.

Summary

In the letter published below, the Chairman of the Committee for the Implementation of Textile Agreements directs the Commissioner to establish a ninety-day limit for cotton and man-made fiber textile products, produced or manufactured in Jamaica and exported during the period February 8, 1988 through May 7, 1988.

Background

On February 8, 1988, the Government of the United States requested consultations with the Government of Jamaica with respect to Categories 342/642 (cotton and man-made fiber skirts). This request was made under the terms of the bilateral textile agreement between the Governments of the United States and Jamaica of August 27, 1986, as amended, relating to trade in cotton, wool, man-made fiber, silk blend and other vegetable fiber textiles and textile products which provides for consultations when the orderly development of trade between the two countries may be impeded by market disruption, or the threat thereof, due to imports.

According to the terms of the bilateral agreement, if no mutually satisfactory solution is reached during consultations, the United States may establish a prorated specific limit for the period which begins on May 8, 1988 and extends through December 31, 1988 at a level of 94,253 dozen.

The Government of the United States has decided, pending a mutually satisfactory solution, to control imports in Categories 342/642 exported during the ninety-day consultation period which began on February 8, 1988 and extends through May 7, 1988 at the prescribed limit of 42,275 dozen.

In the event the limit established for the ninety-day period is exceeded, such excess amounts, if allowed to enter, may be charged to the prorated specific limit specified above.

The United States remains committed to finding a solution concerning these categories. Should such a solution be reached in consultations with the Government of Jamaica, further notice will be published in the **Federal Register**.

In previous consultations with the Government of Jamaica on called categories, guaranteed access levels have been established for shipments qualifying for the Special Access Program.

In view of this fact, it is recommended that firms that intend to use the guaranteed access level, should one be established as a result of consultations on these categories, begin using form ITA–370P to accompany the shipment of cut parts exported from the United States that would qualify under the Special Access Program.

This action is without prejudice to the outcome of consultations with Jamaica on these called categories.

U.S. Customs will sign the first section of the form ITA–370P accompanying the shipment of cut parts exported from the United States. Until further notification, all shipments of products in these categories will require a visa issued by the Government of Jamaica for entry into the United States. Entry cannot be made under the Special Access Program.

A summary market statement for these categories follows this notice.

A description of the textile categories in terms of T.S.U.S.A. numbers is available in the CORRELATION: Textile and Apparel Categories with Tariff Schedules of the United States Annotated (see **Federal Register** notice 52 FR 47745, dated December 11, 1987).

Anyone wishing to comment or provide data or information regarding the treatment of Categories 342/642, under the agreement with Jamaica, or in any other aspect thereof, or to comment on domestic production or availability of apparel products included in the categories, is invited to submit such comments or information in ten copies to Mr. James H. Babb, Chairman, Committee for the Implementation of Textile Agreements, International Trade Administration, U.S. Department of Commerce, Washington, DC 20230.

Because the exact timing of the consultations is not yet certain, comments should be submitted promptly. Comments or information submitted in response to this notice will be available for public inspection in the Office of Textiles and Apparel, Room H3100, U.S. Department of Commerce, 14th and Constitution Avenue, NW., Washington, DC and may be obtained upon written request.

Further comment may be invited regarding particular comments or information received from the public which the Committee for the Implementation of Textile Agreements considers appropriate for further consideration.

The solicitation of comments regarding any aspect of the agreement or the implementation thereof is not a waiver in any respect of the exemption contained in 5 U.S.C. 553(a)(1) relating to matters which constitute "a foreign affairs function of the United States."

James H. Babb,

Chairman, Committee for the Implementation of Textile Agreements.

Jamaica—Market Statement

Cotton and Man-made Fiber Skirts (Category 342/642)

January 1988.

Summary and Conclusions

U.S. imports of cotton and man-made fiber skirts (Category 342/642) from Jamaica were 120,787 dozen during year ending November 1987, eight and one half times the 13,936 dozen imported a year earlier. During the first eleven months of 1987, imports of cotton and man-made fiber skirts (Category 342/642) from Jamaica reached 118,247 dozen, eight and one half times the 13,615 dozen imported during the same period of 1986, seven times the total imported in calendar year 1986, and 44 times the 2,653 dozen shipped in calendar year 1985.

The U.S. market for cotton and man-made fiber skirts (Category 342/642) has been disrupted by imports. The sharp and substantial increase in imports from Jamaica has contributed to this disruption.

U.S. Production and Market Share

U.S. Production of cotton and man-made fiber skirts has been on the decline, dropping from 90,101 thousand dozen in 1982 to a depressed 7,940 thousand dozen average during 1984 and 1985, a decline of 13 percent. Production in 1986 recovered slightly, reaching 8,126 thousand dozen, but remained below the 1983 level and was 11 percent below the 1982 level. Annualized U.S. production data for the first six months of 1987 indicates that 1987 production of cotton and man-made fiber skirts will be up a little more reaching an estimated 8,284 thousand dozen. The estimated 1987 production level is equal to the 1983 level, but still nine percent below the 1982 level. The domestic manufacturers' share of the market dropped 25 percentage points in just four years, falling from 83 percent in 1982 to 58 percent in 1986. The U.S. market share is expected to continue its decline into 1987, falling another eight percentage points, to 50 percent. U.S. imports are expected to have a greater share of the U.S. market than domestic manufacturers in 1987.

U.S. Imports and Import Penetration

U.S. Imports of cotton and man-made fiber skirts (Category 342/642) at 5,995 thousand dozen in 1986 were more than three times tne amount imported in 1982. The sharp and substantial increase in imports continued into 1987. Cotton and man-made fiber skirt imports (Category 342/642) during the first eleven months of 1987 were 7,673 thousand dozen, 38 percent above the 5,542 thousand dozen imported during the same period in 1986. The ratio of imports to domestic production nearly quadrupled, increasing from 20 percent in 1982 to 74 percent in 1986. The ratio is expected to increase above 100 percent in 1987.

Duty-Paid Value and U.S. Producers' Price

Approximately 86 percent of Jamaica's cotton and man-made fiber skirt imports during the first ten months of 1987 entered under TSUSA number 384.3444—women's and girls' cotton knit skirts not ornamented; 384.5251—women's cotten woven skirts, not of corduroy, denim or velventeen, not ornamented; and 384.9445—women's man-made fiber woven skirts, not ornamented. These skirts entered the U.S. at landed duty-paid values below U.S. producers' prices for comparable skirts.

Committee for the Implementation of Textile Agreements

March 14, 1988.

Commissioner of Customs, Department of the Treasury, Washington, D.C. 20229.

Dear Mr. Commissioner: Under the terms of Section 204 of the Agricultural Act of 1956, as amended (7 U.S.C. 1854), and the Arrangement Regarding International Trade in Textiles done at Geneva on December 20, 1973, as further extended on July 31, 1986; pursuant to the Bilateral Cotton, Wool, Man-Made Fiber, Silk Blend and Other Vegetable Fiber Textile Agreement of August 27, 1986, as amended, between the Governments of the United States and Jamaica; and in accordance with the provisions of Executive Order 11651 of March 3, 1972, as amended, you are directed to prohibit, effective on March 18, 1988, entry into the United States for consumption and withdrawal from warehouse for consumption of cotton and man-made fiber textile products in Categories 342/642, produced or manufactured in Jamaica and exported during the ninety-day period which began on February 8, 1988 and extends through May 7, 1988, in excess of 42,275 dozen.[1]

Textile products in Categories 342/642 which have been exported to the United States prior to February 8, 1988 shall not be subject to this directive.

Textile products in Categories 342/642 which have been released from the custody of the U.S. Customs Service under the provisions of 19 U.S.C. 1448(b) or 1484(a)(1)(A) prior to the effective date of this directive shall not be denied entry under this directive.

In carrying out the above directions, the Commissioner of Customs should construe entry into the United States for consumption to include entry for consumption into the Commonwealth of Puerto Rico.

The Committee for the Implementation of Textile Agreements has determined that this action falls within the foreign affairs exception to the rulemaking provisions of 5 U.S.C. 553(a)(1).

Sincerely,

James H. Babb,

Chairman, Committee for the Implementation of Textile Agreements.

BILLING CODE 3510-DR-M

---

[1] The limit has not been adjusted to account for any imports exported after February 7, 1988.

DEPARTMENT OF ENERGY

Conservation and Renewable Energy Office

National Energy Extension Service Advisory Board; Change in Meeting Dates

This is to advise that the meeting notice of the National Energy Extension Service Advisory Board was in error, and the meeting announced in the **Federal Register** (53 FR 4711) on February 17, 1988, was held on March 7 and 8, rather then March 21 and 22, 1988.

Transcripts

Available within three weeks for public review and copying at the Public Reading Room, 1E-190, Forrestal Building, 1000 Independence Ave., SW, Washington, DC, between 9:00 a.m. and 4:00 p.m., Monday through Friday, except Federal holidays.

Issued at Washington, DC on March 14, 1988.

Howard H. Raiken,

Advisory Committee Management Officer.

BILLING CODE 6450-01-M

Economic Regulatory Administration

[ERA Docket No. 88-08-NG]

Alenco Resources Inc.; Application to Import Natural Gas From and Export Natural Gas to Canada

AGENCY: Economic Regulatory Administration, DOE.

ACTION: Notice of application for the short-term importation, exportation, and sale of natural gas on a blanket basis.

SUMMARY: The Economic Regulatory Administration (ERA) of the Department of Energy (DOE) gives notice of receipt on February 12, 1988, of an application filed by Alenco Resources Inc. (Alenco) requesting blanket authorization to import natural gas from Canada for sale to purchasers in the United States on a short-term or "spot" basis and to export natural gas to Canada for sale to spot market purchasers.

Alenco requests that the scope of the authorization be broad enough for Alenco to import up to 54 Bcf and to export up to 54 Bcf of natural gas over a two-year term beginning with the date of the first import or export. Alenco also requests that ERA set import and export limits as a total volume over the term of the authorization rather than setting maximum daily quantities.

The application is filed with the ERA pursuant to section 3 of the Natural Gas Act and DOE Delegation Order No. 0204-111. Protests, motions to intervene, notices of intervention and written comments are invited.

DATE: Protests, motions to intervene, or notices of intervention, as applicable, requests for additional procedures, and written comments are to be filed no later than April 18, 1988.

FOR FURTHER INFORMATION CONTACT:

Frank Duchaine, Natural Gas Division, Economic Regulatory Administration, Forrestal Building, Room GA-076, 1000 Independence Avenue, SW., Washington, DC 20585, (202) 586-8233.

Michael T. Skinker, Natural Gas and Mineral Leasing, Office of General Counsel, U.S. Department of Energy, Forrestal Building, Room 6E-042, 1000 Independence Avenue, SW., Washington, DC 20585, (202) 586-6667.

SUPPLEMENTARY INFORMATION: Alenco contemplates purchasing natural gas supplied from a variety of Canadian suppliers, including its affiliates, and reselling such supplies to any suitable purchaser, which could include local distribution companies, pipelines, and commercial and industrial end-users. Alenco also contemplates acting as a facilitator for the importation of other natural gas supplies, acting as agent on behalf of both producers and purchasers.

Alenco, a Delaware Corporation, is a wholly owned subsidiary of Alenco Inc. which is a wholly owned subsidiary of Alberta Energy Company Ltd.

Alenco intends to utilize the existing facilities of U.S. and Canadian pipelines and it will file quarterly reports with the ERA detailing its transactions.

Alenco requests that an authorization be granted on an expedited basis. An ERA decision on Alenco's request for expedited treatment will not be made until all responses to this notice have been received and evaluated.

The decision on this application will be made consistent with the DOE's gas import/export policy guidelines, under which the competitiveness of an import/export arrangement in the markets served is the primary consideration in determining whether it is in the public interest (49 FR 6684, February 22, 1984). Parties that may oppose this application should comment in their responses on the issue of competitiveness as set forth in the policy guidelines. The applicant asserts that this import/export arrangement is competitive. Parties opposing the arrangement bear the burden of overcoming this assertion.

Public Comment Procedures

In response to this notice, any person may file a protest, motion to intervene or notice of intervention, as applicable,

and written comments. Any person wishing to become a party to the proceeding and to have the written comments considered as the basis for any decision on the application must, however, file a motion to intervene or notice of intervention, as applicable. The filing of a protest with respect to this application will not serve to make the protestant a party to the proceding, although protests and comments received from persons who are not parties will be considered in determining the appropriate action to be taken on the application. Protests, motions to intervene, notices of intervention, requests for additional procedures, and written comments should be filed with the Natural Gas Division, Office of Fuels Programs, Economic Regulatory Administration, Room GA-076, RG-23, Forrestal Building, 1000 Independence Avenue, SW., Washington, DC 20585, (202) 586-9478. They must be filed no later than 4:30 p.m. e.s.t., April 18, 1988.

The Administrator intends to develop a decisional record on the application through responses to this notice by parties, including the parties' written comments and replies thereto. Additional procedures will be used as necessary to achieve a complete understanding of the facts and issues. A party seeking intervention may request that additional procedures be provided, such as additional written comments, an oral presentation, a conference, or trial-type hearing. A request to file additional written comments should explain why they are necessary. Any request for an oral presentation should identify the substantial question of fact, law, or policy at issue, show that it is material and relevant to a decision in the proceeding, and demonstrate why an oral presentation is needed. Any request for a conference should demonstrate why the conference would materially advance the proceeding. Any request for a trial-type hearing must show that there are factual issues genuinely in dispute that are relevant and material to a decision and that a trial-type hearing is necessary for a full and true disclosure of the facts.

If an additional procedure is scheduled, the ERA will provide notice to all parties. If no party requests additional procedures, a final opinion and order may be issued based on the official record, including the application and responses filed by parties pursuant to this notice, in accordance with 10 CFR 590.316.

A copy of Alenco's application is available for inspection and copying in the Natural Gas Division Docket Room, GA-076-A at the above address. The docket room is open between the hours of 8:00 a.m. and 4:30 p.m., Monday through Friday, except Federal holidays.

Issued in Washington, DC, March 10, 1988.

Constance L. Buckley,

Director, Natural Gas Division, Office of Fuels Programs, Economic Regulatory Administration.

[FR Doc. 88-5869 Filed 3-16-88; 8:45 am]

BILLING CODE 6450-01-M

[ERA Docket No. 88-06-NG]

Midcon Sales, Inc.; Application To Import Natural Gas From Canada

AGENCY: Economic Regulatory Administration, DOE.

ACTION: Notice of application for blanket authorization to import natural gas.

SUMMARY: The Economic Regulatory Administration (ERA) of the Department of Energy (DOE) gives notice of receipt on February 2, 1988, of an application filed by MidCon Sales, Inc. (MidCon Sales), for blanket authorization to import up to 200 Bcf of natural gas per year over a two-year term beginning on the date of first delivery. MidCon Sales would import the gas on a short-term or spot basis for its own account or act as a broker for a wide range of U.S. purchasers and Canadian suppliers.

The application is filed with the ERA pursuant to section 3 of the Natural Gas Act and DOE Delegation Order No. 0204-111. Protests, motions to intervene, notices of intervention and written comments are invited.

DATE: Protests, motions to intervene or notices of intervention, as applicable, request for additional procedures and written comments are to be filed no later than April 18, 1988.

FOR FURTHER INFORMATION CONTACT:

Larine Moore, Natural Gas Division, Economic Regulatory Administration, Forrestal Building, Room GA-076, 1000 Independence Avenue, SW., Washington, DC 20585, (202) 586-9478.

Diane Stubbs, Natural Gas and Mineral Leasing, Office of General Counsel, U.S. Department of Energy, Forrestal Building, Room 6E-042, 1000 Independence Avenue, SW., Washington, DC 20585, (202) 586-6667.

SUPPLEMENTARY INFORMATION: MidCon Sales is a Delaware corporation with its principal place of business in Lombard, Illinois. The applicant is an indirect wholly-owned subsidiary of MidCon Corp., Occidental Petroleum Corporation. No contracts have been executed and therefore the application does not identify the suppliers, buyers, or prices, however, MidCon Sales asserts that the specific terms of each import and sale would be based on competition in the marketplace. MidCon Sales intends to utilize existing pipeline facilities for transportation of the volumes imported and proposes to submit quarterly reports detailing each transaction.

MidCon Sales has requested that the ERA consider its requested authorization on an expedited basis. An ERA decision on MidCon Sales' request for expedited treatment, particularly with respect to whether additional written comments or other procedures will be necessary in this case, will not be made until all responses to this notice have been received and evaluated.

The decision on this application will be made consistent with the DOE's gas import policy guidelines, under which the competitiveness of an import arrangement in the markets served is the primary consideration in determining whether it is in the public interest (49 FR 6684, February 22, 1984). Parties that may oppose this application should comment in their responses on the issue of competitiveness as set forth in the policy guidelines. The applicant asserts that this import arrangement is competitive. Parties opposing the arrangement bear the burden of overcoming this assertion.

All parties should be aware that if the ERA approves this import arrangement, it may designate a total amount of authorized volumes for the term rather than the annual unit requested, in order to provide the applicant with maximum operating flexibility.

Public Comment Procedures

In response to this notice, any person may file a protest, motion to intervene or notice of intervention, as applicable, and written comments. Any person wishing to become a party to the proceeding and to have the written comments considered as the basis for any decision on the application must, however, file a motion to intervene or notice of intervention, as applicable. The filing of a protest with respect to this application will not serve to make the protestant a party to the proceeding, although protests and comments received from persons who are not parties will be considered in determining the appropriate action to be taken on the application. All protests, motions to intervene, notices of intervention, and written comments must meet the requirements that are specified by the regulations in 10 CFR Part 590.

Protests, motions to intervene, notices of intervention, requests for additional procedures, and written comments should be filed with the Natural Gas Division, Office of Fuels Programs, Economic Regulatory Administration, Room GA-076, RG-23, Forrestal Building, 1000 Independence Avenue, SW., Washington, DC 10585, (202) 586-9478. They must be filed no later than 4:30 p.m. e.s.t., April 18, 1988.

The Administrator intends to develop a decisional record on the application through responses to this notice by parties, including the parties' written comments and replies thereto. Additional procedures will be used as necessary to achieve a complete understanding of the facts and issues. A party seeking intervention may request that additional procedures be provided, such as additional written comments, an oral presentation, a conference, or trial-type hearing. Any request to file additional written comments should explain why they are necessary. Any request for an oral presentation should identify the substantial question of fact, law, or policy at issue, show that it is material and relevant to a decision in the proceeding, and demonstrate why an oral presentation is needed. Any request for a conference should demonstrate why the conference would materially advance the proceeding. Any request for a trial-type hearing must show that there are factual issues genuinely in dispute that are relevant and material to a decision and that a trial-type hearing is necessary for a full and true disclosure of the facts.

If an additional procedure is scheduled, the ERA will provide notice to all parties. If no party requests additional procedures, a final opinion and order may be issued based on the official record, including the application and responses filed by parties pursuant to this notice, in accordance with 10 CFR 590.316.

A copy of MidCon Sales' application is available for inspection and copying in the Natural Gas Division Docket Room, GA-076 at the above address. The docket room is open between the hours of 8:00 a.m. and 4:30 p.m., Monday through Friday, except Federal holidays.

Issued in Washington, DC, March 10, 1988.

Constance L. Buckley,

Director, Natural Gas Division, Office of Fuels Programs, Economic Regulatory Administration.

BILLING CODE 6450-01-M

Office of Hearings and Appeals

Issuance of Decisions and Orders; Week of January 18 Through January 22, 1988

During the week of January 18 through January 22, 1988, the decisions and orders summarized below were issued with respect to appeals and applications for other relief filed with the Office of Hearings and Appeals of the Department of Energy. The following summary also contains a list of submissions that were dismissed by the Office of Hearings and Appeals.

Appeal

Glen Milner, 1/22/88, FKFA-0153

Glen Milner filed an Appeal from a partial denial by the Albuquerque Operations Office of a Request for Information which he had submitted under the Freedom of Information Act. In considering the Appeal, the DOE found that only one division of the Albuquerque Operations Office, the Transportation Safeguards Division, had conducted an adequate search for responsive documents. The DOE also found that another division, the Weapons Production Division, has not conducted a search even though that Division may possess responsive documents. Accordingly, the matter was remanded to the Authorizing Official, who was instructed to conduct a search for responsive documents in the Weapons Production Division.

Petition for Special Redress

Oklahoma, 1/20/88, KEG-0025

The Department of Energy (DOE) issued a Decision and Order concerning the Petition for Special Redress filed by the State of Oklahoma. Oklahoma sought approval to use Stripper Well funds for a program previously determined to fall outside the terms of the Stripper Well Settlement Agreement. After considering Oklahoma's Petition, the DOE approved the State's proposal to use $190,000 for the installation of energy conservation equipment at Langston University, a state institution. The DOE found that the program would result in increased energy conservation, timely restitution to energy consumers, and a balanced distribution of oil overcharge monies. The DOE concluded, therefore, that the proposed expenditure was permissible under the terms of the Settlement Agreement. Accordingly, Oklahoma's Petition for Special Redress was approved.

Refund Applications

Apco Oil Corp./Clarinda Oil Co., 1/20/88, RF 83-53

The DOE issued a Decision and Order concerning an Application for Refund filed by Clarinda Oil Company. Clarinda, a motor gasoline and distillate fuel oil a retailer, sought a portion of the settlement fund obtained by the DOE through a consent order entered into with Apco Oil Corp. Based on an evaluation of the firm's refund claim using the three-step competitive disadvantage methodology, the DOE found that Clarinda was injured by Apco's alleged overcharges in sales of motor gasoline. The DOE granted Clarinda a refund for motor gasoline of $45,294, representing $29,384 in principal plus $15,910 in interest. That portion of Clarinda's claim which was based upon its distillate fuel oil purchases was denied.

Apco Oil Corporation/Hunter Oil Company 1/22/88, RF83/52

The DOE issued a Decision and Order concerning an Application for Refund filed by Hunter Oil Company. Hunter sought a portion of the settlement fund obtained by the DOE through a consent order entered into with Apco Oil Corporation. Hunter is a motor gasoline and distillate fuel oil retailer which purchased these products from Apco during 56 months of the period covered by the Apco consent order. The DOE granted Hunter's refund application based upon standards established in *Apco Oil Corp.*, 12 DOE ¶ 85,149 (1985). The refund granted to Hunter totaled $9,551 ($6,196 in principal, plus $3,355 in interest).

Apco Oil Corp./Leo's Enterprises, Inc., 1/22/88, RF83-1

The DOE issued a Decision and Order concerning an Application for Refund filed by Leo's Enterprises, Inc., a motor gasoline and distillate fuel oil reseller. Leo's sought a portion of the settlement fund obtained by the DOE through a consent order entered into with Apco Oil Corp. Based upon its evaluation of Leo's refund claim, the DOE determined that the applicant was injured by Apco's alleged overcharges in sales of motor gasoline. The DOE granted Leo's a refund for motor gasoline of $76,216, representing $49,444 in principal plus $26,772 in interest. The DOE further determined that Leo's failed to demonstrate that it was injured by Apco's pricing practices as they related to distillate fuel oil.

Diamonds Ranch, 1/21/88, RF272-2178

The Department of Energy (DOE) issued a Decision approving an Application for Refund in the Crude Oil Subpart V refund proceedings. The claimant was a farmer who used sales receipts to compute the amount of petroleum products used during the August 1973 to January 1981 period. Because the claimant calculated the amount of grease in pounds rather than gallons, DOE converted the total pounds of grease into gallons. Because the claimant relied on the end-user presumption, he was not required to demonstrate injury. A total of $21 was approved in this Decision and Order.

Gulf Oil Corporation/Calfee Oil Company, 1/21/88, RF40-3591

The DOE issued a Decision and Order concerning an Application for Refund filed by Calfee Oil Company (Calfee), a Gulf consignee agent. In an attempt to rebut the presumption that Gulf consignee agents were not injured by Gulf's alleged overcharges, Calfee claimed in its application that it actually purchased Gulf products and that the individual retailers with whom Calfee did business received commissions for the gallons of products sold at the retail outlets. The DOE determined, however, that the invoices submitted by Calfee showed that the individual retailers, not Calfee, had paid Gulf for the products. Because Calfee had failed to

submit any evidence that supported its assertion that it purchased products from Gulf, it could only receive a refund through an Assignment of Refund rights to Calfee by the individual retailers. Calfee submitted such Assignments of Refunds executed by several individual retailers and was therefore deemed eligible to receive a Gulf refund based on these retailers purchases from Gulf. Accordingly, the DOE granted Calfee a refund of $258, representing $202 principal plus $56 interest.

Marathon Petroleum Co./R.J. Oil Co., Inc., 1/21/88, RF250-1567, RF250-1568

This Decision and Order concerns two Applications for Refund filed by R.J. Oil Co., Inc. in the Marathon Petroleum Company refund proceeding. R.J. Oil claimed that it purchased 30,768,755 gallons of refined products from Marathon during the Marathon consent order period. Since the applicant did not claim a refund in excess of $5,000, the DOE granted its request without requiring a showing of injury. The refunds granted in this Decision were $5,000 in principal plus $714 in accrued interest.

Marvin Wehrman, et al., 1/19/88, RF272-2086 et al.

The Department of Energy (DOE) issued a Decision approving thirty-eight Applications for Refund in the Crude Oil Subpart V refund proceedings. The thirty-eight claimants were farmers who used either the USDA formula or their own records to derive the number of gallons of petroleum products they used during the August 1973 to January 1981 period. Because the claimants relied on the end-user presumption, they were not required to demonstrate injury. A total of $931 was approved in this Decision and Order.

Mobil Oil Corporation/Amos Post Company, 1/19/88, RF225-8206, RF225-10931

The DOE issued a Decision and Order granting an Application for Refund from the Mobil Oil Corporation escrow account filed by Amos Post Company (Amos), a reseller of Mobil refined petroleum products. In its refund application, Amos elected to submit documentation that it was injured by Mobil's pricing practices rather than to rely on the presumptions set forth in the *Mobil* decision. *Mobil Oil Corp.*, 13 DOE ¶ 85,339 (1985). With regard to the first part of a showing of injury, Amos submitted banks of unrecouped increased product costs based on annual, financial and gallonage data. The DOE found that this data was insufficiently detailed and did not provide a sound basis for the firm's refund application. However, applicants who attempt to demonstrate injury and fail are nevertheless eligible for a refund under the presumptions outlined in *Mobil*. Therefore, because Amos has submitted the information necessary for a refund under the level-of-distribution presumption, the DOE granted Amos a refund based on its purchases of Mobil motor gasoline. The total refund granted to Amos was $8,673, representing $7,001 in principal plus $1,672 in interest.

Mobil Oil Corp./Fremont Airport, Inc., 1/21/88, RF225-6231

The DOE issued a Decision and Order granting Fremont Airport, Inc. (Fremont), a refund from the Mobil Oil Corporation consent order fund. Fremont applied as an end-user and a retailer of 158,146 gallons of aviation gasoline which it purchased directly from Mobil during the Mobil consent order period. Under the presumptions established in *Mobil Oil Corp.*, 13 DOE ¶ 85,339 (1985), end-users who were directly supplied by Mobil are entitled to a refund equivalent to the amount of their documented purchase volumes times 100 percent of their per gallon volumetric refund amount. Retailers who purchased products other than motor gasoline from Mobil and whose total claim is $5,000 or less are also eligible for a refund equivalent to the amount of their documented purchase volumes times 100 percent of the volumetric refund amount without making a detailed showing of injury. The total amount of Fremont's refund approved in this Decision and Order is $83 ($67 principal plus $16 interest).

Mobil Oil Corporation/Heater Oil Company Inc., 1/21/88, RF225-9218, RF225-9219

The DOE issued a Decision and Order granting an Application for refund from the Mobil Oil Corporation escrow account filed by Heater Oil Company, Inc., a reseller of Mobil refined petroleum products. In its refund application, Heater elected to submit documentation that it was injured by Mobil's pricing practices rather than to rely on the presumptions set forth in the *Mobil* decision. *Mobil Oil Corp.*, 13 DOE ¶ 85,339 (1985). Applying a competitive disadvantage analysis to the motor gasoline data submitted by Heater, the DOE determined that the Mobil motor gasoline purchased by the firm during the consent order period was purchased at prices consistently higher than market average prices. The DOE concluded that Heater was therefore eligible to receive the full volumetric refund amount for its purchases of Mobil motor gasoline. However, because the firm received a refund greater than $5,000 for its purchases of motor gasoline, the DOE determined that Heater was ineligible for a refund based on its purchases of Mobil middle distillates. The total refund granted to Heater was $49,708, representing $40,126 in principal plus $9,582 in interest.

Standard Oil Co. (Indiana)/Iowa et al., 1/20/88, RQ251-408 et al.

The DOE issued a Decision approving second-stage refund plans filed by the States of Iowa and Tennessee. In its application, Iowa proposed to spend its remaining share of Standard Oil Co. (Indiana) funds and its entire allotment of Vickers Energy Corp. funds for five projects: An energy management program for non-profit organizations; an alternative fuels program; an energy conservation marketing program; installation of energy-efficient ventilation controls at a regional medical center; and weatherization of low-income housing. In Tennessee's application, the State proposed to use its share of Standard Oil Co. (Indiana) (Amoco II), National Helium Corp., Charter Co., Perry Gas Processors, and Coline Gasoline Corp. second-stage monies to fund six projects: a park and ride program; a ridesharing promotion program; a vanpool assistance program; a transportation services program for the elderly; a fossil fuel audit program for small businesses; and an energy efficiency seminar program for small businesses. The DOE found that each of the projects proposed by Iowa and Tennessee would promote energy conservation and provide restitution to injured consumers of refined petroleum products. Accordingly, Iowa was granted $287,432 in *Amoco* monies and was authorized to receive $72,984 in *Vickers* monies when and if those funds are made available to the States. Tennessee was granted a total of $949,230 in second-stage refund monies of the projects proposed in its application.

Vernon Grubb et al., 1/20/88, RF272-919 et al.

The DOE issued a Decision and Order granting refunds from crude oil overcharge funds to 37 applicants based on their purchases of refined petroleum products during the period August 19, 1973 through January 27, 1981. Each applicant used the products for various agricultural activities, and each determined its claim either by consulting actual purchase records or by estimating its consumption based on the acres it farmed. The sum of the refunds granted in this Decision was $1,418. All of the claimants will be eligible for additional refunds as additional crude oil overcharge funds become available.

The Southland Corporation, 1/21/88, RF270-28

The Department of Energy (DOE) issued a Decision and Order concerning a Motion for Reconsideration of a September 25, 1987 dismissal of an Application for Refund filed by the Southland Corporation (Southland) in the Surface Transporters' proceeding. Southland's initial application for a refund on behalf of its Manufacturing and Distribution Group (Manufacturing Group) had been dismissed as void, *ab initio*, because the firm: (i) had impermissibly altered the waiver essential to its claim; and (ii) had already been approved for a refund from another M.D.L. 378 escrow account. In its Motion, Southland asserted that the alteration to the waiver was not material because the Manufacturing Group was separate and distinct from the firm's Transportation Group that had received the first refund. Thus, it claimed, it was entitled to a second refund under *Union Pacific Railroad Co.*, 16 DOE ¶ 85,526 (1987) (*Union Pacific*). Upon reconsideration, the DOE determined that the Manufacturing Group was not a separate legal identity entitled to a refund under *Union Pacific*. Thus, Southland's alteration of the waiver was material and mandated dismissal of the firm's Surface Transporters refund application. Therefore, the DOE determined that the Motion for Reconsideration should be denied.

Contract Freighters, Inc., 1/21/88, RF270-2515

The Department of Energy (DOE) issued a Supplemental Order modifying a Decision and Order which granted refunds to a number of applicants in the Surface Transporters refund proceeding. *C.F. England & Sons, Inc.*, 16 DOE ¶ 85,465 (1987) (*C.F. England*). In the Supplemental Order, DOE found, *sua sponte*, that the volume approved for one of the applicants in *C.F. England*, Contract Freighters, Inc. (RF270-1913) (Contract Freighters), should be modified. The volume previously approved was based on Contract Freighters' own direct purchases, and did not include volumes purchased by the firm's owner-operators for which Contract Freighters was liable for reimbursement. The DOE held that companies such as Contract Freighters are eligible for refunds based on fuel cost reimbursement contracts. *Food Haulers, Inc.*, 16 DOE ¶ 85,605 (1985). The DOE therefore modified *C.F. England* to increase the volume approved for Contract Freighters from 417,653 gallons to 14,074,474 gallons.

Dismissals

The following submissions were dismissed:

BILLING CODE 6450-01-M

Issuance of Proposed Decision and Order; Period of February 1 Through February 12, 1988

During the period of February 1 through February 12, 1988, the proposed decision and order summarized below was issued by the Office of Hearings and Appeals of the Department of Energy with regard to an application for exception.

Under the procedural regulations that apply to exception proceedings (10 CFR Part 205, Subpart D), any person who will be aggrieved by the issuance of a proposed decision and order in final form may file a written notice of objection within ten days of service. For purposes of the procedural regulations, the date of service of notice is deemed to be the date of publication of this Notice or the date an aggrieved person receives actual notice, whichever occurs first.

The procedural regulations provide that an aggrieved party who fails to file a Notice of Objection within the time period specified in the regulations will be deemed to consent to the issuance of the proposed decision and order in final form. An aggrieved party who wishes to contest a determination made in a proposed decision and order must also file a detailed statement of objections within 30 days of the date of service of the proposed decision and order. In the statement of objections, the aggrieved party must specify each issue of fact or law that it intends to contest in any further proceeding involving the exception matter.

Copies of the full text of this proposed decision and order are available in the Public Reference Room of the Office of Hearings and Appeals, Room 1E-234, Forrestal Building, 1000 Independence Avenue, SW., Washington, DC 20585, Monday through Friday, between the hours of 1:00 p.m. and 5:00 p.m., except Federal holidays.

March 10, 1988.

George B. Breznay,

Director, Office of Hearings and Appeals.

Commonwealth of the Northern Mariana Islands, Saipan, Northern Marinana Islands, KEE-0151

The Commonwealth of the Northern Mariana Islands (CNMI) filed an Application for Exception from the provisions of 10 CFR Parts 450 and 455. The exception request, if granted, would waive the requirement that buildings in the CNMI eligible for grants under the Department of Energy's Institutional Conservation Program be heated or cooled by mechanical means. On February 10, 1988, the Department of Energy issued a Proposed Decision which determined that the exception request be granted.

BILLING CODE 6450-01-M

Issuance of Proposed Decision and Order; Week of February 16 Through February 19, 1988

During the week of February 16 through February 19, 1988, the proposed decision and order summarized below was issued by the Office of Hearings and Appeals of the Department of Energy with regard to an application for exception.

Under the procedural regulations that apply to exception proceedings (10 CFR Part 205, Subpart D), any person who will be aggrieved by the issuance of a proposed decision and order in final form may file a written notice of objection within ten days of service. For purposes of the procedural regulations, the date of service of notice is deemed to be the date of publication of this Notice or the date an aggrieved person receives actual notice, whichever occurs first.

The procedural regulations provide that an aggrieved party who fails to file a Notice of Objection within the time period specified in the regulations will be deemed to consent to the issuance of the proposed decision and order in final form. An aggrieved party who wishes to contest a determination made in a proposed decision and order must also file a detailed statement of objections within 30 days of the date of service of the proposed decision and order. In the statement of objections, the aggrieved party must specify each issue of fact or law that it intends to contest in any further proceeding involving the exception matter.

Copies of the full text of this proposed decision and order are available in the Public Reference Room of the Office of Hearings and Appeals, Room 1E-234, Forrestal Building, 1000 Independence Avenue, SW., Washington, DC 20585, Monday through Friday, between the hours of 1:00 p.m. and 5:00 p.m., except federal holidays.

March 10, 1988.

George B. Breznay,

Director, Office of Hearings and Appeals.

Delgado Oil Company, Pinedale, Wyoming, KEE-015.

Delgado Oil Company filed an Application for Exception from the requirment that it file Form EIA-782B, entitled "Resellers/Retailers' Monthly Petroleum Product Sales Report." The exception request, if granted, would permit Delgado to be permanently exempt from filing Form EIA-782B. On February 18, 1988, the Department of Energy issued a Proposed Decision and Order which determined that the exception request be denied because Delgado had not demonstrated that it was experiencing a hardship or inequity as a result of the requirement that it file the Form.

BILLING CODE 6450-01-M

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Office of The Secretary

Secretary's Commission on Nursing; Advisory Commission Meeting

In accordance with section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92-463), announcement is made of the following national advisory body scheduled to meet during the month of April 1988:

Name: Secretary's Commission on Nursing

Date: April 4, 1988

Time: 9:00 a.m.

Place: Room 703-727A, Hubert H. Humphrey Building, 200 Independence Avenue, SW., Washington, DC. 20201

Purpose: The Secretary's Commission on Nursing will advise the Secretary of Health and Human Services on how the public and private sectors can work together to address problems and implement solutions regarding the supply of active registered nurses. The Commission will also consider the recruitment and retention of nurses in the U.S. Public Health Service, the Veteran's Administration and the Department of Defense. As appropriate for its work, the Commission will consider the findings of studies which are relevant to the development of a multi-year action plan for implementation by the public and private sectors.

Agenda: The agenda for this meeting will include consideration of issues associated with the recruitment and retention of nurses. There will be a panel presentation on ways in which the environment of nursing practice can be modified to improve both staff retention and quality of care.

Agenda items are subject to change as priorities dictate. Anyone wishing information regarding the Commission should contact the Secretary's Commission on Nursing, Hubert H. Humphrey Building, Room 616E, 200 Independence Avenue, SW., Washington, DC 20201, telephone 202/245-0409

Dated: March 14, 1988.

John Buss,

Administrative Offices, Secretary's Commission on Nursing.

BILLING CODE 4150-04-M

Food and Drug Administration

[Docket No. 88F-0053]

The Dow Chemical Co.; Filing of Food Additive Petition

AGENCY: Food and Drug Administration.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) is announcing that The Dow Chemical Co. has filed a petition proposing that the food additive regulations be amended to provide for the safe use of ethylene-octene-1 copolymers as adhesives in multilayer structures intended for use in contact with food.

FOR FURTHER INFORMATION CONTACT: Richard H. White, Center for Food Safety and Applied Nutrition (HFF-335), Food and Drug Administration, 200 C St. SW., Washington, DC 20204, 202-472-5690.

SUPPLEMENTARY INFORMATION: Under the Federal Food, Drug, and Cosmetic Act (sec. 409(b)(5), 72 Stat. 1786 (21 U.S.C. 348(b)(5))), notice is given that a petition (FAP 8B4066) has been filed by The Dow Chemical Co., 1803 Bldg., Door 7, Midland, MI 48674, proposing that § 175.105 *Adhesives* (21 CFR 175.105) be amended to provide for the safe use of ethylene-octene-1 copolymers as adhesives in multilayer structures intended for use in contact with food.

The potential environmental impact of this action is being reviewed. If the agency finds that an environmental impact statement is not required and this petition results in a regulation, the notice of availability of the agency's finding of no significant impact and the evidence supporting that finding will be published with the regulation in the **Federal Register** in accordance with 21 CFR 25.40(c).

Dated: March 10, 1988.

Fred R. Shank,

Acting Director, Center for Food Safety and Applied Nutrition.

BILLING CODE 4160-01-M

[Docket No. 88N-0101]

Drug Export; POLYTRIM Brand Trimethoprim Sulfate and Polymyxin B Sulfate Ophthalmic Solution

AGENCY: Food and Drug Administration.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) is announcing that Burroughs Wellcome Co. has filed an application requesting approval for the export of the human drug POLYTRIM Brand Trimethoprim Sulfate and Polymyxin B Sulfate Ophthalmic Solution to Canada.

ADDRESS: Relevant information on this application may be directed to the Dockets Management Branch (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857, and to the contact person identified below. Any future inquiries concerning the export of human drugs under the Drug Export Amendments Act of 1986 should also be directed to the contact person.

FOR FURTHER INFORMATION CONTACT: Rudolf Apodaca, Division of Drug Labeling Compliance (HFN-310), Center for Drug Evaluation and Research, Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301-295-8063.

SUPPLEMENTARY INFORMATION: The Drug Export Amendments Act of 1986 (Pub. L. 99-660) (section 802 of the Federal Food, Drug, and Cosmetic Act (the act) (21 U.S.C. 382)) provides that FDA may approve applications for the export of drugs that are not currently approved in the United States. The approval process is governed by section 802(b) of the act. Section 802(b)(3)(B) of the act sets forth the requirements that must be met in an application for approval. Section 802(b)(3)(C) of the act requires that the agency review the application within 30 days of its filing to determine whether the requirements of section 802(b)(3)(B) have been satisfied. Section 802(b)(3)(A) of the act requires that the agency publish a notice in the **Federal Register** within 10 days of the filing of an application for export to facilitate public participation in its review of the application. To meet this requirement, the agency is providing notice that Burroughs Wellcome Co., 3030 Cornwallis Road, Research Triangle Park, North Carolina 27709, has filed an application requesting approval for the export to Canada of the drug POLYTRIM Trimethoprim Sulfate and Polymyxin B Sulfate Ophthalmic Solution. This drug is indicated in the treatment of suface ocular bacterial infection, including the acute bacterial conjunctivities and blepharo conjunctivitis caused by susceptible strains of the following organisms (1) *Staphylococcus aureus;* (2) *staphylococcus epidermidis;* (3) *streptococcus pneumoniae;* (4) streptococcus viridans; (5) *haemophilus influenzae;* and (6) *pseudomonas aeruginosa.* The application was received and filed in the Center for Drug

Evaluation and Research on March 1, 1988, which shall be considered the filing date for purposes of the act.

Interested persons may submit relevant information on the application to the Dockets Management Branch (address above) in two copies (except that individuals may submit single copies) and identified with the docket number found in brackets in the heading of this document. These submissions may be seen in the Dockets Management Branch between 9 a.m. and 4 p.m., Monday through Friday.

The agency encourages any person who submits relevant information on the application to do so by March 28, 1988 and to provide an additional copy of the submission directly to the contact person identified above, to facilitate consideration of the information during the 30-day review period.

This notice is issued under the Federal Food, Drug, and Cosmetic Act (sec. 802, Pub. L. 99-660 (21 U.S.C. 382)) and under authority delegated to the Commissioner of Food and Drugs (21 CFR 5.10) and redelegated to the Center for Drug Evaluation and Research (21 CFR 5.44).

Dated: March 8, 1988.

Daniel L. Michels,

Director, Office of Compliance, Center for Drug Evaluation and Research.

[FR Doc. 88-5806 Filed 3-16-88; 8:45 am]

BILLING CODE 4160-01-M

Office of Human Development Services

[Program Announcement No. 13631-88-2]

Availability of Grants To Determine the Feasibility and Desirability of Developing a Nationwide Information and Referral System for Persons With Developmental Disabilities; Correction

AGENCY: Administration on Development Disabilities (ADD), Office of Human Development Services (OHDS), HHS.

ACTION: Notice of correction of the date comments are due from state single points of contact.

SUMMARY: This document corrects a date cited in the program announcement, published February 25, 1988, in the Federal Register (53 FR 5643), regarding the date comments are due from State Single Points of Contact on applications for projects to determine the feasibility and desirability of developing a nationwide information and referral system for persons with developmental disabilities.

FOR FURTHER INFORMATION CONTACT: Judy Moore, Projects of National Significance Coordinator, at (202) 245-1961.

SUPPLEMENTARY INFORMATION: On February 25, 1988, the Administration on Developmental Disabilities published in the Federal Register an announcement of the availability of funds and request for applications for projects to determine the feasibility and desirability of developing a nationwide information and referral system for persons with developmental disabilities. (53 FR, pages 5640–5645.) On page 5643 of the announcement, a correction is required in the date comments are due from State Single Points of Contact (SPOCS).

SPOCs have 60 days from the date applications are due in the Office of Human Development Services (OHDS) (April 11, 1988) to comment on these applications for financial assistance. The February 25, 1988 program announcement incorrectly cited the date that SPOC comments are due as April 25, 1988.

Therefore, the OHDS is correcting page 5643, column 2, first sentence to read: Comments are, therefore, due no later than June 10, 1988.

Approved: March 14, 1988.

Sydney Olson,

Assistant Secretary for Human Development Services.

[FR Doc. 88-5883 Filed 3-16-88; 8:45 am]

BILLING CODE 4130-01-M

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

[NM-010-08-4410-08]

Farmington Resource Area, NM; Public Hearing

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of public meetings and a hearing.

SUMMARY: The Bureau of Land Management (BLM) announces special meetings and a special hearing to be held on the land ownership adjustment issue as it relates to lands south of the "fourth standard parallel north" as presented in the proposed Farmington Resource Management Plan. This issue is a concern to the City of Gallup and others in that general area.

DATE: The special meetings will be held at the following locations in Gallup, New Mexico:

Date, Time and Meeting Location

April 8, 1988, 7:00 p.m.–9:00 p.m.: Kennedy Middle School, 600 Boardman Drive

April 9, 1988, 9:30 a.m.–11:30 a.m.: Kennedy Middle School, 600 Boardman Drive

The special hearing will be held at the following location in Gallup, New Mexico:

Date, Time and Hearing Location

April 9, 1988, Starting at 1:30 p.m.: Kennedy Middle School, 600 Boardman Drive

SUPPLEMENTARY INFORMATION: The purpose of the meetings scheduled is to make information available, including maps to the general public, to discuss concerns and answer questions regarding the land ownership adjustment issue presented in the Proposed Resource Management Plan/Final Environmental Impact Statement (PRMP/FEIS) in this area. These will be informal meetings.

The purpose of the public hearing scheduled is to allow the public to make formal comments regarding the land ownership adjustment issue presented in the PRMP/FEIS for the area around Gallup. At this hearing, oral and written comments will be received into the record. A hearings officer will preside at the hearing, and each person who signs up to speak will be allowed 10 minutes to give their statement for the record. A court reporter will be present to record all comments. Speakers will be registered at the door prior to the hearing. If a large number of speakers are registered, the hearing officer may set a time limit of less than 10 minutes for each speaker so that all who have registered may have the opportunity to speak. In addition, written comments will be accepted if postmarked on or before April 18, 1988. Written comments must be sent to the following address: RMP Team Leader, BLM, 1235 La Plata Highway, Farmington, New Mexico 87401.

The comments received at the hearing will be given to the New Mexico State Director of the BLM for consideration prior to approving the Farmington RMP.

FOR FURTHER INFORMATION CONTACT: For more information or to obtain copies of the Draft RMP/EIS or the PRMP/FEIS, contact Ron Fellows, Area Manager, Bureau of Land Management, 1235 La Plata Highway, Farmington, New Mexico 87401 (505) 327-5344.

Larry L. Woodard,

State Director.

Dated: March 11, 1988.

[AZ 020-41-5410-10-ZAEF; A-23225]

Mineral Interest Application; Arizona

ACTION: Notice of receipt of conveyance of mineral interest application.

Notice is hereby given that pursuant to section 209 of the Act of October 21, 1976, 90 Stat. 2757, Peter R. Makaus, Suzan Makaus and RCJ Corporation have applied to purchase the mineral estate described as follows:

Gila and Salt River Meridian, Arizona

T. 5 N., R. 2 E.
  Sec. 31, Lots 1, 2, W½SE¼SW¼, SE¼SE¼SW¼.
  Containing 109.70 acres, more or less.

Additional information concerning this application may be obtained from the Area Manager, Phoenix Resource Area, Phoenix District Office, 2015 West Deer Valley Road, Phoenix, Arizona 85027.

Upon publication of this notice in the **Federal Register**, the mineral interests described above will be segregated to the extent that they will not be open to appropriation under the public land laws, including the mining laws. The segregative effect of the application shall terminate either upon issuance of a patent or other document of conveyance of such mineral interests, upon final rejection of the application or two years from the date of filing of the application, March 3, 1988, whichever occurs first.

Henri R. Bisson,

District Manager.

Date: March 10, 1988.

BILLING CODE 4310-32-M

[CA-010-08-4212-13; CA-19606]

Realty Action; Proposed Land Exchange in San Benito County, CA

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of realty action; proposed land exchange of public and private lands in San Benito County, CA.

SUMMARY: This notice is to advise the public that the Hollister Resource Area of the Bureau of Land Management and Mr. Charles F. McCullough, Jr. are proposing a land exchange.

SUPPLEMENTARY INFORMATION: The following described public lands have been determined to be suitable for disposal by exchange under section 206 of the Federal Land Policy and Management Act of 1976, 43 U.S.C. 1716:

Mt. Diablo Meridian, California

T. 15 S., R. 9 E.,
  Sec. 1, SW¼NW¼, N½SW¼, W½NW¼SE¼, W½SW¼SE¼, SE¼SW¼SE¼, S½SE¼SE¼;
  Sec. 2, SE¼NE¼;
  Sec. 11, S½NW¼, SW¼;
  Sec. 14, NE¼NW¼.
  Containing 590.00 acres, more or less.

In exchange for these lands, the Federal Government will acquire tracts of non-Federal lands in San Benito County from Mr. Charles F. McCullough, Jr., described as follows:

Mt. Diablo Meridian, California

T. 17 S., R. 11 E.,
  MS 5062;
  MS 5251;
  MS 5252;
  MS 5253;
  MS 5957;
  MS 5958.
  Containing 288.081 acres, more or less.

The purpose of the exchange is to acquire the non-Federal lands to provide access to isolated Federal lands and enhance their management. The exchange is consistent with the Bureau's planning for the lands involved. The public interest will be well served by making the exchange.

The value of the lands to be exchanged is approximately equal, and the acreage will be adjusted or money will be used to equalize the values upon completion of the final appraisal of the lands.

The terms and conditions applicable to the exchange are:

1. The reservation to the United States of a right-of-way for ditches or canals constructed by the authority of the United States, Act of August 30, 1890 (43 U.S.C. 945).

2. Cultural Stipulation: A covenant as follows will be placed within the title in order to protect the archeological site.

Covenant

The property described below is hereby conveyed subject to the conditions, restrictions, and limitations herein set forth, which shall be considered as covenants running with the property which the grantee, his heirs, successors and assigns covenant and agree, in the event that the property is sold or otherwise disposed, will be inserted in the conveyance or other:

T. 15S., R. 9E., M.D.M.
  Sec 1: SWSWSE

1. No physical change to the archaeological site CA–SBN–153 as shown and described on the archaeological site record on file with the California Archaeological Sites Inventory or its surface covering shall be made or altered without the prior

written approval of the California State Historic Preservation Officer.

2. Scientific investigations (not relating to the recovery of data to mitigate the adverse effects of development of the property) at one or more of the sites involving removal of archaeological materials or disturbance of those materials shall be permitted only if the investigations are consistent with the "Secretary of the Interior's Standards and Guidelines for Archaeology and Historic Preservation" (48 FR, Vol. 190, September 29, 1983, pp. 44716–44742) or subsequent contemporary Federal guidance, with the written approval of the California State Historic Preservation Officer of the research design for the investigation(s) and providing that the patentee, his heirs and assigns have granted permission for the investigation.

3. The patentee, his heirs and assigns will contact the California State Historic Preservation Officer and arrange for an inspection of the site subsequent to any scientific investigations. The purpose of the inspection will be to determine the necessity of retaining the protection provided by this covenant at CA–SBN–183.

4. The patentee, his heirs and his assigns shall not permit the removal or collection of archaeological artifacts from any of the protected sites, except as provided for in a scientific investigation as described in Number 2 above.

5. The above restrictions shall be binding on the parties hereto, their heirs, successors, and assigns in perpetuity or until CA–SBN–183 no longer retains the scientific data for which it is significant. Such determination shall be made by or in concurrence with the California State Historic Preservation Officer.

6. In the event of a violation of the above restrictions, any affected party may institute a suit to enjoin such violation or for damage by reason of any breach thereof.

The acceptance of the delivery of this patent shall constitute conclusive evidence of the agreement of the patentee to be bound by the conditions, restrictions, and limitations and to perform the obligations herein set forth.

The publication of this notice in the Federal Register will segregate the public lands described above to the extent that they will not be subject to appropriation under the public land laws, including the mining laws, for a period of two years. As provided by the regulations of 43 CFR 2201.1(b), any subsequently tendered application, allowance of which is discretionary, shall not be accepted, shall not be considered as filed, and shall be returned to the applicant. This segregation shall terminate upon issuance of patent or 2 years from the date of this publication, whichever occurs first.

Detailed information concerning the exchange, including the environmental assessment, is available at the Hollister Resource Area Office, 402 Hill Street, P.O. Box 365, Hollister, California 95024–0365.

For a period of 45 days from publication of this notice in the *Federal Register*, interested parties may submit comments to the Area Manager, Hollister Resource Area Office at the above address. Any adverse comments will be evaluated by the District Manager, who may vacate or modify this realty action and issue a final determination. In the absence of any action by the District Manager, this action will become the final determination.

Dated: March 14, 1988.

David Howell,

Area Manager.

BILLING CODE 4310-40-M

[CO–070–08–4212–13; C–38487]

Exchange of Lands in Garfield County, CO

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of Exchange of Lands.

SUMMARY: Pursuant to sections 205, 206, 302(b) and 310 of the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1716), the Bureau of Land Management, Glenwood Springs Resource Area, has identified parcels of public and private land as preliminarily suitable for exchange.

FOR FURTHER INFORMATION CONTACT: Additional information concerning this proposed exchange, including the planning documents and environmental assessment, is available for review in the Glenwood Springs Resource Area Office at 50629 Highway 6 and 24, P.O. Box 1009, Glenwood Springs, Colorado 81602.

For a period of 45 days from the date of first publication of this notice, interested parties may submit comments to the District Manager, Grand Junction District, Bureau of Land Management, 764 Horizon Drive, Grand Junction, Colorado 81506. Objections will be reviewed by the State Director who may sustain, vacate, or modify this realty action. In the absence of any objections, this Notice of Realty Action will become the final determination of the Department of the Interior.

SUPPLEMENTARY INFORMATION: The following-described lands have been determined to be preliminarily suitable for exchange under sections 205, 206, 302(b) and 310 of the Federal Land Policy and Management Act of 1976, 43 U.S.C. 1716:

Selected Public Lands

Disposal Parcel 18—146.96 Acres

T. 7 S., R. 94 W.
  Sec. 17: Lot 4, SW¼NW¼, W½SW¼

Disposal Parcel 158—318.07 acres

T. 7 S., R. 95 W.
  Sec. 35: S½S½
  Sec. 36: Lots 13, 14, 15, and 16

Disposal Parcel 159—162.43 acres

T. 7 S., R. 95 W.
  Sec. 25: Lots 13 and 14
  Sec. 36: Lots 3 and 4

Offered Private Land

Parcel O–1—40.00 Acres

T. 7 S., R. 94 W.
  Sec. 15: SW¼NW¼

Parcel O–2—313.14 Acres

T. 7 S., R. 94 W.
  Sec. 11: Lots 3 and 4, S½NW¼, SW¼

Parcel O–3—257.08 Acres

T. 7 S., R. 94 W.
  Sec. 1: SW¼SW¼, SE¼SW¼, S½SW¼SE¼
  Sec. 12: Lots 3 and 4, S½NW¼

Any adjustments to offered private land to equalize values would be made in T. 7 S., R. 94 W., Sec. 15, W½NW¼.

These 627.46 acres of public land under the jurisdiction of the Bureau of Land Management have been identified as preliminarily suitable for exchange. The determination has been made in response to a Bureau-benefiting exchange proposal developed cooperatively between the Bureau and Joan L. Savage.

In the proposal, 610.22 acres of offered private land with public values would be exchanged for 627.46 acres of public land which have been identified for disposal. The exchange proposal has been made to facilitate the consolidation of public land holdings. The consolidation would increase managerial efficiency and provide public access to natural resources on public lands being managed by the Bureau.

The values of the lands to be exchanged have been determined to be approximately equal. Upon completion of the final apprasial of the lands, the acreage will be adjusted or money will be used to equalize the exchange values.

Terms and Conditions

The following reservations would be made in patent issued for public land:

1. A reservation to the United States of a right-of-way for ditches or canals constructed by the authority of the United States, Act of August 30, 1890 (43 U.S.C. 945).

2. A reservation to the United States of all mineral deposits of known value.

3. A reservation for all existing and valid land use, including grazing leases, unless waived.

4. The reservation of oil and gas lease C–27872.

5. The reservation of oil and gas lease C–05173.

6. The reservation of right-of-way C–36806 for public access.

The publication of the notice in the **Federal Register** will segregate the public lands described above to the extent that they will not be subject to appropriation under the public land laws, including the mining laws and the mineral leasing laws. As provided by the regulations of 43 CFR 2201.1(b), any subsequently tendered application, allowance of which is discretionary, shall not be considered as filed and shall be returned to the applicant.

Barry C. Cushing,

Acting District Manager, Grand Junction District.

BILLING CODE 4310-JB-M

[NV–930–08–4212–24; N–47788]

Realty Action; 20 Year Nonrenewable Lease in Lincoln County, NV

The following described land has been determined to be suitable for leasing by non-competitive procedures under section 302 of the Federal Land Policy and Management Act of 1976, 43 U.S.C. 173.

Mount Diablo Meridian, Nevada

T. 6 S., R. 57 E.
  Sec. 25, NW¼SW¼NW¼NW¼.
  Aggregating 2.5 acres.

The purpose of the lease is to authorize improvements which have been located on the site for approximately fifteen years. The improvements resulted from the overdevelopment of a Section 4 Grazing Permit granted in 1973 to D–4 Enterprise, Inc., c/o Steve Medlin.

The lease will be offered at fair market rental to Steve and Glenda Medlin as a nonrenewable, nonassignable, noninheritable, 20 year lease. The land is not required for any conflicting federal purpose. The lease is consistent with the Bureau's planning for this area.

Detailed information concerning this action is available for review at the office of the Bureau of Land Management, Las Vegas District, 4765 W. Vegas Drive, Las Vegas, Nevada.

For a period of 45 days from the date of publication of this notice in the **Federal Register**, interested parties may submit comments to the District Manager, Las Vegas District, P.O. Box 26569, Las Vegas, Nevada 89126. Any adverse comments will be reviewed by the State Director, who may vacate or modify this realty action and issue a final determination. In the absence of any adverse comments this realty action will become the final determination of the Department of the Interior.

Date: March 8, 1988.

Ben F. Collins,

District Manager, Las Vegas, NV.

BILLING CODE 4310-HC-M

[NM–940–08–4220–11; NM NM 52387, NM NM 013679]

Proposed Continuation of Withdrawals; NM

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice.

SUMMARY: The Bureau of Reclamation proposes that part of two existing land withdrawals for the Navajo Unit, Colorado River Storage Project, continue until December 31, 2060. This is the estimated life of the Project. The land would remain closed to surface entry and mining, but has been and would remain open to mineral leasing.

DATE: Comments should be received by June 15, 1988.

ADDRESS: Comments should be sent to: New Mexico State Director, P.O. Box 1449, Santa Fe, NM 87504–1449.

FOR FURTHER INFORMATION CONTACT: Clarence Hougland, BLM New Mexico State Office, 505–988–6554.

The Bureau of Reclamation proposes that the existing land withdrawals made by Secretarial Order of December 6, 1915, and Director's Order of March 22, 1956, be continued until December 31, 2060, pursuant to section 204 of the Federal Land Policy and Management Act of 1976, 90 Stat. 2751, 43 U.S.C. 1714. The lands are located within the following described townships:

New Mexico Principal Meridian

T. 31 N., R. 5 W.
T. 30 N., R. 6 W.
T. 31 N., R. 6 W.
T. 32 N., R. 6 W.
T. 30 N., R. 7 W.
T. 31 N., R. 7 W.
T. 32 N., R. 7 W.
T. 30 N., R. 8 W.
T. 31 N., R. 8 W.

The areas described aggregate 17,533 acres in San Juan and Rio Arriba Counties.

The purpose of the withdrawals is for protection, operation, and maintenance of project facilities of the Navajo Unit of the Colorado River Storage Project. The withdrawals segregate the lands from operation of the public land laws generally, including the mining laws, but not the mineral leasing laws. No change is proposed in the purpose or segregative effect of the withdrawals.

The Project consists of four withdrawals. Notices for continuation of two withdrawals were published in the **Federal Register** on June 20, 1985, and January 11, 1985. The four withdrawals comprising the Project will be consolidated into one final public land order.

For a period of 90 days from the date of publication of this notice, all persons who wish to submit comments in connection with the proposed withdrawal continuations may present their views in writing to the New Mexico State Director at the address indicated above.

The authorized officer of the Bureau of Land Management will undertake such investigations as are necessary to determine the existing and potential demand for the land and its resources. A report will be prepared for consideration by the Secretary of the Interior, the President, and Congress, who will determine whether or not the withdrawals will be continued, and if so, for how long. The final determination of the withdrawals will be published in the **Federal Register**. The existing withdrawals will continue until such final determination is made.

Monte G. Jordan,

Associate State Director.

Dated: March 8, 1988.

Fish and Wildlife Service

Endangered and Threatened Species Permit Applications

The following applicants have applied for permits to conduct certain activities with endangered species. This notice is provided pursuant to section 10(c) of the Endangered Species Act of 1973, as amended (16 U.S.C. 1531, *et seq.*):

PRT–725785

Applicant: Gordon H. Brandenburger, Anaconda, MT.

The applicant requests a permit to import the personal sport-hunted trophy of a bontabok (*Damaliscus dorcas dorcas*), culled from the herd of M. G. Wienand in Bedford, Republic of South Africa, for the purpose of enhancement of propagation.

PRT–720880

Applicant: Cactus by Dodie, Lodi, CA.

The applicant requests a permit to sell in interstate commerce and export for sale in foreign commerce the following species of artificially propagated cacti: *Coryphantha minima, C. sneedii* var. *leei, C. sneedii* var. *sneedii, Echinocereus engelmannii var purpureus, E. fendleri var. kuenzleri, E. reichenbachii* var. *albertii, E. triglochidiatus* var. *inermis* and *E. viridiflorus* var. *davisii.*

PRT–725687

Applicant: Ferdinand Ferco Hantig, Las Vegas, NV.

The applicant requests a permit to import one captive born male tiger (*Panthera tigris*) which was purchased from the Bellewaerde Park, Belgium. The applicant will display the tiger in a manner designed to educate the public with regard to the species' ecological role and conservation needs. The applicant anticipates future exports and reimports of this tiger for exhibition purposes.

PRT–725772

Applicant: San Diego Zoological Society, San Diego, CA.

The applicant requests a permit to import three male and three female captive hatched Fiji banded iguanas (*Brachylophus fasciatus*) from Mrs. Ivy Watkins, Orchid Island, Suva, Fiji Islands, for the purpose of introducing new bloodlines to their existing group.

PRT–725729

Applicant: Thomas William Cianciola, Glendale, WI.

The applicant requests a permit to purchase 10–20 captive born adult masked bobwhite quail (*Colinus virginianus ridgwayi*) from three U.S. breeders for the purpose of captive propagation of the species.

PRT–725559

Applicant: Charles Pankow, Gibsonton, FL.

The applicant requests a permit to reexport one female Asian Elephant (*Elephas maximus*) born in the wild to Mike Hackenberger, Bowmanville Zoo, Bowmanville, Ontario, Canada for the purpose of enhancement of propagation and survival of the species.

Documents and other information submitted with these applications are available to the public during normal business (7:45 am to 4:15 pm) Room 403, 1375 K Street NW., Washington, DC 20005, or by writing to the Director, U.S. Office of Management Authority, P.O. Box 27329, Washington, DC 20038–7329.

Interested persons may comment on any of these applications within 30 days of the date of this publication by submitting written views, arguments, or data to the Director at the above address. Please refer to the appropriate applicant and PRT number when submitting comments.

Date: March 14, 1988.

R. K. Robinson,

Chief, U.S. Office of Management Authority.

BILLING CODE 4310-55-M

Marine Mammal Permit Applications

The public is invited to comment on the following applications for permits to conduct certain activities with marine mammals. The applications were submitted to satisfy requirements of the Marine Mammal Protection Act of 1972, *as amended* (16 U.S.C. 1361 *et seq.* the Endangered Species Act of 1973, *as amended* (16 U.S.C. 1531, *et seq.*) and the regulations governing marine mammals and endangered species (50 CFR Part 17 and 18).

File No. PRT–690715

Applicant Name: U.S. Fish & Wildlife Service, Alaska Fish & Wildlife Research Center, 1011 East Tudor Road, Anchorage, Alaska 99503.

Type of Permit: Scientific Research

Name of Animals: Walrus (*Odobenus rosmarus*)—60

Summary of Activity to be Authorized: The applicant proposes to attach flipper tags, permanently mark by hot branding, attach VHF radio transmitters and attach satellite-linked transmitters to Pacific walruses for purposes of scientific research to aid in the understanding of the population dynamics of the species. The walruses must be immobilized for attachment of the satellite-linked transmitters. The immobilization drugs to be tested are telezol and demerol/seritol. The immobilization drugs and techniques will be tested on walruses on a terrestrial haul-out prior to their use on females on pack ice. Tagged specimens will be monitored and, if the radio-tags or satellite transmitters malfunction, will be recaptured for refitting with another package. Biological samples will be salvaged from walruses found dead and from walruses that die as a result of the activities carried out under the proposed permit. Further biological samples will be imported for comparison with material from walruses from Alaskan waters.

Source of Marine Mammals for Research: Take on west coast of Alaska and the Bering and Chukchi seas. Import biological samples from Greenland, Canada, Norway and the Soviet Union.

Period of Activity: April 1, 1988 through December 31, 1990.

File No. PRT–723414

Applicant Name: J.H. Walker, Director, British Columbia Ministry of Environment and Parks, Parliament Buildings Wildlife Branch, Victoria, B.C. V8V 1X5, Canada.

Type of Permit: Scientific Research

Name of Animals: Up to 40 Northern sea otters *Enhydra lutris lutris.*

Summary of Activity to be Authorized: The applicant proposes to take up to 40 northern sea otters for the purpose of reestablishing a sea otter colony in the Queen Charlotte Islands, British Columbia, Canada.

Source of Marine Mammals for Research: Prince William Sound, Alaska

Period of Activity: February 15, 1989 to November 15, 1989.

Concurrent with the publication of this notice in the **Federal Register**, the Office of Management Authority is forwarding copies of this application to

the Marine Mammal Commission and the Committee of Scientific Advisors for their review.

Written data or comments, requests for copies of the complete applications, or requests for a public hearing on these applications should be submitted to the Director, U.S. Fish and Wildlife Service (OMA), P.O. Box 27329, Washington, DC 20038–7329, within 30 days of the publication of this notice. Anyone requesting a hearing should give specific reasons why a hearing would be appropriate. The holding of such hearing is at the discretion of the Director.

Documents submitted in connections with the above applications are available for review during normal business hours (7:45 am to 4:15 pm) in Room 400, 1375 "K" Street NW., Washington, DC.

Dated: March 14, 1988.

R.K. Robinson,

Chief, Branch of Permits, Office of Management Authority.

Minerals Management Service

Development Operations Coordination Document

AGENCY: Minerals Management Service, Interior.

ACTION: Notice of the receipt of a proposed Development Operations Coordination Document (DOCD).

SUMMARY: Notice is hereby given that Conoco Inc., Unit Operator of the Green Canyon Block 184 Federal Unit Agreement No. 14–08–0001–20257, has submitted a DOCD describing the activities it proposes to conduct on the Green Canyon Block 184 Federal unit. Proposed plans for the above area provide for the development and production of hydrocarbons with support activities to be conducted from an onshore base located at Grand Isle, Louisiana.

DATE: The subject DOCD was deemed submitted on March 7, 1988.

ADDRESS: A copy of the subject DOCD is available for public review at the Public Information Office, Gulf of Mexico OCS Region; Minerals Management Service, 1201 Elmwood Park Boulevard, Room 114, New Orleans, Louisiana (Office Hours: 8 a.m. to 4:30 p.m., Monday through Friday).

FOR FURTHER INFORMATION CONTACT: Mr. Al Durr; Minerals Management Service; Gulf of Mexico OCS Region; Production and Development; Development and Unitization Section; Unitization Unit; Telephone (504) 736–2659.

SUPPLEMENTARY INFORMATION: The purpose of this Notice is to inform the public pursuant to section 25 of the OCS Lands Act Amendments of 1978, that the Minerals Management Service is considering approval of the DOCD and that it is available for public review.

Revised rules governing practices and procedures under which the Minerals Management Service makes information contained in DOCDs available to affected States, executives of affected local governments, and other interested parties became effective December 13, 1979 (44 FR 53685). Those practices and procedures are set out in revised § 250.34 of Title 30 of the CFR.

Dated: March 9, 1988.

J. Rogers Pearcy,

Regional Director, Gulf of Mexico OCS Region.

BILLING CODE 4310-MR-M

INTERNATIONAL TRADE COMMISSION

[Investigation No. 337-TA-273]

Certain Cellular Mobile Telephones and Subassemblies and Component Parts Thereof; Commission Decision Not To Review Initial Determination Terminating Investigation on the Basis of a Consent Order; Issuance of Consent Order

AGENCY: International Trade Commission.

ACTION: Termination of investigation on the basis of a consent order; issuance of a consent order.

SUMMARY: Notice is hereby given that the U.S. International Trade Commission has determined not to review an initial determination (ID) issued by the presiding administrative law judge (ALJ) terminating the above-captioned investigation on the basis of a consent order.

Termination of the investigation on the basis of the consent order furthers the public interest by conserving Commission resources and those of the parties involved.

FOR FURTHER INFORMATION CONTACT: Wayne W. Herrington, Esq., Office of the General Counsel, U.S. International Trade Commission, 500 E Street SW., Washington, DC 20436, telephone 202–252–1092.

SUPPLEMENTARY INFORMATION: On February 10, 1988, the presiding ALJ issued an ID terminating the investigation. The ID granted the joint motion of complainant Motorola, Inc. and all respondents to terminate the investigation on the basis of a consent order, consent order agreement and settlement agreement. No petitions for review of the ID or government agency or public comments were received.

This action is taken under the authority of section 337 of the Tariff Act of 1930 (19 U.S.C. 1337) and 19 CFR 210.53(h).

Copies of the ID and all other nonconfidential documents filed in connection with this investigation are available for inspection during official business hours (8:45 a.m. to 5:15 p.m.) in the Office of the Secretary, U.S. International Trade Commission, 500 E Street SW., Washington, DC 20436, telephone 202-252-1000.

Hearing-impaired individuals are advised that information on this matter can be obtained by contacting the Commission's TDD terminal on 202-252-1810.

By order of the Commission.

Kenneth R. Mason,

Secretary.

Issued: March 9, 1988.

[FR Doc. 88-5774 Filed 3-16-88; 8:45 am]

BILLING CODE 7020-02-M

[Investigation No. 337-TA-237]

Certain Miniature Hacksaws; Nonreview of Initial Advisory Opinion

AGENCY: International Trade Commission.

ACTION: Notice of nonreview of initial advisory opinion.

SUMMARY: Notice is hereby given that the Commission has determined not to review an initial advisory opinion issued by the presiding administrative law judge (ALJ) finding that a certain miniature hacksaw sought to be imported by Disston Company, Inc. does not infringe claims 1-9 of U.S. Letters Patent 3,756,298. The miniature hacksaw is therefore not covered by the exclusion order and the cease and desist orders issued by the Commission in January 1987 at the conclusion of the above-captioned investigation.

FOR FURTHER INFORMATION CONTACT: Tim Yaworski, Esq., Office of the General Counsel, telephone 202-252-1096. Hearing impaired invididuals may obtain information on this matter by contacting the Commission's TDD terminal at 202-252-1810.

SUPPLEMENTARY INFORMATION: At the conclusion of the above-captioned investigation, the Commission issued an order excluding from entry into the United States certain minature hacksaws that infringed U.S. Letters Patent 3,756,298 (the '298 patent) and a cease and desist order directed to respondent Disston Inc. (Disston). Later, at the request of Disston, the Commission instituted advisory opinion proceedings to determine whether a hacksaw sought to be imported by Disston is covered by the previously-issued exclusion order and cease and desist order. The Commission has completed the advisory opinion proceedings and determined not to review the presiding ALJ's initial advisory opinion that Disston's miniature hacksaw does not infringe claims 1-9 of the '298 patent.

The Commission's action was taken pursuant to 19 U.S.C. 1337 and 19 CFR 211.54(b).

Copies of the initial advisory opinion and all other nonconfidential documents filed in connection with this investigation are available for inspection during official business hours (8:45 a.m. to 5:15 p.m.) in the Office of the Secretary, U.S. International Trade Commission, 500 E Street SW., Washington, DC 20436, telephone 202-252-1000.

By order of Commission.

Issued: March 9, 1988.

Kenneth R. Mason,

Secretary.

BILLING CODE 7020-02-M

[Investigation No. 337-TA-267]

Certain Minoxidil Power, Salts and Compositions for Use in Hair Treatment; Commission Order Remanding to the Presiding Administrative Law Judge an Initial Determination Terminating Respondent ACIC Canada, Inc., on the Basis of a Proposed Consent Order

On November 27, 1987, the presiding administrative law judge (ALJ) issued an initial determination (ID) (Order No. 35) granting a joint motion (Motion No., 267-30) of complainant The Upjohn Company (Upjohn) and respondent ACIC Canada, Inc. (ACIC), to terminate this investigation as to ACIC on the basis of a proposed consent order. The Commission investigative attorney (IA) filed a public interest statement in support of the motion.

The ID was served on November 27, 1987, and notice of is receipt by the Commission was published in the **Federal Register** on December 3, 1987. 52 FR 46009. On December 29, 1987, the Commission decided to review that ID as to the appropriateness of the certification requirements in paragraph 1 of the proposed consent order. 53 FR 292 (Jan. 6, 1988). Written submissions were received from Upjohn, the IA, former respondent S.S.T. Corporation, and the U.S. Customs Service.

The proposed consent order would permit ACIC to export minoxidil to the United States only if the import documents included a certification that the minoxidil was for specified uses. The purpose of the certification seems to be to permit entry of ACIC minoxidil for the specified uses should an exclusion order be issued in this case. However, the Customs Service is correct in objecting to the proposed certification provisions on the ground that it is unnecessary, since the Commission, not Customs, will enforce the consent order. Further, Customs "considers the presentation of unnecesary documentation at the time of entry as administratively burdensome and directly contrary to Customs' pressent mission to reduce the amount of paperwork required for the entry of merchandise."

A simple undertaking by ACIC should be sufficient in the consent order. Certification is more properly addressed in the context of issuing any exclusion order in this case.

In view of the foregoing, *it is hereby ordered:*

The subject ID (Order No. 35) is remanded to the presiding ALJ for further proceedings consistent with this order.

Kenneth R. Mason,

Secretary (For the Commission).

Date: March 9, 1988.

BILLING CODE 7020-02-M

[Investigation No. 337-TA-267]

Certain Minoxidil Powder, Salts and Compositions for Use in Hair Treatment; Commission Decision To Remand to the Presiding Administrative Law Judge an Initial Determination Terminating one Respondent on the Basis of a Consent Order

AGENCY: International Trade Commission.

ACTION: Remand to the presiding administrative law judge (ALJ) of initial determination terminating respondent ACIC Canada, Inc. on the basis of a proposed consent order.

SUMMARY: Notice is hereby given that the U.S. International Trade Commission has determined to remand to the presiding ALJ an initial determination (ID) (Order No. 35) issued by the ALJ terminating respondent ACIC Canada, Inc. in the above-captioned investigation on the basis of a proposed consent order.

FOR FURTHER INFORMATION CONTACT: Wayne W. Herrington, Esq., Office of the General Counsel, U.S. International Trade Commission, 500 E Street SW., Washington, DC 20436, telephone 202-252-1092.

SUPPLEMENTARY INFORMATION: On November 27, 1987, the presiding ALJ issued an ID terminating the investigation with respect to ACIC Canada, Inc. The ID granted the joint motion of complainant The Upjohn Company and ACIC Canada, Inc. to terminate the investigation with respect to ACIC on the basis of a proposed consent order and settlement agreement. Subsequently, the Commission determined to review the ID with respect to the question of the appropriateness of requiring certifications in consent orders, such as that set out in paragraph 1 of the proposed consent order.

This action is taken under the authority of section 337 of the Tariff Act of 1930 (19 U.S.C. 1337) and 19 CFR 210.56.

Copies of the Commission's Order, the ID, and all other nonconfidential documents filed in connection with this investigation are available for inspection during official business hours (8:45 a.m. to 5:15 p.m.) in the Office of the Secretary, U.S. International Trade Commission, 500 E Street SW., Washington, DC 20436, telephone 202-252-1000.

Hearing-impaired individuals are advised that information on this matter can be obtained by contacting the Commission's TDD terminal on 202-252-1810.

By order of the Commission.

Kenneth R. Mason,

Secretary.

Issued: March 9, 1988.

[Investigation No. 337-TA-267]

Certain Minoxidil Powder, Salts and Compositions for Use in Hair Treatment; Commission Decision Not To Review Initial Determination Finding Three Respondents in Default

AGENCY: International Trade Commission.

ACTION: Nonreview of an initial determination finding three respondents in default.

SUMMARY: Notice is hereby given that the U.S. International Trade Commission has determined not to review an initial determination (ID) of the presiding administrative law judge (ALJ) finding three respondents in default pursuant to Commission rule 210.25.

FOR FURTHER INFORMATION CONTACT: Wayne W. Herrington, Esq., Office of the General Counsel, U.S. International Trade Commission, 500 E Street, SW., Washington, DC 20436, telephone 202-252-1092.

SUPPLEMENTARY INFORMATION: On February 2, 1988, the presiding ALJ ordered respondents Chem Tri State, Inc., Life Essentials, and Ocean Chemicals to show cause why they should not be found in default. No responses were received. Consequently, the ALJ issued the subject ID (Order No. 51) finding these respondents in default under Commission rule 210.25. No petitions for review or government agency comments were received.

This action is taken under the authority of section 337 of the Tariff Act of 1930 (19 U.S.C. 1337) and 19 CFR 210.53(h).

Copies of the ID and all other nonconfidential documents filed in connection with this investigation are available for inspection during official business hours (8:45 a.m. to 5:15 p.m.) in the Office of the Secretary, U.S. International Trade Commission, 500 E Street SW., Washington, DC 20436, telephone 202-252-1000.

Hearing-impaired individuals are advised that information on this matter can be obtained by contacting the Commission's TDD terminal on 202-252-1810.

By order of the Commission.

Kenneth R. Mason,

Secretary.

INTERSTATE COMMERCE COMMISSION

[Finance Docket No. 31209]

The Indiana Rail Road Co. Exemption; Trackage Rights; Illinois Central Gulf Railroad Co.

Illinois Central Gulf Railroad Company has agreed to grant local trackage rights to The Indiana Rail Road Company between milepost 109 and Milepost 114, in Sullivan County, IN, to provide rail service to a single rail user. The trackage rights are to become effective on March 8, 1988.

This notice is filed under 49 CFR 1180.2(d)(7). Petitions to revoke the exemption under 49 U.S.C. 10505(d) may be filed at any time. The filing of a petition to revoke will not stay the transaction.

As a condition to the use of this exemption, any employees affected by the trackage rights will be protected pursuant to *Norfolk and Western Ry. Co.—Trackage Rights—BN*, 354 I.C.C. 605 (1978), as modified in *Mendocino Coast Ry., Inc.—Lease and Operate*, 360 I.C.C. 653 (1980).

Dated: March 7, 1988.

By the Commission, Jane F. Mackall, Director, Office of proceedings.

Noreta R. McGee,

Secretary.

BILLING CODE 7035-01-M

DEPARTMENT OF JUSTICE

Amended Consent Decree Under Clean Air Act to Enjoin Discharge of Air Pollutants, Boise Cascade Corp.

In accordance with Departmental Policy, 28 CFR 50.7, 38 FR 19029, notice is hereby given that an amended consent decree in *United States v. Boise Cascade Corporation*, Civil Action No. 1244, was lodged with the United States District Court for the Northern District of New York on February 29, 1988. The amended consent decree establishes a compliance program for Boise Cascade Corporation in Beaver Falls, New York, to bring the facility into compliance with the Clean Air Act, 42 U.S.C. 7401 *et seq.* and New York State SIP opacity and particulate emission regulations, 6 NYCRR §§ 227.3 and 227.4 relating to the discharge of air pollutants.

The Department of Justice will receive for thirty (30) days from the date of publication of this notice, written comments relating to the amended consent decree. Comments should be addressed to the Assistant Attorney General, Land and Natural Resources Division, Department of justice, Washington, DC 20530 and should refer to *United States v. Boise Cascade Corporation*, D.J. Ref. No. 90-5-2-1-486A.

The amended consent decree may be examined at the office of the United States Attorney, District of New Jersey, Newark, New Jersey 07102; at the Region II office of the Environmental Protection Agency, 26 Federal Plaza, New York, New York 10278; and the Environmental Enforcement Section, Land and Natural Resources Division of the Department of justice, Room 1515, Ninth Street and Pennsylvania Avenue, NW., Washington, DC 20530. A copy of the amended consent decree may be obtained in person or by mail from the Environmental Enforcement Section, Land and Natural Resources Division of the Department of Justice. Please enclose a certified check for $1.50 ($.10 per page reproduction cost) made payable to the Treasurer of the United States.

Roger J. Marzulla,

Acting Assistant Attorney General, Land and Natural Resources Division.

BILLING CODE 4410-01-M

Lodging of Consent Order Pursuant to Clean Water Act; Baton Rouge, LA

In accordance with Departmental policy, 28 CFR 50.7, notice is hereby given that a proposed Consent Decree in *United States v. City of Baton Rouge and State of Louisiana,* Civil Action No. 88-191A, was lodged with the United States District Court for the Middle District of Louisiana on March 3, 1988. The proposed Consent Decree concerns the control and prevention of illegal discharges of pollutants into the Mississippi River by the City of Baton Rouge, Louisiana from its three wastewater treatment plants known as the North Plant, the Central Plant and the South Plant.

The decree provides that the City of Baton Rouge shall pay a civil penalty of $750,000.00 to settle the United States' claims of violations of its National Pollutant Discharge Elimination System ("NPDES") permits in violation of Section 309 of the Clean Water Act, 33 U.S.C. 1319. The decree further provides that the City of Baton Rouge shall construct at each plant facilities enabling each plant to comply with the requirements of its NPDES permit and the Clean Water Act and to ensure against future illegal discharges of pollutants into the river.

The Department of Justice will receive for a period of thirty (30) days from the date of this publication comments relating to the proposed Consent Decree. Comments should be addressed to the Assistant Attorney General of the Land and Natural Resources Division, Department of Justice, Washington, DC 20530, and should refer to *United States v. The City of Baton Rouge,* and D.J. reference # 90-5-1-1-2769.

The proposed Consent Decree may be examined at the office of the United States Attorney, Second Floor, 352 Florida Street, Baton Rouge, Louisiana 70801, at the Region VI office of the Environmental Protection Agency, 1445 Ross Avenue, Dallas, Texas 75202, and at the Environmental Enforcement Section, Land and Natural Resources Division of the Department of Justice, Room 1716, 9th Street and Pennsylvania Avenue NW., Washington, DC 20530. A copy of the proposed Consent Decree may be obtained in person or by mail from the Environmental Enforcement Section, Land and Natural Resources Division of the Department of Justice. In requesting a copy, please enclose a check in the amount of $2.00, payable to the Treasurer of the United States.

Roger J. Marzulla,

Acting Assistant Attorney General, Land & Natural Resources Division.

BILLING CODE 4410-01-M

Addendum to Partial Consent Decree Under Clean Water Act to Enjoin Discharge of Water Pollutants; East Rutherford, NJ, et al.

In accordance with Departmental policy, 28 CFR 50.7, 38 FR 19029, notice is hereby given that an addendum to the partial consent decree in *United States v. Joint Meeting—Rutherford, East Rutherford; Carlstadt; Borough of Rutherford, New Jersey; Borough of East Rutherford, New Jersey; Borough of Carlstadt, New Jersey, State of New Jersey,* Civil Action No. 84-2744(SA), was lodged with the United States District Court for the District of New Jersey on December 30, 1987. The addendum to the partial consent decree establishes a compliance program for the Rutherford, Bergen County, New Jersey sewage treatment facility owned and operated by defendants, Joint Meeting—Rutherford and the Boroughs of Rutherford, East Rutherford, and Carlstadt, to bring the facility into compliance with the Clean Water Act, 33 U.S.C. 1251 *et seq.* and its National Pollutant Discharge Elimination System ("NPDES") permit, relating to the discharge of pollutants into navigable waters of the United States.

The Department of Justice will receive for thirty (30) days from the date of publication of this notice, written comments relating to the addendum to the partial consent decree. Comments should be addressed to the Assistant Attorney General, Land and Natural Resources Division, Department of Justice, Washington, DC 20530 and should refer to *United States v. Joint Meeting—Rutherford, East Rutherford, Carlstadt, et al.,* D.J. Ref. No. 90-5-2-1-2152.

The addendum to the partial consent decree may be examined at the office of the United States Attorney, District of New Jersey, Newark, New Jersey 07102; at the Region II office of the Environmental Protection Agency, 26 Federal Plaza, New York, New York 10278; and the Environmental Enforcement Section, Land and Natural Resources Division of the Department of Justice, Room 1515, Ninth Street and Pennsylvania Avenue, NW., Washington, DC 20530. A copy of the addendum to the partial consent decree may be obtained in person or by mail from the Environmental Enforcement Section, Land and Natural Resources Division of the Department of Justice. In requesting a copy, please enclose a certified check in the amount of $1.70 (10 cents per page reproduction charge) payable to the Treasurer of the United States.

BILLING CODE 4410-01-M

Consent Decree Pursuant to the Comprehensive Environmental Response, Compensation and Liability Act; General Motors Corp. et al.

In accordance with Departmental Policy, 28 CFR 50.7, 38 FR 19029, notice is hereby given that a Consent Decree in *United States v. General Motors Corporation, et al.,* Civil Action No. 87-464-CMW, was lodged with the United States District Court for the District of Delaware March 9, 1988. The Consent Decree concerns cost recovery in regard to the Harvey & Knotts hazardous waste site located in New Castle County, Delaware. The complaint in this action alleged that certain parties, including Harvey & Harvey, Inc., contributed to the contamination of the site. The Consent Decree provides that Harvey & Harvey, Inc. will reimburse the United States an amount up to $350,000, plus interest, over a ten year period for past and future response costs incurred by the federal government in relation to the site.

Comments should be addressed to the Assistant Attorney General, Washington, DC 20530 and should refer to *United States v. General Motors Corporation, et al.,* D.J. Ref. No. 90-11-2-34A.

The Consent Decree may be examined at the Office of the United States Attorney, District of Delaware, J. Caleb Boggs Federal Building, 844 King Street, Room 5110, Wilmington, Delaware 19801; at the Region III office to the Environmental Protection Agency, 841 Chestnut Street, Philadelphia, Pennsylvania 19107; and the Environmental Enforcement Section, Land and Natural Resources Division,

Room 1515, Ninth Street and Pennsylvania Avenue, NW., Washington, DC 20530. A copy of the Consent Decree may be obtained in person or by mail from the Environmental Enforcement Section, Land and Natural Resources Division of the Department of Justice. Please enclose a certified check payable to "Treasurer, United States of America" for $1.80 (10 cents per page) to cover the costs of copying.

Roger J. Marzulla,

Acting Assistant Attorney General, Land and Natural Resources Division.

BILLING CODE 4410-01-M

Lodging of Consent Decree; Harrison, AR, et al.

In accordance with the policy of the Department of Justice, 28 CFR 50.7, notice is hereby given that on February 16, 1988, a proposed consent decree in *United States v. City of Harrison, Arkansas and The State of Arkansas,* Civil Action No. 88-3007, was lodged with the United States District Court for the Western District of Arkansas. This consent decree settled a lawsuit filed February 16, 1988, pursuant to Section 309 of the Clean Water Act, (the "Act"), 33. U.S.C. 1319, for injunctive relief and for assessment of a civil penalty against the City of Harrison, Arkansas (the "City"). The complaint alleged, among other things, that a municipal wastewater treatment plant owned and operated by the City was discharging pollutants into navigable waters in excess of the limits set forth in the City's National Pollutant Discharge Elimination System ("NPDES") permit. The complaint alleged that these unauthorized discharges constituted violations of section 301 of the Act, 33 U.S.C. 1311.

Under the terms of the proposed consent decree, the City will make improvements to its wastewater treatment plant that will allow it to attain and maintain compliance with all the terms and conditions of its NPDES permit. The decree requires the City to complete all construction by March 9, 1989, and to attain and maintain compliance with all terms and conditions of its NPDES permit by April 1, 1989. The decree includes interim effluent limits that are to remain in effect from the date the decrce is entered until April 1, 1989, at which time the City shall comply with the final effluent limits of its NPDES permit. The proposed decree also calls for stipulated penalties against the City for failure to meet any of the deadlines set by the decree or failure to meet any of the effluent limitations set by the decree. In addition, the proposed consent decree requires the City to pay a civil penalty of $20,000 with respect to the violations of the Act alleged in the complaint.

The Department of Justice will receive comments relating to the proposed consent decree for a period of thirty (30) days from the date of this publication. Comments should be addressed to the Assistant Attorney General of the Land and Natural Resources Division, United States Department of Justice, P.O. Box 7611, Washington, DC 20044-7611. All comments should refer to *United States v. City of Harrison, Arkansas, and The State of Arkansas,* D.J. Ref. 90-5-1-1-2947.

The consent decree may be examined at the following offices of the United States Attorney and the Environmental Protection Agency ("EPA"):

EPA Region VI

Contact: Quinton Farley, Office of the Regional Counsel, U.S. Environmental Protection Agency, Region VI, 1201 Elm Street, Dallas, Texas 75270, (211) 767-2129

United States Attorney's Office

Contact: Willaim M. Cromwell, Assistant United States Attorney, Western District of Arkansas, P.O. Box 1524, Fort Smith, Arkansas 72902, (501) 783-5125

Copies of the proposed consent decree may also be examined at the Environmental Enforcement Section, Land and Natural Resources Division, United States Department of Justice, Room l250, Ninth Street and Pennsylvania Avenue, NW., Washington, DC 20044-7611. A copy of the proposed consent decree may be obtained by mail from the Environmental Enforcement Section, Land and Natural Resources Division, United States Department of Justice. When requesting a copy of the proposed decree, please enclose a check for copying costs in the amount of $1.20 payable to the Treasurer of the United States.

Roger J. Marzulla,

Acting Assistant Attorney General, Land and Natural Resources Division.

BILLING CODE 4410-01-M

Lodging of Consent Decree Pursuant to the Clean Water Act; Jersey City, NJ

In accordance with departmental policy, 28 CFR 50.7, notice is hereby given that on February 23, 1988, a proposed consent decree in *United States of America v. City of Jersey City* (consolidated with *United States of America v. City of Hoboken, et al.,* Civ. No. 79-2030) was lodged with the United States District Court for the District of New Jersey. The proposed consent decree settles the United States' claims under the Clean Water Act against the City of Jersey City, New Jersey, the Jersey City Sewerage Authority ("JCSA"), the City of Union City, and the Hudson County Utilities Authority relating to discharges from two Jersey City sewage treatment plants without providing secondary level treatment, in violation of applicable permit requirements. The decree also settles similar claims of the Interstate Sanitation Commission against the same defendants.

The proposed consent decree requires Jersey City and JCSA to complete work currently underway to connect their sewerage system to the secondary wastewater treatment facility operated by the Passaic Valley Sewerage Commissioners in Newark, New Jersey, and to divert all sewage flows in their system to that facility by December 31, 1988. The decree also requires (1) payment of $500,000 to the United States in settlement of its civil penalty claims, (2) compliance with interim effluent limitations until the diversion is completed, and (3) various operating improvements and repairs to the existing Jersey City treatment plants.

The Department of Justice will receive for a period of thirty (30) days from the date of this publication comments relating to the proposed consent decree. Comments should be addressed to the Assistant Attorney General, Land and Natural Resources Division, Department of Justice, Washington, DC 20530, and should refer to *United States v. City of Jersey City,* D.J. Ref. 90-5-1-1-2460.

The proposed consent decree may be examined at the offices of the United States Attorney, Federal Building, 970 Broad Street, Newark, New Jersey 07102, and at the Region II office of the Environmental Protection Agency, 26 Federal Plaza, New York, NY 10278. A copy of the consent decree may be examined at the Environmental Enforcement Section, Land and Natural Resources Division, Department of Justice, Room 1517, Ninth Street and Pennsylvania Avenue, NW., Washington, DC 20530. Copies of the proposed consent decree may be obtained in person or by mail from the Environmental Enforcement Section, Land and Natural Resources Division of the Department of Justice. BILLING CODE 4410-01-M

Lodging of Consent Decree Pursuant to the Clean Air Act; the Pillsbury Co.

In accordance with Departmental policy, 28 CFR 50.7, notice is hereby given that on February 11, 1988, a proposed Consent Decree in *United States v. The Pillsbury Company*, Civil No. 88–18–W was lodged with the United States District Court for the Southern District of Iowa. The proposed Consent Decree concerns a complaint filed under Section 110 of the Clean Air Act, 42 U.S.C. 7410, that alleged violations of the Iowa State Implementation Plan ("SIP") for control of fugitive dust at Pillsbury's Red Oak, Iowa facility. The Consent Decree requires defendant to implement specific measures to reduce fugitive dust emissions including enclosing the shed at the truck dumping location and covering the open hatches in the rail cars at the rail loading location. The defendant is also required to pay a civil penalty of $14,000.00.

The Department of Justice will receive for a period of thirty (30) days from the date of publication comments relating to the proposed Consent Decree. Comments should be addressed to the Assistant Attorney General, Land and Natural Resources Division, Department of Justice, Washington, DC 20530, and should refer to *United States v. The Pillsbury Company*, DOJ Ref. No. 90–5–2–1–878.

The proposed Consent Decree may be examined at the Office of the United States Attorney, Southern District of Iowa, 115 U.S. Courthouse, E. First and Walnut Street, Des Moines, Iowa, 50309, and at the Region VII Office of the Environmental Protection Agency, 726 Minnesota Avenue, Kansas City, Kansas 66101. Copies of the Consent Decree may be examined at the Environmental Enforcement Section, Land and Natural Resources Division, Department of Justice, Room 1515, Ninth Street and Pennsylvania Avenue, NW., Washington, DC 20530. A copy of the proposed Consent Decree may be obtained in person or by mail from the Environmental Enforcement Section, Land and Natural Resources Division of the Department of Justice. In requesting a copy please enclose a check in the amount of $1.50 (10 cents per page reproduction cost) payable to the Treasurer of the United States.

BILLING CODE 4410-01-M

Lodging of Consent Decree Pursuant to the Clean Water Act; Schlage Lock Co.

In accordance with Department policy, 28 CFR 50.7, notice is hereby given that on March 4, 1988, a proposed consent decree in *United States v. Schlage Lock Company*, Civil Action No. 87–K–1078, was lodged with the United States District Court for the District of Colorado. The proposed consent decree resolves a judicial enforcement action brought by the United States against Schlage Lock Company ("Schlage") for violations of the Clean Water Act.

The proposed consent decree requires Schlage to demonstrate and maintain compliance with the general pretreatment regulations in 40 CFR Part 403 and the metal finishing pretreatment regulations in 40 CFR Part 433. Schlage is required to monitor and sample its effluent discharges and to submit monthly reports of those samples to the United States Environmental Protection Agency ("EPA"). Schlage is also required to submit quarterly reports to EPA on the status of a proposed new treatment facility. The consent decree provides for stipulated penalties in the event Schlage violates any of the monitoring or reporting requirements or the discharge limitations in 40 CFR Part 433. Finally, the consent decree requires Schlage to pay a civil penalty of $120,000 within 30 days of the entry of the decree by the Court.

The Department of Justice will receive for a period of thirty (30) days from the date of this publication comments relating to the proposed consent decree. Comments should be addressed to the Assistant Attorney General of the Land and Natural Resources Division, Department of Justice, Washington, DC 20530, and should refer to *United States v. Schlage Lock Company, D.J. Ref. 90–5–1–1–2892*.

The proposed consent decree may be examined at the office of the United States Attorney, Federal Building, Suite 1200, 1961 Stout Street, Denver, Colorado 80294, and at the Region VIII office of the United States Environmental Protection Agency, One Denver Place, 999 18th Street, Denver, Colorado 80202. Copies of the consent decree may be examined at the Environmental Enforcement Section, Land and Natural Resources Division of the Department of Justice, Room 1517, Ninth Street and Pennsylvania Avenue, NW., Washington, DC 20530. A copy of the proposed consent decree may be obtained in person or by mail from the Environmental Enforcement Section, Land and Natural Resources Division of the Department of Justice. In requesting a copy, please enclose a check in the amount of $1.70 (10 cents per page reproduction cost) payable to the Treasurer of the United States.

Acting Assistant Attorney General, Land and Natural Resources Division.

[FR Doc. 88–5784 Filed 3–16–88; 8:45 am]

BILLING CODE 4410-01-M

Lodging of Settlement Stipulation; Smith International, Inc., et al.

In accordance with the policy of the Department of Justice, 28 CFR 50.7, notice is hereby given that on February 29, 1988, a proposed Stipulation and Agreement to Settle in *In re: Smith International, Inc., et al.*, was lodged with the United States District Court for the Central District of California. The settlement is in connection with a proof of claim filed by the Department of Justice on behalf of the Environmental Protection Agency ("EPA") in Smith International's Chapter 11 bankruptcy reorganization proceedings.

The United States filed a proof of claim in Smith's bankruptcy on March 31, 1987, regarding costs incurred by EPA under the Comprehensive Environmental Response, Compensation and Liability Act of 1980, as amended, at the Operating Industries, Inc. landfill ("OII") in Monterey Park, California. The proof of claim stated that EPA had incurred costs of $8 million at the OII site at the time the proof of claim was filed. The United States claim against Smith at the OII site is based on evidence that Smith sent hazardous substances for disposal to the site.

The settlement provides that Smith will pay $100,350 of EPA's past costs at the OII site, which represents 1% of EPA's $10.035 million in past costs incurred at the site up to the time of the settlement agreement. Smith will also pay 0.65% of EPA's future costs at the OII site, up to a maximum payment of $5 million. EPA also reserves the right to seek 0.65% of costs incurred if it is shown after completion of the remedy that the remedy is not protective of human health and the environment and further work is needed at the site, regardless of whether the $5 million cap has been reached. Smith reserves the

right to challenge EPA's costs on the basis that the costs incurred were inconsistent with the National Contingency Plan. The settlement with Smith does not affect or discharge the liability of any other party at the OII site.

The Department of Justice will receive comments relating to the proposed settlement stipulation for a period of 30 days from the date of this publication. Comments should be addressed to the Assistant Attorney General of the Land and Natural Resources Division, Department of Justice, Washington, DC 20530. All comments should refer to *In re: Smith International, Inc.*, D.J. Ref. 90–11–3–210.

The proposed settlement stipulation may be examined at the office of the United States Attorney, 312 North Spring Street, Los Angeles, California 90012 and at the Region IX office of the U.S. Environmental Protection Agency, 215 Fremont Street, San Francisco, California 94105. A copy of the proposed settlement stipulation may also be examined at the Environmental Enforcement Section, Land and Natural Resources Division, United States Department of Justice, Room 1515, Tenth Street and Pennsylvania Avenue, NW., Washington, DC 20530. A copy of the proposed settlement stipulation may be obtained by mail from the Environmental Enforcement Section, Land and Natural Resources Division of the Department of Justice. Any request for a copy of the settlement stipulation should be accompanied by a check in the amount of $1.80 for copying costs ($0.10 per page) payable to "United States Treasurer."

Roger J. Marzulla,

Acting Assistant Attorney General, Land and Natural Resources Division.

AGENCY: Office of Juvenile Justice and Delinquency Prevention, Justice.

ACTION: Notice of proposed FY 1988 program priorities under the Missing Children's Assistance Act.

SUMMARY: The Office of Juvenile Justice and Delinquency Prevention (OJJDP) is publishing for comment a Notice of FY 1988 proposed program priorities for making grants and contracts under the Missing Children's Assistance Act, Title IV of the Juvenile Justice and Delinquency Prevention Act of 1974.

DATE: Comments are due on or before May 13, 1988.

ADDRESS: Send comments to Verne L. Speirs, Administrator, Office of Juvenile Justice and Delinquency Prevention, 633 Indiana Avenue, NW., Washington, DC 20531. (202) 724–7751.

FOR FURTHER INFORMATION CONTACT: Mary Witten Neal, Director, Missing Children's Program, Office of Juvenile Justice and Delinquency Prevention, 633 Indiana Avenue, NW., Washington, DC 20531. (202) 724–7655.

SUPPLEMENTARY INFORMATION: Responsibility for establishing annual research, demonstration, and service program priorities for making grants and contracts pursuant to section 406 of the Missing Children's Assistance Act rests with the Administrator of the Office of Juvenile Justice and Delinquency Prevention. The proposed funding priorities were established, as required by the Missing Children's Assistance Act, in consultation with the Missing Children's Advisory Board appointed by the Attorney General. The Administrator is hereby announcing these proposed priorities and inviting public comment on them for sixty days.

The new proposed priorities are as follows:

1. *Model Community Program:* The purpose of this program is to design and implement a community organization and planning strategy to guide comprehensive program development focused on missing and exploited children. The program would promote specific programmatic and procedural prototypes to serve this youth population, and suggest organizational, planning and program development strategies to coordinate and concentrate the resources of the juvenile service system to address the issue of the missing and exploited youth, with emphasis on the family and mobilizing volunteers.

2. *Parent/Family Abductions:* This program would address the complex legal issues of child abductions by parents and family members. The strengths and weaknesses in current public and private sector approaches to the problem would be identified. Emphasis would be placed on providing instructional assistance on legal and jurisdictional difficulties in dealing with the problem.

3. *Assistance to Private Voluntary Organizations:* The grants are intended to expand the capacity of private voluntary organizations serving missing and exploited children.

Listed below are programs under section 406 of the Missing Children's Assistance Act that are continuation programs for FY 1988.

National Study of Law Enforcement Agencies' Policies and Practices Regarding Missing Children and Homeless Youth

This study describes current law enforcement policies and practices and identifies the most effective law enforcement methods for handling reports and investigating, identifying, and recovering children who may be missing or homeless and at risk of exploitation. It also provides better estimates of the number of cases of missing children reported to law enforcement agencies annually.

The Child Victim as Witness Research and Development Program

This study designs, implements, and tests new strategies to be used to improve court policies and practices for handling child victim witnesses.

Research on the Psychological Consequences of Abduction and Sexual Exploitation

The purpose of this research is to increase our knowledge of, and develop effective treatment alternatives for, the psychological consequences of families with missing and exploited children.

Assistance to State Clearinghouses for Missing and Exploited Children

This program, administered by the National Center for Missing and Exploited Children, solicits applications from states to assist in the development, coordination and exchange of uniform data with regard to missing children.

Listed below are programs under section 404 of the Missing Children's Assistance Act which have been funded with FY 1987 funds and which are continuing funding priorities for FY 1988.

The National Center for Missing and Exploited Children

The National Center for Missing and Exploited Children will continue to (1) operate a national toll-free telephone line by which individuals may report information regarding the location of missing children; (2) provide technical

BEST COPY AVAILABLE

VOL 53 ISS 52 MR 17 1988

assistance in the location and recovery of missing children, and in the prevention, investigation, prosecution and treatment of missing and exploited child cases; (3) coordinate public and private programs which locate, recover, or reunite missing children with their legal custodian; and (4) disseminate information about innovative and model missing children's programs, services and legislation. (Section 404(a)(3) 404(b)(1))

National Incidence Study

This study will continue the development process for obtaining reliable estimates of the number of missing children, profiles of missing children, and the circumstances surrounding the events. (Section 404(b)(3))

Dated: March 11, 1988.

Diane M. Munson,

Acting Administrator, Office of Juvenile Justice and Delinquency Prevention.

BILLING CODE 4410-18-M

DEPARTMENT OF LABOR

Employment and Training Administration

Investigations Regarding Certifications of Eligibility To Apply for Worker Adjustment Assistance

Petitions have been filed with the Secretary of Labor under section 221 (a) of the Trade Act of 1974 ("the Act") and are identified in the Appendix to this notice. Upon receipt of these petitions, the Director of the Office of Trade Adjustment Assistance, Employment and Training Administration, has instituted investigations pursuant to section 221 (a) of the Act.

The purpose of each of the investigations is to determine whether the workes are eligible to apply for adjustment assistance under Title II, Chapter 2, of the Act. The investigations will further relate, as appropriate, to the determination of the date on which total or partial separations began or threatened to begin and the subdivision of the firm involved.

The petitioners or any other persons showing a substantial interest in the subject matter of the investigations may request a public hearing, provided such request is filed in writing with the Director, Office of Trade Adjustment Assistance, at the address shown below, not later than March 28, 1988.

Interested persons are invited to submit written comments regarding the subject matter of the investigations to the Director, Office of Trade Adjustment Assistance, at the address shown below, not later than March 28, 1988.

The petitons filed in this case area available for inspection at the Office of the Director, Office of Trade Adjustment Assistance, Employment and Training Administration, U.S. Department of Labor, 601 D Street, NW., Washington, DC 20213.

Signed at Washington, DC this 7th day of March 1988.

Marvin M. Fooks,

Director, Office of Trade Adjustment Assistance.

APPENDIX

Petitioner: Union/Workers/Firm	Location	Date received	Date of petition	Petition No.	Articles produced
Anchor Hocking Industrial Glass Co. (Workers)	Bremen, OH	3/7/88	2/12/88	20,498	Glassware.

[TA-W-20,314]

Mast Industries, Inc., Andover, MA; Dismissal of Application for Reconsideration

Pursuant to 29 CFR 90.18 an application for administrative reconsideration was filed with the Director of the Office of Trade Adjustment Assistance for workers at Mast Industries, Incorporated, Andover, Massachusetts. The review indicated that the application contained no new substantial information which would bear importantly on the Department's determination. Therefore, dismissal of the application was issued.

TA-W-20.314; Mast Industries, Incorporated, Andover, Massachusetts (March 4, 1988.)

Signed at Washington, DC this 4th day of March 1988.

Marvin M. Fooks,

Acting Director, Office of Trade Adjustment Assistance.

[FR Doc. 88-5899 Filed 3-16-88; 8:45 am]

BILLING CODE 4510-30-M

Determinations Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with section 223 of the Trade Act of 1974 (19 U.S.C. 2273) the Department of Labor herein presents summaries of determinations regarding eligibility to apply for adjustment assistance issued during the period February 29, 1988—March 4, 1988.

In order for an affirmative determination to be made and a certification of eligibility to apply for adjustment assistance to be issued, each of the group eligibility requirements of section 222 of the Act must be met.

(1) That a significant number or proportion of the workers in the workers' firm, or an appropriate subdivision thereof, have become totally or partially separated,

(2) That sales or production, or both, of the firm or subdivision have decreased absolutely, and

(3) That increases of imports of articles like or directly competitive with articles produced by the firm or appropriate subdivision have contributed importantly to the separations, or threat thereof, and to the absolute decline in sales or production.

Negative Determinations

In each of the following cases the investigation revealed that criterion (3) has not been met. A survey of customers indicated that increased imports did not contribute importantly to worker separations at the firm.

TA-W-20,374; RTE Corporation, Distribution Transformers Div., Waukesha, WI

TA-W-20,384; MRM Industries, Inc., Meriden, CT

TA-W-20,366; Hussmann/Bastian-Blessing Grand Haven, MI

TA-W-20,368; Brentwood Furniture, Haverhill, MA

In the following cases the investigation revealed that criterion (3) has not been met for the reasons specified.

TA-W-20,367; Enka Company, Dubuque, IA

Increased imports did not contribute importantly to workers separations at the firm.

TA-W-20,363; American Trading & Production Corp., Oil & Gas Div., Houston, TX

Increased imports did not contribute importantly to workers separations at the firm.

TA-W-20,378; VW Federal Credit Union, Youngwood, PA

The workers' firm does not produce an article as required for certification under section 222 of the Trade Act of 1974.

TA-W-20,458; Jordache Footwear Co., New York, NY

The workers' firm does not produce an article as required for certification under section 222 of the Trade Act of 1974.

TA-W-20,457; Wire Technical, Inc., St. Paul, MN

Increased imports did not contribute importantly to workers separations at the firm.

TA-W-20,402; Clarksburg Electro-Plating, Inc., Clarksburg, WV

The workers' firm does not produce an article as required for certification under section 222 of the Trade Act of 1974.

TA-W-20,441; E.R. Wagner Manufacturing, Hustisford, WI

The workers' firm does not produce an article as required for certification under section 222 of the Trade Act of 1974.

TA-W-20,383; Dirigo Lumber Co., Greenville Junction, ME

U.S. imports of softwood lumber decreased in quantity both absolutely and relative to U.S. production 1986 compared with 1985 and in Jan-Sept 1987 compared with the same period one year earlier.

Affirmative Determinations

TA-W-20,357; Kaiser Cement Corp., Longhorn Plant & Quarry, San Antonio, TX

A certification was issued covering all workers of the firm separated on or after December 11, 1986 and before January 11, 1988.

TA-W-20,304; Philadelphia Gear Corp., King of Prussia PA

A certification was issued covering all workers of the firm separated on or after November 15, 1986.

TA-W-20,390; Courtaulds CPD, Inc., Neward, NJ

A certification was issued covering all workers of the firm separated on or after January 5, 1987 and before january 31, 1988.

TA-W-20,375; Rohm & Haas Tennessee, Inc., Knoxville, TN

A certification was issued covering all workers of the firm separated on or after December 12, 21, 1986.

TA-W-20,382; Bogen Communication, Inc., Ramsey, NJ

A certification was issued covering all workers of the firm separated on or after January 4, 1987.

I hereby certify that the aforementioned determinations were issued during the period February 29, 1988—March 4, 1988. Copies of these determinations are available for inspection in Room 6434, U.S. Department of Labor, 601 D Street, NW., Washington, DC 20213 during normal business hours or will be mailed to persons who write to the above address.

Dated: March 8, 1988.

Marvin M. Fooks,

Director, Office of Trade Adjustment Assistance.

[FR Doc. 88-5900 Filed 3-16-88; 8:45 am]

BILLING CODE 4510-30-M

Occupational Safety and Health Administration

Advisory Committee on Construction Safety and Health; Full Committee Meeting

Notice is hereby given that the Advisory Committee on Construction Safety and Health, established under section 107(e)(1) of the Contract Work Hours and Safety Standards Act (40 U.S.C. 333) and section 7(b) of the Occupational Safety and Health Act of 1970 (29 U.S.C. 656) will meet on March 29 and 30, 1988 in Room C2318, U.S. Department of Labor, Frances Perkins Building, Third Street and Constitution Ave., NW., Washington, DC. The meeting is open to the public and will start at 9:00 a.m.

Agenda items will include a discussion of possible revisions to OSHA construction standards concerning Steel Erection (Subpart R), Concrete and Masonry (Subpart Q), and Hazard Communication, and discussion of OSHA's Voluntary Protection Program and other items concerning the construction industry. Written data, views or documents may be submitted, preferably with 20 copies, to the Division of Consumer Affairs. Any such submissions received prior to the meeting will be provided to the members of the Committee and will be included in the record of the meeting. Anybody wishing to make an oral presentation should notify the Division of Consumer Affairs before the meeting. The request should state the amount of time desired, the capacity in which the person will appear, and a brief outline of the content of the presentation.

For additional information contact: Tom Hall, Division of Consumer Affairs, Occupational Safety and Health Administration, Room N-3647, Third Street and Constitution Avenue NW., Washington, DC, 20210 Telephone: 202-523-8615.

The official record of the meeting will be available for public inspection and copying at the OSHA Docket Office.

Room N-3670, Frances Perkins Building, Third Street and Constitution Ave. NW., Washington, DC 20210. Telephone 202-523-7894.

Signed at Washington, DC this 11th day of March, 1988.

John A. Pendergrass,

Assistant Secretary.

BILLING CODE 4510-26-M

NATIONAL AERONAUTICS AND SPACE ADMINISTRATION

[Notice 88-26]

NASA Advisory Council, History Advisory Committee; Meeting

AGENCY: National Aeronautics and Space Administration.

ACTION: Notice of meeting.

SUMMARY: In accordance with the Federal Advisory Committee Act, Pub. L. 92-463, as amended, the National Aeronautics and Space Administration announces a forthcoming meeting of the NASA Advisory Council, History Advisory Committee (HAC).

Date and Time: March 25, 1988, 9 a.m. to 3 p.m.

ADDRESS: NASA Headquarters, Federal Office Building 10B, Room 525, Washington, DC 20546.

FOR FURTHER INFORMATION CONTACT: Dr. Sylvia D. Fries, Code XH, National Aeronautics and Space Administration, Washington, DC 20546 (202/453-8300).

SUPPLEMENTARY INFORMATION: The History Advisory Committee was established to provide advice and guidance to the NASA history program, which maintains a non-record historical reference file and publishes works in the history of aeronautics and space science and technology. The Committee, chaired by Dr. Arthur Norberg, consists of 6 members.

This meeting will be closed to the public from 2:30 p.m. to 3 p.m. for a discussion of the qualifications of a candidate for membership. Such a discussion would invade the privacy of the candidate and other individuals involved. Since this session will be concerned with matters listed in 5 U.S.C. 552b(c)(6), it has been determined that the meeting be closed to the public for this period of time. The remainder of the meeting will be open to the public up to the seating capacity of the room, which is approximately 20 persons, including Committee members and other participants. Visitors will be requested to sign a visitor's register. It is imperative that the meeting be held on this date to accommodate the schedules of the key participants.

Type of Meeting: Open—except for a closed session, as noted in the agenda below.

Agenda:

March 25, 1988:

9 a.m.—Introductory Remarks

9:15 a.m.—Report on NASA Advisory Council (NAC) Meeting

9:30 a.m.—Report of the Director, NASA History Office

11:30 a.m.—Discussion of Current Program

1 p.m.—Prospects and Issues

2:30 p.m.—Nomination of New Member (HAC). (This portion of meeting will be closed.)

3 p.m.—Adjourn.

March 11, 1988.

Ann Bradley,

Advisory Committee Management Officer, National Aeronautics and Space Administration.

[FR Doc. 88-5815 Filed 3-16-88; 8:45 am]

BILLING CODE 7510-01-M

NATIONAL CAPITAL PLANNING COMMISSION

Guidelines and Submission Requirements for the Installation of Microwave Antennas on Federal Property in the National Capital Region

AGENCY: National Capital Planning Commission.

ACTION: Final Guidelines and Submission Requirements.

SUMMARY: On November 18, 1987, the National Capital Planning Commission (NCPC) published Proposed Guidelines and Submission Requirements for the Installation of Satellite Antennas on Federal Property in the National Capital Region (52 FR 44237); No comments were received as the direct result of the publication of these draft Guidelines in the **Federal Register**. However, following the elapse of the 30-day comment period, the NCPC did receive communications from the CIA and the Department of the Navy. The views expressed by these parties were considered by the NCPC in the preparation of the finalized Guidelines. The NCPC reviewed the draft Guidelines at its January 7, 1988 meeting and made the following changes:

1. Substituted the word "microwave" for "satellite" wherever it appeared in the Guidelines. This change was made to eliminate any confusion regarding the NCPC's intent to review both satellite and terrestrial microwave antenna installations.

2. Added language regarding the multiple use of antennas by adjacent Federal facilities to minimize the impact of multiple antennas.

3. Added language to indicate that any existing antenna that is moved or relocated must comply with the submission requirements of the Guidelines.

The Guidelines, with the above modifications, were adopted by the NCPC on January 7, 1988.

DATE: March 17, 1988.

FOR FURTHER INFORMATION CONTACT: Martin J. Rody, Director, Planning Services Division, National Capital Planning Commission, 1325 G Street, NW., Washington, DC 20576 or by telephone at 202/724-0179.

Reginald W. Griffith,

Executive Director.

The National Capital Planning Commission finds that certain microwave antennas may adversely impact the aesthetics of the National Capital Region and the health and welfare of its population. Therefore, in order to minimize the visual impacts of microwave antennas on the skyline of the Nation's Capital and on the general appearance of Federal facilities and to protect the public from any potential adverse radio frequency bio-effect impacts from transmitting microwave antennas, the National Capital Planning Commission is providing the following Guidelines and Submission Requirements to be used by Federal agencies in the National Capital Region in the preparation and submission of plans for antenna installations. (The National Capital Region includes Montgomery and Prince George's Counties in Maryland; Arlington, Fairfax, Loudoun, Prince William Counties, and the independent cities within the outer boundaries thereof in Virginia; and the District of Columbia).

(a) Prior to the installation of any microwave antenna on Federal property in the National Capital Region, Federal agencies shall submit (pursuant to section 5 of the National Capital Planning Act of 1952, as amended; section 5-432, D.C. Code, in the District of Columbia; and as appropriate, Section 4 of the International Center Act of 1968, as amended) all such installation proposals to the National Capital Planning Commission for review and comment. Approval by the NCPC of such installations will be limited to five years. This time period may be increased to 10 years at the NCPC's discretion on sites outside the

Monumental Core [1] and surrounding lands and designated Historic Districts.

(1) Specific Submission Requirements:

(i) A statement of need—justifying the size of the antenna and other appropriate data regarding the particular installation consistent with security limitations.

(ii) Site plan and building elevations (for antennas mounted on a building) showing the form, dimensions, and location of the antenna(s).

(iii) Construction drawings showing the proposed method of installation.

(iv) Description of the texture and color of materials to be used.

(v) Screening plan—including proposed materials, color and texture for rooftop installations. For ground-level installations also include the number, species, and size of trees or shrubs to be used as a screen.

(vi) Site line studies illustrating the extent to which the proposed antenna(s) will be visible from the surrounding streets and public open spaces. These studies should include all alternatives considered.

(vii) A review of alternatives considered to meet the telecommunications needs of the agency.

(2) General Criteria Applying to Antenna Installations:

(i) No rooftop microwave antenna in the National Capital Region should exceed the height of the roof of any permitted penthouses on Federal buildings.

(ii) Materials used in the construction of antennas and their mountings should not be bright, shiny, or reflective and should be of a color that blends with the surrounding building materials.

(iii) Any masts or towers should be non-combustible, corrosion resistant, and protected against electrolytic action.

(iv) All antennas should be adequately grounded to protect against a direct lightning strike.

(b) Federal agencies may request an extension of the approval prior to expiration of the original approval. The request should be accompanied by a certification that:

(1) The original installation is structurally sound and continues to meet all the submission requirements;

(2) Clearly establishes the continued need for the installation; and

(3) Technological advances have not offered any alternatives that permit the elimination of the antenna or reduction in its size to minimize the visual impacts.

Any antenna installation which does not receive re-certification by the NCPC should be dismantled and removed as soon as possible after the expiration of the NCPC's approval period.

(c) To the extent possible, Federal agencies should anticipate the need for antennas on all new buildings and design such buildings in such a fashion as to screen the needed antennas in a manner appropriate to the design of each building.

(d) Rooftop antennas on existing Federal buildings or ground level installations in the National Capital Region should be designed and installed in a manner that minimizes or eliminates their visual impacts on adjacent properties or public rights-of-way. Where appropriate to the character of a building, retro-fitting to screen antennas not accommodated in original building designs and plans should be considered. Various architectural solutions are possible for retro-fitting buildings to screen antennas installations. The architectural style, orientation, available rooftop space, and structural character of a building, as well as the heights of neighboring buildings, are all important considerations in the retro-fit option selected. A variety of materials, including plastic, fiberglass, and glass can be used to screen or obscure antennas. Any materials that do not block the passage of the radio frequency signals are suitable as a screen.

(e) Reasonable precautions are necessary in locating and operating transmitting microwave antennas, because of potential adverse radio frequency bio-effects. In light of the numerous variables regarding power and frequency levels for each installation, electromagnetic radiation impacts will have to be evaluated on a site specifc basis. All submissions to the NCPC for a transmitting microwave antenna should be accompanied by an environmental assessment. The environmental assessment shall include, among other considerations, an estimate of the electromagnetic radiation levels at 10, 50, 100, 500, 1,000 and 2,000 feet from the installation in milliwatts/centimeter squared and the safeguards proposed to protect the public from any potential adverse bio-effects. A manufacturers certification as to electromagnetic radiation at the above distances and a statement that the proposed antenna meets all American National Standards Institute (ANSI) and Environmental Protection Agency (EPA) current radio frequency emission standards should be made part of the environmental assessment. The NCPC will continue to seek state-of-the-art information on health and human safety issues and shall apply that information and resulting awareness of issues in reviewing and approving antenna installations.

(f) All agencies responsible for antenna installations existing at the time of the adoption of these guidelines are required to apply for approval of all such installations within five years after the adoption of these Guidelines and Submission Requirements.

(g) These guidelines are general in nature and convey the spirit of the concerns regarding potential adverse visual and/or bio-effect impacts to be mitigated. Each installation is a special case and the appropriateness of the solutions selected to reduce the visual impacts will, in a large measure, be determined by the particular location or locations chosen for the installation and the architectural character of the building. These guidelines provide general criteria to be applied on a case-by-case basis. It is the intent of these Guidelines to apply to any existing microwave antenna(s) which are moved or relocated to another location on the Federal facility and to encourage the joint use of microwave antennas wherever possible.

(h) The NCPC will, in its review of proposals for microwave antenna installations, be particularly concerned with the agency's statement of need, justification of antenna size, and measures employed to minimize the visual impacts of the proposed installation. The NCPC will continue to review all microwave and terrestrial microwave antenna proposals, on a case-by-case basis, as a modification to previously approved site and building plans.

NATIONAL SCIENCE FOUNDATION

Forms Submitted for OMB Review

In accordance with the Paperwork Reduction Act and OMB Guidelines, the National Science Foundation is posting this notice of information collection that will affect the public.

Agency Clearance Officer: Herman G. Fleming, (202) 357-9520.

OMB Desk Officer: Written comments to: Office of Information and Regulatory Affairs, ATTN: Jim Houser, Desk Officer, OMB, 722 Jackson Place, Room 3208, NEOB, Washington, DC 20503.

---

[1] The Monumental Core as defined in the Federal Facilities element of the "Comprehensive Plan for the National Capital."

Title: Research Opportunities for Women (telephone survey).

Affected Public: Individuals.

Response/Burden Hours: 600 responses; 300 burden hours.

Abstract: Survey will gather views of several groups (e.g., ROW Awardees, declinees, "Mainstream: award winners and declinees) to assess initial impacts of Research Opportunities for Women program and investigate several questions related to program's importance to the targeted group, its development, and its management.

Dated: March 11, 1988.

Herman G. Fleming,

NSF Clearance Officer.

BILLING CODE 7555-01-M

Advisory Panel for Ecology; Meeting

The National Science Foundation announced the following meeting:

Name: Advisory Panel for Ecology.

Date and Time: April 6-8, 1988—8:30 a.m. to 5:00 p.m. each day.

Place: Room 1242, National Science Foundation, 1800 G Street, NW., Washington, DC 20550.

Type of Meeting: Part Open.

Open 04/06, 9:00 a.m. to 12:00 noon.

Closed 04/06, 1:00 p.m. to 5:00 p.m. and 04/07 & 04/08, 8:30 a.m. to 5:00 p.m.

Contact Person: Dr. Patrick J. Webber, Program Director, Ecology (202) 357-9734, Room 215, National Science Foundation, Washington, DC 20550.

Summary Minutes: May be obtained from the Contact Person at the above address.

Purpose of Meeting: To provide advice and recommendations concerning support for research in ecology.

Agenda: Review and evaluation of research proposals and projects as part of the selection process of awards. Open: 04/06/88, 9:00 a.m. to 12:00 noon. Discussion to include long-range planning in ecology.

Reason for Closing: The proposals being reviewed include information of a proprietary or confidential nature, including technical information; financial data, such as salaries; and personal information concerning individuals associated with the proposals. These matters are within exemptions (4) and (6) of 5 U.S.C. 552b(c), Government in the Sunshine Act.

M. Rebecca Winkler,

Committee Management Officer.

Advisory Panel for EXPRES and Related Multimedia Electronic Communication and Collaboration Technologies; Meeting

The National Science Foundation announces the following meeting:

Name: Advisory Panel for EXPRES and Related Multimedia Electronic Communication and Collaboration Technologies

Dates and Times:

April 7, 1988—9:00 a.m.–5:00 p.m.

April 8, 1988—8:30 a.m.–5:00 p.m.

Place: Carnegie Mellon University, Information Technology Center Conf. Room, University Computing Center, 4910 Forbes Avenue, Pittsburgh, PA 15213

Type of Meeting:

Open

April 7, 1988—9:00 a.m.–5:00 p.m.

April 8, 1988—9:30 a.m.–5:00 p.m.

Closed

April 8, 1988—8:30 a.m.–9:30 a.m.

Contact Person: Mr. Donald R. Mitchell, National Science Foundation, Phone: 202/357-9717

Summary of Minutes: May be obtained from Donald R. Mitchell

Purpose of Meeting: To review progress and provide advice and recommendations concerning NSF support and oversight of EXPRES and related technologies

Agenda: The open session will be focused on the progress to date and planned future milestones of the EXPRES program. The closed session will discuss pending funding actions.

Reason for Closing: The pending funding actions being discussed include information of a proprietary or confidential nature, including technical information; financial data, such as salaries; and personal information concerning individuals associated with the projects. These matters are within exemptions (4) and (6) of U.S.C. 552b(c), the Government in Sunshine Act.

M. Rebecca Winkler,

Committee Management Officer.

Advisory Panel for Integrative Neural Systems Program; Meeting

The National Science Foundation announces the following meeting:

Name: Advisory Panel for Integrative Neural Systems Program

Date and Time:

April 6 and 7 1988; 9:00 a.m.–5:00 p.m.

April 8, 1988; 9:00 a.m.–12:00 p.m.

Place: National Science Foundation, 1800 G Street, NW., Washington, DC, Room 543.

Type of Meeting: Part Open—

Closed 04/06—9:00 a.m. to 5:00 p.m.

Closed 04/07—9:00 a.m. to 5:00 p.m.

Open 04/08—9:00 a.m. to 11:00 a.m.

Closed 04/08—11:00 a.m. to 12:00 Noon

Contact Person: Dr. Nathaniel G. Pitts, Program Director, Integrative Neural Systems Program, Room 320, National Science Foundation, Washington, DC 20550 Telephone (202) 357-7040.

Minutes: May be obtained from contact person listed above.

Purpose of Meeting: To provide advice and recommendations concerning support for research in integrative neural systems.

Agenda:

Open—General discussion of the current status and future plans of the Integrative Neural Systems Program.

Closed—To review and evaluate research proposals as part of the selection process for awards.

Reason for Closing: The proposals being reviewed include information of a proprietary or confidential nature, including technical information; financial data, such as salaries; and personal information concerning individuals associated with the proposals. These matters are within exemptions 4 and 6 of the Government Sunshine Act.

M. Rebecca Winkler,

Committee Management Officer.

Advisory Panel for Plant Science Centers; Meeting

The National Science Foundation announces the following meeting:

Name: Advisory Panel for Plant Science Centers.

Date and Time: April 9 and 10, 1988—8:30 a.m. to 5:00 p.m. each day.

Place: Rooms 540, 543, 540B and 523, 1800 G Street, NW., Washington, DC 20550.

Type of Meeting: Closed.

Contact Person: Dr. Robert Rabin, Senior Advisor for Biotechnology, Directorate for Biological, Behavioral and Social Sciences, (202) 357-9894, Room 212, National Science Foundation, Washington, DC 20550.

Summary Minutes: May be obtained from the Contact Person at the above address.

Purpose of Meeting: To provide advice and recommendations concerning support for the establishment of Plant Science Centers and the research to be conducted in each.

Agenda: Review and evaluation of research proposals and projects as part of the selection process of awards.

Reason for Closing: The proposals being reviewed include information of a proprietary or confidential nature, including technical information; financial data such as salaries; and personal information concerning individuals associated with the proposals. These matters are within exemptions (4) and (6) of 5 U.S.C. 552(c), Government in the Sunshine Act.

Advisory Panel for Systematic Collections

The National Science Foundation announces the following meeting:

Name: Advisory Panel for Systematic Collections

Date: April 8, 1988, 8:30 a.m.–4:30 p.m.

Place: National Science Foundation, 1800 G Street, NW., Room 523, Washington, DC.

Type of Meeting: Closed.

Contact Person: Dr. Nancy Parezo, Associate Program Director, Anthropology Program, Room 320, National Science Foundation, Washington, DC 20550, Telephone (202) 357-7804.

Minutes: May be obtained from contact person listed above.

Purpose of Meeting: To provide advice and recommendations concerning support for preservation of Systematic Anthropological Collections.

Agenda: To review and evaluate research proposals as part of the selection process for awards.

Reason for Closing: The proposals being reviewed include information of a proprietary or confidential nature, including technical information; financial data, such as salaries; and personal information concerning individuals associated with the proposals. These matters are within exemptions 4 and 6 of the Government in the Sunshine Act.

United States Antarctic Program Safety Review Panel; Meeting

The National Science Foundation announces the following meeting:

Name: United States Antarctic Program (USAP) Safety Review Panel

Date: April 4 and 5, 1988

Time:

10:00 a.m. to 5:00 p.m. on April 4

9:00 a.m. to 5:00 p.m. on April 5

Place: Omni Georgetown Hotel (Smithsonian Room), 2121 P St., NW; Washington, DC

Type of Meeting: Open

Contact Person: Mr. Russell L. Schweickart, Chairman, USAP Safety Review Panel, Room H-217, National Science Foundation, Washington, DC 20550, Telephone (202) 634-4892

Minutes: May be obtained from contact person listed above.

Purpose of Meeting: Review safety issues as they relate to the U.S. presence in Antarctica.

Agenda: Review of Panel's recent trips to Antarctica and discussion of Panel's report on safety issues.

Special Note: The above meeting replaces the scheduled meeting of March 10 & 11, 1988, which had to be cancelled at the last moment due to the illness of the Chairman.

Task Force on Women, Minorities and the Handicapped in Science and Technology; Meeting and Public Hearing

In accordance with section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92-463), notice is hereby given of a meeting of the Task Force followed by a public hearing on April 7, 1988, followed by a meeting of the Task Force on April 8, 1988.

Public Hearing

Name: Task Force on Women, Minorities, and the Handicapped in Science and Technology

Date: April 7, 1988

Time: 9:30 a.m. to 5:00 p.m.

Place: Radcliffe College, Cronkhite Graduate Center, 6 Ash Street, Cambridge, MA 02138

Purpose:

The Task Force will seek testimony from interested parties on innovative ways to increase opportunities for women, minorities and the handicapped in science and technology in the areas of employment, research, higher education, precollege education and social aspects.

Testimony will be heard in three ways: (1) Scheduled testimony of ten-minute summary presentations accompanied by longer written statements and supporting documents for the record; (2) summary statements from the floor of three-minute duration accompanied by any longer written statements or materials for the record; and (3) written testimony submitted to the Task Force offices from those who cannot be heard because of time constraints or those who cannot attend.

Anyone wishing to testify or submit a statement for the record should write Sue Kemnitzer, Executive Director, Task Force on Women, Minorities, and the Handicapped in Science and Technology, 330 C Street, SW., Washington, DC 20201.

The public hearing will be followed by a discussion of the testimony by the Task Force members April 8, 1988.

Meeting

Name: Task Force on Women, Minorities, and the Handicapped in Science and Technology

Date: April 8, 1988

Time: 9:00 a.m. to 12:00 noon

Place: Radcliffe College, Cronkhite Graduate Center, 6 Ash Street, Cambridge, MA 02138

Type of Meeting: Open

Purpose: The purpose of the Task Force on Women, Minorities and the Handicapped is to:

—Examine the current status of women, minorities and the disabled in science and engineering positions in the federal government and in federally-assisted research programs;

—Coordinate existing federal programs designed to promote the employment of women, minorities and physically disabled scientists and engineers:

—Suggest cooperative interagency programs for promoting such employment;

—Identify exemplary programs in the state, local or private sectors; and

—Develop a long-range plan to advance opportunities for women, minorities, and disabled persons in science and technology.

Agenda: Reports will be heard on progress of the subcommittees on Employment, Research, Higher Education, Precollege Education and Social Aspects, as well as other business of the Task Force.

All meetings and public hearings of the Task Force are open to the public and all proceedings will be recorded and will be available at the Task Force offices.

Sue Kamnitzer,

Executive Director, (202) 245–7477.

March 1, 1988.

BILLING CODE 7533-01-M

NUCLEAR REGULATORY COMMISSION

[Docket Nos. STN 50–454, STN 50–455, STN–50–456 and STN 50–457]

Commonwealth Edison Co.; Environmental Assessment and Finding of No Significant Impact

The U.S. Nuclear Regulatory Commission (the Commission) is considering issuance of amendments to the licenses for the Commonwealth Edison Company (CECo, the licensee) for Byron Station, Units 1 and 2, located in Ogle County Illinois, and Braidwood Station, Units 1 and 2, located in Will County, Illinois.

Environmental Assessment

Identification of Proposed Action: The proposed amendments would add two radiation monitors in the Technical Specifications for each station and add a requirement that a composite sample of sump effluent be taken prior to discharge into the circulating water system. These monitors have been added to assure that the release limits of 10 CFR Part 20 are not exceeded when fluids are discharged from the condensate cleanup system sump and the turbine building fire and oil sump to the circulating water system.

These revisions to the licenses of Byron Station, Units 1 and 2, and Braidwood Station, Units 1 and 2, would be made in response to the licensee's application for amendment dated February 18, 1987, as supplemented November 17, 1987, and clarified January 8, 1988.

The Need for the Proposed Action: Pursuant to 10 CFR 50.90, the licensee has proposed amendments to Facility Operating Licenses NPF–37 and NPF–66 for Byron Station, Units 1 and 2, respectively and Facility Operating Licenses NPF–72 and NPF–75 for Braidwood Station, Units 1 and 2, respectively. The amendments would add two radiation monitors in the Technical Specifications for each station and add a requirement that a composite sample of sump effluent be taken prior to discharge into the circulating water system.

One of the proposed radiation monitors would monitor the discharge from the condensate cleanup system sump. The condensate cleanup system was originally intended to be used for system flushing during startup. However, operating experience has indicated the need to run this system during normal operation. Thus, the potential exists for low level radioactivity in the condensate cleanup system sump.

The other proposed radiation monitor would monitor discharge from the turbine building fire and oil sump. The original plant design for turbine building equipment and floor drains was to collect drain effluent into the oil separator, then route the separated water directly to the radwaste treatment system for processing and release via the release tank. Present operating experience has shown that the water volume is higher than originally anticipated, generating a heavy load for the radwaste treatment system for a negligible reduction in activity release. Therefore, the licensee is proposing to drain the separated water to the fire and oil sump.

Environmental Impacts of the Proposed Action: The Commission has evaluated the radiological impact of the proposed amendments and concludes that they meet the acceptance criteria for the process and effluent radiological monitoring instrumentation and sampling systems based on the following regulations and guidance: (1) 10 CFR Part 20, 20.16 as related to radioactivity monitoring of effluents to unrestricted areas; (2) Regulatory Guides 8.8 and 1.21 as related to sampling frequencies, required analyses, instrument alarm/trip setpoints, calibration and sensitivities, gross beta-gama measurements, etc.; (3) 10 CFR Part 50, Appendix 1 as related to the numerical guides for design objectives and limiting conditions for operation to meet the criterion "as low as is reasonably achievable" given in Appendix I; (4) General Design Criterion 60 as related to control releases of radioactive materials to the environment, and (5) Drawings showing how the monitors are located in the effluent release path and describing the actuation logic of the monitors and how the monitors isolate the valves as per NUREG–0472, "Standard Radiological Effluent Specifications for PWR's," Revision 2, February 1980.

The proposed amendments involve a change to a requirement with respect to the installation of use of a facility component located within the restricted area as defined in 10 CFR Part 20. Succinctly, the amendment adds two radiation monitors to the Technical Specifications for each station: one on the condensate cleanup (CP) system sump and the other on the fire and oil sump. Upon detection of unacceptable levels of radioactivity in sump effluent, the monitors are designed to alarm and automatically terminate sump discharge. Monitor setpoints are conservatively selected to ensure that 10 CFR 20.106 limits are not exceeded.

With regard to nonradiological impacts, the proposed amendment involves systems located entirely within the restricted area as defined in 10 CFR Part 20. They do not affect non-radiological plant effluents and have no other environmental impact. Therefore, the Commission also concludes that there are no significant nonradiological environmental impacts associated with the proposed amendments.

Accordingly, the Commission findings in the "Final Environmental Statement related to the operation of Byron Station, Units 1 and 2" dated April 1982 and in the "Final Environmental Statement related to the operation of Braidwood Station, Units 1 and 2" dated June 1984, regarding radiological environmental impacts from the plants during normal operation or after accident conditions, are not adversely altered by this action.

Alternative to the Proposed Actions: The principal alternative would be to deny the requested amendment. This alternative, in effect, would be the same as a "no action" alternative. Since the Commission has concluded that no adverse environmental effects are associated with this proposed action, any alternatives with equal or greater environmental impact need not be evaluated.

Alternative Use of Resources: This action does not involve the use of resources not previously considered in connection with the Nuclear Regulatory Commission's Final Environmental Statements related to these facilities.

Agencies and Persons Consulted: The NRC staff reviewed the licensee's submittals of February 18, 1987, November 17, 1987 and January 8, 1988; and did not consult other agencies or persons.

Finding of No Significant Impact: The Commission has determined not to prepare an environmental impact statement for the proposed license amendment.

Based upon this environmental assessment, the Commission concludes that the proposed action will not have a significant adverse effect on the quality of the human environment.

For further details with respect to this action, see the request for amendments dated February 18, 1987, as supplemented November, 1987, and clarified by letter dated January 8, 1988, and the Final Environmental Statements for Byron, dated April 1982, and Braidwood, dated June 1984; which are available for public inspection at the Commission's Public Document Room, 1717 H Street NW., Washington, DC 20555; the Rockford Public Library, 215 N. Wyman Street, Rockford, Illinois 61101; and the Wilmington Township Public Library, 201 S. Kankakee Street, Wilmington, Illinois 60481.

Dated at Rockville, Maryland, this 11th day of March 1988.

For the Nuclear Regulatory Commission.

Daniel R. Muller,

Director, Project Directorate III–2, Division of Reactor Projects–III, IV, V and Special Projects.

[FR Doc 88–5842 Filed 3–16–88; 8:45 am]

BILLING CODE 7590-01-M

[Docket No. 50–461]

The Illinois Power Co. et al.; Environmental Assessment and Findings of No Significant Impact

The U.S. Nuclear Regulatory Commission (the Commission) is considering issuance of an exemption from the schedular requirements of Appendix J to 10 CFR Part 50 to the Illinois Power Company [1] (IP), Soyland Power Cooperative, Inc. and Western Illinois Power Cooperative, Inc. (the licensees) for the Clinton Power Station, Unit 1 (CPS) located in DeWitt County, Illinois. The exemption was requested by the licensees by letter dated January 13, 1988.

Environmental Assessment

Identification of Proposed Action: The exemption will provide a one-time relief from the 2-year surveillance interval requirement of Section III.D.3 of Appendix J, 10 CFR Part 50, for performing Type C local leak rate tests (LLRTs) for containment isolation valves (CIVs) 1E12–F023, 1E51–F034, 1E51–F035, 1E51–F390, 1E51–F391, 1E12–F061, 1E12–F062, and 1E51–F013. The licensees have proposed to conduct these tests prior to startup from the first refueling outage. This outage, which is currently scheduled to be initiated in January of 1989, must be initiated by no later than February 28, 1989. These tests must be performed prior to when containment integrity needs to be assured following the refueling operation.

The Need for the Proposed Action: The end of the initial 24-month testing interval for these eight CIVs is October 21, 1988. With the exception of these eight valves, the licensees either have, or plan to perform the required Type C tests for the CIVs on schedule. Many of the tests will be conducted during the spring 1988 maintenance outage. The licensees have stated that due to plant constraints it is not possible to perform the testing of these eight valves without extending the outage solely for the purpose of these tests.

The licensees have indicated that performing the leak testing on these eight valves will require the removal of the drywell head and the disassembly of the reactor head spray piping to allow installation of a blind flange as an inboard test boundary. Reassembly of the reactor head spray piping will require that a reactor coolant system boundary leakage test be performed in accordance with the ASME Code. The licensees estimate that these tasks would extend the spring 1988 maintenance outage by about one week, and cause additional personnel exposure of approximately one to two Man-Rem.

The first refueling outage is scheduled to be initiated in January of 1989. Drywell head removal and a reactor coolant boundary leakage test will be required during this outage. Performance of the leak tests for these Containment Isolation Valves during this outage would bring the test schedule into alignment with the fuel cycle. Thus, the licensees indicated that the time to perform the required testing has been accounted for in planning the first refueling outage. If IP encounters a problem prior to the first refueling outage which entails removal of the drywell head and disassembly of the reactor head spray piping, the required leakage tests will be performed in order to return to full compliance with the regulations.

Environmental Impacts of the Proposed Action: The licensees have indicated that the previous Type C LLRTs were performed satisfactorily for the valves covered by the requested exemption. The licensees also indicated that the calculated percentages of the leakage contribution of the subject valves to the allowable leakage limit are small. Further, the licensees have surveyed industry LLRT data for valves of this type and have determined that for all types of valves identified in the requested exemption, the probabilities of a leakage related failure during the 238 day extension period requested were low (0.84% for the worst case). Therefore, the licensees have concluded that the granting of the requested exemption would not present a significantly increased probability of containment leakage other than contemplated in Appendix J.

The Commission's staff has determined that granting the proposed exemption would not significantly increase the probability or amount of expected containment leakage and that containment integrity would thus be maintained. Consequently, the probability of accidents would not be increased, nor would the post-accident radiological releases be greater than previously determined. Neither would the proposed exemption otherwise affect radiological plant effluents. Therefore, the Commission concludes that there are no significant radiological environmental impacts associated with the proposed exemption.

---

[1] Illinois Power Company is authorized to act as agent for Soyland Power Cooperative, Inc. and Western Illinois Power Cooperative, Inc. and has exclusive responsibility and control over the physical construction, operation and maintenance of the facility.

With regard to potential nonradiological impacts, the proposed exemption involves a change to surveillance and testing requirements. It does not affect nonradiological plant effluents and has no other environmental impact. Therefore, the Commission concludes that there are no significant nonradiological environmental impacts associated with the proposed exemption.

Alternatives to the Proposed Action: Because the Commission has concluded that there is no significant environmental impact associated with the proposed exemption, any alternative would have either no or greater environmental impact. The principal alternative would be to deny the requested exemption. This would not reduce the environmental impacts attributed to the facility but would result in an outage of considerable duration with attendant costs and would result in an unnecessary loss of power to the grid when the distribution system's need for power is high.

Alternative Use of Resources: This action involves no use of resources not previously considered in connection with the "Final Environmental Statement Related to Operation of the Clinton Power Station, Unit No. 1," dated May 1982.

Agencies and Persons Consulted: The Commission's staff reviewed the licensees' request and did not consult other agencies or persons. The State of Illinois was consulted with regard to a related Technical Specification change to the Clinton Power Station Facility Operating License.

Finding of No Significant Impact

The Commission has determined not to prepare an environmental impact statement for the proposed exemption.

Based upon the foregoing environmental assessment, we conclude that the proposed action will not have a significant effect on the quality of the human environment.

For further details with respect to this action, see the application for exemption dated January 13, 1988, which is available for public inspection at the Commission's Public Document Room, 1717 H Street, NW., Washington, DC, and at the Vespasian Warner Public Library, 120 West Johnson Street, Clinton, Illinois 61727.

Dated at Rockville, Maryland, this 11th day of March 1988.

For the Nuclear Regulatory Commission.

Daniel R. Muller,

Director, Project Directorate III-2, Division of Reactor Projects—III, IV, V and Special Projects.

[FR Doc. 88-5843 Filed 3-16-88; 8:45 am]

BILLING CODE 7590-01-M

[Docket No. 50-368]

Arkansas Power and Light Co.; Facility Operating License

The U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment No. 82 to Facility Operating License No. NPF-6, to Arkansas Power and Light Company, which revised the Technical Specifications for operation of the Arkansas Nuclear One, Unit No. 2, located in Pope County, Arkansas. The amendment was effective as of the date of its issuance.

The amendment approves changes in the boron concentration in the refueling tank, safety injection tanks, and boric acid makeup tank. The changes provide safety and operational enhancements specifically suited to the use of extended cycle cores.

The application for the amendment complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment.

Notice of Consideration of Amendment and Opportunity for Prior Hearing in connection with this action was published in the **Federal Register** on December 21, 1987 (52 FR 48348). No request for a hearing or petition for leave to intervene was filed following this notice.

The Commission has prepared an Environmental Assessment and Finding of No Significant Impact related to the action and has concluded that an environmental impact statement is not warranted because there will be no environmental impact attributed to the action beyond that which has been predicted and described in the Commission's Final Environmental Statement for the facility dated June 1977.

For further details with respect to this action, see: (1) The applications for amendment dated October 26, 1987, as supplemented by letter dated January 19, 1988, (2) Amendment No. 82 to Facility Operating License No. NPF-6, and (3) the Environmental Assessment and Finding of No Significant Impact (53 FR 7268). All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street, NW., Washington, DC, and at the Tomlinson Library, Arkansas Technical University, Russelville, Arkansas 72801. A copy of items (2) and (3) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, DC 20555, Attention: Director, Division of Reactor Projects—III, IV, V and Special Projects.

Dated at Rockville, Maryland, this 11th day of March, 1988.

For the Nuclear Regulatory Commission.

George F. Dick,

Project Manager, Project Directorate—IV, Division of Reactor Projects—III, IV, V and Special Projects, Office of Nuclear Reactor Regulation.

[FR Doc. 88-5844 Filed 3-16-88; 8:45 am]

BILLING CODE 7590-01-M

[Docket No. 50-029]

Yankee Atomic Electric Co.; Consideration of Issuance of Amendment to Facility Operating License and Opportunity for Hearing

The U.S. Nuclear Regulatory Commission (the Commission) is considering issuance of an amendment to Facility Operating License No. DPR-3, issued to the Yankee Atomic Electric Company (the licensee), for operation of the Yankee Nuclear Power Station, located near Rowe, Massachusetts.

The proposed amendment would revise the provisions in the Technical Specifications relating to the surveillance testing of the 480-volt emergency bus and the addition of an action statement for the voltage sensors on this bus. The license application for amendment is dated January 5, 1988.

Prior to issuance of the proposed license amendment, the Commission will have made findings required by the Atomic Energy Act of 1954, as amended (the Act) and the Commission's regulations.

By April 18, 1988, the licensee may file a request for a hearing with respect to issuance of the amendment to the subject facility operating license and any person whose interest may be affected by this proceeding and who wishes to participate as a party in the proceeding must file a written request for hearing and a petition for leave to intervene. Requests for a hearing and petitions for leave to intervene shall be

filed in accordance with the Commission's Rules of Practice for Domestic Licensing Proceedings in 10 CFR Part 2. If a request for a hearing or petition for leave to intervene is filed by the above date, the Commission or an Atomic Safety and Licensing Board, designated by the Commission or by the Chairman of the Atomic Safety and Licensing Board Panel, will rule on the request and/or petition and the Secretary or the designated Atomic Safety and Licensing Board will issue a notice of hearing or an appropriate order.

As required by 10 CFR 2.714, a petition for leave to intervene shall set forth with particularity the interest of the petitioner in the proceeding, and how that interest may be affected by the results of the proceeding. The petition should specifically explain the reasons why intervention should be permitted with particular reference to the following factors: (1) The nature of the petitioner's right under the Act to be made a party to the proceeding; (2) the nature and extent of the petitioner's property, financial, or other interest in the proceeding; and (3) the possible effect of any order which may be entered in the proceeding on the petitioner's interest. The petition should also identify the specific aspect(s) of the subject matter of the proceeding as to which petitioner wishes to intervene. Any person who has filed a petition for leave to intervene or who has been admitted as a party may amend the petition without requesting leave of the Board up to fifteen (15) days prior to the first prehearing conference scheduled in the proceeding, but such an amended petition must satisfy the specificity requirements described above.

Not later than fifteen (15) days prior to the first prehearing conference scheduled in the proceeding, a petitioner shall file a supplement to the petition to intervene, which must include a list of the contentions which are sought to be litigated in the matter, and the bases of each contention set forth with reasonable specificity. Contentions shall be limited to matters within the scope of the amendment under consideration. A petitioner who fails to file such a supplement which satisfies these requirements with respect to at least one contention will not be permitted to participate as a party.

Those permitted to intervene become parties to the proceeding, subject to any limitations in the order granting leave to intervene, and have the opportunity to participate fully in the conduct of the hearing, including the opportunity to present evidence and cross-examine witnesses.

A request for a hearing or a petition for leave to intervene shall be filed with the Secretary of the Commission, U.S. Nuclear Regulatory Commission, Washington, DC 20555, Attention: Docketing and Service Branch, or may be delivered to the Commission's Public Document Room, 1717 H Street, NW., Washington, DC by the above date. Where petitions are filed during the last ten (10) days of the notice period, it is requested that the petitioner or representative for the petitioner promptly so inform the Commission by a toll-free telephone call to Western Union at (800) 325-6000 (in Missouri (800) 342-6700). The Western Union operator should be given Datagram Identification Number 3737 and the following message addressed to Richard H. Wessman: Petitioner's name and telephone number; date petition was mailed; plant name; and publication date and page number of this **Federal Register** notice. A copy of the petition should also be sent to the Office of the General Counsel, U.S. Nuclear Regulatory Commission, Washington, DC 20555, and to Thomas Dignan, Esquire, Ropes and Gray, 225 Franklin Street, Boston, Massachusetts 02110, attorneys for the licensee.

Nontimely filings of petitions for leave to intervene, amended petitions, supplemental petitions and/or requests for hearing will not be entertained absent a determination by the Commission, the presiding officer or the presiding Atomic Safety and Licensing Board that the petition and/or request should be granted based upon a balancing of the factors specified in 10 CFR 2.714(a)(1) (i)-(v) and 2.714(d).

If a request for hearing is received, the Commission's staff may issue the amendment after it completes its technical review and prior to the completion of any required hearing if it publishes as additional notice for public comment of its intent to make a no significant hazards consideration finding in accordance with 10 CFR 50.91 and 50.92.

For further details with respect to this action, see the application for amendment dated November 12, 1987, which is available for public inspection at the Commission's Public Document Room, 1717 H Street, NW., Washington, DC 20555, and at the Local Public Document Room, Greenfield Community College, 1 College Drive, Greenfield, Massachusetts 01301.

Dated at Rockville, Maryland, this 11th day of March 1988.

For the Nuclear Regulatory Commission.

Richard H. Wessman,

Project Director, Project Directorate I-3, Division of Reactor Projects I/II.

BILLING CODE 7590-01-M

[Docket No. 50-029]

Yankee Atomic Electric Co.; Consideration of Issuance of Amendment to Facility Operating License and Opportunity for Hearing

The U.S. Nuclear Regulatory Commission (the Commission) is considering issuance of an amendment to Facility Operating License No. DPR-3, issued to the Yankee Atomic Electric Company (the licensee), for operation of the Yankee Nuclear Power Station, located near Rowe, Massachusetts.

The proposed amendment would revise the provisions in the Technical Specifications relating to Control Rod Position, a reference to movable incore detectors, which will be deleted and a reference to three-loop operation which will also be deleted. The licensee's applications for amendment are dated December 23, 1987 and January 18, 1988.

Prior to issuance of the proposed license amendment, the Commission will have made findings required by the Atomic Energy Act of 1954, as amended (the Act) and the Commission's regulations.

By April 18, 1988, the licensee may file a request for a hearing with respect to issuance of the amendment to the subject facility operating license and any person whose interest may be affected by this proceeding and who wishes to participate as a party in the proceeding must file a written request for hearing and a petition for leave to intervene. Requests for a hearing and petitions for leave to intervene shall be filed in accordance with the Commission's "Rules of Practice for Domestic Licensing Proceedings" in 10 CFR Part 2. If a request for a hearing or petition for leave to intervene is filed by the above date, the Commission or an Atomic Safety and Licensing Board, designated by the Commission or by the Chairman of the Atomic Safety and Licensing Board Panel, will rule on the request and/or petition and the Secretary or the designated Atomic Safety and Licensing Board will issue a notice of hearing or an appropriate order.

As required by 10 CFR 2.714, a petition for leave to intervene shall set forth with particularity the interest of the petitioner in the proceeding, and how that interest may be affected by the

OL

MI

results of the proceeding. The petition should specifically explain the reasons why intervention should be permitted with particular reference to the following factors: (1) The nature of the petitioner's right under the Act to be made a party to the proceeding; (2) the nature and extent of the petitioner's property, financial, or other interest in the proceeding; and (3) the possible effect of any order which may be entered in the proceeding on the petitioner's interest. The petition should also identify the specific aspect(s) of the subject matter of the proceeding as to which petitioner wishes to intervene. Any person who has filed a petition for leave to intervene or who has been admitted as a party may amend the petition without requesting leave of the Board up to fifteen (15) days prior to the first prehearing conference scheduled in the proceeding, but such an amended petition must satisfy the specificity requirements described above.

Not later than fifteen (15) days prior to the first prehearing conference scheduled in the proceeding, a petitioner shall file a supplement to the petition to intervene, which must include a list of the contentions which are sought to be litigated in the matter, and the bases for each contention set forth with reasonable specificity. Contentions shall be limited to matters within the scope of the amendment under consideration. A petitioner who fails to file such a supplement which satisfies these requirements with respect to at least one contention will not be permitted to participate as a party.

Those permitted to intervene become parties to the proceeding, subject to any limitations in the order granting leave to intervene, and have the opportunity to participate fully in the conduct of the hearing, including the opportunity to present evidence and cross-examine witnesses.

A request for a hearing or a petition for leave to intervene shall be filed with the Secretary of the Commission, U.S. Nuclear Regulatory Commission, Washington, DC 20555, Attention: Docketing and Service Branch, or may be delivered to the Commission's Public Document Room, 1717 H Street, NW., Washington, DC, by the above date. Where petitions are filed during the last ten (10) days of the notice period, it is requested that the petitioner or representative for the petitioner promptly so inform the Commission by a toll-free telephone call to Western Union at (800) 325-6000 (in Missouri) (800) 342-6700). The Western Union operator should be given Datagram Identification Number 3737 and the following message addressed to Richard H. Wessman: Petitioner's name and telephone number; date petition was mailed; plant name; and publication date and page number of this **Federal Register** notice. A copy of the petition should also be sent to the Office of the General Counsel, U.S. Nuclear Regulatory Commission, Washington, DC 20555, and to Thomas Dignan, Esquire, Ropes and Gray, 225 Franklin Street, Boston, Massachusetts 02110, attorneys for the licensee.

Nontimely filings of petitions for leave to intervene, amended petitions, supplemental petitions and/or requests for hearing will not be entertained absent a determination by the Commission, the presiding officer or the presiding Atomic Safety and Licensing Board that the petition and/or request should be granted based upon a balancing of the factors specified in 10 CFR 2.714(a)(1)(i)-(v) and 2.714(d).

If a request for hearing is received, the Commission's staff may issue the amendment after if completes its technical review and prior to the completion of any required hearing if it publishes an additional notice for public comment of its intent to make a no significant hazards consideration finding in accordance with 10 CFR 50.91 and 50.92

For further details with respect to this action, see the application for amendment dated November 12, 1987, which is available for public inspection at the Commission's Public Document Room, 1717 H Street, NW., Washington, DC 20555, and at the local Public Document Room, Greenfield Community College, 1 College Drive, Greenfield, Massachusetts 01301.

Dated at Rockville, Maryland, this 7th day of March 1988.

For the Nuclear Regulatory Commission.

Richard H. Wessman,

Project Director, Project Directorate I-3, Division of Reactor Projects I/II.

BILLING CODE 7590-01-M

[Docket No. 50-029]

Yankee Atomic Electric Co.; Consideration of Issuance of Amendment to Facility Operating License and Opportunity for Hearing

The U.S. Nuclear Regulatory Commission (the Commission) is considering issuance of an amendment to Facility Operating License No. DPR-3, issued to the Yankee Atomic Electric Company (the licensee), for operation of the Yankee Nuclear Power Station, located near Rowe, Massachusetts.

The proposed amendment would revise the provisions in the Technical Specifications relating to crane travel over the spent fuel pit. The licensee's application for amendment is dated January 15, 1988.

Prior to issuance of the proposed license amendment, the Commission will have made findings required by the Atomic Energy Act of 1954, as amended (the Act) and the Commission's regulations.

By April 18, 1988, the licensee may file a request for a hearing with respect to issuance of the amendment to the subject facility operating license and any person whose interest may be affected by this proceeding and who wishes to participate as a party in the proceeding must file a written request for hearing and a petition for leave to intervene. Requests for a hearing and petitions for leave to intervene shall be filed in accordance with the Commission's "Rules of Practice for Domestic Licensing Proceedings" in 10 CFR Part 2. If a request for a hearing or petition for leave to intervene is filed by the above date, the Commission or an Atomic Safety and Licensing Board, designated by the Commission or by the Chairman of the Atomic Safety and Licensing Board Panel, will rule on the request and/or petition and the Secretary or the designated Atomic Safety and Licensing Board will issue a notice of hearing or an appropriate order.

As required by 10 CFR 2.714, a petition for leave to intervene shall set forth with particularity the interest of the petitioner in the proceeding, and how that interest may be affected by the results of the proceeding. The petition should specifically explain the reasons why intervention should be permitted with particular reference to the following factors: (1) The nature of the petitioner's right under the Act to be made a party to the proceeding; (2) the nature and extent of the petitioner's property, financial, or other interest in the proceeding; and (3) the possible effect of any order which may be entered in the proceeding on the petitioner's interest. The petition should also identify the specific aspect(s) of the subject matter of the proceeding as to which petitioner wishes to intervene. Any person who has filed a petition for leave to intervene or who has been admitted as a party may amend the petition without requesting leave of the Board up to fifteen (15) days prior to the first prehearing conference scheduled in the proceeding, but such an amended petition must satisfy the specificity requirements described above.

Not later than fifteen (15) days prior to the first prehearing conference scheduled in the proceeding, a petitioner shall file a supplement to the petition to intervene, which must include a list of the contentions which are sought to be litigated in the matter, and the bases for each contention set forth with reasonable specificity. Contentions shall be limited to matters within the scope of the amendment under consideration. A petitioner who fails to file such a supplement which satisfies these requirements with respect to at least one contention will not be permitted to participate as a party.

Those permitted to intervene become parties to the proceeding, subject to any limitations in the order granting leave to intervene, and have the opportunity to participate fully in the conduct of the hearing, including the opportunity to present evidence and cross-examine witnesses.

A request for a hearing or a petition for leave to intervene shall be filed with the Secretary of the Commission, U.S. Nuclear Regulatory Commission, Washington, DC 20555, Attention: Docketing and Service Branch, or may be delivered to the Commission's Public Document Room, 1717 H Street, NW., Washington, DC by the above date. Where petitions are filed during the last ten (10) days of the notice period, it is requested that the petitioner or representative for the petitioner promptly so inform the Commission by a toll-free telephone call to Western Union at (800) 325-6000 (in Missouri (800) 342-6700). The Western Union operator should be given Datagram Identification Number 3737 and the following message addressed to Richard H. Wessman: Petitioner's name and telephone number; date petition was mailed; plant name; and publication date and page number of this **Federal Register** notice. A copy of the petition should also be sent to the Office of the General Counsel, U.S. Nuclear Regulatory Commission, Washington, DC 20555, and to Thomas Dignan, Esquire, Ropes and Gray, 225 Franklin Street, Boston, Massachusetts 02110, attorneys for the licensee.

Nontimely filings of petitions for leave to intervene, amended petitions, supplemental petitions and/or requests for hearing will not be entertained absent a determination by the Commission, the presiding officer or the presiding Atomic Safety and Licensing Board that the petition and/or request should be granted based upon a balancing of the factors specified in 10 CFR 2.714(a)(1)(i)-(v) and 2.714(d).

If a request for hearing is received, the Commission's staff may issue the amendment after it completes its technical review and prior to the completion of any required hearing if it publishes an additional notice for public comment of its intent to make a no significant hazards consideration finding in accordance with 10 CFR 50.91 and 50.92.

For further details with respect to this action, see the application for amendment dated November 12, 1987, which is available for public inspection at the Commission's Public Document Room, 1717 H Street, NW., Washington, DC 20555, and at the Local Public Document Room, Greenfield Community College, 1 College Drive, Greenfield, Massachusetts 01301.

Dated at Rockville, Maryland, this 7th day of March 1988.

For the Nuclear Regulatory Commission.

Richard H. Wessman,

Project Director, Project Directorate I-3, Division of Reactor Projects I/II.

SECURITIES AND EXCHANGE COMMISSION

Forms Under Review by the Office of Management and Budget

Agency Clearance Officer: Kenneth A. Fogash, (202) 272-2142

Upon Written Request Copy Available from: Securities and Exchange Commission, Office of Consumer Affairs, 450 Fifth Street, NW., Washington, DC 20549

Extension

File No. 270-8, Rule 15b1-3

Notice is hereby given that pursuant to the Paperwork Reduction Act of 1980, as amended in 1986, the Securities and Exchange Commission has submitted for extension of OMB clearance Rule 15b1-3 which provides that if a broker-dealer succeeds to or continues the business of a registered broker-dealer, the registration of the predecessor shall remain effective as the registration of the successor for 75 days after the succession provided that an amendment to Form BD is filed by the successor within 30 days after the date of succession. Fifty respondents incur an estimated average of three burden hours to comply with the Rule.

Submit comments to OMB Desk Officer: Mr Robert Neal (202) 395-7340, Office of Information and Regulatory Affairs, Office of Management and Budget, Room 3228 NEOB, Washington, DC 20503.

Jonathan G. Katz,

Secretary.

BILLING CODE 8010-01-M

[Release No. 25439; File No. SR-MBS-88-4]

Self-Regulatory Organizations; MBS Clearing Corp.; Filing and Immediate Effectiveness of Proposed Rule Change

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934, 15 U.S.C. 78s(b)(1), notice is hereby given that on February 5, 1988, the MBS Clearing Corporation ("MBSCC") filed with the Securities and Exchange Commission ("Commission") the proposed rule change described below. In a March 2, 1988 letter, MBSCC amended the proposal to take effect upon submission of the letter pursuant to section 19(b)(3)(A) of the Act. The Commission is publishing this notice to solicit comments on the proposed rule change.

The proposed rule change adds a new group of GNMA coupons to the list of GNMA coupons eligible for conversion to book-entry form. Once converted to book-entry form, the securities will become subject to MBSCC's withdrawal procedures, which limit physical withdrawal except in certain circumstances.[1] For settlements beginning March 21, 1988, the 12.50%-12.99% GNMA coupons will be eligible for conversion to book-entry form.[2]

MBSCC has filed related proposed rule changes for review under the Act. For example, MBSCC previously filed a proposed rule change (File No. SR-MBS-87-2) requesting permanent approval of the withdrawal procedures for certain coupon rates and any others that MBSCC may add by filing at a later date. That proposal currently is under review.[3] MBSCC also filed a proposed rule change, effective upon filing, similar to File No. SR–MBS–88–4.[4] That filing (SR–MBS–88–5) and this filing (SR–MBS–88–4) will be effective for 60 days from the date of publication of this notice.

---

[1] MBSCC's withdrawal procedures implement the Public Securities Association's Good Delivery Guidelines to provide that, for securities converted to book-entry form, physical withdrawals are limited to instances where certificates are legally required to be maintained by a participant or customer outside the depository. Withdrawal requests that satisfy the guidelines must be submitted within appropriate time frames.

[2] At present, GNMA coupons with the following coupon rates have been converted to book-entry form and are subject to the Public Securities Association's Good Delivery Guidelines: 5.50%-7.49% and 13.00%-17.50%.

[3] *See* Securities Exchange Act Release No. 24120 (February 17, 1987) 52 FR 6096 (February 27, 1987).

In anticipation of the proposed rule change, MBSCC senior management has completed the installation and testing of expanded computer hardware and software required by larger-than-anticipated increases in participation and trading volume. MBSCC has also assisted Depository Division participants in making necessary changes to their own operating systems. MBSCC believes that with such installation, testing, and modifications, the 12.50%–12.99% GNMA coupons can be implemented in an orderly manner.

MBSCC states that the proposed rule change is consistent with Section 17A of the Securities Exchange Act of 1934 ("Act") in that it encourages the processing and facilitation of securities clearance and settlement of mortgage-backed securities.

The foregoing rule change has become effective pursuant to section 19(b)(3)(A) of the Securities Exchange Act of 1934 and subparagraph (a) of Securities Exchange Act Rule 19b–4. At any time within 60 days of the filing of such proposed rule change, the Commission may summarily abrogate such change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors or otherwise in furtherance of the purposes of the Securities Exchange Act of 1934.

Interested persons are invited to submit written data, views and arguments concerning the proposal. Persons making written submissions should file six copies with the Secretary, Securities and Exchange Commission, 450 Fifth Street, NW., Washington, DC 20549. Copies of the filing, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Section, 450 Fifth Street, NW., Washington, DC 20549. Copies of the filing will also be available for inspection and copying at the principal office of MBSCC. All submissions should refer to the file number (File No. SR–MBS–88–4) and should be submitted by April 7, 1988.

For the Commission, by the Division of Market Regulation pursuant to delegated authority.

Dated: March 10, 1988.

Jonathan G. Katz,

Secretary.

[FR Doc. 88–5902 Filed 3–16–88; 8:45 am]

BILLING CODE 8010-01-M

[Release No. 34–25440; File No. SR–MBS–88–5]

Self-Regulatory Organizations; MBS Clearing Corp.; Physical Withdrawal of Securities Eligible for Deposit in MBSCC's Depository Division, Filing and Immediate Effectiveness of Proposed Rule Change

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934, 15 U.S.C. 78s(b)(1), notice is hereby given that on February 24, 1988, the MBS Clearing Corporation filed with the Securities and Exchange Commission the proposed rule change as described in Items I, II and III below, which Items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

Attached as Exhibit A is the MBS Clearing Corporation's (MBSCC) procedures regarding the physical withdrawal of securities eligible ("Eligible Securities") for deposit in MBSCC's Depository Division. The procedures will be in effect for the period starting on February 15, 1988, and ending 60 days from the date of publication of the notice.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of and basis for the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The self-regulatory organization has prepared summaries, set forth in sections (A), (B) and (C) below, of the most significant aspects of such statements.

(A) Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

The proposed rule change clarifies and sets forth MBSCC's policy regarding the physical withdrawal of Eligible Securities. The policy covers Eligible Securities subject to the Public Securities Association's ("PSA") Good Delivery Guideline for securities issued by the Government National Mortgage Association ("GNMA"), as adopted on December 29, 1986, as well as those not subject to PSA's guideline. The PSA guideline was announced together with a schedule by GNMA and PSA for the conversion of GNMA securities into book-entry form.

The policy substantially limits, but does not altogether prohibit, the withdrawal of securities subject to PSA's Good Delivery Guideline. Securities not subject to the guideline may be withdrawn by MBSCC Participants and registered in the name of the Participant or the name of a customer of the Participant. Securities subject to the guideline may be withdrawn and registered in a Participant's name only if the Participant is legally required to obtain or maintain physical possession of the securities.

Participants may otherwise request physical withdrawal of securities on behalf of a customer only if the customer is legally required to obtain or maintain physical possession of the securities or the customer, to the best of the Participant's knowledge, does not intend to trade or deliver for financing purposes the withdrawn securities.

At the present time, GNMA securities with the following coupon rates have been converted to book-entry form and are subject to the PSA guideline: 5.50%–7.49%, 16.00%–17.50%, 14.00%–15.99%, and 13.00%–13.99%. On April 27, 1987, PSA and MBSCC modified the conversion schedule of GNMA securities. For additional coupons, notice will be given of coupons to be designated as specified for book-entry settlement 45 days in advance of the issuance date of new pools of coupons. In addition, MBSCC has recently filed a rule change to convert the 12.50–12.99% GNMA coupons to book-entry form, for settlements beginning March 21, 1988.

In response to concerns raised by various commentators, MBSCC has further revised the withdrawal policy to make it clear that a Participant may make a request to withdraw securities subject to the PSA Good Delivery Guideline if it is legally required to maintain, as well as obtain, physical possession of securities. The phrase "legally required to obtain or maintain physical possession" is expanded to include those legal requirements imposed by any rule or regulation of any governmental agency, self-regulatory organization as defined in the Securities Exchange Act of 1934 or designated contract market as defined in the Commodity Exchange Act. In addition, the policy has been revised to enable the Participant, or its customer, to obtain securities in time to comply with such legal requirements.

Consistent with PSA's Good Delivery Guideline, the policy essentially ensures that securities subject thereto will be cleared and settled in book-entry form through a registered clearing agency. The policy is designed to reduce physical withdrawal requests for book-entry eligible securities subject to the guideline and encourage the centralized processing of mortgate-backed securities transactions. By placing reasonable restrictions on the physical withdrawal of mortgage-backed securities subject to the PSA guideline, the proposed rule change will both foster PSA's mandate for book-entry settlement of certain transactions and significantly reduce delays, unmatched transaction orders and other human errors often associated with the physical delivery and transfer of certificates.

The proposed rule change is consistent with section 17A of the Securities Exchange Act of 1934 in that it encourages the processing and facilitation of securities clearance and settlement of mortgage-backed securities, thereby reducing current inefficient procedures and costs to issuers and investors of mortgage-backed securities.

(B) Self-Regulatory Organization's Statement on Burden on Competition

MBSCC does not believe that any burden will be placed on competition as a result of the proposed rule change.

(C) Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants or Others

While written comments have not been generally solicited, MBSCC has submitted responses to comments submitted to the Commission. In response to certain concerns raised by the Chicago Board of Trade regarding the obtaining of GNMA certificates for collateral purposes relating to Collateralized Depository Receipts, MBSCC has made revisions to the proposed rule change discussed in Item 3(a) above.

In a separate rule filing to MBSCC's Depository Division rules (SR–MBS–87–7, submitted July 24, 1987), MBSCC has responded to concerns raised by some commentators regarding the submission of claims under a GNMA or other similar guarantee on behalf of Participants. The Depository Division rules have been amended to make clear that MBSCC, in filing claims for payment under any guarantee, will be acting solely as agent for its Participants, except in certain circumstances, where MBSCC or a third-party lender have made principal and interest advances.

Representatives of PSA and GNMA have had the opportunity to review the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The foregoing rule change has become effective pursuant to section 19(b)(3) of the Securities Exchange Act of 1934 and subparagraph (e) of Securities Exchange Act Rule 19b–4. At any time within 60 days of the filing of such proposed rule change, the Commission may summarily abrogate such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest for the protection of investors, or otherwise in furtherance of the purposes of the Securities Exchange Act of 1934.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street NW., Washington, DC 20549. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Section, 450 Fifth Street NW., Washington, DC. Copies of such filing will also be available for inspection and copying at the principal office of the above-referenced self-regulatory organization. All submissions should refer to File No. SR–MBS–88–5 and should be submitted by April 7, 1988.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.

Dated: March 10, 1988.

Jonathan G. Katz,

Secretary.

Exhibit A—MBSCC Procedure for Physical Withdrawal of Depository Eligible Securities

The following is MBSCC's Procedure for physical withdrawal of securities from the MBSCC Depository. the Procedure ocovers securities that are *not* yet subject to PSA's Good Delivery Guideline, as adopted by PSA on December 29, 1986, *as well as those* subject to the Guideline. This Procedure limits almost in its entirety the withdrawal of securities that are subject to PSA's Good Delivery Guideline. This is consistent with PSA's and GNMA's intent to move vigorously to a book-entry settlement environment for GNMA securities.

Securities Not Yet Subject to Good Delivery Guideline

In the case of securities not yet subject to the Good Delivery Guideline, a Participant will be permitted to withdraw Securities held by the Depository upon the Participant's submission of a request on the form prescribed by MBSCC. The Participant must specify whether the securities should be registered in the name of the Participant or the name of a customer of the Participant. Assuming that the request is made within the appropriate cut-off times prescribed by MBSCC, securities will be processed within four-to-twelve hours of such request.

Securities Subject to Good Delivery Guideline

MBSCC will honor requests to withdraw securities subject to the PSA Good Delivery Guideline in a Participant's name only in the unlikely event that the Participant is legally required to obtain or maintain physical possession of securities. Other Participants may submit requests for withdrawal of securities only if they request that the securities be registered in the name of a customer who is legally required to obtain or maintain physical possession of the securities or who, to the best of the Participant's knowledge, does not intend to trade, or deliver for financing purposes, the securities withdrawn. For purposes hereof, a Participant or its customer will be deemed legally required to obtain or maintain physical possession of securities if obligated to do so under any applicable law or any rule or regulation of any governmental agency, any self-regulatory organization as defined in the Securities Exchange Act of 1934, or any designated contract market as defined in the Commodity Exchange Act (including, in the case of a self-regulatory organization or designated contract market which is a Participant in the Depository, the rules or regulations of such self-regulatory organization or designated contract market).

---

[4] *See* File No. SR–MBS–88–4, which is being published simultaneously with the present filing.

Assuming a request for withdrawal satisfies the foregoing guidelines and is made within the appropriate cut-off times and on forms prescribed by MBSCC, MBSCC will make the securities available: (a) Seven calendar days from the date of withdrawal request, or (b) on such earlier date as the Participant requesting the withdrawal certifies to MBSCC is necessary to enable the Participant or its customer to comply with any applicable legal requirement. Participants should advise their customers that payment will be required on settlement date, even though the physical security may be received sometime thereafter.

By making a request for the withdrawal of securities, a MBSCC Depository Participant represents to the Depository that the withdrawal will satisfy the foregoing guidelines. Abuse of this policy will subject the offending Participant's continued participation in the Depository to review by the MBS Clearing Corporation Board of Directors.

[FR Doc. 88-5849 Filed 3-16-88; 8:45 am]

BILLING CODE 8010-01-M

[Release No. 34-25438; File No. SR-MSRB-87-13]

Self-Regulatory Organizations; Order Approving Proposed Rule Change of Municipal Securities Rulemaking Board; Disclosure in Connection With New Issues

On October 6, 1987, the Municipal Securities Rulemaking Board ("MSRB") filed with the Securities and Exchange Commission ("Commission") a proposed rule change (File No. SR-MSRB-87-13) under 19(b)(1) of the Securities Exchange Act of 1934 ("Act"). The proposed rule change amends MSRB Rule G-32 on disclosures in connection with new issues. The Commission published notice of the proposed rule change on November 9, 1987,[1] and received no comments in response.[2]

The proposed rule change would provide an objective definition of "underwriting period" for sole underwritings for purposes of rule G-32 on disclosures in connection with new issues. The proposed amendment would define the underwriting period for sole underwritings to begin upon the first submission of an order for the issue or the purchase of the issue from the issuer by the underwriter, whichever occurs first. It would define the underwriting period to end when both of the following conditions are met: (i) The issuer delivers the securities to the underwriter; and (ii) the underwriter no longer retains an unsold balance of the securities or 21 calendar days elapse after the first submission of an order to the underwriter, whichever occurs first.

Rule G-32 requires all dealers selling new issue municipal securities during the underwriting period to deliver a copy of the official statement for the issue, if one will be prepared, to each customer no later than settlement with the customer. The underwriting period has been defined to begin with the first submission to a syndicate of an order for the purchase of the securities or the purchase of such securities from the issuer, whichever occurs first. The underwriting period is defined to end when the issuer delivers the securities to the syndicate or the syndicate no longer retains an unsold balance of the securities, whichever occurs last. This definition is designed to ensure that a sufficient number of investors receive new issue disclosures. The Board previously has interpreted rule G-32 to apply to new issue securities distributed by a sole underwriter ("sole underwritings") notwithstanding the use of the term "syndicate" in the definition of underwriting period and has stated that the number of underwriters is irrelevant to the purposes of the rule. The definition of underwriting period for syndicated underwritings, however, is not appropriate for sole underwritings because a sole underwriter may retain portions of an issue in its inventory long after the delivery of the issue by the issuer and completion of the initial reoffering.

The proposed rule change addresses this problem by providing objective criteria to determine the underwriting period in sole underwritings. The definition in the proposed rule change is consistent with the definition used for syndicated underwritings, with the addition of a 21-day limitation on the underwriting period in cases which the issuer has delivered the issue and the underwriter continues to retain an unsold balance. This objective definition allows dealers to determine their obligations under rule G-32 more easily and would facilitate enforcement of the rule by enforcement agencies.

The Commission believes the proposed rule change is consistent with the Act, particularly section 15B, which provides, in pertinent part, that MSRB rules by designed to prevent fraudulent and manipulative acts and practices, promote just and equitable principles of trade, to remove impediments to and perfect the mechanism of a free and open market in municipal securities, and, in general, to protect investors and the public interest. By defining the end of underwriting periods for sole underwritings as, at the latest, 21 days after the first order is submitted to the underwriter, the proposal strikes an appropriate balance between ensuring as wide dissemination as possible of information about the issue and the need to provide objective and realistic standards for industry participants to gauge their disclosure responsibilities under Rule G-32.

It is therefore ordered, pursuant to section 19(b)(2) of the Act tht File No. SR-MSRB-87-13 be, and hereby is, approved.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.

Dated: March 9, 1988.

Jonathan G. Katz,

Secretary.

[2] The MSRB also sought comments on the proposal in March, 1987 (see MSRB Reports, Vol. 7, No. 2 (March 1987)). The MSRB received three comments and responded to them in its submission to the Commission. *See* Securities Exchange Act Release No. 20564.

[Release No. 34-25437; File No. SR-NASD-88-8]

Self-Regulatory Organizations; National Association of Securities Dealers, Inc.; Mandatory Use of Trade Acceptance and Reconciliation Service

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934 ("Act"), 15 U.S.C. 78s(b)(1), notice is hereby given that on February 25, 1988 the National Association of Securities Dealers, Inc. ("NASD") filed with the Securities and Exchange Commission ("Commission") the proposed rule change as described in Items I, II, and III below, which Items have been prepared by the NASD. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The proposed rule change would add a new Section 66 to the NASD's Uniform Practice Code to require members of the NASD that are also participants in a registered clearing corporation for purposes of clearing over-the-counter ("OTC") transactions to subscribe to and reconcile all eligible transactions through the NASD's Trade Acceptance and Reconciliation Service ("TARS").

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the NASD included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The NASD has prepared summaries, set forth in sections (A), (B), and (C) below of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

The proposed rule change was considered by the NASD Board of Governors and the Uniform Practice Committee. Since 1983 the NASD has offered TARS to members that are participants in a registered clearing corporation. TARS is an on-line, trade reconciliation facility that allows both parties to an unresolved trade to view on their NASDAQ terminals uncompared and advisory OTC transactions that are cleared through the facilities of a registered clearing agency and to enter corrections through those terminals. Corrections entered by one side are immediately displayed to the other side and this information is automatically transmitted each day to the clearing corporation, eliminating the need to separately prepare and submit trade correction tickets to the clearing corporation.

Currently TARS has 105 subscribers that account for 86% of all cleared OTC transactions. Since its introduction, TARS has substantially reduced the percentage of uncompared OTC transactions by bringing those transactions into an automated comparison environment. TARS service provides its subscribers with five primary benefits over other methods of trade reconciliation. These are as follows:

1. TARS is available from 8:00 a.m. until 6:00 p.m. (5:00 p.m. for municipal bonds). The 6:00 p.m. deadline gives a subscriber at least five additional hours to complete its securities processing to the clearing corporation. Most clearing corporation submissions must be received by the processing facility by 1:00 p.m.
2. All work processed through TARS provides the subscriber with printer confirmations of its own work and that of the contra party. This allows the subscriber and the contra party, if it is also a TARS subscriber, to be able to conform actions taken between themselves that day, and therefore takes the guess work out of what response, if any, was taken by the contra side, which would otherwise not be known until the following day.
3. All TARS input is validated for trade action, broker relationship, security symbol and CUSIP number. If any of this data is entered incorrectly, the on-line system will automatically provide the subscriber with a reject message. The subscriber at such time can correct the data and thereby prevent the trade from being rejected at the clearing corporation. Rejected trades are reported to subscribers by the clearing corporation on the day following submission.
4. All work entered through TARS can be backed-out, in case of error, prior to the System's close at 6:00 p.m. (5:00 p.m. for municipal bonds).
5. Subscribers have the ability of interrogating the TARS data base by utilizing selective query functions which can extract specific contract sheet information. For example, a subscriber may wish to view only uncompared or advisory trades; or view transactions with a specific firm; or transactions in a particular security. Through the query process this information is readily available.

The NASD believes that requiring all clearing corporation participants to become TARS subscribers and to utilize TARS for reconciling their OTC transactions will further enhance the value of the system by increasing the percentage of OTC transactions which will be reconciled through TARS. The NASD believes that this will be of particular value during periods of high volume when the uncompared rate can increase dramatically. TARS service was operted for extended hours during the days following the October 19, 1987 market break, demonstrating that even in such extreme periods, the rate of uncompared transactions could be quickly reduced to within normal limits through the utilization of the system. The NASD believes that mandatory use will further improve this performance.

The proposed rule change is consistent with section 15A(b)(6) of the Act, which requires that the NASD's rules be designed to foster cooperation and coordination with persons engaged in clearing, settling and facilitating transactions in securities. The proposed rule change will facilitate the prompt and accurate clearance and settlement of securities transactions.

B. Self-Regulatory Organization's Statement on Burden on Competition

The NASD believes that the proposed rule change does not impose any burden on competition not necessary or appropriate in furtherance of the purposes of the Act.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

The NASD did not solicit comments on the proposed rule change. It did however solicit comments on a proposed amendment to the NASD By-Laws authorizing the NASD to require the reporting of trade information by members conducting an interdealer OTC business in Notice to Members 87-79. A total of 16 comments were received. Some of the most frequent areas of comments included assertions that the proposals would impose an undue burden on small member firms and would require such firms to incur additional costs, which in some cases could cause the firms to cease doing an OTC securities business. Of the commentators opposing the adoption of the By-Laws amendment, only three are members of a registered clearing agency and therefore only these members would be impacted by the proposed rule change. Subsequent to the comment period, the staff of the NASD Uniform Practice Department contacted each of these firms, all of which indicated that they had not been clear on the implications of the By-Law and did not object to participation in TARS.

The NASD Board of Governors and its Uniform Practice Committee considered the comments and determined that the benefits obtained from requiring TARS participation by all clearing corporation participants could substantially enhance the effectiveness of the system and facilitate further reductions in uncompared trades in OTC securities and thereby substantially outweigh the additional costs to members that are of substantial enough size and capitalization to be participants in a registered clearing corporation.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Within 35 days of the date of publication of this notice in the **Federal Register** or within such longer period: (i) As the Commission may designate up to 90 days of such date if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which the NASD consents, the Commission will:

A. By order approve such proposed rule change, or

B. Institute proceedings to determine whether the proposed rule change should be disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing. Persons making written submissions should file copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street, NW., Washington, DC 20549. Copies of the submissions, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Room. Copies of the filing will also be available for inspection and copying at the principal office of the NASD. All submissions should refer to file number SR–NASD–88–8 and should be submitted by April 7, 1988.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority, 17 CFR 200.30–3(a)(12).

Dated: March 9, 1988.

Jonathan G. Katz,

Secretary.

BILLING CODE 8010-01-M

[Release No. 34–25429; File No. SR–NYSE–87–47]

Self-Regulatory Organizations; Filing and Immediate Effectiveness of Proposed Rule Change by New York Stock Exchange, Inc.; Proposed Increases in Floor Facilities Fees

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934 ("Act"), 15 U.S.C., 78s(b)(1), notice is hereby given that on December 15, 1987, the New York Stock Exchange, Inc. ("NYSE" or "Exchange") filed with the Securities and Exchange Commission ("Commission") the proposed rule change as described in Items I, II, and III below, which Items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange is instituting rate increases affecting certain Floor Facilities fees, as of January 1, 1988.[1]

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Changes

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The self-regulatory organization has prepared summaries, set forth in sections (A), (B), and (C) below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

(1) *Purpose*—The revenues generated by the Floor Facilities fees increase will be used to defray the expenses of this area. The current Floor Facilities fees do not fully recover the costs of providing the facilities. Increases in projected expenses are anticipated because of continuing demands in the area. The purpose of the proposed rate increase is to continue the process of recapturing the cost of this activity.

(2) *Statutory Basis*—The basis under the Act for the proposed rule change is the requirement under section 6(b)(4) that an Exchange have rules that provide for the equitable allocation of reasonable dues, fees and other charges among its members and other persons using its facilities.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange believes that the proposed rule change will not impose any burden on competition.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received from Members, Participants or Others

The Exchange has not solicited, and does not intend to solicit, comments regarding the proposed rule change. The Exchange has not received any unsolicited written comments from members or other interested parties.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

According to the Exchange, the fees increase is primarily designed to defray the increasing costs of providing floor facilities to its members and other floor facility users. In addition, the Exchange indicates in its filing that the current floor facilities fees do not adequately recover expenses related to provinding such facilities and that the revenues generated from the fees increase will facilitate its efforts to continue to recapture the costs of operating these facilities. We note that the proposed fee increases, for the most part, are modest. Finally, the two new proposed fees are on par with similar fees being imposed for the use of other floor space. In view of the foregoing, the Commission finds that the increase in floor facilities fees is reasonable and consistent with section 6(b) (4) of the Act which provides for the equitable allocation of reasonable dues, fees, and other charges among Exchange members and other persons using its facilities.

The foregoing rule change has become effective pursuant to section 19(b)(3)(A) of the Securities Exchange Act of 1934 and paragraph (e) of Securities Exchange Act Rule 19b–4. At anytime within 60 days of the filing of such proposed rule change, the Commission may summarily abrogate such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the proposes of the Act.

---

[1] The proposal would, among other things, increase both floor privilege fees and specialist floor fees from the current amount of $3,720 to $4,000. In addition, the proposed rule change would effect rate increases for a number of other floor facility fees including booth fees (*i.e.*, option and stock booths, option private line, and order pad privilege and clearance), post fees, fees for regular and special telephone clerk tickets charges for radio paging service, fees for financial vendor services, and member telephone service rates. The proposal also established two new fees. The QT Booth space, with a fee of $1200, provides additional space under the expanded blue room that can be used as additional work space for members. The Option Podium Post with a fee of $4,365, is an optional service for options specialists that includes a desk with electronic hook-ups. The NYSE notes both these spaces are being made available to the membership at their request and are optional.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing. Persons making written submission should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street NW., Washington DC 20549. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the propsoed rule change between the Commission and any person, other than those that may by withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Section, 450 Fifth Street, NW., Washington, DC 20549. Copies of such filing will also be available for inspection and copying at the principal office of the NYSE. All submissions should refer to the file number in the caption above and should be submitted by April 7, 1988.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.

Jonathan G. Katz,

Secretary.

Dated: March 9, 1988.

[FR Doc. 88–5852 Filed 3–16–88; 8:45 am]

BILLING CODE 8010-01-M

[Release No. 34–25442; File No. PHLX 88–9]

Self-Regulatory Organizations; Proposed Rule Change by the Philadelphia Stock Exchange, Inc.; Value Line Arithmetic Average Computation

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934, 15 U.S.C. 78s(b)(1), notice is hereby given that on February 26, 1988 the Philadelphia Stock Exchange, Inc. filed with the Securities and Exchange Commission the proposed rule change as described in Items I, II and III below, which Items have been prepared by the self-regulatory orgnization. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Philadelphia Stock Exchange, Inc. (the "PHLX" or the "Exchange"), pursuant to Rule 19b–4 of the Securities Exchange Act of 1934 (the "Act") and its Rule 1009A proposes to revise the method of computation of the Value Line Composite Stock Average Index underlying index options contracts to an arithmetic avearge from a geometric average. All other contract terms respecting the Value Line Index Options contracts including the equal weighted feature would remain unchanged.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The self-regulatory organization has prepared summaries, set forth in sections (A), (B), and (C) below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statements of the Purpose of, and Statutory Basis for, the Proposed Rule Change

The purpose of the proposed rule change is to conform index options trading on the Value Line Composite Stock Average Index ("XVL") with index futures trading respecting the same to be traded upon approval by the Commodity Futures Trading Commission ("CFTC") on the Kansas City Board of Trade ("KCBT"). The KCBT in cooperation with Value Line Inc. and the PHLX proposes to revise the computation of the XVL to an arithmetic average from a geometric average. The PHLX has been approved to trade the XVL index utilizing a geometric average computation pursuant to approval by the Securities and Exchange Commission under SEC Release No. 34–21392 dated October 10, 1984. The Exchange has also received Commission approval, but has not yet introduced European style options on the Value Line Index. *See* SEC Release No. 34–24508 dated May 22, 1987. The PHLX began trading the XVL on January 11, 1985.

In symbols, the geometric average, at any time during the day is:

$$IC = IP \times \frac{P1}{C1} \times \frac{P2}{C2} \times \ldots \times \frac{PN}{CN}^{\,1/N}$$

where,

IC = current value of the index

IP = closing value of the index on the previous day

Pi = current price of stock i

Ci = closing price of stock i on the previous day

N = number of stocks in the index

The proposed arithmetic average, in symbols, at any time during the day, is:

$$IC = IP \times \frac{\left(\frac{P1}{C1} + \frac{P2}{C2} + \ldots + \frac{PN}{CN}\right)}{N}$$

where each of the variables represents the same quantities that they do in the mathematical representation of the geometric index.

Value Line Inc. developed the Value Line Composite Stock Average Index as a geometric average to differentiate it from other popular price and capitalization weighted market indices which tend to only reflect the top bracket of publicly traded common stocks. While geometric averaging serves to differentiate the Value Line Composite Stock Average Index from other popular measurements of market performance it poses a number of problems for market participants utilizing a cash based valuation of their common stock portfolios which are arithmetically averaged as are all other index futures and options contracts. Geometric averaging tends to underperform an arithmetic average. The greater the volatility, the more significant the downward bias. This impedes efforts by market participants to develop precise hedges between the index contracts and their portfolios of underlying common stocks. In the past, this has resulted in substantial disparities between prices of the Value Line Composite Stock Average Index futures and options contracts and the level of the underlying cash index. The PHLX believes, as does the KCBT, that geometric averaging of the Value Line Composite Stock Average Index has created investor confusion and dissatisfaction and impaired confidence in Exchange markets. It is anticipated that a revision of the Value Line Composite Stock Average Index to arithmetic computation will facilitate cash market hedging while simplifying the task of broker-dealers explanation of the XVL product to investors interested in utilizing a strategic investment hedging product to protect diversified portfolios of common stocks.

The PHLX proposes to coordinate the introduction of options on the arithmetically computed Value Line Index with the KCBT. Attached herein as Exhibit 2 is a copy of the KCBT regulatory filing respecting this matter presently under consideration before the CFTC.

KCBT proposes to introduce futures contracts based on the revised arithmetic index promptly upon CFTC approval, beginning with the September 1988 contract and subsequent contract months. (The KCBT currently has futures on the geometric index only through the June contract month.) PHLX would like to coordinate introduction of the arithmetic contract to coincide with the KCBT's start-up date, but proposes to introduce American and European style options on the arithmetically derived index on a somewhat different manner. Rather than introduce options on the arithmetic index only for contract months beginning after the last currently outstanding options on the geometric XVL expire (the XVL currently has options outstanding through December), the Exchange proposes to introduce European and American options on the arithmetic Value Line index beginning with the near-term months. No new contract months on the existing geometric Value Line index would be added so that by December 1988 that options contract will be phased out. In the meantime, for a short period of time, there may be some arithmetic and geometric series open simultaneously.

The PHLX believes that a revision in the method of averaging the Value Line Composite Stock Index Average will significantly enhance the economic utility of XVL options contracts to market participants and could substantially increase contract volume by making the XVL index options easier to understand and use.

XVL volume and open interest is presently at historic lows. The PHLX believes that the proposed revision in computation of the Value Line Composite Stock Average Index will be least disruptive to the market place if made at this time. In this regard the PHLX requests expedited treatment with respect to this proposed rule change as it is necessary to coordinate with the KCBT the introduction of the arithmetically computed Value Line Composite Stock Index Average futures and options contracts.

The proposed rule change is consistent with section 6(b)(5) of the Exchange Act, which provides in pertinent part that the rules of the Exchange facilitate transactions in securities and protect investors and the public interest.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange believes that the proposed rule change will not impose any burden on competition.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received from Members, Participants, or Others

Comments were neither solicited nor received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Within 35 days of the date of publication of this notice in the **Federal Register** or within such longer period (i) as the Commission may designate up to 90 days or such date if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which the self-regulatory organization consents, the Commission will:

(A) By order approve such proposed rule change, or,

(B) Institute proceedings to determine whether the proposed rule change should be disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street NW., Washington, DC 20549. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Section, 450 Fifth Street, NW., Washington, DC 20549. Copies of such filing will also be available for inspection and copying at the principal office of the above-mentioned self-regulatory organization. All submissions should refer to the file number in the caption above and should be submitted by April 7, 1988.

For the Commission by the Division of Market Regulation, pursuant to delegated authority.

Jonathan G. Katz,

Secretary.

Dated: March 10, 1988.

BILLING CODE 8010-01-M

[File No. 22-17824]

Application and Opportunity for Hearing; Chemical New York Corp.

Notice is hereby given that Chemical New York Corporation (the "Company") has filed an application pursuant to clause (ii) of section 310(b)(1) of the Trust Indenture Act of 1939, (the "Act") for a finding by the Securities and Exchange Commission (the "Commission") that the trusteeship of Citibank, N.A. ("Bank") under an indenture dated as of March 1, 1974 (the "1974 Indenture"), between the Company and Bank which was heretofore qualified under the Act and under an indenture dated as of February 15, 1984 (the "Original Indenture"), as amended by a First Supplemental Indenture dated as of May 1, 1987, a Second Supplemental Indenture dated as of August 14, 1987 and a Third Supplemental Indenture dated as of November 6, 1987 (such Original Indenture as supplemented hereinafter referred to as the "1984 Indenture") between Texas Commerce Bancshares, Inc., the Company and Bank which was heretofore qualified under the Act, is not so likely to involve a material conflict of interest as to make it necessary in the public interest or for the protection of investors to disqualify the Bank from acting as trustee under these indentures.

The Company alleges:

(1) Pursuant to the 1974 Indenture, the Company has outstanding approximately $43,660,000 aggregate principal amount of its 8.40% Debentures Due 1999, (the "Debentures"). The Debentures were registered under the Securities Act of 1933, (the "1933 Act") and the 1974 Indenture was qualified under the Act.

(2) Pursuant to the 1984 Indenture Texas Commerce Bancshares, Inc. ("TCB"), a wholly-owned subsidiary of the Company, has outstanding approximately $31,350,000 aggregate principal amount of its Floating Rate Notes Due 1996, (the "Notes"). The Notes were registered under the 1933 Act and the 1984 Indenture was qualified under the Act. Bankers Trust Company ("Bankers Trust") had been acting as Trustee under the 1984 Indenture. As of June 29, 1987, the Company guaranteed on a subordinated basis the obligations of TCB under the 1984 Indenture with respect to the due and punctual payment of principal (and premium, if any) and interest on the Notes (the "Subordinated Guarantee"). On September 16, 1987, Bankers Trust notified the Company of its intention to resign as Trustee under the 1984 Indenture. The Company requested the Bank to accept appointment as Successor Trustee under the 1984 Indenture, and, as of November 6, 1987, the Bank accepted such appointment.

Simultaneously with such acceptance, the Company issued to the Bank for the benefit of the holders of the Notes, in full substitution and replacement of the Subordinated Guarantee, a new guarantee (the "Senior Guarantee"), under which the obligations of the Company in respect of its guarantee of payment of the Notes rank *pari passu* with the Company's obligations in respect of the Debentures.

(3) The Company's obligations with respect to the Debentures and under the Senior Guarantee with respect to the Notes are in each case wholly unsecured and rank equally *pari passu.*

(4) There is no default under the 1974 Indenture or the 1984 Indenture.

(5) Such differences as exist between the 1974 Indenture and the respective obligations of the Company as guarantor under the 1984 Indenture are not so likely to involve a material conflict of interest as to make it necessary in the public interest or for the protection of investors to disqualify the Bank from acting as trustee under either Indenture.

The Company has waived notice of hearing, hearing and any and all rights to specify procedures under the Rules of Practice of the Commission in connection with this matter.

For a more detailed statement of the matters of fact and law asserted, all persons are referred to said application which is on file in the Offices of the Commission's Public Reference Section, File Number 22-17824, 450 Fifth Street NW., Washington, DC 20549.

Notice is further given that any interested persons may, not later than April 4, 1988, request in writing that a hearing be held on such matter stating the nature of his interest, the reasons for such request and the issues of law or fact raised by such application which he desires to controvert, or he may request that he be notified if the Commission orders a hearing thereon. Any such request should be addressed: Secretary, Securities and Exchange Commission, 450 Fifth Street NW., Washington, DC 20549. At any time after said date, the Commission may issue an order granting the application, upon such terms and conditions as the Commission may deem necessary or appropriate in the public interest and for the protection of investors, unless a hearing is ordered by the Commission.

For the Commission, by the Division of Corporation Finance, pursuant to delegated authority.

Jonathan Katz,

Secretary.

BILLING CODE 8010-01-M

[File No. 1-9536]

Issuer Delisting; Application To Withdraw From Listing and Registration; International Telecharge, Inc, (Common Stock $.01 Par Value)

March 10, 1988.

International Telecharge, Inc. ("Company") has filed an application with the Securities and Exchange Commission pursuant to section 12(d) of the Securities Exchange Act of 1934 ("Act") and Rule 12d2-2(d) promulgated thereunder, to withdraw the above specified securities from listing and registration on the Boston Stock Exchange, Inc. ("BSE").

The reasons alleged in the application for withdrawing this security from listing and registration include the following:

The Common Stock of International Telecharge, Inc. ("Company") has been approved for listing and has commenced trading, as of March 4, 1988, on the American Stock Exchange, Inc. ("Amex"). The Company wishes to have its Common Stock traded only on the Amex. In this connection, the Company delisted from the NASDAQ National Market System at the open of business on Friday, March 4, 1988.

Any interested person may, on or before March 31, 1988, submit by letter to the Secretary of the Securities and Exchange Commission, Washington, DC 20549, facts bearing upon whether the application has been made in accordance with the rules of the Exchange and what terms, it any, should be imposed by the Commission for the protection of investors. The Commission, based on the information submitted to it, will issue an order granting the application after the date mentioned above, unless the Commission determines to order a hearing on the matter.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.

Jonathan G. Katz,

Secretary.

Wells Fargo Bank, N.A. and Wells Fargo Investment Advisors; Application and Temporary Order

March 11, 1988.

AGENCY: Securities and Exchange Commission ("Commission").

ACTION: Notice of Application for an Order of Permanent Exemption under the Investment Company Act of 1940 ("1940 Act") and Order of Temporary Exemption.

Applicants: Wells Fargo Bank, N.A. ("Bank") and Wells Fargo Investment Advisors ("WFIA").

Relevant 1940 Act Sections: Permanent order requested, and temporary order granted, under section 9(c) from section 9(a).

Summary of Application: Applicants seek a permanent order pursuant to section 9(c) of the 1940 Act granting exemption from the provisions of section 9(a). Applicants also request a temporary order granting exemption from section 9(a) until the Commission takes action on the request for the permanent order.

Filing Dates: The application was filed on January 15, 1988, an amended on February 1 and March 3, 1988.

Hearing or Notification of Hearing: If no hearing is ordered, the application will be granted. Any interested person may request a hearing on this application, or ask to be notified if a hearing is ordered. Any requests must be received by the Commission by 5:30 p.m., on April 5, 1988. Request a hearing in writing, stating the nature of your interest, the reason for the request, and the issues you contest. Serve the Applicants with the request, either personally or by mail, and also send it to the Secretary of the Commission, along with proof of service by affidavit or, in the case of an attorney-at-law, by certificate. Request notification of the date of a hearing by writing to the Secretary of the Commission.

ADDRESSES: Secretary, Securities and Exchange Commission, 450 Fifth Street NW., Washington, DC 20549; Applicants, 420 Montgomery Street, San Francisco, California 94163.

BEST COPY AVAILABLE

FOR FURTHER INFORMATION CONTACT: Thomas C. Mira, Staff Attorney (202) 272–3033, or Brion R. Thompson, Special Counsel (202) 272–3016 (Division of Investment Management).

SUPPLEMENTARY INFORMATION: The following is a summary of the application; the complete application is available for a fee from either the Commission's Public Reference Branch in person or the Commission's commercial copier at (800) 231–3282 (in Maryland (301) 258–4300).

Applicants' Representations:

1. Applicants are both wholly-owned subsidiaries of Wells Fargo & Company, a California corporation and a publicly held registered bank holding company. The Bank currently serves as investment adviser to Wells Fargo Investment Trust for Retirement Programs, an investment company registered under the 1940 Act. WFIA currently serves as investment adviser to the Dreyfus Index Fund and a series of the Frank Russell Investment Company, both of which are also investment companies registered under the 1940 Act. In addition, the Bank anticipates serving as investment adviser to Overland Express Funds Inc. ("Overland"), a newly organized investment company, and WFIA proposes to serve as investment adviser to the Benham Variable Insurance Trust ("Benham"), another newly organized investment company. According to the application, it is expected that Overland, within two to three weeks, and Benham in early March, will file pre-effective amendments to their 1933 Act registration statements and at that time request that those registration statements be declared effective. Moreover, either or both of the Applicants may serve as investment advisers to, depositors of or principal underwriters for, additional investment companies in the future.

2. According to the application, on November 19, 1987, the Commodity Futures Trading Commission ("CFTC") filed a civil complaint ("Complaint") in the United States District Court for the Central District of California against the Bank. The CFTC alleged that the "Wells Fargo Gold Market Certificates" ("Certificates") that were offered and sold by the Bank to members of the general public had the characteristics of a call option based on a regulated commodity, namely gold; thus, they could be traded only on or subject to the rules of a CFTC-designated contract market, and only by or through a member of such a contract market.

3. On the same day that the Complaint was filed, the Bank consented, without admitting or denying any of the allegations in the Complaint (except as to jurisdiction), to the entry of an order ("Order") permanently enjoining the Bank, its directors, officers, employees, agents, subsidiaries and affiliates, from directly or indirectly engaging in any transaction involving a commodity option in violation of any CFTC rule, regulation or order. In addition, the Bank was rquired to rescind and cancel all outstanding Certificates and make full restitution to each purchaser of the Certificates.

Applicants' Legal Analysis:

1. Section 9(a)(2) of the 1940 Act, as here relevant, automatically disqualifies any person from serving as investment adviser to, depositor of or a principal underwriter for any registered investment company if such person is, by reason of any misconduct, permanently or temporarily enjoined by any court order, judgment of decree from: (i) "acting as an * * * entity or person required to be registered under the Commodity Exchange Act;" (ii) "engaging in or continuing any conduct or practice in connection with any such activity;" or (iii) engaging in or continuing any conduct or practice "in connection with the purchase or sale any security." Although the Order named only the Bank, all persons generically referred to therein (including WFIA) were also enjoined, and thus, all such persons are disqualified from serving registered investment companies in the capacities set forth in section 9(a). Accordingly, Applicants seek exemptive relief on behalf of themselves and all persons generally referenced in the Order. Section 9(c) of the 1940 Act provides that the Commission shall grant an application for an exemption from the provisions of section 9(a), either unconditionally or conditionally, on a permanent or temporary basis if it is established that the prohibitions of section 9(a), as applied to the applicant(s), are "unduly or dispropoortionately severe", or that the conduct of the applicant(s) has been such as "not to make it against the public interest or protection of investors to grant such applicant."

2. In support of their position that the Commission should grant the requested temporary and permanent exemptions from the prohibitions of section 9(a) of the 1940 Act, to the extent such provisions are applicable as a result of the Order, Applicants assert the following.

a. Applicants submit that even if the enjoined activities cause the prohibitions of Section 9(a) to be applicable, either because they are found to relate to registration under the Commodity Exchange Act, or because the Certificates are deemed to be securities, such activities are, at most, peripheral to the central purposes of Section 9(a) in that they do not relate to, or raise any issues regarding, investment advisory activities (or activities as a depositor or principal underwriter for an investment company), any person's qualifications to act in such capacities or any issues relating to Applicants' honesty or integrity.

b. None of the allegations in the Complaint relates in any way to the current or proposed activities of any investment companies or, specifically, to Applicants' current or proposed activities as investment advisers to (or, as depositors of or principal underwriters for) any investment companies. Similarly, the prohibitions set forth in the Order do not directly apply, in any manner, to the current or proposed activities of any investment companies. Moreover, none of the personnel of the Bank and WFIA involved in the day-to-day provision of investment advisory services to any existing investment companies was involved in the facts and circumstances that gave rise to the Complaint and Order. The Bank consented to make, and has already made, full restitution to each purchaser of Certificates.

c. The prohibitions of section 9(a) would be unduly and disproportionately severe, as applied to Applicants, because such prohibitions, in substance, would deprive the funds currently advised by either applicant and their shareholders (who have selected the Bank and WFIA as their respective investment advisers), of Applicants' investment advisory services. Moreover, the independent sponsors and distributors of such funds would be deprived of the investment advisory services of the Bank and WFIA, which services they negotiated for at the time those funds were organized. Such deprivation could operate significantly to the detriment of the financial interests of such funds and/or existing and prospective shareholders, none of whom were in any way involved in, or implicated by, the facts and circumstances that gave rise to the Complaint and Order.

d. The prohibitions of section 9(a) would be unduly and disproportionately severe, as applied to the Bank and WFIA, in that both have expended substantial resources in connection with the organization and registration activities associated with the start-up of the newly established funds. Moreover, the independent sponsor and distributor of a newly established investment company that is nearing effectiveness, which has expended substantial resources in connection with the start-up of the fund and which has in no way been implicated by the facts and circumstances that gave rise to the Complaint and Order, would be subject to severe and unwarranted hardships if Applicants' request is not granted. Such an independent sponsor and distributor would be required either to abandon, or substantially delay, plans for the public sale of the shares of such fund or attempt to procure a new adviser possessing comparable investment advisory capabilities. Such a sponsor and distributor would find it difficult, if not impossible, to find a satisfactory substitute investment adviser.

e. The prohibitions of section 9(a) would be especially unfair as applied to WFIA and the other companies of which the Bank is an affiliated person, which were not implicated by the facts and circumstances that gave rise to the Complaint and Order, but which are subject to the Order, and would be subject to the Section 9(a) prohibitions, solely because of their affiliation with the Bank.

f. The facts and circumstances that gave rise to the Complaint and Order are such as not to make it against the public interest or protection of investors for the Commission to grant the requested exemption. In this regard, no fraudulent activities, misleading statements or material omissions, of any nature, were alleged in connection with the offer and sale of the Certificates. Indeed, it is noteworthy that the Bank's consent to entry of the Order contains the stipulation that the Order "shall not in the future constitute the sole basis for denying, suspending, or revoking any registration of Wells Fargo with the Commodity Futures Trading Commission."

g. The public interest and the goal of protecting investors dictate that the temporary requested exemption be granted so that the investment companies currently advised by either the Bank or WFIA can maintain uninterrupted operations and that the funds in registration can proceed as reasonably contemplated by the other participants, including their independent sponsors and distributors. Moreover, granting the temporary exemption would protect the interests of the investment companies being served by Applicants by allowing time for the orderly consideration of the application for permanent relief or the orderly transition of the Applicants' responsibilities to successors, or both. Such result is fully consistent with the purposes and policies underlying the provisions of the 1940 Act.

h. Neither the Bank nor WFIA has ever previously applied for an exemption pursuant to section 9(c) from the provisions of section 9(a) of the 1940 Act.

3. In making this application, Applicants acknowledge, understand and agree that the application and any temporary or permanent exemption issued shall be without prejudice to, and shall not limit the Commission's rights in any manner with respect to, any Commission investigations or enforcement actions pursuant to the federal securities laws, or the consideration by the Commission of any application for exemption from statutory requirements, including, without limitation, the consideration of Applicants' instant request for a permanent exemption pursuant to section 9(c) from the provisions of section 9(a) of the 1940 Act, or the revocation or removal of any temporary exemption granted in connection with the application.

Temporary Order:

Based on the foregoing, including Applicants' representations, the Complaint and the Order, and the remedial provisions resulting therefrom, the Commission has considered the matter and finds, under the standards of section 9(c) of the 1940 Act applicable to this matter, that the Applicants have made the necessary showing to justify granting of a temporary exemption.

Accordingly, it is ordered, under section 9(c) of the 1940 Act, that the Applicants and all persons generically referred to in the Order are hereby temporarily exempted, to the extent necessary as a result of entry of the Order, from the provisions of section 9(a) of the 1940 Act until the Commission takes final action on the application for an order granting the Applicants and such persons a permanent exemption from the provisions of section 9(a) of the 1940 Act.

By the Commission.

Jonathan G. Katz,

Secretary.

SMALL BUSINESS ADMINISTRATION

[Application No. 05/05–0206]

Hidden Oaks Financial Services, Inc.; Application for a Small Business Investment Company License

An application for a license to operate as a small business investment company under the provisions of the Small Business Investment Act of 1958, as amended (15 U.S.C. 661, *et seq.*) has been filed by Hidden Oaks Financial Services Inc., 4620 West 77th Street, Suite 155, Edina, Minnesota 55435, with the Small Business Administration (SBA) pursuant to 13 CFR 107.102 (1988).

The officers, directors, and major shareholders of the Applicant as follows:

C. Patrick Schulke, 8905 Hidden Oaks Drive, Eden Prairie, Minnesota 55344, President, Director, 33⅓ percent.
Curtis A. Stephan, 17220 19th Avenue, N., Plymouth, Minnesota 55447, Vice President, 33⅓ percent.
Charles E. Bidwell, 835 Windjammer Lane, Mound, Minnesota 55364, Vice President, Director, 33⅓ percent.
Michael W. Wilson, 1783 Holton Street, Falcon Heights, Minnesota, Treasurer.
Rick L. Olson, 4620 West 77th Street, Suite 155, Edina, Minnesota 554165, Manager.

The Applicant, Hidden Oaks Financial Services, Inc. a Minnesota Corporation will begin operations with $1,025,000 paid in capital and paid in surplus, will conduct its activities primarily in the State of Minnesota, Wisconsin, Iowa, North Dakota, South Dakota, and the upper Pennisula of Michigan but will consider investments in businesses in other areas in the United States.

Matters involved in SBA's consideration of the application include the general business reputation and character of the proposed owners and management, and the probability of successful operations of the company under their management, including adequate profitability and financial soundness, in accordance with the Small Business Investment Act of 1958, as amended and the SBA Rules and Regulations.

Notice is further given that any person may, not later, than 30 days from the date of publication of this Notice, submit written comments on the proposed Applicant. Any such communication should be addressed to the Deputy Associate Administrator for Investment, Small Business Administration, 1441 "L" St. NW., Washington, DC 20416.

A copy of this notice shall be published in a newspaper of general circulation in Edina, Minnesota.

(Catalog of Federal Domestic Assistance Program No. 59.011, Small Business Investment Companies)

Robert G. Lineberry,

Deputy Associate Administrator for Investment.

Dated: March 11, 1988.

DEPARTMENT OF TRANSPORTATION

Federal Highway Administration

Environmental Impact Statement; Monterey County, CA

AGENCY: Federal Highway Administration (FHWA), DOT.

ACTION: Withdrawal of previous notice of intent.

SUMMARY: The FHWA is issuing this notice to advise the public that an Environmental Impact Statement (EIS) will not be forthcoming, as was specified in the original Notice of Intent published in the Federal Register on October 10, 1986 (51 FR 36332).

FOR FURTHER INFORMATION CONTACT: C. Glenn Clinton, District Engineer, Federal Highway Administration, P.O. Box 1915, Sacramento, California 95812-1915. Telephone: (916) 551-1310.

SUPPLEMENTARY INFORMATION: Having considered the limited scope of the work now proposed (pavement rehabilitation and shoulder construction), the Department of Transportation has decided not to seek Federal funding for improvement of State Route 1 from 0.2 miles north to 1.5 miles north of Juan Higuera Creek Bridge in Monterey County, California.

(Catalog of Federal Domestic Assistance Program Number 20.205, Highway Research, Planning and Construction. The Regulations implementing Executive Order 12372 regarding intergovernmental consultation on Federal Programs and activities apply to this program.)

Issued on: March 9, 1988.

C. Glenn Clinton,

District Engineer, Sacramento, California.

VETERANS ADMINISTRATION

Cooperative Studies Evaluation Committee; Meeting

The Veterans Administration gives notice under the Federal Advisory Committee Act that a meeting of the Cooperative Studies Evaluation Committee will be held at the Back Bay Hilton Hotel, Dalton Street, Boston, MA, on April 26 and 27, 1988. The session on April 26 is scheduled to begin at 7:30 a.m. and end at 3:30 p.m. and the session on April 27 is scheduled to begin at 7:30 a.m. and end at 1:00 p.m. The meeting will be for the purpose of reviewing three proposed new clinical trials, one in cardiovascular and two in cancer research, and the progress of on-going studies concerning epilepsy and liver diseases. The Committee advises the Director, Medical Research Service, through the chief of the Cooperative Studies Program on the relevance and feasibility of the studies, the adequacy of the protocols, and the scientific validity and propriety of technical details, including protection of human subjects.

The meeting will be open to the public up to the seating capacity of the room from 7:30 to 8 a.m., on April 26, 1988 to discuss the general status of the program. To assure adequate accommodations, those whose plan to attend should contact Dr. Ping Huang, Coordinator, Cooperative Studies Evaluation Committee, Veterans Administration Central Office, Washington, DC (202–233–2861), prior to April 16, 1988.

The meeting will be closed from 8 a.m. to 3:30 p.m. on April 26, and from 8 a.m. to 1 p.m. on April 27, 1988, for consideration of specific proposals in accordance with provisions set forth in sections 10(d) of the Federal Advisory Committee Act and 5 U.S.C. 552(c)(6). During this portion of the meeting, discussions and recommendations will deal with qualifications of personnel conducting the studies, staff and consultant critiques of research protocols, and similar documents, and the medical records of patients who are study subjects, the disclosure of which would constitute clearly unwarranted invasion of personal privacy.

Dated: March 9, 1988.

By direction of the Administrator.

Board of Directors Meeting

TIME AND DATE: The open meeting of the Board of Directors will commence at 11:00 a.m. or immediately following the Audit and Appropriations Committee meeting. The meeting is to be held on Friday, March 25, 1988, in the New Mexico Room. An Executive Session will also be held on Friday from 12:00 p.m. until 1:30 p.m. in the Rainbow Room.

PLACE: The La Fonda Hotel, New Mexico Room, 100 East San Francisco, Post Office Box 1209, Santa Fe, New Mexico 87504.

STATUS OF MEETING: Open (A portion of the meeting is to be closed to discuss personnel, personal, litigation, and investigatory matters under The Government in the Sunshine Act (5 U.S.C. 552b (c) (2), (6), (7), (9)(B), and (10)) and 45 CFR 1622.5 (a), (e), (f), (g), and (h)).

MATTERS TO BE CONSIDERED:

Executive Session (Closed)

1. Personnel and Personal Matters
2. Litigation and Investigation Matters

Board of Directors Meeting (Open)

1. Approval of Agenda
2. Approval of Minutes
   —Feburary 26, 1988
3. Report from the Audit and Appropriations Committee
4. Ratification of FY 1988 Budget
5. Report from the Provision of the Delivery of Legal Services Committee
6. Report by Douglas J. Besharov of the American Enterprise Institute on "Maximizing Access to Justice"
7. Consideration of the FY 1989 Budget Request and President Reagan's Proposed 1989 Budget
8. Report on Functional Accounting
9. Consideration of Revised 45 CFR Part 1611, Poverty Income Guidelines
10. Report on Reprograming of 45 CFR 1607.6, Compensation

Corrections

Federal Register

Vol. 53, No. 52

Thursday, March 17, 1988

This section of the FEDERAL REGISTER contains editorial corrections of previously published Presidential, Rule, Proposed Rule, and Notice documents and volumes of the Code of Federal Regulations. These corrections are prepared by the Office of the Federal Register. Agency prepared corrections are issued as signed documents and appear in the appropriate document categories elsewhere in the issue.

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 180

[PP 4F3119/R927; FRL-3312-2]

Oxyfluorfen; Pesticide Tolerance

Correction

In rule document 88-161 beginning on page 243 in the issue of Wednesday, January 6, 1988, make the following correction:

On page 243, in the third column, in the fifth paragraph, in the last line, "23.13 percent" should read "23.17 percent".

BILLING CODE 1505-01-D

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

21 CFR Parts 201, 356, and 369

[Docket No. 81N-0033]

Oral Health Care Drug Products for Over-the-Counter Human Use; Tentative Final Monograph

Correction

In proposed rule document 88-1455 beginning on page 2436 in the issue of Wednesday, January 27, 1988, make the following corrections:

1. On page 2438, in the second column, in the second complete paragraph, in the 19th line, "working" should read "wording".

2. On page 2450, in the first column, in the fourth line "217" should read "211".

3. On page 2455, in the first column, in designated paragraph 22, the second line should read "Panel in § § 356.50(c)(1)(i) and (ii),".

§ 356.55 [Corrected]

4. On page 2459, in the second column, in § 356.55(d)(6)(i)(A), in the fourth line, remove ". Gargle, swish around, or" and insert a comma.

5. On the same page, in the second column, in § 356.55(d)(6)(i)(B), in the third and fourth lines, remove "Apply to the affected area."

Hazardous Materials Table

CFR Correction

In the October 1, 1987 revision of Title 49 (Parts 100 to 177) of the Code of Federal Regulations, on pages 78 through 167, the text of several entries in the "Hazardous Materials Table" in § 172.101 was incorrectly published based on the amendatory language contained in the rule document of November 21, 1986 (51 FR 42174). The table is corrected as follows:

1. Columns 1 through 7(c) for the shipping descriptions listed below are removed.

Adipic acid
Aluminum sulfate, solid
Ammonium acetate
Ammonium benzoate
Ammonium bicarbonate
Ammonium chloride
Ammonium chromate
Ammonium citrate, dibasic
Ammonium sulfamate
Ammonium sulfite
Ammonium tartrate
Ammonium thiocyanate
Ammonium thiosulfate
Antimony trioxide
Benzoic acid
n-Butyl phthalate
Cadmium acetate
Cadmium bromide
Cadmium chloride
Calcium chromate
Calcium dodecylbenzenesulfonate
Captan
Chromic acetate
Chromic sulfate
Chromous chloride
Cobaltous bromide
Cobaltous formate
Cobaltous sulfamate
Cupric acetate
Cupric oxalate
Cupric sulfate
Cupric sulfate, ammoniated
Cupric tartrate
Dicamba
Dichlobenil
Dichlone
2,4-Dichlorophenoxyacetic acid ester
Dinitrotoluene, liquid
Dinitrotoluene, solid
Diquat
Diuron
Ethylenediaminetetraacetic acid
Ferric ammonium citrate
Ferric ammonium oxalate
Ferric fluoride
Ferric sulfate
Ferrous ammonium sulfate
Ferrous sulfate
Fumaric acid
Heptachlor
Isopropanolamine dodecylbenzenesulfonate
Kelthane
Kepone
Lead acetate
Lead iodide
Lead stearate
Lead sulfate
Lead sulfide
Lead thiocyanate
Lithium chromate
Mercaptodimethur
Methoxychlor
Naled
Naphthenic acid
Nickel ammonium sulfate
Nickel chloride
Nickel hydroxide
Nickel sulfate
Nitrophenol
Nitrotoluene
Pentachlorophenol
Polychlorinated biphenyls
Potassium chromate
Propargite
Pyrethrins
Quinoline
Resorcinol
Sodium chromate
Sodium dodecylbenzenesulfonate
Sodium phosphate, dibasic
Sodium phosphate, tribasic
Strontium chromate
2,4,5-Trichlorophenoxyacetic acid amine, ester, or salt
2,4,5-Trichlorophenoxypropionic acid ester
Triethanolamine dodycylbenzenesulfonate
Vanadium pentoxide
Vanadyl sulfate
Zinc acetate
Zinc ammonium chloride
Zinc borate
Zinc bromide
Zinc carbonate
Zinc chloride, solid
Zinc fluoride
Zinc formate
Zinc phenolsulfonate
Zinc silicofluoride
Zinc sulfate
Zirconium potassium fluoride

2. In Column 2, the following shipping descriptions are corrected:

"Allyl alcohol (*RQ–100/45.4*)" should read "Allyl alcohol".

"Carbofuran mixture, liquid (*RQ–10/45.4*)" should read "Carbofuran mixture, liquid".

"Hydrogen chloride *or* Hydrogen chloride, anhydrous (*RQ5000/2270*)" should read "Hydrogen chloride *or* Hydrogen chloride, anhydrous".

"Lead sulfate (*RQ–5000/2270*)" should read "Lead sulfate".

"Phosphorus pentasulfide (*RQ–100/45.4*)" should read "Phosphorus pentasulfide".

"Phosphorus trichloride (*RQ–5000/2270*)" should read "Phosphorus trichloride".

"Resorcinol (*RQ–1000/454*)" should read "Resorcinol".

"Sodium methylate, dry (*RQ–1000/454*)" should read "Sodium methylate, dry".

"Uranyl acetate (*RQ–5000/2270*)" should read "Uranyl acetate".

"Uranyl nitrate hexahydrate solution (*RQ–5000/2270*)" should read "Uranyl nitrate hexahydrate solution".

"Uranyl nitrate, solid (*RQ–5000/2270*)" should read "Uranyl nitrate, solid".

Part II

Department of Transportation

Coast Guard

33 CFR Part 117

Drawbridge Operation Regulations; Potomac River, District of Columbia et al.; Temporary Deviation From Drawbridge Regulations With Request for Comments and Proposed Rule

DEPARTMENT OF TRANSPORTATION

Coast Guard

33 CFR Part 117

[CGD5–88–09]

Drawbridge Operation Regulations; Potomac River, District of Columbia et al.

AGENCY: Coast Guard, DOT.

ACTION: Notice of temporary deviation from drawbridge regulations with request for comments.

SUMMARY: The City of Alexandria, Virginia, Fairfax County, Virginia, and Congressman Frank R. Wolf of Virginia have requested that the Coast Guard amend the regulations for the Woodrow Wilson Memorial (I–95) drawbridge across the Potomac River, mile 103.8, between Alexandria, Virginia, and Oxon Hill, Maryland, to extend the times that the draw remains closed to most vessel traffic. The requested change is intended to help relieve highway traffic congestion during the extended rush hours on this major commuter artery, an important segment of the interstate highway system that connects the northeastern and southeastern portions of the United States. The purpose of this deviation from the regulation is to evaluate the impact of the proposed operating schedule for the bridge on both highway and waterway users.

DATES: This temporary deviation from the regulations is effective from April 15, 1988, through June 15, 1988.

ADDRESS: Comments should be mailed to Commander (ob), Fifth Coast Guard District, 431 Crawford Street, Portsmouth, Virginia 23704–5004. The comments received will be available for inspection and copying at Room 507 at the above address between 8 a.m. and 4 p.m., Monday through Friday, except holidays.

SUPPLEMENTARY INFORMATION: Under 5 U.S.C. 553, a notice of proposed rulemaking was not published for this temporary deviation. Following normal rulemaking procedures is unnecessary and impractical, since the impact on the proposed change to the regulations governing the Woodrow Wilson bridge cannot be completely assessed without this temporary deviation to permit an evaluation of the proposed change. This procedure is authorized by 33 CFR 117.43. Although this temporary deviation is published as a "final rule" for a limited period without prior opportunity for public comment, public comments are desired to ensure that the temporary deviation and the proposed rule are reasonable and workable.

Persons wishing to make comments expressing their views or arguments may do so by submitting written comments to the office listed under **ADDRESS** in this preamble. Commenters should include their names and addresses, identify the docket number for this temporary deviation (CGD5–88–09), give reasons for their comments, and include any available supporting data.

Persons desiring an acknowledgment that their comments have been received should enclose a stamped, self-addressed postcard or envelope.

The Commander, Fifth Coast Guard District, will evaluate all communications received and determine whether the temporary deviation or the proposed regulations should be amended in light of comments received.

Drafting Information

The drafters of this notice are Linda L. Gilliam, Project Officer, and CDR Robert J. Reining, Project Attorney.

Discussion of Temporary Deviation

The temporary deviation extends the times when the draw will remain closed to vessel traffic during both the morning and evening rush hours. At the present, the drawbridge remains closed to most vessel traffic Monday through Friday, from 6:30 a.m. to 9:00 a.m. and 4:00 p.m. to 6:30 p.m. During the test period, with one exception, the bridge will remain closed to all vessel traffic Monday through Friday, from 6:00 a.m. to 10:00 a.m. and 3:00 p.m. to 8:00 p.m. The provision that requires the draw to open on signal at all times for public vessels, tour boats, and vessels in distress is also eliminated. This temporary deviation is being issued in conjunction with a notice of proposed rulemaking (CGD5–88–08), which is published elsewhere in this issue of the Federal Register.

With one exception, that notice proposes to make permanent the changes to the regulations contained in this temporary deviation. This temporary deviation differs from the notice of proposed rulemaking to the extent that this temporary deviation preserves the current opening schedule for deep draft, oceangoing vessels bound to or from the Robinson Terminals in Alexandria, Virginia.

This exception was preserved in the temporary deviation to permit an additional analysis of the possible economic impact of the proposed rule on the Robinson Terminals. Other than naval vessels visiting the Washington, DC area, the vessels, that call at the Robinson Terminals are the only deep draft, oceangoing vessels that routinely operate on the Potomac River. Due to tidal restrictions on when those vessels can navigate the river, the extension of the closed period may have a significant impact on the economic viability of that terminal. That economic impact will be assessed during the comment period of the notice of proposed rulemaking.

This temporary deviation also amends the temporary rule (CGD5–88–02) governing this bridge issued on February 16, 1988, with a beginning effective date of February 29, 1988. The temporary rule was published in the Federal Register on March 4, 1988 (53 FR 6984).

Economic Assessment and Certification

This temporary rule is considered to be non-major under the Executive Order 12291 and nonsignificant under the Department of Transporation regulatory policies and procedures (44 FR 11034; February 26, 1979).

The economic impact of this temporary deviation is expected to be so minimal that a full regulatory evaluation is unnecessary. This conclusion is based on the fact that the temporary deviation will continue to provide the same opportunities for bridge openings for the only large commercial vessels that currently use the waterway.

Further, the temporary deviation will help eliminate traffic backups on this vital highway link, resulting in savings of time and fuel by highway users.

The other vessels that may be impacted by this temporary deviation will include public vessels (primarily naval vessels visiting the Washington, DC area and Coast Guard buoy tenders working aids to navigation on the upper Potomac River), a few fuel barges being handled by towing vessels, and recreational sailboats. It is our understanding that all of the tour boats that routinely use the upper Potomac River are able to pass under the bridge at normal tide levels.

Since the economic impact of this proposal is expected to be minimal, the Coast Guard certifies that, it will not have a significant economic impact on a substantial number of small entities.

FOR FURTHER INFORMATION CONTACT: Ann B. Deaton, Bridge Administrator, Fifth Coast Guard District (804) 398–6222.

Bridges.

Temporary Deviation

In consideration of the foregoing, §117.255(a) of Part 117 of Title 33, Code of Federal Regulations, is temporarily amended as follows:

PART 117—[AMENDED]

1. The authority citation for Part 117 continues to read as follows:

Authority: 33 U.S.C. 499; 49 CFR 1.46; 33 CFR 1.05–1(g).

2. Section 117.255(a) is revised to read as follows:

§ 117.255 Potomac River.

(a) The draw of the Woodrow Wilson Memorial (I–95) bridge, mile 103.8, between Alexandria, Virginia, and Oxon Hill, Maryland, shall open on signal, except the draw need not open:

(1) For the passage of deep draft, oceangoing vessels bound for or from the Robinson Terminals in Alexandria, Virginia, from 6:30 a.m. to 9:00 a.m. and from 4:00 p.m. to 6:30 p.m., on Mondays through Fridays, other than Federal holidays.

(2) For the passage of other vessels from 6:00 a.m. to 10:00 a.m. and 3:00 p.m. to 8:00 p.m., on Mondays through Fridays, other than Federal holidays.

(3) From 10:00 a.m. to 3:00 p.m., on Mondays through Fridays, other than Federal Holidays, unless at least one hour advance notice is given for an opening.

* * * * *

3. This temporary deviation is effective from April 15, 1988, until June 15, 1988, unless amended or terminated before that date.

Dated: March 8, 1988.

A.D. Breed,

Rear Admiral, U.S. Coast Guard, Commander, Fifth Coast Guard District.

[FR Doc. 88–5880 Filed 3–16–88; 8:45 am]

BILLING CODE 4910–14–M

DEPARTMENT OF TRANSPORTATION

Coast Guard

33 CFR Part 117

[CGD5-88-08]

Drawbridge Operation Regulations; Potomac River, District of Columbia et al.

AGENCY: Coast Guard, DOT.

ACTION: Notice of proposed rulemaking.

SUMMARY: The City of Alexandria, Virginia; Fairfax County, Virginia; and Congressman Frank R. Wolf of Virginia have requested that the Coast Guard amend the regulations for the Woodrow Wilson Memorial (I–95) drawbridge across the Potomac River, mile 103.8, between Alexandria, Virginia, and Oxon Hill, Maryland, to extend the times that the draw remains closed to vessel traffic. The purpose of this proposed change is to help relieve highway traffic congestion during the extended rush hours on this major commuter artery, an important segment of the interstate highway system that connects the northeastern and southeastern portions of the United States. This action should help relieve some of the serious traffic congestion on this bridge and approach roads.

DATE: Comments must be received on or before May 2, 1988.

ADDRESSES: Comments should be mailed to Commander (oan), Fifth Coast Guard District, 431 Crawford Street, Portsmouth, Virginia 23704–5004. The comments and other materials referenced in this notice will be available for inspection and copying at the above address, Room 507, between 8 a.m. and 4 p.m., Monday through Friday, except holidays. Comments may also be hand-delivered to this address.

FOR FURTHER INFORMATION CONTACT: Ann B. Deaton, Bridge Administrator, Fifth Coast Guard District, at (804) 398–6222.

SUPPLEMENTARY INFORMATION: Interested persons are invited to participate in this rulemaking by submitting written views, comments, data, and arguments. Persons submitting comments should include their names and addresses, identify the bridge, and give reasons for concurrence with or any recommended change in the proposal. The Commander, Fifth Coast Guard District, will evaluate all communications received and determine a course of final action on this proposal. The proposed regulations may be changed in light of comments received.

Drafting Information

The drafters of this notice are Linda L. Gilliam, project officer, and CDR Robert J. Reining, project attorney.

Discussion of Proposed Regulations

The City of Alexandria, Virginia; Fairfax County, Virginia; and Congressman Frank R. Wolf of Virginia have requested that the drawbridge be regulated to further restrict openings during morning and evening rush hours, Monday through Friday, except Federal Holidays, by extending the current hours that the bridge is required to be closed to vessel traffic. Currently the drawbridge remains closed to most vessel traffic Monday through Friday, from 6:30 a.m. to 9:00 a.m., and 4:00 p.m. to 6:30 p.m. The requested change would extend the closed period to include the hours between 6:00 a.m. to 10:00 a.m., and 3:00 p.m. to 8:00 p.m. The provision that requires the draw to open on signal at all times for public vessels, tour boats, and vessels in distress has been eliminated in this proposal.

This proposed rule is being issued in conjunction with a notice of temporary deviation from drawbridge regulations with request for comments (CGD5–88–09) which is published elsewhere in this issue of the **Federal Register**. This notice differs from the temporary deviation to the extent that this notice does not preserve the current opening schedule for deep draft, oceangoing vessels bound to or from the Robinson Terminals in Alexandria, Virginia. That exception was allowed in the temporary deviation in order to permit an additional analysis of the possible economic impact of this proposed rule on the Robinson Terminals. The District of Columbia Department of Transportation has provided data that shows that bridge openings during rush hours during the month of February, 1988, caused traffic backups up from one to one and a half miles in length. Anecdotal information indicates that these backups do not automatically clear when the draw is closed. It generally takes a while to return to a normal traffic flow, as a result of the related traffic accidents and mechanical breakdowns that frequently occur during traffic stoppages, such as bridge openings.

The Woodrow Wilson Bridge, a part of I–95, is an important link in the Interstate Highway System. It is on the primary route for vehicle traffic, particularly large trucks, between the Northeastern and Southeastern sections of the Nation. It is also a major commuter artery for commuters traveling between Maryland, Virginia, and the District of Columbia. The bridge is heavily traveled throughout the day and night, with the heaviest use during the extended morning and evening rush hours. Extensive backups at the bridge can have a major impact on other routes in the region. A temporary rule (CGD5–88–02) governing the operation of this bridge during current repairs was issued on February 14, 1988, with a beginning effective date of February 29, 1988. The temporary rule was published in the **Federal Register** on March 4, 1988 (53 FR 6984). The temporary rule requires one hour advance notice for draw openings between 9:00 a.m. and 4:00 p.m. on Mondays through Fridays, other than Federal holidays. The temporary deviation from the drawbridge regulations (CGD5–88–09), issued in conjunction with this notice of proposed rulemaking, amended the temporary rule by incorporating extended rush hour opening restrictions into that temporary rule. If this proposed regulation is adopted, the temporary rule, which is effective until November 30, 1988, unless amended or terminated before that date, will need to be amended.

Economic Assessment and Certification

The proposed regulations are considered to be non-major under Executive Order 12291 on Federal Regulations and nonsignificant under the Department of Transportation regulatory policies and procedures (44 FR 11034; February 26, 1979). However, a full regulatory evaluation may be required before a final rule is issued. Other than naval vessels visiting the Washington, DC area, the vessels that call at the Robinson Terminals are the only deep draft, oceangoing vessels that routinely operate on the Potomac River. The operator of the Robinson Terminals has advised us that this proposal may have an adverse impact on his ability to stay in business. The economic impact of this proposal on Robinson Terminal and others will be assessed during the comment period of this notice of proposed rulemaking.

The other vessels that may be impacted by the proposed change will include public vessels (primarily naval vessels visiting the Washington, DC area and Coast Guard buoy tenders working aids to navigation on the upper Potomac River), a few fuel barges being handled by towing vessels, and recreational sailboats. It is our understanding that all of the tour boats that routinely use the upper Potomac River are able to pass under the bridge at normal tide level.

The proposed change should have a positive effect on vehicular traffic on this vital highway link, resulting in saving of time and fuel by highway users.

Bridges.

Proposed Regulations

In consideration of the foregoing, the Coast Guard proposes to amend Part 117 of Title 33, Code of Federal Regulations, as follows:

PART 117—DRAWBRIDGE OPERATION REGULATIONS

1. The authority citation for Part 117 continues to read as follows:

Authority: 33 U.S.C. 499; 49 CFR 1.46; 33 CFR 1.05–1(g).

2. Section 117.255(a) is revised to read as follows:

§ 117.255 Potomac River.

(a) The draw of the Woodrow Wilson Memorial (I–95) Bridge, mile 103.8, between Alexandria, Virginia, and Oxon Hill, Maryland, shall open on signal, except the draw need not open for the passage of vessels from 6:00 a.m. to 10:00 a.m. and 3:00 p.m. to 8:00 p.m., on Mondays through Fridays, other than Federal Holidays.

Dated: March 8, 1988.

A.D. Breed,

Rear Admiral, U.S. Coast Guard, Commander Fifth Coast Guard District.

Part III

Department of Health and Human Services

Food and Drug Administration

Advisory List of Critical Devices—1988; Notice

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

[Docket No. 85N-0499]

Advisory List of Critical Devices—1988

AGENCY: Food and Drug Administration.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) is publishing its updated and expanded "Advisory List of Critical Devices—1988" prepared by FDA's Center for Devices and Radiological Health (CDRH). In the preamble to FDA's final rule establishing current good manufacturing practice (CGMP) regulations for medical devices that FDA promulgated in 1978. FDA provided an illustrative list of devices that would be subject to the "critical device" requirements in that final rule. FDA's revisions to that list reflect current classification names for devices. changes resulting from petitions for exemption, and FDA decisions based upon recommendations of the Device Good Manufacturing Practices Advisory Committee (the Committee). FDA is taking this action under the Medical Device Amendments of 1976.

ADDRESS: Written comments to the Dockets Management Branch (HFA-305), Food and Drug Administration, Room 4-62, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Sharon Kalokerinos, Center for Devices and Radiological Health (HFZ-332), Food and Drug Administration, 8757 Georgia Avenue, Silver Spring, MD 20910. 301-427-7984.

SUPPLEMENTARY INFORMATION: In the **Federal Register** of July 21, 1978 (43 FR 31508), FDA published the current good manufacturing practices (CGMP) regulations for medical devices. The preamble to the CGMP regulations provided a "Guideline List of Critical Devices" (43 FR 31511). This was an illustrative list of 75 devices provided to give examples of devices that FDA concluded met the definition of critical device as found in the final CGMP regulations (21 CFR 820.3(f)). The definition reads "a device that is intended for surgical implant into the body or to support or sustain life and whose failure to perform when properly used in accordance with instructions for use provided in the labeling can be reasonably expected to result in a significant injury to the user." In developing this list, FDA used the recommendations received from the Committee (21 CFR 14.100(d)(2)) and the device advisory panels (21 CFR 14.100(d)(1)). The agency announced that the list was not exhaustive and that it was based on the most current information available to FDA. The agency also stated that the list would be updated periodically as additional information became available and after consultation with the Committee (43 FR 31511).

As discussed below. seven devices have been removed from the list since publication of the original list of 75 critical devices. In the **Federal Register** of November 14, 1978 (43 FR 52761). FDA published a correction to the original "Guideline List of Critical Devices" to remove two of the 75 devices: the catheter. embolectomy (No. 16); and the catheter. septostomy (No. 18). These two devices had been erroneously listed as critical devices. Recently, on its own initiative. FDA has removed an additional device from the list: apparatus, suturing, stomach, and intestinal (No. 8).

On July 3, 1980, in response to a petition (79P-0460), FDA removed three additional devices from the critical device list: the airway. bi-nasopharyngeal (No. 1); the airway. nasopharyngeal (No. 3); and the airway. oropharyngeal (No. 4). After examining manufacturing inspection reports, performance data, and the manufacturing technology used to fabricate these devices, the agency determined that noncritical CGMP requirements are sufficient to provide reasonable assurance of the safety and effectiveness of these three devices.

On September 9, 1982, in response to a petition (81P-0362), FDA clarified its intent to require critical controls only for the life supporting or life sustaining gas machine for anesthesia (21 CFR 868.5160(a)) (No. 42). Previously, in the **Federal Register** of July 16, 1982 (47 FR 31130 at 31146), FDA had identified separately the gas machine for analgesia intended for dental conscious sedation (21 CFR 868.5160(b)). In response to the petition, FDA determined that the gas machine for analgesia was neither life sustaining nor life supporting and did not meet the definition of a critical device in 21 CFR 820.3(f).

The Committee has held several meetings to discuss additions and changes to the original "Guideline List of Critical Devices." The transcripts and summary minutes for the meetings held on June 29, 1979, November 8 and 9, 1979, July 22, 1980, March 29, 1984, October 23 and 24, 1985, and March 20 and 21, 1986, are available from the Dockets Management Branch under the docket number found in the heading of this document. Data used by Committee members to prepare for the October 1985 and March 1986 meetings are also available from the Dockets Management Branch. The information available includes the Committee's vote in November 1979, the identified risks to health attributed to the use of each device, the additional CGMP requirements that apply only to critical devices, and the rationale for these additional requirements

Although the Committee discussed critical device issues at the June 1979 meeting, no voting took place. At the November 1979 meeting, the Committee recommended that 88 of 107 proposed additions be considered critical devices. The Committee reconsidered 20 of these devices at the July 1980 meeting, and as a result of presentations made by interested parties, again voted to add 19 of the 20 devices to the critical device list. In October 1985, and in March 1986, the Committee again considered the devices that had previously been recommended for the critical device list, as well as newly proposed additions to the list. Based upon information and recommendations from the classification panels and the appropriate divisions within CDRH, and based upon the recommendations of the Committee, the list of critical devices was again expanded and is now comprised of 182 devices.

To accommodate all of these changes, FDA is making available this revised and expanded "Advisory List of Critical Devices—1988." The list identifies devices by Code of Federal Regulations (CFR) part and section numbers, and by the classification names of the devices established in FDA's classification regulations (21 CFR Parts 862 through 892). For each device on the current critical device list that was also on the original list, FDA is cross-referencing the number (1 through 75) of that device on the former list.

The term "classification name" of a device is defined at 21 CFR 807.3(j) to mean "* * * the term used by the Food and Drug Administration and its classification panels to describe a device or class of devices for purposes of classifying devices under section 513 of the act." For those few devices whose classification has been proposed but is not yet final, FDA is identifying the devices by the names used in their proposed classification regulations. In its list, FDA also is cross-referencing the former names for those devices on the list that where used before the classification regulations were promulgated.

Devices which are not the subject of proposed or final classification regulations are identified by a suitable description of their regulatory status. In those situations were not all devices identified in a section of a classification regulation are considered to be critical devices, the list describes which of the devices covered by the section are considered critical devices.

Periodically, FDA will revise its list after consulting with the Committee. Any revisions of the list will be published in the **Federal Register** and will be available from the Dockets Management Branch and from CDRH's Division of Compliance Programs, 8757 Georgia Ave., Silver Spring, MD 20910. As stated in the preamble to the CGMP regulations, FDA emphasizes that this list of devices is only illustrative and is not intended to be binding or exhaustive (43 FR 31511). Each manufacturer should continue to refer to the definition of a critical device (21 CFR 820.3(f)) in determining whether the critical device requirements apply to that manufacturer's device.

In order to allow manufacturers sufficient time to comply with critical device requirements, FDA advises that it does not intend to apply those requirements to newly added devices for a period of 180 days from the date of this notice.

A person seeking some form of administrative action with respect to the list of critical devices may file a citizen petition pursuant to 21 CFR 10.30. FDA requests that each petition address the scope of the action of relief sought, such as whether it would apply to a particular manufacturer or to all manufacturers of the subject device or devices. Guidance on how to file a petition is available from the Division of Small Manufacturers Assistance. 800-638-2041.

For the convenience of the reader, the agency is publishing its "Advisory List of Critical Devices—1988" in its entirety:

Section or FR cite	Classification name of device	Device No. on original list	Former device name, or additional information
PART 868—ANESTHESIOLOGY DEVICES			
1. 868.1200	Indwelling blood oxygen partial pressure (P_{O_2}) analyzer	5	Analyzer, oxygen, neonatal invasive
2. 868.2375	Breathing frequency monitor		Apnea monitor.
3. 868.5090	Emergency airway needle	43	Needle, emergency airway.
4. 868.5160(a)	Gas machine for anesthesia	42	Machine, gas anesthesia/analgesia, complete systems. The gas machine for analgesia (868.5160(b)) is exempt from critical device requirements
5 868.5240	Anesthesia breathing circuit	19	Circuit, breathing (with connector, adaptor y-piece).
6. 868.5400	Electroanesthesia apparatus	6, 62	Apparatus, electroanesthesia; and stimulator, electroanesthesia.
7 868.5440	Portable oxygen generator	32	Generator, oxygen, portable
8. 868.5470	Hyperbaric chamber. (Monoplace)		
9 868.5610	Membrane lung for long-term pulmonary support	41	Lung, membrane (for long-term pulmonary support).
10 868.5650	Esophageal obturator	2	Airway, esophageal (obturator).
11 868.5720	Bronchial tube	66	Tube, bronchial (with and without connector).
12. 868.5730	Tracheal tube	67	Tube, tracheal (with and without connector).
13. 868.5740	Tracheal/bronchial differential ventilation tube	68	Tube, tracheal/bronchial, differential/ventilation (with and without connector).
14. 868.5750	Inflatable tracheal tube cuff	27	Cuff, tracheal tube, inflatable.
15. 868.5800	Tracheostomy tube and tube cuff	69	Tube, tracheostomy (with and without connector).
16. 868.5810	Airway connector	25	Connector, airway (extension).
17. 868.5830	Autotransfusion apparatus	9	Autotransfusion apparatus.
18. 868.5895	Continuous ventilator	73, 56	Ventilator, continuous (respirator) and respirator, neonatal ventilator.
19. 868.5905	Noncontinuous ventilator (IPPB)	75	Ventilator, noncontinuous (respirator).
20. 868.5915	Manual emergency ventilator	58, 70	Manual emergency ventilator; and resuscitator, pulmonary, manual.
21. 868.5925	Powered emergency ventilator	70	Unit emergency oxygen and resuscitation
22. 868.5935	External negative pressure ventilator	74	Ventilator, external body negative pressure, audit (cuirass).
PART 870—CARDIOVASCULAR DEVICES			
23. 870.1025	Arrhythmia detector and alarm	29	Detector and alarm arrhythmia.
24. 870.1330	Catheter guide wire		For use with percutaneous transluminal coronary angioplasty catheters (see no. 56).
25. 870.1360	Trace microsphere		
26. 870.1750	External programmable pacemaker pulse generator	34	Generator, pulse, pacemaker, external, programmable.
27. 870.1800	Withdrawal-infusion pump	54	Pump, withdrawal/infusion.
28. 870.3250	Vascular clip	22	Clip, vascular.
29. 870.3260	Vena cava clip	23	Clip, vena cava.
30. 870.3300	Arterial embolization device		
31. 870.3375	Cardiovascular intravascular filter	31	Filter intravascular, cardiovascular.
32. 870.3450	Vascular graft prosthesis of less than 6 millimeters diameter	47, 52	Prosthesis, arterial graft synthetic, and prothesis vascular graft.
33. 870.3460	Vascular graft prosthesis of 6 millimeters and greater diameter.	47, 52	Prosthesis, arterial graft synthetic, and prosthesis, vascular graft.
34. 870.3470	Intracardiac patch or pledget made of polypropylene, polyethylene terephthalate, or polytetrafluoro-ethylene.		
35. 870.3535	Intra-aortic balloon and control system.	10	Balloon, intra-aortic, and control system.
36. 870.3545	Ventricular bypass (assist) device	15	Bypass, ventricular (assist).
37. 870.3600	External Pacemaker pulse generator	33	Generator, pulse, pacemaker, external.
38. 870.3610	Implantable pacemaker pulse generator	35	Generator, pulse, pacemaker, implantable.
39. 870.3620	Pacemaker lead adaptor.		
40. 870.3650	Pacemaker polymeric mesh bag		
41. 870.3670	Pacemaker charger		
42. 870.3680	Cardiovascular permanent or temporary pacemaker electrod	30	Electrode, pacemaker, permanent and temporary.
43. 870.3700	Pacemaker programmers		

Section or FR cite	Classification name of device	Device No. on original list	Former device name, or additional information
44. 870.3710	Pacemaker repair or replacement material		
45. 870.3800	Annuloplasty ring		
46. 870.3850	Carotid sinus nerve stimulator		
47. 870.3925	Replacement heart valve	71	Valve, heart replacement.
48. 870.4320	Cardiopulmonary bypass pulsatile flow generator		
49. 870.4350	Cardiopulmonary bypass oxygenator	44	Oxygenator, cardiopulmonary.
50. 870.4360	Nonroller-type cardiopulmonary bypass blood pump	13	Blood pump, cardiopulmonary bypass, nonroller.
51. 870.4370	Roller-type cardiopulmonary bypass blood pump	14	Blood pump, cardiopulmonary bypass roller type.
52. 870.5200	External cardiac compressor	24, 57	Compressor, external, cardiac powered, and resuscitator, cardiac mechanical.
53. 870.5225	External counter-pulsating device	26	Counter-pulsating device, external.
54. 870.5300	DC-defibrillator (including paddles)	28	Defibrillator, DC-powered (including paddles).
55. 870.5550	External transcutaneous cardiac pacemaker (noninvasive)	45	Pacemaker, cardiac, external trans-cutaneous.
56. ——	Percutaneous transluminal coronary angioplasty (PTCA) balloon dilation catheter.	—	Premarket approval device.
57. ——	Automatic implanted cardioverter defibrillator system		Premarket approval device.

PART 872—DENTAL DEVICES

Section or FR cite	Classification name of device	Device No. on original list	Former device name, or additional information
58. 872.3640	Endosseous implant		

PART 874—EAR, NOSE, AND THROAT DEVICES

Section or FR cite	Classification name of device	Device No. on original list	Former device name, or additional information
59. 874.3620	Ear, nose, and throat synthetic polymer material		
60. 874.3695	Mandibular implant facial prosthesis		
61. 874.3730	Laryngeal prosthesis (Taub design)	49	Prosthesis, laryngeal.
62. 874.3820	Endolymphatic shunt		
63. 874.3850	Endolymphatic shunt tube with valve		
64. 874.3930	Tympanostomy tube with semipermeable membrane		
65. ——	Ear, nose, and throat natural polymer-collagen material		Preamendments device; not yet classified.

PART 876—GASTROENTEROLOGY-UROLOGY DEVICES

Section or FR cite	Classification name of device	Device No. on original list	Former device name, or additional information
66. 876.3350	Penile inflatable implant		
67. 876.5270	Implanted electrical urinary continence device		
68. 876.5540	A-V shunt cannula		Included in blood access device and accessories (876.5540).
69. 876.5630	Peritoneal dialysis system and accessories	46	Peritoneal dialysis system, automatic delivery.
70. 876.5820	Hemodialysis system and accessories, dialysate concentrate, hollow fiber capillary dialyzers, disposable dialyzers, high permeability dialyzers, parallel flow dialyzers, single coil dialyzers, twin coil dialyzers, single needle dialysis set, dialysate delivery systems.	36	Dialysate concentrate added to this list.
71. 876.5870	Sorbent hemoperfusion system	7	Apparatus, hemoperfusion, sorbent.
72. 876.5880	Isolated kidney perfusion and transport system and accessories.		
73. 876.5955	Peritoneo-venous shunt		
74. 46 FR 7566; January 23, 1981.	Urethal sphincter prosthesis	51	Prosthesis, urethra sphincter. Device not known to be in commercial distribution.
75. 46 FR 7566; January 23, 1981.	Urethral replacement	55	Replacement, urethral. Device not known to be in distribution.

PART 878—GENERAL AND PLASTIC SURGERY DEVICES

(The following are class III devices. See 21 U.S.C. 360j(1).)

Section or FR cite	Classification name of device	Device No. on original list	Former device name, or additional information
76. 42 FR 63474 December 16, 1977.	Absorbable surgical sutures	64	Class III transitional device.
77. 42 FR 63474; December 16, 1977.	Nonabsorbable surgical sutures	64	Class III transitional device.
78. 42 FR 63474; December 16, 1977.	Polytetrafluoroethylene (Teflon) injectable		Do.

(The following are proposed classifications discussed in the **Federal Register** of January 19, 1982 (47 FR 2810).)

Section or FR cite	Classification name of device	Device No. on original list	Former device name, or additional information
79. 878.3300	Surgical mesh		
80. 878.3500	Polytetrafluoroethylene with carbon fibers composite implant material.		
81. 878.3530	Inflatable breast prosthesis		
82. 878.3540	Silicone gel-filled breast prosthesis		
83. ——	Implanted mammary prosthesis of composite saline and gel-filled design.		Preamendments device; not yet classified.
84. 878.3610	Esophageal prosthesis	48	Prosthesis, esophagus.
85. 878.3720	Tracheal prosthesis	50	Prosthesis, trachea.
86. 878.4300	Implantable clip		
87. 878.4750	Implantable staple		
88. ——	Maxillofacial prosthesis		ENT facial prosthesis, maxillofacial.

PART 880—GENERAL HOSPITAL AND PERSONAL USE DEVICES

Section or FR cite	Classification name of device	Device No. on original list	Former device name, or additional information
89. 880.5130	Infant radiant warmer	12	Bed, radiant heat.

Section or FR cite	Classification name of device	Device No. on original list	Former device name, or additional information
90. 880.5400	Neonatal incubator	37	Incubator, neonatal ventilator.
91. 880.5410	Neonatal transport incubator		
92. 880.5725	Infusion pump	53	Term "cardiovascular" dropped since not used in classification regulation and devices not marketed as "cardiovascular infusion pumps."
93. ——	Implanted infusion pump		Premarket approval device.

PART 882—NEUROLOGICAL DEVICES

Section or FR cite	Classification name of device	Device No. on original list	Former device name, or additional information
94. 882.5030	Methyl methacrylate for aneurysmorrhaphy		
95. 882.5150	Intravascular occluding catheter	17	Catheter, intravascular occluding.
96. 882.5200	Aneurysm clip	20	Clip aneurysm.
97. 882.5225	Implanted malleable clip		
98. 882.5250	Burr hole cover		
99. 882.5300	Methyl methacrylate for cranioplasty		
100. 882.5320	Preformed alterable cranioplasty plate		
101. 882.5330	Preformed nonalterable cranioplasty plate		
102. 882.5360	Cranioplasty plate fastener		
103. 882.5550	Central nervous system fluid shunt and components	59	Shunt, central nervous system fluid and components.
104. 882.5820	Implanted cerebellar stimulator	60	Stimulator, cerebella implanted.
105. 882.5830	Implanted diaphragmatic/phrenic nerve stimulator	61	Stimulator, diaphragmatic/phrenic nerve, implanted.
106. 882.5840	Implanted intracerebral/subcortical stimulator for pain relief	63	Stimulator, intracerebral/subcortical implanted (pain relief).
107. 882.5850	Implanted spinal cord stimulator for bladder evacuation		
108. 882.5860	Implanted neuromuscular stimulator		
109. 882.5870	Implanted peripheral nerve stimulator for pain relief		
110. 882.5880	Implanted spinal cord stimulator for pain relief		
111. 882.5880	Epidural spinal electrode		Component of implanted spinal cord stimulator for pain relief (No. 110).
112. 882.5900	Preformed craniosynostosis strip		
113. 882.5910	Dura substitute		
114. 882.5950	Artificial embolization device	65	Thromboemboli, intra-vascular (artificial embolization device).
115. ——	Lyophilized human (cadaver) dura mater		Preamendments device; not yet classified.
116. ——	Stabilized epidural spinal electrode		Premarket approval device.
117. ——	Implanted intracranial pressure monitor		Do.
118. ——	Totally implanted spinal cord stimulator for pain relief		Do.

PART 884—OBSTETRICAL AND GYNECOLOGICAL DEVICES

Section or FR cite	Classification name of device	Device No. on original list	Former device name, or additional information
119. 884.5360	Contraceptive intrauterine device (IUD) and introducer	38	Intrauterine contraceptive device (IUD) and introducer.
120. 884.5380	Contraceptive tubal occlusion device (TOD) and introducer	11, 21, 72	Band, tubal occlusion; clip, tubal occlusion; valve, tubal occlusion.

PART 886—OPHTHALMIC DEVICES

Section or FR cite	Classification name of device	Device No. on original list	Former device name, or additional information
121. 886.3300	Absorbable implant (scleral buckling method)		
122. 886.3400	Keratoprosthesis	39	Keratoprosthesis, noncustom.
123. 886.3600	Intraocular lens	40	Lens, intraocular, ophthalmic; class III transitional device.
124. 886.3920	Eye valve implant		

PART 888—ORTHOPEDIC DEVICES

Section or FR cite	Classification name of device	Device No. on original list	Former device name, or additional information
125. 888.3000	Bone cap		
126. 888.3010	Bone fixation cerclage		
127. 888.3020	Intramedullary fixation rod		
128. 888.3025	Passive tendon prosthesis		
129. 888.3027	Polymethylmethacrylate (PMMA) bone cement		Class III transitional device.
130. 888.3030	Single/multiple component metallic bone fixation appliance and accessories.		
131. 888.3040	Smooth or threaded metallic bone fixation fastener		
132. 888.3050	Spinal interlaminal fixation orthosis		
133. 888.3060	Spinal intervertebral body fixation orthosis		
134. 888.3100	Ankle joint metal/composite semiconstrained cemented prosthesis.		
135. 888.3110	Ankle joint metal/polymer semiconstrained cemented prosthesis.		
136. 888.3120	Ankle joint metal/polymer non-constrained cemented prosthesis.		
137. 888.3150	Elbow joint metal/metal or metal/polymer constrained cemented prosthesis.		
138. 888.3160	Elbow joint metal/polymer semi-constrained cemented prosthesis.		
139. 888.3170	Elbow joint radial (hemi-elbow) polymer prosthesis		
140. 888.3180	Elbow joint humeral (hemi-elbow) metallic uncemented prosthesis.		
141. 888.3200	Finger joint metal/metal constrained uncemented prosthesis		
142. 888.3210	Finger joint metal/metal constrained cemented prosthesis		
143. 888.3220	Finger joint metal/polymer constrained cemented prosthesis		
144. 888.3230	Finger joint polymer constrained prosthesis		
145. 888.3300	Hip joint metal constrained cemented or uncemented prosthesis.

160. 888.3510	Knee joint femorotibial metal/polymer constrained cemented prosthesis.		
161. 888.3520	Knee joint femorotibial metal/polymer non-constrained cemented prosthesis.		
162. 888.3530	Knee joint femorotibial metal/polymer semi-constrained cemented prosthesis.		
163. 888.3540	Knee joint patellofemoral polymer/metal semi-constrained cemented prosthesis.		
164. 888.3550	Knee joint patellofemorotibial ploymer/metal/metal constrained cemented prosthesis.		
165. 888.3560	Knee joint patellofemorotibial polymer/metal/polymer semi-constrained cemented prosthesis.		
166. 888.3570	Knee joint femoral (hemi-knee) metallic uncemented prosthesis.		
167. 888.3580	Knee joint patellar (hemi-knee) metallic resurfacing uncemented prosthesis.		
168. 888.3590	Knee joint tribial (hemi-knee) metallic resurfacing uncemented prosthesis.		
169. 888.3640	Shoulder joint metal/metal or metal/polymer constrained cemented prosthesis.		
170. 888.3650	Shoulder joint metal/polymer non-constrained cemented prosthesis.		
171. 888.3660	Shoulder joint metal/polymer semi-constrained cemented prosthesis.		
172. 888.3680	Shoulder joint glenoid (hemi-shoulder) metallic cemented prosthesis.		
173. 888.3690	Shoulder joint humeral (hemi-shoulder) metallic uncemented prosthesis.		
174. 888.3720	Toe joint polymer constrained prosthesis		
175. 888.3730	Toe joint phalangeal (hemi-toe) polymer prosthesis		
176. 888.3750	Wrist joint carpal lunate polymer prosthesis		
177. 888.3760	Wrist joint carpal scaphoid polymer prosthesis		
178. 888.3770	Wrist joint carpal trapezium polymer prosthesis		
179. 888.3780	Wrist joint polymer constrained prosthesis		
180. 888.3790	Wrist joint metal constrained cemented prosthesis		
181. 888.3800	Wrist joint metal/polymer semi-constrained cemented prosthesis.		
182. 888.3810	Wrist joint ulnar (hemi-wrist) polymer prosthesis		

Interested persons may submit to the Dockets Management Branch (address above) written comments on the list. Comments will be considered in determining if further changes to the "Advisory List of Critical Devices—1988" are warranted. Two copies of any comments should be submitted, except that individuals may submit one copy. Comments are to be identified with the docket number found in the heading of this document. The list, references, and comments may be seen in the office above between 9 a.m. and 4 p.m., Monday through Friday.

Dated: March 11, 1988.

John M. Taylor,

Associate Commissioner for Regulatory Affairs.

LIST OF PUBLIC LAWS

Last List March 11, 1988

This is a continuing list of public bills from the current session of Congress which have become Federal laws. It may be used in conjunction with "P L U S" (Public Laws Update Service) on 523–6641. The text of laws is not published in the Federal Register but may be ordered in individual pamphlet form (referred to as "slip laws") from the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402 (phone 202–275–3030).

S. 1447/Pub. L. 100–258

To designate Morgan and Lawrence Counties in Alabama as a single metropolitan statistical area. (Mar. 14, 1988; 102 Stat. 27; 1 page) Price: $1.00

Herbert Hoover

Richard Nixon

Gerald R. Ford

Jimmy Carter

Ronald Reagan

Public Papers of the Presidents of the United States

Annual volumes containing the public messages and statements, news conferences, and other selected papers released by the White House.

FEDERAL REGISTER Published daily, Monday through Friday, (not published on Saturdays, Sundays, or on official holidays), by the Office of the Federal Register, National Archives and Records Administration, Washington, DC 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.

The Federal Register provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive orders and Federal agency documents having general applicability and legal effect, documents required to be published by act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The Federal Register will be furnished by mail to subscribers for $340.00 per year, or $170.00 for 6 months in paper form, or $188.00 per year, or $94.00 for six months in microfiche form, payable in advance. The charge for individual copies is $1.50 for each issue, or $1.50 for each group of pages as actually bound. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402, or charge to your GPO Deposit Account or VISA or Mastercard.

There are no restrictions on the republication of material appearing in the Federal Register.

How To Cite This Publication: Use the volume number and the page number. Example: 52 FR 12345.

THE FEDERAL REGISTER
WHAT IT IS AND HOW TO USE IT

FOR: Any person who uses the Federal Register and Code of Federal Regulations.

WHO: The Office of the Federal Register.

WHAT: Free public briefings (approximately 3 hours) to present:

1. The regulatory process, with a focus on the Federal Register system and the public's role in the development of regulations.
2. The relationship between the Federal Register and Code of Federal Regulations.
3. The important elements of typical Federal Register documents.
4. An introduction to the finding aids of the FR/CFR system.

WHY: To provide the public with access to information necessary to research Federal agency regulations which directly affect them. There will be no discussion of specific agency regulations.

TAMPA, FL

WHEN: March 24; at 9:30 a.m.
WHERE: Auditorium
Tampa-Hillsborough County Public Library

Title 3—

The President

Executive Order 12630 of March 15, 1988

Governmental Actions and Interference With Constitutionally Protected Property Rights

By the authority vested in me as President by the Constitution and laws of the United States of America, and in order to ensure that government actions are undertaken on a well-reasoned basis with due regard for fiscal accountability, for the financial impact of the obligations imposed on the Federal government by the Just Compensation Clause of the Fifth Amendment, and for the Constitution, it is hereby ordered as follows:

Section 1. *Purpose.* (a) The Fifth Amendment of the United States Constitution provides that private property shall not be taken for public use without just compensation. Government historically has used the formal exercise of the power of eminent domain, which provides orderly processes for paying just compensation, to acquire private property for public use. Recent Supreme Court decisions, however, in reaffirming the fundamental protection of private property rights provided by the Fifth Amendment and in assessing the nature of governmental actions that have an impact on constitutionally protected property rights, have also reaffirmed that governmental actions that do not formally invoke the condemnation power, including regulations, may result in a taking for which just compensation is required.

(b) Responsible fiscal management and fundamental principles of good government require that government decision-makers evaluate carefully the effect of their administrative, regulatory, and legislative actions on constitutionally protected property rights. Executive departments and agencies should review their actions carefully to prevent unnecessary takings and should account in decision-making for those takings that are necessitated by statutory mandate.

(c) The purpose of this Order is to assist Federal departments and agencies in undertaking such reviews and in proposing, planning, and implementing actions with due regard for the constitutional protections provided by the Fifth Amendment and to reduce the risk of undue or inadvertent burdens on the public fisc resulting from lawful governmental action. In furtherance of the purpose of this Order, the Attorney General shall, consistent with the principles stated herein and in consultation with the Executive departments and agencies, promulgate Guidelines for the Evaluation of Risk and Avoidance of Unanticipated Takings to which each Executive department or agency shall refer in making the evaluations required by this Order or in otherwise taking any action that is the subject of this Order. The Guidelines shall be promulgated no later than May 1, 1988, and shall be disseminated to all units of each Executive department and agency no later than July 1, 1988. The Attorney General shall, as necessary, update these guidelines to reflect fundamental changes in takings law occurring as a result of Supreme Court decisions.

Sec. 2. *Definitions.* For the purpose of this Order: (a) "Policies that have takings implications" refers to Federal regulations, proposed Federal regulations, proposed Federal legislation, comments on proposed Federal legislation, or other Federal policy statements that, if implemented or enacted, could effect a taking, such as rules and regulations that propose or implement licensing, permitting, or other condition requirements or limitations on private property use, or that require dedications or exactions from owners of private property. "Policies that have takings implications" does not include:

(1) Actions abolishing regulations, discontinuing governmental programs, or modifying regulations in a manner that lessens interference with the use of private property;

(2) Actions taken with respect to properties held in trust by the United States or in preparation for or during treaty negotiations with foreign nations;

(3) Law enforcement actions involving seizure, for violations of law, of property for forfeiture or as evidence in criminal proceedings;

(4) Studies or similar efforts or planning activities;

(5) Communications between Federal agencies or departments and State or local land-use planning agencies regarding planned or proposed State or local actions regulating private property regardless of whether such communications are initiated by a Federal agency or department or are undertaken in response to an invitation by the State or local authority;

(6) The placement of military facilities or military activities involving the use of Federal property alone; or

(7) Any military or foreign affairs functions (including procurement functions thereunder) but not including the U.S. Army Corps of Engineers civil works program.

(b) Private property refers to all property protected by the Just Compensation Clause of the Fifth Amendment.

(c) "Actions" refers to proposed Federal regulations, proposed Federal legislation, comments on proposed Federal legislation, applications of Federal regulations to specific property, or Federal governmental actions physically invading or occupying private property, or other policy statements or actions related to Federal regulation or direct physical invasion or occupancy, but does not include:

(1) Actions in which the power of eminent domain is formally exercised;

(2) Actions taken with respect to properties held in trust by the United States or in preparation for or during treaty negotiations with foreign nations;

(3) Law enforcement actions involving seizure, for violations of law, of property for forfeiture or as evidence in criminal proceedings;

(4) Studies or similar efforts or planning activities;

(5) Communications between Federal agencies or departments and State or local land-use planning agencies regarding planned or proposed State or local actions regulating private property regardless of whether such communications are initiated by a Federal agency or department or are undertaken in response to an invitation by the State or local authority;

(6) The placement of military facilities or military activities involving the use of Federal property alone; or

(7) Any military or foreign affairs functions (including procurement functions thereunder), but not including the U.S. Army Corps of Engineers civil works program.

Sec. 3. *General Principles.* In formulating or implementing policies that have takings implications, each Executive department and agency shall be guided by the following general principles:

(a) Governmental officials should be sensitive to, anticipate, and account for, the obligations imposed by the Just Compensation Clause of the Fifth Amendment in planning and carrying out governmental actions so that they do not result in the imposition of unanticipated or undue additional burdens on the public fisc.

(b) Actions undertaken by governmental officials that result in a physical invasion or occupancy of private property, and regulations imposed on private property that substantially affect its value or use, may constitute a taking of property. Further, governmental action may amount to a taking even though the action results in less than a complete deprivation of all use or value, or of all separate and distinct interests in the same private property and even if the action constituting a taking is temporary in nature.

(c) Government officials whose actions are taken specifically for purposes of protecting public health and safety are ordinarily given broader latitude by courts before their actions are considered to be takings. However, the mere assertion of a public health and safety purpose is insufficient to avoid a taking. Actions to which this Order applies asserted to be for the protection of public health and safety, therefore, should be undertaken only in response to real and substantial threats to public health and safety, be designed to advance significantly the health and safety purpose, and be no greater than is necessary to achieve the health and safety purpose.

(d) While normal governmental processes do not ordinarily effect takings, undue delays in decision-making during which private property use if interfered with carry a risk of being held to be takings. Additionally, a delay in processing may increase significantly the size of compensation due if a taking is later found to have occurred.

(e) The Just Compensation Clause is self-actuating, requiring that compensation be paid whenever governmental action results in a taking of private property regardless of whether the underlying authority for the action contemplated a taking or authorized the payment of compensation. Accordingly, governmental actions that may have a significant impact on the use or value of private property should be scrutinized to avoid undue or unplanned burdens on the public fisc.

Sec. 4. *Department and Agency Action.* In addition to the fundamental principles set forth in Section 3, Executive departments and agencies shall adhere, to the extent permitted by law, to the following criteria when implementing policies that have takings implications:

(a) When an Executive department or agency requires a private party to obtain a permit in order to undertake a specific use of, or action with respect to, private property, any conditions imposed on the granting of a permit shall:

(1) Serve the same purpose that would have been served by a prohibition of the use or action; and

(2) Substantially advance that purpose.

(b) When a proposed action would place a restriction on a use of private property, the restriction imposed on the use shall not be disproportionate to the extent to which the use contributes to the overall problem that the restriction is imposed to redress.

(c) When a proposed action involves a permitting process or any other decision-making process that will interfere with, or otherwise prohibit, the use of private property pending the completion of the process, the duration of the process shall be kept to the minimum necessary.

(d) Before undertaking any proposed action regulating private property use for the protection of public health or safety, the Executive department or agency involved shall, in internal deliberative documents and any submissions to the Director of the Office of Management and Budget that are required:

(1) Identify clearly, with as much specificity as possible, the public health or safety risk created by the private property use that is the subject of the proposed action;

(2) Establish that such proposed action substantially advances the purpose of protecting public health and safety against the specifically identified risk;

(3) Establish to the extent possible that the restrictions imposed on the private property are not disproportionate to the extent to which the use contributes to the overall risk; and

(4) Estimate, to the extent possible, the potential cost to the government in the event that a court later determines that the action constituted a taking.

In instances in which there is an immediate threat to health and safety that constitutes an emergency requiring immediate response, this analysis may be done upon completion of the emergency action.

Sec. 5. *Executive Department and Agency Implementation.* (a) The head of each Executive department and agency shall designate an official to be responsible for ensuring compliance with this Order with respect to the actions of that department or agency.

(b) Executive departments and agencies shall, to the extent permitted by law, identify the takings implications of proposed regulatory actions and address the merits of those actions in light of the identified takings implications, if any, in all required submissions made to the Office of Management and Budget. Significant takings implications should also be identified and discussed in notices of proposed rule-making and messages transmitting legislative proposals to the Congress, stating the departments' and agencies' conclusions on the takings issues.

(c) Executive departments and agencies shall identify each existing Federal rule and regulation against which a takings award has been made or against which a takings claim is pending including the amount of each claim or award. A "takings" award has been made or a "takings" claim pending if the award was made, or the pending claim brought, pursuant to the Just Compensation Clause of the Fifth Amendment. An itemized compilation of all such awards made in Fiscal Years 1985, 1986, and 1987 and all such pending claims shall be submitted to the Director, Office of Management and Budget, on or before May 16, 1988.

(d) Each Executive department and agency shall submit annually to the Director, Office of Management and Budget, and to the Attorney General an itemized compilation of all awards of just compensation entered against the United States for takings, including awards of interest as well as monies paid pursuant to the provisions of the Uniform Relocation Assistance and Real Property Acquisition Policies Act of 1970, 42 U.S.C. 4601.

(e)(1) The Director, Office of Management and Budget, and the Attorney General shall each, to the extent permitted by law, take action to ensure that the policies of the Executive departments and agencies are consistent with the principles, criteria, and requirements stated in Sections 1 through 5 of this Order, and the Office of Management and Budget shall take action to ensure that all takings awards levied against agencies are properly accounted for in agency budget submissions.

(2) In addition to the guidelines required by Section 1 of this Order, the Attorney General shall, in consultation with each Executive department and agency to which this Order applies, promulgate such supplemental guidelines as may be appropriate to the specific obligations of that department or agency.

Sec. 6. *Judicial Review.* This Order is intended only to improve the internal management of the Executive branch and is not intended to create any right or benefit, substantive or procedural, enforceable at law by a party against the United States, its agencies, its officers, or any person.

Ronald Reagan

Presidential Documents

Proclamation 5776 of March 16, 1988

Freedom of Information Day, 1988

By the President of the United States of America

A Proclamation

Freedom of Information Day reminds us of some of our most important principles. "We the People," as the framers of the Constitution called us in the Preamble, govern ourselves through representative government. All of us, of course, have the right to do so. We are best able to do so when every citizen is informed on matters of public importance and can therefore take full part in civic affairs and in the exercise of fundamental rights. We can all be grateful indeed to the Founders who through the Constitution—including the Bill of Rights—provided for freedoms for all Americans that make a well-informed electorate possible.

No one understood these principles more thoroughly than James Madison, our fourth President, whose birthday, March 16, is the occasion for Freedom of Information Day. Long before he became President, he served as chief recorder of the Constitutional Convention; he was perhaps the most influential architect of our charter of liberty and limited government. Throughout life he championed conditions that could foster responsive government, such as a free press and a vigorous flow of information among the public, tempered with the recognition that for legitimate government to function, some matters must remain outside the public domain. He maintained this balance eloquently when he helped draft the Bill of Rights, and especially the First Amendment, while restricting access to most of the documents that form the Constitutional record.

Two centuries later, Madison's ideals continue to strengthen our Nation. We Americans cherish our freedoms and use them; we thrive on the benefits of free exchanges with those who represent us in government and discharge the public trust. This interaction requires forthrightness in government and public access to most government information. Indeed, the responsible flow of such information to the public is entirely compatible with the necessary and proper protection of vital public interests such as national security, privacy, and effective law enforcement.

On the anniversary of President Madison's birth, let us celebrate our history and heritage of freedom of information by remembering and revering the life and example of this wise and generous patriot and lover of liberty.

The Congress, by Senate Joint Resolution 126, has designated March 16, 1988, as "Freedom of Information Day" and authorized and requested the President to issue a proclamation in observance of this event.

NOW, THEREFORE, I, RONALD REAGAN, President of the United States of America, do hereby proclaim March 16, 1988, as Freedom of Information Day, and I call upon the people of the United States to observe this day with appropriate ceremonies and activities.

IN WITNESS WHEREOF, I have hereunto set my hand this sixteenth day of March, in the year of our Lord nineteen hundred and eighty-eight, and of the Independence of the United States of America the two hundred and twelfth.

Ronald Reagan

Rules and Regulations

Federal Register
Vol. 53, No. 53
Friday, March 18, 1988

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.
The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each week.

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

7 CFR Part 907

[Navel Orange Reg. 677]

Navel Oranges Grown in Arizona and Designated Part of California; Limitation of Handling

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Final rule.

SUMMARY: Regulation 677 establishes the quantity of California-Arizona navel oranges that may be shipped to market during the period March 18 through March 24, 1988. Such action is needed to balance the supply of fresh navel oranges with the demand for such oranges during the period specified due to the marketing situation confronting the orange industry.

DATES: Regulation 677 (§ 907.977) is effective for the period March 18 through March 24, 1988.

FOR FURTHER INFORMATION CONTACT: Raymond C. Martin, Section Head, Volume Control Programs, Marketing Order Administration Branch, F&V, AMS, USDA, Room 2528-S, P.O. Box 96456, Washington, DC. 20090-6456; telephone: (202) 447-5120.

SUPPLEMENTARY INFORMATION: This final rule is issued under Marketing Order 907 [7 CFR Part 907], as amended, regulating the handling of navel oranges grown in Arizona and designated part of California. This order is effective under the Agricultural Marketing Agreement Act of 1937, as amended, hereinafter referred to as the Act.

This final rule has been reviewed under Executive Order 12291 and Departmental Regulation 1512-1 and has been determined to be a "non-major" rule under criteria contained therein.

Pursuant to requirements set forth in the Regulatory Flexibility Act (RFA), the Administrator of the Agricultural Marketing Service (AMS) has considered the economic impact of the use of volume regulations on small entities as well as larger ones.

The purpose of the RFA is to fit regulatory actions to the scale of business subject to such actions in order that small businesses will not be unduly or disproportionately burdened. Marketing orders issued pursuant to the Act, and rules issued thereunder, are unique in that they are brought about through group action of essentially small entities acting on their own behalf. Thus, both statutes have small entity orientation and compatibility.

There are approximately 123 handlers of California-Arizona navel oranges subject to regulation under the navel orange marketing order, and approximately 4,065 producers in California and Arizona. Small agricultural producers have been defined by the Small Business Administration [13 CFR 121.2] as those having annual gross revenues for the last three years of less than $500,000, and small agricultural service firms are defined as those whose gross annual receipts are less than $3,500,000. The majority of handlers and producers of California-Arizona navel oranges may be classified as small entities.

This action is consistent with the marketing policy for 1987-88 adopted by the Navel Orange Administrative Committee (Committee). The Committee met publicly on March 15, 1988, in Los Angeles, California, to consider the current and prospective conditions of supply and demand and recommended, by a six to four vote, a quantity of navel oranges deemed advisable to be handled during the specified week. The Committee reports that the demand for navel oranges is steady.

Based on consideration of supply and market conditions, and the evaluation of alternatives to the implementation of prorate regulations, the Administrator of the AMS has determined that this final rule will not have a significant economic impact on a substantial number of small entities.

Pursuant to 5 U.S.C. 553, it is further found that it is impracticable, unnecessary, and contrary to the public interest to give preliminary notice and engage in further public procedure with respect to this action and that good cause exists for not postponing the effective date of this action until 30 days after publication in the **Federal Register** because of insufficient time between the date when information became available upon which this regulation is based and the effective date necessary to effectuate the declared policy of the Act. Interested persons were given an opportunity to submit information and views on the regulation at an open meeting. To effectuate the declared purposes of the Act, it is necessary to make this regulatory provision effective as specified, and handlers have been apprised of such provision and the effective time.

List of Subjects in 7 CFR Part 907

Arizona, California, Marketing agreements and orders, Navels, Oranges.

For the reasons set forth in the preamble, 7 CFR Part 907 is amended as follows:

PART 907—NAVEL ORANGES GROWN IN ARIZONA AND DESIGNATED PART OF CALIFORNIA

1. The authority citation for 7 CFR Part 907 continues to read as follows:

Authority: secs. 1-19, 48 Stat. 31, as amended; 7 U.S.C. 601-674.

2. Section 907.977 is added to read as follows: [*This section will not appear in the Code of Federal Regulations.*]

§ 907.977 Navel Orange Regulation 677.

The quantity of navel oranges grown in California and Arizona which may be handled during the period March 18, 1988, through March 24, 1988, are established as follows:

(a) District 1: 1,700,000 cartons;
(b) District 2: 300,000 cartons;
(c) District 3: Unlimited cartons;
(d) District 4: Unlimited cartons;

Dated: March 16, 1988.

Eric M. Forman,

Deputy Director, Fruit and Vegetable Division, Agricultural Marketing Service.

[FR Doc. 88-6114 Filed 3-17-88; 8:45 am]

BILLING CODE 3410-02-M

7 CFR Part 910

[Lemon Reg. 605]

Lemons Grown in California and Arizona; Limitation of Handling

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Final rule.

SUMMARY: Regulation 605 establishes the quantity of fresh California-Arizona lemons that may be shipped to market at 325,000 cartons during the period March 20 through March 26, 1988. Such action is needed to balance the supply of fresh lemons with market demand for the period specified, due to the marketing situation confronting the lemon industry.

DATES: Regulation 605 (§ 910.905) is effective for the period March 20 through March 26, 1988.

FOR FURTHER INFORMATION CONTACT: Raymond C. Martin, Section Head, Volume Control Programs, Marketing Order Administration Branch, F&V, AMS, USDA, Room 2523, South Building, P.O. Box 96456, Washington, D.C. 20090-6456; telephone: (202) 447-5697.

SUPPLEMENTARY INFORMATION: This final rule has been reviewed under Executive Order 12291 and Departmental Regulation 1512-1 and has been determined to be a "non-major" rule under criteria contained therein.

Pursuant to requirements set forth in the Regulatory Flexibility Act (RFA), the Administrator of the Agricultural Marketing Service has determined that this action will not have a significant economic impact on a substantial number of small entities.

The purpose of the RFA is to fit regulatory action to the scale of business subject to such actions in order that small businesses will not be unduly or disproportionately burdened. Marketing orders issued pursuant to the Agricultural Marketing Agreement Act, and rules issued thereunder, are unique in that they are brought about through group action of essentially small entities acting on their own behalf. Thus, both statutes have small entity orientation and compatibility.

This regulation is issued under Marketing Order No. 910, as amended [7 CFR Part 910] regulating the handling of lemons grown in California and Arizona. The order is effective under the Agricultural Marketing Agreement Act (the "Act," 7 U.S.C. 601-674), as amended. This action is based upon the recommendation and information submitted by the Lemon Administrative Committee and upon other available information. It is found that this action will tend to effectuate the declared policy of the Act.

This regulation is consistent with the marketing policy for 1978-88. The committee met publicly on March 15, 1988, in Los Angeles, California, to consider the current and prospective conditions of supply and demand and recommended, by a 11-2 vote, a quantity of lemons deemed advisable to be handled during the specified week. The committee reports that the market for lemons is good.

Pursuant to 5 U.S.C. 553, it is further found that it is impracticable, unnecessary, and contrary to the public interest to give preliminary notice and engage in further public procedure with respect to this action and that good cause exists for not postponing the effective date of this action until 30 days after publication in the Federal Register because of insufficient time between the date when information became available upon which this regulation is based and the effective date necessary to effectuate the declared purposes of the Act. Interested persons were given an opportunity to submit information and views on the regulation at an open meeting. It is necessary, in order to effectuate the declared purposes of the Act, to make these regulatory provisions effective as specified, and handlers have been apprised of such provisions and the effective time.

List of Subjects in 7 CFR Part 910

Marketing agreements and orders, California, Arizona, Lemons.

For the reasons set forth in the preamble, 7 CFR Part 910 is amended as follows:

PART 910—LEMONS GROWN IN CALIFORNIA AND ARIZONA

1. The authority citation for 7 CFR Part 910 continues to read as follows:

Authority: Secs. 1-19, 48 Stat. 31, as amended; 7 U.S.C. 601-674.

2. Section 910.905 is revised to read as follows: [*This section will not appear in the Code of Federal Regulations.*]

§ 910.905 Lemon Regulation 605.

The quantity of lemons grown in California and Arizona which may be handled during the period March 20, 1988, through March 26, 1988, is established at 325,000 cartons.

Dated: March 16, 1988.

Eric M. Forman,

Deputy Director, Fruit and Vegetable Division, Agricultural Marketing Service

BILLING CODE 3410-02-M

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Parts 21 and 25

[Docket No. NM-27; Special Condition No. 25-ANM-17]

Special Conditions; British Aerospace BAe ATP Airplane

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final special conditions.

SUMMARY: This special condition is issued pursuant to §§ 21.16 and 21.101 of the Federal Aviation Regulations (FAR) for the British Aerospace BAe ATP airplane with PW124 series engines. Control of these engines is provided electronically with mechanical backup. A special condition is necessary because airplanes with these series engines have novel or unusual design features associated with the installation of the full authority electronic engine control system for which the applicable airworthiness regulations do not contain adequate or appropriate safety standards for protection from the effects of lightning. This special condition contains the safety standards which the Administrator finds necessary, because of these added design features, to ensure that the functions of these systems, which are critical, are protected.

EFFECTIVE DATE: March 9, 1988.

FOR FURTHER INFORMATION CONTACT: Gene Vandermolen, Transport Standards Staff, ANM-110, FAA, Northwest Mountain Region, 17900 Pacific Highway South, C-68966, Seattle, Washington, 98168, telephone (206) 431-2114.

SUPPLEMENTARY INFORMATION:

Background

On March 29, 1982, British Aerospace made an application to the Federal Aviation Administration for an amended type certificate for the advanced turboprop (ATP) airplane. Subsequently, the manufacturer determined that a new U.S. type certificate was desirable and changed his application to reflect this.

BAe ATP Design Features

General

The BAe ATP airplane is a stretched variant of the British Aerospace HS 748 (formerly Hawker Siddeley HS 748). It is 17.5 feet longer and carries 68 passengers. Other differences from the HS 748 include: Type III overwing emergency exits, new doors, Pratt and

Whitney (Canada) PW124A engines, six bladed propellers, swept fin, improved wing center section structure, new wing tips, main landing gear, nose gear, electrical generating system and hydraulic pumps, introduction of a bleed air environmental control system (ECS), weight increase to 50,760 pounds, smaller windows, electronic flight instrument systems and electronic engine controls.

Lightning Protection

The regulations incorporated by reference in the HS 748 type certificate include standards for protection from ignition of fuel vapor (§ 25.954) and from damage to the structure of the airplane by lightning (§ 25.581). These standards do not, however, provide the level of safety for the electronic engine control system that is inherently provided by traditional designs which utilize mechanical means to connect the engines to the flight deck.

The BAe ATP with PW124 engines is being designed with the propulsion systems using electrical interfaces for critical functions such as crew inputs to the engines. The system also provides mechanical manual reversion. The electrical part of these systems can be susceptible to disruption to both the command/response signals and the operational mode logic as a result of direct lightning strike causing electrical or magnetic interference.

Discussion

The following "threat definition" is proposed as a basis to use in demonstrating compliance with the lightning protection special condition. It is based on SAE report AE4L-87-3.

The lightning current waveforms (Components A, D and H) defined below, along with the voltage waveforms in JAR AMC-S5 or Advisory Circular (AC) 20-53A, will provide a consistent and reasonable standard which is acceptable for use in evaluating the effects of lightning on the airplane. These waveforms depict threats that are external to the airplane. How these threats affect the airplane and its systems depend upon their installation configuration, materials, shielding, airplane geometry, etc. Therefore, tests (including tests on the completed airplane or an adequate simulation) and/or verified analysis need to be conducted in order to obtain the resultant internal threat to the installed systems. The propulsion control systems may then be evaluated with this internal threat in order to determine their susceptibility to upset and malfunction.

To evaluate the induced effects to these systems, three considerations are required:

1. *First Return Stroke:* (Severe Strike—Component A, or Restrike—Component D). This external threat needs to be evaluated to obtain the resultant internal threat and to verify that the level is sufficiently below the equipment "hardness" level; then

2. *Multiple Stroke Flash:* (½ Component D) A lightning strike is often composed of a number of successive strokes, referred to as a multiple-stroke. Although multiple-strokes are not necessarily a salient factor in a damage assessment, they can be the primary factor in a system upset analysis. Multiple strokes can induce a sequence of transients over an extended period of time. While a single event upset of input/output signals may not affect system performance, multiple signal upsets over an extended period of time (2 seconds) may affect the systems under consideration. Repetitive pulse testing and/or analysis needs to be carried out in response to the multiple stroke environment to demonstrate that the system response meets the safety objective. This external multiple stroke environment consists of 24 pulses and is described as a single Component A followed by 23 randomly spaced restrikes of ½ magnitude of component D (Peak Amplitude of 50,000 amps), all within 2 seconds. An analysis or test needs to be accomplished in order to obtain the resultant internal threat environment for the system under evaluation, and,

3. *Multiple Burst:* (Component H) In-flight data-gathering projects have shown bursts of multiple, low amplitude, fast rates of rise, short duration pulses accompanying the airplane lightning strike process. While insufficient energy exists in these pulses to cause direct (physical damage) effects, it is possible that indirect effects resulting from this environment may cause upset to some digital processing systems.

The representation of this interference environment is a repetition of low amplitude, high peak rate of rise, double exponential pulses which represent the multiple bursts of current pulses observed in these flight data gathering projects. This component is intended for an analytical (or test) assessment of functional upset of the system. Again, it is required that this component be translated into an internal environmental threat in order to be used. This "Multiple Burst" consists of 24 random sets of 20 strokes within a period of 2 seconds. Each set of 20 strokes is made up of 20 "Multiple Burst" waveforms randomly distributed within a period of one millisecond. The individual "Multiple Burst" waveform is defined below.

The following current waveforms constitute the "Severe Strike" (Component A), "Restrike" (Component D), "Multiple Stroke" (½ Component D), and the "Multiple Burst" (Component H). These components are defined by the following double exponential polynominal equations:

$i(t)=I_0(e^{-at}-e^{-bt})$

where:

t = time in seconds,

i = current in amperes, and

	Severe strike (component A)	Restrike (component D)	Multiple stroke (½ component D)	Multiple burst (component H)
I_0, amp	218,810	109,405	54,703	10,572
a, sec^{-1}	11,354	22,708	22,708	187,191
b, sec^{-1}	647,265	1,294,530	1,294,530	19,105,100
These equations produce the following characteristics:				
i_{peak}	200 KA	100 KA	50 KA	10 KA
and				
$(di/dt)_{max}$ (amp/sec)	1.4×10^{11} t=0+sec	1.4×10^{11} t=0+sec	0.7×10^{11} t=0+sec	2.0×10^{11} t=0+sec
di/dt, (amp/sec)	1.0×10^{11} t=.5 us	1.0×10^{11} t=.25 us	0.5×10^{11} t=.25 us	
Action integral (amp^2 sec)	2.0×10^{6}	0.25×10^{6}	$.0625\times10^{6}$	

Discussion of Comments

Notice of proposed special conditions No. SC-88-1-NM for the British Aerospace BAe ATP airplane with PW124 series engines was published in the **Federal Register** on February 3, 1988 (53 FR 3040). The only comments received were from the applicant. These comments pointed out errors in the general airplane description, and a typographical error in the value of a constant in the description of the double exponential equation for component D. Corrections have been made accordingly.

Type Certification Basis

The United Kingdom (UK) type certification basis for this airplane is Joint Airworthiness Requirements (JAR) 25. Based on the provisions of 14 CFR 21.17 and the Bilateral Airworthiness Agreement between the U.S. and the UK, BAe, through CAA-UK, will show compliance with Part 25 of the FAR, as amended by Amendments 25-1 through 25-54, and Amendment 25-62, including any exceptions and exemptions which are identified in the Type Certificate Data Sheet.

Special conditions may be issued and amended, as necessary, as a part of the type certification basis if the Administrator finds that the airworthiness standards designated in accordance with § 21.101(a) do not contain adequate or appropriate safety standards because of novel or unusual design features of an airplane. Special conditions, as appropriate, are issued in accordance with § 11.49 after public notice as required by §§ 11.28 and 11.29(b) and may become part of the type certification basis in accordance with § 21.101.

As the intended type certification date for the first BAe ATP airplane to incorporate the PW124 series engines is March 29, 1988, which is a date earlier than the effective date would be under standard practice April 18, 1988, the FAA finds that good cause exists to make this special condition effective upon publication.

Conclusion

This action affects only certain unusual or novel design features on one model series of airplanes. It is not a rule of general applicability and affects only the manufacturer who applied to the FAA for approval of these features on the airplane.

List of Subjects in 14 CFR Parts 21 and 25

Air transportation, Aircraft, Aviation safety, Safety.

The Special Condition

Accordingly, pursuant to the authority delegated to me by the Administrator, the following special condition is issued for the British Aerospace BAe ATP airplanes with PW124 series engines.

1. The authority citation for this special condition reads as follows:

Authority: 49 U.S.C. 1344, 1348(c), 1352, 1354(a), 1355, 1421 through 1431, 1502, 1651(b)(2), 42 U.S.C. 1857f-10, 4321 et seq.; E.O. 11514; 49 U.S.C. 106(g) (Revised Pub. L. 97-449, January 12, 1983).

2. *Lightning Protection.* Each electronic propulsion control system, whose failure to function properly would prevent the continued safe flight and landing of the airplane, must be designed and installed to ensure that its operation and operational capabilities are not affected when the airplane is exposed to lightning.

Issued in Seattle, Washington, on March 9, 1988.

Frederick M. Isaac,

Acting Director, Northwest Mountain Region.

[FR Doc. 88-5910 Filed 3-17-88; 8:45 am]

BILLING CODE 4910-13-M

---

14 CFR Part 39

[Docket No. 87-NM-156-AD; Amdt. 39-5881]

Airworthiness Directives; Boeing Model 737 Series Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final Rule.

SUMMARY: This amendment adopts a new airworthiness directive (AD), applicable to Boeing Model 737 series airplanes, which requires installation of brake metering valve tire burst guards in the main landing gear wheel wells. This amendment is prompted by reports of two airplanes in production found without the left and right main landing gear brake metering valve tire burst guards installed. This condition, if not corrected, could lead to loss of hydraulic systems A and B, brakes, and nose wheel steering.

DATES: Effective May 1, 1988.

ADDRESSES: The applicable service information may be obtained from the Boeing Commercial Airplane Company, P.O. Box 3707, Seattle, Washington 98124. This information may be examined at the FAA, Northwest Mountain Region, 17900 Pacific Highway South, Seattle, Washington, or the Seattle Aircraft Certification Office, 9010 East Marginal Way South, Seattle, Washington.

FOR FURTHER INFORMATION CONTACT: Mr. Robert C. McCracken, Systems and Equipment Branch, ANM-130S; telephone (206) 431-1947. Mailing address: FAA, Northwest Mountain Region, 17900 Pacific Highway South, C-68966, Seattle, Washington 98168.

SUPPLEMENTARY INFORMATION: A proposal to amend Part 39 of the Federal Aviation Regulations to include an airworthiness directive, which requires installation of brake metering valve tire burst guards in the main landing gear wheel wells of Boeing Model 737 series airplanes, was published in the **Federal Register** on December 14, 1987 (52 FR 47400).

Interested persons have been afforded an opportunity to participate in the making of this amendment. Due consideration has been given to the single comment received.

The Air Transport Association (ATA) of America agreed with the proposal in stating that its one member affected by the proposal planned to accomplish the proposed modification within the compliance period.

After a careful review of the available data, including the comment noted above, the FAA has determined that air safety and the public interest require the adoption of the rule as proposed.

It is estimated that 10 airplanes of U.S. registry will be affected by this AD, that it will take approximately 6 manhours per airplane to accomplish the required actions, and that the average labor cost will be $40 per manhour. Based on these figures, the total cost impact of this AD on U.S. operators is estimated to be $2,400.

For the reasons discussed above, the FAA has determined that this regulation is not considered major under Executive Order 12291 or significant under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and it is further certified under the criteria of the Regulatory Flexibility Act that this rule will not have a significant economic impact, positive or negative, on a substantial number of small entities because few, if any, Boeing Model 737 airplanes are operated by small entities. A final evaluation has been prepared for this regulation and has been placed in the regulatory docket.

List of Subjects in 14 CFR Part 39

Aviation safety, Aircraft.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration amends § 39.13 of Part 39 of the Federal Aviation Regulations (14 CFR 39.13) as follows:

1. The authority citation for Part 39 continues to read as follows:

Authority: 49 U.S.C. 1354(a), 1421 and 1423; 49 U.S.C. 106(g) (Revised Pub. L. 97-449, January 12, 1983); and 14 CFR 11.89.

2. By adding the following new airworthiness directive:

Boeing: Applies to Model 737 series airplanes, as listed in Boeing Service Bulletin 737-32-1202, dated August 27, 1987, certificated in any category. Compliance required within the next six months after the effective date of this AD, unless previously accomplished.

To prevent damage to the hydraulic systems and loss of brakes and nose wheel steering, accomplish the following:

A. Install left and right main landing gear brake metering valve tire burst guards in accordance with Boeing Service Bulletin 737-32-1202, dated August 27, 1987, or later FAA-approved revision.

B. An alternate means of compliance or adjustment of the compliance time, which provides an acceptable level of safety and which has the concurrence of an FAA Principal Maintenance Inspector, may be used when approved by the Manager, Seattle Aircraft Certification Office, FAA, Northwest Mountain Region.

C. Special flight permits may be issued in accordance with FAR 21.197 and 21.199 to operate airplanes to a base for the accomplishment of inspections and/or modifications required by this AD.

All persons affected by this directive who have not already received the appropriate service documents from the manufacturer may obtain copies upon request to the Boeing Commercial Airplane Company, P.O. Box 3707, Seattle, Washington 98124. These documents may be examined at the FAA, Northwest Mountain Region, 17900 Pacific Highway South, Seattle, Washington, or at the Seattle Aircraft Certification Office, 9010 East Marginal Way South, Seattle, Washington.

This amendment becomes effective May 1, 1988.

Issued in Seattle, Washington, on March 11, 1988.

Frederick M. Isaac,

Acting Director, Northwest Mountain Region.

Airworthiness Directives; British Aerospace Model BAC 1-11 200 Series Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment adopts a new airworthiness directive (AD), applicable to British Aerospace Model BAC 1-11 200 series airplanes, which requires repetitive inspection procedures and repair, if necessary, of the main landing gear (MLG) support structure. This amendment is prompted by reports of cracks in the MLG rear pintle support beam. This condition, if not corrected, could lead to the collapse of the MLG.

DATES: Effective April 25, 1988.

ADDRESSES: The applicable service information may be obtained from British Aerospace, Inc., P.O. Box 17414, Dulles International Airport, Washington, DC 20041. This information may be examined at the FAA, Northwest Mountain Region, 17900 Pacific Highway South, Seattle, Washington, or the Seattle Aircraft Certification Office, 9010 East Marginal Way South, Seattle, Washington.

FOR FURTHER INFORMATION CONTACT: Ms. Armella Donnelly, Standardization Branch, ANM-113; telephone (206) 431-1967. Mailing address: FAA, Northwest Mountain Region, 17900 Pacific Highway South, C-68966, Seattle, Washington 98168.

SUPPLEMENTARY INFORMATION: A proposal to amend Part 39 of the Federal Aviation Regulations to include an airworthiness directive, which requires periodic inspections for cracks in the MLG pintle support beam on British Aerospace Model BAC 1-11 200 series airplanes, and repair or replacement, if necessary, was published in the **Federal Register** as a Notice of Proposed Rulemaking (NPRM) on August 14, 1987 (52 FR 30380), and as a Supplemental NPRM on January 6, 1988 (53 FR 258).

Interested parties have been afforded an opportunity to participate in the making of this amendment. Due consideration has been given to the comments received.

One commenter, the Air Transport Association (ATA) of America, had no objections to the proposed rule.

Another commenter, the manufacturer, suggested that, instead of the proposed new AD, the FAA should consider revising AD 86-04-07, Amendment 39-5235 (51 FR 4686; February 6, 1986), to add the subject inspections for the Model BAC 1-11 200 series airplanes to those now existing in that AD for the Model 400 series. The FAA disagrees. In developing this rulemaking action, the FAA did consider such an approach; however, the FAA has determined that, in the interest of keeping possible confusion for operators to a minimum, the issuance of a new, separate AD, applicable to the Model 200 series only, is appropriate.

The FAA notes that additional comments from the manufacturer were contributory to the issuance of the Supplemental NPRM, and were addressed in the preamble to that action.

No comments were received in response to the Supplemental NPRM.

Paragraph B.1. has been revised to clarify that, for pre-modification PM3070 airplanes, if cracks are present in the aft half-beam, cracked parts must be replaced prior to further flight. After careful review of the available data, including the comments noted above, the FAA has determined that air safety and the public interest require the adoption of the rule with the change noted.

It is estimated that 31 airplanes of U.S. registry will be affected by this AD, that it will take approximately 2 manhours per airplane to accomplish the required actions, and that the average labor cost will be $40 per manhour. Based on these figures, the total cost impact of this AD to U.S. operators is estimated to be $2,840.

For the reasons discussed above, the FAA has determined that this regulation is not considered to be major under Executive Order 12291 or significant under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979) and it is further certified under the criteria of the Regulatory Flexibility Act that this rule will not have a significant economic impact, positive or negative, on a substantial number of small entities because of the minimal cost of compliance per airplane ($80). A final evaluation has been prepared for this regulation and has been placed in the docket.

List of Subjects in 14 CFR Part 39

Aviation safety, Aircraft.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration amends Section 39.13 of Part 39 of the Federal Aviation Regulations as follows:

1. The authority citation for Part 39 continues to read as follows:

Authority: 49 U.S.C. 1354(a), 1421 and 1423; 49 U.S.C. 106(g) (Revised Pub. L. 97–449, January 12, 1983); and 14 CFR 11.89.

2. By adding the following new airworthiness directive:

British Aerospace: Applies to Model BAC 1–11 200 series airplanes, certificated in any category. Compliance required as indicated, unless previously accomplished.

To prevent the collapse of the main landing gear due to cracks in the rear pintle support beam, accomplish the following.

A. Prior to the accumulation of 50,000 landings or within the next 1,500 landings after the effective date of this AD, whichever occurs later, perform an eddy current or dye penetrant inspection for cracks in the rear pintle support beam, in accordance with paragraph 2.1.1 of the accomplishment instructions of British Aerospace BAC 1–11 Alert Service Bulletin 57–A–PM5896, Issue Number 3, dated April 13, 1987. Thereafter, repeat the inspection at intervals not to exceed 3,200 landings.

B. If cracks are discovered during the inspections required by paragraph A., above, accomplish the following:

1. If cracks are less than 0.6 inches on pre-modification PM3070 airplanes, or less than 0.2 inches on post-modification PM3070 airplanes, repair or replace the cracked part prior to further flight, in accordance with paragraph 2.2.1 of the Accomplishment Instructions of British Aerospace BAC 1–11 Alert Service Bulletin 57–A–PM5896, Issue Number 3, dated April 13, 1987. If cracks are repaired in accordance with the service bulletin, continue to perform eddy current or dye penetrant inspections at intervals not to exceed 800 landings, providing that, in the case of pre-modification PM3070 airplanes, if cracks are present in the aft half-beam, cracked parts must be replaced prior to further flight.

2. If cracks exceed 0.6 inches on pre-modification PM3070 airplanes, or exceed 0.2 inches on post-modification PM3070 airplanes, replace the cracked part with an airworthy part prior to further flight.

C. An alternate means of compliance or adjustment of the compliance time, which provides an acceptable level of safety and which has the concurrence of an FAA Principal Maintenance Inspector, may be used when approved by the Manager, Standardization Branch, ANM–113, FAA, Northwest Mountain Region.

D. Special flight permits may be issued in accordance with FAR 21.197 and 21.199 to operate airplanes to a base for the accomplishment of the modifications required by this AD.

All persons affected by this directive who have not already received the appropriate service document from the manufacturer may obtain copies upon request to British Aerospace, Inc., P.O. Box 17414, Dulles International Airport, Washington, DC 20041. This document may be examined at the FAA, Northwest Mountain Region, 17900 Pacific Highway South, Seattle, Washington, or the Seattle Aircraft Certification Office, 9010 East Marginal Way South, Seattle, Washington.

This amendment becomes effective April 25, 1988.

Issued in Seattle, Washington, on March 7, 1988.

Frederick M. Isaac,

Acting Director, Northwest Mountain Region.

14 CFR Part 39

[Docket No. 88–ANE–08; Amdt. 39–5865]

Airworthiness Directives; General Electric (GE) CF34–1A and –3A Turbofan Engines

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule, request for comments.

SUMMARY: This amendment adopts a new airworthiness directive (AD) applicable to GE CF34–1A and –3A turbofan engines installed in Canadair Limited Model CL–600–2A12 and CL–600–2B16 aircraft. The AD requires replacement of all fuel controls with reworked units incorporating a redesigned bypass valve piston. The AD also requires cleaning of certain fuel controls having possible internal contamination. The compliance schedules for the AD are dependent upon the compliance status of the operator with respect to Canadair's airplane flight manual (AFM) temporary revisions with limitations regarding the use of continuous ignition and single engine demonstration for training. This amendment is needed to prevent uncommanded engine power roll-back or flameout and subsequent inflight shutdown.

DATES:

Effective—March 23, 1988.

Compliance Schedule—As prescribed in the body of the AD.

Comments for inclusion in the docket must be received on or before April 18, 1988.

Incorporation by Reference—Approved by the Director of the Federal Register as of March 23, 1988.

ADDRESSES: Comments on the amendment may be mailed in duplicate to: Federal Aviation Administration, New England Region, Office of the Regional Counsel, Attention: Rules Docket Number 88–ANE–08, 12 New England Executive Park, Burlington, Massachusetts 01803, or delivered in duplicate to Room 311 at the above address.

Comments delivered must be marked: "Docket Number 88–ANE–08".

Comments may be inspected at the New England Region, Office of the Regional Counsel, Room 311, between the hours of 8:00 a.m. and 4:30 p.m., Monday through Friday, except federal holidays.

The applicable engine manufacturer's service bulletins (SB's) may be obtained from General Electric Company, 1000 Western Avenue, Lynn, Massachusetts 01910. The applicable AFM temporary revisions may be obtained from Canadair Limited, 1800 Laurentien Blvd., Saint Laurent, Quebec, Canada H4R 1K2, or P.O. Box 6087, Station A, Montreal, Quebec, Canada H3C 3G9.

A copy of the SB's and the AFM temporary revisions are contained in Rules Docket Number 88–ANE–08, in the Office of the Regional Counsel, Federal Aviation Administration, New England Region, 12 New England Executive Park, Burlington, Massachusetts 01803.

FOR FURTHER INFORMATION CONTACT: Chung Hsieh, Engine Certification Branch, ANE–141, Engine Certification Office, Aircraft Certification Division, Federal Aviation Administration, New England Region, 12 New England Executive Park, Burlington, Massachusetts 01803; telephone (617) 273–7091.

SUPPLEMENTARY INFORMATION: The FAA has determined that there have been ten engine flameout and uncommanded power roll-back events involving the fuel controls of certain GE CF34 engines. One of the events occurred during a simulated engine out demonstration with the automatic power reserve (APR) system activated. The flameout or roll-

back incidents occurred as a result of internal contamination due to either inadequate cleaning during assembly of the fuel control or deterioration of the bypass valve teflon piston ring seal. The contaminant can cause malfunction of the control sensor or the fuel metering valve. This results in reduced fuel flow to the engine, causing uncommanded engine power roll-back or flameout.

The fuel control manufacturer has implemented an improved cleaning procedure and redesigned the bypass valve piston eliminating the teflon seal. GE has issued SB's (CF–34) 73–5 and 73–6, both dated January 22, 1988, requiring replacement of the bypass valve piston with redesigned hardware for all CF34–1A and –3A engines, and internal cleaning of the fuel control by a new process. Canadair Limited has issued AFM Temporary Revision Numbers 601/10–1 and 601/11 for Model CL–600–2B16 aircraft, and Numbers 601/17–1 and 601/18 applicable to the Model CL–600–2A12 aircraft, which require the use of continuous ignition on both engines for all takeoffs and landings, to and from 800 feet above ground level, and during engine-out operation for all other flight regimes. In order to further minimize the consequences of power loss, single engine demonstration and training are prohibited. In addition this increased usage of continuous ignition imposes a more severe operating environment on the engine igniters. Therefore, cumulative time limitations have been specified in the Canadair AFM temporary revisions on the use of continuous ignition and the usage time must be logged by the crew.

Since this condition is likely to exist or develop on other engines of the same type design, this AD requires incorporation of the GE SB's on GE CF34 engine fuel controls to correct the unsafe condition within 500 hours in service after the effective date of this AD, or prior to September 30, 1988, whichever occurs sooner, when operting in accordance with the Canadair AFM temporary revisions. Incorporation of the GE SB's is required prior to further flight after the effective date of this AD when not operating in accordance with the Canadair AFM temporary revisions.

Since a situation exists that requires the immediate adoption of this regulation, it is found that notice and public procedure hereon are impractical, and good cause exists for making this amendment effective in less than 30 days.

Although this action is in the form of a final rule which involves requirements affecting immediate flight safety and, thus, was not preceded by notice and public procedure, comments are invited on the rule.

Interested persons are invited to comment on this rule by submitting such written data, views, or arguments as they may desire. Communications should identify the regulatory docket number and be submitted in duplicate to the address specified above. All communications received on or before the closing date for comments will be considered by the Director. This rule may be amended in light of comments received. Comments that provide a factual basis supporting the views and suggestions presented are particularly helpful in evaluating the effectiveness of the AD and determining additional rulemaking is needed.

Comments are specifically invited on the overall regulatory, economic, environmental, and energy aspects of the rule that might suggest a need to modify the rule. All comments submitted will be available for examination in the Rules Docket at the address given above by interested persons. A report summarizing each FAA-public contact, concerned with the substance of the AD, will be filed in the Rules Docket.

Commenters wishing the FAA to acknowledge receipt of their comments submitted in response to this amendment must submit a self-addressed, stamped postcard on which the following statement is made: "Comments to Docket Number 88–ANE–08". The postcard will be date/time stamped and returned to the commenter.

Conclusion: The FAA has determined that this regulation is an emergency regulation that is not considered to be major under Executive Order 12291. It is impracticable for the agency to follow the procedures of Executive Order 12291 with respect to this rule since the rule must be issued immediately to correct an unsafe condition in aircraft. It has been further determined that this action involves an emergency regulation under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979). If this action is subsequently determined to involve a significant/major regulation, a final regulatory evaluation or analysis, as appropriate, will be prepared and placed in the regulatory docket (otherwise, an evaluation or analysis is not required). A copy of the final evaluation, if filed, may be obtained by contacting the person identified under the caption "FOR FURTHER INFORMATION CONTACT".

List of Subjects in 14 CFR Part 39

Engines, Air transportation, Aircraft, Aviation safety, Incorporation by reference.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me, the Federal Aviation Administration (FAA) amends Part 39 of the Federal Aviation Regulations (FAR) as follows:

PART 39—[AMENDED]

1. The authority citation for Part 39 continues to read as follows:

Authority: 49 U.S.C. 1354(a), 1421, and 1423; 49 U.S.C. 106(g) (Revised Pub. L. 97–449, January 12, 1983); and 14 CFR 11.89.

§ 39.13 [Amended]

2. By adding to § 39.13 the following new airworthiness directive (AD):

General Electric: Applies to General Electric (GE) CF34–1A and –3A turbofan engines installed in the Canadair Limited Model CL–600–2A12 and CL–600–2B16 aircraft.

Compliance is required as indicated, unless already accomplished.

To prevent an engine flameout or uncommanded power roll-back and subsequent inflight shutdown due to contamination of the fuel control, accomplish the following:

(a) For the engines not operated in accordance with Canadair Airplane Flight Manual (AFM) Temporary Revision Numbers 601/10–1 and 601/11 for Model CL–600–2B16, or Temporary Revision Numbers 601/17–1 and 601/18 for Model CL–600–2A12, accomplish the following prior to further flight after the effective date of this AD:

(1) For engines with fuel controls identified in GE Service Bulletin (SB) Number (CF34) 73–5, dated January 22, 1988, replace the fuel control with a reworked unit which has a redesigned bypass valve piston installed and cleaned internally by the improved process, in accordance with this SB.

(2) For engines with fuel controls identified in GE SB Number 73–6, dated January 22, 1988, replace the bypass valve piston with redesigned hardware in accordance with this SB.

(b) For the engines operated in accordance with Canadair AFM Temporary Revisions Numbers 601/10–1 and 601/11 for Model CL–600–2B16, or Temporary Revision Numbers 601/17–1 and 601/18 for Model CL–600–2A12, accomplish paragraphs (a)(1) and (a)(2) above within 500 hours in service from the effective date of this AD, or prior to September 30, 1988, whichever occurs sooner.

(c) Aircraft may be ferried in accordance with the provision of FAR 21.197 and 21.199 to a base where the AD can be accomplished.

(d) Upon request, an equivalent means of compliance with the requirements of the AD may be approved by the Manager, Engine Certification Office, Aircraft Certification Division, Federal Aviation Administration, New England Region, 12 New England Executive Park, Burlington, Massachusetts 01803.

(e) Upon submission of substantiating data by an owner or operator through an FAA maintenance inspector, the Manager, Engine

BEST COPY AVAILABLE

Certification Office, New England Region, may adjust the compliance times specified in this AD.

General Electric Service Bulletins (CF34) 73–5, dated January 22, 1988, and (CF34) 73–6 dated January 22, 1988, identified and described in this document are incorporated herein and made a part hereof pursuant to 5 U.S.C. 552(a)(1). All persons affected by this directive who have not already received the engine manufacturer's SB's may obtain copies upon request to General Electric Company, 1000 Western Avenue, Lynn, Massachusetts 01910.

These documents also may be examined at the Office of the Regional Counsel, Federal Aviation Administration, New England Region, 12 New England Executive Park, Burlington, Massachusetts 01803, Room 311, Rules Docket Number 88–ANE–06, between the hours of 8:00 a.m. and 4:30 p.m., Monday through Friday, except federal holidays.

This amendment becomes effective on March 23, 1988.

Issued in Burlington, Massachusetts, on February 23, 1988.

Jack A. Sain,

Acting Director, New England Region.

14 CFR Part 97

[Docket No. 25563; Amdt. No. 1369]

Standard Instrument Approach Procedures; Miscellaneous Amendments

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment establishes, amends, suspends, or revokes Standard Instrument Approach Procedures (SIAPs) for operations at certain airports. These regulatory actions are needed because of the adoption of new or revised criteria, or because of changes occurring in the National Airspace System, such as the commissioning of new navigational facilities, addition of new obstacles, or changes in air traffic requirements. These changes are designed to provide safe and efficient use of the navigable airspace and to promote safe flight operations under instrument flight rules at the affected airports.

DATES: *Effective:* An effective date for each SIAP is specified in the amendatory provisions.

Incorporation by reference—approved by the Director of the Federal Register on December 31, 1980, and reapproved as of January 1, 1982.

ADDRESSES: Availability of matters incorporated by reference in the amendment is as follows:

For Examination—

1. FAA Rules Docket, FAA Headquarters Building, 800 Independence Avenue SW., Washington, DC 20591;
2. The FAA Regional Office of the region in which the affected airport is located; or
3. The Flight Inspection Field Office which originated the SIAP.

For Purchase—

Individual SIAP copies may be obtained from:

1. FAA Public Inquiry Center (APA-200), FAA Headquarters Building, 800 Independence Avenue SW., Washington, DC 20591; or
2. The FAA Regional Office of the region in which the affected airport is located.

By Subscription—

Copies of all SIAPs mailed once every 2 weeks, are for sale by the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.

FOR FURTHER INFORMATION CONTACT: Donald K. Funai, Flight Procedures Standards Branch (AFS–230), Air Transportation Division, Office of Flight Standards, Federal Aviation Administration, 800 Independence Avenue SW., Washington DC 20591; telephone (202) 267–8277.

SUPPLEMENTARY INFORMATION: This amendment to Part 97 of the Federal Aviation Regulations (14 CFR Part 97) prescribes new, amended, suspended, or revoked Standard Instrument Approach Procedures (SIAPs). The complete regulatory description of each SIAP is contained in official FAA form documents which are incorporated by reference in this amendment under 5 U.S.C. 552(a), 1 CFR Part 51, and § 97.20 of the Federal Aviation Regulations (FARs). The applicable FAA Forms are identified as FAA Forms 8260–3, 8260–4, and 8260–5. Materials incorporated by reference are available for examination or purchase as stated above.

The large number of SIAPs, their complex nature, and the need for a special format make their verbatim publication in the Federal Register expensive and impractical. Further, airmen do not use the regulatory text of the SIAPs, but refer to their graphic depiction on charts printed by publishers of aeronautical materials. Thus, the advantages of incorporation by reference are realized and publication of the complete description of each SIAP contained in FAA form document is unnecessary. The provisions of this amendment state the affected CFR (and FAR) sections, with the types and effective dates of the SIAPs. This amendment also indentifies the airport, its location, the procedure identification and the amendment number.

This amendment to Part 97 is effective on the date of publication and contains separate SIAPs which have compliance dates stated as effective dates based on related changes in the National Airspace System or the application of new or revised criteria. Some SIAP amendments may have been previously issued by the FAA in a National Flight Data Center (FDC) Notice to Airmen (NOTAM) as an emergency action of immediate flight safety relating directly to published aeronautical charts. The circumstances which created the need for some SIAP amendments may require making them effective in less than 30 days. For the remaining SIAPs, an effective date at least 30 days after publication is provided.

Further, the SIAPs contained in the amendment are based on this criteria contained in the U.S. Standard for Terminal Instrument Approach Procedures (TERPs). In developing these SIAPs, the TERPS criteria were applied to the conditions existing or anticipated at the affected airports. Because of the close and immediate relationship between these SIAPs and safety in air commerce, I find that notice and public procedure before adopting these SIAPs is unnecessary, impracticable, and contrary to the public interest and, where applicable, that good cause exists for making some SIAPs effective in less than 30 days.

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore—(1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. For the same reason, the FAA certifies that this amendment will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 97

Approaches, Standard Instrument, Incorporation by reference.

Issued in Washington, DC on March 4, 1988.

Robert L. Goodrich,

Director of Flight Standards.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me, Part 97 of the Federal Aviation Regulations (14 CFR Part 97) is amended by establishing, amending, suspending, or revoking Standard Instrument Approach Procedures, effective at 0901 Gmt on the dates specified, as follows:

1. The authority citation for Part 97 continues to read as follows:

Authority: 49 U.S.C. 1348, 1354(a), 1421, and 1510; 49 U.S.C. 106(g) (revised, Pub. L. 97–449, January 12, 1983; and 14 CFR 11.49(b)(2)).

By amending: § 97.23 VOR, VOR/DME, VOR or TACAN, and VOR/DME or TACAN; § 97.25 LOC, LOC/DME, LDA, LDA/DME, SDF, SDF/DME; § 97.27 NDB, NDB/DME; § 97.29 ILS, ILS/DME, ISMLS, MLS, MLS/DME, MLS/RNAV; § 97.31 RADAR SIAPs; § 97.33 RNAV SIAPs; and § 97.35 COPTER SIAPs, identified as follows:

BILLING CODE 4910-13-M

ENVIRONMENTAL PROTECTION AGENCY

21 CFR Parts 193 and 561

[OPP–300180; FRL 3351–8]

Revocation of Human Food Additive Regulations and Animal Feed Additive Regulations for Certain Pesticide Chemicals

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: This rule revokes human food additive regulations in 21 CFR Part 193 and animal feed additive regulations in 21 CFR Part 561 related to certain pesticide chemicals. EPA is initiating this final rule without the benefit of a proposed rulemaking or solicitation for public comments because it simply removes obsolete and expired residue limitations.

EFFECTIVE DATE: March 18, 1988.

FOR FURTHER INFORMATION CONTACT:

By mail: Patricia Critchlow, Registration Division (TS–767C), Environmental Protection Agency, 401 M Street, SW., Washington, DC 20460.

Office location and telephone number: Registration Support and Emergency Response Branch, Rm. 716, CM #2, 1921 Jefferson Davis Highway, Arlington, VA (703) 557–2226.

SUPPLEMENTARY INFORMATION: EPA established certain food additive regulations in 21 CFR Parts 193 and 561 for residues of the pesticides enumerated below in processed food commodities, to expire on the dates specified in the regulations. These residues resulted from use of the pesticides in accordance with the provisions of experimental use permits (EUP's) which have also expired; several of the regulations specify "interim" tolerances but do not mention the experimental program.

The various pesticides for which these regulations were established have not been authorized since 1985 for use under EUP's on the subject processed food commodities or on the raw agricultural commodities from which the food commodities are processed, and there is no longer any expectation of residues occurring in the processed food products from the EUP use. Thus, the existing food additive regulations are no longer necessary and should be deleted from 21 CFR Parts 193 and 561.

Therefore, EPA is amending the regulations discussed in this rule by revoking the section in its entirety or removing the applicable paragraph containing the expired tolerances, as follows:

In Part 193

§ 193.15	Aldicarb
§ 193.84	Chlorothalonil
§ 193.87	Cypermethrin
§ 193.152	2,2-Dimethyl-1,3-benzodioxol-4-ol methylcarbamate
§ 193.156	*O,O*-Dimethyl *O*-(4-nitro-*m*-tolyl) phosphorothothioate
§ 193.277	Metalaxyl
§ 193.468	Pirimiphos-methyl
§ 193.469	5-(4-Chlorophenyl)-2,3-diphenylthiophene

In Part 561

§ 561.273	Metalaxyl
§ 561.277	Methamidophos
§ 561.432	Pirimiphos-methyl
§ 561.433	5-(4-Chlorophenyl)-2,3-diphenylthiophene

Since this regulatory action is intended only to remove obsolete and unnecessary information from the Code of Federal Regulations, it has been determined that this rule is not subject to a review under Executive Order 12291. Likewise, this rule does not require a regulatory impact analysis under the Regulatory Flexibility Act.

List of Subjects in 21 CFR Parts 193 and 561

Food additives, Animal feeds, Pesticides and pests, Recordkeeping and reporting requirements.

Dated: March 11, 1988.

Douglas D. Campt,

Director, Office of Pesticide Programs.

Therefore, 21 CFR Parts 193 and 561 are amended as follows:

PART 193—[AMENDED]

1. In Part 193:

a. The authority citation for Part 193 continues to read as follows:

Authority: 21 U.S.C. 348.

§§ 193.84, 193.87, and 193.469 [Removed]

b. By removing §§ 193.84, 193.87, and 193.469.

§ 193.15 [Amended]

c. By removing and reserving paragraph (b) in § 193.15.

§§ 193.152 and 193.277 [Amended]

d. By removing paragraph (c) in §§ 193.152 and 193.277.

§ 193.156 [Amended]

e. By removing paragraphs (b), (c), and (d) and reserving paragraph (b) in § 193.156.

f. By revising § 193.468 to read as follows:

§ 193.468 Pirimiphos-methyl.

(a) Tolerances are established for the combined residues of the insecticide pirimiphos-methyl (*O*-[2-diethylamino-6-methyl-4-pyrimidinyl] *O,O*-dimethyl phosphorothioate) and its metabolite *O*-(2-ethylamino-6-methyl-pyrimidin-4-yl) *O,O*-dimethyl phosphorothioate and, in free and conjugated forms, the metabolites 2-diethylamino-6-methyl-pyrimidin-4-ol, 2-ethylamino-6-methyl-pyrimidin-4-ol, and 2-amino-6-methyl-pyrimidin-4-ol in or on the following processed foods when present therein as a result of application to stored grains:

Foods	Parts per million
Corn milling fractions (except flour)	40
Corn oil	88
Sorghum milling fractions (except flour)	40

(b) [Reserved]

PART 561—[AMENDED]

2. In Part 561:

a. The authority citation for Part 561 continues to read as follows:

Authority: 21 U.S.C. 348.

§§ 561.277 and 561.433 [Removed]

b. By removing §§ 561.277 and 561.433.

§ 561.273 [Amended]

c. In § 561.273, by removing paragraph (c).

d. By revising § 561.432 to read as follows:

§ 561.432 Pirimiphos-methyl.

(a) Tolerances are established for the combined residues of the insecticide pirimiphos-methyl (*O*-[2-diethylamino-6-methyl-4-pyrimidinyl] *O,O*-dimethyl phosphorothioate) and its metabolite *O*-(2-ethylamino-6-methyl-pyrimidin-4-yl) *O,O*-dimethyl phosphorothioate and, in free and conjugated forms, the metabolites 2-diethylamino-6-methyl-pyrimidin-4-ol, 2-ethylamino-6-methyl-pyrimidin-4-ol, and 2-amino-6-methyl-pyrimidin-4-ol in or on the following processed feeds when present therein as a result of application to stored grains:

Foods	Parts per million
Corn milling fractions (except flour)	40
Sorghum milling fractions (except flour)	40

(b) [Reserved]

BILLING CODE 6560-50-M

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Office of the Assistant Secretary for Housing—Federal Housing Commissioner

24 CFR Parts 201, 203, 204, 205, 207, 213, 220, 221, 231, 232, 234, 240, 241, 242, 244, 250, 251, 255, and 885

[Docket No. R-88-1375; FR-3445]

Miscellaneous Revisions to FHA Single Family and Multifamily Mortgage Insuring Authorities; Section 202 Per Unit Cost Limits

AGENCY: Office of the Assistant Secretary for Housing—Federal Housing Commissioner, HUD.

ACTION: Final rule.

SUMMARY: This rule implements a number of the amendments to HUD's single family and multifamily mortgage insurance authorities made by the Housing and Community Development Act of 1987. Major changes include liberalization in the way HUD determines the maximum mortgage amounts for high-cost areas in FHA's home mortgage and individual-unit condominium insurance programs, revisions to the procedures by which the public may request increases in the single family and condominium unit mortgage limits, increases in the per unit mortgage limits for HUD's multifamily mortgage insurance programs, an expanded FHA insuring authority for the refinancing of single family insured graduated payment mortgages (GPMs), and an expansion of mortgagors eligible for FHA single family mortgage insurance on Hawaiian home lands. The rule also increases the per unit cost limits for housing for the elderly or handicapped under section 202 of the Housing Act of 1959.

EFFECTIVE DATE: April 27, 1988.

FOR FURTHER INFORMATION CONTACT: Questions concerning single family program amendments in this rule should be referred to John J. Coonts, Deputy Director, Office of Insured Single Family Housing, Room 9266, telephone 755-3046. Questions concerning amendments to multifamily programs contained in this rule should be referred to James Hamernick, Director, Office of Insured Multifamily Housing Development, room 6134, telephone 755-6500. Questions concerning amendments to the Section 202 program of housing for the elderly or handicapped contained in the rule should be referred to Robert Wilden, Director, Assisted Housing and Handicapped Housing Division, room 6116, telephone 426-8730 (None of the listed telephone numbers is toll-free.) Written inquiries should be directed to the listed addresses and room numbers, with the remainder of the address, in each instance, as follows: Department of Housing and Urban Development, 451 Seventh Street SW., Washington, DC 20410-8000.

SUPPLEMENTARY INFORMATION: On February 5, 1988, the President signed into law the Housing and Community Development Act of 1987 (Pub. L. 100-242, approved February 5, 1988) (the 1987 Act). This rule implements a number of the 1987 Act's changes to HUD's single family and multifamily mortgage insurance programs and increases the per unit cost limits for the Section 202 program of Housing for the Elderly and Handicapped. A discussion of these changes follows.

Single Family Mortgage Insurance

1. *High-cost areas.* Section 203(b) of the National Housing Act (NHA)—HUD's basic home mortgage insuring authority—establishes the dollar limits for an insurable mortgage by use of base dollar limits (varying with the number of family residences involved), with "high-cost" overrides on an area-by-area basis. HUD is authorized to set "high-cost" limits for any geographic area in which the Commissioner finds that moderate- and middle-income persons have limited housing opportunities, due to high prevailing housing sales prices. Before enactment of the 1987 Act, these "high-cost" limits could not exceed the lesser of (1) 133⅓ percent of the base dollar limits or (2) a percentage of the median one-family house prices in the area, keyed to the number of units involved.

The 1987 Act made two changes in this system. First, section 404 increased the 133⅓ percent factor to 150 percent. Second, section 423 specified that, for purposes of determining the median house price in the second part of the "high-cost" formula, the term "area" means a county, or a metropolitan statistical area (MSA), as established by the Office of Management and Budget (OMB), whichever results in the higher dollar amount.

The rule amends 24 CFR Part 203 (Mutual Mortgage Insurance and Rehabilitation Loans) and Part 234 (Condominium Ownership Mortgage Insurance) to implement these changes for the basic home mortgage and individual-unit condominium mortgage insurance programs. Other single family authorities affected by these changes include 24 CFR Part 204 (Coinsurance), Part 220 (Mortgage Insurance and Insured Improvement Loans for Urban Renewal and Concentrated Development Areas), Part 222 (Servicemen's Mortgage Insurance), and Part 240 (Mortgage Insurance on Loans for Fee Title Purchase).

It should be noted that section 423 raised an issue of statutory construction. The amendment defined the term "area" for purposes of the "pending sentence" in the statute. The "preceding sentence" uses "area" in two contexts: The median sales price component of the "high-cost" formula and the threshold test for determining whether a given area should be considered "high-cost." The House Report on the 1987 Act,[1] from which the definition of "area" derived, however, makes clear that the amendment only applies to the median sales price determination:

> The Committee accepted a provision that calls for developing a more accurate way of calculating the median single family house price by requiring the Secretary to use either the Standard Metropolitan Statistical Area (SMSA) or the county when determining the area used for this calculation.
>
> Prior to August, 1988, HUD used a county area calculation, but when the regulation was changed, the median house price in an urban area within a county was lowered. The Committee believes this change is necessary to produce more realistic housing prices for the FHA insurance program. (H. Rep. No. 122, 100th Cong., 1st Sess. 67 (1987).)

The rule reflects this interpretation.

2. *Changes in mortgage limits.* Sections 203.18b(a) and 234.27(b) provide a system by which the public may request an increase in HUD's mortgage limits for single family dwellings and individual units in condominiums. If a party believes that the mortgage limit for any area does not accurately reflect the extent to which moderate- and middle-income families have limited housing opportunities because of high prevailing housing sales prices, the party may submit documentation to the HUD field office in support of an alternative mortgage limit.

Under present §§ 203.18b(a) and 234.27, the required documentation consists of a sample of the actual sales prices in the area for new and existing homes and condominiums, and the actual or estimated median sales price for all sales included in the sample. The sample should be representative of the total sales made for the area involved for at least a three-month period.

The final rule makes two principal changes to this system. First, it makes clear that the area for which an increased mortgage limit may be requested includes a county located within an MSA (as established by OMB). This change parallels the amendment discussed above for determining the median sales prices for one- to four-family residences. The rule also specifies that requests for increased mortgage amounts may not be made for an area smaller than a county.

Second, instead of the *sample* of sales prices used by the *existing* procedure, the rule requires submission of a listing of acutal sales prices for all or nearly all sales, over a period of time that varies with the sales volume, as follows:

Sales volume	Revised data period
500 or more per month	1 mo.
250 to 499 per month	2 mos.
Less than 250 per month	3 mos.

This change does not impose new burdens on the public, since the current system requires that all (or almost all) sales prices be reviewed in order to arrive at a representative sample. It does, however, significantly relax the reporting requirement, by permitting reports for areas with high sales volumes for periods less than the current rule's flat three-month minimum.

The rule incorporates these changes in §§ 203.18b(a) and 234.27(b).

3. *Refinancing of FHA-Insured Graduated Payment Mortgages (GPMs).* Section 406(a) of the 1987 Act amends section 223(a)(7) of the NHA by authorizing HUD to insure a mortgage to refinance an existing mortgage insured pursuant to the GPM authorities of 24 CFR 203.45 (eligibility of graduated payment mortgages) and 203.46 (eligibility of modified graduated payment mortgages). Under the new authority, the refinancing mortgage may equal the outstanding balance of the existing mortgage, if the amount of the monthly payment due under the refinancing mortgage is less than that due under the existing mortgage for the month in which the refinancing mortgage is executed.

Before enactment of the 1987 Act, insured refinancing under section

---

[1] Throughout this preamble, reference is made to the *House and Senate Committee Reports* and the Conference Report "on the 1987 Act." These committee documents actually refer to a version of the 1987 legislation that was reported from conference committee, but not approved by the Senate. The enacted version of the 1987 Act was a "new" bill that was considered and passed later. This bill, however, was based upon the conference-reported measure and contained its predecessor's provisions, except for several budget-related changes. Therefore, the Department believes that the committee and conference reports on the earlier version of the 1987 Act constitute valid legislative history that should be consulted in construing the provisions in the enacted 1987 Act that were carried over from the conference-reported version.

223(a)(7) could not exceed the original principal balance of the existing mortgage. GPMs provide for lower monthly mortgage payments for the early years of the mortgage, with increases over time to amortize the loan within the applicable mortgage term. Interest that accrues, but is unpaid because of the initial lower monthly payments, is added to the loan balance, creating "negative amortization." Thus, GPMs typically have outstanding balances for several years into the life of the loan that exceed the original principal balance of the mortgage.

Section 408(a) is designed to give GPM homeowners access to insured refinancing under section 223(a)(7). It allows them to get relief through the benefit of a lower interest rate and the consequent lower monthly mortgage payments, by authorizing HUD to insure the refinancing of the *entire* outstanding balance of an insured GPM, without regard to the current appraised value of the property, rather than limiting such insurance to the original amount of the existing mortgage. This should also benefit HUD by reducing mortgage insurance claims stemming from homeowner default on insured GPMs.

4. *Mortgagors eligible for single family mortgage insurance on Hawaiian home lands.* Section 247 of the NHA authorizes HUD to insure single family mortgages for "Native Hawaiians" on Hawaiian home lands. Before enactment of the 1987 Act, section 247(c)(1) defined "Native Hawaiian" to mean any descendant of not less than one-half part of the blood of the races living in Hawaii before January 1, 1778.

Section 413(a) of the 1987 Act amended section 247(c)(1) to specify that the term "Native Hawaiian" includes an individual who succeeds a spouse or parent in a leasehold interest in Hawaiian home lands and who has such lower blood percentage as may be established for such succession under section 209 of the Hawaiian Homes Commission Act, 1920, or under the corresponding provision of the Constitution of the State of Hawaii adopted under section 4 of the Act entitiled, "An Act to provide for the admission of the State of Hawaii into the Union", approved March 18, 1959 (73 Stat. 5)). The rule incorporates this change.

Section 413(b) of the 1987 Act provides that mortgages insured pursuant to section 247 of the NHA are obligations of the General Insurance Fund (GIF). As implemented by HUD under the Housing and Urban Rural Recovery Act of 1983, section 247 mortgages were obligations of the Mutual Mortgage Insurance Fund (MMIF). No regulatory change is needed to effect this change. It should be noted, however, that the amendment will have prospective effect only. Mortgages that are the obligations of the MMIF will remain the obligations of that Fund.

The rule does, however, amend § 203.259a to provide for the continuation of the one-time mortgage insurance premium (MIP) collection system for section 247 mortgages. The Department has implemented the one-time MIP system for all MMIF mortgages, including pre-1987 Act section 247 mortgages. Mortgages that are subject to the GIF have not been brought within the one-time MIP system, but continue to pay MIP on a periodic basis. Although future section 247 mortgages will be obligations of the GIF, the Department will continue to use the one-time MIP procedures for them. This decision is consistent with the original agreement between HUD and the State of Hawaii, Department of Hawaiian Home Lands Commission for administering section 247. The Department does not believe that Congress intended to require a change in MIP procedure for the Hawaiian Home Lands program.

5. *Seasonal homes.* Section 406(c) of the 1987 Act repealed section 203(m) of the NHA—HUD's authority to insure mortgages covering vacation and seasonal homes. This authority has never been used. The rule removes the regulations for section 203(m) at 24 CFR 203.18(f), 203.19(c), and 203.43b. It also makes conforming changes at §§ 203.28, 203.43c(a), 203.45(g), 203.47(g), 203.49(h), 203.50(b), 204.1, 220.100, and 240.1.

Multifamily Mortgage Insurance

6. *Dollar mortgage limits.* Section 426 of the 1987 Act increased the per unit cost limits for a number of HUD's multifamily insuring authorities. The following lists the programs and limits, as increased by section 426.

a. *Section 207 of the NHA (Rental Housing Insurance) (24 CFR Part 207), Section 213 of the NHA (Cooperative Housing Insurance) (24 CFR Part 213), and Section 220 of the NHA (Rehabilitation and Neighborhood Conservation Housing Insurance) (24 CFR Part 220).*

Base[1]		Elevator structures[1]
$25,350	Per family unit with 0 bedrooms	$29,250
28,080	Per family unit with 1 bedroom	32,760
33,540	Per family unit with 2 bedrooms	40,170
41,340	Per family unit with 3 bedrooms	50,310
46,800	Per family unit with 4 or more bedrooms	56,865

[1] Limits for 2, 3, or 4 or more bedrooms under section 220 of the NHA may be increased by 25 percent for rehabilitation projects with not more than 5 units. The rule implements this authority.

b. *Section 221(d)(3) of the NHA (Housing for Moderate Income and Displaced Families) (24 CFR Part 221).*

Base[1]		Elevator structures[1]
$28,032	Per family unit with 0 bedrooms	$29,500
32,321	Per family unit with 1 bedroom	33,816
38,979	Per family unit with 2 bedrooms	41,120
49,893	Per family unit with 3 bedrooms	53,195
55,583	Per family unit with 4 or more bedrooms	58,392

[1] These limits are for nonprofit, cooperative, or public body, and certain special mortgagors; dollar limits for other mortgagors are 90 percent of those listed. The rule implements this two-tier system.

c. *Section 221(d)(4) of the NHA (Housing for Moderate Income and Displaced Families) (24 CFR Part 221).*

Base		Elevator structures
$25,226	Per family unit with 0 bedrooms	$27,251
28,636	Per family unit with 1 bedroom	31,239
34,613	Per family unit with 2 bedrooms	37,986
43,446	Per family unit with 3 bedrooms	49,140
49,231	Per family unit with 4 or more bedrooms	53,942

d. *Section 231 (Housing for Elderly Persons) (24 CFR Part 231).*

Base		Elevator structures
$23,985	Per family unit with 0 bedrooms	$27,251
26,813	Per family unit with 1 bedroom	31,239
32,019	Per family unit with 2 bedrooms	37,986
38,532	Per family unit with 3 bedrooms	49,140
45,300	Per family unit with 4 or more bedrooms	53,942

e. *Section 234 (Mortgage Insurance for Condominiums) (24 CFR Part 234).*

Base		Elevator structures
$28,032	Per family unit with 0 bedrooms	$29,500
32,321	Per family unit with 1 bedroom	33,816
38,979	Per family unit with 2 bedrooms	41,120
49,893	Per family unit with 3 bedrooms	53,195
55,583	Per family unit with 4 or more bedrooms	58,392

Because final rules of the Department must, under section 7(o)(3) of the Department of Housing and Urban Development Act, await thirty days of continuous session of the Congress before they may become effective, the several amendments made in this rule, including the above-described changes in per unit cost limits for HUD's multifamily insuring authorities, will not be effective until April 27, 1988.

However, the Secretary has the authority to waive regulatory requirements that are not required by statute, in individual cases. HUD anticipates that, during the period between publication of this rule and its effective date, circumstances may arise wherein it would be unfair to deny full availability of HUD's multifamily programs by enforcing the current per unit cost limits and high cost area limits—all of which have been increased under the 1987 Act.

Accordingly, pending the effectiveness of this rule, the per unit limit increases and the new high cost area maximums set out in Parts 207, 213, 220, 221, 231, 234, 251, 255 and 885 of this rule may be made available for application to mortgages initially or finally endorsed for insurance between the date of publication of this rule and its effective date. (Thereafter, the higher limits will be available to all other applications for mortgage insurance meeting underwriting requirements.) (In the case of direct loans under the section 202 program (Part 885), a borrower, at any time up to final closing, may request that the new per unit amounts and high cost limits set out in this rule applied in the computation of the loan amount, if the existing per unit and high cost limits in Part 885 would otherwise limit the loan amount for which the borrower is eligible.)

Clearly, the application of these higher limits is consistent with the intent of the Congress in revising the statutory limits, and allowing case-by-case waiver of HUD's regulations providing for lower limits (where all other underwriting requirements and restriction are met) will have the effect of making the new limits available more promptly.

By separate publication (53 FR 6922, March 3, 1988) the Department announced a similar policy with reference to high cost area limits in its single family mortgage insurance programs.

It should be noted that the maximum dollar amount increases for section 234 of the NHA raised on issue of statutory interpretation. Section 422(a) of the 1987 Act increased the maximum section 234 limits to those for a comparable unit under section 221(d)(3) of the NHA, as described above. Section 426(g) of the 1987 Act also increased the dollar limits, but by a lesser amount.

The legislative history indicates the following. The House-passed 1987 Act contained what later became section 422(a). The Conference Report (at 217) states that the House provision is included in the reported bill. The Senate-passed bill increased the multifamily per unit cost limits, but only for sections 221(d)(3) and 221(d)(4) of the NHA. The House-passed bill contained the multifamily high-cost increase discussed below in item 7. The Conference Report indicates that it accepted "both the House and Senate provisions, with an amendment to the Senate provision" to increase the per unit cost limits for the other multifamily programs, including section 234. (Conference Report at 218.)

It appears, therefore, that the conferees erred in adopting two conflicting per unit cost limit increases for section 234. Since the intent of Congress was to liberalize the multifamily per unit cost limits and since we believe that section 422(a)'s cross-reference takes precedence over the amounts added by section 426(g) as a matter of statutory construction, the Department has adopted the higher limits contained in section 422(a).

7. *High-cost limits.* Before enactment of the 1987 Act, HUD had authority to increase the maximum dollar limits detailed in item 6, above, by the following:

a. 75 percent in any area in which HUD determines cost levels so require.

b. 140 percent, where HUD determines it necessary on a project-by-project basis, except 90 percent where a mortgage purchased by GNMA under its Special Assistance Functions (section 305 of NHA) is involved.

Section 426(h) of the 1987 Act increased the high-cost area percentage from 75 to 110 percent.

The rule implements this change for each of the authorities listed in item 6, above, as well as 24 CFR Part 251 (Coinsurance for the Construction or Substantial Rehabilitation of Multifamily Housing Projects) and Part 255 (Coinsurance for the Purchase or Refinancing of Existing Multifamily Housing Projects). (These coinsurance authorities do not require revision to make cost increases effective.)

8. *Per unit cost limits for Section 202 Elderly or Handicapped Housing.* The Conference Report on the 1987 Act expresses the conferees' intent that HUD—

> raise the mortgage limits for Section 202 projects to levels commensurate with the new limits established in [section 426(d)] for Section 221(d)(3). (H. Rep. No. 426, 100th Cong., 1st Sess. 218 (1987))

Section 202(i)(3) of the Housing Act of 1959 requires HUD, in establishing per unit cost limits for the program, to take into account design features necessary to meet the needs of elderly or handicapped residents, and requires the limits to reflect the cost of providing these features. The provision also requires HUD to adjust the limits to reflect changes in the general level of construction costs.

The Department believes that the per unit cost limits suggested by the conferees meet each of these requirements. Accordingly, the rule amends 24 CFR 885.410 to incorporate the section 221(d)(3) per unit limits referred to in item 6.b., above. The limits included are those for nonprofits, since section 202 borrowers must be nonprofit entities.

The rule also amends § 885.410 to incorporate the percentage increase for high-cost areas referred to in item 7., above.

Other Changes

9. *Coinsurance.* Section 414(a) of the 1987 Act repealed section 244(c) of the NHA. This provision prohibited insurance under section 244, unless HUD determined, after due consultation with the mortgage lending industry, that coinsurance would not disrupt the mortgage market or reduce the availability of mortgage credit to borrowers who depend upon NHA mortgage insurance. The rule amends 24 CFR Parts 250, 251, and 255 to reflect this change.

10. *Negotiated interest rate.* Section 429(e)(2) of the 1987 Act amended section 232(i)(2)(B) of the NHA to make clear that the interest rate for supplemental loans to purchase and install fire safety equipment for nursing homes and related facilities would be that agreed upon by the borrower and the lender. This is a technical change to

bring section 232(i)(2)(B) into conformity with the amendments made to virtually all other HUD insuring authorities by the Housing and Urban-Rural Recovery Act of 1983.

11. *Authority to insure adjustable rate mortgages.* Section 415 of the 1987 Act increases the volume of adjustable rate mortgages that HUD may insure in any fiscal year to not to exceed 30 percent of the aggregate number of mortgages insured by HUD under title II of the NHA during the preceding fiscal year. Before enactment of the 1987 Act, the NHA limited the number of insured single family indexed mortgages, ARMs, and Shared Appreciation Mortgages (SAMs) to no more than 10 percent of the previous fiscal year's insurance totals under title II. Section 415 leaves the 10 percent limit intact for indexed mortgages and ARMs. The rule amends §§ 203.49(i) and 234.79(i) to incorporate the new limits.

12. *Minimum principal loan amount.* Section 419 of the 1987 Act prohibits a mortgage or lender from requiring, as a condition of providing a loan insured under the NHA or secured by a mortgage insured under the NHA, that the principal amount of the loan exceed a minimum amount established by the mortgage or lender. The provision also prohibits a mortgagee from requiring a minimum principal amount to be outstanding on the loan secured by the existing mortgage. The rule implements both of these provisions.

Notice and Comment Rulemaking

The Secretary had determined that this rulemaking should not be subject to prior notice and public comment. Providing for public participation for the following provisions would be contrary to the public interest:

a. Increases in the per unit cost limits for the section 202 program and HUD's multifamily mortgage insurance authorities;

b. Refinancing of HUD-insured GPMs;

c. Establishing a new appeal procedure for setting maximum high-cost single family mortgage limits;

d. Increasing the percentage multiplier for determining maximum single family high-cost mortgage amounts; and

e. Retaining the one-time mortgage insurance premium for Native Hawaiians under section 247 of the NHA.

The Section 202 and multifamily per unit cost increases provide a clear public benefit without imposing any burden or detriment on the public. The Section 202 loan limits were last revised in 1983. Immediate implementation of the 1987 Act increases are necessary to ensure the Department's continuing ability to meet Section 202's statutory objective of encouraging the construction and substantial rehabilitation of multifamily residences for lower income elderly or handicapped individuals and families. The FHA multifamily mortgage limits were last increased in 1979. The increases contained in this rule will enhance achievement of the multifamily programs' purpose of encouraging the construction, substantial rehabilitation, and refinancing of moderately priced, unsubsidized residential projects. Neither of these authorities should have to await the completion of notice and comment rulemaking before making their benefits available to the public.

In addition, the Department has fully complied with congressional intent by setting each of the per unit cost limits for the multifamily and Section 202 programs at the statutory limit. With regard to the Section 202 program, the Conference Report on the 1987 Act states that the conferees "intend the Secretary to raise the mortgage limits for section 202 projects to levels commensurate with the new limits established * * * for section 221(b)(3)." (H. Rep. No. 426, 100th Cong., 1st Session 218 (1987)).

Finally, although the Department has discretion to set the multifamily and section 202 limits below those specified in the statute, adoption of the congressional ceilings involves an exercise of discretion that historically has attended past congressional action in this area, and that virtually no one is likely to find surprising or troubling. This should be distinguished from the situation if the Department were to use its discretion to adopt *lower* limits. This would deviate not only from congressional intent in enacting the 1987 Act, but also from HUD's past history of implementing increases, and would have made a strong case for notice and comment rulemaking. For these reasons, the Department believes that the Section 202 and multifamily mortgage insurance limits should be implemented immediately, without the necessity to await the completion of notice and comment rulemaking.

The new GPM refinancing authority also provides a clear public benefit, and requires immediate implementation. During the six-year period from 1980 through 1985, when the interest rate ranged from 13½ percent to an all-time high of 17 percent, and back down to 12¾ percent, about 280,000 HUD-insured Section 245 GPMs were written. The fact that these loans allow negative amortization, coupled with depressed market conditions in certain areas, has resulted, in some cases, in an outstanding balance which is more than the value of the property. Accordingly, a number of these mortgages represent prospective defaults and, ultimately, claims against HUD's insurance funds. This problem has manifested itself especially in States that have been adversely affected by the troubled oil industry, such as Texas, Oklahoma, Louisiana, and Colorado. We understand from lenders in these States that many mortgagors face the trap of high mortgage payments and barely stable or declining values.

The Department estimates that there are about 32,800 insured GPMs in these areas. Although the Department cannot estimate a realiable figure, we believe the potential loss to the Department could be between $10 and $20 million, with the bulk of this attributable to proposective defaults under the modified GPM program (§ 203.46), section 245(b), the program with the more liberal terms. Since HUD already insures these obligations, including the amount due to negative amortization, refinancing would not put the Department in a more risky position than it is in currently. In fact, risk would be reduced because of the increased capacity of the mortgagor to carry the loan. It is important that this new authority be implemented as soon as possible in order that its benefits may begin accruing to the government, in the form of reduced insurance claims, and to the mortgagors of GPMs, in the form of reduced risk of default and foreclosure on their homes. Finally, it should be noted that the new refinancing authority imposes no new burdens on the public, since its use is voluntary with GPM mortgagors, and, as noted above, it should lessen the Federal exposure to insurance claims as compared to existing insured GPMs.

The amendment to revise the procedure by which the public may request increases in FHA's single family and single-unit condominium mortgage insuring authorities contains two principal changes. First, the rule specifies the areas for which increases may be sought: Any area that is not smaller than a county and counties within metropolitan statistical area. Each is a minor, procedural change. In the case of the minimum acceptable area, the change provides areas of sufficient size for HUD to make a meaningful determination on whether to grant an alternative mortgage limit. In the case of MSA counties, the revision brings the permissible area in line with the 1987 Act amendment to "area" (discussed above) for purposes of determining high-cost area median sales prices.

Second, the rule revises the documentation that must be sent to HUD to support a mortgage limit increase, from a representative sample over a fixed period of three months to a listing of all area sales over periods of one to three months, depending on sales volume. This change is also modest in effect. In order to prepare a representative sample, the requester must review all or almost all sales prices. In addition, the rule relaxes the submission requirement for areas with 250 or more sales per month, by permitting the reporting period to be less than three months. These changes are beneficial to program users and administrators alike, and should not have to await a period of notice and comment before taking effect.

As noted earlier, the 1987 Act increased the percentage by which the maximum dollar limits for single family mortgages could be increased in high-cost areas, from 133⅓ percent to 150 percent of the basic dollar amounts. Establishing new high-cost limits to reflect this change involves an exercise of discretion on the Department's part. Like the increases discussed above for the Section 202 loan and multifamily mortgage limits, however, implementing the 150 percent provision is important to carrying out the purposes of the single family insuring authorities subject to the new limit, is consistent with congressional intent, and involves discretion that is neither surprising nor significant in its exercise. Thus, the Department believes that to require prior notice and comment before making this provision effective would be unnecessary and contrary to the public interest.

The continuation of the one-time mortgage insurance premium for mortgage insurance on Hawaiian home lands is essentially a technical change. When enacted by the 1983 Act, mortgages insured pursuant to section 247 of the NHA were made obligations of the Mutual Mortgage Insurance Fund (MMIF). Mortgages backed by the Fund used the one-time mortgage insurance premium collection system. Mortgages that were obligations of HUD's other insurance funds, including the General Insurance Fund, used the periodic premium payment system. The 1987 Act specified that mortgages insured pursuant to section 247 are obligations of the GIF, rather than the MMIF. The Department's decision to retain the one-time premium for section 247 mortgages is consistent with its agreement with the State of Hawaii, Department of Hawaiian Home Lands with respect to the sharing of MIP. The decision imposes no new obligation: It simply continues the current system for collecting mortgage insurance premiums.

The other amendments made by this rule do not require notice and comment rulemaking, since they involve revising the Department's regulations to incorporate legislative changes, with no exercise of agency discretion. These changes include: (1) An expanded definition for "area" for FHA single family mortgage insurance; (2) the removal of regulations dealing with the repealed authority for the insurance of mortgages covering seasonal homes; (3) negotiated interest rates for Section 232 fire and safety equipment loans; (4) eligible mortgagors for single family mortgage insurance on Hawaiian home lands; (5) an increase in the permissible volume of insured ARMs; and (6) a prohibition against mortgagees requiring minimum principal amounts for insured or refinanced mortgages under the NHA.

Other Matters

A Finding of No Significant Impact with respect to the environment as required by the National Environmental Policy Act (42 U.S.C. 4321–4374) is unnecessary, since the statutorily required establishment of loan limits and similar cost and rate determinations are categorically excluded from the Department's National Environmental Policy Act procedures under 24 CFR 50.20(*l*).

This rule does not constitute a "major rule" as that term is defined in section 1(b) of Executive Order 12291 on Federal Regulation. Analysis of the rule indicates that it does not (1) have an annual effect in the economy of $100 million or more; (2) cause a major increase in costs or prices for consumers, individual industries, federal, State or local government agencies, or geographic regions; or (3) have a significant adverse effect on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete in domestic export markets.

Under the Regulatory Flexibility Act (5 U.S.C. 605(b)), the undersigned hereby certifies that this rule does not have a significant economic impact on a substantial number of small entities. This rule contains a number of changes to improve the ability of HUD's mortgage insurance and other programs to serve program users. Any economic effect on small entities should be insignificant.

Information collection requirements contained in this rule have been submitted to the Office of Management and Budget for review under section 3504(h) of the Paperwork Reduction Act of 1980 (44 U.S.C. 3504(h)). Comments relating to information collection requirements should be submitted to the Office of Information and Regulatory Affairs, Office of Management and Budget, Washington, DC 20503, Attention: Desk Officer for HUD. After OMB review an approval, the public will be notified of the OMB control number assigned these requirements through a technical amendment to this rule.

This rule was not listed in the Department's Semiannual Agenda of Regulations published on October 26, 1987 (52 FR 40358) under Executive Order 12291 and the Regulatory Flexibility Act.

The catalog of Federal Domestic Assistance program numbers are 14.157.

Mortgage insurance, Coinsurance of multifamily mortgages.

24 CFR Part 255

Mortgage insurance.

24 CFR Part 885

Aged, Grant programs: housing and community development, Handicapped, Loan programs: housing and community development, Low and moderate income housing.

Accordingly, 24 CFR Parts 201, 203, 204, 205, 207, 213, 220, 221, 231, 232, 234, 240, 241, 242, 244, 250, 251, 255, and 885 are revised to read as follows:

PART 201—TITLE I PROPERTY IMPROVEMENT AND MANUFACTURED HOME LOANS

1. The authority citation for Part 201 is revised to read as follows:

Authority: Sec. 2, National Housing Act (12 U.S.C. 1703); sec. 7(d), Department of Housing and Urban Development Act (42 U.S.C. 3535(d)).

2. In § 201.10, a new paragraph (g) is added to read as follows:

§ 201.10 Loan amounts.

* * * * *

(g) A lender may not require, as a condition of providing a loan insured under this part, that the principal amount of the loan exceed a minimum amount established by the lender.

PART 203—MUTUAL MORTGAGE INSURANCE AND REHABILITATION LOANS

3. The authority citation for Part 203 is revised to read as follows:

Authority: Secs. 203, 211, National Housing Act (12 U.S.C. 1709, 1715b); sec. 7(d), Department of Housing and Urban Development Act (42 U.S.C. 3535(d)). In addition, subpart C is also issued under sec. 230, National Housing Act (12 U.S.C. 1715u).

§ 203.18 [Amended]

4. Section 203.18(f) is removed.

5. In § 203.18b, paragraphs (a)(1) and (b) are revised to read as follows:

§ 203.18b Increased mortgage amount.

(a) * * *

(1)(i) If a party believes that the mortgage limit for any area does not accurately reflect the extent to which moderate- and middle-income persons have limited housing opportunities due to high prevailing housing sales prices, the party may submit documentation in support of an alternative mortgage limit. For purposes of this paragraph (a)(1)(i), an "area" (A) must at least be the size of a county, whether or not the area is located within a metropolitan statistical area, as established by the Office of Management and Budget; and (B) an area for which the mortgage limits contained in § 203.18(a) apply.

(ii) The documentation referred to in paragraph (a)(1)(i) of this section must consist of sufficient housing sales price data for the entire geographic area for which the request is made to justify the alternative mortgage limit. The documentation should include a listing of actual sales prices in the area for all or nearly all new and existing one-family homes and condominiums, over a period of time that varies with the sales volume, as follows:

(A) For 500 or more sales per month, a one-month reporting period;

(B) For 250 through 499 sales per month, a two-month reporting period; and

(C) For less than 250 sales per month, a three-month reporting period.

The listing should contain a brief address for each property, its county location, its sale price, the month and year of its sale, and whether it is new or existing.

(iii) In areas where the ratio of existing sales to new sales is three-to-one or greater, an increase in the mortgage limit may be based on 95 percent of the average of the new and the existing median sales prices. In these areas, the documentation referred to in paragraphs (a)(1) (i) and (ii) of this section may also include separate median sales prices for both the new and existing homes.

* * * * *

(b)(1) The increased dollar limitation may not exceed the lesser of (i) 150 percent of the dollar limitation specified in § 203.18(a), or (ii) the following percentage of the median one-family house price in the area, as determined by the Commissioner:

(A) 95 percent for a one-family residence,

(B) 107 percent for a two-family residence.

(C) 130 percent for a three-family residence.

(D) 150 percent for a four-family residence.

(2) For purposes of paragraph (b)(1) of this section, the term "area" means a county, or a metropolitan statistical area as established by the Office of Management and Budget, whichever results in the higher dollar amount.

* * * * *

6. Part 203, Subpart A, is amended by adding a new § 203.18d, to read as follows:

§ 203.18d Minimum principal loan amount.

A mortgagee may not require, as a condition of providing a loan secured by a mortgage insured under this part, that the principal amount of the mortgage exceed a minimum amount established by the mortgagee.

§ 203.19 [Amended]

7. In § 203.19, paragraph (c) is removed.

§ 203.28 [Amended]

8. In § 203.28, paragraph (d) is removed and paragraphs (e) and (f) are redesignated as paragraphs (d) and (e).

9. In § 203.43, paragraphs (c) (1), (3), and (4) are revised, and a new paragraph (c)(5) is added, to read as follows:

§ 203.43 Eligibility of miscellaneous type mortgages.

* * * * *

(c) * * *

(1)(i) Except as provided by paragraph (c)(1)(ii) of this section, the refinancing mortgage must be in an amount that does not exceed the lesser of (A) the original principal amount of the existing mortgage, or (B) the sum of the unpaid principal balance of the existing mortgage, plus loan closing charges approved by the Commissioner;

(ii) In the case of graduated payment mortgages insured under section 203 of the Act pursuant to section 245 (a) or (b) of the Act (24 CFR 203.45, or 203.46 (as in effect immediately before its removal at 52 FR 32754, published August 28, 1987)), the refinancing mortgage must have a principal amount that does not exceed the outstanding balance of the existing mortgage.

(iii) If a one-time mortgage insurance premium (MIP) was financed as part of the existing mortgage referred to in paragraphs (c)(1) (i) and (ii) of this section, the amount of the premium refund to which the mortgagor is entitled must be deducted in determining the original principal amount and the unpaid principal balance of the existing mortgage under paragraph (c)(1)(i) of this section and the outstanding balance of the existing mortgage under paragraph (c)(1)(ii) of this section. However, the maximum amount of the refinancing mortgage computed in accordance with this paragraph (c)(1) may be increased by the amount of the one-time MIP (if any) associated with the refinancing mortgage;

* * * * *

(3) It must result in a reduction in regular monthly mortgage payments by the mortgagor; in the case of a graduated payment mortgage, this means a reduction from the payment due under the existing mortgage for the month in which the refinancing mortgage is executed;

(4) It must be made by a mortgagor whose record of payment on the existing mortgage meets standards established by the Commissioner; and

(5) The mortgagee may not require a minimum principal amount to be outstanding on the loan secured by the existing mortgage.

* * * * *

§ 203.43b [Removed and reserved]

10. Section 203.43b is removed and reserved.

11. Section 203.43c(a) is revised to read as follows:

§ 203.43c Eligibility of mortgages involving a dwelling unit in a cooperative housing development.

* * * * *

(a) The provisions of §§ 203.16a, 203.17, 203.18, 203.18a, 203.18b, 203.23, 203.24, 203.28, 203.37, 203.38, 203.43h, 203.43i, 203.43j, 203.44, 203.49, and 203.50 of this part do not apply to mortgages insured under section 203(n) of the National Housing Act.

* * * * *

12. In § 203.43i, paragraph (c) is revised to read as follows:

§ 203.43i Eligibility of mortgages on Hawaiian Home Lands insured pursuant to section 247 of the National Housing Act.

* * * * *

(c) *Definitions.* (1) "Department of Hawaiian Home Lands" (DHHL) is a Department of the State of Hawaii responsible for management of Hawaiian home lands for the benefit of native Hawaiians.

(2) "Hawaiian home lands" means all land given the status of Hawaiian home lands under section 204 of the Hawaiian Homes Commission Act, 1920, or under the corresponding provisions of the Constitution of the State of Hawaii adopted under section 4 of the Act entitled, "An Act to provide for the admission of the State of Hawaii into the Union", approved March 18, 1959.

(3) "Native Hawaiian" means any descendant of not less than one-half part of the blood of the races inhabiting the Hawaiian Islands before Janaury 1, 1778 (or, in the case of an individual who succeeds a spouse or parent in an interest in a lease of Hawaiian home lands, such lower percentage as may be established for such succession under section 209 of the Hawaiian Homes Commission Act, 1920, or under the corresponding provision of the Constitution of the State of Hawaii adopted under section 4 of the Act entitled, "An Act to provide for the admission of the State of Hawaii into the Union", approved March 18, 1959).

* * * * *

13. In § 203.45, paragraph (g) is revised to read as follows:

§ 203.45 Eligibility of graduated payment mortgages.

* * * * *

(g) This section shall not apply to a mortgage that meets the requirements of §§ 203.18 (c) (d), (e) or (f), 203.43, 203.43a, 203.43j, or 203.49.

* * * * *

14. In § 203.47, paragraph (g) is revised to read as follows:

§ 203.47 Eligibility of growing equity mortgages.

* * * * *

(g) This section shall not apply to a mortgage which meets the requirements of § 203.43, § 203.43a, or § 203.49.

* * * * *

15. In § 203.49, paragraphs (h) and (i) are revised to read as follows:

§ 203.49 Eligibility of adjustable rate mortgages.

* * * * *

(h) *Cross-reference.* Sections 203.21 (level payment amortization provisions) and 203.44 (open-end advances) shall not apply to this section. This section shall not apply to a mortgage that meets the requirements of §§ 203.18(c) (non-occupant owners), 203.18(d) (outlying area properties), 203.18(e) (disaster victims), 203.43 (miscellaneous type mortgages), 203.43c (mortgages involving a dwelling unit in a cooperative housing development), 203.43d (mortgages in certain communities), 203.43e (mortgages covering houses in federally impacted areas), 203.45 (graduated payment mortgages), and 203.47 (growing equity mortgages).

(i) *Aggregate amount of mortgages insured.* The aggregate number of mortgages insured pursaunt to this section and § 234.79 of this chapter in any fiscal year may not exceed 30 percent of the aggregate number of mortgages and loans insured by the Commissioner under title II of the Act during the preceding fiscal year.

* * * * *

16. In § 203.50, paragraph (b) is revised to read as follows:

§ 203.50 Eligibility of rehabilitation loans.

* * * * *

(b) The provisions of § 203.18 (except as otherwise provided in §§ 203.50(f) (1) and (2)) and 203.43c shall not apply to loans insured under this section.

* * * * *

17. Section 203.259a is revised to read as follows:

§ 203.259a Scope.

(a) The Commissioner shall charge a one-time MIP pursuant to § 203.280 for mortgages that (1) are insured pursuant to § 203.43i or (2)(i) are obligations of the Mutual Mortgage Insurance Fund under this part (except insured open-end advances as provided by § 203.270) and (ii) are insured pursuant to, as appropriate:

(A) An application for a conditional commitment received on or after September 1, 1983; or

(B) An application for mortgage insurance endorsement under the single family Direct Endorsement program as provided in § 203.255, where the property appraisal report is signed by the mortgagee's approved underwriter on or after September 1, 1983.

(b) The periodic MIP provisions of §§ 203.260 through 203.266 shall not apply to mortgages referred to in paragraph (a) of this section, except that the Commissioner shall have discretion to reinstitute use of the periodic MIP, during such period as the Commissioner may find it appropriate, if the Commissioner determines that use of the one-time MIP would not be consistent with sound financial and actuarial practice or would significantly increase financial burdens on mortgagors. Any such reinstitution of the periodic MIP, as well as any subsequent reinstitution of the one-time MIP, shall apply only with respect to mortgages insured pursuant to applications for conditional commitments received (or, in the case of the single family Direct Endorsement program, applications for mortgage insurance endorsement, where the property appraisal report is signed by the mortgagee's approved underwriter) after such date as the Commissioner shall specify.

PART 204—COINSURANCE

18. The authority citation for Part 204 is revised to read as follows:

Authority: Secs. 244, 211, National Housing Act (12 U.S.C. 1715z–9, 1715(b)); sec. 7(d), Department of Housing and Urban Development Act (42 U.S.C. 3535(d)).

§ 204.1 [Amended]

19. In § 204.1, § 203.43b is removed from the listing of sections.

PART 205—MORTGAGE INSURANCE FOR LAND DEVELOPMENT [TITLE X]

20. The authority citation for Part 205 is revised to read as follows:

Authority: Sec. 1010, National Housing Act (12 U.S.C. 1749jj); sec. 7(d), Department of Housing and Urban Development Act (42 U.S.C. 3535(d)).

21. Section 205.68 is revised to read as follows:

§ 205.68 Eligibility of refinancing transactions.

A mortgage given to refinance an existing mortgage may be insured under this subpart. The principal amount and the term of the new mortgage may not exceed the unpaid amount and the unexpired term of the existing insured mortgage. The mortgage may not require a minimum principal amount to be outstanding on the loan secured by the existing mortgage.

22. Part 205, Subpart A, is amended by adding, before the undesignated center heading, a new § 205.69, to read as follows:

§ 205.69 Minimum principal loan amount.

A mortgagee may not require, as a condition of providing a loan secured by a mortgage insured under this part, that the principal amount of the loan exceed a minimum amount established by the mortgagee.

PART 207—MULTIFAMILY HOUSING MORTGAGE INSURANCE

23. The authority citation for Part 207 continues to read as follows:

Authority: Secs. 207, 211, National Housing Act (12 U.S.C. 1713, 1715b); sec. 7(d), Department of Housing and Urban Development Act (42 U.S.C. 3535(d)). Sections 207.258 and 207.258b are also issued under section 206(e), Housing and Community Development Amendments of 1978 (12 U.S.C. 1701z–11(e)).

24. In § 207.4, paragraphs (a)(2), (b)(1), and (c)(1) are revised to read as follows:

§ 207.4 Maximum mortgage amounts.

(a) * * *

(2) For such part of the property or project attributable to dwelling use (excluding exterior land improvements, as defined by the Commissioner) an amount per family unit, depending on the number of bedrooms, which may be:

(i) $25,350 without a bedroom.

(ii) $28,080 with one bedroom.

(iii) $33,540 with two bedrooms.

(iv) $41,340 with three bedrooms.

(v) $46,800 with four or more bedrooms.

* * * * *

(b) * * *

(1) Increase the dollar amount limitations per family unit, as provided in paragraph (a)(2) of this section, to not to exceed:

(i) $29,250 without a bedroom.

(ii) $32,760 with one bedroom.

(iii) $40,170 with two bedrooms.

(iv) $50,310 with three bedrooms.

(v) $56,885 with four or more bedrooms.

* * * * *

(c) *Increased mortgage amounts—high-cost areas.* (1) The Commissioner may increase the dollar amount limitations in paragraphs (a)(2) and (b)(1) of this section—

(i) By not to exceed 110 percent in any geographical area in which the Commissioner finds that cost levels so require and

(ii) By not to exceed 140 percent where the Commissioner determines it necessary on a project-by-project basis.

In no case, however, may any such increase exceed 90 percent, where the Commissioner determines that there is involved a mortgage purchased or to be purchased by the Government National Mortgage Association (GNMA) in implementing its Special Assistance Functions under section 305 of the National Housing Act (as section 305 existed immediately before its repeal on November 30, 1983).

* * * * *

25. Part 207, Subpart A, is amended by adding, before the undesignated center heading, a new section, to read as follows:

§ 207.16a Minimum principal loan amount.

A mortgagee may not require, as a condition of providing a loan secured by a mortgage insured under this part, that the principal amount of the mortgage exceed a minimum amount established by the mortgagee.

26. In § 207.32, a new paragraph (d) is added, to read as follows:

§ 207.32 Eligibility of refinancing transactions.

* * * * *

(d) The mortgagee may not require a minimum principal amount to be outstanding on the loan secured by the existing mortgage.

27. In § 207.32a, paragraph (b) is revised to read as follows:

§ 207.32a Eligibility of mortgages on existing projects.

* * * * *

(b) *Maximum mortgage amounts—general.* In addition to the limitations in paragraphs (c) and (d) of this section, a mortgage may not involve a principal obligation in excess of the lesser of the following:

(1) 85 percent of the Commissioner's estimate of the value of the project, except that—

(i) With respect to a cooperative project, a mortgage may not involve a principal obligation in excess of 90 percent of the Commissioner's appraised value of the project for continued use as a cooperative and

(ii) With respect to a project that meets the eligibility requirements of paragraph (k) or paragraph (*l*) of this section, a mortgage may not involve a principal obligation in excess of 90 percent of the Commissioner's estimate of the value of the project; or

(2)(i) The total of the amounts per family dwelling unit (excluding exterior land improvements, as defined by the Commissioner) depending on the number of bedrooms, which may be:

(A) $25,350 without a bedroom.

(B) $28,080 with one bedroom.

(C) $33,540 with two bedrooms.

(D) $41,340 with three bedrooms.

(E) $46,800 with four or more bedrooms.

(ii) *Increased mortgage amount—elevator type structure.* In order to compensate for the higher costs incident to construction of elevator type structures of sound standards of construction and design, the Commissioner may increase the dollar amount limitations per family unit as provided in paragraph (b)(2)(i) of this section, to not to exceed:

(A) $29,250 without a bedroom.

(B) $32,760 with one bedroom.

(C) $40,170 with two bedrooms.

(D) $50,310 with three bedrooms.

(E) $56,885 with four or more bedrooms.

(iii) *Increased mortgage amounts—high-cost areas.* (A) The Commissioner may increase the dollar amount limitations in paragraphs (b)(2)(i) and (b)(2)(ii) of this section—

(*1*) By not to exceed 110 percent in any geographical area in which the Commissioner finds that cost levels so require, and

(*2*) By not to exceed 140 percent where the Commissioner determines it necessary on a project-by-project basis.

In no case, however, may any such increase exceed 90 percent, where the Commissioner determines that there is involved a mortgage purchased or to be purchased by the Government National Mortgage Association (GNMA) in implementing its Special Assistance Functions under section 305 of the National Housing Act (as section 305 existed immediately before its repeal on November 30, 1983).

(B) If the Commissioner finds that because of high costs in Alaska, Guam, or Hawaii, it is not feasible to construct dwellings without the sacrifice of sound standards of construction, design, and livability within the limitations of maximum mortgage amounts provided in this section, the principal obligation of mortgages may be increased by such amounts as may be necessary to compensate for such costs, but not to exceed in any event the maximum, including high-cost area increases, if any, otherwise applicable by more than one-half thereof.

* * * * *

PART 213—COOPERATIVE HOUSING MORTGAGE INSURANCE

28. The authority citation for Part 213 continues to read as follows:

Authority: Secs. 211, 213, National Housing Act (12 U.S.C. 1715b, 1715e); sec. 7(d), Department of Housing and Urban Development Act (42 U.S.C. 3535(d)).

29. In § 213.7, paragraphs (a)(2), (d)(1), and (g), are revised to read as follows:

§ 213.7 Maximum insurable amounts.

(a) * * *

(2) For such part of the property or project attributable to dwelling use (excluding exterior land improvements, as defined by the Commissioner) an amount per family unit, depending on the number of bedrooms, which may be:

(i) $25,350 without a bedroom.

(ii) $28,080 with one bedroom.

(iii) $33,540 with two bedrooms.

(iv) $41,340 with three bedrooms.

(v) $46,800 with four or more bedrooms.

* * * * *

(d) *Increased mortgage amounts—high-cost areas.* (1) The Commissioner may increase the dollar amount limitation in paragraphs (a)(2) and (g) of this section—

(i) By not to exceed 110 percent in any geographical area in which the Commissioner finds that cost levels so require, and

(ii) By not to exceed 140 percent where the Commissioner determines it necessary on a project-by-project basis.

In no case, however, may any such increase exceed 90 percent, where the Commissioner determines that there is involved a mortgage purchased or to be purchased by the Government National Mortgage Association (GNMA) in implementing its Special Assistance Functions under section 305 of the National Housing Act (as section 305 existed immediately before its repeal on November 30, 1983).

* * * * *

(g) *Increased mortgage amount—elevator type structures.* In order to compensate for the higher costs incident to construction of elevator type structures of sound standards of construction and design, the Commissioner may increase the dollar amount limitations per family unit, as provided in paragraph (a)(2) of this section, to not to exceed:

(1) $29,250 per family unit without a bedroom.

(2) $32,760 per family unit with one bedroom.

(3) $40,170 per family unit with two bedrooms.

(4) $50,310 per family unit with three bedrooms.

(5) $56,885 per family unit with four or more bedrooms.

* * * * *

30. Part 213 is amended by adding in Subpart A, before the undesignated center heading, a new § 213.19a, and in Subpart C, before the undesignated center heading, and new § 213.519, to read as follows:

§ 213.19a Minimum principal loan amount.

A mortgagee may not require, as a condition of providing a loan secured by a mortgage insured under this subpart, that the principal amount of the mortgage exceed a minimum amount established by the mortgagee.

§ 213.519 Minimum principal loan amount.

A mortgagee may not require, as a condition of providing a loan secured by a mortgage insured under this subpart, that the principal amount of the mortgage exceed a minimum amount established by the mortgagee.

PART 220—MORTGAGE INSURANCE AND INSURED IMPROVEMENT LOANS FOR URBAN RENEWAL AND CONCENTRATED DEVELOPMENT AREAS

31. The authority citation for Part 220 continues to read as follows:

Authority: Secs. 207, 211, 220, National Housing Act (12 U.S.C. 1713, 1715b, 1715k); sec. 7(d), Department of Housing and Urban Development Act (42 U.S.C. 3535(d)).

§ 220.100 [Amended]

32. In § 220.100, § 203.43b is removed from the listing of sections.

33. In § 220.507, paragraphs (a), (b), and (c)(1) are revised to read as follows:

§ 220.507 Maximum mortgage amounts.

(a) *Dollar limitation—in general.* A mortgage may involve a principal obligation not in excess of the following:

(1) For such part of the property or project attributable to dwelling use (excluding exterior land improvements, as defined by the Commissioner), an amount per family unit, depending on the number of bedrooms, which may be:

(i) $25,350 without a bedroom.

(ii) $28,080 with one bedroom.

(iii) $33,540 with two bedrooms.

(iv) $41,340 with three bedrooms.

(v) $46,800 with four or more bedrooms.

(2) Where the project involves the rehabilitation of not more than five family units, the mortgage amounts per family unit designated in paragraph (a)(1) of this section may be increased by 25 percent, as follows:

(i) $41,925 for a unit with two bedrooms.

(ii) $51,675 for a unit with three bedrooms.

(iii) $58,500 for a unit with four or more bedrooms.

(b) *Increased dollar limitation—elevator type structures.* In order to compensate for higher costs incident to the construction of elevator type structures of sound standards of construction and design, the Commissioner may increase the dollar amounts per family unit in paragraph (a)(1) of this section, as follows:

(1) With respect to any elevator type structure, to not to exceed:

(i) $29,250 without a bedroom.

(ii) $32,760 with one bedroom.

(iii) $40,170 with two bedrooms.

(iv) $50,310 with three bedrooms.

(v) $56,885 with four or more bedrooms.

(2) With respect to any elevator type project involving the rehabilitation of not more than five family units, the dollar amounts per family unit, as provided in paragraph (b)(1) of this section, may be increased by 25 percent, as follows:

(i) $50,213 for a unit with two bedrooms.

(ii) $62,888 for a unit with three bedrooms.

(iii) $71,106 for a unit with four or more bedrooms.

(c) *Increased mortgage amounts—high-cost areas.* (1) The Commissioner may increase any of the dollar amount limitations in paragraphs (a) and (b) of this section—

(i) By not to exceed 110 percent in any geographical area in which the Commissioner finds that cost levels so require and

(ii) By not to exceed 140 percent where the Commissioner determines it necessary on a project-by-project basis. In no case, however, may any such increase exceed 90 percent, where the Commissioner determines that there is involved a mortgage purchased or to be purchased by the Government National Mortgage Association (GNMA) in implementing its Special Assistance Functions under section 305 of the National Housing Act (as section 305 existed immediately before its repeal on November 30, 1983).

* * * * *

PART 221—LOW COST AND MODERATE INCOME MORTGAGE INSURANCE

34. The authority citation for Part 221 continues to read as follows:

Authority: Secs. 211, 221, National Housing Act (12 U.S.C. 1715b, 1715*l*); sec. 7(d), Department of Housing and Urban Development Act (42 U.S.C. 3535(d)).

35. In § 221.514, paragraphs (a)(1), (b), and (c)(1) are revised to read as follows:

§ 221.514 Maximum mortgage amounts.

(a) * * *

(1) *Dollar limitations on units.* For such part of the property or project attributable to dwelling use (excluding exterior land improvements, as defined by the Commissioner) an amount per family unit, depending on the number of bedrooms, which may be:

(i) For projects involving eligible nonprofit mortgagors, to be insured under section 221(d)(3) of the Act:

(A) $28,032 without a bedroom.
(B) $32,321 with one bedroom.
(C) $38,979 with two bedrooms.
(D) $49,893 with three bedrooms.
(E) $55,583 with four or more bedrooms.

(ii) For projects involving eligible mortgagors other than nonprofit mortgagors, to be insured under section 221(d)(3) of the Act:

(A) $25,229 without a bedroom.
(B) $29,089 with one bedroom.
(C) $35,081 with two bedrooms.
(D) $44,904 with three bedrooms.
(E) $50,025 with four or more bedrooms.

(iii) For projects to be insured under section 221(d)(4) of the Act:

(A) $25,228 without a bedroom.
(B) $28,636 with one bedroom.
(C) $34,813 with two bedrooms.
(D) $43,446 with three bedrooms.
(E) $49,231 with four or more bedrooms.

* * * * *

(b) *Increased mortgage amount—elevator type structures.* In order to compensate for higher costs incident to construction of elevator type structures of sound standards of construction and design, the Commissioner may increase the dollar amount limitations per family unit, as provided in paragraph (a)(1) of this section, to not to exceed:

(1) For projects involving eligible nonprofit mortgagors, to be insured under section 221(d)(3) of the Act:

(i) $29,500 without a bedroom.
(ii) $33,816 with one bedroom.
(iii) $41,120 with two bedrooms.
(iv) $53,195 with three bedrooms.
(v) $58,392 with four or more bedrooms.

(2) For projects involving eligible mortgagors other than nonprofit mortgagors, to be insured under section 221(d)(3) of the Act:

(i) $26,550 without a bedroom.
(ii) $30,434 with one bedroom.
(iii) $37,008 with two bedrooms.
(iv) $47,876 with three bedrooms.
(v) $52,553 with four or more bedrooms.

(3) For projects to be insured under section 221(d)(4) of the Act:

(i) $27,251 without a bedroom.
(ii) $31,239 with one bedroom.
(iii) $37,986 with two bedrooms.
(iv) $49,140 with three bedrooms.
(v) $53,942 with four or more bedrooms.

(c) *Increased mortgage amounts—high-cost areas.* (1) The Commissioner may increase the dollar amount limitations in paragraphs (a) (1) and (b) of this section—

(i) By not to exceed 110 percent in any geographical area in which the Commissioner finds that cost levels so require and

(ii) By not to exceed 140 percent where the Commissioner determines it necessary on a project-by-project basis.

In no case, however, may any such increase exceed 90 percent, where the Commissioner determines that there is involved a mortgage purchased or to be purchased by the Government National Mortgage Association (GNMA) in implementing its Special Assistance Functions under section 305 of the National Housing Act (as section 305 existed immediately before its repeal on November 30, 1983).

* * * * *

36. Part 221, Subpart C, is amended by adding a new § 221.519b, to read as follows:

§ 221.519b Minimum principal loan amount.

A mortgagee may not require, as a condition of providing a loan secured by a mortgage insured under this part, that the principal amount of the mortgage exceed a minimum amount established by the mortgagee.

37. Section 221.560 is amended by adding a new paragraph (d), to read as follows:

§ 221.560 Eligibility of refinanced mortgages.

* * * * *

(d) The mortgage may not require a minimum principal amount to be outstanding on the loan secured by the existing mortgage.

PART 231—HOUSING MORTGAGE INSURANCE FOR THE ELDERLY

38. The authority citation for Part 231 continues to read as follows:

Authority: Secs. 211, 231, National Housing Act (12 U.S.C. 1715b, 1715v); sec. 7(d), Department of Housing and Urban Development Act (42 U.S.C. 3535(d)).

39. In § 231.3, paragraph (a) is revised to read as follows:

§ 231.3 Maximum mortgage amounts—new construction.

* * * * *

(a) *Family unit limitations.* For such part of the property or project attributable to dwelling use (excluding exterior land improvements as defined by the Commissioner) an amount per family unit, depending on the number of bedrooms, which may be:

(1) $23,965 without a bedroom.
(2) $26,613 with one bedroom.
(3) $32,019 with two bedrooms.
(4) $38,532 with three bedrooms.
(5) $45,300 with four or more bedrooms.

* * * * *

40. Section 231.5 is revised to read as follows:

§ 231.5 Increased mortgage amounts—elevator type structures.

In order to compensate for the higher costs incident to construction of elevator type structures of sound standards of construction and design, the Commissioner may increase the dollar amount limitations per family unit, as provided in § 231.3(a), to not to exceed:

(a) $27,251 without a bedroom
(b) $31,239 with one bedroom.
(c) $37,986 with two bedrooms.
(d) $49,140 with three bedrooms.
(e) $53,942 with four or more bedrooms.

41. In § 231.6, paragraph (a) is revised to read as follows:

§ 231.6 Increased mortgage amounts—high cost areas.

(a) The Commissioner may increase the dollar amount limitations in §§ 231.3(a) and 231.5—

(1) By not to exceed 110 percent in any geographical area in which the Commissioner finds that cost levels so require and

(2) By not to exceed 140 percent where the Commissioner determines it necessary on a project-by-project basis.

In no case, however, may any such increase exceed 90 percent, where the Commissioner determines that there is involved a mortgage purchased or to be purchased by the Government National Mortgage Association (GNMA) in implementing its Special Assistance Functions under section 305 of the National Housing Act (as section 305 existed immediately before its repeal on November 30, 1983).

* * * * *

PART 232—MORTGAGE INSURANCE FOR NURSING HOMES INTERMEDIATE CARE FACILITIES, AND BOARD AND CARE HOMES

42. The authority citation for Part 232 continues to read as follows:

Authority: Secs. 211, 232, National Housing Act (12 U.S.C. 1715b, 1715w); sec. 7(d), Department of Housing and Urban Development Act (42 U.S.C. 3535(d)).

43. Section 232.42 is revised to read as follows:

§ 232.42 Eligibility of refinanced mortgages.

A mortgage given to refinance an existing insured mortgage covering a facility having 20 or more beds may be insured under this subpart pursuant to section 223(a)(7) of the National Housing Act, if it meets the requirements of § 207.32(a) through (d) of this Chapter, as well as the requirements of this subpart.

44. Part 232, Subpart A, is amended by adding a new § 232.44, to read as follows:

§ 232.44 Minimum principal loan amount.

A mortgagee may not require, as a condition of providing a loan secured by a mortgage insured under this subpart, that the principal amount of the mortgage exceed a minimum amount established by the mortgagee.

45. In § 232.560(a), the caption and paragraph (a) are revised to read as follows:

§ 232.560 Interest rate.

(a) The loan shall bear interest at the rate agreed upon by the lender and the borrower.

* * * * *

46. Part 232, Subpart C, is amended by adding a new § 232.566, to read as follows:

§ 232.566 Minimum principal loan amount.

A mortgagee may not require, as a condition of providing a loan secured by a mortgage insured under this subpart, that the principal amount of the mortgage exceed a minimum amount established by the mortgagee.

PART 234—CONDOMINIUM OWNERSHIP MORTGAGE INSURANCE

47. The authority citation for Part 234 continues to read as follows:

Authority: Secs. 211, 234, National Housing Act (12 U.S.C. 1715b, 1715y); sec. 7(d), Department of Housing and Urban Development Act (42 U.S.C. 3535(d)).

48. In § 234.27, paragraph (b) is revised to read as follows:

§ 234.27 Maximum mortgage amounts.

* * * * *

(b) *Increased mortgage amount.* For any geographic area in which the Commissioner finds that moderate- and middle-income persons have limited housing opportunities due to high prevailing housing sales prices, the Commissioner may from time to time set mortgage limits that exceed the dollar limitation specified in paragraph (a)(1) of this section to the extent the Commissioner determines to be necessary, by publishing the applicable dollar limitations in a Notice in the **Federal Register**. The increased dollar limitation may not exceed the lesser of 150 percent of the amount specified in paragraph (a)(1) of this section, or 95 percent of the median one-family house price in the area, as determined by the Commissioner. For purposes of the preceding sentence, the term "area" means a county, or a metropolitan statistical area as established by the Office of Management and Budget, whichever results in the higher dollar amount.

(1)(i) If a party believes that the mortgage limit for any area does not accurately reflect the extent to which moderate- and middle-income persons have limited housing opportunities due to high prevailing housing sales prices, the party may submit documentation in support of an alternative mortgage limit. For purposes of this paragraph (a)(1)(i), an "area" (A) must at least be the size of a county, whether or not the area is located within a metropolitan statistical area, as established by the Office of Management and Budget; and (B) may be an area for which the mortgage limit contained in paragraph (a)(1) of this section applies.

(ii) The documentation referred to in paragraph (b)(1)(i) of this section must consist of sufficient housing sales price date for the entire geographic area for which the request is made to justify the alternative mortgage limit. The documentation should include a listing of actual sales prices in the area for all or nearly all new and existing one-family homes and condominiums, over a period of time that varies with the sales volume, as follows:

(A) For 500 or more sales per month, a one-month reporting period;

(B) For 250 through 499 sales per month, a two-month reporting period; and

(C) For less than 250 sales per month, a three-month reporting period.

The listing should contain a brief address for each property, its county location, its sale price, the month and year of its sale, and whether it is new or existing.

(iii) In areas where the ratio of existing sales to new sales is three-to-one or greater, an increase in the mortgage limit may be based on 95 percent of the average of the new and the existing median sales prices. In these areas, the documentation referred to in paragraphs (b)(1) (i) and (ii) of this section may also include separate median sales prices for both the new and existing homes.

(2) Requests for alternative mortgage limits, together with supporting documentation, should be sent to the appropriate HUD field office. The field office will forward the request and supporting material, with the field office's recommendation, to the Commissioner for determination.

* * * * *

49. In § 234.52, paragraphs (a), (c), and (d) are revised, and a new paragraph (e) is added, to read as follows:

§ 234.52 Refinancing of existing mortgages.

* * * * *

(a)(1) It must be in an amount that does not exceed the lesser of (i) the original principal amount of the existing mortgage, or (ii) the sum of the unpaid principal balance of the existing mortgage, plus loan closing costs approved by the Commissioner;

(2) In the case of graduated payment mortgages insured under section 234(c) of the Act pursuant to section 245 (a) or (b) of the Act (24 CFR 203.45 or 203.46 (as in effect before its removal at 52 FR

32754, published August 28, 1987)), the refinancing mortgage must have a principal amount that does not exceed the outstanding balance of the existing mortgage.

* * * * *

(c) It must result in a reduction in regular monthly mortgage payments by the mortgagor; in the case of a graduated payment mortgage, this means a reduction from the payment due under the existing mortgage for the month in which the refinancing mortgage is executed;

(d) It must be made by a mortgagor whose record of payment on the existing mortgage meets standards established by the Commissioner; and

(e) The mortgagee may not require a minimum principal amount to be outstanding on the loan secured by the existing mortgage.

50. Part 234, Subpart A, is amended by adding a new § 234.53, to read as follows:

§ 234.53 Minimum principal loan amount.

A mortgagee may not require, as a condition of providing a loan secured by a mortgage insured under this part, that the principal amount of the mortgage exceed a minimum amount established by the mortgagee.

51. In § 234.79, paragraph (i) is revised to read as follows:

§ 234.79 Eligibility of adjustable rate mortgages.

* * * * *

(i) The aggregate number of mortgages insured pursuant to this section and § 203.49 of this chapter in any fiscal year may not exceed 30 percent of the aggregate number of mortgages insured by the Commissioner under title II of the Act during the preceding fiscal year.

52. In § 234.525, paragraph (b) is revised to read as follows:

§ 234.525 Maximum mortgage amounts—new construction.

* * * * *

(b) *Family unit limitation.* For such part of the property or project attributable to dwelling use (excluding exterior land improvements, as defined by the Commissioner) an amount per family unit, depending on the number of bedrooms, which may be:

(1) $28,032 without a bedroom.
(2) $32,321 with one bedroom.
(3) $38,979 with two bedrooms.
(4) $49,893 with three bedrooms.
(5) $55,583 with four or more bedrooms.

* * * * *

53. In § 234.530, paragraphs (a) and (b)(1) are revised to read as follows:

§ 234.530 Increased mortgage amounts.

(a) *Elevator type structures.* In order to compensate for the higher costs incident to construction of elevator type structures of sound standards of construction and design, the Commissioner may increase the dollar amount limitation per family unit, as provided in § 234.525(b), to not to exceed:

(1) $29,500 without a bedroom.
(2) $33,816 with one bedroom.
(3) $41,120 with two bedrooms.
(4) $53,195 with three bedrooms.
(5) $58,392 with four or more bedrooms.

(b) *High-cost areas.* (1) The Commissioner may increase the dollar amount limitations in § 234.525(b) and in paragraph (a) of this section—

(i) By not to exceed 110 percent in any geographical area in which the Commissioner finds that cost levels so require and

(ii) By not to exceed 140 percent where the Commissioner determines it necessary on a project-by-project basis.

In no case, however, may any such increase exceed 90 percent, where the Commissioner determines that there is involved a mortgage purchased or to be purchased by the Government National Mortgage Association (GNMA) in implementing its Special Assistance Functions under section 305 of the National Housing Act (as section 305 existed immediately before its repeal on November 30, 1983).

* * * * *

PART 240—MORTGAGE INSURANCE ON LOANS FOR FEE TITLE PURCHASE

54. The authority citation for Part 240 is revised to read as follows:

Authority: Secs. 211, 240, National Housing Act (12 U.S.C. 1715b, 1715z-5); sec. 7(d), Department of Housing and Urban Development Act (42 U.S.C. 3535(d)).

§ 240.1 [Amended]

55. In § 240.1, § 203.43b is removed from the listing of sections.

PART 241—SUPPLEMENTARY FINANCING FOR INSURED PROJECT MORTGAGES

56. The authority citation for Part 241 continues to read as follows:

Authority: Secs. 211, 241, National Housing Act (12 U.S.C. 1715b, 1715z-6); sec. 7(d), Department of Housing and Urban Development Act (42 U.S.C. 3535(d)).

57. Part 241 is amended by adding new §§ 241.165 and 241.586, to read as follows:

§ 241.165 Minimum principal loan amount.

A mortgagee may not require, as a condition of providing a loan insured under this subpart, that the principal amount of the mortgage exceed a minimum amount established by the mortgagee.

§ 241.586 Minimum principal loan amount.

A mortgagee may not require, as a condition of providing a loan insured under this subpart, that the principal amount of the mortgage exceed a minimum amount established by the mortgagee.

PART 242—MORTGAGE INSURANCE FOR HOSPITALS

58. The authority citation for Part 242 is revised to read as follows:

Authority: Secs. 211, 233(f), 242, National Housing Act (12 U.S.C. 1715b, 1715n(f), 1715z-7); sec. 7(d), Department of Housing and Urban Development Act (42 U.S.C. 3535(d)).

59. Section 242.96 is amended by adding a new paragraph (d), to read as follows:

§ 242.96 Eligibility of refinancing transactions.

* * * * *

(d) *Minimum loan amount.* The mortgagee may not require a minimum principal amount to be outstanding on the loan secured by the existing mortgage.

60. Part 242, Subpart A, is amended by adding a new § 242.97, to read as follows:

§ 242.97 Minimum principal loan amount.

A mortgagee may not require, as a condition of providing a loan secured by a mortgage insured under this part, that the principal amount of the mortgage exceed a minimum amount established by the mortgagee.

PART 244—MORTGAGE INSURANCE FOR GROUP PRACTICE FACILITIES [TITLE XI]

61. The authority citation for Part 244 is revised to read as follows:

Authority: Secs. 211, 1104, National Housing Act (12 U.S.C. 1715b, 1749aaa-5); sec. 7(d), Department of Housing and Urban Development Act (42 U.S.C. 3535(d)).

62. Part 244, Subpart A, is amended by adding a new § 244.69, to read as follows:

§ 244.69 Minimum principal loan amount.

A mortgagee may not require, as a condition of providing a loan secured by a mortgage insured under this part, that the principal amount of the loan exceed a minimum amount established by the mortgagee.

PART 250—COINSURANCE FOR STATE HOUSING FINANCE AGENCIES

63. The authority citation for Part 250 continues to read as follows:

Authority: Secs. 211, 244, National Housing Act (12 U.S.C. 1715b, 1715z-9); sec. 7(d), Department of Housing and Urban Development Act (42 U.S.C. 3535(d)).

64. Section 250.2 is revised to read as follows:

§ 250.2 Effect of implementation of program on the flow of mortage credit to older declining areas.

Insurance will continue to be available under this part only to the extent the Secretary has determined that the availability of insurance authorized by this part does not adversely affect the flow of mortgage credit to older, declining areas and to purchasers of older and lower cost housing.

65. Part 250, Subpart B, is amended by adding a new § 250.136, to read as follows:

§ 250.136 Minimum principal loan amount.

A mortgagee may not require, as a condition of providing a loan secured by a mortgage coinsured under this part, that the principal amount of the loan exceed a minimum amount established by the mortgagee.

PART 251—COINSURANCE FOR THE CONSTRUCTION OR SUBSTANTIAL REHABILITATION OF MULTIFAMILY HOUSING PROJECTS

66. The authority citation for Part 251 is revised to read as follows:

Authority: Secs. 211, 244, National Housing Act (12 U.S.C. 1715b, 1715z(9)); sec. 7(d), Department of Housing and Urban Development Act (42 U.S.C. 3535(d)).

§ 251.1 [Amended]

67. Section 251.1 is revised by removing paragraph (c) and by redesignating paragraphs (d), (e), (f), and (g) as paragraphs (c), (d), (e), and (f), respectively.

68. Part 251, Subpart B, is amended by adding a new § 251.109, to read as follows:

§ 251.109 Minimum principal loan amount.

A lender may not require, as a condition of providing a loan secured by a mortgage coinsured under this Part, that the principal amount of the loan exceed a minimum amount established by the lender.

69. In § 251.203, paragraph (a) is revised to read as follows.

§ 251.203 Maximum mortgage limitation.

* * * * *

(a) *Statutory cost limits.* Congress has established maximum per unit dollar amounts for costs attributable to dwelling use. These limitations vary by number of bedrooms, structure type (elevator or non-elevator), Mortgagor type, and section of the National Housing Act, and are changed from time to time by statute. In addition, to compensate for geographic differences in construction costs, the Commissioner may establish, where appropriate, high-cost area factors. These are percentage increases over the otherwise applicable basic dollar limits. The factor for any geographic area may not exceed 210 percent of the basic limit. The factor applicable to a particular project may be obtained from the appropriate HUD field office. On an individual project basis in high-cost areas, the Commissioner may approve the use of a factor of up to 240 percent of the basic limit where costs justify it. However, in any case that involves projects purchased or to be purchased by the Government National Mortgage Association (GNMA) under its Special Assistance Functions authorized by former section 305 of the Act (Tandem programs), the Commissioner may not approve a factor of more than 190 percent. In the unusually high-cost areas of Alaska, Guam, and Hawaii, the Commissioner may approve the use of a factor of up to 360 percent. The Commissioner is also permitted to increase the otherwise applicable dollar limits by up to 20 percent to account for the installation in the project of a solar energy system (as defined in section 2(a) of the National Housing Act) or certain residential energy conservation measures (as defined in sections 210(11)(A) through (G) and (I) of Pub. L. 95–619). The maximum coinsurable amount may not exceed the sum of the project's total calculated statutory cost limit, plus the applicable percentage, below, of structural and land costs not attributable to dwelling use:

Section	Mortgagor	Percentage
(1) 221(d)(3)	General and limited distribution.	90
(2) 221(d)(3)	All others	100
(3) 221(d)(4)	All mortgagors	90

* * * * *

PART 255—COINSURANCE FOR THE PURCHASE OR REFINANCING OF EXISTING MULTIFAMILY HOUSING PROJECTS

70. The authority citation to Part 255 continues to read as follows:

Authority: Secs. 211, 244, National Housing Act (12 U.S.C. 1715b, 1715z-9); sec. 7(d), Department of Housing and Urban Development Act (42 U.S.C. 3535(d)).

§ 255.1 [Amended]

71. Section 255.1 is revised by removing paragraph (c) and redesignating paragraphs (d), (e), (f), (g), and (h) as paragraphs (c), (d), (e), (f), and (g)

72. Part 255, Subpart B, is amended by adding a new § 255.109, to read as follows:

§ 255.109 Minimum principal loan amount.

A lender may not require, as a condition of providing a loan secured by a mortgage coinsured under this part, that the principal amount of the loan exceed a minimum amount established by the lender.

73. In § 255.203, paragraph (a) is revised to read as follows:

§ 255.203 Maximum mortgage limitations.

* * * * *

(a) *Statutory cost limits.* Congress has established maximum per-unit dollar amounts for costs attributable to dwelling user. These limitations vary by number of bedrooms, structure type (elevator or non-elevator), Mortgagor type, and section of the National Housing Act, and are changed from time to time by statute. In addition, to compensate for geographic differences in construction costs, the Commissioner may establish, where appropriate, high-cost area factors. These are percentage increases over otherwise applicable basic dollar limits. The factor for any geographic area may not exceed 210 percent of the basic limit. The factor applicable to a particular project may be obtained from the appropriate HUD field office. On an individual project basis in high-cost areas, the Commissioner may approve the use of a factor of up to 240 percent of the basic limit where costs justify it. However, in cases involving projects to be purchased by the Government National Mortgage Association (GNMA) under its Special Assistance Functions authorized by former section 305 of the National Housing Act (Tandem programs), the Commissioner may not approve a factor of more than 190 percent. In the unusually high-cost areas of Alaska, Guam, and Hawaii, the Commissioner may approve the use of a factor of up to

300 percent. The Commissioner is also permitted to increase the otherwise applicable dollar limits by up to 20 percent to account for the installation in the project of a solar energy system (as defined in section 2(a) of the National Housing Act) or certain residential energy conservation measures (as defined in sections 210(11)(A) through (G) and (I) of Pub. L. 95-619). The maximum coinsurable amount may not exceed the sum of the project's total calculated statutory cost limit, plus the applicable percentage below of estimated cost not attributable to dwelling use:

(1) Cooperative project loans—98 percent;

(2) Project loans insured under § 207.32a(*l*)—90 percent;

(3) All other project loans—85 percent.

* * * * *

PART 885—LOANS FOR HOUSING FOR THE ELDERLY OR HANDICAPPED

74. The authority citation for 24 CFR Part 885 is revised to read as follows:

Authority: Sec. 202, Housing Act of 1959 (12 U.S.C. 1701q); sec 7(d), Department of Housing of Urban Development Act (42 U.S.C. 3535(d)).

75. In § 885.410, paragraphs (b), (c), and (f)(1) are revised to read as follows:

§ 885.410 Amount and terms of financing.

* * * * *

(b) For such part of the property or project attributable to dwelling use (excluding exterior land improvements, as defined by the Assistant Secretary) the maximum loan amount, depending on the number of bedrooms, may not exceed:

(1) $28,032 per family unit without a bedroom.

(2) $32,321 per family unit with one bedroom.

(3) $38,979 per family unit with two bedrooms.

(4) $49,893 per family unit with three bedrooms, restricted to nonelderly handicapped families.

(5) $55,583 per family unit with four or more bedrooms, restricted to nonelderly handicapped families.

(c) In order to compensate for the higher costs incident to construction of elevator type structures of sound standards of construction and design, the field office may increase the dollar limitations per family unit, as provided in paragraph (b) of this section, to not to exceed:

(1) $29,500 per family unit without a bedroom.

(2) $33,816 per family unit with one bedroom.

(3) $41,130 per family unit with two bedrooms.

(4) $53,193 per family unit with three bedrooms, restricted to nonelderly handicapped families.

(5) $58,392 per family unit with four or more bedrooms, restricted to nonelderly handicapped families.

* * * * *

(f) Increased Mortgage Limits—High Cost Areas. (1) The Assistant Secretary may increase the dollar amount limitations in paragraph (b) and (c) of this section—

(i) By not to exceed 110 percent in any geographical area in which the Assistant Secretary finds that cost levels so require and

(ii) By not to exceed 140 percent where the Assistant Secretary determines it necessary on a project-by-project basis.

In no case, however, may any such increase exceed 90 percent, where the Assistant Secretary determines that there is involved a mortgage purchased or to be purchased by the Government National Mortgage Association (GNMA) in implementing its Special Assistance Functions under section 305 of the National Housing Act (as section 305 existed immediately before its repeal on November 30, 1983).

(2) * * *

* * * * *

Date: March 2, 1988.

Thomas T. Demery,

Assistant Secretary for Housing—Federal Housing Commissioner.

BILLING CODE 4210-27-M

---

24 CFR Part 888

[Docket No. N-88-1786; FR-2377]

Section 8 Housing Assistance Payments Program—Fair Market Rent Schedules for Use in the Existing Housing Certificates Program, Loan Management and Property Disposition Programs, Moderate Rehabilitation Program and Housing Voucher Program

AGENCY: Office of the Assistant Secretary for Housing-Federal Housing Commissioner, HUD.

ACTION: Final FY-88 fair market rents.

SUMMARY: Section 8(c)(1) of the United States Housing Act of 1937 requires the Secretary to publish Fair Market Rents periodically, but not less frequently than annually. This notice announces final FY-1988 Fair Market Rent schedules for the Section 8 Existing Housing Certificate Program (Part 882, Subparts A and B) including space rentals by owners of manufactured homes under the Section 8 Existing Housing Certificates Program (Part 882, Subpart F); the Section 8 Moderate Rehabilitation Program (Part 882, Subparts D and E); and Section 8 existing housing assisted under Part 886, Subparts A and C (Section 8 loan management and property disposition programs). FMRs are used to determine payment standard schedules in the Housing Voucher Program.

The Department published proposed FMRs for the Section 8 Existing Housing Program on August 28, 1987 (52 FR 32672) and solicited public comment. Today's document is the second announcement of effective FY-1988 FMRs. This notice contains an analysis and response to public comments on the proposed FMRs and makes appropriate revisions to the first announcement of effective FY-1988 FMRs published December 21, 1987 (52 FR 48205). This notice also establishes Westchester County, NY as a separate FMR area, sets the FMRs for this area, and requests comments on the Westchester County FMRs.

DATE: The Fair Market Rents published in this notice are effective on March 18, 1988. Comments are invited on the announced FMRs for Westchester County, NY. These comments are due May 17, 1988.

ADDRESSES: Interested persons should submit their comments on Westchester County FMRs to the Rules Docket Clerk Office of the General Counsel, Room 10276, Department of Housing and Urban Development, 451 Seventh Street SW., Washington, DC 20410-0500. Each comment should include the commenter's name and address and must refer to the docket number indicated in the heading of this notice. Each commenter should simultaneously submit a copy of its comments to the Economic and Market Analysis Staff, New York Regional Office, 26 Federal Plaza, New York, NY 10278-0068. A copy of each comment submitted to the Rules Docket Clerk will be available for public inspection during regular business hours at the above Washington, DC addresses.

FOR FURTHER INFORMATION CONTACT: Cecelia D. Livingston, Housing Voucher Division, Office of Elderly and Assisted Housing, telephone (202) 755-6477. For technical information on the development of schedules for specific areas or the method used for the rent

calculations, contact Michael R. Allard, Economic and Market Analysis Division, Office of Economic Affairs, telephone (202) 755-5577. (These are not toll-free numbers.)

SUPPLEMENTARY INFORMATION:

Background

Section 8 of the United States Housing Act of 1937 (the Act) (42 U.S.C. 1437f) authorizes a housing assistance program to aid lower income families in renting decent, safe, and sanitary housing. Assistance payments are limited by Fair Market Rents (FMRs) (or payment standards based on FMRs in the Housing Voucher Program) established by HUD for different areas.

In general, the FMR for an area is the amount that would be needed to rent privately owned, decent, safe, and sanitary rental housing of a modest (non-luxury) nature with suitable amenities.

Proposed Fair Market Rents

On August 28, 1987 (52 FR 32672), the Department proposed FMRs for Section 8 existing housing for FY-1988. These FMRs reflected estimated rent levels as of April 1, 1988. The criteria and methodology used by HUD in developing the proposed FMRs appear at 24 CFR Part 888, Subpart A and have been in use since 1983.

The elements used by HUD in development FMRs are: (1) The 45th percentile rent (that is, the rent below which 45 percent of the standard quality rental housing units are distributed); (2) rents based on units occupied by recent movers (households who moved within two years before the date of the survey data used in these calculations); and (3) exclusion from the data base of public housing units and recently completed housing (units built within two years of the survey dates). (See 24 CFR 888.113.) The FMRs for manufactured home spaces are based on the 45th percentile rent for manufactured home spaces. (See 24 CFR 888.113(a)).

In establishing the proposed FMRs, HUD used the most accurate data available. Data used to compute the FY-1988 FMRs include the 1980 Census data, post-1980 American Housing Survey (AHS) data and reliable area specific data submitted by public commenters in the development of the FY-1986 and FY-1987 FMRs.

This year's proposed FMRs were calculated by updating last year's final FMRs one additional year to April 1, 1988, based on the most recent CPI data available on average annual changes for rents and utilities. This year's proposed FMRs for manufactured homes spaces were calculated by updating last year's FMRs to April 1, 1988, using the most current average annual change in the CPI residential rent index (with heating costs included in the rent factored out).

Final FMR Schedules

On December 21, 1987 (52 FR 48205), HUD published its first notice announcing *effective* FMRs for all FMR areas for FY-1988. In accordance with the procedures announced in the August 28, 1987 notice, the FMRs announced in the December 21, 1987 notice were set either at the proposed level, or at the existing FY-1987 level. (FMRs for FY-1987 were published April 29, 1987 (52 FR 15630) and June 30, 1987 (52 FR 24381).)

The December 21, 1987 publication stated that the announced FMRs were subject to revision only if the FMRs were addressed by public comments. HUD stated that it would publish a second announcement making any necessary revisions to the FMR schedules, based on a review of the information contained in the public comments, as supplemented by information collected by field offices. Today's notice makes these revisions and includes an analysis and response to the public comments.

Modifications Required by Housing and Community Development Act of 1987

Section 142(b) of the Housing and Community Development Act of 1987 (Pub. L. 100-242, approved February 5, 1988) amended section 8(c)(1) of the United States Housing Act of 1937 by adding: "The Secretary shall establish separate fair market rentals under this paragraph for Westchester County in the State of New York." In accordance with this statutory requirement, today's notice establishes separate effective FMRs for Westchester County.

Our prior notices included Westchester County as a part of the New York City FMR area. In response to the request for comments on the proposed FMRs, HUD received a comment filed by Westchester County on behalf of 18 PHAs administering Section 8 housing programs in that county. This comment included Westchester County FMR data. Today's notice provides the public with a further opportunity to comment on the appropriate FMR levels for Westchester County. HUD will accept public comments on this limited issue for 60 days following the publication of this notice. Following HUD's analysis of the public comments, HUD will publish a final notice making any necessary revisions for Westchester County FMRs.

Comments on the Westchester County FMR levels must include sufficient information (including a full description on local data and methodology used) to justify any proposed changes. Recommendations and supporting data must reflect the rent levels that exist within Westchester County. Local rental market surveys must show the 45th percentile rent levels. To be representative, the local data must exclude units built within the last two years of the PHA's survey, should not be drawn solely from vacant units, and should approximate the same proportion of units by structure type (for example, highrise or single family detached) and date of construction as exists in the total local inventory.

Public Comments

The December 21, 1987 notice stated that 80 comments were received in response to the proposed FMRs. HUD inadvertently failed to include one comment, addressing Alleghany, Ashe, Avery, Mitchell, Watauga, Wilkes, and Yancey Counties, NC. This comment has been considered in today's notice, and appropriate revisions to the FMR areas for five of these counties have been made in this notice.

Approximately two-thirds of the comments were submitted by PHAs. Of the remainder, 14 were from State and local governments, nine were from management companies, development corporations, and owners, two were filed by members of Congress, and two were from others.

Except for two comments supporting the proposed FMRs, all commenters stated that one or more of the proposed FMRs for their areas were too low. The Department has evaluated all comments carefully and has sought to look behind the information presented when the commenter's data appeared to have merit, but were incompletely or poorly represented. As a result of HUD's evaluation, modifications have been made in 38 of the 94 contested FMR areas.

Computation of FMRs

a. *Geographic areas.* Section 888.113 provides that FMRs are established for all Metropolitan Statistical Areas (MSAs), Primary Metropolitan Statistical Areas (PMSAs), nonmetropolitan counties, and county equivalents. Twenty-one commenters felt, given the actual markets existing in their areas, that it would be more appropriate for their jurisdiction to be included in an adjacent FMR area (with higher FMRs), to recompute FMRs for their areas to reflect FMRs in an

VOL
53
ISS
53
MR
18
1988
UMI

adjacent or similarly situated FMR area with higher FMRs, or to exclude certain lower cost areas from their FMR areas.

A FMR published for Section 8 Existing Housing is established on a market area basis (*i.e.*, a geographic area within which housing units are in mutual competition). The factors used by the Office of Management and Budget (OMB) to define metropolitan and nonmetropolitan areas include commuting patterns, and population densities. These factors are also appropriate to define housing market areas. The Department believes that these OMB determinations constitute a rational basis for determining housing market areas and will continue to use the definitions of metropolitan and nonmetropolitan areas adopted by OMB.

Since FMRs within any geographic area reflect the rent level below which 45 percent of the rents will fall, actual rents will vary within each area. Thus, the 45th percentile rents for a specific locality within a FMR area may be more than the FMR. For such areas, HUD's regulations permit, under specified conditions, PHAs to approve rents that exceed FMRs. (See e.g., 24 CFR 882.106(a).) HUD has found that these exception rents usually will be sufficient to achieve the objectives of the Section 8 program.

b. *Data base.* As noted above, HUD computes FMRs by using a combination of 1980 census, AHS and CPI data. One commenter questioned HUD's use of the 1980 census data as a base. This commenter felt that the census figures, when applied to its FMR area, were erroneous or misinterpreted by HUD. HUD continues to believe that the estimates resulting from the application of the Census, AHS and CPI data provide FMRs that generally reflect local market conditions and changes. However, the Department relies on the public comment process to identify those areas where the use of the data is not appropriate or where there have been abrupt changes in local market areas. (Most questions regarding the accuracy of the HUD data base have been addressed at length in prior FMR publications. See HUD's August 29, 1985 publication of FMRs for FY-1986 (50 FR 31014, 31015-16) and the June 30, 1987 publication of FMRs for FY-1987 (52 FR 24382, 24383-84).

c. *Rent differentials by unit size.* One commenter argued that the two-bedroom FMR for its area was too low. The commenter's argument was based on the incorrect assumption that the two-bedroom FMRs are derived by applying a fixed percentage to the zero-bedroom (efficiency unit) FMR level for the area. FMRs are actually computed by using the *two-bedroom* FMR as a base. (*I.e.* HUD establishes the two-bedroom FMR at the 45th percentile, and establishes FMRs for larger and smaller bedroom sizes by applying fixed percentages to the two-bedroom FMR). The two-bedroom FMR is used because these units comprise the largest share of the rental inventory. Percentage relationships developed from national data from the 1980 census and post-1980 American Housing Surveys are used to establish 45th percentile rents for zero- and one-bedroom units. Higher percentage relationships are provided for units that contain three or more bedrooms. (See 24 CFR 888.113(c).)

To the extent that commenters have demonstrated that the fixed percentages do not reflect their local market, the Department has made appropriate adjustments to the final FMRs.

d. *Local conditions.* Approximately two-thirds of the commenters argued that HUD's proposed FMRs ignored local conditions mandating higher FMRs. Commenters cited factors that create a high demand for, and low supply of, suitable rental properties in the area. These factors included: the location or expansion of universities, military bases or industries in the area; the proximity of major, often expanding, urban centers; the loss of housing due to condominium or cooperative conversions, gentrification, condemnation, demolition, or natural disasters; the high demand for seasonal rentals; declines in new construction; rapid population increases; and other factors. Many commenters cited sharp increases in housing costs including utility costs, insurance expenses, security costs, debt servicing costs, and local taxes.

HUD recognizes that the proposed FMRs may not keep pace with abrupt shifts in local rental housing conditions. However, we rely on local data submitted during the public comment period to identify such shifts. To the extent that the public comments have demonstrated that the proposed FMRs do not adequately reflect local conditions, the FMRs published for effect today have been revised.

Several commenters noted that increased utility costs have caused or will soon cause PHAs to increase the amount of utility allowances. These commenters noted that the increased allowances will effectively reduce the amount available for contract rent and urged HUD to permit FMR increases to offset the projected increases to the allowances.

The FMRs developed under Part 888 are intended to include the cost of contract rent and utilities (except telephones). In market areas for which data were submitted to demonstrate utility cost increases beyond the level reflected in the proposed FMRs, HUD has made appropriate adjustments.

e. *Tax code changes.* Several commenters predicted that recent tax code changes will increase ownership costs and argued that the FY-1988 FMRs should reflect these expected increases. Like all increase to expenses associated with the ownership of rental housing, if the projected changes occur, they will be reflected by an increase to the 45th percentile, standard quality, recent mover FMR standard. To the extent that these tax impacts will occur and are reflected in 45th percentile rents for future years, HUD will make appropriate increases to future FMRs levels.

Impact of the FMRs

Approximately 60 percent of the commenters discussed the impact that low FMRs would have on the functioning of Section 8 existing housing. The primary concern was that the proposed FMRs would not ensure an adequate supply of decent, safe and sanitary housing. Specifically, commenters argued that proposed FMRs would: (1) Not provide a sufficient economic incentive to owners to participate or continue to participate in the program; (2) severely limit the options of certificate and housing voucher holders, making it difficult or impossible to locate housing within prescribed time limits; (3) cause the clustering of assisted families in areas of low income or minority concentration, contrary to the purposes of the Section 8 program; (4) reduce the quality of housing by limiting family options to marginally acceptable units and by failing to provide the owner with sufficient revenues to maintain and rehabilitate deteriorating rental units; (5) increase homelessness; (6) have a negative impact on the Housing Voucher Program by increasing the percentage of family income necessary to rent an acceptable unit; (7) make it easier for owners to discriminate against low income and minority individuals; and (8) encourage owners to demand illegal "side payments" from certificate holders. One commenter argued that low FMRs would make it difficult to find owners willing to participate in the Rental Rehabilitation program.

The Department balanced many competing factors in establishing the FMR standard. HUD's objective was to set FMRs at a level high enough to provide a broad range of housing

locations and amenities to assisted families while recognizing the need to serve as many families as possible within the limited resources. The use of the 45th percentile of recent mover rents is a standard that meets this objective.

Administrative Fee

FMRs are used to calculate the administrative fees paid to PHAs under the covered section 8 programs. (Administrative fees are not provided under the Property Disposition and Loan Management Programs (24 CFR Part 886, Subparts A and C) because HUD, rather than the PHA, administers these programs.) For the purpose of computing the administrative fee of a PHA administering a Section 8 program in a FMR area where the two-bedroom FMR is increased by this notice or was increased by the first notice of effective FMRs for FY-1988, the administrative fee will be computed as if the FMR was in effect on December 21, 1987, the effective date of the first announcement of FMRs.

One commenter argued that the administrative fee calculated from the proposed FMRs is inadequate and would impair the PHA's ability to administer the program. One component of the administrative fee (the ongoing fee) is based upon a percentage of the FMR. Today's notice is concerned only with the amount of the FMRs, not with the methodology for determining fees. Any change in the administrative fee calculation will be considered in the context of the rules and requirements for the affected program.

Other Matters

A Finding of No Significant Impact with respect to the environment as required by the National Environmental Policy Act (42 U.S.C. 4321-4374) is unnecessary, since the Section 8 Existing Housing program is categorically excluded from the Department's National Environment Policy Act procedures under 24 CFR 50.20(d).

Under 5 U.S.C. 605(b) (the Regulatory Flexibility Act), the Undersigned hereby certifies that this Notice does not have a significant economic impact on a substantial number of small entities because FMRs reflect the rents for similar quality units in the area. Therefore, FMRs do not change the rent from that which would be charged if the project were not in the Section 8 program.

This document does not constitute a "major rule" as that term is defined in section 1(b) of Executive Order 12291 on Federal Regulation issued on February 17, 1981. Analysis of the document indicates that it does not (1) have an annual effect on the economy of $100 million or more; (2) cause a major increase in costs or prices for consumers, individual industries, Federal, State or local government agencies, or geographic regions; or (3) have a significant adverse effect on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

The Catalog of Federal Domestic Assistance program number is 14.156, Lower-Income Housing Assistance Program (Section 8).

Accordingly, the Fair Market Rent Schedules are proposed to be amended as follows:

Date: March 10, 1988.

James E. Schoenberger,

General Deputy Assistant Secretary for Housing-Federal Housing Commissioner.

Section 8 Fair Market Rent Schedules for Use in the Existing Housing Certificate Program, Loan Management and Property Disposition Programs, Moderate Rehabilitation Program and Housing Voucher Program; Schedules B & D—General Explanatory Notes

1. Geographic Coverage

a. Except as described in paragraph c. below, FMRs for Existing Housing (Schedule B) are established for all Metropolitan Statistical Areas (MSAs), Primary Metropolitan Statistical Areas (PMSAs), nonmetropolitan counties, and county equivalents in the United States, District of Columbia, Puerto Rico, the Virgin Islands, and Guam. FMRs also are established for nonmetropolitan parts of counties in the New England States.

b. Except as described in paragraph c. below, FMRs for Manufactured Home spaces in the Section 8 Certificate Program (Schedule D) are established for all MSAs, PMSAs, selected nonmetropolitan counties, and the residual nonmetropolitan portion of each State.

c. FMRs for Existing Housing (Schedule B) and Manufactured Homes in the Section 8 Certificate Program (Schedule D) are also established for Westchester County, NY.

d. The current 338 MSAs and PMSAs are those established by the Office of Management and Budget effective October 18, 1986.

2. Arrangement of FMR Areas and Identification of Constituent Parts

a. The FMR areas in Schedules B and D are listed alphabetically by MSA-PMSA and nonmetropolitan county within each State.

b. The constituent counties (and New England towns and cities) included in each MSA and PMSA are listed immediately following the MSA-PMSA names in each State listed in Schedule B. All of the constituent parts of an MSA that are in more than one State can be identified by consulting the listings for each applicable State.

c. Two nonmetropolitan counties are listed alphabetically on each line of the nonmetropolitan county listings.

d. The New England towns and cities included in a nonmetropolitan part of a county are listed immediately following the county name.

e. The FMRs are listed by dollar amount on the first line beginning with the FMR area name.

BILLING CODE 4210-27-C

OFFICE OF INDEPENDENT COUNSEL

28 CFR Part 701

Procedures for Disclosure of Records Under the Freedom of Information Act

AGENCY: Office of Independent Counsel.

ACTION: Final rule.

SUMMARY: On December 14, 1987, the Office of Independent Counsel issued a proposed regulation to amend Title 28 of the Code of Federal Regulations, Chapter VII, by adding Part 701, Procedures for Disclosure of Records Under the Freedom of Information Act. This action was necessary to ensure the effective discharge of the Office's obligations under the Freedom of Information Act.

The Office of Independent Counsel received one comment concerning its proposed regulation. The Office of Independent Counsel has reviewed the comment and has made minor changes regarding fees (§ 701.11) and notice to business submitters (§ 701.15).

EFFECTIVE DATE: March 18, 1988.

FOR FURTHER INFORMATION CONTACT: Pamela Krems, Office of Independent Counsel, Telephone Number (202) 383–8989.

SUPPLEMENTARY INFORMATION: The Office of Independent Counsel operates pursuant to two distinct and separate sources of authority. On December 4, 1986, Attorney General Edwin Meese III filed an application for appointment of an Independent Counsel with the Division for the purpose of Appointing Independent Counsels of the United States Court of Appeals for the District of Columbia Circuit. On December 19, 1986, the Special Division of the Court of Appeals filed an order appointing Lawrence E. Walsh as Independent Counsel in the Iran/Contra matter. Order Appointing Independent Counsel, *In re Oliver L. North, et al.*, Div. No. 86–6 (Dec. 19, 1986).

On March 5, 1987, Attorney General Meese issued a regulation that created an "Office of Independent Counsel: Iran/Contra" and provided that office with the same jurisdiction and powers that it already possessed under the Ethics in Government Act, 28 U.S.C. 591–598, and the December 19, 1986 court order appointing Independent Counsel Walsh. 52 FR 7270 (Mar. 10, 1987), 9241 (Mar. 23, 1987) (to be codified at 28 CFR Parts 600 and 601). The "Office of Independent Counsel" and the "Office of Independent Counsel: Iran/Contra" are in actuality one and the same office. This regulation is issued by Independent Counsel under both grants of authority.

This order relates primarily to individuals rather than to small business entities. However, as required by the Regulatory Flexibility Act, 5 U.S.C. 601–612, the Office hereby states that this regulation will not have a significant economic impact on a substantial number of small business entities.

List of Subjects in 28 CFR Part 701

Freedom of Information.

Dated: March 14, 1988.

Lawrence E. Walsh,

Independent Counsel.

For the reasons set forth in the preamble, and pursuant to the authority vested in me by the Ethics in Government Act, 28 U.S.C. 591–598, the December 19, 1986 Court order, and the authority delegated to me by the Attorney General pursuant to the Attorney General's regulation issued on March 5, 1987, 52 FR 7270 (Mar. 10, 1987), 9241 (Mar. 23, 1987), and 5 U.S.C. 552, Title 28 of the Code of Federal Regulations, Chapter VII, is amended by adding Part 701, to read as follows:

PART 701—PROCEDURES FOR DISCLOSURE OF RECORDS UNDER THE FREEDOM OF INFORMATION ACT

Sec.
701.10 General provisions.
701.11 Requirements pertaining to requests.
701.12 Responses by the Office to requests.
701.13 Form and content of Office responses.
701.14 Classified information.
701.15 Business information.
701.16 Appeals.
701.17 Preservation of Records.
701.18 Fees.
701.19 Other rights and services.

Authority: 5 U.S.C. 552.

§ 701.10 General provisions.

(a) This part contains the regulations of the Office of Independent Counsel implementing the Freedom of Information Act ("FOIA"), 5 U.S.C. 552. Information customarily furnished to the public in the regular course of the performance of official duties may continue to be furnished to the public without complying with this part, provided that the furnishing of such information would not violate the Privacy Act of 1974, 5 U.S.C. 552a, and would not be inconsistent with regulations issued pursuant to the Privacy Act. To the extent permitted by other laws, the Office will also consider making available records that it is permitted to withhold under the FOIA if it determines that such disclosure would be in the public interest and would not interfere with the functioning of the Office.

(b) As used in this part, the following terms shall have the following meanings:

(1) "Appeal" means the appeal by a requester of an adverse determination of his request, as described in 5 U.S.C. 552(a)(6)(A)(ii).

(2) "Agency" has the meaning given in 5 U.S.C. 551(1) and 5 U.S.C. 552(e).

(3) "Request" means any request for records made pursuant to 5 U.S.C. 552(a)(3).

(4) "Requester" means any person who makes a request to the Office.

(5) "Business information" means trade secrets or other commercial or financial information.

(6) "Business submitter" means any commercial entity that provides business information to the Office and that has a proprietary interest in the information.

(c) The FOIA/PA Officer of the Office of Independent Counsel shall be responsible to Independent Counsel for all matters pertaining to the administration of this part.

(d) The Office of Independent Counsel shall comply with the time limits set forth in the FOIA for responding to and processing requests and appeals, unless there are exceptional circumstances within the meaning of 5 U.S.C. 552(a)(6)(C). The Office shall notify a requester whenever it is unable to respond to or process the request or appeal within the time limits established by the FOIA. The Office shall respond to and process requests and appeals in their approximate order of receipt, to the extent consistent with sound administrative practice.

§ 701.11 Requirements pertaining to requests.

(a) *How made and addressed.* A requester may make a request under this part for a record of the Office of Independent Counsel by writing to the Office at: FOIA/PA Officer, Office of Independent counsel, Suite 701 West, 555 Thirteenth Street NW., Washington, DC 20004. A request should be sent to the Office at its proper address and both the envelope and the request itself should be clearly marked: "Freedom of Information Act Request."

(b) *Request must reasonably describe the records sought.* A request must describe the records sought in sufficient detail to enable Office personnel to locate the records with a reasonable amount of effort. A request for a specific category of records shall be regarded as fulfilling this requirement if it enables responsive records to be indentified by a technique or process that is not unreasonably burdensome or disruptive of Office operations. Wherever possible, a request should include specific information about each record sought, such as the date, title or name, author, recipient, and subject matter of the record. In additon, if the request seeks records pertaining to pending litigation, the request should indicate the title of the case, the court in which the case was filed, and the nature of the case. If the Office determines that a request does not reasonably describe the records sought, the Office shall either advise the requester what additional information is needed or otherwise state why the request is insufficient. The Office also shall extend to the requester an opportunity to confer with Office personnel with the objective of reformulating the request in a manner that will meet the requirements of this section.

(c) *Agreement to pay fees.* (1) The filing of a request under this part shall be deemed to constitute an agreement by the requester to pay all applicable fees charged under § 701.18 of this part, up to $25, unless a waiver of fees is sought. The Office shall confirm this agreement in its letter of acknowledgement to the requester. When filing a request, a requester may specify a willingness to pay a greater amount, if applicable.

(2) If a waiver of fees up to $25 is sought in the requester's request to the Office, the Office will make its determination on the fee waiver (and notify the requester as soon as possible) after receipt of the request. The submission of a request for fee waiver will not delay the Office's responsibility to search for responsive records.

(3) If the fee waiver is denied by the Office, and the fees involved total $25 or less, the Office will send the responsive documents to the requester, along with a bill for fees. The collection of the unpaid bill shall follow the procedures found herein at § 701.18 (g)(2) and (h).

§ 701.12 Responses by the Office to requests.

(a) *Authority to grant or deny requests.* The head of the Office, or his designee, is authorized to grant or deny and request for a record of the Office.

(b) *Initial action by the Office.* When the Office receives a request for a record in its possession, the Office shall promptly determine whether another agency of the Government is better able to determine whether the record is exempt, to any extent, from mandatory disclosure under the FOIA; and whether the record, if exempt to any extent from mandatory disclosure under the FOIA, should nonetheless be released to the requester as a matter of discretion. If the Office determines that it is the agency best able to determine whether to disclose the record in response to the request, then the Office shall respond to the request. If the Office determines that it is not the agency best able to determine whether to disclose the record in response to the request, the Office shall either:

(1) Respond to the request, after consulting with the other agency best able to determine whether to disclose the record and with any other agency having a substantial interest in the requested record or the information contained therein; or

(2) Refer the responsibility for responding to the request to another agency that generated or originated the record, but only if that other agency is subject to the provisions of the FOIA. Under ordinary circumstances, the agency that generated or originated a requested record shall be presumed to be the agency best able to determine whether to disclose the record in response to the request.

(c) *Law-enforcement information.* Whenever a request is made for a record containing information that relates to an investigation of a possible violation of criminal law or to a criminal law-enforcement proceeding and that was generated or originated by another agency, the Office shall refer the responsibility for responding to the request to that other agency; however, such referral shall extend only to the information generated or originated by that other agency.

(d) *Classified information.* Whenever a request is made for a record containing information that has been classified, or that may be eligible for classification, by another agency under the provisions of Executive Order 12356 or any other Executive Order concerning the classification of records, the Office shall refer the responsibility for responding to the request to the agency that classified the information or should consider the information for classification. Whenever a record contains information that has been derivatively classified by the Office because it contains information classified by another agency, the Office shall refer the responsibility for responding to the request to the agency that classified the underlying information; however, such referral shall extend only to the information classified by the other agency.

(e) *Notice of referral.* Whenever the Office refers all or any part of the responsibility for responding to a request to another agency, the Office will consult with the other agency to obtain specific approval to notify the requester of the referral and inform the requester of the name and address of the agency to which the request has been referred and the portions of the request so referred.

(f) *Agreements regarding consultations and referrals.* No provision of this section shall preclude formal or informal agreements between the Office and another agency to eliminate the need for consultations or referrals of requests or classes of requests.

(g) *Separate referrals of portions of a request.* Portions of a request may be referred separately to one or more other agencies whenever necessary to process the request in accordance with the provisions of this section.

(h) *Date for determining responsive records.* In determining records responsive to a request, the Office ordinarily will include only those records within the Office's possession and control as of the date of its receipt of the request.

§ 701.13 Form and content of Office responses.

(a) *Form of notice granting a request.* After the Office has made a determination to grant a request in whole or in part, the Office shall so notify the requester in writing. The notice shall describe the manner in which the record will be disclosed, whether by providing a copy of the record to the requester or by making a copy of the record available to the requester for inspection at a reasonable time and place. The procedure for such an inspection shall not unreasonably disrupt the operations of the Office. The Office shall inform the requester in the notice of any fees to be charged in accordance with the provisions of § 701.18 of this part.

(b) *Form of notice denying a request.* The Office, when denying a request in whole or in part, shall so notify the requester in writing. The notice must be signed by the FOIA/PA Officer, or her designee, and shall include:

(1) The name and title or position of the person responsible for the denial;

(2) A brief statement of the reason or reasons for the denial, including the FOIA exemption or exemptions that the Office has relied upon in denying the request and a brief explanation of the manner in which the exemption or exemptions apply to each record withheld; and

(3) A statement that the denial may be appealed under § 701.16(a) and a description of the requirements of that subsection.

(c) *Record cannot be located or has been destroyed.* If a requested record cannot be located from the information supplied, or is known or believed to have been destroyed or otherwise disposed of, the Office shall so notify the requester in writing.

§ 701.14 Classified information.

In processing a request for information that is classified or classifiable under Executive Order 12356 or any other Executive Order concerning the classification of records, the Office shall review the information to determine whether it warrants classification. Information that does not warrant classification shall not be withheld from a requester on the basis of 5 U.S.C. 552(b)(1). The Office shall, upon receipt of any appeal involving classified or classifiable information, take appropriate action to ensure compliance with Executive Order 12356 or any other Executive Order concerning the classification of records.

§ 701.15 Business information.

(a) *In general.* Business information provided to the Office by a business submitter shall not be disclosed pursuant to a FOIA request except in accordance with this section.

(b) *Notice to business submitters.* The Office shall provide a business submitter with prompt written notice of a request encompassing its business information whenever required under paragraph (c) of this section, except as is provided in paragraph (g) of this section, and only to the extent permitted by law. Such written notice shall either describe the exact nature of the business information requested or provide copies of the records or portions thereof containing the business information.

(c) *When notice is required.* For business information submitted to the Office it shall provide a business submitter with notice of a request whenever the business submitter has in good faith designated the information as commercially or financially sensitive, or the Office has reason to believe that disclosure of the information may result in commercial or financial injury to the business submitter. Notice of a request for business information falling within the former category shall be required for a period of not more than ten years after the date of submission unless the business submitter requests, and provides acceptable justification for, a specific notice period of greater duration. Whenever possible, the submitter's claim of confidentiality should be supported by a statement or certification by an officer or authorized representative of the company that the information in question is in fact confidential commercial or financial information and has not been disclosed to the public.

(d) *Opportunity to object to disclosure.* Through the notice described in paragraph (b) of this section, the Office shall afford a business submitter a reasonable period within which to provide the Office with a detailed statement of any objection to disclosure. Such statement shall specify all grounds for withholding any of the information under any exemption of the FOIA and, in the case of Exemption 4, shall demonstrate why the information is contended to be a trade secret or commercial or financial information that is privileged or confidential. Information provided by a business submitter pursuant to this paragraph may itself be subject to disclosure under the FOIA.

(e) *Notice of intent to disclose.* (1) The Office shall consider carefully a business submitter's objections and specific grounds for nondisclosure prior to determining whether to disclose business information. Whenever the Office decides to disclose business information over the objection of a business submitter, the Office shall forward to the business submitter a written notice which shall include:

(i) A statement of the reasons for which the business submitter's disclosure objections were not sustained;

(ii) A description of the business information to be disclosed; and

(iii) A specified disclosure date.

(2) Such notice of intent to disclose shall be forwarded a reasonable number of days, as circumstances permit, prior to the specified date upon which disclosure is intended. A copy of such disclosure notice shall be forwarded to the requester at the same time.

(f) *Notice of FOIA lawsuit.* Whenever a requester brings suit seeking to compel disclosure of business information covered by paragraph (c) of this section, the Office shall promptly notify the business submitter.

(g) *Exceptions to notice requirements.* The notice requirements of this section shall not apply if:

(1) The Office determines that the information should not be disclosed;

(2) The information lawfully has been published or otherwise made available to the public;

(3) Disclosure of the information is required by law (other than 5 U.S.C. 552); or

(4) The Office is a criminal law-enforcement agency that acquired information in the course of a lawful investigation of a possible violation of criminal law.

§ 701.16 Appeals.

(a) *Appeals to Independent Counsel.* When a request for access to records or for a waiver of fees has been denied in whole or in part, or when the Office fails to respond to a request within the time limits set forth in the FOIA, the requester may appeal the denial of the request to Independent Counsel within 30 days of his receipt of a notice denying his request. An appeal to Independent Counsel shall be made in writing and addressed to the Office of Independent Counsel, Suite 701 West, 555 Thirteenth Street NW., Washington, DC 20004. Both the envelope and the letter of appeal itself must be clearly marked: "Freedom of Information Act Appeal."

(b) *Action on appeals by the Office of Independent Counsel.* Unless Independent Counsel otherwise directs, his designee shall act on behalf of the Independent Counsel on all appeals under this section, except that a denial of a request by Independent Counsel shall constitute the final action of the Office on that request.

(c) *Form of action on appeal.* The disposition of an appeal shall be in writing. A decision affirming in whole or in part the denial of a request shall include a brief statement of the reason or reasons for the affirmance, including each FOIA exemption relied upon and its relation to each record withheld, and a statement that judicial review of the denial is available in the United States District Court for the judicial district in which the requester resides or has his principal place of business, the judicial district in which the requested records are located, or the District of Columbia. If the denial of a request is reversed on appeal, the requester shall be so notified and the request shall be processed promptly in accordance with the decision on appeal.

§ 701.17 Preservation of records.

The Office shall preserve all correspondence relating to the requests it receives under this part, and all records processed pursuant to such requests, until such time as the destruction of such correspondence and records is authorized pursuant to Title 44 of the United States Code. Under no circumstances shall records be destroyed while they are the subject of a pending request, appeal, or lawsuit under the FOIA.

§ 701.18 Fees.

(a) *In general.* Fees pursuant to the FOIA shall be assessed according to the

VOL
53
ISS
53
MR
18
988
MI

schedule contained in paragraph (b) of this section for services rendered by the Office in responding to and processing requests for records under this part. All fees so assessed shall be charged to the requester, except when the charging of fees is limited under paragraph (c) of this section or when a waiver or reduction of fees is granted under paragraph (d) of this section. The Office shall collect all applicable fees before making copies of requested records available to a requester. Requesters shall pay fees by check or money order made payable to the Treasury of the United States.

(b) *Charges.* In responding to requests under this part, the following fees shall be assessed, unless a waiver or reduction of fees has been granted pursuant to paragraph (d) of this section:

(1) *Search.* (i) No search fee shall be assessed with respect to requests by educational institutions, noncommercial scientific institutions, and representatives of the news media (as defined in paragraphs (j)(6), (j)(7), and (j)(8) of this section, respectively). Search fees shall be assessed with respect to all other requests, subject to the limitations of paragraph (c) of this section. The Office may assess fees for time spent searching even if it fails to locate any respective record or when records located are subsequently determined to be entirely exempt from disclosure.

(ii) For each quarter hour spent by clerical personnel in searching for and retrieving a requested record, the fee shall be $2.25. When the search and retrieval cannot be performed entirely by clerical personnel—for example, when the identification of records within the scope of the request requires the use of professional personnel—the fee shall be $4.50 for each quarter hour of search time spent by such professional personnel. When the time of managerial personnel is required, the fee shall be $7.50 for each quarter hour of time spent by such managerial personnel.

(iii) For computer searches of records, which may be undertaken through the use of existing programming, requesters shall be charged the actual direct costs of conducting the search, although certain requesters (as defined in paragraph (c)(2) of this section) shall be entitled to the cost equivalent of two hours of manual search time without charge. These direct costs shall include the cost of operating a central processing unit for that portion of operating time that is directly attributable to searching for records responsive to a request, as well as the costs of operator/programmer salary apportionable to the search (at no more than $4.50 per quarter hour of time so spent). The Office is not required to alter or develop programming to conduct a search.

(2) *Duplication.* Duplication fees shall be assessed with respect to all requesters, subject to the limitations of paragraph (c) of this section. For a paper photocopy of a record (no more than one copy of which need be supplied), the fee shall be $0.10 per page. For other methods of duplication, the Office shall charge the actual direct costs of duplicating a record.

(3) *Review.* Review fees shall be assessed with respect to only those requesters who seek records for a commercial use, as defined in paragraph (j)(5) of this section. For each quarter hour spent by agency personnel in reviewing a requested record for possible disclosure, the fee shall be $4.50, except that when the time of professional personnel is required, the fee shall be $7.50 for each quarter hour of time spent by such managerial personnel. Review fees shall be assessed only for the initial record review, *i.e.*, all of the review undertaken when the Office analyzes the applicability of a particular exemption to a particular record or record portion at the initial request level. No charge shall be assessed for review at the administrative appeal level of an exemption already applied. However, records or record portions withheld pursuant to an exemption that is subsequently determined not to apply may be reviewed again to determine the applicability of other exemptions not previously considered. The costs of such a subsequent review are properly assessable, particularly when that review is made necessary by a change of circumstances.

(c) *Limitations on charging fees.* (1) No search or review fee shall be charged for a quarter-hour period unless more than half of that period is required for search or review.

(2) Except for requesters seeking records for a commercial use (as defined in paragraph (j)(5) of this section), the Office shall provide without charge

(i) The first 100 pages of duplication (or its cost equivalent), and

(ii) The first two hours of search (or its cost equivalent).

(3) Whenever a total fee calculated under this section is $5.00 or less, no fee shall be charged.

(4) The provisions of paragraphs (c)(2) and (3) of this section work together. For requesters other than those seeking records for a commercial use, no fee shall be charged unless the cost of search in excess of two hours plus the cost of duplication in excess of 100 pages exceeds $5.00.

(d) *Waiver or reduction of fees.* (1) Records responsive to a request under the FOIA shall be furnished without charge or at a charge reduced below that established under paragraph (b) of this section when the Officer determines, based upon information provided by a requester in support of a fee waiver request or otherwise made known to the Office, that disclosure of the requested information is in the public interest because it is likely to contribute significantly to public understanding of the operations or activities of the government and is not primarily in the commercial interest of the requester. Requests for a waiver or reduction of fees shall be considered on a case-by-case basis.

(2) In order to determine whether the first fee waiver requirement is met—*i.e.*, that disclosure of the requested information is in the public interest because it is likely to contribute significantly to public understanding of the operations or activities of government—the Office shall consider the following four factors in sequence:

(i) *The subject of the request: Whether the subject of the requested records concerns "the operations or activities of the government."* The subject matter of the requested records, in the context of the request, must specifically concern the identifiable operations of the federal government—with a connection that is direct and clear, not remote or attenuated. Furthermore, the records must be sought for their informative value with respect to those government operations or activities; a request for access to records for their intrinsic informational content alone would not satisfy this threshold consideration.

(ii) *The informative value of the information to be disclosed: Whether the disclosure is "likely to contribute" to an understanding or government operations or activities.* The disclosable portions of requested records must be meaningfully informative or specific governmental operations or activities in order to hold potential for contributing to increased public understanding of those operations and activities. The disclosure of information that already is in the public domain, in either a duplicative or a substantially identical form, would not be likely to contribute to such understanding, as nothing new would be added to the public record.

(iii) *The contribution to an understanding of the subject by the public likely to result from disclosure: Whether disclosure of the requested information will contribute to "public understanding."* The disclosure must contribute to the understanding of the public at large, as opposed to the individual understanding of the requester or a narrow segment of identified persons. A requester's identity and qualifications—*e.g.*, expertise in the subject area and ability and intention to convey effectively information to the general public—should be considered. It reasonably may be presumed that a representative of the news media (as defined in paragraph (j)(8) of this section) who has access to the means of public dissemination readily will be able to satisfy this consideration. Requests from libraries or other record repositories (or requesters who intend merely to disseminate information to such institutions) shall be analyzed, like those of other requesters, to identify a particular person who represents that he actually will use the requested information in scholarly or other analytic work and then disseminate it to the general public.

(iv) *The significance of the contribution to public understanding: Whether the disclosure is likely to contribute "significantly" to public understanding of government operations or activities.* The public's understanding of the subject matter in question, as compared to the level of public understanding existing prior to the disclosure, must be likely to be enhanced by the disclosure to a significant extent. The Office shall not make separate value judgments as to whether information, even though it in fact would contribute significantly to public understanding of the operations or activities of the government, is "important" enough to be made public.

(3) In order to determine whether the second fee waiver requirement is met—*i.e.*, that disclosure of the requested information is not primarily in the commercial interest of the requester—the Office shall consider the following two factors in sequence:

(i) *The existence and Magnitude of a commercial interest: Whether the requester has a commercial interest that would be furthered by the requested disclosure.* The Office shall consider all commercial interests of the requester (with reference to the definition of "commercial use" in paragraph (j)(5) of this section), or any person on whose behalf the requester may be acting, but shall consider only those interests that would be furthered by the requested disclosure. In assessing the magnitude of identified commercial interests, consideration shall be given the role that such FOIA-disclosed information plays with respect to those commercial interests, as well as to the extent to which FOIA disclosures serve those interests overall. Requesters shall be given a reasonable opportunity in the administrative process to provide information bearing upon this consideration.

(ii) *The primary interest in disclosure: Whether the magnitude of the identified commercial interest of the requester is sufficiently large, in comparison with the public interest in disclosure, that disclosure is "primarily in the commercial interest of the requester."* A fee waiver or reduction is warranted only when, once the "public interest" standard set out in paragraph (d)(2) of this section is satisfied, that public interest can fairly be regarded as greater in magnitude than that of the requester's commercial interest in disclosure. The Office shall ordinarily presume that, where a news media requester has satisfied the "public interest" standard, that will be the interest primarily served by disclosure to that requester. Disclosure to data brokers or others who compile and market governmental information for direct economic return shall not be presumed to serve primarily the "public interest."

(4) When only a portion of the requested records satisfies both of the requirements for a waiver or reduction of fees under this paragraph, a waiver or reduction shall be granted only as to that portion.

(5) Requests for the waiver or reduction of fees shall address each of the factors listed in paragraphs (d) (2) and (3) of this section, as they apply to each record request.

(e) *Notice of anticipated fees in excess of $25.00.* When the Office determines or estimates that the fees to be assessed under this section may amount to more than $25.00, the Office shall notify the requester as soon as practicable of the actual or estimated amount of the fees, unless the requester has indicated in advance his willingness to pay fees as high as those anticipated. (If only a portion of the fee can be estimated readily, the Office shall advise the requester that the estimated fee may be only a portion of the total fee.) In cases when a requester has been notified that actual or estimated fees may amount to more than $25.00, the request will be deemed not to have been received until the requester has agreed to pay the anticipated total fee. A notice to the requester pursuant to this paragraph shall offer him the opportunity to confer with Office personnel in order to reformulate his request to meet his needs at a lower cost.

(f) *Aggregating requests.* When the Office reasonably believes that a requester or a group of requesters acting in concert is attempting to divide a request into a series of requests for the purpose of evading the assessment of fees, the Office may aggregate any such requests and charge accordingly. The Office may presume that multiple requests of this type made within a 30-day period have been made in order to evade fees. When requests are separated by a longer period, the Office shall aggregate them only when there exists a solid basis for determining that such aggregation is warranted, *e.g.*, when the requests involve clearly related matters. Multiple requests involving unrelated matters shall not be aggregated.

(g) *Advance payments.* (1) When the Office estimates that a total fee to be assessed under this section is likely to exceed $250.00, it may require the requester to make an advance payment of an amount up to the entire estimated fee before beginning to process the request, except when it receives a satisfactory assurance of full payment from a requester with a history of prompt payment or where a fee waiver, or reduction of fees, has been requested. In the case where a fee waiver or reduction of fees has been requested, the requester shall submit the advance payment, if required by the agency. This prepayment will not affect the Office's responsibility for speedy determination of the fee waiver, or reduction of fees, nor be deemed in derogation of the request for the fee waiver or reduction of fees. If the agency approves the fee waiver, or reduction of fees, the appropriate sum will be reimbursed to the requester, with no accumulated interest, if any.

(2) When a requester has previously failed to pay a records access fee within 30 days of the date of billing, the Office may require the requester to pay the full amount owned, plus any applicable interest (as provided for in paragraph (h) of this section), and to make an advance payment of the full amount of may estimated fee before the Office begins to process a new request or continues to process a pending request from that requester.

(3) For requests other than those described in paragraphs (g) (1) and (2) of this section, the Office shall not require the requester to make an advance payment, *i.e.*, a payment made before work is commenced or continued on a request. Payment owed for work already completed is not an advance payment.

(4) When a component acts under paragraphs (g) (1) or (2) of this section,

the administrative time limits prescribed in subsection (a)(6) of the FOIA for the processing of an initial request or an appeal, plus permissible extensions of these time limits, shall be deemed not to begin to run until the Office has received payment of the assessed fee.

(h) *Charging interest.* The Office may assess interest charges on an unpaid bill starting on the 31st day following the day on which the bill was sent to the requester. Once a fee payment has been received by the Office, even if not processed, the accrual of interest shall be stayed. Interest charges shall be assessed at the rate prescribed in section 3717 of Title 31 U.S.C. and shall accrue from the date of the billing. The Office shall follow the provisions of the Debt Collection Act of 1982, Pub. L. No. 97–265 (Oct. 25, 1982), 96 Stat. 1749, and its implementing procedures, including the use of consumer reporting agencies, collection agencies, and offset.

(i) *Other statutes specifically providing for fees.* (1) The fee schedule of this section does not apply with respect to the charging of fees under a statute specifically providing for setting the level of fees for particular types of records—*i.e.*, any statute that specifically requires a government priniting entity such as the Government Printing Office or the National Technical Information Service to set and collect fees for particular types of records—in order to:

(i) Serve both the general public and private sector organizations by conveniently making available government information;

(ii) Ensure that groups and individuals pay the cost of publications and other services that are for their special use so that these costs are not borne by the general taxpaying public;

(iii) Operate an information-dissemination activity on a self-sustaining basis to the extent possible; or

(iv) Return revenue to the Treasury for defraying, wholly or in part, appropriated funds used to pay the cost of disseminating government information.

(2) When records responsive to requests are maintained for distribution by agencies operating statutorily based fee schedule programs, the Office shall inform requesters of the steps necessary to obtain records from those sources.

(j) *Definitions.* For the purpose of this section:

(1) The term "direct costs" means those expenditures that the Office actually incurs in searching for and duplicating (and, in the case of commercial use requesters, reviewing) records to respond to a FOIA request. Direct costs include, for example, the salary of the employee performing the work (the basic rate of pay for the employee plus 16 percent of that rate to cover benefits) and the cost of operating duplicating machinery. Not included in direct costs are overhead expenses such as costs of space and heating or lighting of the facility in which the records are stored.

(2) The term "search" includes all time spent looking for material that is responsive to a request, including page-by-page or line-by-line identification of material within documents. The Office shall ensure, however, that searches are undertaken in the most efficient and least expensive manner reasonably possible; thus, for example, the Office shall not engage in line-by-line search when merely duplicating an entire document would be quicker and less expensive.

(3) The term "duplication" refers to the process of making a copy of a record necessary to respond to a FOIA request. Such copies can take the form of paper copy, microfilm, audio-visual materials, or machine-readable documentation (*e.g.*, magnetic tape or disk), among others. The copy provided shall be in a form that is reasonably usable by requesters.

(4) The term "review" refers to the process of examining a record located in response to a request in order to determine whether any portion of it is permitted to be withheld. It also includes processing any record for disclosure, *e.g.*, doing all that is necessary to excise it and otherwise prepare it for release, although review costs shall be recoverable even where there ultimately is no disclosure of a record. Review time does not include time spent resolving general legal or policy issues regarding the application of exemptions.

(5) The term "commercial use" in the context of a request refers to a request from or on behalf of one who seeks information for a use or purpose that furthers the commercial, trade, or profit interests of the requester or the person on whose behalf the request is made, which can include furthering those interests through litigation. The Office shall determine, as well as reasonably possible, the use to which a requester will put the records requested. When the circumstances of a request suggest that the requester will put the records sought to a commercial use, either because of the nature of the request itself or because the Office otherwise has reasonable cause to doubt a requester's stated use, the Office shall provide the requester a reasonable opportunity to submit futher clarification.

(6) The term "educational institution" refers to a preschool, a public or private elementary or secondary school, an institution of graduate higher education, and institution of professional education, and an institution of vocational education, which operates a program or programs of scholarly research. To be eligible for inclusion in this category, a requester must show that the request is being made as authorized by and under the auspices of a qualifying institution and that the records are not sought for a commercial use, but are sought in furtherance of scholarly research.

(7) The term "noncommercial scientific institution" refers to an institution that is not operated on a "commercial" basis as that term is referenced in paragraph (j)(5) of this section, and which is operated solely for the purpose of conducting scientific research, the results of which are not intended to promote any particular product or industry. To be eligible for inclusion in this category, a requester must show that the request is being made as authorized by and under the auspices of a qualifying institution and that the records are not sought for a commercial use, but are sought in furtherance of scientific research.

(8) The term "representative of the news media" refers to any person actively gathering news for an entity that is organized and operated to publish or broadcast news to the public. The term "news" means information that is about current events or that would be of current interest to the public. Examples of news media entities include television or radio stations broadcasting to the public at large, and publishers of periodicals (but only in those instances when they can qualify as disseminators of "news") who make their products available for purchase or subscription by the general public. For "freelance" journalists to be regarded as working for a news organization, they must demonstrate a solid basis for expecting publication through that organization; a publication contract would be the clearest proof, but the Office shall also look to the past publication record of a requester in making this determination. To be eligible for inclusion in this category, a requester also must not be seeking the requested records for a commercial use. In this regard, a request for records supporting the news dissemination function of the requester shall not be considered to be for a commercial use.

(k) *Charges for other services and materials.* Apart from the other provisions of this section, when the

Office elects, as a matter of administrative discretion, to comply with a request for a special service or materials, such as certifying that records are true copies or sending them other than by ordinary mail, the actual direct costs of providing the service or materials shall be charged.

§ 701.19 Other rights and services.

Nothing in this part shall be construed to entitle any person, as of right, to any service or to the disclosure of any record to which such person is not entitled under 5 U.S.C. 552.

BILLING CODE [illegible]

DEPARTMENT OF DEFENSE

Department of the Army

32 CFR Part 518

[Army Reg 340–17]

Release of Information and Records From Army Files

AGENCY: Department of the Army, DOD.

ACTION: Final rule.

SUMMARY: The Department of the Army is amending its rule for administering the Freedom of Information Act by revising Initial Denial Authorities' responsibilities resulting from reorganization.

DATES: March 18, 1988.

FOR FURTHER INFORMATION CONTACT: Mr. William A. Walker, Policy and Strategy Directorate, Office of the Director of Information Systems for Command, Control, Communications and Computers, Office of the Secretary of the Army, Washington, DC 20310–0107.

SUPPLEMENTARY INFORMATION: This amendment shifts responsibilities for initial denial authority to conform with the reorganization of the Department of the Army as a result of the Goldwater-Nichols Department of Defense Reorganization Act of 1986, and other organizational realignments. Initial denial responsibility for the functions of the following former offices has been absorbed by the Administrative Assistant to the Secretary of the Army: Assistant Chief of Staff for Information Management (records relating to information systems, including automation, telecommunications, records management, publications, and audio-visual resources); records under the purview of the Directorate for Contracting and the Competition Advocate General, Office of the Deputy Chief of Staff for Logistics, which transferred to the Assistant Secretary of the Army (Research, Development, and Acquisition); The Comptroller of the Army (finance and accounting records); The Deputy Chief of Staff for Research, Development, and Acquisition (records created by his office relating to the Army's research, development, and acquisition programs and activities); The Inspector General; and, the Auditor General. The initial denial authority responsibilities of the Deputy Chief of Staff for Intelligence has been absorbed by the Commander, US Army Intelligence and Security Command. The rule is not a "major rule" as defined by Executive Order 12291. Therefore, no regulatory impact analysis has been prepared. The Department of the Army certifies that this document will not have an impact on a significant number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 et seq.). Therefore, no regulatory flexibility analysis has been prepared. The rule has no collection of information requirements and therefore does not require the approval of OMB under 44 U.S.C. 3501 *et. seq.*

List of Subjects in 32 CFR Part 518

Information, Archives and records, Privacy, Freedom of Information.

Dated: March 4, 1988.

John O. Roach,

Department of the Army Liaison Officer with the Federal Register.

PART 518—[AMENDED]

32 CFR Part 518 is amended to read as follows:

* * * * *

Subpart E—Release and Processing Procedures

1. 32 CFR Part 518.15 is amended by revising paragraphs (a)(4) (i) thru (xvii) and removing (a)(4) (xviii) thru (xxiii) as follows:

§ 518.15 Initial determinations.

(a) * * *

(4) * * *

(i) The Administrative Assistant to the Secretary of the Army, is authorized to act for the Secretary of the Army (SA) on requests for all records maintained by the Office of the Secretary of the Army and its serviced activities, as well as those requests requiring the personal attention of the SA, except the activities specified which follow:

(A) The Inspector General remains a separate IDA authorized to act on requests for all Inspector General records under AR 20–1.

(B) The Auditor General remains a separate IDA authorized to act on requests for records relating to audits done by the U.S. Army Audit Agency under AR 10–2. This includes requests for related records developed by the Audit Agency.

(ii) The Deputy Chief of Staff for Operations and Plans is authorized to act on requests for records relating to strategy formulation; force development; individual and unit training policy; strategic and tactical command and control systems; nuclear and chemical matters; use of DA forces, and military police records and reports; prisoner confinement and correctional records.

(iii) The Deputy Chief of Staff for Personnel is authorized to act on requests for case summaries; letters of instruction to boards; behavioral science records; safety records; and general education records.

(iv) The Deputy Chief of Staff for Logistics is authorized to act on requests for records relating to DA logistical requirements and determinations; policy concerning materiel maintenance and use, equipment standards, and logistical readiness.

(v) The Chief of Engineers is authorized to act on requests for records involving civil works, military construction, engineer procurement, and ecology; and the records of the U.S. Army Engineer divisions, districts, laboratories, and field operating agencies.

(vi) The Surgeon General is authorized to act on requests for medical research and development records; and the medical records of active duty military personnel, dependents, and persons given physical examinations or treatment at DA medical facilities.

(vii) The Chief of Chaplains is authorized to act on requests for records involving ecclesiastical rites performed by DA chaplains, and privileged communications relating to the clergy.

(viii) The Judge Advocate General (TJAG) is authorized to act on requests for records relating to claims, courts-martial, legal services, and similar legal-type records. TJAG is also authorized to act on requests for records described elsewhere in this AR, if those records relate to litigation in which the United States has an interest. In addition, TJAG is authorized to act on requests for records that are not within the functional areas of responsibility of any other IDA.

(ix) The Chief, National Guard Bureau, is authorized to act on requests for all Army National Guard records, unless such records clearly fall within another IDA's responsibility. This includes National Guard organization and training files; plans, operations, and

OL
53
ISS
53
MR

MI

readiness files; policy files; historical files; and files relating to National Guard military support and civil disturbance activities.

(x) The Chief of Army Reserve is authorized to act on requests for all personnel and medical records of retired, separated, discharged, deceased, and reserve component military personnel, and all Army reserve (USAR) records, unless such records clearly fall within another IDA's responsibility. This includes records relating to USAR plans, policies and operations, changes in the organizational status of USAR units; mobilization and demobilization policies; active duty tours; and the Individual Mobilization Augmentation Program.

(xi) The Commanding General, United States Army Materiel Command (AMC) is authorized to act on requests for the records of AMC headquarters and its subordinate commands, units, and activities that relate to procurement, logistics, research and development, and supply and maintenance operations.

(xii) The Commanding General, United States Army Criminal Investigation Command (USACIDC), is authorized to act on requests for criminal investigative records of USACIDC headquarters and its subordinate activities. This includes criminal investigation records, investigation-in-process records, and military police reports that result in criminal investigation reports.

(xiii) The Commanding General, United States Total Army Personnel Agency, is authorized to act on requests for military personnel files relating to active duty (other than those of reserve and retired personnel) military personnel matters, personnel locator, physical disability determinations, and other military personnel administration records; records relating to military casualty and memorialization activities; voting; records relating to identification cards, naturalization, citizenship, commercial solicitation, Military Postal Service Agency and Army postal and mail service; civilian personnel records, other civilian personnel matters and personnel administration records.

(xiv) The Commanding General, U.S. Army Community and Family Support Center is authorized to act on requests for records relating to morale, welfare and recreation activities; nonappropriated funds; child development centers; community life programs; family action programs; retired activities, club management, Army emergency relief, consumer protection, retiree survival benefits, and records dealing with DA relationships and social security, veterans' affairs, United Service Organization, U.S. Soldiers' and Airmen's Home; and American Red Cross.

(xv) The Commander, U.S. Army Intelligence and Security Command, is authorized to act on request for intelligence investigation and security records; foreign scientific and technological information; intelligence training, mapping and geodesy information; ground surveillance records; intelligence threat assessments; and, missile intelligence data relating to tactical land warfare systems.

(xvi) The General Counsel, Army and Air Force Exchange Service (AAFES), is authorized to act on requests for AAFES records, under AR 60–201/AFR 147–14.

(xvii) The Commander, US Army Forces Command, as a specified commander, is authorized to act on requests for specified command-unique records under 1–510, DOD 5400.7–R.

BILLING CODE 3710-08-M

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Part 73

[MM Docket No. 86–294; RM–5273]

Radio Broadcasting Services; Vero Beach, FL

AGENCY: Federal Communications Commission.

ACTION: Final rule.

SUMMARY: This document substitutes Channel 279C2 for Channel 288A at Vero Beach, Florida, and modifies the Class A license for Station WAVW(FM) to specify the new channel, at the request of the licensee Treasure Coast Radio, Inc. Additionally, Channel 259C2 is allotted to Vero Beach in response to requests for use of a second wide coverage area station. With this action, this proceeding is terminated.

DATES: *Effective* April 21, 1988. The window period for filing applications on Channel 259C2 will open on April 22, 1988 and close on May 23, 1988.

FOR FURTHER INFORMATION CONTACT: Montrose H. Tyree, Mass Media Bureau, (202) 634–6530.

SUPPLEMENTARY INFORMATION: This is a summary of the Commission's Report and Order, MM Docket No. 86–294, adopted February 11, 1988, and released March 7, 1988. The full text of this Commission decision is available for inspection and copying during normal business hours in the FCC Dockets Branch (Room 230), 1919 M Street, NW., Washington, DC. The complete text of this decision may also be purchased from the Commission's copy contractors, International Transcription Service, (202) 857–3800, 2100 M Street NW., Suite 140, Washington, DC 20037.

47 CFR Part 73

[MM Docket No. 87–350; RM–5930]

Radio Broadcasting Services; Nebraska City, NE

AGENCY: Federal Communications Commission.

ACTION: Final rule.

SUMMARY: The Commission, at the request of Great Lakes Broadcasting Company, substitutes Channel 249C2 for Channel 249A at Nebraska City, Nebraska, and modifies its license for Station KNCY–FM to specify operation on the higher powered channel. Channel 249C2 can be allocated to Nebraska City, Nebraska, in compliance with the Commission's minimum distance separation requirements and can be used at Station KNCY–FM's present transmitter site. With this action, this proceeding is terminated.

EFFECTIVE DATE: April 22, 1988.

FOR FURTHER INFORMATION CONTACT: Leslie K. Shapiro, Mass Media Bureau, (202) 634–6530.

SUPPLEMENTARY INFORMATION: This is a summary of the Commission's Report and Order, MM Docket No. 87–350, adopted February 11, 1988, and released March 8, 1988. The full text of this Commission decision is available for inspection and copying during normal business hours in the FCC Dockets Branch (Room 230), 1919 M Street NW., Washington, DC. The complete text of this decision may also be purchased

BILLING CODE 6712-01-M

---

47 CFR Part 73

[MM Docket No. 87–360; RM–5929]

Radio Broadcasting Services; North Bend, OR

AGENCY: Federal Communications Commission.

ACTION: Final rule.

SUMMARY: The Commission, at the request of Big Bay Radio, Inc., allocates Channel 297C1 to North Bend, Oregon, as the community's second local FM service. Channel 297C1 can be allocated to North Bend in compliance with the Commission's minimum distance separation requirements without the imposition of a site restriction. With this action, this proceeding is terminated.

DATES: Effective April 22, 1988. The window period for filing applications will open on April 25, 1988, and close on May 25, 1988.

FOR FURTHER INFORMATION CONTACT: Leslie K. Shapiro, Mass Media Bureau, (202) 634–6530.

SUPPLEMENTARY INFORMATION: This is a summary of the Commission's Report and Order, MM Docket No. 87–360, adopted February 11, 1988, and released March 8, 1988. The full text of this Commission decision is available for inspection and copying during normal business hours in the FCC Dockets Branch (Room 230), 1919 M Street NW., Washington, DC. The complete text of this decision may also be purchased from the Commission's copy contractor, International Transcription Service, (202) 857–3800, 2100 M Street NW., Suite 140, Washington, DC 20037.

47 CFR Part 73

[MM Docket No. 87–309; RM–5807]

Television Broadcasting Services; Montrose and Scranton, PA

AGENCY: Federal Communications Commission.

ACTION: Final rule.

SUMMARY: This document denies the request of Christian Discerner, Inc. to reallocate Channel 64 from Scranton to Montrose, Pennsylvania. The Commission found that petitioner had failed to provide a sufficient reason to do so in light of the pending applications for its use at Scranton. With this action, this proceeding is terminated.

FOR FURTHER INFORMATION CONTACT: Leslie K. Shapiro, Mass Media Bureau, (202) 634–6530.

SUPPLEMENTARY INFORMATION: This is a summary of the Commission's Report and Order, MM Docket No. 87–309, adopted February 5, 1988, and released March 7, 1988. 47 CFR Part 73

[MM Docket No. 87-206; RM-5650]

Radio Broadcasting Services; Bay City, TX

AGENCY: Federal Communications Commission.

ACTION: Final rule.

SUMMARY: This document substitutes Channel 273C2 for Channel 221A at Bay City, Texas, and modifies the license of Station KMKS-FM to specify operation on the new frequency, at the request of Sandlin Broadcasting Company, Inc., as that community's first wide coverage area FM service. Channel 273C2 requires a site restriction of 24.7 kilometers (15.3 miles) southwest of Bay City (28-47-50; 96-06-56). This action also allots Channel 241C2 to Bay City, as a second wide coverage area FM service, at the request of Bay Broadcasting, Ltd., licensee of Station KIOX(AM), Bay City. A site restriction of 25.4 kilometers (15.8 miles), southwest of the city is required for Channel 241C2 (28-47-32; 96-06-58). With this action, this proceeding is terminated.

DATES: Effective April 21, 1988; The window period for filing applications will open on April 22, 1988, and close on May 23, 1988.

FOR FURTHER INFORMATION CONTACT: Patricia Rawlings, (202) 634-6530.

47 CFR Part 73

[BC Docket No. 80-90]

Radio Broadcasting Services; Clarification of Revised FM Table of Allotments

AGENCY: Federal Communications Commission.

ACTION: Final rule.

SUMMARY: This *Public Notice* clarifies three matters regarding the release of the revised FM Table of Allotments (§ 73.202 of the Commission's Rules) reflecting the reclassification of FM allotments resulting from BC Docket 80-90 (52 FR 39774, October 23, 1987). The first matter is the premature inclusion of the Channel 238A allotment at Carmel, California. That channel was not adopted as of the October 21, effective date. Rather, the action took place on November 4, 1987. That action also established a January 12 to February 11, 1988 filing window for the Carmel allotment. The second matter notes that a requested change in class for Station KEZS, Cape Girardeau, Missouri, from Class B to C1 will not be reflected in the Table until a covering license application is granted. The third matter involves Channel 216B at Thousand Oaks, California. This is a noncommercial educational FM channel and should not be listed in the FM Table of Allotments. Accordingly, it will be deleted.

FOR FURTHER INFORMATION CONTACT: Robert Hayne, Mass Media Bureau, (202) 634-6530.

SUPPLEMENTARY INFORMATION: This is a summary of a Commission *Public Notice*, and released March 7, 1988. The full text of the *Public Notice* is available for inspection and copying during normal business hours in the FCC Dockets Branch (Room 230), 1919 M Street NW., Washington DC. The complete text of this decision may also be purchased from the Commission's copy contractors, International Transcription Service, (202) 857-3800, 2100 M Street NW., Suite 140, Washington, DC 20037.

47 CFR Parts 80 and 87

[PR Docket No. 87-133; FCC 88-56]

Maritime and Aviation Services; Use of Continuous Wave (CW) and Voice Modulation by Emergency Position Indicating Radiobeacons (EPIRBs) and Emergency Locator Transmitters (ELTs)

AGENCY: Federal Communications Commission.

ACTION: Final rule.

SUMMARY: These new rules authorize EPIRBs and ELTs to use CW and voice modulation in addition to the current use of non-voice swept audio signal modulation. Also certain criteria are set forth regarding the power distribution and frequency shift of the transmitted carrier to facilitate the reception of EPIRB and ELT signals by the COSPAS/SARSAT satellites. This action was initiated in response to a new Federal Aviation Administration (FAA) Technical Standard Order (TSO) TSO-C91a and a request by ARNAV Systems, Inc. (ARNAV). The effect of the rules would be to improve the detection of distress situations and search-and rescue operations.

EFFECTIVE DATE: April 18, 1988. The incorporation by reference of certain publications listed in the regulations is approved by the Director of the Federal Register as of April 18, 1988.

ADDRESS: Federal Communications Commission, 1919 M Street NW., Washington, DC 20554.

FOR INFORMATION CONTACT: William P. Berges, Federal Communications Commission, Private Radio Bureau, Washington, DC 20554; (202) 632-7175.

SUPPLEMENTARY INFORMATION: This is a summary of the Commission's *Report and Order*, adopted February 16, 1988, and released March 14, 1988. The full text of this decision including the adopted rule is available for inspection and copying during normal business hours in the FCC Dockets Branch (Room 230), 1919 M Street NW., Washington, DC. The full text of this

decision including the proposed rule change may also be purchased from the Commission's copy contractor, International Transcription Services, Inc., (202) 857-3800, 2100 M Street NW., Suite 140, Washington, DC 20037.

Summary of Report and Order

1. On May 27, 1987, the Commission released a *Notice of Proposed Rule Making*, PR Docket No. 87-133, FCC 87-159, 52 FR 21334, which proposed to amend the rules to allow the use of CW and voice modulation by EPIRBs and ELTs in addition to the mandatory non-voice swept audio signal modulation. The Commission took this action in response to the new ELT technical standards contained in TSO-C91a, published by FAA, and a request by ARNAV. The U.S. Coast Guard and U.S. Air Force who are responsible for domestic search and rescue as well as the FAA supported the ARNAV request. The comments filed by the participants in this proceeding requested that the power distribution and frequency shift of the transmitter carrier should meet certain criteria to facilitate the reception of EPIRB and ELT signals by the COSPAS/SARSAT satellites. The *Report and Order* discusses the comments filed to these proposals and amends the Rules to improve the detection of distress situations and aid in search and rescue operations.

2. The rule changes adopted herein have been analyzed with respect to the Paperwork Reduction Act of 1980 and found to contain no new or modified form, information collection and/or record keeping, labeling, disclosure, or record retention requirements; and will not increase or decrease the burden hours imposed on the public.

3. We certify that section 605(b) of the Regulatory Flexibility Act of 1980 (Pub. L. 96-354) does not apply to this rule making proceeding because it will not have a significant economic impact on a substantial number of small entities. The changes proposed herein will have a minor beneficial effect on the maritime and aviation communities by permitting the use of additional types of modulation in EPIRBs and ELTs and by enhancing the detection of EPIRB and ELT signals by satellites. The increased cost to manufcturers to implement the new criteria for the power distribution of the transmitter carrier is estimated to be less than $2.00 per unit.

4. This *Report and Order* is issued under the authority of 47 U.S.C. 154(i) and 303(g) and (r).

5. A copy of the *Report and Order* will be served on the Chief Counsel for Advocacy of the Small Business Administration.

6. *It is ordered*, That Parts 80 and 87 of the Commission's Rules are amended as shown below. *It is further ordered*, That this proceeding is *terminated*.

Appendix

Parts 80 and 87 of Chapter I of Title 47 of the Code of Federal Regulations are amended as follows:

PART 80—STATIONS IN THE MARITIME SERVICES

1. The authority citation for Part 80 continues to read as follows:

Authority: Secs. 4, 303, 48 Stat. 1066, 1082, as amended; 47 U.S.C. 154, 303, unless otherwise noted. Interpret or apply 48 Stat. 1064-1068, 1081-1105, as amended; 47 U.S.C. 151-155, 301-609; 3 UST 3450, 3 UST 4726, 12 UST 2377, unless otherwise noted.

2. In § 80.207(d), the emission designators under Classes of Emission in the Distress, Urgency and Safety frequencies are revised to read as follows:

§ 80.207 Classes of emission.

* * * * *

(d) * * *

Types of stations	Classes of emission
* * * * *	
Distress, Urgency and Safety [8] [9]	
500 kHz [10]	A2A and A2B or H2A and H2B.
2182 kHz [10] [11]	A2B, A3B, H2B, H3E, J2B, and J3E.
8364 kHz	A2A, H2A.
121.500 MHz	A3E, A3N, N0N.
123.100 MHz	A3E.
156.750 and 156.800 MHz	G3E, G3N.
243.000 MHz	A3E, A3N, N0N.

[8] For direction finding requirements see § 80.375.

[9] Includes distress emissions used by ship, coast, EPIRB's and survival craft stations.

[10] On 500 kHz and 2182 kHz A1B, A2B, H2B and J2B emissions indicate transmission of the auto alarm signals.

[11] Ships on domestic voyages must use J3E emission only.

3. In § 80.223 paragraph (d) is revised to read as follows:

§ 80.223 Special requirements for survival craft stations.

* * * * *

(d) When an EPIRB is part of a survival craft station the EPIRB portion must be capable of transmitting only on the frequencies 121.500 MHz and 243.000 MHz with A3E, A3N and N0N emissions.

4. In § 80.1053 subparagraphs (a) (5), (6), (7), (8), (9), (10), (11) and (12) are renumbered (a) (6), (7), (9), (10), (11), (12), (13) and (14), respectively; subparagraph (a)(4) is revised; subparagraphs (a)(5) and (a)(8) are added; subparagraph (a)(7) of the newly renumbered subparagraphs is revised; and paragraph (c) is revised to read as follows:

§ 80.1053 Special requirements for Class A EPIRB stations.

(a) * * *

(4) Use A3N emission on a mandatory basis and A3E and N0N emissions on an optional basis on the frequencies 121.500 MHz and 243.000 MHz;

(5) Transmission of A3E or N0N emission must not exceed 90 seconds and must be followed by a transmission of at least three minutes of A3N emission; each transmission of a synthesized and/or pre-recorded voice message must be preceded by the words "this is a recording";

* * * * *

(7) The types of emissions for EPIRBs must be in accordance with those specified in the Federal Aviation Administration (FAA) Technical Standard Order (TSO) Document TSO-C91a titled "Emergency Locator Transmitter (ELT) Equipment" dated April 29, 1985. TSO-C91a is incorporated by reference in accordance with 5 U.S.C. 552(a). TSO-C91a may be obtained from the Department of Transportation, Federal Aviation Administration, Office of Airworthiness, 800 Independence Avenue, SW., Washington, DC 20591;

(8) EPIRBs manufactured effective October 1, 1988, or in order to satisfy USCG equipment carriage requirements are either newly installed in a ship station effective April 1, 1989, or regardless of the date of installation are used in a ship station effective August 1, 1991, must have in emissions A3N, A3E and N0N a clearly defined carrier frequency distinct from the modulation sidebands. On 121.500 MHz at least thirty percent of the total power emitted during each sweep cycle of the audio frequencies (A3N emission) must be

VOL 53 ISS 53 MR 18 1988 UMI

contained within ±30 Hz of the reference carrier frequency. On 243.000 MHz at least thrity percent of the total power emitted during each sweep cycle of the audio frequencies (A3N emission) must be contained within ±60 Hz of the reference carrier frequency. See TSO–C91a at paragraph (a)(3)(ii). Additionally, if the type of modulation is changed the carrier frequency must not shift more than ±30 Hz from the fixed reference frequency on 121.500 MHz and not more than ±60 Hz on 243.000 MHz. The long term stability of the carrier frequency must comply with the requirements in § 80.209(a).

* * * * *

(c) The power and modulation requirements specified in paragraphs (a) (6), (7) and (8) of this section must be met under the environmental test conditions specified in the RTCA Document DO–183 except that the air temperature limits for testing these devices must be from −20 to +55 degrees Celsius. Tests specified by RTCA with regard to altitude, decompression and overpressure are not applicable to EPIRB stations.

* * * * *

5. In § 80.1055(a) subparagraph (3) is revised to read as follows:

§ 80.1055 Special requirements for Class B EPIRB stations.

(a) * * *

(3) Meet the requirements in § 80.1053(a) (4) through (8), (a)(14), and (c) through (i);

* * * * *

PART 87—AVIATION SERVICES

1. The authority for Part 87 continues to read as follows:

Authority: Secs. 4, 303, 48 Stat. 1066, 1082, as amended; 47 U.S.C. 154, 303 unless otherwise noted. Interpret or apply 48 Stat. 1064–1068, 1081–1105, as amended; 47 U.S.C. 151–155, 301–609; 3 UST 3450, 3 UST 4726, 12 UST 2377, unless otherwise noted.

2. In § 87.5 the definition for "Emergency locator transmitter" is revised to read as follows:

§ 87.5 Definition of terms.

* * * * *

Emergency locater transmitter (ELT). A transmitter of an aircraft or survival craft actuated manually or automatically that is used as an alerting and locating aid for survival purposes.

* * * * *

3. In § 87.67(b) two emission designators are added following A3E[12] and F7D[8] and footnote 7 is revised to read as follows:

§ 87.67 Types of emission.

* * * * *

(b) * * *

Authorized bandwidth (kilohertz)	Class of emission	Emission designator		
		Below 50 MHz	Above 50 MHz	Frequency deviation
*	*	*	*	*
A3E	3K20A3E [7]		[7] 25	
*	*	*	*	*
NON	NON		[7] None	
*	*	*	*	*

[7] Applicable only to Survival Craft Stations and to the emergency locator transmitters and emergency locator transmitter test stations employing modulation in accordance with that specified in § 87.73 (h), (i) and (j) of the rules. The specified bandwidth and modulation requirements shall apply to emergency locator transmitters for which type acceptance is granted after October 21, 1973.

4. In § 87.73 paragraph (h) is revised and new paragraphs (i) and (j) are added to read as follows:

§ 87.73 Modulation requirements.

* * * * *

(h) The types of emissions for ELTs must be in accordance with those specified in the Federal Aviation Administration (FAA) Technical Standard Order (TSO) Document TSO–C91a titled "Emergency Locator Transmitter (ELT) Equipment" dated April 29, 1985. TSO–C91a is incorporated by reference in accordance with 5 U.S.C. 552(a). TSO–C91a may be obtained from the Department of Transportation, Federal Aviation Administration, Office of Airworthiness, 800 Independence Avenue SW., Washington, DC 20591.

(i) Transmission of A3E or NON emission must not exceed 90 seconds and must be followed by a transmission of at least three minutes of A3N emission; each transmission of a synthesized and/or pre-recorded voice message must be preceded by the words "this is a recording."

(j) ELTs manufactured effective October 1, 1988, must have in emissions A3N, A3E and NON a clearly defined carrier frequency distinct from the modulation sidebands. On 121.500 MHz at least thirty percent of the total power emitted during each sweep cycle of the audio frequencies (A3N emission) must be contained within ±30 Hz of the reference carrier frequency. On 243.000 MHz at least thirty percent of the total power emitted during each sweep cycle of the audio frequencies (A3N emission) must be contained within ±60 Hz of the reference carrier frequency. See TSO–C91a at paragraph (a)(3)(ii). Additionally, if the type of modulation is changed the carrier frequency must not shift more than ±30 Hz from the fixed reference frequency on 121.500 MHz and ±60 Hz on 243.000 MHz. The long term stability of the carrier frequency must comply with the requirements in § 87.65.

5. In § 87.183 paragraphs (f) and (l) are revised to read as follows:

§ 87.183 Frequencies available.

* * * * *

(f) *121.5 MHz:* This is a universal simplex frequency for use by aircraft in distress or emergency condition. Except for use in an ELT, the frequency 121.5 MHz will be assigned only when other frequencies are available for normal aircraft communications. The frequency is available as follows:

* * * * *

(l) *243.0 MHz:* This is an emergency and distress frequency available for use by survival craft stations, ELTs and equipment used for survival purposes which are also equipped to transmit on the frequency of 121.5 MHz.

* * * * *

[FR Doc. 88–5736 Filed 3–17–88; 8:45 am]

BILLING CODE 6712-01-M

DEPARTMENT OF DEFENSE

48 CFR Parts 215, 242, and 252

Department of Defense Federal Acquisition Regulation Supplement; Estimating Systems

AGENCY: Department of Defense (DoD).

ACTION: Final rule.

SUMMARY: The Defense Acquisition Regulatory (DAR) Council has approved revisions to sections 215.811 and 242.302, and Part 252 of the DoD FAR Supplement (DFARS) to (a) require that businesses which submit certified cost and pricing data to the DoD establish and maintain adequate estimating systems; (b) require certain large businesses to disclose their estimating system in writing; (c) provide guidelines concerning characteristics of adequate estimating systems; and (d) provide guidance for conducting estimating system reviews by the Government.

EFFECTIVE DATE: March 18, 1988. (Effective on all solicitations issued on or after March 18, 1988.)

FOR FURTHER INFORMATION CONTACT: Mr. Charles W. Lloyd, Executive Secretary, DAR Council, (202) 697–7266

SUPPLEMENTARY INFORMATION:

A. Background

Upon review of reports developed by the General Accounting Office and the DoD Inspector General, the DAR Council concluded that it was necessary to establish DFARS coverage requiring contractors receiving a significant amount of DoD prime contracts or subcontracts based on cost or pricing data to establish, maintain, disclose, and utilize adequate estimating systems. A proposed rule was published establishing such a requirement in the Federal Register on July 17, 1987 (52 FR 27019) for public comment.

B. Development of the Final Rule

In developing the final rule, the DAR Council evaluated the GAO and DoD IG reports, testimony presented to the House Government Operations Committee, and public comments received in response to the July 17, 1987 proposed rule. In response thereto, several changes were made to the proposed rule. The most significant changes were the simplification of the definition of "significant estimating system deficiency" and the elimination of the access to records portion of the clause.

The proposed rule attempted to define a "significant estimating system deficiency" using quantitative criteria. Public comments convinced the DAR Council that these criteria would confuse rather than clarify the term "significant deficiency". Consequently, the definition contained in this final rule has been simplified. The access provision was eliminated from this case and is being considered under DAR Case 86–96.

Other changes from the proposed rule include revision of the policy statement to more clearly indicate that the DoD expects all contractors, not just larger contractors, to have an estimating system which produces well-supported proposals that are an acceptable basis for negotiation of fair and reasonable prices. Only larger contractors, however, will be governed by the specific requirements of section 215.811, i.e., disclosure and formal review of the estimating system. The policy statement was also revised to more closely indicate that the estimating system should be consistent with and integrated with other contractor management systems. Also, the threshold for applying the specific provisions of section 215.811 was raised from $25 million to $50 million. The change was made to reduce the number of contractors required to undergo mandatory systems review every three years, thereby reducing the administrative impact on defense contractors. The DAR Council concluded that the Government's interest is adequately protected by providing for inclusion of the relevant clause in all contracts awarded on the basis of certified cost and pricing data and allowing the contracting officer to require compliance with disclosure and review requirements as needed by selected contractors which received at least $10 million in prime contracts or subcontracts for which certified cost or pricing data was required.

Instructions were also added to provide for the protection of information given to the Government containing contractor commercial or financial information regarded as privileged or confidential. Other changes were made to clarify or amplify the coverage, or to make editorial adjustments.

C. Regulatory Flexibility Act

The Department of Defense certifies that this final rule will not have a significant economic impact on a substantial number of small entities under the Regulatory Flexibility Act, 5 U.S.C. 601 *et seq.* Although the final rule requires all contractors receiving DoD contracts based on certified cost or pricing data to have estimating systems adequate to support their proposals, only large businesses meeting certain dollar thresholds are required to disclose their estimating systems to the DoD in writing or to undergo a formal systems review.

D. Paperwork Reduction Act

This final rule results in a reduction of 12,000 burden hours. A revised Paperwork Reduction Analysis has been submitted to OMB for their review.

Government procurement.

Charles W. Lloyd,

Executive Secretary, Defense Acquisition Regulatory Council.

Adoption of Amendments

Therefore, 48 CFR Parts 215, 242, and 252 are amended as follows:

1. The authority citations for Parts 215, 242, and 252 continue to read as follows:

Authority: 5 U.S.C. 301, 10 U.S.C. 2202, DoD Directive 5000.35, and DoD FAR Supplement 201.301.

PART 215—CONTRACTING BY NEGOTIATION

2. Section 215.811 is revised and sections 215.811–70 through 215.811–79 are added to read as follows:

Subpart 215.8—Price Negotiation

* * * * *

Sec.
215.811 Estimating systems.
215.811–70 Definitions.
215.811–71 Policy.
215.811–72 Applicability.
215.811–73 Responsibilities.
215.811–74 Contractor estimating system standard.
215.811–75 System disclosure and maintenance requirements.
215.811–76 Characteristics of an adequate estimating system.
215.811–77 Indicators of potentially significant estimating deficiencies.
215.811–78 Procedures.
215.811–79 Contract clause.

* * * * *

215.811 Estimating systems.

The coverage in sections 215.811–70 through 215.811–79 below and the clause at 252.215–7003 provides, for the convenience of DoD activities, a consistent but more detailed and comprehensive treatment of estimating system policies and procedures than FAR 15.811.

215.811–70 Definitions.

"Contractor", for purposes of this section, means a business unit as defined in FAR 30.102.

"Estimating System" is a term used to describe a contractor's policies, procedures and practices for generating cost estimates which forecast costs based on information that is available at the time. It includes the organizational structure; established lines of authority, duties, and responsibilities; internal controls and managerial reviews; flow of work, coordination, and communication; and estimating methods, techniques, accumulation of historical costs, and analyses used by a contractor to generate estimates of costs and other data included in proposals submitted in the expectation of receiving contract awards.

"Significant Estimating System Deficiency" means a shortcoming in the estimating system which is likely to consistently result in proposal estimates for either total cost or a major cost element which is not an acceptable basis for negotiation of fair and reasonable prices.

215.811–71 Policy.

It is the policy of the DoD that all contractors have estimating systems that consistently produce well supported proposals that are acceptable as a basis for negotiation of fair and reasonable prices. An estimating system should be consistent with and integrated with the contractor's related management systems, and should be subject to applicable financial control systems.

215.811–72 Applicability.

(a) The specific requirements of sections 215.811–75 to 215.811–78 and paragraphs (d) and (e) of the clause at

252.215–7003, Cost Estimating System Requirements, apply to any large business contractor which in its preceding fiscal year received DoD prime contracts or subcontracts totaling $50 million or more for which certified cost or pricing data were required.

(b) For a large business contractor not meeting the criteria in paragraph (a) of this section but which in its preceding fiscal year received DoD prime contracts or subcontracts totaling $10 million or more for which certified cost or pricing data were required, the PCO may require disclosure and review in compliance with paragraphs (d) and (e) of the clause at 252.215–7003 with the concurrence or at the request of the ACO when such compliance is in the best interest of the Government (e.g., significant estimating problems are believed to exist or the contractor's sales are predominantly to the Government).

(c) The disclosure, maintenance and review requirements of sections 215.811–75 to 215.811–78 do not apply to small businesses or to educational institutions or other nonprofit organizations.

215.811–73 Responsibilities.

(a) For a contractor meeting the requirements in 215.811–72(a) or (b) above, the cognizant ACO shall determine the adequacy of the contractor's estimating system and pursue appropriate corrections of deficiencies.

(b) On behalf of the ACO, the cognizant auditor is responsible for being the team leader in conducting estimating system reviews.

215.811–74 Contractor estimating system standard.

To be considered adequate, a contractor's estimating system must be established, maintained, reliable, consistently applied, and must produce verifiable, supportable and documented cost estimates.

215.811–75 System disclosure and maintenance requirements.

(a) An estimating system disclosure is adequate when the contractor has provided the cognizant ACO with documentation that:

(1) Accurately describes those policies, procedures and practices that the contractor currently uses in preparing cost proposals; and

(2) Provides sufficient detail for the Government to reasonably make an informed judgment regarding the adequacy of the contractor's estimating practices.

(b) Significant changes to the cost estimating system must be disclosed to the cognizant ACO on a timely basis.

(c) If the contractor notifies the ACO and the auditor that disclosed information relative to its estimating system contains commercial or financial information which it regards as privileged and confidential, such information will be protected and will not be released outside the Government without the permission of the contractor. The contractor should place an appropriate legend on the face of the disclosed document at the time of submission.

215.811–76 Characteristics of an adequate estimating system.

(a) *General.* The adequacy of an estimating system is dependent on the successful interrelationship of many variables. The relative importance or necessity of each is determined largely by the particular conditions applicable to an individual contractor. In general, adequate systems should provide for the use of appropriate source data, utilize sound estimating techniques and appropriate judgment, maintain a consistent approach, and adhere to established policies and procedures. Although it is not possible to list all of the characteristics of an adequate estimating system, there are some characteristics that should be present in most systems. Listed in paragraph (b) of this section are examples of the types of characteristics which should be considered by the ACO when evaluating a contractor's estimating system. They are not, however, intended as a checklist.

(b) *Evaluation.* In evaluating the adequacy of a contractor's estimating system, the ACO should consider whether the contractor's estimating system—

(1) Establishes clear responsibility for preparation, review and approval of cost estimates;

(2) Provides a written description of the organization and duties of the personnel responsible for preparing, reviewing, and approving cost estimates, and the various functions that contribute to the estimating process such as accounting, planning, etc.;

(3) Assures that relevant personnel have sufficient training, experience and guidance to perform estimating tasks in accordance with the contractor's established procedures;

(4) Identifies the sources of data and the estimating methods and rationale used in developing cost estimates;

(5) Provides for appropriate supervision throughout the estimating process;

(6) Provides for consistent application of estimating techniques;

(7) Provides for detection and timely correction of errors;

(8) Protects against cost duplication and omissions;

(9) Provides for the use of historical experience where appropriate;

(10) Requires use of appropriate analytical methods;

(11) Integrates information available from other management systems as appropriate;

(12) Requires management review including verification that the company's estimating policies, procedures and practices comply with this regulation;

(13) Provides for internal review of and accountability for the adequacy of the estimating system, including the comparison of projected results to actual results and an analysis of any differences;

(14) Provides procedures to update cost estimates in a timely manner throughout the negotiation process; and

(15) Addresses responsibility for review and analysis of the reasonableness of subcontract prices.

§ 215.811–77 Indicators of potentially significant estimating deficiencies.

Some indicators of conditions that may produce or lead to significant estimating deficiencies are listed below. These indicators are not intended as a comprehensive checklist. They may, however, suggest the need for further analysis or evaluation. Since estimating is not an exact science and is partly based on judgment, differences between individual estimates and subsequent actual data are not necessarily indications of a system deficiency.

(a) Failure to assure that relevant historical experience is available to and utilized by cost estimators as appropriate.

(b) Continuing failure to analyze material costs or failure to perform subcontractor cost reviews as required.

(c) Consistent absence of analytical support for significant proposed cost amounts.

(d) Excessive reliance on individual personal judgment where historical experience or commonly utilized standards are available.

(e) Recurring significant defective pricing findings within the same cost element(s).

(f) Failure to integrate relevant parts of other management systems (e.g., production control or cost accounting) with the estimating system so that the ability to generate reliable cost estimates is impaired.

(g) Failure to provide established policies, procedures and practices to persons responsible for preparing and supporting estimates.

215.811–78 Procedures.

(a) *System reviews.* Cognizant audit and contract administration activities will establish and manage regular programs for reviewing selected contractors' estimating systems. Reviews and reports shall be accomplished as a contract audit and contract administration office team effort, with the contract auditor designated as team leader. Reviews shall be tailored to take full advantage of the day-to-day work done as an integral part of both the contract audit and contract administration activities. The program established by the contract audit activity shall be coordinated with the appropriate contract administration activity to ensure that team membership includes qualified technical specialists, and that adequate personnel resources are made available to accomplish the program. The ACO or a representative should coordinate the contract administration activity's review, consolidate findings and recommendations, and, when appropriate, prepare a comprehensive written report which shall be submitted to the auditor. The contract administration activity's written report shall be attached to the estimating survey team report. A system review shall be conducted at least every three years of a contractor required to make disclosure pursuant to 215.811–72 and paragraphs (d) and (e) of the clause at 252.215.7003, Cost Estimating System Requirements, except where the auditor, in coordination with the ACO, determines that past experience and a current vulnerability assessment of the pricing activity of a contractor discloses low risk. If the auditor and the ACO determine that the Government is subject to high risk, estimating system reviews should be done more frequently. To the extent possible, the team leader should inform the contractor and the ACO of significant findings during the conduct of the review. The team leader should apprise the contractor during an exit conference of any significant findings.

(b) *Disposition of survey team findings*—(1) *Reporing of survey team findings.* The auditor will document the results of the system review in a report to the ACO. The report shall address the survey team findings and recommendations. If there are significant estimating deficiencies, the report shall recommend disapproval of all or a portion(s) of the estimating system.

(2) *Field pricing reports.* When the report of a system review indicates that there may be a significant estimating system deficiency, the effect of such deficiency shall be mentioned in the field pricing report for each contractor proposal reviewed until resolution of such deficiency.

(3) *Contracting officer responsibility.* The contracting officer responsible for negotiation of a specific proposal generated by an estimating system with an identified deficiency shall evaluate such proposal in light of the system deficiency. If the contracting officer determines that the deficiency does not have a significant impact on the instant negotiation, then he or she should proceed with the instant negotiations. If the contracting officer determines that the system deficiency does affect the proposal and does have a significant impact on the instant negotiation, then the contracting officer should consider pursuing such alternatives as:

(i) Allowing additional time for the contractor to correct the deficiency and submit a corrected proposal;

(ii) Considering another type of contract, e.g., an FPIF instead of an FFP;

(iii) Using additional cost analysis techniques to determine the reasonableness of the cost element(s) affected by the system's deficiency, e.g., what should the element(s) cost (See the Armed Services Pricing Manual (ASPM) for appropriate analytical techniques.);

(iv) Segregating the questionable areas as a cost reimbursable line;

(v) Reducing the negotiation objective for profit or fee; or

(vi) Including a contract clause that provides for adjustment of the contract amount after award (reopener clause). The contracting officer who incorporated the clause into the contract shall be responsible for negotiating price adjustments required by the clause. A reopener clause necessitated by an estimating deficiency should clearly identify the amount(s) and item(s) which are in question at the time of negotiation. It should also indicate either a specific time or subsequent event by which the contractor will submit a proposal identifying the cost impact adjustment necessitated by the deficient estimating system. The clause should require that the contractor certify cost and pricing data submitted as part of the supplemental proposal, and that, should the contractor fail to submit such a proposal, the contracting officer will make a unilateral price adjustment. Failure of the contractor and the Government to agree to the adjustment shall be a dispute under the Disputes clause.

(4) *Initial notification of contractor.* Upon receipt of the system review report, the ACO shall provide a copy to the contractor and allow 30 days or a reasonable extension thereto for submission of its written response. If no significant deficiencies are identified, the ACO will notify the contractor in writing in a timely manner.

(i) *Contractor agreement.* If the contractor agrees with the report findings and recommendations, the contractor should, within 60 days of receipt of the initial notification, correct any identified system deficiencies or submit a corrective action plan showing milestones and actions leading to elimination of the deficiencies.

(ii) *Contractor disagreement.* If the contractor disagrees with the report findings and recommendations, the contractor's response should contain the rationale for each area of disagreement.

(5) *Evaluation of contractor's response.* The ACO, in consultation with the auditor, will evaluate the contractor's response and determine whether—

(i) The estimating system contains deficiencies which need correction;

(ii) Any such deficiencies are significant estimating deficiencies which would result in disapproval of all or a portion(s) of the contractor's estimating system; or

(iii) Any proposed corrective action(s) are adequate to correct the deficiency.

(6) *Notification of ACO determination.* The ACO will notify the contractor and the auditor of his/her determination and, if appropriate, of the Government's intent to disapprove all or a selected portion(s) of the system. The notice shall list the cost elements it covers and identify any deficiencies requiring correction. The notice shall also require the contractor to make correction or submit a corrective action plan within 45 days showing proposed milestones and actions related to all identified deficiencies.

(7) *Monitoring contractor's corrective action.* The auditor and ACO will monitor the contractor's progress toward correction of deficiencies. In the event the contractor fails to make adequate progress toward corrective action, the ACO shall take whatever action is determined necessary to ensure that the contractor corrects the deficiency. Actions which should be considered by the ACO include but are not limited to bringing the issue to the attention of higher level management, reducing or suspending progress payments in accordance with FAR

32.503-6 and/or recommending nonaward of potential contracts.

(8) *Notice of disapproval.* (i) If, within 45 days after receipt of the notice of deficiency (see paragraph (b) (4) of this section) or a reasonable extension thereto, the contractor has neither submitted an acceptable corrective action plan nor corrected significant deficiencies, all or a selected portion(s) of the contractor's estimating system shall be disapproved in writing. The notice of disapproval shall identify the cost element(s) covered by the disapproval and list the deficiencies which prompted the disapproval for each affected cost element.

(ii) A copy of the Notice of Disapproval shall be sent to the cognizant auditor and to each contracting office and contract administration office having substantial business with the contractor.

(9) *Withdrawal of estimating system dissapproval.* After the ACO determines that the contractor has corrected the significant system deficiencies, the ACO shall notify the contractor, the auditor, and all affected contracting activities that the disapproval has been withdrawn.

215.811-79 Contract clause.

The contracting officer shall insert the clause at 252.215-7003 in all solicitations and contracts to be awarded on the basis of certified cost or pricing data.

PART 242—CONTRACT ADMINISTRATION

3. Section 242.302 is amended by adding paragraph (S-75) to read as follows:

242.302 Contract administration functions.

* * * * *

(S-75) Review contracting estimating systems.

PART 252—SOLICITATION PROVISIONS AND CONTRACT CLAUSES

4. Section 252.215-7003 is added to read as follows:

252.215-7003 Cost estimating system requirements.

As prescribed in 215.811-79, insert the following clause.

Cost Estimating System Requirements (May 1988)

(a) *Definition.* "Estimating System" is a term used to describe a contractor's policies, procedures and practices for generating cost estimates which forecast costs based on information that is available at the time. It includes the organizational structure; established lines of authortiy, duties, and responsibilities; internal controls and managerial reviews; flow of work, coordination, and communication; and estimating methods, techniques, accumulation of historical costs, and analyses used by a contractor to generate estimates of costs and other data included in proposals submitted in the expectation of receiving contract awards.

(b) *General.* The Contractor shall have an estimating system that consistently produces well supported proposals that are an acceptable basis for negotiation of fair and reasonable prices. The estimating system should be consistent with and integrated with the Contractor's related management systems and subject to applicable financial control systems.

(c) *Applicability.* Paragraphs (d) and (e) are also applicable if the Contractor is a large business and, in its fiscal year preceding award of this contract, received Department of Defense (DoD) prime contractors or subcontracts thereunder totaling fifty million dollars ($50 million) or more for which certified cost or pricing data were required. This clause is also applicable if the Contractor is a large business which, in its fiscal year preceding award of this contract, received Department of Defense (DoD) prime contracts or subcontracts thereunder totaling ten million dollars ($10 million) or more for which certified cost or pricing data were required, and during performance of this contract the Contracting Officer notifies the Contractor in writing that paragraphs (d) and (e) of this clause apply.

(d) *System requirements.* The Contractor shall establish and maintain an estimating system in compliance with subsection 215.811-74 of the DoD FAR Supplement.

(1) The Contractor shall disclose its estimating system to the Contracting Officer responsible for contract administration (ACO) in writing. If the Contractor wishes the Government to protect such information as privileged or confidential, an appropriate legend should be placed on the face of the document(s) at the time of submission. An estimating system disclosure is adequate when the Contractor has provided the ACO with documentation which (i) accurately describes those policies, procedures and practices that the Contractor currently uses in preparing cost proposals; and (ii) provides sufficient detail for the Government to reasonably make an informed judgment regarding the adequacy of the Contractor's estimating practices.

(2) Significant changes to the cost estimating system must be disclosed to the ACO on a timely basis.

(3) The Contractor shall comply with its disclosed estimating system.

(e) *Estimating system deficiencies.* (1) If during the period of performance of this contract, the Contractor receives a report of the review of its estimating system which identifies deficiencies in the system, the Contractor agrees to respond as follows:

(i) If the Contractor agrees with the report findings and recommendations, the Contractor shall, within thirty (30) days of receipt of such report, indicates its agreement in writing; and within (60) days of receipt of such report, correct any identified deficiencies or submit a corrective action plan showing proposed milestones and actions leading to elimination of the deficiencies.

(ii) If the Contractor disagrees with the report findings and recommendations, the Contractor shall respond in writing within thirty (30) days of receipt of the report, indicating its rationale for each area of disagreement.

(2) The ACO shall evaluate the Contractor's response to the report and notify the Contractor of his/her determination concerning any remaining deficiencies and/or the adequacy of any proposed or completed corrective action(s).

(End of clause)

[FR Doc. 88-5969 Filed 3-17-88; 8:45 am]

BILLING CODE 3810-01-M

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

50 CFR Part 216

[Docket No. 60224-7282]

Regulations Governing the Importation of Tuna Taken in Association With Marine Mammals

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Department of Commerce.

ACTION: Interim final rule with request for comments.

SUMMARY: NMFS issues this interim final rule in response to a 1984 amendment to the Marine Mammal Protection Act (MMPA). The rule amends marine mammal regulations regarding the importation of yellowfin tuna caught with purse seines in the eastern tropical Pacific Ocean (ETP).

Under this rule, any nation wishing to export yellowfin tuna to the United States that has purse seine vessels in the ETP must satisfy a two-part test that requires: (1) Documentary evidence that the nation has adopted a regulatory program governing the incidental taking of marine mammals in the fishery that is comparable to the program of the United States, and (2) documentation that the average rate of incidental mortality of marine mammals in the fishery by its vessels is comparable to the rate of incidental mortality of marine mammals from fishing by the U.S. fleet.

DATE: This rule is effective April 18, 1988. Comments on the rule must be submitted no later than May 17, 1988.

ADDRESS: Comments should be addressed to the Assistant Administrator for Fisheries, National Marine Fisheries Service, National Oceanic and Atmospheric Administration, Department of Commerce, Washington, DC 20235. An Environmental Assessment/Regulatory Impact Review is available upon request.

FOR FURTHER INFORMATION CONTACT: E.C. Fullerton (Director, Southwest Region, NMFS), 213 514-6196; or Nancy Foster (Director, Office of Protected Resources and Habitat Programs, NMFS), 202-673-5355.

SUPPLEMENTARY INFORMATION:

Background

NMFS issued a proposed rule on August 13, 1986 (51 FR 28963), to amend 50 CFR 216.24 to modify the importation requirements for yellowfin tuna caught in association with marine mammals in foreign purse seine vessels in the ETP. As a result of comments received on the proposed rule, modifications and clarifications have been made to the rule.

Accordingly, the rule is being published as an interim final rule with a 60-day comment period. The regulatory procedures adopted in this rule are based on the best information available to NMFS at this time and represent a prudent approach to saving marine mammals. However, NMFS does not want the regulatory procedures adopted here to frustrate the purpose of the 1984 amendment and this regulation, that of saving marine mammals. In particular, NMFS wants to encourage foreign nations to comply with these regulations by implementing comparable programs and working to reduce their kill rates, rather than cause them to seek tuna markets outside the United States, thus frustrating U.S. efforts to reduce the total marine mammal kill by all nations. Furthermore, NMFS recognizes that changing conditions in the tuna industry, and the development of new and effective basic equipment and techniques for saving marine mammals, may necessitate re-evaluation of these regulations in the future. Therefore, NMFS invites comments from other Federal agencies, the public and foreign governments on this interim final rule. In particular, NMFS invites comments on the criteria set forth in this notice for determining comparability of regulatory program and kill rate, and their possible effects on the development of improved techniques and equipment.

Regulations governing the taking of marine mammals incidental to commercial fishing operations appear at 50 CFR Part 216. Included in these regulations are provisions concerning the importation of yellowfin tuna and tuna products from nations whose vessels participate in the yellowfin tuna purse seine fishery in the ETP. Effective January 1, 1978, these importation provisions made the importation of yellowfin tuna and tuna products from nations known to be involved in the ETP fishery contingent upon certain findings by the Assistant Administrator for Fisheries, NOAA (Assistant Administrator). Under § 216.24(e)(5)(i), the Assistant Administrator must find (a) that the fishing operations of the nation concerned * * * are conducted in conformance with U.S. regulations and standards * * *" or (b) that * * * "although not in conformance with these regulations, such fishing is accomplished in a manner which does not result in an incidental mortality and serious injury in excess of that which results from U.S. fishing operations under these regulations." These findings are subject to an annual review in which the information items listed in 50 CFR 216.24 (e)(5)(ii) are updated for the previous calendar year.

Since 1978, 18 nations in addition to the United States have purse seined in the ETP. Currently, findings are in effect for the following countries: the Cayman Islands, Costa Rica, Ecuador, Mexico, Panama, Spain, Vanuatu, and Venezuela. The Congo, El Salvador, Mexico, Peru, Senegal, and the Union of Soviet Socialist Republics (U.S.S.R.) have been prohibited from exporting yellowfin tuna to the United States during some period of time under these regulations. The Congo, Peru, and Senegal subsequently removed their fleets from the ETP. El Salvador and the U.S.S.R. do not have findings and therefore cannot export yellowfin tuna to the United States. Bermuda, Canada, the Republic of Korea, Nicaragua, and New Zealand have not purse seined in the ETP in recent years. Additional information can be found at 51 FR 18844, May 21 1986; 50 FR 3950, January 29, 1985; 48 FR 56966, December 27, 1983; 48 FR 30422, July 1, 1983; 48 FR 14431, April 4, 1983; 47 FR 11307, March 16, 1982; and, 46 FR 10974, February 5, 1981.

The most recent information available indicates that the active purse seine fleets with vessels of over 400 tons carrying capacity for nations currently with findings are as follows:

Nation	Number of vessels [1]
Cayman Islands	1
Costa Rica	1
Ecuador	4
Mexico	43
Panama	1
Spain	2
Vanuatu	4
Venezuela	15

[1] As of December 31, 1986.

Non-U.S. fleets have substantially increased their fishing for yellowfin tuna associated with marine mammals in the ETP since 1984. The Inter-American Tropical Tuna Commission (IATTC) estimated that non-U.S. vessels harvested 398,000 short tons (st) of yellowfin tuna on marine mammals during 1979–86, an average of about 49,750 st per year. The non-U.S. fleets are estimated to have taken 45,700 st of yellowfin tuna in marine mammal sets in 1984 and 109,600 st in 1985. Preliminary 1986 estimates indicate that the total yellowfin tuna catch by all vessels (including U.S. vessels) in the IATTC Yellowfin Tuna Regulatory Area (CYRA) was about 253,200 st, which is up from 142,300 st in 1984 and 217,000 st in 1985. The highest catch year on record for these species in the CYRA was 1986. The estimated total fleet capacity in 1986 was 122,900 st, which was a slight reduction from 129,500 st in 1985.

Nations with findings accounted for 194,862 st or 66 percent of all yellowfin tuna caught in the ETP during 1986. Mexico caught 59 percent of this amount, or 114,070 st. Other major nations catching ETP yellowfin tuna included Venezuela and Ecuador. Of the total amount of yellowfin tuna caught in the ETP by nations with findings during 1986, 24 percent, or 46,722 st, was imported into the United States fresh or frozen for use by domestic canneries. The estimated value of this product was approximately $37 million. Imports from Venezuela comprised the largest share of ETP yellowfin tuna, representing 35 percent of the total amount. Other major suppliers included Ecuador (19 percent) and Mexico (7 percent). Other nations with findings collectively accounted for 39 percent of the total ETP yellowfin tuna imported by U.S. canneries. Much of this amount was transshipped from Panama to U.S. canners in Puerto Rico.

With the exception of Mexico, nations with findings were very dependent upon the United States in 1986 as a market source for ETP-caught yellowfin tuna. Fifty-three percent of the yellowfin tuna caught in the ETP by Venezuelan vessels was imported into the United States by domestic canners in 1986. The value of this product was approximately $14 million. Twenty-six percent of all Ecuadorian-caught ETP yellowfin tuna

BEST COPY AVAILABLE

was imported by U.S canneries. Only 3 percent of the Mexican-caught ETP yellowfin tuna was imported by the United States during 1986 due to Mexico's strong European market for yellowfin tuna. Sixty-three percent of the ETP yellowfin tuna caught by all other countries was imported by U.S. canneries during 1986. These countries include the Cayman Islands, Panama, Spain and Vanuatu.

Canned tuna from ETP fishing nations amounted to 11,517 st, only 4 percent of all canned tuna imported into the United States. The amount of yellowfin tuna actually caught in the ETP, canned by nations with findings, and later imported into the United States is estimated to be very small but cannot be traced due to the present U.S. Customs importation classification system.

Public Law 98-364

On July 17, 1984, the President signed into law an act (Pub. L. 98-364) reauthorizing and amending the MMPA. One amendment is to ensure that each nation exporting yellowfin tuna to the United States has in place a regulatory program for the protection of marine mammals that is comparable to the program of the United States. It further requires documentation that the average rate of incidental taking of marine mammals by vessels of the harvesting nation in the ETP tuna fishery is comparable to that of the United States.

The House Committee on Merchant Marine and Fisheries noted that the regulatory program of the United States is quite extensive and detailed (see H.R. Report 98–758, p. 8). The Committee in reporting this legislation stated that it does not intend to require that the regulatory program of foreign countries be identical to that of the United States. Programs that require the basic equipment and techniques used to protect marine mammals and have as their purpose the minimization of the number of animals incidentally taken would be comparable as long as they provided a level of protection substantially equivalent to that of the U.S. program. Similarly, the Committee recognized that the average rate of incidental taking will vary from year to year. The Committee stated that it did not intend for the importation of tuna products to be banned from a nation if the rate of incidental taking is slightly higher in any given year. However, it added that the report of levels or rates of incidental mortality being consistently higher than those of the United States or significantly higher in any given year should result in the prohibition of imports.

Several important points must be made in this context. First, the statute clearly requires the Secretary of Commerce to evaluate performance on a country-by-country basis. Second, the Congress indicated that NMFS should continue to encourage nations which have not already done so to implement observer programs either on their own or in cooperation with the IATTC. Third, the Congress intended that NMFS require estimates of incidental take that are equivalent in accuracy and reliability to observer data obtained in the U.S. and IATTC observer programs. In summary, the Congress expects that the importation regulations will result in demonstrable evidence that those nations which have purse seine fishing vessels in the ETP and want to export yellowfin tuna to the United States have effective programs to prevent or reduce marine mammal mortality.

Comments and Responses

A proposed rule was published on August 13, 1986 (51 FR 28963), for public review and comment. NMFS received seven letters of comment on the proposed rule. Three letters were from or on behalf of national or local environmental organizations, two were from U.S. Government entities and two were from the tuna industry. A summary of the comments received and the NMFS response to those comments are as follows:

1. *Comment:* Several commenters expressed concern that the proposed regulations will not lessen high incidental mortality rates by foreign vessels. The commenters strongly recommended that a nation should have gear and procedure requirements comparable to U.S. industry or prove the effectiveness of the system in use.

Response: NMFS concurs. The Guidelines for Comparable Regulatory Programs and Mortality Rates have been amended to describe what NMFS considers as minimum gear and procedural requirements to be accepted as comparable to the U.S. industry.

2. *Comment:* Several commenters suggested that the consequences of not having a comparable observer program should be more clearly defined.

Response: NMFS agrees and has modified the Guidelines for Comparable Regulatory Programs and Mortality Rates to require participation in an approved observer program and to identify an annual observer coverage goal of 33 percent for individual harvesting nations. The consequence for a nation not meeting this goal could be a negative finding by the Assistant Administrator if it is determined that the data submitted are not sufficient to make a finding of conformance.

3. *Comment:* Several commenters suggested that area fished and stock composition be considered in comparing the average rate of incidental marine mammal mortality between U.S. and foreign fleets.

Response: NMFS acknowledges that incidental marine mammal mortality varies by stock and geographic area. Based on recent summarized data available from IATTC, three distinct geographic areas have been established in the regulations for comparing U.S. and foreign marine mammal mortality rates. The distribution and behavior of the common dolphin were found to be sufficiently different from other marine mammal stocks that mortality data also will be requested separately for comparability purposes.

4. *Comment:* Four commenters suggested that the 50 percent criterion for comparing incidental mortalities between U.S. and foreign fleets be reviewed, because it appeared to be too high.

Response: NMFS has made substantial modifications to the criterion for determining comparability rates of incidental mortality of marine mammals. These modifications are designed to demonstrate firmness in U.S. efforts to achieve comparability between U.S. and foreign fleets in reducing marine mammal mortality without precluding foreign cooperation in saving marine mammals by issuing criteria so stringent that nations will seek tuna markets outside the United States, thus circumventing U.S. efforts to reduce the total marine mammal mortality by all nations.

The revised criterion for determining comparability establishes the average number of marine mammals killed per ton of tuna caught in sets made on marine mammals over a five-year period or for the most recent year, whichever is lower, as the measure of performance for U.S. and foreign fleets. Comparability will be evaluated annually by geographic area, separating data on common dolphin sets from all other marine mammal species. Details of the system are provided later in this preamble.

5. *Comments:* One commenter recommended that the reference to "incidental mortality" be amended to "incidental take."

NMFS has chosen to use the rate of kill as the standard for the rate comparison test, and not to use other types of "takings" like chase, encirclement, or capture. This decision is supported by the fact that virtually

the entire focus of the domestic regulatory program in practice is "kill", and the yearly quota used for monitoring and controlling the fishery established first by regulation and now by statute is in terms of "kill". Although studies are underway on the effects of chase, encirclement, and capture, the application of these "takings" to the rate comparison test is premature. When or if restrictions on these types of "takings" are sufficiently supported by scientific evidence to be meaningfully incorporated into the domestic regulatory program then their use in the comparison test would be appropriate.

6. *Comment:* One commenter questioned our preference for "kill-per-ton" over "kill-per-set" for making mortality rate comparability determinations.

Response: Although the proposed rule would have used both "kill-per-ton" and "kill-per-set" rates, NMFS has concluded that the use of marine mammals killed per ton of yellowfin tuna is the best single rate to use in the comparability test implemented in these regulations. Because species groups and area of catch are factored into the comparison test along with the kill rate, NMFS has determined that the complications of using both kill-per-set and kill-per-ton in addition to these other factors is not warranted. Although kill-per-set is useful for some purposes, NMFS has concluded that kill-per-ton is a better rate for comparison test purposes because it takes into consideration the performance of vessels for any given amount of yellowfin tuna caught. This rate best focuses foreign countries on the desirable result of minimizing marine mammal kill for any given amount of catch of yellowfin tuna.

7. *Comment:* Two commenters expressed concern that the regulations would encourage nations to market their tuna products outside the United States because of difficulties in obtaining detailed tuna/marine mammal data from foreign nations and, in some instances, enacting acceptable statutes to meet U.S. requirements.

Response: The statute requires that this regulatory system be established. NMFS has selected only the most relevant data requirements which are known to be available and necessary to make a finding.

NMFS recognizes the difficulties encountered by certain nations in enacting acceptable statutes to meet the finding requirement when the vessels operating under their flags are under charter to another nation whose vessels operate under statutes already approved by the United States. To accommodate these rare situations, provision has been made to consider foreign vessels chartered in another country to be operating under the laws of that nation. A definition for certified charter vessel has been added in the regulation for this purpose.

8. *Comment:* Several commenters questioned why alternative programs could not be used as a management tool. Multi-regional cooperative programs and foreign quotas on incidental take were specific suggestions as alternatives to the proposed regulation.

Response: The 1984 amendments to the statute mandate that each nation is to be examined separately for comparability with the U.S. performance and programs.

Interim Final Rule

This interim final rule implements a performance-based import certification program consistent in basic structure and in principle with the marine mammal protection program for U.S. vessels which take marine mammals incidental to yellowfin tuna while purse seine fishing. This certification program is a new approach, the elements of which may be modified by NMFS as new information becomes available and experience demonstrates better ways to achieve lower mortality.

A two-part test will be used each year to determine whether to grant or extend a finding of conformance for any individual nation. This test applies to any nation that has a vessel or a certified charter vessel of 400 tons carrying capacity or greater that fishes for tuna in the ETP. This is consistent with U.S. regulations and recognizes that smaller vessels cannot effectively set on marine mammals. First, each nation must be found to have a regulatory program to protect marine mammals that is comparable to the U.S. program. The annual evaluation of the regulatory program will consider the comparability of laws, regulations, and guidelines which govern the gear and techniques which each nation's vessels must use to prevent or minimize marine mammal mortality when purse seining for yellowfin tuna associated with marine mammals. Second, the effectiveness of each nation's regulatory program will be assessed by monitoring the nation's annual marine mammal kill rate. Each nation must demonstrate, using reliable and verifiable data, that the average annual rate of incidental mortality of marine mammals per ton of yellowfin tuna taken with marine mammals from fishing vessels operating under its laws is comparable to the incidental rate of marine mammal mortality achieved by U.S. vessels fishing in the same geographic area and in association with the same species groups. For purposes of this test, the two species groups considered are common dolphins and all other marine mammal species. The Comparable Regulatory Program test will be applied immediately and the kill rate test will be applied in 1991 when adequate data are available to allow a meaningful comparison to be made, as explained below.

Initial Certification

An existing finding of conformance will continue in effect until a determination (either positive or negative) is made on a new request for a finding under these new regulations, if the request and documentation are submitted within 120 days from the effective date of these regulations and if the application as submitted is complete. Findings for nations not submitting the required documentation will expire 180 days after the effective date of these regulations. Any nation that does not have an existing finding of conformance but has one or more vessels of 400 tons carrying capacity or greater using purse seine gear in the ETP that desires to export yellowfin tuna or yellowfin tuna products to the United States must submit documentation to support a finding at least 120 days prior to the date it wishes to commence exportation of yellowfin tuna.

The Assistant Administrator will review each nation's submission for completeness and will assess each nation's described regulatory program for comparability with the U.S. program. Additional information may be requested from the nation before issuing an affirmative finding. An affirmative finding for this test is likely to be issued if the program contains provisions similar to those in the guidelines that follow. Copies of the relevant U.S. regulations have been provided to all interested nations. Each nation's submission must contain sufficient detail so that the Assistant Administrator will be able to determine that the nation's regulatory program is comparable in substance and effectiveness to the U.S. program. At a minimum, the documentation for an initial finding must contain:

1. A description of gear and procedural requirements, including copies of relevant laws, guidelines, and implementing regulations, and the enforcement program designed to reduce or prevent the incidental mortality and injury of marine mammals in purse seine fishing by its vessels;

2. A description of the observer program by which the incidental mortality of marine mammals is monitored and by which annual species mortality and fleet mortality rates are estimated. If the nation is not participating in the IATTC observer program but is conducting an independent observer program, the nation must provide details regarding the number and percentage of trips covered, training requirements for observers, the data collected by observers, and the agency to contact for additional information;

3. A description of the methods used to identify problems and solutions to improve the performance of individual fishermen in reducing incidental mortality and how fishermen will be advised (e.g., through technical experts or a peer advisory group);

4. A list of the purse seine vessels of 400 short tons carrying capacity or greater (i.e. IATTC Category 6 vessels) in the nation's fleet which operated in the ETP in 1986 or 1987, or both; the status of each vessel during 1986 and 1987 (e.g., actively fishing in the ETP, actively fishing in other waters, or inactive); and the expected status during 1988 of the above vessel(s) and all other purse seine vessels expected to operate in the ETP in 1988.

5. Data on the performance of the nation's purse seine vessels (including certified charter vessels) operating in the ETP for either or both of the previous two fishing years (1986–1987) including:

a. Total number of tons of yellowfin tuna observed caught in each fishing area by purse seine sets on:

1. Common dolphin and
2. All other marine mammal species;

b. Total number of marine mammals observed killed in each area by purse seine sets on:

1. Common dolphin and
2. All other marine mammal species;

c. Number of observed trips and number of observed purse seine sets on marine mammals by the nation's purse seine fleet during the year;

d. Total number of vessel trips and total number of purse seine sets on marine mammals by the nation's purse seine fleet during the year; and

e. The number of observed purse seine sets in which more than 15 marine mammals were killed.

The information requested in 5 a–c, and 5e refers to information obtained by observers on the tuna vessels. For purposes of the information requested above, a purse seine set on common dolphins is one in which more than 50 percent of the marine mammals captured are common dolphins.

These data must be provided by geographic area and for two species groups, common dolphin and all other marine mammals. A mortality of 15 animals or more in a set is used to identify problem sets that require special attention by the nation to analyze skipper performance or the effectiveness of fishing techniques to avoid future mortalities from similar causes.

Guidelines for Comparable Regulatory Programs and Mortality Rates

Documentation submitted annually by a nation must show that certain minimum requirements have been met in order to satisfy the two-part test for comparability.

Comparable Regulatory Program Test

1. Marine mammal rescue gear, equipment and procedural requirements and guidelines.

At a minimum, the gear and procedural requirements must include the installation and use of a superapron or fine mesh system in the purse seine net, a backdown procedure, the availability of speedboats with towing bridles to hold open nets, the availability of a raft to aid live animals after backdown, a prohibition on brailing and sacking up live animals from the net and the installation and use during darkness of a lighting system capable of illuminating the backdown channel with at least 140,000 lumens. Sets on pure schools of eastern spinner dolphin and on pure schools of any other species of marine mammals except offshore spotted dolphin stocks, striped dolphin species, and common dolphin species must be prohibited.

2. An observer program to monitor the effectiveness of marine mammal rescue gear and procedures and to record the incidental mortality and serious injury of marine mammals associated with fishing.

To be comparable with the U.S. observer program, a nation must participate in an observer program with a goal of 33 percent observer coverage on trips involving fishing on tuna associated with marine mammals. This could be achieved by an individual nation placing a qualified technical observer aboard its vessels on every third trip or on a regional basis by nations participating in the IATTC observer program. If a program's observer coverage falls below 33 percent, the nation must explain the cause of the problem and how it will be rectified in the future. Observer coverage consistently below 33 percent or drastically below 33 percent in any one year would be a basis for finding that the program is not comparable to that of the United States.

3. An advisory group to identify problems and solutions to improve the performance of individual fishermen in reducing incidental marine mammal mortality.

A panel of expert captains is a peer advisory group established by the U.S. industry to review and improve individual skipper performance. A similar peer advisory group established by an individual nation or on a regional basis would be considered comparable, as would an advisory group of technical experts.

Comparable Mortality Rate Test

The ultimate goal for comparability is to attain foreign marine mammal mortality rates (kill-per-ton) at least as low as those of the United States. However, after reviewing the limited kill-rate summary data for the aggregate foreign tuna fleet, it was found that the current kill rate may be up to four times higher than the U.S. rate. Based on this starting rate, it was determined that, as an interim step, kill rate comparisons should not be used as a basis for a negative finding until 1991. This allows nations time to gather adequate data to allow the United States to make a meaningful comparison, and to work with their skippers to reduce their kill rates.

NMFS will monitor the annual kill-per-ton rate through 1990 by species and fishing area. During this period, nations will be expected to maintain a negative trend in their kill-per-ton rates to assure that effective regulatory programs are being conducted and that rates comparable with the United States will be attained at the end of the interim period. A negative trend will be assessed by fitting a statistical regression line to the annual kill-per-ton rates for the years 1986–90, and determining the slope of the line. If the U.S. kill-per-ton rate increases during this period, however, the kill-per-ton rate for foreign nations can increase in proportion to the U.S. rate.

However, beginning with the 1988 data, if the annual kill-per-ton rate for any nation does not decline, or increases more than the U.S. rate increases, the Assistant Administrator will issue a negative finding unless, after a review of the nation's explanation of the causes and actions taken, the Assistant Administrator determines that actions taken or being taken are likely to reduce marine mammal mortality in the future. In conducting the review, the Assistant Administrator will request specific details concerning the actions taken to identify and counsel any skippers whose performance is unsatisfactory and to handle any other specific factors causing high mortality.

NMFS decided that this phase-in period was appropriate because it would encourage foreign nations to comply with these regulations by implementing comparable programs and working to reduce their kill rates, rather than cause them to seek tuna markets outside the United States, thus frustrating U.S. efforts to reduce total marine mammal kill by all nations.

The rates of marine mammal mortality (kill-per-ton) estimated from extensive observer data have varied significantly for the U.S. fleet since 1979 in each fishing area. We assume that the foreign kill rate will also vary significantly from year to year. To reduce this variability, NMFS will use a five year running average for kill rate comparison if adequate data for the five year period exists. This will provide a larger data base for use in the analysis. Most nations with current findings were participating in an adequate observer program by 1986. Therefore, during the interim period of 1986 through 1990, most countries could gather 5 years of data. If a country does not have five years of adequate data by 1990 or when they apply for a certification after 1990, NMFS will use the information from those years for which the country has adequate data. If a nation's kill rate for the most recent year is lower than the multi-year average, the nation can use that for comparison. This, however, should not be interpreted as allowing a nation to have high mortality rates for four years, and then by meeting the comparability test in the last year, that importation will necessarily be allowed. It should be remembered that nations must also achieve a negative trend in its kill rate during the first five year period, absent an explanation acceptable to NMFS.

There are significant differences in mortality rates in three different areas of the ETP. These areas are the major inshore area (Area 1) and offshore area (Area 2) fished by all nations, and all other areas fished (Area 3). Also, the marine mammal kill rate in sets on common dolphin is significantly greater than the kill rate from sets on all other species. NMFS has decided that these differences should be accounted for in applying the kill rate test. This would result in a fairer and more accurate comparison than a simple comparison of rates without considering the effect of area and species differences upon mortality. Therefore, before comparing a foreign kill rate with the U.S. kill rate, NMFS will weight the U.S. kill rate according to the amount of tuna that the foreign nation caught in the three different areas and on the two different species groups, as shown in the example below.

The United States will have more confidence in an estimate of a nation's kill rate if that nation has observer data from at least 5 trips and 100 sets per year. Conversely, we will have less confidence in data derived from less than 5 trips and 100 sets. Because of the uncertainty of estimates of kill and the small numbers of porpoise involved in the fisheries of nations with small fleets, we will use a less stringent test for these nations. If a nation's kill rate is derived from data from at least 5 trips and 100 sets per year, that nation's kill rate may be no more than 25 percent higher than the comparable U.S. kill rate to receive a positive finding for the kill rate test. If the kill rate is derived from data from fewer than 5 trips and 100 sets per year, the nation must have a kill rate that is no more than 75 percent greater than the comparable U.S. kill rate to receive a positive finding on the kill rate test.

Summary and Example: The comparable mortality rate test consists of comparing a nation's average mortality rate to the average mortality rate of the United States which is weighted to account for dissimilar amounts of fishing activity between the United States and the foreign nation in three discrete fishing areas and for two groupings of species. The foreign rate is then adjusted by an allowable 25 percent or 75 percent depending upon the number of trips and sets in a year. The foreign nation's average mortality rate using the most recent year of data, or the average of all of the data available from the last five years, whichever is lower, will be used to compare with the same time period of the U.S. data.

Formulas Used To Calculate Foreign and U.S. Mortality Rates

The mortality rate (dolphins killed/ton yellowfin caught) for each foreign nation (R_f) is calculated using data stratified by year, species grouping and area as

$$R_f = \sum_{i=1}^{m} \sum_{j=1}^{2} \sum_{k=1}^{3} M_{ijk} \sum_{i=1}^{m} \sum_{j=1}^{2} \sum_{k=1}^{3} C_{ijk}$$

where M_{ijk} equals the number of dolphins killed during year i, of species group j and in area k and C_{ijk} is the tons of yellowfin tuna caught during year i, on species group j and in area k. Note that m equals 1 if only the most recent year's data are used and equals 5 if the five-year running average is used.

The weighted average mortality rate for the U.S. fleet is calculated by weighting the U.S. rate by the proportion of the total yellowfin tuna caught by the foreign nation that was caught in each year, on each species grouping, and in each area. The U.S. weighted average (R_{US}) is calculated as:

$$R_{US} = (1/C\ldots) \left[\sum_{i=1}^{m} \sum_{j=1}^{2} \sum_{k=1}^{3} (K_{ijk}/T_{ijk}) C_{ijk}\right]$$

where K_{ijk} equals the number of dolphins killed by the United States fleet during year i, of species grouping j and in area k and T_{ijk} equals the tons of yellowfin caught by the U.S fleet during year i, on species grouping j and in area k. C_{ijk} equals the tons of yellowfin tuna caught by the foreign nation during year i, on species grouping j, and in area k and C * * * is the total catch of the foreign nation for all years, species groupings, and areas combined.

Finally, the U.S. rate (R_{US}) is multiplied by 1.25 if the foreign nation has completed more than 5 observed trips and made more than 100 observed sets or by 1.75 if it has completed less than 5 trips or made less than 100 observed sets. If the foreign nation's rate is less than or equal to the U.S. rate then they have met the mortality rate test standard.

Example: To simplify this hypothetical example, we will assume that nation X has chosen to use only the most recent year (or the only year data was collected). During the year, nation X has completed 6 observed trips and made 250 observed sets on dolphins. Dolphin mortality and yellowfin catch during dolphin sets for nation X and the United States during the most recent year are presented in Table 1.

1. Nation X Rate (hypothetical)

$$R_f = \frac{(1000+800+0+600+5000+2500)}{(1000+500+0+2000+21000+6000)}$$

$= 9900/30500$
$= 0.325$

2. United States Rate (hypothetical)

$R_{US} = (1/30500)\,[(200/500)1000+(600/1800)500+(100/400)0+(25/200)2000+(6000/20000)21000+(2000/6000)6000]$
$= (400+166.667+0+250+6300+2000)/30500$
$= 0.298$

VOL
53
ISS
53
MR
18
988
UMI

3. Comparison of Nation X and United States Rates (hypothetical)

Nation X rate=0.325

U.S. rate $(R_{US})\times1.25=0.299\times1.25=0.374$

Therefore, because Nation X's rate is less than the adjusted U.S. rate, it will be eligible to export yellowfin tuna to the United States.

TABLE 1. NUMBER OF DOLPHINS KILLED AND YELLOWFIN TUNA CAUGHT BY NATION X AND THE UNITED STATES DURING THE MOST RECENT FISHING YEAR, ON COMMON AND ALL OTHER SPECIES, AND IN THREE FISHING AREAS

[Hypothetical example]

Area	Common dolphin sets		All other sets		Total catch
	Mortality (animals)	Catch (tons)	Mortality (animals)	Catch (tons)	
Nation X:					
1	1,000	1,000	500	2,000	
2	800	500	5,000	21,000	
3	0	0	2,500	6,000	
Total		1,500		29,000	30,500
United States:					
1	200	500	25	200	
2	500	1,800	6,000	20,000	
3	100	400	2,000	6,000	

Annual Review

Commencing in July 1989, the Assistant Administrator will annually review all existing findings. The Assistant Administrator will require that each nation submit an annual report by July 31 of each year if it desires an extension of an affirmative finding for the following year. This date was chosen because the annual IATTC information is generally available in early July. This annual report will update the information in the original submission as well as provide data on the performance by its vessels during the previous year. The annual report will include the following:

1. Any changes in the gear, equipment or procedural requirements (including copies of relevant laws, regulations, guidelines, etc.) governing incidental taking of marine mammals by the nation's ETP purse seine vessels;

2. Any changes in the number of vessels, names of vessels or status of vessels on the vessel list submitted previously;

3. Actions (e.g., participation in IATTC workshops) taken by the nation in the past year to reduce or prevent marine mammal mortality and serious injury associated with fishing by its vessels; and,

4. Data on the performance of the nation's purse seine vessels (including certified charter vessels) operating in the ETP for the previous fishing year including:

a. Total number of tons of yellowfin tuna observed caught in each fishing area by purse seine sets on:

1. Common dolphin and
2. All other marine mammal species;

b. Total number of marine mammals observed killed in each area by purse seine sets on:

1. Common dolphin and
2. All other of marine mammal species;

c. Number of observed trips and number of observed purse seine sets on marine mammals by the nation's purse seine fleet during the year;

d. Total number of vessel trips and total number of purse seine sets on marine mammals by the nation's purse seine fleet during the year; and

e. The number of observed purse seine sets in which more than 15 marine mammals were killed.

The annual report must describe in detail the method used to obtain these data. In this context, NMFS recognizes the role filled by IATTC in collecting data on incidental marine mammal mortality through its international observer program and in estimating total mortality associated with U.S. and non-U.S. fishing. The IATTC observer program is comparable to the U.S. observer program and, as now constituted, provides reliable data to estimate total mortality and rates of mortality for vessels from participating nations. These data and resulting estimates represent the best scientific information available for the purposes of these regulations and will be used to monitor mortality in the fishery. Data obtained through participation in the IATTC program and submitted to the Assistant Administrator by the nation requesting certification or by IATTC on behalf of a nation requesting certification will be accepted.

However, a nation is not required to participate in the IATTC program in order to provide acceptable data. A nation may establish its own program or participate in a program like that of IATTC. A nation not participating in the IATTC observer program must provide sufficient information on the observer training and the sampling methodology used in the program in order to demonstrate that any data submitted are of comparable accuracy and reliability. The adequacy of the observer training and observer coverage of such a program will be determined by a scientific review conducted by NMFS in consultation with other scientific experts.

The first annual report will be due July 31, 1989, to cover fishing during the 1988 fishing year.

The Assistant Administrator will review each report carefully to decide whether to extend or terminate a finding under this program. A nation's finding will terminate on December 31 of any year unless the Assistant Administrator receives a complete annual report, determines that the nation's program and kill rates are comparable, and publishes his finding for the following year in the **Federal Register**. Every year the Assistant Administrator will determine whether the nation's program is comparable to that of the United States. In 1989, the Assistant Administrator will also review the kill rate trend as described earlier in the preamble. In 1991, the Assistant Administrator will review the program and the kill rate as described earlier, to determine if both the regulatory program and the kill rate are comparable to those of the United States.

The Assistant Administrator will review the performance of the U.S. fleet by July 1 each year to establish its revised five-year baseline performance level and supporting data that will be used to determine the comparability for each nation for its subsequent year's finding. The revised five-year baseline data will include: the proportion of sets made on marine mammals associated with high mortality sets (more than 15 porpoises killed) and separate computations for the kill-per-ton of common dolphin and for all other marine mammals for each fishing area.

The current five-year average kill-per-ton will be computed using the most recent year's data submitted by the foreign nation which will be added to that nation's four previous years of data to determine whether the new average kill-per-ton rate is within 25 percent or 75 percent, whichever is appropriate, of the weighted U.S. rate for the same years.

In future years, the general procedure will be to receive annual estimates of marine mammal mortality by species and stocks; to receive annual reports with detailed program information and fleet data, to assess these annual reports so that the Assistant Administrator can determine whether each nation's marine mammal regulatory program and kill rate continue to be comparable to the U.S. program and kill rate, and to announce findings at least 60 days before the start of each new calendar year.

Modifications to the Proposed Rule

In addition to those changes to the proposed rule discussed in detail in the preamble above (i.e. 5-year baseline. data gathering period; 25/75 percent mortality rate comparability test; and 3 fishing area—2 species designations) the following modifications to the proposed rule have been made in the interim final rule:

1. Definitions for "certified charter vessel" and "kill-per-ton" have been added to 50 CFR 216.3. The proposed definition for "ETP" has been modified to designate 3 distinct fishing areas.

2. Modifies Tariff Schedule Numbers to reflect changes made by U.S. Customs Service.

3. Does not adopt the proposal to eliminate the Yellowfin Tuna Certificate of Origin (SF 370–1) because it was determined that the necessary documentation was not obtainable elsewhere. The form was however, simplified. The required information items from the form have been added to the rule. The interim final rule eliminates the bill of lading requirement because information is now on the Yellowfin Tuna Certificate of Origin.

4. Places responsibility for monitoring, enforcement and data reporting for certified charter vessels to the nation which charters the vessel(s).

5. Clarifies that mortality rate data must be submitted from vessels with observers. Nations are to submit the observed data, rather than extrapolate from the observed data to an overall kill-per-ton rate.

6. Requires that data submitted for calculating mortality rates must be authentic and accurate.

Confidentiality

All data submitted by foreign nations in compliance with this rule will be kept confidential as allowed by U.S. law. Generally, this means that the data will be made available to the public only in aggregated form.

Classification

The Assistant Administrator has determined that the modifications to the regulations being made at 50 CFR 216.24(e) will not have a significant impact on the human environment. NMFS has prepared an environmental assessment (EA) on the modification. The finding of that EA was that no significant impact on the human environment will occur as a result of this rule and that no environmental impact statement was required. The EA is available upon request (see ADDRESS).

The Administrator of NOAA has determined that this rule is not a major rule requiring a regulatory impact analysis under Executive Order 12291. The estimated economic impact of ETP yellowfin tuna import prohibitions, if any, could be expected to result in a short-term, slightly positive benefit to U.S. fishermen and a short-term, slightly negative impact on tuna processors if affirmative findings are not made for nations now exporting ETP yellowfin tuna to U.S. processors. The impact would depend upon the number of nations embargoed and the amount of yellowfin tuna normally provided by the nation(s). This impact would exist until such time as any reduction in imports is made up by exports from other areas of the world, especially from the western Pacific nations which are not affected by this action or by non-embargoed ETP nations. NMFS prepared a regulatory impact review as part of its EA which concluded that this rule will not result in (1) an annual major increase in costs or prices for consumers, individual industries or government agencies; (2) an annual effect on the economy of $100 million or more; or (3) significant adverse effect on competition, employment, productivity, innovation, or on the ability of U.S.-based enterprises to compete with foreign-based enterprises in domestic or export markets. However, if more stringent rules are adopted and/or all ETP fishing nations are unable to qualify to export yellowfin tuna to the United States, it was determined that up to 47,000 st of yellowfin tuna valued at approximately $37 million could be lost to U.S. processors. Such a loss of imported tuna would represent about 24 percent of U.S. production. A copy of the review is available upon request (see ADDRESS).

The General Counsel of the Department of Commerce has certified to the Small Business Administration that the proposed modification to the regulations will not have a significant economic impact on a substantial number of small entities. As noted above, more stringent regulations likely would adversely affect the single remaining tuna canning plant in California and the tuna processing facilities in Puerto Rico and American Samoa. These facilities are by definition not small businesses. They would also affect an unknown number of import-export businesses and support industries. The impact on these industries is believed to be insignificant since lightmeat tuna, especially the canned product, is available world-wide and alternate markets are readily available if some ETP sources became unavailable. As a result, a regulatory flexibility analysis was not prepared.

This rule contains collections of information subject to the Paperwork Reduction Act of 1980 (44 U.S.C. 3501 *et seq.*). The collections which are subject to the Act are found at 50 CFR 216.24(e) (3) and (4) and have been approved by the Office of Management and Budget under OMB Control Number 0648–0040.

This rule does not contain policies with federalism implications sufficient to warrant preparation of a federalism assessment under Executive Order 12612.

List of Subjects in 50 CFR Part 216

Administrative practice and procedure, Imports, Marine mammals, Penalties, Reporting and recordkeeping requirements, Transportation.

Date: March 14, 1988.

James E. Douglas, Jr.,

Deputy Assistant Administrator for Fisheries, National Marine Fisheries Service.

For the reasons set forth in the preamble, 50 CFR Part 216 is amended as follows:

PART 216—REGULATIONS GOVERNING THE TAKING AND IMPORTING OF MARINE MAMMALS

1. The authority citation for Part 216 continues to read as follows:

Authority: 16 U.S.C. 1361 et seq.

2. Section 216.3 is amended by adding in alphabetical order five new definitions, one for "certified charter vessel," one for "ETP," one for "harvesting nation," one for "purse seine set on common dolphins" and one for "kill-per-ton," to read as follows:

§ 216.3 Definitions.

* * * * *

"Certified charter vessel" means a fishing vessel of a non-U.S. flag nation, which is operating under the jurisdiction of the marine mammal laws and regulations of another, harvesting, nation by a formal declaration entered into by mutual agreement of the nations.

* * * * *

"ETP" means the eastern tropical Pacific Ocean which includes the Pacific Ocean area bounded by 40° N. latitude, 40° S. latitude, 160° W. longitude and the coastlines of North, Central and South America.

"ETP Fishing Area 1" means the northern coastal portion of the ETP east of 117° W. longitude and north of 5° N. latitude.

"ETP Fishing Area 2" means the offshore area south of 14° N. latitude, north of 6° N. latitude, east of 150° W. longitude, and west of 123° W. longitude.

"ETP Fishing Area 3" means all other areas within the ETP not included in Fishing Areas 1 and 2.

* * * * *

"Harvesting nation" means the country under whose flag one or more fishing vessels are documented, or which has by formal declaration agreed to assert jurisdiction over one or more certified charter vessels, from which vessel(s) fish are caught that are a part of any cargo or shipment of fish to be imported into the United States, regardless of any intervening transshipments.

* * * * *

"Purse seine set on common dolphins" means a purse seine set in which more than 50 percent of the marine mammals captured are common dolphins.

* * * * *

"Kill-per-ton" means the number of small toothed cetacean marine mammals killed per ton of yellowfin tuna caught in sets made on marine mammals.

* * * * *

3. Section 216.24 is amended by revising paragraphs (e) (1), (2), (3), (4), and (5) to read as follows:

§ 216.24 Taking and related acts incidental to commercial fishing operations.

* * * * *

(e) *Importation.* (1) It is illegal to import into the United States any fish, whether fresh, frozen, or otherwise prepared, if such fish have been caught with commercial fishing technology that results in the incidental kill or incidental serious injury of marine mammals in excess of that allowed under this part for U.S. fishermen.

(2) The following fish and categories of fish, which the Assistant Administrator has determined may be involved with commercial fishing operations which cause the death or injury of marine mammals, are subject to the requirements of this subsection:

(i) *Yellowfin tuna.* The following U.S. Tariff Schedule Item Numbers identify the categories of tuna and tuna products under which yellowfin tuna is imported into the United States and which are subject to the restrictions of paragraphs (e)(3) and (e)(5) of this section:

110.10–20	Tuna; yellowfin, whole fish
110.10–25	Tuna; yellowfin, eviscerated, head on
110.10–30	Tuna; yellowfin, eviscerated, head off
110.10–37	Tuna; yellowfin, other
112.30–40	Tuna; canned, other than white meat, no oil—except cans marked as other than yellowfin tuna in a manner approved in advance by the Assistant Administrator
112.34–20	Tuna; canned, other, no oil—except cans marked as other than yellowfin tuna in a manner approved in advance by the Assistant Administrator
112.90–00	Tuna; canned, other, in oil—except cans marked as other than yellowfin tuna in a manner approved in advance by the Assistant Administrator
113.56–65	Tuna; other, not in oil, prepared or preserved—except shipments of loins and discs marked other than yellowfin tuna in a manner approved in advance by the Assistant Administrator.

(ii) *Salmon and halibut.* The following U.S. Tariff Schedule Item Numbers identify the categories of salmon and halibut products which are imported into the United States and are subject to the restrictions of paragraph (e)(4) of this section:

110.20–25	Halibut, fresh or chilled
110.20–30	Halibut, frozen
110.20–45	Salmon, fresh or chilled
110.10–50	Salmon, frozen
110.70–40	Halibut, other—except portion controlled steaks
111.48–00	Salmon, salted
111.88–00	Salmon, smoked or kippered
112.16–00	Salmon, preserved, not in oil

(3) *Yellowfin tuna.* (i) All shipments of tuna and tuna products listed in paragraph (e)(2)(i) of this section, from any nation, may not be imported into the United States unless a finding required in paragraph (e)(5) of this section has been made and unless accompanied by a separate Yellowfin Tuna Certificate of Origin (Standard Form 370–1).

(ii) The Yellowfin Tuna Certificate of Origin must include the following information:

(A) Country of registry of the fishing vessels involved;

(B) Nation under whose laws a certified charter vessel is operating;

(C) Exporter (name and address);

(D) Consignee (name and address);

(E) Identity and quantity of the tuna to be imported, listed by U.S. Tariff Schedule Number;

(F) Name of vessel(s) which caught the yellowfin tuna;

(G) Other documentation as may be required by the Assistant Administrator, subsequent to granting a finding in paragraph (e)(5) of this section; and

(H) A declaration signed either by a responsible government official of the country whose flag vessel or certified charter vessel caught the fish, the owner's representative, or the vessel master which states: "I certify that the above information is complete, true and correct to the best of my knowledge and belief."

(4) *Salmon and halibut.* All shipments of fish and fish products listed in paragraph (e)(2)(ii) of this section, from any nation, may not be imported into the United States unless the following conditions are met:

(i) The shipment is accompanied by a commercial invoice and/or a bill of lading indicating the following.

(A) Nation of registry of the fishing vessel(s) involved;

(B) Exporter (name and address);

(C) Consignee (name and address);

(D) Identity and quantity of the fish or fish products to be imported; *and*

(ii) The shipment is accompanied by a statement by a responsible official of the harvesting nation or the master of the vessel which caught the fish that such fish were not caught in a manner prohibited for U.S. fishermen by these regulations. The statement will identify the species, quantity, and exporter of the fish to which the statement refers, and be submitted at the time of importation; *or*

(iii) A responsible official of the harvesting nation may certify to the Assistant Administrator that all of its flag vessels are fishing in conformance with these regulations or that the fishing technology practiced by the harvesting nation with respect to the species of fish presented for importation into the United States does not result in deaths to marine mammals in excess of that which results from U.S. commercial fishing operations as prescribed by these regulations. Upon receipt of a

statement of conformance, the Assistant Administrator may then make a finding, and publish such finding in the **Federal Register**, that fish imports listed in paragraph (e)(2)(ii) of this section from the nation were not caught with commercial fishing technology which results in the incidental kill of marine mammals in excess of U.S. standards.

(5) *Yellowfin tuna.* (i) Any tuna or tuna products in the classifications listed in paragraph (e)(2)(i) of this section, from nations whose flag vessels and certified charter vessels of 400 tons carrying capacity or greater operate in the ETP tuna purse seine fishery, as determined by the Assistant Administrator, may not be imported into the United States unless the Assistant Administrator makes a finding in consultation with the U.S. Department of State and publishes the finding in the **Federal Register** that:

(A) The government of the harvesting nation has adopted a regulatory program governing the incidental taking of marine mammals in the course of such harvesting that is comparable to the regulatory program of the United States; and

(B) The average rate of that incidental mortality by the vessels of the harvesting nation is determined comparable to the average rate of incidental mortality of marine mammals by U.S. vessels in the course of such harvesting. Upon such a finding, unloading will be allowed for the period of validity specified in the finding.

(ii) A harvesting nation which desires an initial finding under these regulations that will allow it to export to the United States those products listed in paragraph (e)(2)(i) of this section must submit by appropriate government official to the Assistant Administrator the information listed below 120 days before that nation wants to begin exportation of yellowfin tuna to the United States. The required information follows.

(A) A detailed description of the nation's regulatory and enforcement program governing incidental taking of marine mammals in the purse seine fishery for yellowfin tuna, including:

(*1*) A description, with copies of relevant laws, implementing regulations and guidelines, of the gear and procedures required in the fishery to protect marine mammals;

(*2*) A detailed description of the method (e.g., international or national observer records) by which the incidental mortality of marine mammals will be monitored; and

(*3*) A description of the methods used to identify problems and solutions to improve the performance of individual fishermen in reducing incidental mortality and how they will be advised.

(B) A list of its vessels and any certified charter vessels of 400 tons carrying capacity and greater which purse seined for yellowfin tuna at any time during the preceding two years in the ETP, indicating the status of each such vessel during that two year period (i.e. actively fishing in ETP, fishing in other waters; in port for repairs; inactive) and the status of each vessel expected to operate in the ETP in the year in which the submission is made.

(C) The best available data for the 1986 calendar year and any subsequent calendar year on the performance of its purse seine vessels (including certified charter vessels) fishing for tuna associated with marine mammals within the ETP including the following:

(*1*) Total number of tons of yellowfin tuna observed caught in each fishing area by purse seine sets on:

(*i*) Common dolphin and

(*ii*) All other marine mammal species;

(*2*) Total number of marine mammals observed killed in each area by purse seine sets on:

(*i*) Common dolphin and

(*ii*) All other marine mammal species;

(*3*) Number of observed trips and number of observed purse seine sets on marine mammals by the nation's purse seine fleet during the year;

(*4*) Total number of vessel trips and total number of purse seine sets on marine mammals by the nation's purse seine fleet during the year; and

(*5*) The number of observed purse seine sets in which more than 15 marine mammals were killed.

(D) A description of the source of the data requested in paragraph (e)(5)(ii)(C) of this section and, if from other than the Inter-American Tropical Tuna Commission, a description of the method used to obtain data on marine mammal mortality by species/stocks in sufficient detail to certify the authenticity and accuracy of the data.

(iii) The Assistant Administrator's determination on a nation's initial finding will be announced within 120 days of receipt of the information described in paragraph (e)(5)(ii) of this section and will be published in the **Federal Register**. A finding will be valid only for the calendar year for which it was issued.

(iv) A harvesting nation for which a positive finding under this section is in effect may request a renewal of such a finding for the subsequent calendar year by submitting, by the appropriate government official, to the Assistant Administrator the following information either by July 31 of the current year or for nations participating in the IATTC observer program, 14 days after the date the IATTC releases data on porpoise mortality, whichever is later:

(A) A description (with copies of relevant new laws, regulations and guidelines) of any changes in the regulatory program of that nation governing incidental taking of marine mammals in the yellowfin tuna purse seine fishery by its vessels and any certified charter vessels;

(B) Any changes in the number, names or status of vessels on the nation's list of vessels and certified charter vessels which may be involved in the taking of marine mammals incidental to yellowfin tuna purse seining in the following year;

(C) Data required by paragraph (e)(5)(ii)(C) of this section for the preceding fishing year. A nation will be required to submit vessel performance data on any vessels leaving its fleet for that portion of the year that the vessel operated under its flag or as a certified charter vessel;

(D) A description of the actions taken by the nation in the previous year to achieve greater reductions in marine mammal mortality incidental to purse seining by its vessels or any certified charter vessels; and

(E) A statement of the source of the data requested in paragraph (e)(5)(ii)(C) of this section and, if from other than the Inter-American Tropical Tuna Commission, a description of the method used to obtain data on marine mammal mortality by species/stocks in sufficient detail to certify the authenticity and accuracy of the data.

(v)(A) The Assistant Administrator will make a positive finding or renew a positive finding for a harvesting nation if:

(*1*) The harvesting nation has provided all information required by paragraphs (e)(5)(ii) or (e)(5)(iv) of this section;

(*2*) The nation's regulatory program is comparable to the regulatory program of the United States as described in paragraphs (a), (b), (c), (d)(2), and (f) of this section;

(*3*) The data on marine mammal mortality submitted by the harvesting nation are determined to be accurate; and

(*4*) The average kill-per-ton rate for the longest period of time for which data are available, up to 5 years, or for the most recent year, whichever is lower, does not exceed the U.S. kill-per-ton rate for the same period by the amount specified in paragraph (e)(5)(v)(D) of this section below.

(B) During an initial five-year baseline period (1986–90), the Assistant Administrator will not make a negative finding based on the kill-per-ton rate because adequate data are not available. However, the annual kill-per-ton rate for nations must demonstrate a negative trend in order for a nation to retain a positive finding. A negative trend will be assessed by fitting a line to the annual kill-per-ton rates for the years after 1985 and determining the slope of the line. If the U.S. kill-per-ton rate increases during this period, the rate for harvesting nations can increase in proportion to the U.S. rate. However, if the annual kill-per-ton rate for any nation does not decline or remain proportional with any increase in the U.S. rate, after 1988 the Assistant Administrator will issue a negative finding unless, after a review of the nation's explanation of the causes and actions taken, the Assistant Administrator determines that the actions taken are likely to sustain a reduction of marine mammal mortality in the future. In conducting the review, the Assistant Administrator will request specific details concerning the actions taken to identify and counsel individual skippers whose performance is unsatisfactory and to handle any other specific factors causing the high mortality rates.

(C)(*1*) After 1990, those harvesting nations having purse seine vessels of 400 tons carrying capacity or greater that harvest yellowfin tuna in the ETP and whose vessels have observer data for at least five (5) trips and 100 sets per year must have an average mortality rate which is no more than 25 percent greater than the U.S. average.

(*2*) Harvesting nations having purse seine vessels of 400 tons carrying capacity or greater that harvest yellowfin tuna in the ETP and whose vessels have observer data for fewer than five (5) trips and 100 sets per year are recognized as likely to experience greater variation in their kill-per-ton rates due to the small number of sets observed during a year. These nations must have an average mortality rate which is no more than 75 percent greater than the U.S. average.

(D) A nation's average mortality rate will be compared with the U.S. mortality rate which is weighted to account for dissimilar amounts of fishing activities between the two nations in the three ETP fishing areas and for the two species groups.

(E) The Assistant Administrator will consider an explanation of special circumstances, submitted by a harvesting nation with a request for a finding, describing reasons and actions taken to mitigate marginal performance and unusually high rates of marine mammal mortality.

(vi) The Assistant Administrator may require verification of statements made in connection with requests to allow importations. The Assistant Administrator may reconsider a finding upon a request from and the submission of additional information by the harvesting nation.

(vii)(A) Any finding in effect on the date the interim final rule becomes effective will terminate without further notice 180 days after that date unless the Assistant Administrator has received within 120 days of that date a valid, signed and substantially complete application for a new finding in which case the existing finding will remain in effect until the Assistant Administrator's decision is announced.

(B) The time limits specified in paragraphs (e)(5) (ii) and (iii) of this section do not apply to a harvesting nation that applies in a timely manner for a new finding under paragraph (e)(5)(vii)(A) of this section.

(C) Paragraph (e)(5)(vii) of this section is effective only until September 1, 1989.

BILLING CODE 3510-22-M

Proposed Rules

Federal Register
Vol. 53, No. 53
Friday, March 18, 1988

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

DEPARTMENT OF AGRICULTURE

Federal Grain Inspection Service

7 CFR Part 800

Fees for Official Inspection, Weighing, and Appeal Inspection Services Performed in Canada

AGENCY: Federal Grain Inspection Service, USDA.

ACTION: Proposed rule.

SUMMARY: The Federal Grain Inspection Service (FGIS) proposes to increase fees from approximately 124 to 159 percent for official inspection, weighing, and appeal inspection services performed in Canada under the United States Grain Standards Act (USGSA), as amended. This increase is intended to cover the FGIS operating costs.

DATES: Comments must be submitted on or before April 18, 1988.

ADDRESSES: Comments must be submitted in writing to Lewis Lebakken, Jr., Information Resources Staff, RM, USDA, FGIS, Room 1661 South Building, P.O. Box 96454, Washington, DC 20090-6454, telephone (202) 382-1738. All comments received will be made available for public inspection at the above office during regular business hours (7 CFR 1.27(b)). A summary of comments received on this proposal will be published with the final rule.

FOR FURTHER INFORMATION CONTACT: Lewis Lebakken, Jr., telephone (202) 382-1738.

SUPPLEMENTARY INFORMATION:

Executive Order 12291

This proposed rule has been issued in conformance with Executive Order 12291 and Departmental Regulation 1512-1. This action has been classified as nonmajor because it does not meet the criteria for a major regulation established in the Order.

Regulatory Flexibility Act Certification

Mr. W. Kirk Miller, Administrator, FGIS, has determined that this proposed rule will not have a significant economic impact on a substantial number of small entities as defined in the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*) because most users of the official inspection and weighing services do not meet the requirements for small entities.

Proposed Action

The USGSA, as amended (7 U.S.C. 71 *et seq.*), requires FGIS to charge and collect reasonable fees that cover its estimated cost for performing official inspection, weighing, reinspection, and appeal inspection services. The fees are to cover the costs to FGIS for performance of these official services, including related administrative and supervisory costs. These fees appear in § 800.71 of the regulations (7 CFR 800.71). The USGSA fees for official inspection, weighing, and appeal inspection services performed in Canada were last revised and made effective on January 5, 1987 (51 FR 43723), to cover as nearly as practicable, the projected fiscal year 1987 operating costs.

In fiscal year 1987, FGIS revenues for official inspection, weighing, and appeal inspection services performed in Canada totaled $227,000, operating costs totaled $378,000, resulting in a loss of $151,000, which seriously depleted the applicable operating reserves.

FGIS operating costs includes personnel compensation, personnel benefits, travel, rent, communications, utilities, contractual services, supplies, and equipment. While the demand for the services FGIS provides in Canada may fluctuate, certain FGIS costs remain constant in order to provide quality service on demand.

The period October 1986 through September 1987, the most current actual 1-year figures available to compare the FGIS operating costs with revenue, was used to project budgeted fiscal year 1988 operating costs and thereby establish revenue levels necessary to cover projected operating costs for services performed in Canada. The FGIS projected fiscal year 1988 operating costs are expected to be approximately $403,000 and fiscal year 1988 revenues are expected to be approximately $306,000 (assuming the proposed fees are implemented on June 1, 1988). The proposed fee increase would reduce the estimated revenue deficit in fiscal year 1988, and cover estimated costs in subsequent years.

The proposed increase in fees for official inspection, weighing, and appeal inspection services performed in Canada would be from approximately 124 to 159 percent. The current regular workday hourly fees for original inspection, weighing, and appeal inspection services would be changed from $47.60 per hour for contract services and from $63.80 for noncontract services to $114.00 and $143.00 respectively. The nonregular workday services would be changed from $58.40 per hour for contract services and from $76.60 for noncontract services to $151.00 and $169.00, respectively.

In order to contain the costs of providing services in Canada, during fiscal year 1988, the FGIS plans to provide inspection, weighing, and appeal service in Canada with (1) fewer employees stationed in Canada, and (2) with employees being detailed to Canada, on an as needed basis, from FGIS offices located in the United States.

List of Subjects in 7 CFR Part 800

Administrative practice and procedure, Export, Grain.

For the reasons set out in the preamble, 7 CFR Part 800 of the regulations is proposed to be amended as follows:

PART 800—GENERAL REGULATIONS

1. The authority citation for Part 800 continues to read as follows:

Authority: Pub. L. 94-582, 90 Stat. 2867, as amended (7 U.S.C. 71 *et seq.*)

2. In § 800.71(a), Schedule B is revised to read as follows:

§ 800.71 Fees assessed by the Service.

(a) * * *

SCHEDULE B—FEES FOR OFFICIAL INSPECTION, WEIGHING, AND APPEAL INSPECTION SERVICES PERFORMED IN CANADA[1]

Inspection and weighing service (bulk or sacked grain)	Regular workday (Monday through Saturday)	Nonregular workday (Sunday and holiday)
(1) Original inspection services and official weighing services:[2,3]		
(i) Contract services (per hour per service representative)	$114.00	$151.00
(ii) Noncontract service (per hour per service representative)	142.00	189.00
(2) Extra copies of certificates (per copy)	3.00	3.00

[1] Official inspection and weighing services include, but are not limited to grading, weighing, sampling, stowage examination, equipment testing, scale testing and certification, test weight revalification, evaluation of inspection and weighing equipment demonstrating official inspection and weighing functions, furnishing standard illustrations, and certifying inspection and weighing results.

[2] Fees for reinspection and appeal inspection services shall be assessed at the applicable contract or noncontract hourly rate as the original inspection. However, if additional personnel are required to perform the reinspection or appeal inspection service, the applicant will be assessed the noncontract original inspection hourly fee.

[3] Board appeal inspections are based on file samples. See § 800.71, Schedule A for Board Appeal fees.

* * * * *

Dated: February 24, 1988.

W. Kirk Miller,

Administrator.

[FR Doc. 88-6020 Filed 3-17-88; 8:45 am]

BILLING CODE [illegible]

Food Safety and Inspection Service

9 CFR Parts 307, 350, 351, 352, 354, 355, 362, and 381

[Docket No. 87-026P]

Fee Increase for Inspection Services

AGENCY: Food Safety and Inspection Service, USDA.

ACTION: Proposed rule.

SUMMARY: The Food Safety and Inspection Service (FSIS) is proposing to amend the Federal meat and poultry products inspection regulations to increase fees charged by FSIS to provide overtime and holiday inspection, identification, certification, or laboratory services to meat and poultry establishments. The fees would reflect the increased costs of providing these services due to the increase in salaries of Federal employees allocated by Congress under the Federal Pay Comparability Act of 1970 and a change in the fee structure to include the Science program as support for the meat and poultry inspection services.

DATE: Comments must be received on or before: April 4, 1988.

ADDRESS: Send written comments to the Policy Office, Attention: Linda Carey, FSIS Hearing Clerk, Room 3171, South Agriculture Building, Food Safety and Inspection Service, U.S. Department of Agriculture, Washington, DC 20250. Oral comments as provided under the Poultry Products Inspection Act should be directed to Mr. William L. West, (202) 447-3367. (See also "Comments" under Supplementary Information.)

FOR FURTHER INFORMATION CONTACT: Mr. William L. West, Director, Budget and Finance Division, Administrative Management, Food Safety and Inspection Service, U.S. Department of Agriculture, Washington, DC 20250, (202) 447-3367.

SUPPLEMENTARY INFORMATION:

Executive Order 12291

This proposed rule is issued in conformance with Executive Order 12291 and has been determined not to be a "major rule." It will not result in an annual effect on the economy of $100 million or more; a major increase in costs or prices for consumers, individual industries, Federal, State, or local government agencies, or geographic regions; or significant adverse effects on competition, employment, investment, productivity, innovation, or the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets. The fee increases only reflect an increase in costs to establishments that elect to utilize certain inspection services.

Effect on Small Entities

The Administrator, Food Safety and Inspection Service, has determined that this action will not have a significant economic impact on a substantial number of small entities as defined by the Regulatory Flexibility Act, Pub. L. 96-354 (5 U.S.C. 601), because the fees provided for in this document merely reflect a minimal increase in the costs currently borne by those entities which elect to utilize certain inspection services and a corrected calculation of program support costs.

Comments

Interested persons are invited to submit written comments concerning this proposal. Comments must be sent in duplicate to the Regulations Office and should refer to the docket number located in the heading of this document. Any person desiring an opportunity for an oral presentation of views must make such request to Mr. West so that arrangements may be made for such views to be presented. A transcript shall be made of all views orally presented. Comments submitted in response to this document will be made available for public inspection in the Regulations Office between 9:00 a.m. and 4:00 p.m., Monday through Friday.

Background

Each year, the fees for certain services rendered to operators of official meat and poultry establishments, importers, or exporters by FSIS are reviewed and a cost analysis is performed to determine if such fees are adequate to recover the cost of providing the services.[1] The analysis relates to fees charged in connection with overtime and holiday inspection, identification, certification, or laboratory services. The fees to be charged for these services are determined by an analysis of data on the current cost of these services, as well as anticipated costs associated with changes in operations of the program, coupled with the increase in those costs due to an increase in salaries of Federal employees allocated by Congress under the Federal Pay Comparability Act of 1970 or any other increases affecting Federal employees, such as costs for travel and benefits.

In this year's cost analysis, the Agency has reevaluated its organizational structure to identify all components that support the inspection services. This is in accordance with OMB Circular No. A-25 which states that the cost computation shall cover the direct and indirect cost to the government of carrying out the activity. In reviewing the organizational structure and their functions, the Science program, which in previous years was omitted from the cost computation, was identified as an indirect cost of carrying out the inspection activity. The Science program conducts all scientific product testing and research activities for the Agency through its field and contract laboratories. Normally, the volume of laboratory samples tested is in proportion to the volume of product inspected including that which is produced during overtime or on holidays. In addition to systematically scheduled product sampling, inspectors submit samples for analysis any time they suspect problems, including during overtime or holiday production. In the future, Science will play a more significant role in FSIS regulatory activities as the inspection system changes from the traditional organoleptic inspection to a scientific-based system to detect chemical and microbial hazards. For example, listeria and salmonella contamination are current health issues receiving increased Agency attention.

Based on the Agency's analysis of the increased costs in providing these services, incurred as a result of a January 1988 pay raise of two percent for Federal employees, increased costs of the new retirement system in 1988, increased health insurance and travel costs, and the inclusion of Science as program support, FSIS proposes to increase the fees relating to such services.

Mandatory inspection by Federal inspectors of meat and poultry slaughtered and/or processed at official establishments is provided for under the Federal Meat Inspection Act (21 U.S.C. 601 *et seq.*) and the Poultry Products Inspection Act (21 U.S.C. 451 *et seq.*). Such inspection is required to ensure the safety, wholesomeness, and proper labeling of meat and poultry products and the ordinary costs of providing it are borne by the U.S. Government. However, costs for these inspection services performed on holidays or on an overtime basis my be incurred to accommodate the business needs of particular establishments. Furthermore, there may also arise from time-to-time a need for certain laboratory services which are not covered under the base time, overtime, and/or holiday costs. For example, if a suspect product is rejected, and the establishment requests and FSIS agrees to perform additional laboratory analysis to verify that the reconditioned product is in compliance, the cost of the additional laboratory services will be borne by the particular establishment at the rate of $43.80 per hour. Any or all of these costs, which are not a part of the mandatory inspection service, are recoverable by the Government.

Currently, § 307.5 (9 CFR 307.5) of the meat inspection regulations provides that FSIS shall be reimbursed for the cost of meat inspection on holidays or on an overtime basis at the rate of $22.84 per inspector hour. Similarly, § 381.38 (9 CFR 381.38) of the poultry products inspection regulations provides that FSIS will be reimbursed at the rate of $22.84 per inspector hour for overtime and holiday poultry inspection services. These fees would be increased to $24.68 per inspector hour.

FSIS also provides a range of voluntary inspection services, the costs of which are totally recoverable by the Government. These services, provided under Subchapter B—Voluntary Inspection and Certification Service, are provided under the Agricultural Marketing Act of 1946, as amended (7 U.S.C. 1621 *et seq.*), to assist in the orderly marketing of various animal products and byproducts not subject to the Federal Meat Inspection Act or the Poultry Products Inspection Act.

The basic hourly rate for providing such certification and inspection service is currently $19.04 per inspector hour (sections 350.7, 351.8, 351.9, 352.5, 354.101, 355.12, and 362.5). The overtime and holiday hourly rate is currently $22.84. The rate for laboratory services is currently $41.36 per hour. The hourly rates for these services would be increased to $21.16, $24.68, and $43.80, respectively.

List of Subjects

9 CFR Part 307

Meat inspection, Reimbursable services.

9 CFR Part 350

Meat inspection, Reimbursable services, Voluntary inspection, Certification service.

9 CFR Part 351

Meat inspection, Reimbursable services, Technical animal fats.

9 CFR Part 352

Meat inspection, Reimbursable services, Voluntary inspection.

9 CFR Part 354

Meat inspection, Reimbursable services, Voluntary inspection.

9 CFR Part 355

Meat inspection, Reimbursable services, Certified products.

9 CFR Part 362

Meat inspection, Reimbursable services, Voluntary poultry.

9 CFR Part 381

Poultry products inspection, Reimbursable services.

Accordingly, the Federal meat and poultry products inspection regulations in 9 CFR would be amended as follows:

PART 307—AMENDED

1. The authority citation for Part 307 would be revised to read as follows:

Authority: 7 U.S.C. 394, 21 U.S.C. 621, 695; 7 CFR 2.17 (g) and (i), 2.55.

2. Section 307.5(a) would be revised to read as follows:

§ 307.5 Overtime and holiday inspection service.

(a) The management of an official establishment, an importer, or an exporter shall pay the Food Safety and Inspection Service $24.68 per hour per Program employee to reimburse the Program for the cost of the inspection service furnished on any holiday as specified in paragraph (b) of this section; or for more than 8 hours on any day, or more than 40 hours in any administrative workweek Sunday through Saturday.

* * * * *

PART 350—[AMENDED]

3. The authority citation for Part 350 would be revised to read as follows:

Authority: 7 U.S.C. 1622, 1624; 7 CFR 2.17 (g) and (i), 2.55

4. Section 350.7(c) would be revised to read as follows:

§ 350.7 Fees and charges.

* * * * *

(c) The fees to be charged and collected for service under the regulations in this Part shall be at the rate of $21.16 per hour for base time, $24.68 per hour for overtime including Saturdays, Sundays, and holidays, and $43.80 per hour for certain laboratory services which are not covered under the base time, overtime, and/or holiday costs. Such fees shall cover the costs of the service and shall be charged for the time required to render such service. Where appropriate, this time will include, but will not be limited to, the time required for travel of the inspector or inspectors in connection therewith during the regularly scheduled administrative workweek.

* * * * *

PART 351—[AMENDED]

5. The authority citation for Part 351 would be revised to read as follows:

Authority: 7 U.S.C. 1622, 1624; 7 CFR 2.17 (g) and (i), 2.55.

6. Section 351.8 would be revised to read as follows:

§ 351.8 Charges for surveys of plants.

Applicants for the certification service shall pay the Department for salary costs at the rate of $21.16 per hour for base time, $24.68 per hour for overtime, travel, and per diem allowances at rates currently allowed by the Federal Travel Regulations, and other expenses incidental to the initial survey of the rendering plants or storage facilities for which certification service is requested.

7. Section 351.9(a) would be revised to read as follows:

§ 351.9 Charges for examinations.

(a) The fees to be charged and collected by the Administrator for

examination shall be $21.16 per hour for base time and $24.68 per hour for overtime including Saturdays, Sundays, and holidays, as provided for in § 351.14, and $43.80 per hour for certain laboratory services which are not covered under the base time, overtime, and/or holiday costs and which are required to determine the eligibility of any technical animal fat for certification under the regulations in this Part. Such fees shall be charged for the time required to render such service, including, but not limited to, the time required for the travel of the inspector or inspectors in connection therewith.

* * * * *

PART 352—[AMENDED]

8. The authority citation for Part 352 would be revised to read as follows:

Authority: 7 U.S.C. 1622, 1624; 7 CFR 2.17(g) and (i), 2.55.

9. Section 352.5(c) would be revised to read as follows:

§ 352.5 Fees and charges.

* * * * *

(c) The fees to be charged and collected for service under the regulations in this Part shall be at the rate of $21.16 per hour for base time, $24.68 per hour for overtime including Saturdays, Sundays, and holidays, and $43.80 per hour for certain laboratory services which are not covered under the base time, overtime, and/or holiday costs. Such fees shall cover the costs of the service and shall be charged for the time required to render such service, including, but not limited to, the time required for the travel of the inspector or inspectors in connection therewith during the regularly scheduled administrative workweek.

* * * * *

PART 354—[AMENDED]

10. The authority citation for Part 354 would be revised to read as follows:

Authority: 7 U.S.C. 1622, 1624; 7 CFR 2.17(g) and (i), 2.55.

11. Section 354.101 (b) and (c) would be revised to read as follows:

§ 354.101 On a fee basis.

* * * * *

(b) The charges for inspection service will be based on the time required to perform such services. The hourly rate shall be $21.16 for base time and $24.68 for overtime or holiday work.

(c) Charges for certain laboratory analysis or laboratory examination of rabbits under this Part related to inspection service shall be $43.80 per hour for that part which is not covered under the base time, overtime, and/or holiday costs.

PART 355—[AMENDED]

12. The authority citation for Part 355 would be revised to read as follows:

Authority: 7 U.S.C. 1622, 1624; 7 CFR 2.17(g) and (i), 2.55.

13. Section 355.12 would be revised to read as follows:

§ 355.12 Charge for service.

The fees to be charged and collected by the Administrator shall be $21.16 per hour for base time, $24.68 per hour for overtime, including Saturdays, Sundays, and holidays, and $43.80 per hour for certain laboratory services which are not covered under the base time, overtime, and/or holiday costs. Such fees shall reimburse the Service for the costs or the inspection service furnished.

PART 362—[AMENDED]

14. The authority citation for Part 362 would be revised to read as follows:

Authority: 7 U.S.C. 1622, 1624; 7 CFR 2.17(g) and (i), 2.55.

15. Section 362.5(c) would be revised to read as follows:

§ 362.5 Fees and charges.

* * * * *

(c) The fees to be charged and collected for service under the regulations in this Part shall be at the rate of $21.16 per hour for base time, $24.68 per hour for overtime including Saturdays, Sundays, and holidays, and $43.80 per hour for certain laboratory services which are not covered under the base time, overtime, and/or holiday costs. Such fees shall cover the costs of the services and shall be charged for the time required for the travel of the inspector or inspectors in connection therewith during the regularly scheduled administrative workweek.

* * * * *

PART 381—[AMENDED]

16. The authority citation for Part 381 would be revised to read as follows:

Authority: 21 U.S.C. 463, 468; 7 CFR 2.17(g) and (i), 2.55.

17. Section 381.38(a) would be revised to read as follows:

§ 381.38 Overtime and holiday inspection service.

(a) The management of an official establishment, an importer, or an exporter shall pay the Food Safety and Inspection Service $24.68 per hour per Program employee to reimburse the Program for the cost of the inspection service furnished on any holiday specified in paragraph (b) of this section; or for more than 8 hours on any day, or more than 40 hours in any administrative workweek Sunday through Saturday.

BILLING CODE 3410-DM-M

NUCLEAR REGULATORY COMMISSION

10 CFR Part 50

Licensee Announcements of Inspectors

AGENCY: Nuclear Regulatory Commission.

ACTION: Proposed rule.

SUMMARY: The Nuclear Regulatory Commission is proposing to amend its regulations to ensure that the presence of NRC inspectors on power reactor sites is not announced or otherwise communicated to licensee and contractor personnel without the expressed request to do so by the inspector. This change will allow the NRC inspectors, badged at the facility, to observe ongoing activities as they are being performed without advanced notification of the inspection to licensee and contractor personnel. There is a need for this change because of the possible altering of attention and performance levels of a licensee and/or its contractors when the licensee is aware of NRC surveillance. Past incidences where site and/or contractor personnel have been notified of NRC's presence onsite have heightened concern in this area.

DATES: Submit comments by April 18, 1988. Comments received after this date will be considered if it is practical to do so, but assurance of consideration cannot be given except as to comments received on or before this date.

ADDRESSES: Send comments to: Secretary, U.S. Nuclear Regulatory Commission, Washington, DC 20555, ATTN: Docketing and Service Branch.

Hand deliver comments to: Room 1121, 1717 H Street NW., Washington, DC 20555, between 7:30 a.m. and 4:15 p.m.

Examine comments received at: The NRC Public Document Room, 1717 H Street NW., Washington, DC 20555.

FOR FURTHER INFORMATION CONTACT: George Barber, U.S. Nuclear Regulatory Commission, Washington, DC 20555, Telephone (301) 492-1296.

SUPPLEMENTARY INFORMATION: This proposed rule is intended to ensure that NRC inspectors be granted immediate and unannounced access (i.e., unfettered access equivalent to access provided regular plant employees) to licensed facilities, following proper identification and compliance with applicable access control procedures. The NRC proposes that no access control measures or other means may be employed by the licensee or its contractors to intentionally give notice to other persons of the arrival and presence of a NRC inspector at a facility, unless the licensee is specifically requested to do so by the NRC inspector. There have been instances in the past at several facilities where the ability of properly badged NRC inspectors to inspect and assess—on an unannounced basis—activities related to the license or construction permit was compromised by the licensee employees or contractor employees who informed others at the facility of the presence of the NRC inspectors. The proposed change to 10 CFR 50.70 is to clarify that NRC inspectors, badged at the facility, have immediate access to ongoing activities as these activities are being performed without accompaniment and without advanced notification of the inspection. This is especially important during non-normal business hours when operating personnel might assume NRC inspectors would not be on site.

Environment Impact: Categorical Exclusion

The NRC has determined that this proposed change is the type of action described in categorical exclusion 10 CFR 51.22(c)(2). Therefore neither an environmental impact statement nor an environmental assessment has been prepared for this proposed rule.

Paperwork Reduction Act Statement

The proposed rule does not contain a new or amended information collection requirement subject to the Paperwork Reduction Act of 1980 (44 U.S.C. 3501 et seq.). Existing requirements were approved by the Office of Management and Budget approval number 3150-0011.

Regulatory Analysis

This proposed rule will have no significant impact on state and local governments and geographical regions. It may have significant impact on health, safety, and the environment, but only in the sense of preventing adverse impacts on health, safety, and the environment through more effective inspections. The intent of the rule is to clarify that NRC inspectors are to have a realistic picture of the actual conditions at a site, and therefore, be better able to identify potentially dangerous conditions and/or practices for corrective action and to ensure that licensees comply with laws, regulations, and orders administered by the NRC. This constitutes the regulatory analysis for this proposed rule.

Regulatory Flexibility Certification

In accordance with the Regulatory Flexibility Act, 5 U.S.C. 605(b), the Commission certifies that this rule does not have a significant economic impact on a substantial number of small entities. The rule applies only to licensees authorized to construct or operate nuclear power reactors, who are not small business entities within the meaning of the act or implementing regulations. Therefore, a regulatory flexibility analysis has not been prepared.

Backfit Analysis

The NRC has determined that a backfit analysis is not required for this proposed rule because this amendment is not within the definition of backfitting, as set out in 10 CFR 50.109(a)(1).

List of Subjects in 10 CFR Part 50

Antitrust, Classified information, Fire protection, Incorporation by reference, Intergovernmental relations, Nuclear power plants and reactors, Penalty, Radiation protection, Reactor siting criteria, Reporting and recordkeeping requirements.

For the reasons set out in the preamble and under authority of the Atomic Energy Act of 1954, as amended the Energy Reorganization Act of 1974, as amended, and 5 U.S.C. 553, the NRC is proposing to adopt the following amendment to 10 CFR Part 50.

PART 50—DOMESTIC LICENSING OF PRODUCTION AND UTILIZATION FACILITIES

1. The authority citation for Part 50 continues to read as follows:

Authority: Secs. 102, 103, 104, 105, 161, 182, 183, 186, 189, 68 Stat. 936, 937, 938, 948, 953, 954, 955, 956, as amended, sec. 234, 83 Stat. 1244 as amended (42 U.S.C. 2132, 2133, 2134, 2135, 2201, 2232, 2233, 2236, 2239, 2282); secs. 201, as amended, 202, 206, 88 Stat. 1242, as amended, 1244, 1246 (42 U.S.C. 5841, 5842, 5846).

Section 50.7 also issued under Pub. L. 95-601, sec. 10, 92 Stat. 2951 (42 U.S.C. 5851). Section 50.10 also issued under secs. 101, 185, 68 Stat. 936, 955, as amended (42 U.S.C. 2131, 2235); sec. 102, Pub. L. 91-190, 83 Stat. 853 (42 U.S.C. 4332). Sections 50.23, 50.35, 50.55, and 50.56 also issued under sec. 185, 68 Stat. 955 (42 U.S.C. 2235). Sections 50.33a, 50.55a, and Appendix Q also issued under sec. 102, Pub. L. 91-190, 83 Stat. 853 (42 U.S.C. 4332). Section 50.34 and 50.54 also issued under sec. 204, 88 Stat. 1245 (42 U.S.C. 5844). Sections 50.58, 50.91, and 50.92 also issued under Pub. L. 97-415, 96 Stat. 2073 (42 U.S.C. 2239). Section 50.78 also issued under sec. 122, 68 Stat. 939 (42 U.S.C. 2152). Sections 50.80-50.81 also issued under sec. 184, 68 Stat. 954, as amended (42 U.S.C. 2234). Section 50.103 also issued under sec. 108, 68 Stat. 939, as amended (42 U.S.C. 2138). Appendix F also issued under sec. 187, 68 Stat. 955 (42 U.S.C. 2237).

For the purposes of sec. 223, 68 Stat. 958, as amended (42 U.S.C. 2273); §§ 50.10 (a), (b), and (c), 50.44, 50.46, 50.48, 50.54, and 50.80(a) are issued under sec. 161(b), 68 Stat. 948, as amended (42 U.S.C. 2201(b)); §§ 50.10(b) and (c), and 50.54 are issued under sec. 161(i), 68 Stat. 949, as amended (42 U.S.C. 2201(i)); and §§ 50.9, 50.55(e), 50.59(b), 50.70, 50.71, 50.72, 50.73, and 50.78 are issued under sec. 161(o), 68 Stat. 950, as amended (42 U.S.C. 2201(o)).

2. In § 50.70, paragraph (b)(4) is added to read as follows:

§ 50.70 Inspections.

* * * * *

(b) * * *

(4) The licensee or construction permit holder shall ensure that the arrival and presence of an NRC inspector, who has been properly authorized facility access as described in paragraph (b)(3) of this section, is not announced or otherwise communicated by its employees or contractors to other persons at the facility unless specifically requested to do so by the NRC inspector.

Dated at Bethesda, MD, this 8th day of March 1988.

For the Nuclear Regulatory Commission.

Victor Stello, Jr.,

Executive Director for Operations.

BILLING CODE 7590-01-M

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. 88–ANE–05]

Airworthiness Directives; Switlik Parachute Co., Inc., TSO–C13 Life Preservers and TSO–C72 Individual Flotation Devices

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: This notice proposes to adopt an airworthiness directive (AD) that would require inspection for cracks and, if needed, replacement of Carbon Dioxide (CO_2) inflators on Switlik TSO–C13 Life Preservers and TSO–C72 Individual Flotation Devices. The proposed AD is needed to prevent the malfunctioning of the CO_2 inflators on TSO–C13 Life Preservers and TSO–C72 Individual Flotation Devices which could result in inadequate inflation of the devices when operated during emergency conditions.

DATES: Comments must be received on or before April 28, 1988.

ADDRESSES: Comments on the proposal may be mailed in duplicate to: Office of the Regional Counsel, Attn: Rules Docket No. 88–ANE–05, Federal Aviation Administration, New England Region, 12 New England Executive Park, Burlington, Massachusetts 01803; or delivered in duplicate to Room 311 at the above address.

Comments delivered must be marked: "Docket No. 88–ANE–05".

Comments may be inspected at the New England Region, Office of the Regional Counsel, Room 311, between the hours of 8:00 a.m. and 4:30 p.m., Monday through Friday, except federal holidays.
